Honolulu members of the Lithographers and Photoengravers International Union yesterday wrote to the Hawaii Congressional delegation in support of the Newspaper Preservation Bill.

This is the third Hawaii union to do so, the Hawaii Newspaper Guild (AFL-CIO) and the ILWU having taken similar action last week.

Thomas K. Sing, president of Local 201, said the lithographers and photoengravers are fearful "that the recent Supreme Court decision in the Tucson newspaper case will put The Advertiser out of business unless the Newspaper Preservation Bill becomes law."

"We are also concerned," Sing said in his letters to Sens. Hiram L. Fong and Daniel K. Inouye and to Reps. Patsy T. Mink and Spark M. Matsunaga, "with the threat posed by the decision to many other American daily papers which are operating under joint facility agreements."

Many of the union's members work at the Hawaii Newspaper Agency, which performs all non-editorial functions for The Advertiser and the Star-Bulletin.

"We can assure you," Sing told the delegation, "that there is strong editorial and news competition between our two Honolulu dailies. Indeed, there is more competition today than there was prior to the formation of the joint facility."

"A few weeks ago in joint negotiations with the five other newspaper unions, we were able to obtain wages that are among the highest in the nation."

"Incidentally, in Honolulu the newspaper unions have negotiated jointly for almost 10 years—and this approach to collective bargaining has virtually eliminated the possibility of a multiplicity of strikes which sometimes take place when union agreements have separate expiration dates."

Senators Fong and Inouye and Representative Matsunaga are among co-sponsors of the Newspaper Preservation Bill.

This legislation would provide that a financially failing paper which consolidates its advertising, circulation and mechanical departments but not its editorial department with its stronger competitor, will be treated under law as if it were in a full merger. No predatory practices would be permitted.

MACHINISTS BACK NEWS BILL

Support for the Newspaper Preservation Bills now pending in Congress was voted Tuesday by members of the International Association of Machinists, Lodge 1245, who are employed by the Hawaii Newspaper Agency.

The Machinists are the fourth Hawaii union to give their support to the legislation, which is being given bipartisan support in Congress.

Carl J. Guntert, senior business agent for the Machinists, said Lodge 1245 directed its

secretary to write to the union's international headquarters and to congressman in Washington, D.C., urging support of the Newspaper Preservation Bills.

Guntert said the Machinists are concerned about the effect of a recent U.S. Supreme Court decision involving the Tucson newspapers.

"Although we understand there was some difference between the Tucson case and the situation in Honolulu," Gunter said, "we are fearful that unless this legislation is adopted some court may make a similar ruling relative to The Advertiser and the Star-Bulletin."

"This could be to the detriment of the newspaper industry and the employees of that industry in the Islands."

"We think it makes a lot of sense to make full usage of the printing equipment at the News Building by printing the morning paper at night and the evening paper in the daytime on the same presses."

The Hawaii Newspaper Agency, which is the joint production facility for The Advertiser and Star-Bulletin, employs the Machinists who gave their support to the Newspaper Preservation Bills. Other unions which have pledged similar support include the Hawaii Newspaper Guild, ILWU and Lithographers & Photoengravers.

TEAMSTERS, HOTEL, RESTAURANT UNIONS FAVOR NEWSPAPER PRESERVATION BILLS

The Hawaii Congressional delegation has been urged to give "hearty support" to the Newspaper Preservation Bills by the Teamsters & Allied Workers Local 996 and the Hotel, Restaurant Employees & Bartenders' Union, Local 5, AFL-CIO.

Letters signed by Arthur A. Rutledge, president of the unions, have been sent to Senators Hiram L. Fong and Daniel K. Inouye and to Representatives Spark M. Matsunaga and Patsy T. Mink.

The legislation would provide that when a newspaper in failing financial circumstances merges its advertising, circulation and mechanical departments, but not its ownership or editorial functions, with a stronger competitor it would be treated under law as if it were in a full merger.

Such a law is needed to grant relief from a U.S. Supreme Court ruling against such joint-plan operations—although complete mergers involving a single ownership of morning and afternoon papers and a single editorial policy have been permitted in many large cities.

The Hawaii Teamsters and Hotel Workers Unions' letter is in accord with those from five unions which have contracts with the local newspapers and from the Hawaii Education Association.

Text of the letter follows:

"Hawaii Teamsters & Allied Workers, Local 996, and Hotel, Restaurant Employees & Bartenders' Union, Local 5, are concerned over the jeopardy in which The Honolulu Advertiser is placed by the recent ruling of the U.S. Supreme Court in the Tucson press case.

"It is common knowledge that The Advertiser went through a substantial period of losses prior to the merger of its commercial departments with those of the financially stronger Honolulu Star-Bulletin.

"As a consequence of the consolidation of mechanical, advertising and circulation functions but with maintenance of separate ownerships and separate editorial staffs and policies, The Honolulu Advertiser has been able to continue publication; so that the papers here provide two different and independent viewpoints to the community.

"Although Local 996 and Local 5 do not always agree with either paper on issues facing organized labor, the community and the nation, we fully recognize the importance of having the greatest possible diversity of independent opinion and comment."

"It is our understanding that a score of other cities across America have similar joint-plan arrangements and are also seeking legislative relief from the Court's ruling on Tucson.

"The fact that 33 United States Senators and some 90 Representatives of both parties and of widely varied views have sponsored Newspaper Preservation Bills is indicative of the magnitude of the problem and the need for a Congressional remedy.

"These Newspaper Preservation Bills have the announced support of the Hawaii Newspaper Guild, the Printing Pressmen & Assistants Union, Local 413, the Lithographers & Photoengravers Union, Local 201, International Association of Machinists, Local 1245 and the ILWU, Local 142, all of whom have had contracts with the two Honolulu dailies for the six years of the joint-plan operation, and are thus intimately familiar with the economics of the local press.

"Local 996 and Local 5 join with these unions in urging the Hawaii Congressional delegation and their colleagues to give hearty support to the Newspaper Preservation Bills."

[From the Honolulu Advertiser, Apr. 15, 1969]
NEWSPAPER BILLS GIVEN SUPPORT BY PRESSMEN

The Honolulu Printing Pressmen & Assistants Union, Local 413, has announced its support of the Newspaper Preservation Bills now pending in Congress.

The union whose members are employed by the Hawaii Newspaper Agency, joint production facility for The Advertiser and the Star-Bulletin, is the fifth labor organization to pledge its support to the Congressional legislation.

John Pedro, president of the Pressmen's Union, said he and his members are asking Hawaii's Congressional delegation and other Congressmen to support the Newspaper Preservation Bills.

He said passage of the bills would "eliminate the threat to the existence of the morning Honolulu Advertiser, a threat created by the recent Supreme Court decision in the Tucson newspaper case.

"We do not challenge the high court," he said, adding:

"But we believe the decision, if applied to all papers produced and distributed on a joint facility basis, threatens the existence of many daily papers and will be the cause of many cities winding up with one daily paper or with single ownership.

"The intent of the Sherman Act, as we understand it, is to prevent monopolies.

"The Tucson decision, unless remedied by legislation, will encourage newspaper monopolies in certain cities and defeat the purpose of the Sherman Act."

Pedro pointed out that the Pressmen have negotiated with The Advertiser and the Star-Bulletin (and their joint production facility, the Hawaii Newspaper Agency) for more than 10 years.

"We are familiar with the past and current financial status of both," he said. "It is our opinion that The Advertiser would have died had it not entered into a joint facility arrangement with its competitor."

Pedro also pointed out that in Honolulu "the two dailies have two distinct editorial policies and Honolulu has superior news coverage.

"It is the consensus of the community that it would be a tragedy for Honolulu to become a single-ownership city or a single-daily city," he said.

Pedro and the 152 members of the Honolulu and Hilo local of the Pressmen's Union said Congressional support of the Newspaper Preservation Bills "would contribute greatly to the preservation of competitive journalism here and in several other cities."

Other newspaper unions which have expressed support for the bills are the Hawaii

Newspaper Guild, Lithographers & Photoengravers, ILWU and International Association of Machinists.

[From the Honolulu Advertiser, May 15, 1969]
THE 17,000-MEMBER HGEA FAVORS
NEWSPAPER BILLS

The 17,000-member Hawaiian Government Employees Association has endorsed the Newspaper Preservation Bills now before Congress and urged their "expeditious passage."

The legislation is being sponsored in the U.S. Senate by Hawaii Sens. Daniel K. Inouye and Hiram L. Fong; and Sens. Mike Mansfield, the majority leader; Fred R. Harris, national Democratic chairman; Alan Cranston, Hugh Scott, Wallace Bennett, George Murphy, Howard Baker and 24 others.

In the House the sponsors include Reps. Spark Matsunaga, Ed Edmondson, House majority whip Hale Boggs, James Symington, Edith Green, Don Clausen, William Malliard, Paul McCloskey Jr. and 82 others.

The HGEA support of the measure is the latest in a series of union and other endorsements in Hawaii.

Daniel K. Ainoa, executive director of HGEA, sent the following letter to the Hawaii delegation:

"The Hawaiian Government Employees Association, with 17,000 members, is writing to ask your support of the Newspaper Preservation Bills (S-1520 and HR-8765) and to urge their expeditious passage.

"We are aware of the recent court decision in the Tucson newspaper case and the threat it represents to the survival of the Honolulu Advertiser and its joint-plan relationship with the afternoon Star-Bulletin.

"The Advertiser was widely known to be in an ominous financial condition before entering in 1962 into a consolidation of its commercial departments with those of the Star-Bulletin (but with a retention of independent ownerships and editorial staffs and policies). It is clear that if the joint arrangement were ordered dissolved, The Advertiser could not survive as a separate institution.

"The two daily voices which we presently have are obviously better than having a single editorial policy in the community.

"We believe with Judge Learned Hand that the First Amendment presupposes that 'right conclusions are more likely to be gathered out of a multitude of tongues, than through any kind of authoritative selection. To many this is, and always will be, folly; but we have staked upon it our all.'

"With the general welfare of Honolulu in mind, we would appreciate whatever you and your colleagues are able to do to facilitate the passage of the Newspaper Preservation Bills."

Other organizations which have similarly backed the legislation include the Hawaii Newspaper Guild, the Printing Pressmen and Assistants Union Local 413, the Lithographers & Photoengravers Union Local 201, International Association of Machinists Local 1245, the ILWU Local 142, the Teamsters & Allied Workers Local 996, the Hotel, Restaurant Employees and Bartenders Union Local 5, AFL-CIO, the Hawaii Education Association, and the Retail Board of the Chamber of Commerce.

[From the Honolulu Sunday Star-Bulletin & Advertiser, Apr. 6, 1969]

ILWU BACKS BILL TO SAVE NEWSPAPER

Support of the Newspaper Preservation Bill now in Congress was voiced yesterday by the International Longshoremen's and Warehousemen's Union in Hawaii, on behalf of its 26,000 members.

Carl Damaso, president of the statewide Local 142, said the remedial legislation is necessary because of the Supreme Court ruling in a Tucson newspaper case.

The decision, he said in a letter to Hawaii's congressional delegation, poses a real threat

to The Honolulu Advertiser and other papers which operate on a joint-plan basis.

Under this plan, commercial and production facilities of two papers are consolidated, but separate ownerships and separate and independent editorial policies and staffs are maintained.

Twenty-one U.S. cities, from San Francisco to Pittsburgh, from Nashville to Salt Lake City, have such arrangements as an alternative to a single ownership.

SPONSORS OF BILL

Sens. Daniel K. Inouye and Hiram L. Fong and Rep. Spark M. Matsunaga are among the 32 senators and more than 90 representatives sponsoring the Newspaper Preservation Bill.

The ILWU letter pointed out that "we represent the circulation department employees of both The Advertiser and its afternoon competitor, the Honolulu Star-Bulletin, and we understand the economics of the newspaper industry.

"Because of the desirability—yes, the necessity—of maintaining two competing and editorial voices in Hawaii, we, and the other five newspaper craft unions, cooperated with the publishers in the formulation and effectuation of the joint facility arrangement.

TUCSON DECISION

"It is our opinion that the Tucson decision will magnify the 'problem' it would in theory eliminate. Certain papers produced and distributed by joint facilities would be forced to close. Other papers, unable because of the decision to enter into a joint plan, would meet the same fate. In such instances the community is the loser.

"Today, we have in Hawaii two independent dailies. We have two distinct editorial policies and excellent news coverage. We want to keep both.

"We believe, because we are familiar with the local situation, that if the joint facility were broken up, The Advertiser would die.

THEORY ONLY

"In theory it could be argued that some person or some corporation would establish a new morning daily. However, the people of our state and the people in the several states where joint production facilities exist cannot read theory. They want and need two or more competing papers.

"We urge you and your colleagues to support the Newspaper Preservation Bill and thus preserve The Advertiser and other daily newspapers.

"Incidentally, all of the newspaper unions in Honolulu recently negotiated the highest wage increases ever. The increases, which range from \$40 to \$48 a week, would not have been possible without joint facility production and distribution."

GUILD BACKING

An endorsement of the Newspaper Preservation Bill similar to the ILWU's was announced April 1 by the executive committee of the 370-member Hawaii Newspaper Guild (AFL-CIO).

The congressional sponsors of the legislation include both liberals and conservatives from the Democratic and Republican parties.

[From the Honolulu Advertiser, May 5, 1969]
SEVEN THOUSAND FIVE HUNDRED IN HAWAII
EDUCATION BACK BILL TO SAVE NEWSPAPERS

The Hawaii Education Association, composed of 7,500 teachers and others in island education, Saturday reaffirmed its support of the Newspaper Preservation Bills now before the U.S. Senate and House.

Letters signed by Daniel W. Tuttle, Jr., executive secretary of H.E.A., whose members are unified with the National Education Association, are being sent to the Hawaii delegation and to other members of Congress.

They reiterate the organization's position taken last fall. Congress adjourned before the legislation could be passed and new bills

have since been introduced and are awaiting action in the Senate and House Judiciary Committees. The H.E.A. letters asks "assistance in a crisis facing The Honolulu Advertiser—and a score of other newspapers across the country—as a result of the Supreme Court's recent ruling in a Tucson case.

"A legislative remedy is urgently needed.

"Six years ago the morning Advertiser, in dire financial straits, merged its commercial functions (mechanical, advertising, circulation) but not its editorial with the afternoon Star-Bulletin. The result was to keep The Advertiser alive and to preserve for the community two separate and independent editorial voices.

"The alternative would have been a full merger with the Star-Bulletin, resulting in a single ownership of morning and afternoon papers and a single editorial policy.

"This has been the route which papers in much larger cities—such as Minneapolis, Milwaukee, Atlanta, among others—have gone, and without Justice Department action.

"We would submit," said the H.E.A., "that the general welfare is better served by a partial merger with two voices than by the full merger with one voice.

"If the joint plan in Honolulu were broken up, The Advertiser as an entity would die. So would the financially weaker paper in most, if not all, of the other joint-plan cities including Nashville, San Francisco, Pittsburgh, Miami, Tulsa, Knoxville, Birmingham, Columbus, Ohio, Madison, Wis., Salt Lake City, Charleston, W. Va., Evansville and Fort Wayne, Ind., El Paso, Shreveport, Bristol, Va.-Tenn., St. Louis, Albuquerque and Lincoln, Neb.

"To save the joint-plan papers, Newspaper Preservation Bills (S-1520 and HR-8765 and others in the House, all identical) have been introduced by 33 Senators and some 90 Representatives. They run the political gamut in both Senate and House.

"The proposed legislation provides simply that when a failing paper merges its commercial but not its editorial functions with a stronger competitor, the result should be treated under law as if it were in a full merger.

"No predatory practices would be condoned or permitted. In other words, the partial merger could engage in no actions which are not permitted in a full merger.

"Hawaii's Senator Dan Inouye, chief sponsor of the Senate bill"—along with Senator Hiram L. Fong and colleagues on both sides of the aisle—"put it well when he said, 'Where the public interest in a free and varied press runs afoul of the language but not the spirit nor the intent of the anti-trust laws, it is time for Congress to take corrective action.' The large number of cosponsors shows a substantial sharing of this viewpoint.

"What an irony it would be if the Sherman Act, designed to stimulate competition, were employed in the joint-plan newspaper cases to destroy the competition in ideas so fervently needed in an increasingly complex world.

"H.E.A. hopes you can see your way clear to give this legislation your support."

All but one of the labor organizations which have contracts with The Advertiser, The Star-Bulletin and the Hawaii Newspaper Agency have strongly endorsed the legislation.

These include the Hawaii Newspaper Guild (AFL-CIO); Local 142, International Longshoremen's and Warehousemen's Union; Local 413, Honolulu Printing Pressmen and Assistants Union; Local 201, the Lithographers and Photoengravers International Union; and Lodge 1245, International Association of Machinists.

[From the Honolulu Star-Bulletin, May 16, 1969]

HAWAII LEGISLATURE BACKS NEWSPAPER PRESERVATION BILL

Hawaii's Legislature has endorsed national legislation aimed at preventing Honolulu and other cities from having only one newspaper or single ownership of the newspapers.

A concurrent resolution was adopted by the House yesterday and the Senate on Wednesday expressing "full support in the passage of the Newspaper Preservation Bills."

The resolution referred to the joint-plan operation of the Honolulu Advertiser and the Honolulu Star-Bulletin, which are separately owned and have independent editorial policies and staffs, but share production facilities.

"The existing Honolulu joint-plan must be allowed to continue because its dissolution will precipitate either a single newspaper or single ownership of both newspapers to the great loss and detriment of the State of Hawaii, including the City and County of Honolulu," the resolution said.

Hawaii's U.S. Senators Hiram L. Fong and Daniel K. Inouye and Representative Spark M. Matsunaga are pushing the national newspaper preservation bills with 31 other Senators and approximately 90 other Representatives as co-sponsors.

The bills would provide relief from a recent U.S. Supreme Court ruling in a Tucson newspaper case which threatens joint-plan publishing arrangements in many U.S. cities.

RESOLUTION 96

Whereas, Senator Daniel K. Inouye, Senator Hiram L. Fong, and Representative Spark M. Matsunaga are among the 32 senators and 90 representatives sponsoring the Newspaper Preservation Bill; and

Whereas, the Newspaper Preservation Bill will make it possible for independent newspapers to use joint facilities; and

Whereas, the I.L.W.U. supports said bill; now, therefore,

Be it resolved by the Council of the County of Maui that it does hereby urge the Congressional Delegation from Hawaii to support the Newspaper Preservation Bill; and

Be it further resolved that certified copies of this resolution be transmitted to the Hawaii Congressional Delegation.

U.S. MERCHANT MARINE

(Mr. EDWARDS of Alabama asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. EDWARDS of Alabama. Mr. Speaker, I am one of those who views today's observance of Maritime Day with a rising sense of optimism. The reasons for this optimism are many:

First. During last year's campaign, President Nixon spoke of his commitment to a new program to revitalize the American merchant marine, a program that would be fair and equitable to all segments of this industry. Since he assumed office, the President and numerous officials in the executive branch have reaffirmed that commitment, and have let it be known that the administration is working on a program for submission to Congress.

Second. Legislation has already been introduced in this session to modernize the Merchant Marine Act of 1936, and while in my view that omnibus maritime bill needs strengthening to make it serve the needs of this Nation, the fact that it was introduced is a reflection of the con-

tinuing concern here in the Congress for remedial action in this field.

Third. In addition to the omnibus bill, there are individual measures dealing with an overhaul of the cargo preference program and extending to the entire merchant marine a program to encourage the investment of private funds in new ship construction.

Fourth. The legislation which the 90th Congress passed—and which was pocket-vetted by the President—to reconstitute the Maritime Administration as an independent agency, has been reintroduced under the cosponsorship of more than 170 of our colleagues in the House of Representatives. One of these bills is H.R. 266 of which I am a cosponsor.

For all of these reasons, Mr. Speaker, I am heartened about our maritime prospects. For the first time in recent years, we can look forward today with reasonable optimism to the day when our U.S. merchant marine will be a source of pride to the country. I believe there is in this Chamber, and in the executive branch, a new spirit of determination to achieve this goal, a determination based on the recognition that a healthy merchant fleet is a vital part of our overall capability on the world's seas, and that this seagoing capability is a requisite of our national security today just as it has always been in the history of our country.

For those who may doubt, or feel indifferent to, the role of seagoing strength in international security affairs, I recommend the reading of an article which highlights in a graphic manner just what the Soviet Union is doing in this connection.

I believe it has implications which ought to be of highest concern to the Government and to the American people. The article appeared in the Christian Science Monitor for May 21, 1969. I include it at this point in my remarks:

SOVIET AID FORMS STRATEGY PATTERN

(By Elizabeth K. Valkenier)

There is a pattern to Soviet maritime activities that has gone largely unnoticed—that of creating naval facilities and gathering intelligence under the guise of economic aid.

Long before the dramatic appearance of the Red Fleet in various harbors from Morocco to Iraq the Soviets had built or modernized ports and developed commercial fishing for countries along the shores of the Mediterranean, the Persian Gulf, and elsewhere around Africa.

Certain Soviet activities preceding the Cuban missile crisis of 1962 indicate that there can be a direct connection between this type of economic assistance and military operations.

In that summer the Soviets tried to camouflage their stepped-up military traffic by publicizing the technical aid granted to Havana. They asserted they were busy enlarging the Cuban trawler fleet, locating fishing grounds, and building a new fishing port on the Atlantic to be used jointly by Cuba and the Soviet Union.

PARALLEL ROUTES

After the Kennedy-Khrushchev confrontation over the offensive missile sites in October, nothing more was heard of the ambitious plans for the joint fishing port aside from delivery of a floating dry dock for Havana's harbor in the fall of 1964.

Sinister objectives, as in the case of Cuba, are not the only purpose of Soviet maritime

aid. But its pattern does suggest definite strategic aims along important sea routes for the worldwide operations of the Soviet Navy.

Take the matter of ports, for example. With an eye to securing easier access to the Indian Ocean, Moscow began to acquire a foothold south of Suez. The first economic aid agreement concluded with Yemen in 1958 provided for the construction of a port at Hodeida. Four years later, the Soviets began working on a deep-water port at Berbera in Somalia.

And in May, 1967, just before the outbreak of the Arab-Israeli war, they undertook to build a fishing harbor for the United Arab Republic. Located in the Gulf of Suez, it was to serve as a base for joint Soviet-Egyptian deep-sea fishing in the Mediterranean, the Red Sea, and the Indian Ocean.

On the west coast of Africa, Guinea received Soviet assistance in reconstructing the port at Conakry under the terms of the first aid agreement of 1959. With the harbor dredged, Soviet warships could dock at Conakry when they took to cruising African waters 10 years later. In nearby Ghana, the Soviets managed to modernize the fishing port at Tema before Kwame Nkrumah was overthrown.

SURVEY DROPPED

It must have been the prospects of greater strategic mobility in the western Mediterranean that prompted the Soviets early in 1961 to insist on making a survey for a shipyard at the small fishing port at Alhucemas on the northern shore of Morocco.

Western technicians had previously advised against the project, since the port was not served by a railroad. Eventually the Russians reached the same conclusion and shifted their feasibility studies to the bay of Tangier.

The construction of shipyards at Bassra in Iraq and at Alexandria has extended the reach of Soviet sea power. Red Fleet units regularly visit Alexandria nowadays, where they maintain their supply and repair facilities. Bassra became a port of call in May, 1968, a visit which marked the first appearance ever of the Russian Navy in the Persian Gulf.

Numerous other maritime projects, especially in countries that do not receive Soviet military aid, serve as a strategic wedge. Work on such projects, resulting in extensive use of these countries' ports and coastal waters, establishes a Russian presence and can facilitate the gathering of intelligence.

TRAINING RECEIVED

In several cases the only aid the Soviet Union renders to a strategically located country that has not been particularly cordial to Moscow is connected with the sea.

In the Persian Gulf, Kuwait is enlarging its fishing fleet with Russian-built seiners on which Kuwaiti sailors also receive training from Soviet experts.

In Jordan, Moscow had no success with its military aid offers. But early in 1968 it persuaded Amman to accept economic assistance for a number of unspecified "maritime projects," thereby extending the Soviet presence to the Gulf of Aqaba.

The development of commercial fishing, a prominent item in Soviet aid program, often opens up the ports of the aid recipient to Soviet trawlers. Under the terms of the 1964 aid agreement, Tanzania permits Soviet fishing vessels to dock in its ports in return for assistance in developing its ocean fishing. A similar reciprocity exists with Senegal.

The facilities thus acquired increase the range of Soviet fishing fleets. These fleets often include electronic intelligence-gathering ships disguised as trawlers. Soviet trawlers have also been used for landing and picking up undercover agents. Last autumn Ghana intercepted some Russian fishing boats on suspicion of smuggling arms.

ADEN OBJECTIVE

Moscow's persistence in offering economic aid that builds up an infrastructure for later naval capability continues unabated.

The latest object of Soviet interest is the port of Aden. Strategically better located and far larger than Hodeida, it has already served as a port of call for Soviet warships cruising the Indian Ocean. In February of this year, South Yemen signed an aid agreement with Moscow to improve Aden's harbor and docks.

Soviet eagerness to enlarge this port's facilities suggests that the Red Fleet hopes to add Aden to its list of repair and supply bases that already includes Algiers, Alexandria, Port Said, and Latakia. If those intentions are realized, Russia will have taken a major step toward achieving its dream of a permanent presence in both the Mediterranean and the Indian Ocean.

APPOINTMENT OF JUDGE WARREN BURGER AS CHIEF JUSTICE

(Mr. EDWARDS of Alabama asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. EDWARDS of Alabama. Mr. Speaker, the appointment of Judge Warren Burger as Chief Justice of the Supreme Court is a good appointment, in my opinion.

While I am not personally acquainted with Judge Burger I know that he has an enviable reputation as a man of solid integrity, hard work, and dedication to the highest principles of justice.

He meets the test of qualification that I set forth in a bill I introduced regarding Supreme Court Justices. In that bill I proposed that anyone appointed to the Court have at least 10 years experience as a judge, either on a State supreme court or a U.S. court of appeals.

Mr. Burger, at age 61, has served for 13 years on the Court of Appeals of the District of Columbia.

But further than that he fits my picture of how a Supreme Court Justice ought to think, and he fits the picture that I believe the great majority of Americans have.

He is a conservative on the question of law and order. By that I mean he believes that laws are enacted to be obeyed. He has opposed court decisions which emphasize rights of the accused at the expense of the victims of crime.

He believes in a truly balanced assessment of fairness in seeking fair trials in criminal cases. He chides other Federal judges for insisting on "perfect trials" which all too often result in turning the criminal loose on a technicality.

On the court of appeals he frequently has been the only judge to stand up for the local policeman and the general public. He once wrote that the decisions which have made it so difficult to convict criminals run the risk of creating "a society incapable of defending itself."

These decisions could lead to "the impotent society" as he called it.

He has consistently, in his work as a judge in the District of Columbia, demanded commonsense and responsibility in criminal law.

Just as important, he takes the view that the Supreme Court's task is to interpret the law and the Constitution, not to rewrite it.

He takes the strict constructionist position in that he believes the Constitution should be considered for what it actually says, not for what it might say.

To the extent that his position as Chief Justice influences the Court, I believe

decisions made by the Court will show a decided change for the better.

And finally, Mr. Burger is not in any way a crony of the President who appointed him. There is no question of having too close an association with the White House or with any part of the executive branch, or for that matter, with the Congress or any political group.

This is not to say that I expect to agree with each and every decision and comment made by Mr. Burger if he is confirmed as Chief Justice.

I expect that I will not agree with him on many occasions. But certainly I will find myself comfortable with his approach to the vital role of the Chief Justice in our system of government.

And I believe most of us in the first congressional district of my State will feel the same way.

The appointment of Judge Burger, of course, is that of Chief Justice to replace Justice Earl Warren who is retiring after long years on the Court.

Mr. Nixon still has the appointment to fill the vacancy arising because of the resignation of Justice Abe Fortas a few days ago.

There is now some controversy over another Associate Justice, William O. Douglas. Like Justice Fortas, he, also, has apparently received funds, other than his salary, while serving on the Court.

The funds have been paid him by one or more groups with obvious interests in matters of Government policy and action. There is some feeling that Justice Douglas, also, may decide to leave the Court.

Over the next 3 or 4 years President Nixon may have the opportunity to completely change the complexion of the Supreme Court. I believe this is probably the most important task he will have as President.

In my view it has never been more important that the Supreme Court retain a position that is completely above all possible reproach. Its members must be without blemish as men of total integrity.

The reason this is so vital today is that the so-called establishment is under fire from all directions.

If our system of government is to remain healthy and orderly it is absolutely essential that the Supreme Court is free of any possible attack on its veracity. I believe the appointment of Judge Burger as Chief Justice meets this need.

A TRIBUTE TO AGOSTON HARASZTHY

(Mr. DON H. CLAUSEN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. DON H. CLAUSEN. Mr. Speaker, on Sunday, May 11, the American Hungarian Federation paid tribute to Agoston Haraszthy, a pioneer in American agriculture, and the "father" of modern California viticulture.

Col. Agoston Haraszthy came to America in 1840 as a "political exile." His earlier struggles in Europe and his ultimate achievements in the United States are truly an "American success story" that deserves to be told and retold.

Thus it is, that I insert in the Record

today, the eulogy to Agoston Haraszthy that was delivered by Dr. Elemer Bako at the centennial memorial program in Colonel Haraszthy's honor on the patio of the Department of Agriculture last Sunday.

Today, 100 years following his passing, I am privileged to represent here in the Congress that region along the north coast of California so richly blessed by Colonel Haraszthy's contributions to our State's wine industry. It is estimated that 80 percent of California's harvested grapes are the direct descendants of the vine samplings he collected throughout Europe more than 100 years ago.

Dr. Elemer Bako, area specialist, Library of Congress, chairman of the Cultural Committee of the American Hungarian Federation, gave the following address:

AGOSTON HARASZTHY'S HUNGARIAN BACKGROUND

The man whose memory we came to honor here today, was an extraordinary personality, by his conduct of life, by his personal appearance, as well as by the virtue of the high goals he set for himself and for his contemporaries, eminently for the new settlers and planners of California's economy in the 1850's. These character traits marked him as a leader early after his immigration to the United States: a leader who possessed the powers of initiative, imagination and intellect, moral standards as well as practical know-how. Thus, he was able to perform among the multi-faced crowd of his new environment in a rather unique way: his ideas and proposals caught the eye of the rich as well as of the man of moderate means, of the highest official of the state as well as of the humblest vineyard hand. He was able to move forward swiftly, to embrace all details of the task he took upon himself, and to propose the solution for all phases of the work he thought should be done in the best interest of California and of the national economy in his particular area of pioneering reforms, until the irresistible winds of the political strife which blew over the entire life of his new country for a number of years, shut all doors in the face of this peaceful planner and builder.

Agoston Haraszthy's personality was formed in Hungary: first, by being born into a family which had a long history in Hungary's northeastern regions where the flames of liberty and freedom were always kept alive. Both in the County of Ung (from where the title of nobility of the Haraszthys derives) and in the County of Bihar, at the gates of Transylvania (where Agoston Haraszthy's immediate ancestors were living for several generations), the home atmosphere of the Haraszthys, through many generations, was that of the landed nobility: they received their education in the classics at the college, then proceeded as practitioners in matters of public administration, in the management of their estates and other properties, including various industrial establishments. They have received their training for both to serve in office in times of peace and to serve in the armed forces in times of war.

It was especially the second home of the Haraszthys, the town of Mező-Telegd, in Bihar County, situated among rolling hills of romantic beauty, two miles from the historical city of Nagyvárad, which formed the heritage most decisive for Agoston Haraszthy's life in America. Among the landed neighbors of the Haraszthys there were representatives of the aristocracy, like the Counts Haller and Korniss (both with close ties to Transylvania) as well as numerous representatives of the common nobility: the Miskolczy, Fráter, Várady, Jakabfy, Karácsony and others. The vicinity of the Principate of Transylvania, a small Hun-

garian state which was separated from the rest of the country after the Turkish occupation of the central regions of Hungary in the 16th century, kept up the banner of freedom and hope for the adjoining territories. Consequently, participation in public affairs for the families around the Haraszthys was traditionally a "noble officium", and propagation of the public good was obligatory. The able sons of these families promoted the country's political, economic and cultural interests and often allied themselves for the service of such tasks.

Another essential part of Agoston Haraszthy's personal heritage, his mind's preoccupation with viticultural matters, originated also with the town of Mező-Telegd which is located, at the outskirts of the city of Nagyvárad, among grape-bearing hills. This little town, populated then mostly by Hungarian farmers adhering to the Calvinist faith, produced wines of excellent quality.

When and how Agoston Haraszthy's parents moved to Futak, in Southern Hungary, in the so-called Bácska, is yet unknown to us. There, the Haraszthys were surrounded by German settlers who were invited to Hungary by the Habsburgs in the wake of the expulsion of the Turks in the 18th century. It might have been the initiative and creative talents of the Haraszthys (so splendidly demonstrated by Agoston later) which moved his parents to this region: its soil was the richest in Hungary, and it appeared to be in the best interest of the Hungarian nation to have at least some Hungarians among the new owners of that rich country.

Upon the conclusion of his secondary education, Agoston was delegated, very likely by the County of Bács, to become a member of the Hungarian Royal Body-Guards, then stationed permanently at Vienna, Capital City of the Austrian Empire. This body of young Hungarian talent in Vienna was regarded in Hungary as the best stock of future leadership for the nation. Among these young officers, most of whom spoke several languages, were found many with scholarly or literary interests; others turned to political or economic studies. They were among the first in Hungary who, since the end of the 18th century, familiarized themselves with the progressive ideas of Western Europe and the principles of the young American democracy, and if not all of them became leaders during the Hungarian "Age of Reform", in the second quarter of the 19th century, most of them emerged as able representatives of the reform movement, led by its recognized leader, Count Stephen Széchenyi.

The Imperial Court, sensing the new power beyond the call for reform, reacted through the ingenious system of control and oppression which was the true reflection of its master-mind, the omniscient and omnipotent Chancellor Prince Metternich. The potentially dangerous leaders like Louis Kossuth and Baron Nicholas Wesselényi were jailed for several years, causing also the downfall of many of their open or secret followers among the reform-minded generation of the young.

Agoston Haraszthy, then in his 28th year, with tenures of service as private secretary to the Palatine (Vice-Roy) of Hungary and as a district administration chief in Bács County, probably became entangled (as suggested by his own statements) in these political movements. Since he was already married (to a Polish beauty of that country's nobility, whose family was forced earlier to flee Poland for similar anti-Habsburg activities), Agoston Haraszthy, also father of three young children, had to seek his future somewhere else. Thus, accompanied by a young relative, Charles Halász, Agoston entered the United States in 1840, and settled in the Territory of Wisconsin as a "political exile", indicating that his association with Kossuth's and Wesselényi's followers caused him to leave his country.

His travel to the United States of America

did not come about by a chance decision. Haraszthy's generation was already well informed about the American way of life by the work of Alexander Böloni Farkas, a Hungarian from Transylvania, who traveled in the United States in 1831, and in an excellent book which quickly achieved two editions, described the institutions and the people of America. The leader of the Hungarian reform movement, Count Széchenyi himself wrote to the author that "according to my knowledge, there is no other writer who, up to our times, had presented the Hungarian fatherland and its public with a more useful and beautiful gift." This work became the source of information for all educated Hungarians, including Agoston Haraszthy, about the United States.

Although he came in the wake of Kossuth's political activities to America, during his coming years in the United States Haraszthy turned more in the direction of Széchenyi's philosophy who cautioned against premature political action and preferred economic evolution for his nation. When, after four years in this country (during which Haraszthy founded the present Sauk City, then named "Town Haraszthy" after him, and planted his first hopyard in Wisconsin), he returned shortly to Hungary, persuaded his father to sell the family estate and to move with his only son's family to America. Haraszthy became the embodiment of the type of Széchenyi in his new country. His farsighted planning toward the realization of his dream: the great future of California as the leading grape and wine producing land of the world recalls the methods of Széchenyi whose call to reform prompted his nation to found the Hungarian Academy of Sciences, the National Casino (for spirited, high-level discussions on public matters), the Hungarian National Museum, the National Theater. The "Széchenyi Generation" launched the first steamships on the Danube, initiated the regulation of the rivers of Hungary, founded scores of newspapers, scientific and literary journals, and laid down the foundations for a modern Hungary so solidly, that not even the rigid, absolutistic era which followed the defeat of the Kossuth Government in 1849 by the armies of the Austrian and Russian Emperors, could destroy them but they maintained themselves as the great reservoirs of the nation's intellectual and political powers.

Agoston Haraszthy's life in the United States reflected a man of Széchenyi's own making. His educational background, both as an officer and public official, enabled him of moving along smoothly and effectively through established channels; his social training came through in his polished manners, while the common citizens, including the workers in the vineyard, were filled with enthusiasm over his "money-making" ideas.

The heritage which he carried with himself to his new country was woven by invisible hands into the texture of his American life: gradually he became an American citizen, deeply loyal and inseparably attached to the United States. This new, inner self emerges at the sight of the flag in the French city of Bordeaux, from the depth of Agoston Haraszthy's soul when he wrote in his diary on September 15, 1861:

"As it was Sunday, all that could be done was to walk around the city and write correspondence. Bordeaux is a very fine city. It possesses large, shady walks, promenades and squares. It has a good safe harbor in the River Garonne . . . Many ships from our own country sweep the harbor with their airy forms. High above all others is unfurled to the winds the beautiful *Star-spangled Banner*. In beholding the flag of my country, I felt rush into my heart a thrill of pleasure and pride. Even without the flag, it was easy to recognize at once our American ships. Their high masts, towering far above the forest around them, their sharp-cut bows, their finely-moulded lines, pronounced them American."

The former country gentry and officer of the Royal Body-Guards, the struggling young Reformist submerged with the past, but their values contributed decisively to the emergence of a variant among the citizenry of the United States: like the great vines of Hungary which strive on the fertile soil of California but their fruits are different from those of Tokaj and the Balaton Lake region, the American Hungarian, with all his sentimental affection and cultural heritage which might still bind him to his past, is as loyal and genuine an American as his next door neighbor.

Agoston Haraszthy was the first, shining example of this creative, dedicated American Hungarian citizen.

U.S. SENATE,
Washington, D.C.

I regret deeply that previous commitments in California prevent me from being here to speak to you today, for this is indeed a memorable occasion. Colonel Agoston Haraszthy, who came to California by ox-team with the forty-niners, fortunately had quite a distinct vocation from those seekers of gold. His, as we know, was agriculture and the harvest of his work and foresight is still being reaped today, 100 years after his death.

Perhaps this recognition was most succinctly noted in a California State Legislative resolution of 1961 which not only paid tribute to Colonel Haraszthy's pioneering efforts in agriculture but formally designated him as the "father" of modern California viticulture.

During two decades in California, Colonel Haraszthy's dedicated efforts helped increase wine production fiftyfold to about three million gallons a year. Today our vineyards produce 160 million gallons yearly, wines which rank as the world's finest.

No one would be prouder of these achievements than Colonel Haraszthy. But I am certain his ambitions, were he alive today, would not cease, for Colonel Haraszthy, like all the pioneers who made our country great, never permitted reality to catch up with his dreams.

Sincerely,

GEORGE MURPHY.

U.S. SENATE,
Washington, D.C., May 8, 1969.

Z. MICHAEL SZAZ, Ph.D.,
American Hungarian Federation,
3216 New Mexico Avenue NW.,
Washington, D.C.

DEAR DOCTOR SZAZ: Too often we overlook those true men of vision whose foresight has so profoundly influenced our lives. I am very happy that through the efforts of the American Hungarian Federation we have come to honor one of those men, Agoston Haraszthy.

One hundred years after his death, there is no question of the importance of Haraszthy to the state of California. He is the father of our wine industry. We estimate that 80 percent of California's harvested grapes are the direct descendants of the cuttings he brought from Europe well over 100 years ago.

California has put Count Haraszthy on its cultural maps, and there is no doubt he belongs there. In a very significant way, he put California on the nation's economic and gourmet maps.

Agoston Haraszthy died in 1869—in obscurity, at least from a California's point of view. He died outside California, in Nicaragua, where he became a plantation owner after his political eclipse in California.

Now we are happy to reverse the effects of that eclipse, once and for all we hope.

Agoston Haraszthy is a California hero.
ALAN CRANSTON.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DULSKI, for May 26 through 29, on account of official business.

Mr. THOMPSON of Georgia, for May 26 through June 6, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. FEIGHAN, today, for 10 minutes; to revise and extend his remarks and to include extraneous matter.

Mr. STEIGER of Wisconsin (at the request of Mr. BEALL of Maryland), for 30 minutes, today; to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. CAFFERY) to revise and extend their remarks and include extraneous matter:)

Mr. GONZALEZ, for 10 minutes, today.

Mr. MATSUNAGA, for 15 minutes, today.

EXTENSIONS OF REMARKS

By unanimous consent, permission, to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BEALL of Maryland) to extend their remarks and include extraneous matter:)

Mrs. MAY.

Mr. HANSEN of Idaho.

Mr. WINN.

Mr. STEIGER of Wisconsin.

Mr. BEALL of Maryland.

Mr. FISH in five instances.

Mr. ZWACH.

Mr. ASHBROOK.

Mr. THOMPSON of Georgia.

Mr. SAYLOR in two instances.

Mr. POLLOCK.

Mr. FULTON of Pennsylvania.

Mr. DON H. CLAUSEN.

Mr. BOB WILSON.

Mr. MORSE.

(The following Members (at the request of Mr. CAFFERY) to extend their remarks and to include extraneous matter:)

Mr. ROONEY of New York.

Mr. MURPHY of New York.

Mr. CORMAN.

Mr. GILBERT.

Mr. BIAGGI in five instances.

Mr. HOWARD.

Mr. GONZALEZ in two instances.

Mrs. GRIFFITHS.

Mr. HUNGATE.

Mr. ST GERMAIN in two instances.

Mr. CHARLES H. WILSON.

Mr. WILLIAM D. FORD.

Mr. MEEDS.

Mr. ADDABBO in two instances.

Mr. ROONEY of Pennsylvania.

Mr. RARICK in four instances.

Mrs. SULLIVAN in two instances.

Mr. BARING in two instances.

Mr. DOWDY.

Mr. POWELL.

Mr. EVINS of Tennessee in two instances.

Mr. BENNETT.

Mr. GALLAGHER in two instances.

Mr. ALBERT.

Mr. FOUNTAIN.

ADJOURNMENT

Mr. CAFFERY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 54 minutes p.m.), under its previous order, the House adjourned until Monday, May 26, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

792. A letter from the Office of the Secretary of the Navy, transmitting a draft of proposed legislation to authorize the extension of certain naval vessel loans now in existence and new loans, and for other purposes; to the Committee on Armed Services.

793. A letter from the Secretary of Health, Education, and Welfare, transmitting the Annual Report of the Department of Health, Education, and Welfare for fiscal year 1968; to the Committee on Education and Labor.

794. A letter from the Assistant Secretary for Congressional Relations, Department of State, transmitting a draft of proposed legislation to authorize appropriations for expenses of the U.S. section of the United States-Mexico Commission for Border Development and Friendship; to the Committee on Foreign Affairs.

795. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to amend the Public Health Service Act to improve and extend the provisions relating to assistance to medical libraries and related instrumentalities, and for other purposes; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STEED: Committee on Appropriations. H.R. 11582. A bill making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies, for the fiscal year ending June 30, 1970, and for other purposes (Rept. No. 91-264). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the report calendar, as follows:

Mr. MESKILL: Committee on the Judiciary. H.R. 3373. A bill for the relief of Giuseppe Delina; with amendment (Rept. No. 91-263). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. STEED:
H.R. 11582. A bill making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies, for the fiscal year ending June 30, 1970, and for other purposes.

By Mr. BENNETT:
H.R. 11583. A bill to eliminate suffering from hunger among the needy; to the Committee on Agriculture.

By Mr. BIAGGI (for himself, Mr. ADAMO, Mr. ANNUNZIO, Mr. BRASCO, Mr. BROWN of California, Mr. BUTTON, Mr. DANIELS of New Jersey, Mr. FRIEDEL, Mr. GILBERT, Mr. GRAY, Mr. HALPERN, Mr. HAWKINS, Mr. HORTON, Mr. McKNEALLY, Mr. MINISH, Mr. MOORHEAD, Mr. OLSEN, Mr. PELLY, Mr. PEPPER, Mr. POLLOCK, Mr. REES, Mr. ST. ONGE, Mr. TIERNAN, Mr. WOLFF, and Mr. YATRON):

H.R. 11584. A bill to provide for the protection of children against physical injury caused or threatened by those who are responsible for their care; to the Committee on Ways and Means.

By Mr. BIAGGI (for himself and Mr. PODELL):

H.R. 11585. A bill to provide for the protection of children against physical injury caused or threatened by those who are responsible for their care; to the Committee on Ways and Means.

By Mr. BLATNIK:
H.R. 11586. A bill to amend title II of the Social Security Act to provide statutory and cost-of-living increases in OASDI benefits and raise the earnings base, to liberalize the retirement test, and to raise the age at which entitlement to child's insurance benefits on the basis of school attendance ceases; and to amend title XVIII of such act to include certain drugs among the benefits covered under part B thereof and to provide payment for certain services furnished outside the United States; to the Committee on Ways and Means.

By Mr. COLLINS:
H.R. 11587. A bill to amend title 18 and title 28 of the United States Code with respect to the trial and review of criminal actions involving obscenity, and for other purposes; to the Committee on the Judiciary.

By Mr. COLLIER:
H.R. 11588. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. DINGELL:
H.R. 11589. A bill to require, as a prerequisite to Federal assistance, that institutions of higher education must adopt and enforce federally approved plans for curbing campus disorders; to the Committee on Education and Labor.

By Mr. GETTYS:
H.R. 11590. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. GIAIMO:
H.R. 11591. A bill to provide that the only son of a family, the sole surviving son of a family, or a member of the Armed Forces whose father, brother, or sister is serving in a combat zone shall be exempt from service in a combat zone as a member of the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. HOWARD:
H.R. 11592. A bill to amend the first section of the act of November 5, 1966, to define the boundaries of the Indiana Dunes National Lakeshore; to the Committee on Interior and Insular Affairs.

By Mr. LENNON:
H.R. 11593. A bill to prohibit the use of interstate facilities, including the mails, for the transportation of salacious advertising; to the Committee on the Judiciary.

H.R. 11594. A bill to afford protection to the public from offensive intrusion into their homes through the postal service of

sexually oriented mail matter, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. McKNEALLY:
H.R. 11595. A bill to authorize donations of surplus foods to State and local penal institutions; to the Committee on Agriculture.

By Mr. MAILLIARD (for himself, Mr. BURTON of California, Mr. SMITH of California, Mr. REES, Mr. HOSMER, Mr. GUBSER, Mr. DON H. CLAUSEN, Mr. MCFALL, Mr. MCCLOSKEY, Mr. HAWKINS, Mr. ANDERSON of California, Mr. EDWARDS of California, Mr. LIPSCOMB, Mr. MOSS, and Mr. CHARLES H. WILSON):

H.R. 11596. A bill to amend title III of the National Housing Act to authorize the Government National Mortgage Association to guarantee obligations issued by State agencies to finance low- and moderate-income housing; to the Committee on Banking and Currency.

By Mrs. MAY (for herself, Mr. DON H. CLAUSEN, Mr. DELLENBACK, Mr. FOLEY, Mr. McMILLAN, Mr. McKNEALLY, Mr. O'NEAL of Georgia, Mr. SAYLOR, Mr. TAYLOR, Mr. TEAGUE of California, and Mr. ULLMAN):

H.R. 11597. A bill to provide for the establishment and administration of a national wildfire disaster control fund; to the Committee on Agriculture.

By Mr. MAYNE:
H.R. 11598. A bill to require all Members of Congress to disclose all income; to the Committee on Standards of Official Conduct.

By Mr. MINSHALL:
H.R. 11599. A bill to amend the act of August 13, 1946, relating to Federal participation in the cost of protecting the shores of the United States, its territories, and possessions, to include privately owned property; to the Committee on Public Works.

By Mr. MORSE:
H.R. 11600. A bill to promote private U.S. participation in international organizations and movements, to provide for the establishment of an Institute of International Affairs, and for other purposes; to the Committee on Foreign Affairs.

By Mr. OTTINGER:
H.R. 11601. A bill to reclassify certain positions in the postal field service, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 11602. A bill to modernize the U.S. postal establishment, to provide for efficient and economical postal service to the public, to improve postal employee-management relations, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. PHILBIN:
H.R. 11603. A bill to amend title II of the Social Security Act to provide a 15-percent across-the-board increase in monthly benefits, with subsequent cost-of-living increases in such benefits and a minimum primary benefit of \$80; to the Committee on Ways and Means.

By Mr. PRICE of Texas:
H.R. 11604. A bill to amend the Consolidated Farmers Home Administration Act of 1961, as amended, to provide for insured operating loans, including loans to low-income farmers and ranchers, and for other purposes; to the Committee on Agriculture.

By Mr. QUILLLEN:
H.R. 11605. A bill to regulate imports of ferroalloys and related products into the United States; to the Committee on Ways and Means.

By Mr. SAYLOR:
H.R. 11606. A bill to amend title II of the Social Security Act to provide a 15-percent across-the-board increase in monthly benefits, with subsequent cost-of-living increases in such benefits and a minimum primary benefit of \$100; to the Committee on Ways and Means.

By Mr. STAGGERS:
H.R. 11607. A bill to amend the Railroad Retirement Act of 1937 and the Railroad Retirement Tax Act to provide for the continued payment of supplemental annuities in accordance with present law; to the Committee on Interstate and Foreign Commerce.

H.R. 11608. A bill to amend the Securities Exchange Act of 1934 to extend the time and increase the authorization for the institutional investor study; to the Committee on Interstate and Foreign Commerce.

By Mr. TAYLOR:
H.R. 11609. A bill to amend the act of September 9, 1963, authorizing the construction of an entrance road at Great Smoky Mountains National Park in the State of North Carolina, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. VANIK (for himself, Mr. ADAMS, Mr. CONTE, Mr. GIAIMO, Mr. PUCINSKI, and Mr. ST GERMAIN):

H.R. 11610. A bill to amend title II of the Social Security Act to provide a 15-percent across-the-board increase in monthly benefits, with subsequent cost-of-living increases in such benefits and a minimum primary benefit of \$80; to the Committee on Ways and Means.

By Mr. ADDABBO:
H.J. Res. 739. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. HALEY:
H.J. Res. 740. Joint resolution expressing a declaration of war against the 98 Communist Parties constituting the international Communist conspiracy; to the Committee on Foreign Affairs.

By Mr. POLLOCK:
H.J. Res. 741. Joint resolution proposing an amendment to the Constitution of the United States to provide for popular approval of Federal judges; to the Committee on the Judiciary.

By Mr. ST GERMAIN:
H. Res. 423. Resolution to authorize the Committees on Banking and Currency and Education and Labor to conduct an investigation and study of the feasibility of establishing an educational opportunity bank; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

184. By the SPEAKER: Memorial of the Legislature of the State of Florida, relative to the protection of rare and endangered species, including the American alligator; to the Committee on Merchant Marine and Fisheries.

185. Also, memorial of the Legislature of the State of Louisiana, relative to the tax exemption for municipal bonds; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. VIGORITO introduced a bill (H.R. 11611) for the relief of Catherine Krieger, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

119. The SPEAKER presented a petition of the Board of Commissioners, Clark County, Wash., relative to flood control and protection facilities for the Vancouver Lake, Wash., area, which was referred to the Committee on Public Works.

EXTENSIONS OF REMARKS

A SERMON ON THE FREEDOM OF MAN—PART III: WEEDS IN THE GARDEN

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. FOUNTAIN. Mr. Speaker, on April 2, 1969, I inserted in the CONGRESSIONAL RECORD a sermon preached by the Reverend Charles S. Hubbard, minister of the First Methodist Church of Wilson, N.C., entitled "A Sermon on the Freedom of Man—Part I: An Introduction."

A second sermon preached by Mr. Hubbard on the same general theme which bears the title "A Sermon on the Freedom of Man—Part II: Communism" was placed in the RECORD by my distinguished colleague, Senator SAM J. ERVIN, of North Carolina, on April 14, 1969.

Mr. Hubbard's third sermon on this same theme before his own congregation is entitled "A Sermon on the Freedom of Man—Part III: Weeds in the Garden." This sermon is another extremely informative and thought-provoking discussion of the dangers within our own land to the freedoms we all hold so near and dear to our hearts. So that more Members may have an opportunity to read it, I am inserting it in the RECORD as follows:

A SERMON ON THE FREEDOM OF MAN—PART III: WEEDS IN THE GARDEN

(By the Reverend Charles Hubbard, pastor of the First Methodist Church of Wilson, N.C.)

At our last session we discussed the dangers of Communism, that the dangers are real, that coercive pressure from the outside of this Land of Freedom are terrible pressures. Today I want to discuss growing dangers inside our land. If Freedom is the soil on which man must grow; if man cannot live in dignity or pursue happiness outside of freedom—and I contend that he cannot—then freedom itself is essential. It is not a luxury; it is not just one of the virtues; it is the essential condition whereby man must live. It is the necessary soil of his being.

But there are "weeds in the garden of Freedom"—there are weeds right here in the United States of America, the cradle of freedom; and except we do something about these weeds, they are going to choke this garden before long.

Now, what are these weeds? I certainly do not have time to list them all, but I would say that one of the most dangerous weeds I know, one that is rapidly fouling the garden of the Freedom of Man in the United States, is the weed of lack of respect for the law. If we are going to live together as a civilization, there must be basic principles of law to protect all the people; and I have never studied nor known any time in the history of the United States when there has been less respect for the concept of government by law. There is a general contempt for law from all too many people in all too many walks of life. And this condition, unless reversed, is going to undermine our culture. For, my friends, except we respect and enforce the laws made by free men, we are soon going to surrender our freedom to the law of the jungle or submit to a totalitarian state which will enforce order, but care little for justice.

I will admit that any society, however good and just, will have its law-breakers. I am not pleading here for paradise. But, to quote Horace Mann: "Let but the public mind become thoroughly corrupt, and all attempts to secure property, liberty, or life, by mere force of laws written on parchment, will be as vain as to put up printed notices in an orchard to keep off canker-worms."

What I am saying is that our essential freedom can die if we continue long to tolerate powerful organized crime syndicates that subvert the morals and ethics of our nation, manipulate a growing part of our economy and corrupt the lower levels of justice and law. And we do tolerate this social cancer. In fact, if a crook is sophisticated enough and rich enough, he is beginning to be quite welcome in the best of neighborhoods, the best of clubs and, I suspect, the "best" of churches. This weed is thriving today in our garden.

And this weed has a bigger brother which is being liberally fertilized from pulpit and college lectures all over our land. I can hear the preachers and professors now as they self-righteously declaim that there are "good" laws and "bad" laws, and you should not obey what you believe to be a "bad" law. Then they proceed to outdo the communists with word warping semantics. They tell us that personal rights are far more important than property rights; that justice must come before law and order; and that the whole "hypocritical" structure of our institutions must be torn down in order to make room for a "good" society. Their arguments are supported neither by history nor logic. They do not tell us that when property rights are put down in a once free land, all personal rights disappear soon thereafter. They do not tell us it is impossible to have justice for anyone without law and order. And they do not tell us when the institutions of a free society are ripped down, the new institutions will certainly not be those of a free people. No. But their spurious gospel has been heard and believed. Violent black militants, shouting impossible demands, have attacked the structure of freedom throughout the land. Whole cities have been disrupted, with vast areas burned and looted. Educational processes have been blocked by rioting minorities of college students. The destruction of your precious freedom is under way and gaining momentum through widespread lawlessness.

In the meantime we, and our whole structure of law, stand strangely paralyzed and bemused by the cry of "personal rights." Is there a "personal right" to commit crime without punishment? The citizen who obeys the law also has rights. He has the right to be protected from the plunder and pillage of the lawless and the right to live without fear of his safety or fear of the safety of his family. These rights are being violated every hour of every day, and many of us are getting very tired of it.

We do not need many more laws. What we do need are more fearless judges and more attorneys and more juries who are concerned with upholding the spirit of the law and the true intent of the law. The indulgence of the criminal is a broadening "yellow streak" in the character of our nation that can be fatal to us all. Lawlessness will certainly choke our freedom.

Other noxious weeds in the garden of freedom may be easily distinguished as a lessening responsibility toward work and the irreplaceable resources of our nation. A nation's true welfare depends on its power to work and to expand its resources. There can be no development without effort, and effort means work.

Yet, in spite of trade association standards, in spite of union rules, in spite of a proliferation of governmental regulations—there is much evidence today that self-interest easily undermines the excellence of the labors of men. There are too many examples I know of—of embezzlement and fraud and chiseling and featherbedding and cutting corners and quackery and shoddy goods and malpractice and kick-backs that come to my attention, for me not to fear how grave this situation must be. Is integrity in work and product dying? Are we entering the age of the "goof-off," and "gimmick"?

God forbid! I cannot believe that we can be so stupid for long. It is a simple law of nature and of God that no people can continue to use up and destroy and steal the very essence of its livelihood without bringing about its own destruction. So, isn't it about time that concerned people, like you and me, revolted against this phoneyess. Is it not time we declared we do not accept unethical practices as standard business procedures? Are we not ready to demand a recovery of the pride of craftsmanship and the obligation of business to really serve mankind. Must we not teach capital and labor alike that it is the quality of work, the genuineness of product, the dependability of character that will bring reward? We had better.

I am not here pointing an accusing finger at all business and labor. On the contrary, the solid majority of those who manage and work in the industry and business of America are ethical, honest and hard-working. I am stating, however, that if enterprise and labor loses its freedom because of a virulent and crooked minority, a great deal of our freedom will go down, too. George B. Cortel you has said: "The greatest asset of any nation is the spirit of its people, and the greatest danger that can menace any nation is the breakdown of that spirit—the will to win and the courage to work."

Behind these evils, and responsible for most of them is the weed that is deadliest of all: a growing devaluation of the worth of man. We are in a moral crisis, and one of the problems of a moral crisis is that a lot of people do not even know we have one, or that it may be important. Thus we drift toward the law of the jungle. Thus we approach a bestial attitude toward life.

We are being told that God is absent—or dead. We are being taught that spiritual ideals and moral judgments are relative and subjective. Man is being pictured as a kind of neutral and helpless thing. And this negative, amoral, nihilistic interpretation of man inverts all our moral standards. It easily suggests that good is bad and bad is good. Why be restrained and distracted by spiritual ideals and moral standards if they do not exist? Why fear or love a dead God? Under this way of thinking life is nothing but a process of biological functioning. It can offer no satisfaction, save the pleasure of the moment. Self-gratification is the key to being.

This moral crisis is not without causes. Business is making its contribution through massive advertising campaigns that are "not quite honest." The news media often reports vital news in such a manner that the reader or viewer cannot be satisfied that he knows the truth. Even the government's statements of fact sometimes turn out to be not quite factual. All this is nourishing in the mind of the citizen a growing distrust in the very institutions that make possible a free land and a free people.

Then, when you consider the blatant corruption, the perversion, the cheap sex, the filth that is the subject matter and motivation of current movies, plays, novels and art,

you tend to wonder why there is any morality left. To defend this dirt by saying it is sensitive, it is art, it is reality—is an insult and a lie! Writers do need to be realistic. They need to picture the sordid as well as the sublime. But when people try to show that the normal cultural diet of humanity today is filth, I say they are sick. When these human buzzards portray perversion and say it is normal, when they left up self-gratification and say it is good, when they offer spiritual putrefaction and say it is clean—they are *not* just reflecting the mood of the times. They are setting the intellectual and spiritual standards of today and tomorrow.

And if you are wondering why idealistic youth is in rebellion today, you need wonder no further. They see the lie, the hypocrisy, the deliberate attempt at degradation of all that is good and uplifting and holy—and they want no part in it. I want no part in it, either. You had better not. This weed of immorality feeds on the very soul of the dignity and freedom of man.

So—I ask you—are you satisfied? Are you now prepared to give up your God-given sense of plain decency and honor? Are you ready to accept deceit and crookedness and pornography and degradation as the proper expectation for our day? Are you now willing for atheists and hoodlums and libertines to set the standards for our society? In spite of our well-founded concern for the threats of communism, we who love God and freedom need to awaken to the deadly threat right here in the bosom of our country that comes from the toleration of moral rotteness.

Of course, we who lead the spiritual life of America are the most responsible. All too often we have joined the current fad of scratching the itch and ignoring the disease of society. There's been far more preaching today on the evils of capitalism, on profits, on exploitation of labor, on social planning, than on the mind and heart of Jesus Christ. This gospel must be held high first, for it is the only workable motivation for morality, honesty, brotherhood, or anything else worth having. We will never attain a good and free society through the manipulation of selfish people. One man has said: "You can rearrange a bunch of rotten eggs any way you want to, but you are not going to make a good omelet."

Let us re-dedicate ourselves to the God who can empower us all to really be worth while. Let us all pray, witness for, and guard that which we know is Christian and right and decent and honest and good. This is the way of freedom for everybody. Any other way is chaos and ruin. God bless you.

SERIOUS HUNGER IN THE UNITED STATES CAN BE ECONOMICALLY ELIMINATED

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. BENNETT. Mr. Speaker, serious hunger in the United States can be eliminated and the cost to do so could not be excessive. One year ago today I introduced a bill to attempt to accomplish this objective; and subsequently, the Appropriations Committee brought out in its Public Law 90-463 a provision to do just this. Under the provisions of that 1968 Appropriations Act, funds were made available to the Secretary of Agriculture to feed the seriously hungry. The bill I am introducing today makes these funds available on a permanent basis.

This principle has been approved by Congress when it passed the 1968 Agricultural Appropriations Act by a vote of 347 to 28. By making the appropriation for this program permanent, the Secretary and State and local welfare agencies involved can know that time and energy expended developing a program such as this would not be wasted as a result of cancellation of the program after 1 or 2 years. If Congress wants this program, which seems evident by the overwhelming vote this bill received, then we should make this an ongoing program and not one subject to short-term political fluctuations.

A RESOLUTION FOR A STUDY OF THE EDUCATIONAL OPPORTUNITY BANK PROPOSAL

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ST GERMAIN. Mr. Speaker, how are we going to make sure that young Americans get all the education which the complexity and specialization of our modern society demands?

No one denies that the value and importance of higher education continues to become more and more of a necessity, yet each year there are still hundreds of thousands of our young people who have both the ability and the desire to continue their education, but cannot do so because they lack the finances. They lose out, but so, too, does society as a whole. The man who would have made a major breakthrough in medical research never does so, because he did not have the money to go to a good college or to medical school. How can society afford to let that happen?

Those of us who are privileged to serve in the Congress are especially aware that education is the very heart of a democracy and that the progress and well-being of our Nation is predicated upon the educational growth of our people. The education of our citizens is too important to allow financial obstacles to stand in the way. In February 1968, in a message to Congress, President Johnson, fully accepting this principle, proposed an Educational Opportunity Act:

To set a new and sweeping national goal; that in America there must be no economic or racial barrier to higher education; that every qualified young person must have all the education he wants and can absorb.

The policy of the new administration also seemed hopeful, for during his campaign for election President Nixon declared:

My Administration is committed to the proposition that no young American who is qualified to go to college will be prevented from doing so because he cannot afford it.

In the light of that statement it was particularly disappointing to see the Bureau of the Budget's recommendations for cutbacks in financial assistance to students pursuing higher education. The administration's budget for the national defense student loans recommends \$155

million; this is a substantial reduction from last year's appropriation of \$190 million, and far less than the \$270 million total in requests from the colleges. The recommendation for the health professions student loan program stands at \$15 million, down \$10 million from the funds available last year, and way below \$41 million requested by the schools involved. I hope that the Congress will restore these funds.

But even if these programs had full funding, we would only have begun to meet the problem. More must be done. In 1967, the President's panel on educational innovation proposed the establishment of an educational opportunity bank. It would enable every qualified American to attend the college of his choice regardless of his family's financial status. The bank would make loans to students accepted at postsecondary schools to cover their tuition and living costs against a pledge to repay out of future earnings. After graduation the borrowers would be charged 1 percent of their gross income over 30 years. Any student could borrow, and any student could borrow as much as he needed.

The limited loan programs existing at present can meet only part of the requests, and they do not allow undergraduates to borrow any more than \$5,000 over the period of their collegiate years. This is not enough money for a poor student to attend a private school even if it is one with moderate tuition. The educational opportunity bank would not restrict the size of the loan; without interfering with present local, State or Federal student assistance programs, the bank would give any student the opportunity to pay his own way to any college, university or professional school to which he could gain admission.

Here are the advantages which a loan bank would offer:

First. It would increase the number of postsecondary students from low-income families, and would relieve the burden of hard-pressed middle-income families who may have several children attending high-cost universities.

Second. The economically disadvantaged and middle-income students would be able to approach their choice of a college with options similar to those now reserved for the well to do.

Third. It would make the student responsible for his own education, and would stimulate, I am sure, a more serious and mature approach to his studies. Under the present family-sponsored system, we tend to prolong adolescence.

Fourth. It would remove the heavy burden of working while in college to pay educational costs thus enabling the otherwise financially strapped student to devote full time to his studies.

Fifth. It would tend to make the higher education institutions more responsive to the needs of the students themselves who would, under this program, wield the buying power.

Sixth. The plan would enable both public and private institutions to improve the quality of education by charging tuition fees closer to the full cost of education.

Seventh. It is a voluntary plan that offers help only to those who want it.

Eighth. The student would not have to worry about a loan he could not pay for some unforeseen reason because his obligation to repay is related to his future income.

Ninth. The availability of loans would not be directly affected by the state of the money market.

Tenth. Educational costs would be met without the hazards of direct Government interference.

In March of last year I introduced a resolution calling for a thorough study of the proposal by the House Education and Labor Committee and the Banking and Currency Committee. No action was taken on the resolution. Since that time the results of the Carnegie Commission on Higher Education have been published. This commission has also recommended the establishment of a national student loan bank. The commission advised making loans available to undergraduate and graduate students without reference to their need; it also suggested repayment of the loan according to a percent of earnings after graduation.

I believe that the Congress should take with utmost seriousness the recommendations of these two outstanding commissions, the President's Panel on Education Innovation, and the Carnegie Commission on Higher Education. Accordingly, I am reintroducing a resolution directing the aforementioned committees to undertake a study of the educational opportunity bank proposal as soon as possible. I hope that they will provide us with whatever legislation is needed to implement this plan in the very near future.

Priorities should not be forgotten. The most important investment we can make in providing for the future of our Nation is to give advanced educational opportunities to as many of our people as possible.

SOME CHANGE IN OUR JUDICIARY'S STATUS IS NECESSARY

HON. HOWARD W. POLLOCK

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. POLLOCK. Mr. Speaker, today, I have introduced a bill which would require that Federal judges, District, Court of Appeals, and Supreme Court, submit themselves to approval of the people 5 years after appointment and every 5 years thereafter.

This proposal is patterned after the constitution of the State of Alaska, which makes the judiciary accountable to the people without political involvement. This is somewhat of a middle position between total nonresponsibility and partisan political standing for the bench.

Mr. Speaker, some change in our judiciary's status is necessary. The courts have become powerful arms of the Federal Government as quasi-legislative to quasi-administrative organs. It is time that the men who fill these offices answer to people.

PEOPLE WANT TRUTH

HON. WALTER S. BARING

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. BARING. Mr. Speaker, I have just returned from a 2-week business trip to my State of Nevada where I met with several constituents around the State and received from them a good sounding on their feelings toward several subjects regarding national and international affairs. The strong feelings voiced by the majority, I felt, required my statements on the pressing issues facing the United States in the world today. A scheduled speech I was to deliver in Las Vegas, Nev., allowed me this outlet of communication as a Representative of the people of Nevada. This speech was delivered May 14, 1969, at the Tropicana Hotel while I was a guest of the Las Vegas Kiwanis Club and I now offer my remarks for the RECORD:

PEOPLE WANT TRUTH

Mr. Chairman, Kiwanis Club members and friends, it is really a pleasure and a privilege to appear before you today and it is good to be back in Las Vegas, even for a very short visit. I am going to omit lengthy preliminaries because I do not want to waste any valuable time. It is usually my custom to speak "off the cuff," but because there are a number of very vital subjects which I wish to touch upon, I am going to refer to my notes in order that none of these issues will be omitted.

Actually, I have come to have a "heart to heart" talk with you today, because I believe that you want me to "lay it on the line." As the saying goes, I intend to "tell it like it is." I believe that all that the American people want is to be told the plain, simple truth. Unfortunately, we have become the victims of widespread distortion of facts, double talk and the confusion of issues.

However, I have come to the conclusion that the so-called great silent majority is now waking up, and these good, decent people of America are not going to remain silent much longer! They are discontented and even disgusted with the status quo. They know something is wrong, and they want to do something about it. They want to get back to plain, simple truths.

Because I know that Kiwanians are devoted to high principles, as well as to the welfare of our youth, I am going to confine my remarks mainly to the things which relate to our young people—who are most assuredly America's most important product. It is through such programs as the annual "Kid's Day," sponsored by Kiwanians and the U.S. Air Force, with the air power show at Nellis Air Force Base, that our country can instill more pride, patriotism and spirit in our youth.

First of all, I want to talk about the students of today—in our public schools, and more particularly in our colleges. How do we communicate with the dissident students in order to curtail the unrest and the violence that are striking at our educational institutions? How do we cope with this rabble-rousing minority which is interrupting and disrupting the freedom of academic achievement? In turn, how do these students, who are causing the disruptions, communicate with the college administrators?

I am going to be very frank—even very blunt—in what I am going to say to you today. I think that the conditions which are facing us are so serious that there is no longer any time for "pussy-footing" or keeping silent on the issues. Therefore, I am

going right straight to the point in saying what I believe to be necessary for the security, for the advancement and for the continued preservation of our great institutions of learning. The subject calls for straightforward, plain talk, because it involves each and every one of us in this room—as well as others across the nation.

My answer is simple. There has to be a meeting of the minds between the dissident students, and the college educators and administrators. Furthermore, this should take place before the unwanted incidents occur, and not afterwards. We are all familiar with what happened at San Francisco State College, and what is continuing to happen on many other campuses.

When Mr. S. S. Hayakawa took over the reins as college president in San Francisco at the peak of student violence, he took the "get tough" approach by calling in the police—for the protection of those students and professors who chose to study and to teach. Mr. Hayakawa had no other choice than to counteract with force against the violence of the demanding students. (It is important to add that many of the trouble-making dissidents are not students, at all. Many of them are trained agitators who travel from college to college.)

I think that all of us must agree that when a minority group (or a small number of students) make their demands at gun point—or in some cases with fire bombs—in order to force a university to change its policies, it is time to "get tough." If the radicals take over, academic freedom will die, and America will wither away.

It is my true belief that the situation can be remedied without bloodshed, violence and guns. However, we will have to "get moving" right away! There are several major college campuses already doing that which I am endorsing today. That is, to have meetings in which the president, the deans and a representative number of faculty members participate, daily or several times a week, along with a representative number of students. The purpose of these meetings would be to discuss university problems, with a view to maintaining the peaceful process of getting an education.

These meetings would have to be in compliance with the current set of rules of the university, and not in any way designed to take away the powers of the university, or the college president. Chaotic and violent demonstrations will never accomplish anything for the students. Maybe the radicals will realize this when the university administration removes them from the enrollment lists and throws them off campus. This has already occurred in some colleges—but it hasn't happened often enough!

When you and I went to school—to college—there were probably things about both the policy and the curriculum which we did not like, but we did not engage in violent take-over demonstrations to show our disapproval. After all, no one is forced to attend any college. He can always leave! I believe that the general public is getting plenty "fed up" with the riotous, gun-toting rabble-rousers who do their dirty work, and then cry:—"Police brutality"—when it is necessary to establish law and order.

We have Federal aid to education because the States are overburdened with many other expenses. I wish that the Federal funds earmarked for higher education could be put in the hands of the States, instead of Washington, D.C. Many of my colleagues in Congress, as well as myself, (in view of the violence and the criminal activities which are taking place on many campuses) are not in favor of giving Federal aid to those universities which have been beset with serious demonstrations. It is my belief that all students found guilty of rioting and the destruction of buildings and classrooms should not only be scratched from the list of getting

Federal aid, but they should be dumped out of school on their so-called intellectual ears!

And while I am on the subject of these rabble-rousers, I would like to include the "SDS" characters (Students for a Democratic Society). While this group of trouble-makers have a nice-sounding, patriotic name, no one should be misled—because there is nothing patriotic or democratic about them! I have done a lot of research along these lines which reveals that they are nothing but a bunch of thoroughly brain-washed revolutionists—in most cases trained by outsiders who are not even enrolled as students. However, the Students for a Democratic Society are not the only agitators provoking unrest on our campuses, because there is another bunch of rioters known only as militants.

Now, while I have been condemning these people I have just mentioned, I assure you that they are not the only ones to blame for the disgraceful condition which pervades many of our colleges. I believe that there is also an urgent need to weed out those radical faculty members and administrators who "go along" with the rioters, and even instigate much of the trouble. On the other hand, I would condemn faculty members and administrators who will not listen to fair and just demands of the students.

Good, academic leadership is the basic key to solving the campus administration side of the problem. And putting an end to permissiveness will go a long way toward rectifying the condition. We just cannot permit this lawlessness. To permit a comparatively small handful of radicals to destroy our institutions of learning is preposterous and unbelievable! (I am happy to report that my bill to create a select committee to investigate crime and disorders in cities and on campuses was passed by the House of Representatives last month.)

Our students today are probably probing deeper into the meaning of events, and they are obviously coming to our campuses with greater knowledge than years ago. They are asking questions, and they are entitled to receive right answers. This is healthy, but it is not healthy for students or the university to be allowed to be attacked violently by a minority group bent upon disrupting the system of learning. We should not confuse anarchy with academic freedom!

This is something that every couple with children approaching college age should be concerned with right now.

As I said before, I believe that the people of this country, as a whole, are waking up to the fact that our country is in great danger. I find that the people of Nevada are particularly alert to the danger. In my travels around the State—in numerous conversations with people—and in my large volume of correspondence—there is a great dissatisfaction being expressed. People are tired of being told that black is white, and that wrong is right. They are able to recognize a falsehood when they hear it, and they are intelligent enough to want to do something about it! They are asking, "since when has America adopted the policy of the 'Big Lie'?" They are exclaiming, "we want to get back to the truth!"

I think that one glaring example of misrepresentation and misleading information lies in the area of the Vietnam situation—which subject is uppermost in the minds of most of us. I happen to have a son over there, myself, so the subject is very close to my heart.

I am going to quote from two recent news items—one which relates to a top Republican leader, and the other which is accredited to a Democratic source. Thus, the subject is removed from the realm of political or one-sided propaganda. I believe that the American people were thoroughly deceived by the last administration concerning the situation in Vietnam, and I can see no difference, thus far, under the new administration.

The first article appeared in the Nevada State Journal of May 2, 1969, and it refers to a statement made by Senator George D. Alken, the senior Senate Republican from Vermont. These are the words of Senator Alken, who is Ranking Republican on the Senate Foreign Relations Committee:—

"Common sense should tell us that we have now accomplished our purpose as far as South Vietnam is concerned. It is my belief that the United States would do well to advise the South Vietnamese Government immediately of our intentions, and then start an orderly withdrawal of our military personnel, turning that country and that war back to its rightful owners. It may take some time to complete this operation," he added, "but it should be started without delay."

Now, I will quote from the second news item, which appeared in the May 2, 1969 issue of the Reno Evening Gazette. The Democratic source is none other than former Secretary of Defense, Clark M. Clifford, who was a strong supporter of U.S. Vietnam policy when he became the Johnson administration's Defense chief in 1968. One of President Johnson's closest associates, Clifford entered the Defense Department publicly committed to the idea that the American intervention was necessary, not only to save South Vietnam, but to prevent the takeover of other non-Communist nations in Southeast Asia. It is quite shocking, therefore, to read that he now states that he left office convinced that the Nation's military effort in the war was "hopeless." At a meeting of some of the Senate Foreign Relations committee members, on April 22, 1969, former Defense Secretary Clifford declared his disillusionment and his change of heart concerning the war in Vietnam. He told the Senators that he left office "in disagreement with many of former President Johnson's Vietnam policies, and convinced that the Domino Theory (which contends that the fall of Vietnam would lead to the takeover of other nations) was fallacious."

In view of the reversal of opinion on the part of former Defense Secretary Clifford in regard to his previous conviction that American intervention was necessary, and his present agreement with other top ranking foreign policy leaders who consider the Vietnam war as "hopeless," it appears that there is something terribly wrong about continuing a "hopeless" situation—at the cost of our servicemen's lives. (With 300 to 400 of our boys killed every week, this is an exceedingly high cost!) I say, therefore, if this is a hopeless war which we cannot possibly win, I want my boy to come home! And I am sure that you want your boys to come home, too!

I believe that the people of America—the parents and families of our fighting men—are entitled to know the truth. I also believe that the majority of the American people are exceedingly tired of going along with a no-win war. Personally, I hate war. However, I firmly believe that if we are fighting for a just and honorable cause, we should give it all we have, and get it over with! In this respect, I am a hawk! If our Nation is as powerful as we are led to believe, then our fighting men should be given the opportunity to win! It is nothing less than criminal to make them fight a "hopeless" war—with their hands tied!

The people of this country are entitled to know the truth about Vietnam. We have been kept in the dark long enough. I say that we should either win, or get out of Vietnam!

While we are considering foreign policy, I want to speak briefly on the subject of foreign aid. If there ever was a false presentation of facts, this program is it! If our foreign aid program were really doing and accomplishing that for which it was intended—feeding the hungry and helping the poverty-stricken all over the world—I would be in favor of it. In fact, I did favor the

Marshall plan at the outset. However, our present foreign aid program has grown into the most corrupt extravaganza you can imagine. It is a program which benefits crooked politicians and world bankers—and which brings aid to enemy, Communist countries. I believe in calling a spade a spade—and calling a lie a lie. Let us not call something "foreign aid" when it really amounts to treasonous aid to the enemy.

The same thing applies to trade with Communist countries—which countries in turn, use our supplies and our equipment to kill our American fighting men! I say, "stop all trade with Communist countries!"

It is sickening to me to be told to "go easy" on the subject of communism. Why is this treated in such a "hush-hush" manner by our Government? Why must we be careful not to offend the Communists? It may not be a "declared war" that our boys are fighting over in Vietnam, but they know that it is a real war, all right. They also know who is supplying the Viet Cong with ammunition and armaments.

Now, let us take a look at the United Nations organization. I don't think we have to look very deeply to see who is running that show! The Communists have dominated that organization ever since its inception—when Alger Hiss, the convicted Communist, helped to frame it. (But we pay 70% of the bills of the United Nations.)

And let's take a quick look at the peace talks now going on in Paris. If ever there could be a greater travesty, so far as accomplishment is concerned, I would like to know what it is. Days upon days of haggling over the shape of the conference table (whether round or square)—while more and more boys continue to die—make us wonder just what purpose the organization is serving. There is talk, and more talk, but nothing happens.

Coming to the national scene, isn't it about time to recognize just what is behind the attempted breakdown of juvenile morality, the pornography on our newsstands and in the mall, the so-called "sex education" in the schools, and the filthy movies that infest our theaters? Should we not recognize what is behind the widespread violence in the land, and dare to call it by its correct name—communism.

If we are looking for straight answers, we might also take up the matter of crime on the streets—and the "soft on crime" attitude of the Supreme Court. The good, decent, law-abiding citizens of this country are getting mighty disgusted with having every leniency and every protection extended to criminals, caught red-handed in the act of their guilt—and binding the hands of the Nation's police. The general American public is not stupid, and people know that the cry of "police brutality" has been a Communist slogan as long ago as the Communist-directed revolutions which took place in 1848. (Also, the slogan, "We Shall Overcome.") Generally speaking, the American people are anxious for a return to law and order. (I might add that many of us strongly oppose the Supreme Court's decisions to allow Communists in defense plants—and schools.)

We might here touch upon the Supreme Court's decision which ruled out prayer in public schools. According to a Harris poll, more than 94 per cent of the American people stand in favor of prayer in public schools. How can it be that the overwhelming majority is ignored, and a small minority—a mere handful—is allowed to represent the thinking of the great American public? Unfortunately, many people do not realize that it does not require an amendment to the Constitution to bar the Supreme Court from hearing any school-prayer cases. It is within the will of the people—and within the power of Congress—to change the Supreme Court ruling.

I believe that prayer should be restored to the American way of life. I believe, also, that the people should know the truth regarding the power of Congress to change the Supreme Court's ruling. Furthermore, I believe that every public office holder should be questioned as to how he stands on this important issue. Our country was founded on prayer, and I think that it is a horrible thing when the principal of a school has to avoid the mention of the word prayer. (This happened at a California school at a memorial service for the late President Eisenhower. The school principal announced:—"We will now have a moment of silent meditation.")

In my talk today I have given a few glaring examples of double standards, double talk and the double trouble that is abroad in our country. I know that the people of this country are seeking answers—and that they want to get back to good, old American truth! I believe that this applies, also, to the majority of our youth. They want to be told the facts, and they (of all people) are entitled to know the truth.

I intend to keep on telling the American people the truth!

CAMPUS RIOTS AND PORNOGRAPHY

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. SAYLOR. Mr. Speaker, most of my colleagues will have seen a Washington newspaper article, "An Angry Scholar Speaks Out on Campus Rioting," by Dr. Dwight L. Dumond on May 4. It appeared earlier in the *Detroit News*. It is lengthy and I shall not ask that all of it be included in the *RECORD*, but I commend it to your diligent attention.

Dr. Dumond, distinguished professor emeritus of history at the University of Michigan, includes this observation in his analysis:

The militants are not progressives, not liberals. They are reactionaries of the most extreme sort. They seek to destroy, not to build, and they are achieving little except chaos and retardation. When the revolution has consumed its leaders, as always happens, and the wreckage is cleared away, we will be about where we were before the trouble started.

How soon the return to academic freedom and effective teaching will come about is a matter of conjecture, but it cannot come until order has been restored and the banners of principle and morality are again unfurled at the many disrupted and disgraced colleges and universities across our land.

Dr. Dumond continues:

They cannot speak without obscenities. They cut great holes in desks, write erotic notes on desks at which decent people have to sit after them, and burn holes in carpets and cork floors. They have revolted against everything that is decent and respectable.

Mr. Speaker, while demanding order on the campus, government and the general public should at the same time insist upon a return to decency in campus publications.

Pornography and obscenity, which came into prominence with violence and vandalism in the university sphere, should be cotargets of the crusade to

clean up the campus. Student rebellion and student immorality have been combined in the Communist-initiated and carefully devised plan to destroy both our institutions and our precepts.

Neither can any longer be tolerated.

Whether transplanted from Moscow or Peking, these evils should not have been allowed to take root in this country. In an article that appeared in the *Johnstown, Pa., Tribune-Democrat* of May 6, which I should like to include in the *RECORD* at the conclusion of my remarks, Columnist Vera Glaser explains why there was reluctance to deal firmly with the revolt.

The same docile and cringing permissiveness that allowed campus rioters to get out of hand is responsible for failure to stop distribution of raw and revolting printed material. Had existing laws been utilized to prevent disorder in its early stages, as many of us advocated when the rebellion erupted in 1965, campus disruption would never have approached current levels.

Since the new administration is simultaneously striking out at violence and at salacious material mailed to juveniles, the attack should include campus smut. If justification is needed linking obscenity with insurrection, the student body of every college and university includes many boys and girls under 18 years of age.

President Nixon said on May 2:

American homes are being bombarded with the largest volume of sex-oriented mail in history. Most of it is unsolicited, unwanted and deeply offensive to those who receive it.

The same appraisal is applicable on the college campus. Parents preparing to send children to college next fall must be assured that the campus will be a place of study instead of a battleground for insurrectionists. By the same token, there must be assurance that students will no longer be exposed to scurrilous and degenerate material now appearing in many official student publications.

Mr. Speaker, here I should like to include a recent article, "The Abyss of Chaos," from the *Wall Street Journal*, as well as the Glaser column. They follow:

[From the *Wall Street Journal*, Apr. 25, 1969]

THE ABYSS OF CHAOS

The issue is academic freedom, not to mention a few other fundamental American rights such as freedom of speech and assembly. The question is whether the nation's colleges and universities are going to let neo-fascistic minorities, Negro and white, dangerously devalue the quality of higher education or indeed destroy the institutions themselves.

The question has poignancy as well as bitterness: Think of the parents now going through the spring agony of acceptance at a good school for their son or daughter; they are prepared to sacrifice to pay \$8,000, \$10,000, \$15,000 for the four years but now must wonder whether the youngster will get an education worth having or one at all. Think also of the parents who look back on their own college years as a time of hard study but of tranquility as well; the spectacle today is utterly disgusting.

It is a spectacle, needless to say, that has no place on the American scene. The essence of the American political experiment and experience is that one's own rights, one's own freedoms, depend on respect for the rights

of others. And that is so because the history of the ages hammers the message that without tolerance liberty is lost.

Yet here we have these totalitarian students, unfortunately with not a few sympathizers and fellow-activists on the faculty, forcibly preventing the majority from getting an education, doing assault to persons and property, in the case of Cornell strutting around armed to the teeth.

Why?

Most Americans have granted from the start that students do have certain legitimate grievances, that a lot is wrong with the structure and conduct of the contemporary university. Very well; grievances can be discussed, defects put right. But these student (and non-student) fascists are not interested in remedies. They are interested in destruction. Given the power they seek, they would not know what to do with it except to destroy the academic tradition, emphatically including academic freedom.

Somewhat paradoxically, it seems to us, the violence they are perpetrating stems from the sentimentality that has imbued much of the nation's political and sociological thinking for a generation or more. In this view, the child is to be "developed" but rarely disciplined (progressive education), the adult's individual responsibility is held to be minimal (society is to blame for aberrant or criminal behavior), and the people generally are to be shepherded and subsidized (the welfare state).

This is not just an instinctual development; it has been preached from many platforms, not least the very colleges and universities now in turmoil. It is not altogether surprising, therefore, that a number of young people flout authority and heap scorn on the pervasive sentimentality that lets them get away nearly with murder. They, you can be sure, are a much tougher breed.

In the special case of attitudes toward Negroes, some administrators and faculty members have expressed the sentimentality in an excess of guilt, trying to do literally anything to make up for past wrongs. Yet, as S. I. Hayakawa of San Francisco State has observed, it is one thing to accept responsibility for the consequences of slavery; it is quite another to go overboard on guilt for what our ancestors did. Guilt, unlike responsibility, can easily become a neurotic emotion.

The whole aura of sentimentality, emotionalism and romanticism helps explain the pusillanimous reaction to the violence on the part of many educators. Confronted with "non-negotiable" demands, they eagerly set up "black studies" courses, even acknowledging that the result is bound to be a double standard for Negroes and whites—what a service to the Negroes to give them an inferior education. Equally eagerly, they cave in to the demands of white militants.

It helps explain; it does not excuse. Those capitulating administrators and professors have demonstrated their abysmal inadequacy. Consider Cornell, where a majority of the faculty have reversed themselves and nullified disciplinary action against five law-breaking Negro students. What kind of way is that to run a university? In the pitiful words of one professor, "We felt we had to draw back from the abyss of chaos."

The abyss is at hand, all right, but capitulation is not how to escape it. The obvious, right, procedure is to keep the classes going, with the aid of police if necessary, and to suspend, expel or otherwise discipline the campus fascists who are making life hell, and education all but impossible, for the many more numerous serious students.

Unless the nation and its educators can overcome their emotionalism and return to common sense, not only the present but the future is full of peril. Education is not everything in life, but in our society it is a great deal.

If America lets the quality of its academic institutions be degraded or destroyed, it will become a second-rate nation, a nation of near-incompetents in the arts and sciences and all else that makes for civilized existence.

[From the Johnstown (Pa.) Tribune-Democrat, May 6, 1969]

SDS WILL FADE OUT, MITCHELL PREDICTS (By Vera Glaser)

WASHINGTON.—Attorney General John Mitchell expects the Students for a Democratic Society (SDS), which is inciting violence on the nation's campuses, to phase out and disappear before long.

"You saw what happened to the DuBois Clubs, didn't you? It will be the same with SDS," Mr. Mitchell told NANA.

The W. E. B. DuBois clubs, a Communist-dominated campus organization, had 36 chapters in early 1966, organized in many cases by sons and daughters of old-line party members.

Not too much has been heard of them since SDS took over the headlines, fomenting hostility at Columbia, Chicago, San Francisco State, Harvard and other universities.

SDS is active on 200 U.S. campuses, Mr. Mitchell said, giving them more than five times as many chapters as the DuBois Clubs.

PEKING ORIENTED

Moreover, according to the respected Spivack Report, SDS is dominated by Peking-oriented Communists.

The problem, as Mr. Mitchell sees it, is "separating the idealistic, impressionable young people in SDS from the hard-core revolutionaries manipulating them."

Money to support SDS and such other guerrilla groups as the Black Panthers and RAMs is coming from "outside the country," Mr. Mitchell said, but would not be more specific about the source.

"We have infiltrated them completely," he said. "The black groups are fragmented. They're kooky. They are not out to change our society, they want to destroy it. But they can't agree among themselves which way to go."

HOOVER PREDICTION

The campus disruptions were foreseen by FBI Director J. Edgar Hoover, who warned a year ago that New Left leaders were planning a "widespread attack on educational institutions," relying on dissidents and militants to bolster their effort.

His prediction that "revolutionary terrorism" would invade college campuses has proved to be accurate.

Some of the explanation may lie in the Spivack analysis, which states that:

"The takeover of SDS by the Maoists has been a steady process. But in the wake of McCarthyism, nearly 15 years later, it still is considered unfashionable to label Communists as 'the enemy' or even to acknowledge that there are hard-core Communists (mostly of the Peking variety) deeply involved in everything from the March on the Pentagon to the takeover at Cambridge.

SADLY MISLED

Spivack quoted Harvard's Dean Ford as saying that the students who seized University Hall were "many of the usual earnest, confused, concerned students, but there were many others, and any one who thinks we were dealing only with a group of young people trying somehow to express their moral revulsion of bloodshed overseas is sadly misled."

Others at Harvard were said to have noted, almost casually, the role of the Maoist Progressive Labor Party in what happened there.

University officials who stood by and let it happen, probably to avoid accusations of neo-McCarthyism, have become casualties of their liberal credo.

In the circumstances, the attorney general's prediction that the SDS will dry up and blow away seems a bit optimistic.

RESULTS OF QUESTIONNAIRE

HON. J. GLENN BEALL, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. BEALL of Maryland. Mr. Speaker, I recently sent a questionnaire to the people of the Sixth District of Maryland in order to have the advantage of their thinking on some of the important issues facing us today.

I think it is particularly significant that 40,000 men and women in the Sixth Congressional District took the time to complete this questionnaire and return it to us. This I think is indicative of the interest that our citizens have, not only in our Government, but in the questions before us for consideration in these trying times.

The results of the questionnaire are as follows:

[Answers in percent]

1. Should the Federal Government guarantee an annual income to citizens living in poverty?

Yes ----- 14.1
No ----- 77.8
Undecided ----- 8.1

2. Should the electoral college be abolished and the election of the President and Vice-President be based on popular vote?

Yes ----- 79.7
No ----- 13.4
Undecided ----- 6.9

3. Do you favor President Nixon's proposal for the A.B.M. project?

Yes ----- 46.1
No ----- 28.9
Undecided ----- 25

4. Do you favor the Federal Government spending money for the Super Sonic Transport plane?

Yes ----- 24.6
No ----- 60.4
Undecided ----- 15.0

5. Do you favor Federal registration of firearms?

Yes ----- 36.7
No ----- 59.3
Undecided ----- 4.0

6. Do you favor the Federal Control of the Potomac River?

Yes ----- 41.6
No ----- 38.4
Undecided ----- 20.0

7. Do you agree with the present course of action being followed in the Viet Nam War?

Yes ----- 17.5
No ----- 69.3
Undecided ----- 13.2

8. Do you favor the Federal Communications Commission's proposal to ban cigarette advertisements on television and radio?

Yes ----- 57.6
No ----- 35.0
Undecided ----- 7.4

9. Do you agree with the proposal to convert the Post Office into a government owned

corporation to operate on a self supporting basis?

Yes ----- 60.3
No ----- 24.0
Undecided ----- 15.7

10. What action would most likely lessen the tax load on the lower and middle income taxpayer?

a. Raise standard deductions ----- 25.2
b. Raise standard exemptions ----- 48.2
c. Set minimum limit under which no tax would be paid ----- 26.6

11. Do you favor:

a. Reorganization of the present draft ----- 68.8
b. Abolishing the draft and moving to an all volunteer army ----- 31.2

12. Do you favor:

a. Continuing space budget at the present level ----- 46.5
b. Decreasing space budget ----- 43.3
c. Increasing the space budget ----- 10.2

TURBULENCE ON THE CAMPUS

HON. ADAM C. POWELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. POWELL. Mr. Speaker, I should like to include in today's CONGRESSIONAL RECORD the following letter from the distinguished Franklin W. Wallin, president pro tempore, of Colgate University, Hamilton, N.Y., to the President of the United States on May 15, 1969:

COLGATE UNIVERSITY,

Hamilton, N.Y., May 15, 1969.

The President,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The Student Senate and the Faculty of Colgate University have voted overwhelmingly to instruct me to send you this communication. We note with deep concern the press reports of recent statements by members of your Administration attributing the cause of recent campus disorder to a "small minority of students," or to a lack of "backbone" in administrators. Such statements, we fear, denote a grievous misunderstanding of these difficulties, and divert attention from their broader import.

The turbulence which afflicts the universities reflects only in part internal grievances within these institutions. The universities must immediately attend to those problems of internal policy and structure which aggrive members of their communities. But in larger measure the turbulence reflects a more profound disaffection which may be traced to the state of the nation. The protests are directed at shortcomings not only of higher education but of the social order which it serves. At the roots of campus disquiet are the disillusionment of students and faculty whose ideals and hopes are affronted by the lamentable quality of our national life. Engaged in the pursuit of knowledge and the cultivation of humane sensibilities, they are acutely aware of the glaring gap between the promise and performance of American democracy. The protracted war in Vietnam, the persistence of poverty and hunger in affluent America, and the pernicious racial divisions within the society engender doubt and cynicism with respect to all of the society's institutions. The resulting despair and sense of impotence are manifest in the anger and belligerence of campus protest.

Unless national priorities are recorded and pressing problems are solved, campus unrest is likely to persist. Meanwhile, censure and reprisals by the government are likely to compound these difficulties. Official preoccupation with the symptoms rather than the causes of university turmoil threaten to deepen disaffection and disunity.

We at Colgate University have acknowledged the need for institutional reforms at all levels, and have initiated some measures to institute these changes. Additional measures are contemplated. It is urgent, also, that the nation's political leaders acknowledge the maladies of our national life, and act promptly to remedy them. Statesmanship in this task will alleviate the basic causes of campus disorder; it will also enlist the idealism and dedication of a college generation fervently committed to the nation's highest moral purpose.

Respectfully yours,

FRANKLIN W. WALLIN,
President pro tempore.

GUARANTEED ANNUAL INCOME

HON. JOHN DOWDY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. DOWDY. Mr. Speaker, in view of the interest in and discussion of a guaranteed annual income for Americans, I thought it appropriate that my colleagues be able to read Editor Paul Durham's editorial of April 17, from the Dill, Tex., Free Press. I feel the thoughts expressed by him are worthy of consideration.

The editorial follows:

GUARANTEED ANNUAL INCOME

The American people will never accept the idea of a guaranteed annual income, chiefly to replace our tottering welfare setup. Proponents of the measure—actually right now it's just an idea, not a measure—claim in effect that there is enough money for everybody to have a guaranteed annual income.

The welfare system we have now is antiquated, they say, in that it perpetuates the "fatherless" family. That is, families with large numbers of children can't get welfare payments if there is a husband-father on the premises. So, to skirt the issue, we have what are called "fatherless" families. The list grows by leaps and bounds each year.

Intellectuals claim that the system should be changed, and possibly replaced by the guaranteed annual income. Giving low-income citizens a taste of good money on a guaranteed basis will make them want more of it and result in their getting a job. This, in essence, is what we understand the proponents of the guaranteed annual income are saying.

We agree that the welfare system needs considerable overhaul. It simply is not working. Welfare rolls are getting longer, and at a frightening pace. We agree, too, that it doesn't make much sense to make liars of low-income people, which is what we do when we force them to disclaim the existence of any man around the house.

But we fail to see how the guaranteed annual income will correct the situation. It will only make matters worse.

How, for instance, will you explain to the average working man that it is justifiable to pay anyone \$3,000 or \$5,000 a year for not working? How can you justify one man getting out of bed and going to work six days

a week, while some other guy who is able to work doesn't work a day the whole year, yet is "guaranteed" a specific annual salary?

The average American will not accept that, not in theory and certainly not in practice. Even if the plan were workable, it would do incalculable harm to the great American dream and to the morale of our people.

You will find few Americans who object to feeding hungry children or hungry adults. At the same time, you will find few who are sympathetic with another American who is able to work and will not.

Politicians who think the guaranteed annual income will work had better get out of their overstuffed chairs and find out the peoples' feelings on the matter. It simply will not work.

We are not suggesting that the welfare dilemma has any easy answer. It is a terrifying problem, to say the least. Our only suggestion might be to tighten the pocketbook in an attempt to break the welfare "chair"; to upgrade education in areas most beset with the problem; to pay few checks to the people who are able to work.

These things are being done, of course. We suggest we do more of this, and talk less about guaranteeing anybody anything—other than his freedom and the right to make his own way in the world.

—P. D.

VANDALISM

HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. THOMPSON of Georgia. Mr. Speaker, the Southside Sun, my hometown newspaper recently carried an editorial concerning vandalism at a local elementary school which, in my judgment, expresses the concern and dismay of all responsible citizens about acts of violence and irresponsibility being done either in the name of some cause or for sheer abuse.

During the course of this vandalism, black paint was smeared on the flag of the United States. The newspaper rightly states that the physical damage at the school can be repaired and adds:

But what can be done to right the mind of the child in the classroom where the flag of the United States was stained by the hand of the vandal?

The editorial is so well written and so well expresses the thoughts of many Americans that under unanimous consent I submit the editorial for inclusion in the CONGRESSIONAL RECORD, as follows:

[From the Southside Sun, May 15, 1969]

VANDALISM

Vandals went through the Parklane School Thursday breaking windows, turning over desks, throwing paint on the walls and destroying anything their hands fell on.

As a final insult they threw black tempera paint on the flag of the United States. This single act of defiance, of destruction, of pointless vandalism is symbolic of the damage to the school and in a larger sense of the trend of events in our country.

The destruction at the Parklane school looks as though it is the work of children. There was apparently no attempt to steal anything from the building, television sets and musical instruments which could have been sold were not taken.

The school was in such disorder that no classes could be held on Friday and the students were sent home for the day. The vandals had stopped up the sinks and left the water running all night. The fire department was called and spent all morning pumping water out of the building.

Walking through these rooms left in shambles you could only wonder who could do this type of thing and the answer keeps coming back—children.

But why would they do it? Was it purely for fun? It seems incredible that they would resort to tearing up a school room for entertainment. East Point has an excellent Recreation Department. There are community playgrounds available. East Point is not a concrete jungle. The playground at Parklane School has been made available for children and has been used by them after school. There are literally dozens of Little League teams, with adults offering an outlet for youthful energy.

Parklane is a modern school with modern equipment and cheerful, sunny rooms. Why should a group of children tear up a schoolroom for fun when there is ample organized recreation or just playgrounds for small groups to organize their own playtime. . . . It seems that there is only one answer to this question.

As surely as the fabric of the American flag was stained by the paint thrown by the vandals at Parklane School, there is a tear in the fabric of American morality. Children hear of campus take over and of destruction by college students. But worse they hear that the Deans give in to the student demands. Campus rioters tear up administration buildings and then are turned loose without even a slap on the wrists. Faculty members and administrators are kidnapped and subjected to abuse and ridicule by students and no action is taken by the police.

The minds of children are impressionable and they are quick to learn. It seems that the vandals of Parklane School have learned their lesson too. Tear up a schoolroom just for fun. It is the thing to do now. Don't worry about the police they will not do anything.

But the police do not deserve the blame. Their hands are tied by laws designed to protect the criminal, not to protect the citizen or his property. Fingerprints were taken at the Parklane School, but no child may be fingerprinted. There are suspects in this case of vandalism, but they can not be questioned except in the presence of their parents or lawyers. Should they ever be brought to the bar of justice there are hundreds of technicalities that will, and have, allowed the guilty to walk away from his crime completely free.

There is a tear in the fabric of American justice as surely as there are stains on the flag in the classroom at Parklane School. Prayer is banned from the classroom where the vandals ran riot by a court that has ruled that pornography is legal.

But the physical damage at Parklane School can be repaired. The overturned desks can be righted. The paint can be washed from the walls. Textbooks damaged by water can be replaced.

But what can be done to right the mind of the child in the classroom where the flag of the United States was stained by the hand of a vandal. This is not the first time this school year that vandals have done their work in the school and have made their impression on the minds of the students.

Will they understand why they were sent home for a day? Will they understand why the poor sap, the taxpayer, will continue to pay his school taxes to repair the damage of the vandals? Or will these children join in the trend toward anarchy, to violence and disrespect for the flag of the United States?

STATISTICS ARE VALUABLE IN CRIME CONTROL AND UNDERLINE THE NEED FOR DRUG LEGISLATION

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. CHARLES H. WILSON. Mr. Speaker, as chairman of the Census and Statistics Subcommittee of the House Committee on Post Office and Civil Service, I am most interested in examining the value of creating a National Crime Statistics Center to help us achieve a clearer understanding of crime and those who are responsible for its soaring increases. One aspect of crime which has had a tremendous increase within a few short years is the unlawful use of drugs. Accordingly, I have sponsored H.R. 9313 to supply drug education materials for young people in our schools, and H.R. 11166 to provide for the establishment of a Commission on Marihuana and Other Hallucinogenic Drugs.

The need for these pieces of drug legislation has recently been statistically underscored by the California Department of Justice's Bureau of Criminal Statistics in their advance report on 1968 drug arrests in California. I submit this report because I think it demonstrates the usefulness of statistical compilation in helping us to comprehend the degree of severity in crime increases in various areas of the country and because it also underlines dramatically the need for realistic legislative responses to the increasingly serious drug situation in the United States today.

The report follows:

[From the California Department of Justice, Bureau of Criminal Statistics]

1968 DRUG ARRESTS IN CALIFORNIA ADVANCE REPORT

The Bureau of Criminal Statistics has made several important changes in the gathering and presentation of drug arrest data shown here.

Total drug arrests are shown by county as reported to the Bureau by the policing agencies in California. To develop detail beyond these gross counts, the Bureau analyzed the arrest reports, rap sheets, court disposition documents and other source materials for 80 of each 100 individuals arrested on drug charges. Details of the sample are shown in the first two tables and, for ease of comparison, data for earlier years were re-cast on a sample basis also.

Data here are based on preliminary figures. Some minor changes may be made in refining the information. These changes will be shown in the annual report, *Drug Arrests and Dispositions in California*.

ADULT OFFENSES

Based on police counts, adult drug law violations rose from 39,246 in 1967 to 64,639 in 1968; a 65 percent growth quite close to the 66 percent increase recorded for 1967. Thus, drug arrests continue to grow at about the same rate as before. The most noteworthy feature of the sample data in Table 1 is the drop shown in the proportion of marijuana offenses from 56.5 percent in 1967 to 49.5 percent in 1968. Conversely, dangerous drug law violations for adults rose from 20 to 32 percent.

Table 3 shows that Riverside and San

Bernardino counties have joined the ranks of those reporting more than 1,000 arrests.

JUVENILE OFFENSES

Juvenile arrests totaled 29,947 in 1968 in contrast to 13,911 recorded in 1967. This 115.3 percent growth of juvenile arrests for drug offenses is also based on totals submitted to the Bureau by the police. The sample on juvenile arrests reflected much of the same tendencies as the adult arrests. As marijuana lost ground, dangerous drug arrests increased and now represent a larger proportion of the total juvenile arrests than before.

Seven counties not listed in 1967 reported

juvenile arrests in 1968—Amador, Mariposa, Modoc, Siskiyou, Tehama, Trinity and Tuolumne.

Among the major counties, only San Francisco shows virtually no increase—520 as against 503 in 1967. Most of the other counties had increases—some well over the 100 percent mark: San Diego, 160.7 percent; Fresno County, 235.6 and Kern, the largest growth of all, 382.6 percent.

The smaller counties recorded more extraordinary fluctuations because of their smaller 1967 totals. Glenn County, for instance, rose from 1 to 8 arrests or a 700 percent increase; Shasta rose from 8 to 37 or a 362 percent growth.

TABLE 1.—ADULT DRUG LAW VIOLATIONS REPORTED BY CALIFORNIA LAW ENFORCEMENT AGENCIES DURING 1968 COMPARED TO 1960 AND 1967

FIFTIETH ANNIVERSARY OF
STEBEN SOCIETY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. ADDABBO. Mr. Speaker, I rise to congratulate the Steuben Society of America on the occasion of its 50th anniversary.

The Governor of New York has proclaimed this week "Steuben Society of America Golden Jubilee Memorial Week" and I am pleased to join in this tribute.

I would like to take this opportunity to acknowledge the outstanding job done by the general chairman for this golden jubilee—the Honorable Albert H. Bosch, a former Member of Congress and my predecessor as Representative for the Seventh District in New York.

I also wish to congratulate Mr. Ward

Lange on his reelection to a seventh term as national chairman of the Steuben Society.

The strength of the society lies in its commitment to protect political liberty by preserving equal opportunity for all Americans.

The major legislative goal of the society for this year is an amendment to the U.S. immigration law to secure fair treatment for all northern Europeans who have found it more difficult to come to the United States since passage of the 1965 act.

In this connection the Steuben Society has joined forces with the American Irish National Immigration Committee to support this legislation.

As a cosponsor of this bill to amend the immigration law, I look forward to working for the same legislative goal and I wish the society continued strength to represent Americans of German descent during this golden jubilee week.

YOU CANNOT PACKAGE CONSUMERS

HON. CATHERINE MAY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mrs. MAY. Mr. Speaker, I have always maintained that consumers choose one product over another for a wide variety of reasons, and not on the basis of price alone. Our husbands would think us mad, indeed, if we asked them how much per pound they paid for the new car.

In effect, though, there are some well-meaning individuals who think that the judgments we housewives make in the supermarket are based on the wrong things, and they have set out to "correct" all of this. They seem to think that our value judgments are somehow inferior to their own, and that we housewives can, by the stroke of legislation, all be neatly packaged and labeled. Well, I for one, do not believe it. Neither, I am happy to note, does Don Robinson, editor of NAM Reports, published by the National Association of Manufacturers.

In the May 19 issue of NAM Reports, Mr. Robinson has done a particularly good job of illustrating the difficulty in making flat statements about comparison shopping and the choices made by consumers. I recommend the article as good eye-opening reading to my colleagues, and include it at this point in the RECORD:

SENATOR'S 60 LADIES AND THE SURPRISING EXPLANATION OF WHY THEY FLUNKED TEST ON SHOPPING CHEAPEST

Sen. Gaylord Nelson is on the warpath again, introducing a new packaging and labeling law to do what he says the present one has failed to do. That is, it hasn't made price comparisons between sizes and competing brands any cinch.

The Senator's bill, familiarly known as "S. 1424," aims at making such comparisons as easy as filling out a Federal income tax form. The Senator asserts that a high order of mathematical ability is required now to make price comparisons, notes that housewives can't tote computers around in their shopping carts, and therefore in practice would require Joe the corner grocer to buy or rent a computer of his own.

For the retailer would be required when he marks his price on merchandise to mark also the price per ounce or other basic unit.

Why not, the Senator asks, when they do it on meat and fish?

There are special scales that so label meat, fish, cheese and such items for supermarkets, but such marking is confined to items with short shelf life. Any good store disposes of unsold fresh goods like this very quickly. But the retailer has a problem with, say, corn flakes. Suppose a certain size box is put on the shelf at 27 cents. The grocer finds his competitor is selling them for 26, so he lowers his own price. Come Thursday, his co-op grocers' association has them advertised three days special at 24. Monday they go back to 26 again. Tuesday, our friend discovers that due to the routine Russian crop failure there is a routine corn shortage, and the wholesale price rises, requiring him to mark up to 27.

Such a series of changes (not uncommon at the retail level) is troublesome enough now, and such changes can happen daily at many places in every aisle. Imagine what chaos if Joe the grocer had to mark his boxes with the cents and hundredths of a

cent per ounce that such changes would bring about!

The good Senator was anguished to learn that five California ladies were unable to choose the cheapest-per-unit offerings among lists of 70 items any better after the Packaging and Labeling law had been put into effect than before. In fact they did a little worse.

One reason, Senator, is that women shoppers haven't had much practice in choosing the cheapest items in their regular shopping, because the cheapest is seldom what they are seeking. Your obedient servant discovered this by going through four incoming bags of groceries and asking why the items were chosen.

The hand dishwashing detergent was chosen because it smells wonderful and is easy on the hands. It also seems to do more work per squirt than a cheaper brand.

The dishwasher detergent was chosen because it was cheapest and there are no troubles with the dishwasher no matter what is put into it. Any trouble finding out which was cheapest? No. There were these big boxes on special to introduce a new brand.

The sirloin steak was selected because yr. obd. svt. said he was hungry for steak. It was chicken which was on sale.

The paper towels were chosen because they match the kitchen. The bathroom paper was chosen because it has flowers on it and what the heck it's Spring.

The scouring cleansers were chosen: 1. Because the itty bitty plastic cans with removable labels fit on the medicine cabinet shelves. 2. The big ugly cans are cheap and guests don't look under the kitchen sink.

Five pounds of granulated sugar was bought because we needed sugar.

A similar purchase was 10 pounds of flour.

But also in a bag was two pounds of a special flour that won't congeal, clot, lump or whatever. It was purchased without regard to the price of any other flour because "I've always wanted to try some."

There were eight number 10 cans of string beans. They were bought because they were eight for a dollar, and we can always use string beans. Nobody in our house knows how many ounces or how much per ounce this is, but we all know that number 10 cans of string beans usually are much more.

There was a pound of margarine of a brand acceptable to this family (not the cheapest) because Mr. Nelson's cohorts have supported butter to a price level millady finds excessive.

There were five pounds of California table grapes, because the store was being picketed by SDS types trying to get everyone to boycott table grapes. (The kids enjoyed them.)

The cereal was selected by a headstrong four-year-old because there was a Wacky Racer in the box.

Some pompano was purchased because everyone will eat it, and you can't get fresh pompano around here too often.

The store's own brand of facial tissues were bought because they were cheapest, and the boys use them for everything.

A premium brand of facial tissues (pink) was purchased for use in the baby's room, because she's the first girl and we haven't gotten over that joy yet.

Six cakes of soap were selected because they 1. smell good. 2. irritate no family member's skin. 3. match the color of the bathrooms. 4. seem to last better when the kids forget to fish them out of their bath water, as they've been told to do a thousand times if they've been told once.

A washday detergent was chosen because there were two cold water brands on the shelf and the other one gave some of us the itch.

A gallon of fabric softener seemed a good idea, with a baby in the house, and all.

So it went. The lady was completely satisfied that she had bought well for this family in these circumstances. Given a list of 70

items to be bought for price alone, the lady's whole thinking processes for shopping would have to be altered.

No matter what Joe's computer works out about prices per ounce on detergent, our house will still contain the one that doesn't itch any of us. No matter what price the soap may be per ounce, it had better smell good and not dissolve too quickly in the bath water.

Does the Senator want to quarrel with the lady?—Don Robinson.

LET US END RESTRICTION ON OIL IMPORTS FROM CANADA

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. DULSKI. Mr. Speaker, the national system of oil import quotas has been in operation since 1955 and its establishment was justified as essential to national security.

Is the quota system still necessary? Is it still essential to national security? This is a matter which is now under expedited study by a cabinet-level force.

I am well aware of the pressures pro and con for the oil quota program and I am convinced that modification is in order, preferably on a gradually reduced control basis.

Of most concern to my home area of Buffalo and western New York, however, is the restriction which has been imposed upon the importation of oil from Canada. This limitation is by executive action outside the import program. Canada is exempt from the national quota system.

The limitation on imports from Canada has worked a particular hardship upon the petrochemical industry in my area. Indeed, we stand to lose two important industries unless the arbitrary limitation is eased.

Regardless of whether changes are made in the basic oil import program, it is essential that the administration take into careful account the effect upon other American industries of its executive action on Canadian oil imports.

The oil flow allowed from Canada not only is inadequate, but also has been fluctuating in a manner that creates serious instability in the petrochemical industry.

As I have said, Canadian oil was exempted specifically from the Federal oil import control program and yet the administration has seen fit to impose arbitrary restrictions which have had devastating effect upon our area.

I have again brought this matter to the attention of the administration, and I hope sincerely that the task force will give it due consideration, although there is real reason to wonder whether we can wait much longer for a change in policy.

Mr. Speaker, I include with my remarks editorials from two local newspapers:

[From the Buffalo (N.Y.) Evening News, May 12, 1969]

EASE OIL QUOTAS

Forty-six members of Congress have proposed that the national system of oil-import

quotas be gradually eliminated, and there is increasing evidence that this subsidy for the domestic oil producers should be substantially modified at least.

To most Americans, this system of protective quotas, which shelters domestic oil producers from broad foreign competition, is about as clear as nuclear physics or abstract art. But the sole justification under a 1955 law is national security.

Under that law a President is authorized to restrict the amount of imported oil when its volume would impair national security. Since 1962, this has meant that the amount of imported oil couldn't exceed 12.2 per cent of domestic production.

Recent testimony by economists and others before a Senate subcommittee suggests, however, that the national-security rationale is now very fragile indeed, and that the quotas may have spawned more problems than they solved—except for the oil producers. It has been argued that these quotas, by restricting competition from abroad, have lessened competition here at home, thus keeping the prices American consumers pay for oil and gasoline and other products artificially high; that it encourages production in the U.S. of less efficient wells; and that it damages the competitiveness of domestic oil and chemical industries in world markets.

As to the central contention that these protective quotas serve the national security, there have been several persuasive rebuttals.

The 1968 discovery of oil reserves in Alaska lessens the need-to-conserve argument, to some degree. And Wayne A. Leeman, economics professor at the University of Missouri, made the rather obvious point to the Senate subcommittee that quotas restricting foreign imports might even hasten now, in peacetime, the depletion of U.S. reserves which could prove more needed later in times of conflict.

If the aim is to conserve oil for times of crisis moreover, then that aim seems to be contradicted by such tax incentives as the overly generous oil-depletion allowance, which spur the exploitation of domestic reserves.

President Nixon in late March named a Cabinet-level task force to review oil-import policy. Probably Congress should hold off on any revision of these policies until the administration has had a chance to shape its own recommendations.

On the basis of what Congress has already heard, however, it should be skeptical of any proposals that don't seek to considerably ease a quota system which dulls competitiveness, contributes little to national security, prolongs a protective and elaborate subsidy structure in a nation committed to free trade—and forces American consumers to pay unnaturally high prices for oil products.

[From the Buffalo (N.Y.) Courier Express, Apr. 9, 1969]

USE OF CANADIAN OIL HERE IS IMPERATIVE

On the premise that federal policy ought to be geared primarily to benefit the economy of any area of the United States at a geographical disadvantage in obtaining resources to promote its industry, the Niagara Frontier is justified in pressing for an easing of restrictions the U.S. imposes on Canadian crude oil imports.

The Interior Dept. hardly will make much sense if it does not allow additional import allotments to a region whose oil refining and petrochemical industries are in need of supplies that cannot be provided economically from U.S. sources.

A sound case on economic grounds for the allowance of greater use of across-the-border pipeline facilities has been made by the Greater Buffalo Development Foundation. That case merits the sympathetic attention of the federal government despite any other considerations that led to the import controls imposed in 1960.

The production, distribution and refining of oil is a gigantic, highly competitive and complex business in which the geography of oil production is a factor. The finished products are in such universal demand and constitute so great a prerequisite for economic health in every community that usual limits fixed by government on supplies of raw material are peculiarly onerous in the case of crude oil.

The Niagara Frontier should be allowed to capitalize on its proximity to Canadian facilities. If the opportunity continues to be denied it, some tall explaining backed by more than a mere policy statement is due it.

AGRICULTURAL CONSERVATION PROGRAM

HON. ARNOLD OLSEN

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. OLSEN. Mr. Speaker, there is one item in the USDA budget I want to call to the attention of the Congress. This is the agricultural conservation program which is authorized in the basic legislation of 1936 at \$500 million annually. While the program has gone through several name changes, it is now known as the ACP and is administered by the Agricultural Stabilization and Conservation Service. After several reductions in the size of the program, the appropriation stabilized at about \$250 million in the mid-1950's. The program has operated at this level since that time until the last 2 years when the recession cuts reduced the figure to \$195.5 million exclusive of the administrative funds. It seems to me that if \$500 million were needed for this program in 1936, when each dollar bought much more in goods and services than the dollar does today, we certainly need as much today.

However, on several occasions in the past decade and a half, the President's budget to Congress has contained about a 50-percent cut in funds for the agricultural conservation program, a cut from \$220 million to around \$100 million, plus the administrative funds. This year President Johnson's budget proposed to cut the program from \$195.5 million for the 1969 program to \$100 million for the 1970 program, and President Nixon, in his recent budget message to Congress proposed that the program be eliminated entirely.

This is a program under which the Government shares with the farmer the cost of carrying out needed conservation practices usually on about a 50-50 percent basis. Many conservation practices are of no immediate value to the farmer. They protect soil and water for the future good of all the people and farmers just cannot afford to perform them completely on their own. For these reasons Congress has consistently restored the authorization for this much-needed program to \$220 million and as soon as the budget permits, it is imperative that we do so again.

In 1968, for example, over 4 million acres were seeded to permanent cover crops such as grasses, over 1 million acres were seeded to additional crops for

rotation cover, over 3 million acres were seeded to cover for soil or watershed protection, 1.1 million acres of improved cover on rangeland were established and 4 million acres were seeded to winter cover crops. All of these help prevent wind and water erosion of valuable cropland. Almost 2.5 million acres are served by wells drilled for livestock water to aid in distribution of livestock to prevent overgrazing, 3.2 million acres are served by reservoirs built in 1968 for agricultural use. About 2.6 million acres are served by reorganized irrigation systems which conserve water and prevent washing and seepage. Stubble mulch to prevent erosion of summer fallow land was carried out on 2.7 million acres and other wind erosion measures were carried out on an additional 800,000 acres. These are but a few of the conservation practices carried out with the aid of this program in the 1 year, 1968.

Many counties have special practices to meet particular and often peculiar local problems. Many of these are designed especially to assist low income farmers carry out conservation practices and in such cases the cost share provided by the Government can be as much as 80 percent of the cost of performing the practice. Other practices, in addition to conserving soil and water, are especially beneficial to wildlife or enhance natural beauty.

ACP is used in every agricultural county in the United States. In 1968 about a million farms participated in the program. During the 5-year period 1964-68 more than 2,291,000 different farms carried out practices under the program. Requests for assistance in carrying out these conservation practices greatly exceed available funds even with a \$220 million program. There is a national limit on payments to a person of \$2,500 per farm—except under pooling agreements the limit is \$10,000. Many States and counties establish lower limits so they may assist more farmers. The average payment under the regular ACP in 1968 was \$210.

The ACP is administered by elected farmer community and county committeemen and by appointed farmer State committeemen. The authority for these committeemen is contained in the basic legislation establishing the agricultural conservation program. These committeemen also administer other assigned programs such as the emergency ACP to assist in drought, flood, et cetera, the voluntary wheat and feed grain diversion programs, the cotton programs, programs for peanuts, tobacco, rice, naval stores, sugar cane and sugar beets, wool, price support loans, and so forth. The chairmen of State and county committees are chairmen of State and county USDA Disaster Committees. The county office managers and the State executive directors are chairmen of the respective defense boards. All of these activities would be jeopardized if the program—ACP—which provides basic legislation for the committee system itself, were abolished.

In the interests of agriculture and of the entire population, present and future, we cannot permit the program to be dropped. We should, instead, be re-

storing the program to the authorized level in order to preserve the soil for future generations in a condition needed to supply the rapidly expanding population with adequate supplies of mineral-rich food.

SOVIETS GREATLY INCREASING MILITARY STRENGTH

HON. GLENARD P. LIPSCOMB

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. LIPSCOMB. Mr. Speaker, the Soviet Union is presently carrying on a crash program to greatly increase its military strength.

Mr. Richard Wilson discusses this Soviet military buildup in a May 2 article in the Washington Evening Star entitled "Soviets Greatly Increasing Military Strength." Mr. Wilson quotes Rear Adm. H. G. Rickover as having stated:

By the end of this year [1969], we face the prospect of losing the superiority in nuclear submarines we have held for many years. The Soviet Union is surging forward with a naval and maritime program that is a technological marvel.

These words are particularly significant coming from the man generally credited with having created our nuclear Navy.

I urge my colleagues to read Mr. Wilson's article, which I am inserting in the RECORD under leave to extend my remarks.

SOVIETS GREATLY INCREASING MILITARY STRENGTH

(By Richard Wilson)

Nothing enrages the antimilitary groups in Congress more than to be accused of advocating unilateral disarmament. This, of course, is what they do propose in effect but unilateral disarmament sounds empty-headed, and it is.

The Soviet Union is greatly increasing its military strength. We would call it a crash program in this country. The expansion's most ominous phase is in the means of delivering nuclear weapons. At the same time, the anti-military groups in Congress are advocating reductions in critical military programs including the deployment of antiballistic missiles. If this does not amount to unilateral disarmament then the words have no meaning.

In response to an inquiry from Sen. John O. Pastore, D-R.I., Rear Adm. H. G. Rickover, whose stubborn advocacy is credited with having created our nuclear Navy, has given a chilling prospectus of growing Soviet strength in the seven seas. Rickover quotes Admiral Gorshov, commander-in-chief of the Soviet navy, as having recently said: "The flag of the Soviet navy now flies proudly over the oceans of the world. Sooner or later, the U.S. will have to understand that it no longer has mastery of the seas."

The Soviet Union has decided to gain its own kind of naval superiority over the United States and is in the process of doing it through a major expansion of its submarine forces into the world's largest underseas navy. At the present rate the Soviet force of nuclear submarines of the Polaris type will overtake and exceed the United States force by the end of 1970.

"By the end of this year," Rickover wrote, "we face the prospect of losing the superiority in nuclear submarines we have held for many years. The threat posed by their sub-

marine force—with their new ballistic and cruise missile launchers and new attack types, is formidable. If more sophisticated types are added in the near future, as is likely considering their large number of designers and extensive facilities, the threat will rapidly increase."

Rickover says the Soviet Union is "surging forward with a naval and maritime program that is a technological marvel." "They now have," he continued, "a new submarine force of about 375; we have 143, which includes 61 diesel submarines, most of which are of World War II vintage. Thus the Soviets have a net advantage of about 230 submarines."

To achieve this, Rickover said, the Russians greatly expanded and modernized submarine building facilities, with one of their numerous yards with several times the area and facilities of all U.S. yards. They use modern assemblyline techniques under covered ways, permitting large-scale production regardless of weather conditions.

From Rickover's report and other sources it can be fairly concluded that at about the time Soviet Premier Nikita Khrushchev was deposed central decisions were made in the Soviet ruling apparatus on a large military expansion. Resources were diverted from the farm sector of the Soviet economy to defense. Outlays for defense rose sharply in 1966-67 after remaining static since 1962.

At about this same time decisions must also have been reached on the deployment of the SS9 super rocket which could theoretically give the Soviet Union a first-strike nuclear capability. President Nixon has stated that after the decision in 1967 to deploy the American Sentinel antiballistic missile system it was discovered that the SS9 deployment in Russia was 60 percent greater than had been thought. It was also discovered that estimates of Soviet strength are much more precise today than formerly owing to aerial reconnaissance from orbiting satellites with their fantastic cameras which have photographed a man walking down a Moscow street. When Rickover describes the huge Soviet submarine yards he can do so confidently because they have been photographed.

What President Nixon has been saying, and Defense Secretary Laird has been emphasizing, and Admiral Rickover has been documenting is either a morbid fairy tale or there have been significant military developments in the Soviet Union of an extremely ominous nature.

These developments do not give much encouragement to future attempts at unilateral disarmament, or they will not when the Nixon administration decides to tell all that it knows about the Russian expansion.

Rickover's final comment is worth noting. "I suggest," he wrote, "that by keeping secret our knowledge of Soviet strength at this time we may lose more than by confiding the truth of the danger we face to the American people."

SAFEGUARD IS NEEDED

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. STEIGER of Wisconsin. Mr. Speaker, radio station WHBL in Sheboygan, Wis., recently broadcast an editorial in support of President Nixon's decision to deploy the Safeguard antimissile system. I recommend it to my colleagues.

SAFEGUARD IS NEEDED

A Congressional showdown on the proposed Nixon Safeguard Anti-Ballistic Missile System is shaping up.

More and more, the pros and cons of this defense system plan are being clarified.

Critics of the plan, including Wisconsin Senators Proxmire and Nelson, contend that the ABM would provide very little protection for the U.S., trigger a new round of arms escalation, hinder negotiations for disarmament, and cost too much money that should be used to meet domestic needs.

Proponents of ABM say that it would provide a phased beginning of a full ABM defense, protecting our strategic nuclear weapons. Initially, the objective is to protect defense systems at two Minuteman missile bases where about one-third of our deterrent force is located.

Such a system would provide protection from possible attack by the Red Chinese in the mid-1970's, prevent a possible unintentional launch of missiles by the Soviets, and preserve our deterrent force thereby preventing a nuclear attack from succeeding.

Proponents also assert that the Soviets have already built their own ABM system which is much more extensive than ours and that we have assurance that any negotiations with the Russians will not be impaired.

As for the cost of the program, the Administration says the top figure would be six billion dollars, not the considerably higher figure which the critics use.

We believe that the proponents have proved their case for ABM beyond a shadow of a doubt. We believe in the interests of national security that it is far wiser to rely on the advice and judgment of our defense experts, both civilian and military, than on the politicians.

But the politicians will decide the fate of ABM and the future security of the United States. You can make your voice heard by writing to your U.S. Senators and Congressman and urging them to approve expenditures of the Safeguard Anti-Ballistic Missile System.

We cannot hide our heads in the sand. The ominous threat to our security is all too clear. The ABM system must be approved.

MARITIME DAY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ADDABBO. Mr. Speaker, today is Maritime Day—although I doubt that we have very much to celebrate, in view of our waning position on the oceans of the world. I do not know what day the Soviet Union sets aside to honor its maritime achievements—but certainly they have a lot more to boast about than we do.

Less than a quarter century ago, Mr. Speaker, this country was the world's maritime leader in shipping and shipbuilding. Today we are fifth in shipping, and ninth or 10th in shipbuilding. The Russians, on the other hand, have come up from being a maritime nonentity to a position where they threaten to surpass us in the size of their fleet. What is more, 80 percent of the Soviet fleet is less than 10 years old—while 80 percent of the American-flag fleet is more than 20 years old. So in addition to size, the Russians can boast a newer, faster, more efficient fleet.

It may be that the Soviets will never dominate world shipping. It may be that we need never fear that American im-

ports and exports will some day be moving in ships flying the "hammer and sickle." But the fact that the Soviets are moving ahead at flank speed in the development of their merchant fleet capabilities is an ominous sign. It shows the reliance—economically, militarily, and politically—that the Soviet Union places on its maritime capabilities. Contrast this to our failure as a nation to exploit our technological skills and our failure to exploit the edge we held over everyone else at the end of World War II. One would be justified in assuming that the United States sees no economic, military, or political advantage to having a strong merchant fleet—even though history repeatedly has demonstrated that a nation can neither be strong nor free unless it is a maritime nation.

Someday, Mr. Speaker, we may substitute action for words, and get on with the job of rebuilding our merchant marine. I trust that that time will not be too far off—or otherwise it might be too late to try to rescue our sinking merchant fleet.

THE NATIONAL CHILD ABUSE ACT OF 1969

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. BIAGGI. Mr. Speaker, there are few realities in life more repugnant to consider than the abuse of a child by his own parents. Yet the social monster of child abuse can be found today among people of every educational, religious, socioeconomic, and geographical background in America. All 50 States have now enacted laws providing for mandatory reporting of suspected cases of child abuse; but the problem remains formidable. Not only must we provide better protection and rehabilitation for the children who have been mistreated, we must also see to it that their parents receive the professional help they need to accept and perform their normal parental roles.

Despite the steps already taken to prevent abuse of children, there is still a long way to go. The legislation I am introducing today known as the National Child Abuse Act of 1969, would help us cover the distance still remaining. It would provide the framework necessary for State and Federal Governments to coordinate a national attack on this terrible problem. The strength of this legislation comes from several powerful sources.

First of all, it provides that as soon as a case of child abuse is reported to the appropriate police authority, the protective services of the State are automatically brought to bear on the welfare of the child. It also would mean that any doctor, social worker, schoolteacher, or welfare worker who knowingly or willfully neglects to report suspected cases of child abuse, would be guilty of a misdemeanor.

The bill also provides immunity from civil or criminal liability for any person, who, in good faith, makes a report pur-

suant to this act. These provisions are particularly important because some State laws still single out the medical profession as the only reporting group. My bill not only requires reporting from all groups which have occasion to observe cases of child abuse, but from any individual who makes a report in good faith. The broader provisions of my bill would therefore increase reporting effectiveness many times over.

Some State laws on child abuse have unwittingly created a strong deterrent to medical reporting by allowing a reporting doctor to become enmeshed in extensive litigation. Any reporting doctor, once burned, is likely to be twice shy. By providing legal immunity for any person reporting in good faith, my bill would effectively remove such a deterrent.

Other provisions of this legislation strike out in new directions. In cases where parents who receive welfare payments are found guilty of child abuse, the bill provides for an immediate cut-off of Federal welfare funds. Funds would also be stopped immediately if it is determined that those parents receiving welfare payments are also drug addicts. Welfare funds involved would then be transferred to the person or agency responsible for the care of the child or children involved. Further, in homes where either parent is a known or reported drug addict, there would be mandatory removal of an abused or neglected child.

The bill also requires that the abused child or children be provided specific legal representation, and it allows a child's legal representative to appeal without delay if he is dissatisfied with the judge's decision. In addition to medical examinations, color photos showing injuries received by the child or children would be allowed as evidence. For parents accused of mistreating children, mandatory psychiatric examinations would be required.

The final, and in some respects most important provision would establish a child-identification system by requiring the Federal Government to issue social security numbers to all newborn babies. It would also be mandatory for hospitals and/or doctors to file the social security number of all children who are being treated because of abuse or neglect. Upon enactment, the provisions of this act would be effective immediately.

The hideous spectre of child abuse has assumed many guises throughout history. For centuries the physical maltreatment of children has been justified on grounds which have ranged from expelling evil spirits and pleasing certain gods, to transmitting educational ideas and maintaining discipline. Modern man, however, is repelled by the savagery of these ancient beliefs, and is reluctant to admit that such cruelty could be practiced today. The tragic evidence, however, is to the contrary. Despite existing legislation, more than 9,000 cases of child abuse were reported in 1968. According to a recent report of the New York Medical Society, the neglect and abuse of children is actually increasing. Only 2 weeks ago, Dr. Vincent Fontana, medical director of the New York Foundling Hospital, stated that: "One or two children are killed—

actually killed—by their own parents every day in this country." Dr. Fontana has called the shocking increase of child abuse an "epidemic which deserves immediate attention."

Though child abuse is an old human phenomenon, what is new today is the increase and violence in the attacks on infants and young children by their parents or other guardians. Beginning in about 1960, evidence documenting this has been steadily accumulating. In 1961 the American Academy of Pediatrics sponsored a symposium on "The Battered Child" which served to focus the spotlight of national attention. A few months later, the Children's Bureau in the Department of Health, Education, and Welfare drew up a statement of principles and guidelines for State legislation on reporting cases of child abuse. The gruesome toll continued to rise, and in 1964 the American Medical Association stated that parental abuse of children was probably "a more frequent cause of death than such well-recognized diseases as leukemia, cystic fibrosis, and muscular dystrophy."

Today we realize that the term "child abuse" describes many kinds of maltreatment. But whether we say "battered child," or "neglected child," or "abused child," or simply use the word "cruelty," they all add up to the horrible truth that thousands of children in this country are being killed and maimed with calculated finesse. The American Hospital Association has described some of the major causes of infant deaths:

On record are thousands of cases of "falls." Strangulation followed by passing a pillow against the child's face until death happens frequently. Little ones have been placed on windowsills with the hope that the plunge will be fatal. Bathtubs have long been favorite vehicles for infanticide. Placing babies in ice cold water with a stay in the refrigerator is an effective killer as is boiling water. Sexual assaults are not uncommon. Starvation is resorted to frequently. Children are chained to beds to keep them out of sight.

The unwillingness of normal human beings to face the brutal facts of child abuse is understandable, but it must not be permitted to blunt the force of our concern. The incidence of child abuse is neither isolated nor accidental, but occurs with a terrible regularity.

Congress has both the power and the means to combat this problem. The legislation I am introducing today would permit the final battle to begin. As the noted psychiatrist Robert Coles has observed:

It is nothing short of a scandal that we allow crushed and terrified parents a continuation of their misery in their own children. Surely here there can be no real disagreement about the need for immediate action. Lives are in the balance.

HONORING ED EDMONDSON

HON. CARL ALBERT

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ALBERT. Mr. Speaker, the Muskogee area region of the National Congress of American Indians on May 9, 1969,

adopted a resolution honoring our distinguished colleague from Oklahoma (Mr. EDMONDSON). The sentiments expressed by this group, representing many thousands of American Indians, are shared by his colleagues in the Oklahoma congressional delegation and by all who know of Ed EDMONDSON's many contributions in behalf of American Indians. Under the unanimous-consent agreement I include the resolution honoring Mr. EDMONDSON:

RESOLUTION

Whereas, Congressman Ed Edmondson of Muskogee, Oklahoma, was elected as Congressman for the Second District of Oklahoma in 1952 for the 83rd Congress, and

Whereas, Congressman Edmondson has continuously rendered outstanding service to the Indian people, and

Whereas, Congressman Edmondson has worked tirelessly and unselfishly to improve the social and economic status of the Indian people.

Now therefore be it resolved that Muskogee Area Region of the National Congress of American Indians goes on record commending Congressman Ed Edmondson for his unexcelled service to the Indian people, not only of his own District of Oklahoma, but for all Indians throughout the entire United States.

Adopted this 9th day of May 1969 at Tahlequah, Oklahoma.

HAMPTON W. ANDERSON,
Regional Vice-President.

Attest.

ELIZABETH SMITH,
Recording Secretary.

THE PRESIDENT'S PROGRAM TO FIGHT HUNGER

HON. MARVIN L. ESCH

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1969

Mr. ESCH. Mr. Speaker, I want to join with many of my colleagues in commending President Nixon for his strong and effective program to fight hunger. As the President said, "That hunger and malnutrition should persist in a land such as ours is embarrassing and intolerable."

Despite our vast material abundance and agricultural wealth, many Americans suffer from malnutrition. It is absolutely unacceptable for us to tolerate this situation any longer. It is unacceptable that young children, through no fault of their own, should be stunted in their physical and mental capabilities because proper food is not available.

The President's recommendations are the culmination of several years of study and debate here in the Congress. Last year many of us called on President Johnson to make major improvements in the food stamp and food distribution programs and introduced legislation to create a Special Commission on Hunger. As a member of the Education and Labor Committee, I was especially concerned about the importance of food programs for the future of our Nation's young. But no support was forthcoming from either President Johnson or Secretary Orville Freeman.

It is gratifying that we now have a President who is concerned and who is

willing to do more than just talk about solving the problems of our poor.

The major thrust of the President's program will be toward improvement in the food stamp program. Under the program poor families will be provided with enough food stamps to purchase a nutritionally complete diet. The Department of Agriculture estimates this to be \$100 per month for a family of four. The cost will be no greater than 30 percent of the income of the recipients and, for the very poorest they will be provided on a free basis. The food stamp program will be expanded into the 440 counties in the country which do not presently have programs.

Concurrently, there will be a special effort to provide nutritionally rich foods for mothers during pregnancy and for infants. Malnutrition during this period can cause irreparable harm to children. Needy pregnant women and mothers of infants will be issued vouchers, redeemable at food and drug stores for infant formulas and other highly nutritious special foods.

The President has taken an enormous stride forward in our efforts to assure equal opportunities for all our citizens. I hope that we in the Congress will promptly provide him with the legislative tools to make his program effective and, at the same time, provide sufficient funding so that it will not be an empty promise.

We simply must no longer tolerate hunger in this the most abundant nation of all.

NEGLECT IS SINKING NATION'S FLEET

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. PELLY. Mr. Speaker, today our Nation is observing National Maritime Day, yet our merchant fleet is a sad sixth in the world. The state of our fleet and the problems facing this mighty industry have been well documented by Helen Delich Bentley in the Baltimore Sun.

I insert Mrs. Bentley's article from today's edition of the Sun at this point in the RECORD:

AROUND THE WATERFRONT—NEGLECT IS SINKING NATION'S FLEET

(By Helen Delich Bentley)

As National Maritime Day, 1969, is observed today throughout the United States, all facets of the sadly divided, bitterly segmented industry agree on one point—namely, that the U.S. must determine whether its merchant marine is to become an instrument of national policy.

If it is, a course of rehabilitation and revitalization should be followed.

COLD WAR WEAPON

If it is not, then no one should worry any longer whether there are merchant ships on the high seas flying the American flag.

Among the leading nations who use their merchant marines as instruments of their national policy are: the Soviet Union, Japan, Norway and the United Kingdom.

There are many others, but these are the nations one can place at a level with the

U.S., nations whose merchant fleets are important to the U.S. in one way or another—either from the standpoint of friendly competition, or as weapons in the cold war.

RUSSIAN POLICY

The Russians have been very blunt in telling the world that they expect to double their present 12,000,000 deadweight tons of merchant shipping by 1980. As they have built up their present tonnage—80 per cent of which is less than ten years old—they have clearly used their merchant ships as instruments in a drive to win over as many nations as they can and to carry out their national policy.

Their small passenger ships are used to transport students from developing countries to Russia to learn, and to bring to them experts and soldiers offering first-hand aid. Their tankers are still built on a small scale so that they can transport Soviet petroleum products directly into the shallow ports of these nations.

The Soviets want more freighters and other cargo carrying vessels so they can increase their own trade, and also to enter more third-flag trade routes in order to earn dollars.

Vikto Bakayev, Minister of Mercantile Marine in the Soviet Union, has stated that his country has taken into consideration the growth of population and the development of world industrial and agricultural production, along with the expansion of trade among the countries of the world. It has reached the conclusion that the scope of international shipping by water will reach 3 to 3½ billion tons by 1980, up from the 2 billion tons in 1968.

JAPANESE POLICY

The Russians intend to have enough ships on hand to more than carry their share of that cargo.

The Japanese have prescribed that their merchant marine should carry 60 per cent of the Japanese exports and 70 per cent of the Japanese imports by 1975. To meet this target, it is planned that 2,050 ships of 29 million gross tons will be built in Japanese shipyards between now and 1975.

The Japanese reached that determination after the Ministry of Transport and the Shipping and Shipbuilding Rationalization Council called upon a specially created industry advisory group, the Shipping Policy Division, to "conduct studies on a policy from the National economic viewpoint for the growth of the Japanese shipping industry."

Among the conclusions reached, according to a Tokyo publication, were the following:

1. It is essential to expand the Japanese merchant marine for improvement of the shipping payments position.
2. It is necessary to work out measures for having access to funds needed for expansion of the Japanese fleet of ocean going ships, and for the training of more seamen.
3. Government subsidies are needed to strengthen the Japanese shipping industry's business standing, and to augment its international competitiveness.

The entire existing Japanese merchant marine is less than 15 years old.

On this Maritime Day, 1969, this is the position of the U.S.:

1. The U.S. today is carrying only about 5 per cent of its foreign commerce on American-flag bottoms. This percentage has been dropping sharply every year—from a high of 57.6 per cent in 1960.
2. The U.S. ranks a weak 11th in merchant ship construction in the world.
3. The average age of the U.S. fleet is 23 years; in another 2 years, more than 2 out of 3 ships in the American fleet will be over 25 years in age and totally uneconomical.
4. The U.S. fleet is plagued with critical inter-union bickering.
5. The U.S. active fleet ranks a weak 6th in status in the world.

DECISIONS ESSENTIAL

If the U.S. determines that the American merchant marine is to be an instrument of its national policy, the nation must be sold on the idea that a healthy maritime industry not only provides major employment opportunities, but also greatly aids the balance of payments opportunities, while assuring the economy a steady flow of world trade, and the country a necessary defense weapon.

One thing for certain on this National Maritime Day is that the U.S. must soon come to grips with the problem of whether it intends to make the merchant marine an instrument of national policy, or whether it intends to turn over all of its maritime commerce to foreign interests and depend solely on them.

MINORITY REPRESENTATION ON SCHOOL BOARDS

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HANSEN of Idaho. Mr. Speaker, I wish to call to the attention of my colleagues in Congress a discussion paper entitled "Minority Representation on School Boards," by Dr. Howard A. Matthews, director of the Division of Manpower Development and Training of the U.S. Office of Education. Dr. Matthews recently presented his paper during a panel discussion at the annual meeting of the National School Boards Association in Miami, Fla., on April 14, 1969. Its contents were highlighted in the education section of the May issue of Government Executive magazine.

In his presentation, Dr. Matthews points out the need for overhauling the procedures of school boards so that they might be more responsive to the needs of the people the boards are designed to serve. He makes concrete suggestions as to how this can be accomplished by suggesting various methods of involving people from all segments of the community in the administrative processes of school boards. Dr. Matthews' suggestions not only relate to the operation of school boards, but to the functions of similar administrative bodies which require community involvement as a necessary part of their operation.

The text of the paper by Dr. Matthews is as follows:

MINORITY REPRESENTATIONS ON SCHOOL BOARDS

People react to all government in terms of the governmental agency with which they have the most frequent and intimate contact. The public school is that agency for most people. The public reaction to poor administrative practices or procedures of any school board has an erosive effect upon the attitude of the public toward the rapidly proliferating assortment of other local agencies of government, which I shall discuss in a few minutes. This is especially true where the public in general, and minority groups in particular, have little or no real opportunity to participate in making the policies and rules for programs affecting them.

Subsequent to the "poor people's march" on Washington, numerous Federal, State, and local administrative agencies adopted a policy of soliciting minorities to serve on a host of existing or newly created advisory committees. Such committees generally are

oriented to a specific problem area like new school construction, vocational education, etc. The school board, however, is not bound in any way to accept the recommendations of such committees; hence, meaningful participation in the decision-making process is remote at best by this means.

Prominent leaders representing minority groups at the recent White House Conference on Civil Rights asserted that the problems of the Negro and other minorities in the blighted neighborhoods of large city school districts were attributable in large measure to lack of membership on policymaking boards which run the schools. As a solution, several minority group leaders suggested in press interviews that the composition of school boards be altered by the appointment or election of representatives from the minority groups to the boards.

I am not sure the solution to the problem of participation of minorities in running schools really lies in placing a voting member from each minority group or sub-group in a community on all school boards. In Washington, D.C., if each minority group or faction which results in sub-groups were to have voting representation on the school board, the size of the board would be colossal. In fact, the board would probably have to rent Constitution Hall for meetings just to seat its members.

The real issue, it seems to me, is making the school board policy formulation and rule making procedures such that minorities are actually participants in both the form and substance of the policies and rules. This is not to say, however, that one should operate at the exclusion of the other. Certainly other members of this panel will address the problems of recruitment, election, and/or appointment of board members from the minorities of the community. However, with no change in the current practices of policy formulation and rule making by many administrative boards, or where a board has no written codes, or where a board does its business in executive sessions, such membership will be nothing more than a facade. It is to this aspect of the problem that I will address my remarks.

In 1955 the American Association of School Administrators (AASA) and the National School Boards Association (NSBA) issued a joint publication entitled, "Written Policies for School Boards." The impressive agenda for this conference has several sessions devoted to the subject of written school board policies. When all school boards do this, they will have taken a faltering step toward making possible minority participation in management and operation of the schools.

The AASA and NSBA statement said, among other things, that there should be a clear-cut delineation between school district policy and the rules and regulations which implement school district policy. They are two separate functions. The AASA and NSBA, however, stopped short of saying how the board and the superintendent should go about implementing their recommendations. It is with the implementation of these recommendations that a relevant role for minorities (and for all citizens, for that matter) can be found.

Modern students of school board operations and of administrative law agree with this publication of nearly a decade and a half ago. They argue, however, that the school board should devote its energies solely to establishing a broad framework of written policies within which school administrative personnel can function. This frees the school board from having to consider a specific problem and ruling repeatedly on it. This broad framework of policies guides the superintendent and his staff as they make rules and regulations to give effect to the policies. It also provides an orderly mechanism for minorities and others who deal with the board and its agents.

Policymaking is, and rightly should be, a board responsibility. The responsibility for policy implementing rules is usually the ultimate legal responsibility of the board because a board cannot delegate its power to delegate. However, the authority to develop specific rules and regulations must by the very nature of the technical competence required, fall upon and be delegated to superintendents and other professional staff who are constantly available to the public. The old-timers who write in school law and in school administration theory, as a general rule, reject this concept of delegation to superintendents and other employees.

Over the years, gallons of ink have been spilled in the professional educational journals on the subject of delegation by "experts" in school law (usually professors of school administration). They have meticulously drawn a heavy line of demarcation between the duties of superintendents and the authority of boards to delegate discretionary functions to superintendents. The usual authority cited for this position is court of record cases dating back nearly a century. Some of these cases were concerned with fact situations, not actually involving the school community, which occurred when the office of superintendent was something analogous to the modern day secretary of the school board.

These traditional school law experts would restrict the superintendent, as an agent and/or employee of the board to purely ministerial functions. They argue that boards are without authority to delegate any discretionary authority to superintendents in establishing policies or in making rules and, in addition to archaic court cases, cite piously in support of their position the time honored doctrine of "constitutional limitation."

According to this doctrine, there is imposed constitutionally (Federal and State) a separation of powers into the trifurcation—legislative, judicial, and executive. The basic manifestation of this separation doctrine is the maxim against delegated power. This means that what the people have vested in a legislative body by State or Federal constitution cannot be delegated to a subordinate body, let alone redelegated to an administrative officer. Therefore, there has grown over the years a considerable body of theoretical support in the school law and school administration community for the notion that boards of education have no authority to allow superintendents or other administrative officers to promulgate rules having the force and effect of law within the broad framework of written school board policy statements. Superintendents who attempt to work in opposition to this concept frequently find it occupationally hazardous.

It is a matter of historical fact that proscription of such delegated power as well as the rigid separation of constitutional powers of which it is an offshoot have simply failed to survive the ravages of time. The delegation of legislative power, though frequently softened by some authors and jurists with the appellation "quasi," is at this time uniformly acknowledged by students of administrative law as proper and, in fact, as a necessary ingredient of modern government. The demands of citizens for local units of government have simply required the doctrine of separation's virtual emasculation from the national and State scenes, pious pronouncements in a few old court opinions, outdated State constitutions, and articles on school law to the contrary notwithstanding.

As one studies recent legislative enactments, Federal and State, he cannot help but be impressed with the declining specificity in the laws which add necessary new services for people and/or new units of local government.

As life continues to become increasingly more complicated, citizens at the local level demand more specialized services to protect

them from each other, pollution, ignorance, land use, etc. For the most part, State laws create local units of government of all sorts. State laws usually authorize such units to establish rather narrowly specified programs of services. Generally, Federal interest is expressed through "grants-in-aid" or "purchases of services" legislation which use local units of government as "multipliers" to carry out any Federal interest in such services. Specificity in program implementation is accomplished by local agencies through the rule making process. The net result over the past 20 years has been a fantastic proliferation of overlapping local governmental administrative units with rule making powers.

The most recent census of governments indicates that over 90,000 such local units of government operate among the 50 States. These include general purpose units for cities, counties, boroughs, towns, villages; and, special purpose districts presided over by administrative boards which appoint administrative officers responsive to the board, but not directly responsive to the voters. This latter class of agencies is sometimes referred to as a "headless fourth branch of government." The latter group includes such entities as school districts; water, soil, and conservation districts; urban renewal districts; health districts; water pollution districts; sanitation districts; dog abatement districts; mosquito abatement districts; etc. Almost without exception these entities have taxing authority. Most of these local agencies are presided over by an elected or appointed board or commission which is authorized by law to prescribe "... such reasonable rules and regulations not inconsistent with the law as may be necessary. ..." (I do not remember ever reading an enabling statute authorizing such a new unit of government to make "policies".)

These administrative rules and regulations, having the force and effect of law, control more of the daily activities of the American citizen and occupy more shelf space (those that are written) than do the total statutes at large of the Federal and State governments put together.

Countless such rules and regulations are made daily in all parts of the country by these administrative boards and commissions, often with little regard for the rights, interests, and privileges of the parties affected, and often in "star chamber" executive sessions from which the public is excluded. In legal theory these administrative rules are actually "administrative laws" because, as we have mentioned, they have the full force and effect of a statute.

To illustrate the profusion of local agencies of government, let us examine a single community near Chicago. In it can be found two counties, three townships, a village, four school districts, a sanitary district, a mosquito abatement district, and a tuberculosis sanitarium district. All of these units have differing boundaries. Each was created by a distinct law or set of laws passed by the State legislature, and not one is controlled by any other centralized or coordinating agency of government. Each is managed by one of these administrative boards or commissions whose rules and regulations have the force and effect of law. Each board or its administrator can invoke sanctions that are as valid and binding on minorities, and others, as laws passed by the legislature of the State or the Congress of the United States.

Within the overall Standard Metropolitan Statistical Area of Chicago (a Bureau of Census term for a socially and economically describable area) there were, at last report, six counties, 246 municipalities, 114 township governments, 340 school districts and 354 special districts and the community I described. This intergovernmental complex involves over six million people!

A recent census analysis shows that more than half a million elected public officials preside over local units of government throughout the country. Over half of these units serve fewer than 1,000 persons. The National Commission on Urban Problems in its report to the Congress and to the President on December 12, 1968, found that most of these local governmental units—particularly those related to large urban areas—were extremely small, geographically. Among other things, the report says that about one-half of the municipalities in the average Standard Metropolitan Statistical Area (SMSA) have less than a single square mile of land area. Probably 60 percent are smaller than two square miles, and four-fifths have a land area less than four square miles (corresponding to a square two miles on each side). Fewer than 200 SMSA municipalities in the United States include as much as 25 square miles of land. The average SMSA central city has more than four overlaying local governments.

On the average, there are about 90 units of government per Standard Metropolitan Statistical Area, and the average resident of any metropolitan area is served by at least four separate local governments, i.e., county, municipality or township; one or more school districts, plus from one to perhaps a dozen separate special districts concerned with rats, sewers, mosquitoes, dogs, pollution of some sort or another, zoning regulations, etc. In addition to differing population size, boundaries, and purpose, seldom do local units follow the same procedures and practices in exercising their rule making powers.

The racial, ethnic, religious, or other characteristics which identify minority groups tend to complicate the problem by creating a geographical dispersion of minority groups called "de facto segregation." A different minority group mix is found as one moves across local jurisdiction boundaries.

Imagine the confusion that exists when citizens attempt to struggle through this administrative agency labyrinth. Suppose that a member or leader of a local minority group wanted to question a rise in his property taxes in terms of the programs of his school or those he thinks are somehow related to the school. With property taxes levied upon him by three to six separate local taxing units, to which should his protest go? On which board (or how many boards) should he serve to solve the problems?

The following are a few of the simple problems which suggest the frustration, possible indecision and delay he might experience. They are typical of situations which simply having a minority member on one local school board (or any other board for that matter) is not going to completely solve:

1. Police protection in or near schools: Might involve one or more different school districts (some people live in as many as three types of school districts, such as high school, elementary, area vocational school) a municipality; or, in suburbia, perhaps also a county or township.

2. The interrelated neighborhood effects of street cleaning and refuse collection; location of schools and/or public playgrounds; placement and maintenance of public housing; locations of health clinics and welfare service centers; etc. Functions generally handled separately or alternately by municipalities; school districts; special districts for each different type of service; county governments; and/or, one or more combinations of any of these.

3. Health care for school children or the school's relationship to community social welfare and recreation programs. Functions involving school districts; welfare boards; recreation boards; municipal governments; or, perhaps State and federal governmental agencies merely housed locally.

At this time the Congress and various associations of State and local officials are

searching for the coordinating mechanism. Until this mechanism can be found to minimize the uncoordinated operation and overlap of local governmental agencies, it seems to me more important to achieve some consistency in the practices followed by these entities in doing the public's business than to attempt to place one or more "minority" representatives on each governing board, council, or commission.

About ten years ago the National Conference of Commissioners on Uniform State Laws suggested one solution. Generally, the Commissioners as well as other authorities in administrative law agreed that to protect the rights, interests, and privileges of all citizens the process of policy development and rule making should at least provide:

1. Notice of the proposed policies and rules, amendments, or repeals, to the public, and particularly to interested parties, or parties likely to be affected.

2. Legislative type hearings to afford individuals an opportunity to be heard, both orally and in writing, on proposed policies and rules, amendments, or repeals.

3. Publication and systematic revision and updating of all policies and rules affecting the public. Policies and rules not published and filed with appropriate officials such as chief State school officers, county recorders, clerks of the court, or others having custody of public documents, would have no force or effect.

4. Delayed effectiveness of a policy or rule, amendment, or repeal to allow adjudicative review and an opportunity for affected parties to challenge proposed policies and rules, amendments, or repeals in a court of competent jurisdiction and stay their becoming operable if substantial and material rights of affected parties would be prejudiced because the administrative process or decisions are (a) arbitrary; (b) outside the powers of the board; (c) accomplished without proper regard for the procedure required in policy setting or rule making; (d) in violation of the law or, (e) unsupported by competent evidence in view of the record.

Local public school boards (and all other administrative boards and commissions) should be required to follow a similar orderly and systematic administrative procedure in policy setting, and their agents in rule making, particularly where the rights and privileges of individuals are concerned. In this way, all persons dealing with rule making bodies would have at minimum a simple consistent pattern they can understand and follow.

Much of the unrest among students, teachers, and others in the school enterprise today results from their lack of meaningful involvement in developing policies, rules, and regulations. Additionally, they resent a multitude of "unwritten rules." Something similar to policy and/or rule making (or is rule making) takes place when a particular course of action is repeatedly followed. An administrative practice or policy, even when unannounced or wholly negative, may have the practical effect of a formal written rule—the "this is the way we do it here" kind of thing. The lack of a formal, well-organized rule making process is bad enough without the frustration that exists as citizens, and particularly those from the disadvantaged community, try to wend their way through a choking underbrush of unwritten rules and regulations.

I am convinced that it is highly unlikely that meaningful involvement of minorities with regard to establishing policies and rules and regulations relating to school integration, curriculum innovation, personnel systems, board-superintendent relationships, teacher and student militancy, etc., will be permanently improved on the current piecemeal pressure point basis. They will only begin to approach solutions when clear-cut administrative procedures are established which

boards of education (and other local administrative agencies that I have identified above) must follow in establishing policies or implementing rules that affect the rights, privileges, and interests of citizens, and particularly the parties likely to be affected directly by such policies and/or rules.

There is undoubtedly no more tractless morass in the whole legal bibliography than rules and regulations of the local public administrative boards and agencies.

The problem takes its origin in large measure from the fact that when legislatures have created these various local administrative units in response to the demands of citizens for specialized service of one sort or another, legislatures have not at the same time set forth firm standards by which such agencies exercise their legislative and adjudicative functions. The typical grant of authority to a school board concludes something like this, "... and such board is authorized to make such reasonable rules and regulations not inconsistent with the law and with the rules and regulations of the State Board of Education as may be necessary for its own conduct and for the conduct of the school system."

In some States there are statutes (or court decisions) which require a regular monthly meeting of the school board on a specified date. Only at such meeting may the board pay bills, call for bids, open bids, etc.

"X" number of board members must be present to have a voting quorum, etc., but for the most part, few States tell a local administrative school board, public utility district, mosquito district, or any other kind of an administrative board, the process it must follow in developing policies or in making rules and regulations having the force and effect of law. In other words, there are few (if any) standards prescribed by law (except some derived from a few court cases) which boards must follow in exercising these important legislative and adjudicative functions.

In order to bring about improvement in the practices and procedures of boards in the exercise of the rule making powers and to guarantee protection to the rights, privileges, and interests of minorities, serious consideration should be given by all boards of education (and other administrative boards, for that matter) to the following recommendations:

1. Policy statements should be broad and general. There should not be included within the policy statement the rules setting forth the conditions of policy application, related penalties, enforcement, etc. This should be accomplished by rules and regulations issued by the school administrative staff in the manner outlined in the following statements.

2. All policy statements should be in writing and should be codified by subject matter area, and published. The actual wording of board policy statements should be accomplished by the superintendent or other appropriate school administrative staff members with legal assistance from the school attorney and, where feasible, the State education agency. Policy statements should become final and effective only when established according to the administrative procedures outlined in paragraphs 6 through 14.

3. The rules for implementing board policies should be promulgated by the superintendent or other appropriate administrative school officials. Rules should be codified by subcode numbers which identify the policy statements implemented by such rules. Rules should become effective only after they have been reviewed by the school board for consistency with the policy statements they implement.

4. Each school board should have written by-laws or rules of procedure published in a special publication and available to the

school board, school district employers, and the public. Included in the by-laws should be rules governing both formal and informal procedures the board uses in setting policy and its administrators in developing the rules to implement such policies. All such by-laws, or rules of procedure, should also be filed with the chief State school officer and with local public officials such as the county recorder or clerks of the courts who have general custody of public records in the geographical area served by the district. They also should be placed in all school libraries and in the public libraries in the community, and should be free of charge.

5. To assist persons dealing with the school board or its administrative officials who exercise rule making powers, each board should insofar as practical, supplement its by-laws with descriptive statements of the procedures individuals, organizations, or agencies should follow in dealing with the board, or its administrative officials, in proposing policies to the board or implementing rules to the administrative staff. All contact by such parties with the board should be through the superintendent.

6. At least 30 days prior to the final vote and adoption of any proposed board policy statement (or amendment or repeal) which involves the rights, interests, or privileges of employees, pupils or the public, unless otherwise provided by law, each school board through the superintendent should publish or otherwise circulate in the school district notice of the proposed policy (or amendment or repeal) and afford interested parties, or persons likely to be affected by the proposed policy (or amendment or repeal), an opportunity to submit data or views, orally or in writing, concerning the proposed policy (or amendment or repeal). Such interested or affected persons should be afforded an opportunity to be heard informally before the superintendent or other appropriate administrative hearing officer, if a request for such hearing is filed with the superintendent in writing at least 20 days in advance of the effective date of the proposed policy (or amendment or repeal). Affected parties should be afforded a formal hearing before the board only under circumstances outlined in paragraphs 10 and 11 below.

7. The final voting action upon board policy statements, unless otherwise provided by law, should be in an open public meeting and the vote recorded by member.

8. Policy statements should be adopted by the school board only after the rules to implement such policies have been prepared by the superintendent or other appropriate school administrative official and reviewed by the board to insure consistency with board policy.

9. Each policy statement adopted by the school board and implementing rules promulgated by administrative officials should be filed with the public officials named above. Unless otherwise provided by law, policy statements and proposed rules involving the rights, interests, or privileges of employees, students, or the public should take effect not earlier than 30 days following such filing except that emergency policy statements and rules concerning health, safety, and morals may take effect immediately upon filing.

10. Regarding informal hearings, any person likely to be affected by the provisions of a proposed policy statement (or amendment or repeal) who desires to contest the provisions or intent of the proposed statement, and who requests a hearing in writing delivered to the superintendent at least 20 days in advance of the proposed policy statement, should be afforded an opportunity to appear before the superintendent or other hearing official (other than a school board, or member thereof). The superintendent or other hearing official should make a finding of fact and prepare a written report and proposed written statement of decision for the school

board. Such report and statement should be delivered to all board members and handed or mailed to the party contesting the proposed policy (or amendment or repeal).

11. Concerning formal hearings, any affected party who desires to contest the report of the superintendent provided in paragraph 10, and/or statement of decision prepared by the superintendent or other hearing official for the board and who so requests in writing 10 days following receipt of such materials from the superintendent, should be afforded a formal hearing before the school board, provided, however, that his written request for such hearing shows how such person will be adversely affected or his rights, interests, or privileges impaired or prejudiced by the proposed policy statement of decision for the board prepared by the superintendent or other hearing officials.

12. The affected party contesting the proposed policy statements (or amendments or repeal) should be notified in writing of the formal hearing date, time, and place and the facts at issue at least 10 days in advance of the formal hearing. At such hearing, the complainant should have the right to legal counsel, to examine witnesses, and to present evidence.

13. The decision rendered by the board should be in writing and stated in full in the board minutes. It also should be delivered or mailed to the complainant within five days following the final action of the board.

14. The superintendent and/or other appropriate school administrative officials responsible for the issuance of rules to implement contested policy statements should defer issuing rules implementing a contested policy statement pending adjudicative action by the school board.

15. Any policy statement (or amendment or repeal) involving rights, interests, or privileges, of employees, students, or the public not adopted in conformity with the procedures enunciated in paragraphs 6 through 14, should be void and of no effect.

16. After the complainant has exhausted the remedies described above or otherwise provided by law, he should be able to seek judicial review of the proposed policy statement or rules and regulations, (or amendment or repeal) by filing an action in a court of competent jurisdiction. The reviewing court should be able, at its discretion, to stay the effectiveness of the policy statement or rules and regulations, (or amendment or repeal) upon such terms as it deems proper. The final action of the court should be either to affirm the decision of the board or reverse or modify the decision if substantial rights of the affected party would be prejudiced because the administrative findings, inferences, or decisions are: (a) arbitrary; (b) outside the powers of the board; (c) accomplished without regard for the administrative procedures required in policy setting or rule making; (d) in violation of the law; or (e) unsupported by competent material and substantial evidence in view of the entire record as submitted.

17. The superintendent of schools or other appropriate school administrative official should cause to be published annually a compilation of new policies, and amendments, or repealed policies resulting from board or court action. Such compilations also should include new or amended implementing rules for such policies as a separate section and should be filed with the officials named in paragraph 4, as well as with all administrative officials of the school district, libraries of the community and the school district, and such other individuals, organizations, or agencies as may request these compilations, which should be free of charge.

18. Policy statements of the school board and implementing rules of its officials should be reviewed and revised at least every three years for the purpose of incorporating the content of the annual compilations described in paragraph 17, above.

19. The traditional curriculum for the preparation of the superintendent of schools and other administrative positions should be drastically overhauled to lessen the emphasis upon "court law," increase the emphasis upon administrative law and update archaic statutes.

20. The position of the superintendent of schools should be strengthened by legislation, if necessary, making him an administrative officer with rule making powers to be exercised in the manner described earlier.

The model administrative procedures process which I have suggested may sound a little unwieldy, especially in a society which ambivalently asks for efficiency, speed, and complicated services all at once. What I have suggested is an interim process. It should be refined and become part of any long-range plan to bring order to expanding local governments which have grown like "Topsy."

Because most of the local units of government are creatures of the State either in response to citizen demands for services, or to obtain demands for services, or to obtain the advantage of funds derived from federal sources, the State should take the initiative to eliminate the small and inefficient units of government, and otherwise bring about some degree of consistency in the way units of local government serve the public. Uniformity should not be an end in itself. The strength of a free society lies not in its uniformity but in its diversity. There can be consistency, however, in the procedures employed by such a society in its perfection and perpetuation.

THE DETERIORATION OF OUR MARITIME FLEET

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. WILLIAM D. FORD. Mr. Speaker, once again the observance of Maritime Day finds us facing a crisis in terms of our merchant marine capabilities. The deterioration of our fleet has reached the point that we soon may have to consider that the United States no longer has a fleet.

This fact is especially alarming in light of the present state of international affairs, for the importance of sea power, particularly in time of emergency, cannot be underestimated.

It is essential that we have adequate sea transportation resources in times of crisis. But we cannot expect to have a merchant marine capable of reacting to world crises unless we develop that fleet in peacetime.

Yet what are we doing, Mr. Speaker? We have so ignored this fact that today, nearly 95 percent of our trade moves in foreign-flag vessels. And we have no assurance that these vessels—which profit so handsomely from our peacetime trade—would be made available to us in time of crisis. In fact, Mr. Speaker, past history suggests quite the opposite.

Presently, our most formidable rival in world affairs—the Soviet Union—is engaged in a massive merchant marine expansion program. Unless we do something, it is quite apparent that the Russian merchant fleet will easily outrank ours in the next few years.

I feel it is in the national interest for the United States to restore the merchant marine to its proper place among the fleets of the world. This will insure our Nation's security against any future crisis—it will help us improve our balance-of-payments position—and it will add to our domestic economic strength.

I am aware, Mr. Speaker, that there are bills pending in this session of the Congress to achieve the goal of a healthy, balanced merchant marine; in fact, I have the privilege of being a cosponsor of several of the bills in question. It is my urgent hope that we get moving on this legislation, so that our actions in support of our merchant marine more nearly parallel our words of praise for the role this industry plays in war and peace.

JOHN CARDINAL WRIGHT

HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. FULTON of Pennsylvania. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

DIOCESE OF PITTSBURGH,
Pittsburgh, Pa., May 14, 1969.

Hon. JAMES FULTON,
New Federal Building,
Pittsburgh, Pa.

DEAR MR. FULTON: Enclosed please find a copy of a brief biographical sketch of John Cardinal Wright.

Your office had asked for some biographical information that might be used as an introduction in conjunction with the news articles carried in the New York Times. This biography was put together by the Cardinal's office for just such purposes.

I hope this suits your purposes and is of some help.

Many thanks, again, for joining the Cardinal and his party in Rome at the time of his elevation to the College of Cardinals.

Sincerely yours,

Rev. DONALD W. WUERL.

[From the New York Times, May 3, 1969]
POPE NAMES WRIGHT, NEW U.S. CARDINAL, TO OVERSEE CLERGY

(By Robert C. Doty)

ROME, May 2.—John Cardinal Wright, Bishop of Pittsburgh, was named today by Pope Paul VI to head the Vatican congregation dealing with the problems of an increasingly turbulent Roman Catholic priesthood.

The 59-year-old prelate becomes prefect of the Congregation of the Clergy, which is responsible for the supervision of the spiritual welfare of priests. He replaces Jean Cardinal Villot, the Frenchman who was named Wednesday as the new Vatican Secretary of State, in effect its Premier and Foreign Minister.

Pope Paul also published today an apostolic constitution consolidating and making definitive the changes in the missal, the Catholic prayer book, that were decreed by the Ecumenical Council Vatican II and further refined by the 1967 meeting of the Synod of Bishops.

A Vatican spokesman, presenting the document, answered a question whether it foreclosed further liturgical experiment by saying that the constitution was "definitive."

The changes in the missal, the first major ones since it was promulgated in 1570, deal mainly with the wording of the liturgy and the celebration of the Eucharist.

The Pope also ended the 1,900-year-old rule that women must cover their heads in church. He did this by not mentioning the practice, an omission that Vatican spokesmen said repealed the rule.

The Boston-born Cardinal Wright is the third United States churchman to reach prefectorial rank in the central administration of the Catholic church. The late Samuel Cardinal Stritch of Chicago was named prefect of the Congregation for the Propagation of the Faith in 1958, but died before assuming the post, and Francis Cardinal Brennan, a Pennsylvanian, was briefly head of the Congregation of the Sacraments before his death in Rome last July.

FOUR WERE ELEVATED

Cardinal Wright was one of four United States prelates elevated to the Sacred College of Cardinals this week.

After his appointment today, Cardinal Wright, in a speech to the clergy of his titular Roman church, Jesus the Divine Master, declared his position to be one of social openness and theological caution.

"In our moment of history," he said, "the history of the church and the history of mankind, a 'liberal' social attitude and 'progressive' spirit are the need of the hour. But these require as an indispensable condition of their health and effectiveness a jealous regard for doctrinal soundness, a commitment to the faith that is unqualified save for human frailty."

Far from being incompatible, he said, theological and doctrinal conservatism and social progressivism were natural allies, "particularly in the crisis of our present culture, our political order, our very civilization."

U.S. PRIESTS IN MOVEMENT

With United States priests contributing a large share of the clerical "contestation" of authority, it is considered here to be appropriate that an American prelate should be charged with responsibility for their spiritual welfare.

Discussing the changes in the missal, one expert said that the over-all effect of the Pope's document was to "promote the whole idea of a simpler, unified approach, a single ceremony involving closely priests and faithful."

Such profound changes as the turning around of altars so that the celebrant priest faces the communicants and the authorization of masses in vernacular tongues instead of Latin have been in effect since the end of the Ecumenical Council in 1965.

Other changes have been the subject of authorized experiment—and sometimes unauthorized, as in jazz masses—pending the final codification published today.

EBULLIENT, INTELLECTUAL PRINCE OF THE CHURCH: JOHN JOSEPH WRIGHT

(By Damon Stetson)

Several years ago John Joseph Wright, the Roman Catholic Bishop of Pittsburgh, was asked how many people he had in his diocese.

"More than two million," he replied, causing a reaction of disbelief in his questioner, who knew that there were not two million Roman Catholics in the Pittsburgh area.

"No," the Bishop agreed, "but there are more than two million souls, and a bishop is not just the bishop of the Catholics."

The stocky, gregarious prelate, who was elevated to the College of Cardinals this week and was named yesterday as prefect, or head, of the Vatican Congregation of the Clergy, demonstrated during his years in Pittsburgh his belief that every person in his diocese had a claim on him. Nearly every aspect of the city's religious, civic and cultural life felt the impact of his intellect and strong personality.

No sectarian shepherd, Cardinal Wright, who is 59 years old, brought a vision to his flock that embraced national Catholic problems, a deep concern about peace and an ecumenical spirit. He has been described as both a theological conservative and a social militant.

A FOE OF RACE DISCRIMINATION

Last fall he headed the committee drafting a pastoral letter at a meeting of the National Conference of Catholic Bishops in Washington. Some liberal priests were dismayed because the letter supported Pope Paul VI in his reaffirmation of the ban on artificial means of birth control.

On the other hand, the new cardinal has been a leader in campaigns to eliminate job discrimination and to achieve social justice and civil rights for Negroes. In the summer of 1967, he spoke out strongly against the Vietnam war, calling it "a morally dubious mess" and urging the end of the bombing. He was equally vehement in condemning Vietcong "atrocities."

Cardinal Wright has the heavy build and hearty ebullience of a long-distance truck driver that belie the manner and intellect that won him a reputation as one of America's most brilliant prelates. He has always derived pleasure from simply mingling with people and he delights in plunging into a crowd and indulging in small talk. (He speaks fluent Italian and French.)

The oldest of six children, Cardinal Wright was born in the Dorchester section of Boston on July 18, 1909.

Nights and summers he worked as a stock boy at the Hyde Park branch of the Boston Public Library for 25 cents an hour. That job and another in the city room of The Boston Post helped him pay his way through Boston College, where he won more academic and debating honors. The class of 1931 voted him the member who had done the most for the college.

He then entered St. John's Seminary in Brighton, Mass. At the end of a year he was one of the top two in his class and was sent to Rome to finish his studies at the Pontifical Gregorian University.

He was ordained a priest in the chapel of the North American College in Rome on Dec. 8, 1935, and remained to continue his studies at the Gregorian University. In 1939, he received the doctorate in sacred theology after having done voluntary parish work abroad in England, Scotland, and France.

Returning to Massachusetts, he became a professor of philosophy at St. John's Seminary, Brighton, and in 1943 was appointed secretary to the Archbishop of Boston, William Cardinal O'Connell. Named a monsignor in December, 1944, he rose to the rank of domestic prelate in 1946 and was consecrated Titular Bishop of Aegae and Auxiliary Bishop of Boston in 1947. In 1950, Worcester, Mass., became the see city of a new diocese and he was appointed to head it.

When Bishop John F. Dearden, who also became a Cardinal this week, was appointed Archbishop of Detroit in 1958, Cardinal Wright was named as his successor in Pittsburgh and was installed as the eighth Bishop there on March 18, 1959.

While in Pittsburgh, Cardinal Wright formed the Catholic Diocese Commission on Human Relations, initiated the policy of having laymen on the Catholic School Board and got the diocese involved in Project Equality, an interfaith group to promote equal employment.

He also urged greater attendance in Catholic schools by Negro children and initiated the Labor Day Mass, now an annual event.

BIOGRAPHY OF HIS EMINENCE JOHN CARDINAL WRIGHT

Ever since he first began his priestly work in Boston, Cardinal-Designate John J. Wright has been revered by all who have come in contact with him and who have heard him speak. In many of his memorable talks it has been difficult at times not to feel that there was something unconsciously biographical about them. At any rate, the years seem to have proved it to be so for he now is to become a Cardinal.

Perhaps one could find this unconsciously biographical sense in an address he made in Boston just before becoming the first Bishop of Worcester and just nine years before he became the eighth Bishop of Pittsburgh. In that address he described the life and times of Boston's first Catholic Bishop, John Cheverus. He related that Bishop Cheverus was a man of letters, a preacher extraordinary; an ecumenist before the word was even known as it is today; that he was a tireless traveler in ministering to his people; that the distressed and the poor were his continued preoccupation; that he became a beloved figure in his community; and that he was remembered long after he left Boston—and that his Church named Bishop Cheverus a Cardinal.

The same fits Cardinal Wright. The biography of Bishop Cheverus which he related could be the exact description of the life and times of Cardinal Wright. For the nine years Cardinal Wright labored in Worcester and for the last ten years that he has been Bishop of Pittsburgh, he has left his indelible mark on the hearts of all he has served. A man of prodigious activity, his energy has seemed boundless and his wide scope of interests has been all-encompassing. Pope John XXIII found in him the right man in the right place in the preparatory work of Vatican II. Pope Paul VI found in him, too, the right man to continue in a permanent capacity much of the actual work of Vatican II. His influence there was probably greater than that of any other American. In the Council's conduct and ultimate results his hand was very much apparent. Since the days of the Council he has pre-occupied himself with the search for lasting peace among nations—one of his earliest interests—and the ways in which the Church can both serve and save man in a world perilously close to the chaotic. He only recently attended an Interim World Conference for Religion and Peace in Istanbul, Turkey, where it was established that a permanent Conference will be held in Kyoto, Japan, in September, 1970.

One of his former students in the seminary, Monsignor Francis J. Lally, in a profile for the Boston *Pilot*, said that it has been Cardinal Wright's style that has set him so much apart over the years. His work has been done impressively, but the manner in which it was done has added to its special quality, for his has been a work of joy because it has rested in faith. Long recognized for his intelligence, his industry and administrative ability and often for his wit, he has made a singular, although often lonely, attempt to interpret to Americans generally the meaning of the Church and its message, in terms that would have contemporaneous comprehensibility. He has met with wit—but always with wisdom—the issues of the day in the pulpit, on the platform, and in the press, focusing upon them the revealing light of the traditional faith and illuminating the options available to the committed Christian. In his more than 20 years as a Bishop, he has offered a leadership in the ancient tradition of the Church Fathers which does not fear to judge the world even while evangelizing it.

The many accomplishments of Cardinal Wright in Boston and Worcester have been repeated in his all-too-short 10 years as Bishop of Pittsburgh and its diocese of 900,000 souls. His work in the ecumenical field has been predominant in that he willingly appeared with Protestant and Jewish programs very frequently. He established the Labor Day Mass at St. Paul's Cathedral and it has become an annual feature now held in the Civic Arena because of the vast crowds that attend. He established the Diocesan Ecumenical Council in 1964 and also introduced the Institute of the Person and the Common Good in Western Pennsylvania in cooperation with the Council of Churches and Jewish organizations of the area. The

crowning point to most was the Cardinal's dialogue sermon with Bishop Nichols of the Methodist Church during the 1969 Prayer Service for Christian Unity. His work in Project Equality for Western Pennsylvania is well known. He has been active day and night in all human relations efforts and in all civic and humanitarian programs, particularly those for children, the poor and the babies of unwed mothers.

These works have extended even beyond Pittsburgh—to the extreme poor of Chimbote, Peru, where today Pittsburgh has a contingent of priests and nuns assigned to work in the mission that is closest to the Cardinal's heart. The fruits of their accomplishments take bud in the same zeal at work in Pittsburgh where dozens of parish groups, the Diocesan Council of Catholic Women and a special active group of active laymen called the Chimbote Founders, stand behind the missionaries with material and moral support. Cardinal Wright has made four personal visits to Chimbote since 1962.

During his tenure in Pittsburgh Cardinal Wright has ordained 152 seminarians to the priesthood, established 21 new parishes and merged three others to give the diocese of six counties 319 parishes and 26 missions in all. His work in the field of education, too, has brought him commendation from Catholic and public educators throughout the country. He has established 25 new elementary and 10 new secondary schools. He also established St. Paul's Seminary in Crafton, founded the Pittsburgh Oratory and established the Lay Volunteer Apostolate; converted McGuire Memorial Nursing Home at New Brighton to a facility for retarded children from birth to seven years of age.

From the time of Cardinal Wright's student days in the Eternal City to these last few years centering around Vatican II, he has never been more at home than when he walked Roman streets, prayed in Roman churches and lived under Roman skies.

He is first and foremost Boston, although not of the "proper" Bostonians as the Cabots and the Lowells, but the bright, confident and immensely practical Irish-Catholic Bostonians who have left their mark on the city.

He also is a son of Paris, but not the Paris of today, as the Greensburg *Accent* noted; rather, the 17th Century Paris with its great theologians and preachers—the Paris of Bossuet, Bourdaloue and others, the capital that still echoed the faith of the people of the little villages such as Domremy and Chinon, of which city on the Loire the new Cardinal is an honorary citizen (as was Rabelais!).

Above all, Cardinal Wright is a son of Rome where he was mostly formed; Rome, which he identifies with civilization. In Rome and what it stands for he sees abiding values, rising phoenix-like above depredations of barbarians, new and old. He is a son of Rome that produced such Cardinal-theologians as Bellarmine, Franzelin and others.

If it be true that Cardinal Wright now goes to Rome to serve, Pittsburgh and Western Pennsylvania will have lost a Bishop and Worcester and Boston a friend. But the Church throughout the world will have gained a leader.

QUESTIONNAIRE RESULTS, 1969

HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ZWACH. Mr. Speaker, I have recently tabulated the returns from my 1969 congressional questionnaire which was sent to all boxholders in the Minnesota Sixth Congressional District.

I found the answers to these questions very interesting and most helpful to me.

Because I think my colleagues, too, will find this tabulation both interesting and helpful, with your permission, I hereby insert the tabulations of results in this CONGRESSIONAL RECORD:

ZWACH 1969 QUESTIONNAIRE RESULTS, SIXTH DISTRICT, MINNESOTA, MAY 22, 1969
[Answers in percent]

1. Do you believe social security and veteran's benefits should be increased to keep pace with the cost of living?

Yes 76
No 19

2. Do you favor expulsion of students who violently disrupt the academic life of colleges and universities?

Yes 93
No 5

3. Do you favor lowering the voting age from 21?

Yes 31
No 64

4. Do you favor returning to the States and local governments, a percentage of the money now collected in Federal income taxes?

Yes 81
No 12

5. Do you approve the President's order to take politics out of the Post Office?

Yes 90
No 6

6. Should the Federal Government provide programs of incentives and aid to help create jobs in the countryside?

Yes 64
No 27

7. Do you believe economic equality for agricultural producers can best be established by—

Maintaining present price support policies? 22
Returning to free market operations? 26
Providing increased bargaining power for farmers? 39
Long-term retirement of crop acres? 13

8. Do you favor placing a limit on farm crop diversion payments?

Yes 75
No 11

9. Do you favor increased Federal aid to private and parochial schools?

Yes 38
No 55

10. Do you believe the Voyageurs' National Park would be an economic asset to Minnesota?

Yes 62
No 24

11. Do you believe the U.S. Post Office Department should have the authority to declare printed matter obscene, thus non-mailable?

Yes 74
No 19

12. Do you believe the 10 percent surtax should be—

Continued until inflation is under control? 53
Removed this year under any circumstances? 37

13. In regard to the electoral college, would you—

Keep present system? 11
Abolish it and elect the President by direct popular vote? 69

Apportion the electoral vote of each State on the basis of each candidate's vote in that State? 14
Award electoral votes by congressional districts? 6

14. Which selective service proposal do you favor—

Continuing the present system? 28
A draft lottery at age 18? 26
A volunteer career military service? 43

15. Do you favor the appointment of Federal judges for a definite term of years, subject to reappointment?

Yes 76
No 14

PRESIDENT NIXON SHOULD HOLD ASSAULT ON JOB CORPS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. CLAY. Mr. Speaker, when the Nixon administration first leaked its intent to smear those Job Corps centers scheduled for closing, I issued my challenge for the President to reveal his information rather than just hint at the shocking extent of scandal in an effort to frighten off persons interested in saving the program. The matter of scandal in the Job Corps was handled in the same "if you only knew what we knew" strategy being perpetrated by this administration.

I call to the attention of my colleagues the excellent comment of Columnist Carl T. Rowan who addressed himself to the subject of the Nixon assault on the Job Corps. The column appeared in the May 18 Sunday Washington Star.

The column follows:

PRESIDENT NIXON SHOULD HALT ASSAULT ON JOB CORPS

(By Carl T. Rowan)

It surely reflects no credit on the Nixon administration that it has begun to leak "horror" stories to the press to justify closing 59 Job Corps centers.

But, just as many Job Corps supporters expected, the governmental hatchet artists have leaked "secret" reports of rape, narcotics use, homosexuality, larceny, and theft by Job Corps trainees. The obvious ploy is to build up enough resentment among "decent" Americans to force silence on the part of Congressmen who are trying to convince President Nixon to leave the centers open.

Now what about the "secret" reports that are so full of horror stories?

As director of the Office of Economic Opportunity, Sargent Shriver was acutely aware that Job Corps trainees had not been re-

cruited directly from Sunday school. Many of these youngsters were from the toughest ghetto areas where violence, theft, sexual assault are not exactly a rarity. Knowing that some serious misbehavior was inevitable, Shriver set up inspection teams to uncover it immediately so that the Job Corps and OEO could take necessary corrective actions.

This is the information that Labor Department officials were referring to in what Rep. Carl D. Perkins, D.-Ky., called "the lowest-down press release I ever saw in my life."

Labor Department officials have subsequently disavowed the leak, no doubt because instead of producing a sanctimonious cry of outrage against the Job Corps it produced angry indignation on the part of people who consider the "rape-homosexuality" ploy a shabby way to buttress a bad decision.

The National Council of Catholic Women, Church Women United, the National Council of Jewish Women issued a statement saying that "circulation of such stories is an immoral tactic which blatantly damages the reputation of every young woman who ever attended the Job Corps." They commended "the courage and compassion of those Senators who have introduced a resolution to prevent the mass shutdown of Job Corps centers."

Even the National Police Conference on Police Athletic League and Youth Activities, hardly a "bleeding liberal" organization, jumped into the fray with both feet.

Capt. Harry Untereiner, executive director of the group, referred to 200 boys enrolled in a police training school at the Camp Kilmer, N.J., Job Corps center. He said not one of the "horror" incidents described in the Labor Department leak had occurred at this school.

He said the Police Athletic League has dealt with socially deprived and economically depressed boys and girls for over 25 years and it knows that early misbehavior stems from their social environment.

Noting that "Job Corps was not formed . . . to train the upper middle class, the wealthy or rich," Untereiner said that, nonetheless, "if we look at the suburban areas of our metropolitan centers, we will find there is more drug addiction, homosexuality, and other sex offenses committed proportionately in those areas than there is on or near Job Corps centers."

At the Kilmer center in 1967 there were no rape cases; the FBI reported 5,306 rapes among 16 to 21-year-olds in the nation as a whole. There were 22 narcotics violations at Kilmer as against 48,806 in the same age group as a whole. There were 71 assault cases among the 2,100 Kilmer trainees and 25,875 in the general 16-21 population. There were 65 cases of larceny-theft at Kilmer and 142,995 in the broader population, estimated at 20,640,300 in the 16-21 category.

While the Administration fumbles for ways to defend its decision, thousands of youths are drifting back to areas where they are really likely to produce some horror stories. Secretary of Labor George P. Shultz has said only 800 youngsters have dropped out since the announcement that 59 centers would be closed. An OEO source says 4,500 have dropped out.

Shultz says 1,400 Job Corps enrollees have been placed in other manpower programs. Telegrams going to Perkins's office say it isn't so and isn't likely to be so because many of the youngsters cannot qualify for other manpower programs.

All this disruption comes just when the Job Corps was making inroads with the craft unions, long an impregnable barrier to the entry of newcomers, Negroes especially, into various trades. The Brotherhood of Painters, Decorators & Paperhangers of America has entered contracts with 38 centers, guaranteeing apprenticeships for Job Corps trainees. Similar pacts had been made with the AFL-CIO Marine Cooks and Stewards Union, the

United Brotherhood of Carpenters and Joiners of America, the International Union of Operating Engineers, and the Kentucky State Building Trades Council.

In the name of economy, or puritanism, or something, someone has sold President Nixon a very bad bill of goods. He ought to renounce it immediately.

TRIBUTE TO THE STEUBEN SOCIETY

HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HALPERN. Mr. Speaker, the Steuben Society of America, celebrating its 50th anniversary, has a long and proud history of service to our Nation. Composed of Americans of German descent, it was formed on principles emulating those of Gen. Friedrich Wilhelm von Steuben, for whom the society is named.

The organization was formed in 1919 for the purpose of promoting everything that is good in German character and culture, and that might accrue to the benefit and welfare of the whole American Nation. Its basic principles are on the highest level of loyalty, patriotism, and devotion to the American Nation. Its creed perhaps best illustrates the principle to which this organization has been devoted:

One country—A country so fair, tolerant and just that all who live in it, may love it.

One flag—An American flag for American purposes only.

One language—The language of truth spoken in any tongue in which one chooses to speak it.

The aims and purposes of this society are on the highest plane of patriotism, of devotion, and of service to America. They stand for the aid and support of the American Constitution, for aid in defending the independence and sovereignty of the United States, for urging its members to participate in all phases of national life, for offering guidance to its members in making them better citizens.

The society has adopted the name of General von Steuben in continuation of the principles and ideals of this great general. Often referred to as "maker of the American Army" General von Steuben was a Revolutionary War hero who became Inspection General of the American Continental Army.

General von Steuben was born and educated in Germany and served in the forces of King Frederick the Great of Prussia. Recruited by Benjamin Franklin in Paris, he traveled to the American colony in 1778, and immediately joined George Washington at Valley Forge. There he undertook the training of the American forces, and prepared the "Regulations for the Order and Discipline of the Troops of the United States," which became the handbook of the Continental Army.

The year before his honorable discharge from the Army in 1784, he was made an American citizen by the Pennsylvania Legislature. Through his influ-

ence in converting the American Army into an effective and highly disciplined military force, he was an indispensable figure in the achievement of American independence. Because of his dedication to America and to the principles of liberty, the German-American society adopted his name, and, during a half century of loyalty, patriotism, and love for the United States, it has brought additional honor to this great man's memory.

DOUGLAS TAX FRAUD

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. RARICK. Mr. Speaker, Justice Bill Douglas' involvement with tax-exempt foundations and the Center for the Study of Democratic Institutions finds his tax-free income source jeopardized by tax deficiencies and fraud penalties. "Good behavior" can hardly be construed to include this.

There is only one solution for Mr. Justice Douglas—follow the example of his brother, Fortas, and resign.

When a Supreme Court Justice has disgraced the Court, why should he insist on such formalities as impeachment?

I include in the *Record* a news clipping from the *Washington Daily News*: [From the *Washington Daily News*, May 22, 1969]

FOUNDATION'S HOTEL: DOUGLAS LINKED TO TAX ACTION

(By Dan Thomasson)

The Nixon Administration has initiated a \$4.2 million claim for tax deficiencies and fraud penalties against a Las Vegas hotel-casino whose earnings in part have supported the tax-exempt Albert Parvin Foundation headed by Supreme Court Justice William O. Douglas.

The Government claims the Fremont Hotel Corp. owes most of the extra money because it skimmed off part of its crap table earnings before reporting them to the IRS.

The Fremont is owned by the Parvin-Dohrmann Co., whose stock until recently made up a portion of the Parvin Foundation's portfolio. The foundation recently announced it had sold its Parvin-Dohrmann stock. The foundation also has derived income from an interest in the Flamingo Hotel, another Las Vegas gambling establishment.

THREE-YEAR PERIOD

The Internal Revenue Service claim against the Fremont is for the years 1962, 1963 and 1964—before it was acquired by Parvin-Dohrmann. It was filed on March 7 and states that for those years the casino failed to report more than \$5.3 million from its gambling operations.

"It is determined that the omitted income is the result of an underestimate of gross income from crops," the Government claim states. (Such alleged withholding of part of the profits of gambling is known as "skimming.")

In addition, IRS contends that several tax deductions, including those for real estate depreciation and interest, should be disallowed. At one point, the IRS states, deductions claimed by Fremont Hotel Corp. for interest actually were distributions to stockholders.

The Fremont's attorneys, however, have

contested the deficiency and penalty claims on grounds they are inaccurate and that the company's books are correct. They have filed a petition for determination in U.S. Tax Court here.

The IRS civil action against the Fremont follows a Federal criminal charge of income tax evasion thru "skimming" against Edward Levinson, a former Fremont owner who was retained as an executive of the hotel when it was bought by the Parvin-Dohrmann Co. in 1966.

Levinson, who had been a business partner of Robert G. (Bobby) Baker, former secretary to the Senate Democrats, in a corporation once represented by resigned Supreme Court Justice Abe Fortas, entered a no contest plea in Federal court in Las Vegas to charges of having helped file a false tax return. Levinson was fined \$5,000 March 28, 1967.

The Government then moved to dismiss other charges against Levinson and against five others, three of whom were former employee-stockholders of the Fremont.

SUIT DROPPED

Two days later Levinson dropped his \$2 million invasion-of-privacy suit, filed three years earlier against four FBI agents whom he had accused of electronic bugging of his hotel office. The Justice Department admitted having installed the electronic device which had picked up conversations between Baker and Levinson in 1962. The bugging incident has been used by Baker to support claims he was the victim of massive Federal eavesdropping in his present appeal from convictions handed down in 1967.

The mild penalty given Levinson and his decision thereafter to drop the suit against the FBI brought immediate charges in Congress of a deal.

But Mitchell Rogovin, then assistant attorney general in charge of the tax division, denied any deal had been made with Levinson. Mr. Rogovin since has gone into private practice with Mr. Fortas' old law firm, Arnold and Porter.

LEAGUE OF WOMEN VOTERS PROTESTS JOB CORPS CLOSING

HON. ED EDMONDSON

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. EDMONDSON. Mr. Speaker, the League of Women Voters of Bartlesville, Okla., has joined the growing number of individuals and groups who believe 59 of our Job Corps centers should not be closed.

Mrs. Walter Cox, president of the league in Bartlesville has written me to express the league's position, and some very good points are made. I would like to have this statement by the League of Women Voters of Bartlesville appear in the *Record*, and I would particularly like to call attention to the league's concern that provisions be made for all enrollees if the centers are to be closed.

The letter follows:

LEAGUE OF WOMEN

VOTERS OF BARTLESVILLE,

Bartlesville, Okla., May 16, 1969.

Re opposition to abrupt closing of Job Corps centers.

HON. ED EDMONDSON,
House Office Building,
Washington, D.C.

DEAR MR. EDMONDSON: The League of Women Voters of Bartlesville opposes the abrupt

closing of 59 Job Corps Centers on July 1. We are aware that these centers have been experimental but have supported them as a means to try to provide equal opportunity for education and employment to the disadvantaged. It seems unrealistic to assume that adequate replacement facilities could be set up by July 1. We feel that it is important that the training programs which have been started be continued and that all enrollees have a place to go when the present centers are closed.

We know that you have opposed closing of the two centers in Oklahoma. Your concern for this program and the other anti-poverty measures has the support of the Bartlesville League.

Very truly yours,

Mrs. WALTER COX,
President, Bartlesville League
of Women Voters.

SERIOUS GAPS IN OUR EDUCATIONAL GOALS

HON. BERTRAM L. PODELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. PODELL. Mr. Speaker, in spite of the great lipservice that is being paid to educational goals on all levels, the squeeze grows tighter in the educational field. There must be a greater understanding on all levels of the problems involved. Recently, I touched upon some of these matters in an address to the Student Financial Aid Administrators of the State and City Universities of New York.

The text of my address follows:

SERIOUS GAPS IN OUR EDUCATIONAL GOALS

(Address of Hon. BERTRAM L. PODELL, before the Student Financial Aid Administrators of the State and City Universities of New York, State University Conference Center, Oyster Bay, L.I., New York, May 16, 1969)

Ladies and gentlemen, I am very happy to be with you this morning. And I am particularly pleased to be addressing an audience which shares so deeply with me the interest and involvement in higher education as you do. Never have the problems of our colleges and universities been more critical than they are today. Enrollments have increased by nearly 4 million students in the past decade. Today some 7.5 million students are attending our colleges and universities and more than 700,000 of these students are here in New York. The expression "college squeeze" can now be taken literally.

But the rapid increase in numbers is only one aspect of higher education's growth. The functions and the activities of the colleges have greatly expanded. We expect our colleges and universities not only to train the professionals needed in government, industry, education, science and medicine, but we expect them to invest greater energy in public service functions, to concentrate more of their resources on the solution of many of our social problems. We also expect them to conduct research in nearly every possible area, especially those areas considered to be of national interest.

As you know, this expansion of higher education in terms of both quantity and quality has been expensive. Inflation has aggravated the problem. And it is likely that higher education costs per student will continue to rise. It is true that tuitions have been raised at a startling rate. But it is also true that income from tuition and fees is paying for a smaller and smaller percentage of overall college costs. I think that it has

become apparent that institutions can not realistically look to this source of income to meet their costs. As one college president put it, mounting tuition costs are "pricing us out of the market . . . we are reaching a point of diminishing returns." The effect is, of course, that of putting college beyond the reach of a larger and larger segment of our college-age population.

The institutions rightfully look to the State governments and to the Federal Government for greater levels of support. The States are making an impressive effort. In 1968-69 the States appropriated some \$4.5 billion for colleges and universities. This is nearly a 40% increase over 2 years ago and a 224% increase over an 8 year period. New York kept pace with a 37% increase over 1966-67 expenditures.

There are, of course, the private sources of support and it has not been proven that these have been tapped to their fullest. Corporate philanthropy currently represents a small percentage of institutional income. Apparently alumni, and presumably those in corporate positions as well, are fairly ignorant of the financial situation of our institutions of higher learning.

A special study conducted by the council for financial aid revealed that "82 percent of persons in managerial positions or the professions do not consider American business to be an important source of gift support for colleges and universities. 59 percent of persons with incomes of \$10,000 or over do not think higher education has financial problems. 52 percent of college graduates apparently are not aware that their alma mater has financial problems." This is certainly a discouraging revelation but I think it gives the institutions an indication of a serious communications gap which needs to be corrected.

Some publicity has been given to the opportunities some institutions have to increase their endowment income substantially through bolder investment policies. Attention has also been given to the effectiveness of successfully employing stricter management practices in higher education administration. There probably is room for improvement in both of these areas, but neither is going to provide the broad base of support which our institutions are going to require.

It is not surprising that the Congress recognized some time ago that the Federal Government had the responsibility to assist substantially in the financial support of colleges and universities to assure the Nation with an increasing supply of highly educated manpower resources. Through the assistance provided under the Morrill Acts and related legislation the State universities and land grant colleges developed into some of the most outstanding institutions in the world. Under the Higher Education Facilities Act of 1963 grants and loans were made available for the construction of graduate and undergraduate academic facilities.

But I believe that colleges and universities and the respective higher education associations made their strongest case and elicited the broadest support in 1965, with the passage of the Higher Education Act. It is, to be sure, something of a piecemeal approach but it attacks some of higher education's most pressing problems. It also demonstrates to an unprecedented degree the realization that higher education constitutes a precious national resource essential not only to the achievement of our national goals but also to the achievement of the personal aspirations of our individual citizens.

The purpose of this legislation as set forth in the law is "to provide financial assistance for students in post-secondary and higher education." It is the latter part of this statement which I would like to examine, the provision of financial assistance for post-secondary and higher education. The student

assistance programs of title IV of the higher education act are not the first, although I do think they reflect a new direction.

For 10 years graduate and undergraduate students have been taking advantage of NDEA loans. Graduate students have also had the availability of NDEA fellowships. The purpose of both of these programs was to make higher education and post-baccalaureate education available to a greater number of young people. But I've always had the impression that it was the need, underscored by the Russian sputnik success, for the more college trained people and better elementary and secondary teachers which was the primary reason for which these programs were enacted.

The tone of the discussion on broadening the access to higher education seems to have changed during the 60's. It seemed to become more generally accepted that equality of opportunity was impossible without equality of educational opportunity, that equality of educational opportunity does not truly exist when it depends on family income.

Russell Thackery, the executive secretary-treasurer of the association of State universities and land-grant colleges used these words:

"What I hold as an article of educational faith, of faith in democracy, of faith in this country, is that we ought to provide the maximum degree of equality of opportunity. No man or group of men is wise enough to judge the heights to which an individual may rise, the contributions he or she may make, if given the chance . . . the men and women of a century ago, in a country torn by internal dissension to the point that its existence was threatened; bankrupt and dependent on printing press money, had the courage to give away vast areas of the public domain in the faith that education of young people was a better investment by far than the hope that a huge land speculation might some time balance the budget. I hope and believe that we have the same courage and faith to meet the opportunity of the 1960's."

Presidents Kennedy and Johnson lent the weight of their support to the movement to expand educational opportunity and made numerous recommendations to the Congress some of which have subsequently been enacted into law. The major programs, of course, were included under title IV of the Higher Education Act. The work-study program, initiated by the Economic Opportunity Act of 1964, was expanded by the law and transferred to the U.S. Office of Education. A new program of insured loans was introduced as well as a program of educational opportunity grants. I think that there is a certain validity to this "package" approach which you would certainly be able to verify. But it seems to me that the availability of several different forms of student assistance gives greater flexibility in meeting the individual financial needs of the students.

There have been many legitimate questions asked about the effectiveness and operation of our present programs of student assistance. I have heard people ask, for example, about the NDEA student loans. I, personally have heard little but praise for this program. It appears to me to be highly successful. By fiscal year 1968 over 400,000 students were receiving student loans. And a study of Federal student loan programs last year, conducted by the college entrance examination board, indicated clearly that the NDEA loans are being utilized by students from the lower income groups as was intended. In 1966 over half of the student borrowers came from families with incomes of less than \$6,000 a year.

Regarding the teacher "forgiveness" provisions of the program it appears to be a fairly popular aspect of the program. There have been some recommendations that the cancellation provision be eliminated and others that it be expanded. The 1968 amendments leave existing law unaffected except

that while the NDEA loan program was extended for 3 years, the loan forgiveness feature was only extended for 2. Until more effective means are developed to encourage the entrance of qualified students into the teaching profession I would strongly urge the retention of the loan forgiveness provision. However, over the long haul I am convinced that educational excellence will not be achieved until we are able to pay teachers the high level salaries their professional services require.

Another aspect of student assistance programs which was discussed in regard to the higher education amendments of 1968 and which I imagine is of no little concern to you is the allotment formulas for these programs. The distribution of educational opportunity grant and NDEA student loan funds is based on the number of full-time college students enrolled in the State. One-third of work-study funds are also allotted on this basis. I am pleased to report New York has not done badly under this system. In fiscal year 1968 under the educational opportunity grant program more institutions in New York received more money to assist more students than any other State in the country. 147 of our schools received allocations of nearly \$11 million and aided nearly 21,000 students, as compared with 121 institutions in California which received \$8.2 million to aid 16,000 students.

That the use of a State's full-time enrollment as a basis for the distribution of student aid funds is not the only or necessarily the best formula as suggested by some of the proposed higher education amendments in 1968. The House version of the higher education amendments would have changed the present State allotment formula to an allotment based on institution requests. It seems to me that so doing would help to eliminate the disparity which exists between the amounts institutions are requesting and the amounts they are actually receiving. Under existing law when allotted funds are insufficient to meet all approved institutional requests, institutions in some States receive a greater proportion of their approved requests than institutions in other States. How successfully a distribution of funds on an institutional request basis would have worked is a moot question because the proposal did not survive the House-Senate conference on the bill.

A House amendment which did survive the 1968 conference and one which must simplify many lives is the new institutional matching requirement. The '68 amendments consolidate the maintenance-of-effort provisions of the College Work-Study and the Educational Opportunity Grant programs. Previously each program had separate provisions governing maintenance-of-effort requirements. Effective July 1, 1969 an institution participating in these 2 programs need only provide assurance that it will continue to spend in its scholarship and student assistance programs not less than the average annual expenditure for such purposes during the most recent 3 year period prior to the date of agreement.

I am pleased that colleagues like myself exhibited forceful enough strength so that the 1968 amendments also took action on a problem which has plagued all of our educational institutions for years—the uncertainty as to when and how much Federal funds would be available to them under the various education programs. The 1967 Elementary and Secondary Education Act amendments authorized advance funding of ESEA programs and on an academic year basis. The '68 higher education amendments provide for one-year advance funding for all programs under the Higher Education Act, the National Defense Education Act and the Higher Education Facilities Act. They also provide that appropriated funds be made available for expenditure by the in-

stitution on a school year rather than a fiscal year basis. Of course in order to make advance funding accomplish its purpose, Congress is going to have to make 2 appropriations in one year. That should take place this year for all education programs. Unfortunately, it is proposed by the administration in only one major program for 1971.*

One problem relating to the funding of education programs generally, including the student aid programs, is the authorization versus appropriation problem. When Congress authorizes funds for a given year and for succeeding years an effort is made to indicate the extent of educational needs. It is disappointing to me that the appropriations never seem to approach the sums indicated as the level of need in the authorizing legislation.

Now the President has offered a budget for the fiscal year beginning this July 1st which takes a step backward. I am very disappointed that we are asked to maintain last year's level of funding of student aid programs. The time is not for maintenance but for desperately needed expansion and extension of educational opportunity as a national goal.

The budget cuts are especially disappointing to those of us in Congress who have worked hard for expanded educational opportunity. In March of this year I introduced a measure, H.R. 9626, later refined by H.R. 11275 to help lower the financial barriers which prevent many capable and deserving students from pursuing their educations. My bill would amend the Higher Education Act to double the maximum amount of an educational opportunity grant from \$1,000 to \$2,000 and would reduce the minimum grant to \$100 a year. In terms of rising tuition costs and the limited financial capability of low-income students I believe that this expansion is of absolute necessity.

In regard for my concern in the serious gaps that exist for student assistance I have introduced legislation paralleling that introduced by Senator Mondale in the Senate.

This bill would among other things add to title IV of the Higher Education Act a new program of student opportunity grants. As I propose it this program would differ from the educational opportunity grants in a number of ways. The maximum student opportunity grant would be \$1,500 as opposed to the maximum educational opportunity grant of \$1,000. Also it would be for part-time as well as full-time study at not only the undergraduate level but also at the post-secondary vocational, and the graduate and professional levels. In addition, the new program would not require the 50-50 matching of Federal funds which the educational opportunity grant program does. However, the new program would provide cost-of-education allowances to the institutions which enroll student opportunity grantees. This is intended to alleviate somewhat the need of the institution to increase tuition charges.

It would further establish a higher education loan bank as a private nonprofit corporation whose purpose would be to provide loans guaranteed by the Federal Government for post-secondary vocational, undergraduate, graduate, and professional study. The bank would make loans directly to the students, unlike the NDEA and guaranteed loan programs. At present it is difficult for students to obtain guaranteed loans from banks and other lenders. Students under this program would have 30 years to repay the higher education loans.

There is one last point I would like to mention briefly and it concerns the current student unrest which is plaguing so many of our colleges. I believe that it is very easy to overreact to the tactics and violence of these out-

bursts and be so indignant that we fail to investigate with a clear head the underlying causes for such outbreaks. I hate the classifications of "hard-liner" and "soft-liner" because I firmly believe that there is no room within the academic community for violence or the destruction of property or the denial of the rights of others to continue their educations. I do believe that students who place themselves outside of the academic community through the use of such tactics are subject to appropriate discipline and I believe that such discipline must be determined and administered by the institution, or where appropriate, the local law enforcement agencies.

I hate to see the Federal Government intrude into the internal workings of the university to punish students or local misdeemants. I rather align myself with the remarks of President Nathan M. Pusey of Harvard that if there is an answer to prevent disorders "the answer to this has to come from within the university community itself . . . I think it has to come from the students and faculty primarily and it will come only as these groups, themselves, come to see that this kind of disrupting activity is something that can't be tolerated. . . ." To add to Pusey's wisdom I would say that I conceive a resolution of the student unrest issue in the actions and behavior of the 97% of the student body who will and are cooperating in the academic thrust of institutional life. I really do not see that the withholding of Federal student assistance will prevent future disorders.

You, as professionals in direct contact with student and faculty efforts are, of course, indispensable if order is to be achieved. And I applaud what I have perceived of your dedication. Within the university we have always encouraged the frank expression of views and cherished freedom of speech and opinion. I am confident that order will be restored to the academic community without sacrificing educational opportunity.

MASONIC DAY—A MOMENTOUS OCCASION

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. MURPHY of New York. Mr. Speaker, on a stormy day, April 19, 1969, at Richmondtown, Staten Island, I was privileged to be the principal speaker at an otherwise colorful pageant held by several thousand Masons. The historic conclave marked the dedication of the Richmond Masonic Museum and Masonic Library which will be a cultural, educational, and historic facet to the people of the State of New York. Freemasonry is one of the world's oldest fraternities and Masons have played an important part in the formation of our Nation. Therefore, under the leave to extend my remarks in the RECORD, I include the following program from that momentous day and a revealing history of Freemasonry on Staten Island.

On April 19, 1969, Saturday afternoon, a large Masonic Conclave took place in the Richmond Masonic District (Staten Island, N.Y.). This convocation of Free and Accepted Masons was the first in a year long program of auspicious events which would culminate in the dedicative ceremony of the Richmond District Masonic Museum and Library sometime in 1970. Both the conclave and the mu-

* Title I ESEA.

seum were and will be respectively located in the Richmondtown restoration area. The program included the opening of a meeting in the old courthouse on Center Street by the American Lodge of Research F. & A. M. under the acting master, R.W. Arthur Brown, and R.W. Dominick M. Rufolo, Sr. Warden. The general chairman of the Masonic conclave and the museum-library project was R.W. Alexander A. Bleimann, the present district deputy grand master of the Richmond Masonic District. There were present the M.W. Charles Francis Gosnell, grand master of masons in the State of New York, with his grand marshal LaVerne W. Getman; the deputy grand master R.W. William R. Knapp with his deputy grand marshal (acting) R.W. Albert G. Pfluger; the grand secretary R.W. Wendell K. Walker. The metropolitan district deputy grand masters association was represented by R.W. Arthur W. Juller, R.W. John F. Dams, R.W. Max L. Kamel, R.W. Alexander A. Bleimann, R.W. Calvin Raff, R.W. Milton R. Goldman, R.W. Harold F. Presley, R.W. John V. Flockhart Sr. Several grand lodge officers were also present with grand representatives.

Director of arrangements R.W. Pasquale J. Lombardi, grand steward of the grand lodge of New York; program director and master of ceremony Alfred J. Cawse, Jr.; protocol chief W. Victor D. Lederhandler; chief of security William Reyecraft and W. Milton Jirak; historian R.W. Wilbur L. Decker; director of finance W. Phillip DePaul.

The masonic conclave was under the sponsorship of the Richmond Masonic Association whose officers are: W. John W. Wall, president; W. Samuel T. Weening, vice-president; W. Victor D. Lederhandler, 2nd vice-president; R.W. Wilbur L. Decker, secretary; W. John W. Davis, treasurer.

Also present were the sitting masters of the nine masonic lodges. W. Paul T. Framheln, Jr., Richmond lodge; W. Everett M. Hannah, Huguenot lodge; W. Melvin L. Kirby, Tompkins lodge; W. Harrison J. Laemmerhirt, Beacon Light lodge; W. Michael Daum, Aquehonga lodge; W. Nathan Giventer, Great Kills lodge; W. H. Arnold Johnson, New Dorp lodge; W. Fred Cericola Jr., LaGuardia lodge; W. Conrad H. Eriksson, Klopstock lodge.

The famous Daniel S. Tompkins Holy Bible was used to adorn the altar during the opening and closing ceremonies of the meeting of the American Lodge of Research F. & A. M. The Bible is at present owned by Tompkins Lodge of Masons. The Tilers of the Lodgeroom were Asa Eick, Joseph Andriulli, and Emil Baker. The Grand Marshall LaVerne Getman escorted in the Grand Master; the Acting Deputy Grand Marshall A. Pfluger escorted in the Deputy Grand Master; and Bro. Eugene R. Bleimann escorted in the District Deputy Grand Master of the Richmond District.

The Richmond Masonic Glee Club, under the Director, O. William Erikson, and the President David Olson Sr., provided several vocal selections both in the Lodge meeting and during the outdoor public ceremony.

After the closing of the Lodge meeting, a processional began on Center Street directly outside the Old Courthouse led by the Totenville High School Band under the leadership of Bro. Ray Kirschmeyer. The Tall Cedars of Lebanon, Richmond Forest No. 66, whose Grand Tall Cedar is Rocco D'Angelo, and the Staten Island Shrine Club, whose President is Ruppert Minick, dressed in full organization regalia formed an Honor Guard for the Grand Master.

During the entire afternoon hundreds of Masons and Masonic dignitaries wore masonic regalia and the aprons of highest rank.

At the outdoor ceremony, Mr. Arnold V. Schwartz, President of the Staten Island Historical Society, officially accepted the

Masonic Order to create the Masonic Museum and Library under the Director of the Richmondtown Restoration Program, Mr. Loring McMillen.

Congressman John M. Murphy was one of the principal speakers as was the Honorable Robert T. Connor, Borough President of Richmond, who also presented the Richmond Masonic Association with a Borough Presidential Proclamation, designating April 19, 1969, the first day of Masonic Week. Other speakers were R.W. Alexander A. Bleimann and M.W. Charles F. Gosnell. After the program was completed, a Grand Chaplain of the Grand Lodge of New York, Navy Commander and Rabbi William Kloner pronounced the benediction.

The following treatise is the historical account and background of Masonic activities on Staten Island for nearly two hundred years, as summarized by the Historian; on April 19, 1969:

Most Worshipful Brother Charles F. Gosnell, Officers of the Grand Lodge of the State of New York, Honorable Robert T. Connor, Borough President, Honorable John M. Murphy, Congressman, brethren and friends.

We are gathered here today for a momentous occasion which will long be remembered by all and in the annals of Freemasonry throughout the State of New York.

Freemasonry is one of the oldest fraternities which has existed since Biblical times reverting to the building of King Solomon's temple, on Mount Moriah by Operative Masons.

The modern era of speculative Masonry began with the formation of the Grand Lodge of England in the year of 1717.

In the history of our country, Masons have played an important part in its formation.

Of the 56 signers of the Declaration of Independence, 53 were Masons.

During the War of Independence—Staten Island was a tory stronghold, on which over 75 regiments of British soldiers were stationed at various times. Every regiment with one or two exceptions had their own Masonic lodge working under warrants granted by the Grand lodges of Ireland, Scotland and England.

The following British military Masonic lodges were stationed on Staten Island, New York after 1754:

Royal Regiment of Artillery, 4th Battalion—Composed of nine companies, five of which were stationed on Staten Island: Company No. 35, Company No. 36, Company No. 38, Company No. 39, Company No. 42.

The Grand Lodge of England ("Ancients") issued warrant No. 209, Feb. 16th, 1779 to establish a lodge in this battalion. There is no record of the lodge after 1779.

The Grand Lodge of England ("Ancients") also issued a warrant No. 213, July 3, 1781 to brethren in this battalion, and the lodge was constituted in New York on October 18, 1781.

The 17th Light Dragoons (Duke of Cambridge's Own Lancers)—Stationed on Staten Island 1776, Grand Lodge of Ireland Warrant, Oct. 5, 1769 as Lodge No. 478. Joined Provincial Grand Lodge of N.Y. in 1782, and continued in existence until 1795; warrant cancelled in 1817.

The 7th Regiment, Royal Fusiliers—Stationed on Staten Island in 1777, Grand Lodge of Ireland Warrant, April 1, 1752, No. 231.

The 10th Regiment, Lincolnshire Regiment—Stationed on Staten Island in 1776, Grand Lodge of Ireland Warrant on August 3, 1758, No. 299.

The 17th Regiment, The Leicestershire Regiment—Stationed on Staten Island 1776, Grand Lodge of Ireland Warrant June 24, 1743, No. 136. Grand Lodge of Scotland Warrant Nov. 12, 1771, No. 168/169. "Unity Lodge." The warrant, now in possession of Union Lodge No. 5, G. R., Delaware, at Midleton, bears the number 169.

The 22nd Regiment, The Cheshire Regi-

ment.—Stationed on Staten Island 1776—Grand Lodge of Ireland Warrant, Nov. 28, 1754, No. 251, and a duplicate of this warrant was issued on Na. 6, 1791, to replace the original which according to the Grand Lodge Register was lost in 1759 on the Mississippi River. The warrant was lost probably at Roche D'Avons in 1764, when the regiment was ambushed by Indians and practically exterminated.

The 23rd regiment, Royal Welch Fusiliers.—Stationed on Staten Island in 1776, Grand Lodge of Scotland Warrant Jan. 11, 1751, No. 63. Another warrant No. 131 was issued to replace No. 63 which was lost in the Seven Year's War. Captain Edw. Evans was the master in 1767.

The 26th regiment, The Cameronians.—Stationed on Staten Island in 1777—Grand Lodge of Ireland Warrant, Dec. 7, 1758, No. 309. No. 309 was exchanged for No. 26, in 1823.

The 27th Regiment, Royal Inniskilling Fusiliers.—Stationed on Staten Island in 1776—Grand Lodge of Ireland Warrant in 1733, No. 23, and another warrant on Feb. 7, 1749—1750, No. 205, was issued because No. 23 was probably lost, but turned up when the regiment was in St. Lucia after 1783, and remained on the Grand Lodge Register until 1801.

The 37th Regiment, Hampshire Regiment.—Stationed on Staten Island in 1776, Grand Lodge of England ("Ancients") Warrant May 19, 1756, No. 52. The lodge was represented at the inauguration of the Provincial Grand Lodge of New York on 5th December 1732, and at meetings of the Provincial Grand Lodge held on Jan. 2 and Feb. 5, 1783.

The 40th Regiment, South Lancashire Regiment.—Stationed on Staten Island in 1776, Grand Lodge of England ("Ancients") Warrant: 1759, No. 42.

The 44th Regiment, Essex Regiment.—Stationed on Staten Island in 1776, Provincial Grand Lodge of Quebec in 1760—1762 Warranted, No. 14. Provincial Grand Lodge of Quebec Warrant Sept. 12, 1784, No. 18, registered by Grand Lodge of England ("Moderns") Nov. 15, 1784, No. 467, "Rainsford Lodge", named after a colorful and active Mason, Colonel Charles Rainsford Commander of the Regiment in 1781, and who was Grand Steward of the Grand Lodge of England in 1769.

The 46th Regiment, South Devon Regiment, later the Duke of Cornwall's Light Infantry.—Stationed on Staten Island in 1776—Grand Lodge of Ireland Warrant March 4th, 1752, No. 227.

The 52nd Regiment, Oxfordshire, Light Infantry.—Stationed on Staten Island in 1776, Grand Lodge of Ireland Warrant August 6, 1761, No. 370.

The 64th Regiment, The North Staffordshire Regiment.—Stationed on Staten Island in 1776, Grand Lodge of Scotland Feb. 2, 1761, No. 106 "Duke of York's Lodge."

In the Period of the Revolution, A Provincial lodge convened in the Old Guyon-Clark Homestead at New Dorp, the Lodge was composed of British Officers and Soldiers, and a few residents of the Island. Meetings were held at intervals until the Evacuation of the British in 1785. These officers, together with Prominent Masons of the City, were entertained at Nautilus Hall. A few years later, a meeting was held at the Home of Governor Daniel D. Tompkins, who was also Grand Master of the State of New York. He had established his Residence on Staten Island and attempted to start a Masonic Lodge on Staten Island. More than a year later a meeting was held at the Home of General Van Buren, in Tompkinsville.

As a result of the meetings and a picnic held on the Lawn of Old Nautilus Hall—Richmond Lodge was formed, the First of the Ten Lodges to be formed on Staten Island.

The First Regular Communication of Richmond Lodge No. 384 was held in Nautilus Hall,

on July 6, 1825, after a few years moved to a Building owned by General Van Buren.

In 1832, Cholera and Yellow Fever scourged the Island from end to end, and it was necessary for the Lodge to close its Doors until the frost removed the Epidemic.

In 1839 Richmond Lodge was Granted a New Charter and became No 66 instead of 384.

In 1849 Richmond Lodge surrendered its Charter but did not entirely disband. Meetings were held in Members Homes and Reorganization was discussed.

On March 21, 1851, Richmond Lodge Reorganized and met at the home of Bro. George T. Swaine, opposite the Dutch Reformed Church in Port Richmond. The Lodge erected a Temple at the corner of Richmond Avenue and Bennett Street, Port Richmond which was dedicated in 1898. Here the Lodge remained until a New Temple was erected on Anderson Avenue, Port Richmond in 1925. Hit a fatal Blow by the Depression, the Lodge was forced to give up the Temple and moved to "The Odd Fellows Hall" on Harrison Avenue, Port Richmond and now meet in their own Temple located at 789 Post Avenue, West Brighton, Staten Island.

TOMPKINS LODGE NO. 471

The Second of the Lodges on Staten Island was Tompkins Lodge No. 471. A Warrant was issued on December 6, 1853 authorizing the opening of the Lodge at Stapleton, Staten Island. The First Meeting was held in the Old Tompkins Lyceum located at a spot later occupied by the German Club Rooms. In 1856, they moved to Masonic Hall located at what was then Front & Minthorne Streets in Tompkinsville. A year later the Building was destroyed by fire and the Lodge lost everything. On March 31, 1859, a new Dispensation was granted and a meeting was held on April 5, 1859, in Tompkins Lyceum. In the following year it moved to the Weed Building on the West side of Griffin Street and in May 1866 to Egbert Hall and on May 1, 1876 into the Tynan's Building and Occupied the present Temple at Bay and Sands Streets Stapleton Staten Island in 1901.

HUGUENOT LODGE NO. 381

The Third of the Lodges on Staten Island was Huguenot Lodge No. 381. It was instituted on May 19, 1855 and met in the Odd Fellows Hall, on Amboy Road. In 1859 the Lodge moved to the Chapel of St. Pauls Methodist Church until 1883 when rooms were procured over Fisher's Drug Store at Main & Arthur Kill Road, then met in the Knights of Pythias Hall and in 1909 moved to their present Temple on Main Street, Tottenville, Staten Island.

AQUAHONGA LODGE NO. 685

The Fourth of the Lodges on Staten Island was Aquahonga Lodge No. 685. (Not to be confused with Aquahonga Lodge No. 906) was granted a Charter in 1868, and surrendered it in 1887. The First meeting place was in the Grand Jury Room at Richmond. Later the Lodge moved to New Dorp to a Building owned and occupied by Henry A. LaVaud at New Dorp Lane and Richmond Road, later moved back to Richmond in a building opposite St. Andrews Church. There is no record of the reason for the surrender of the Charter.

BEACON LIGHT LODGE NO. 701

The Fifth of the Lodges on Staten Island was Beacon Light Lodge No. 701, on June 15, 1870, Beacon Light Lodge was awarded its Charter and met at the "Old Athletic Club Building" located on the waterside of Richmond Terrace approximately 85 feet East of Broadway, West Brighton, Staten Island, and in 1872 moved into "Village Hall" Lafayette Street, New Brighton, Staten Island until 1942 during the Second World War was forced to find new Quarters and moved to Tompkins Temple, Stapleton, Staten Island and moved to Great Kills Temple, Great Kills,

Staten Island in 1966, its present meeting place.

KLOPSTOCK LODGE NO. 760

The Sixth Lodge located on Staten Island was Klopstock Lodge No. 760, Instituted in 1875, first met in Tynan's Building and later moved to Tompkins Lodge Room, Stapleton, Staten Island and presently meets at Great Kills Temple, Great Kills, Staten Island.

Although a Part of the Ninth Manhattan District, Klopstock Lodge has played an important part in Staten Island Masonry and has always been considered one of our Group.

AQUEHONGA LODGE NO. 906

The Seventh Lodge located on Staten Island was Aquahonga Lodge No. 906, Instituted on May 13, 1913 and met at Tompkins Masonic Temple, Stapleton, Staten Island now meet at Richmond Masonic Hall, West Brighton, Staten Island.

GREAT KILLS LODGE NO. 912

The Eighth Lodge located on Staten Island was Great Kills Lodge No. 912, Instituted on January 12, 1914 and met at 22 Hillside Terrace, Great Kills, Staten Island until their own Temple was completed in 1926. Like Richmond Lodge the Depression put too great a strain upon their finances for them to be able to hold the Building. Heroic effort on the part of the Officers and Members happily brought it back into their possession.

NEW DORP LODGE NO. 1092

The Ninth Lodge located on Staten Island was New Dorp Lodge No. 1092, Instituted on June 18, 1928 met at Miller's Hall on Amboy Road. At the time of its Institution it was known as "Sojourners" Lodge, a name later changed to Fort Wadsworth Lodge and still later to "New Dorp Lodge". In 1929 moved to Koch's Hall on New Dorp Lane and Second Street until 1947 when it moved to Great Kills Temple, Great Kills, Staten Island.

LA GUARDIA LODGE NO. 1130

The Tenth Lodge located on Staten Island was LaGuardia Lodge No. 1130. In 1949, nearly a Century and a quarter after the beginning of Organized Masonry on Staten Island, a Dispensation was granted to form a New Lodge to be known as LaGuardia Lodge after Florrello LaGuardia former Mayor of New York City. It was instituted on June 17, 1949 and met at Great Kills Temple, Great Kills, Staten Island and later moved to Richmond Masonic Hall, West Brighton, Staten Island.

We have a number of Masonic Landmarks on Staten Island but we consider the following as most important:

Stapleton Masonic Temple, 514 Bay Street, Stapleton, Staten Island.

Tottenville Masonic Temple, 236 Main Street, Tottenville, Staten Island.

Great Kills Masonic Temple, 4095 Amboy Road, Great Kills, Staten Island.

Richmond Masonic Hall, 789 Post Avenue, West Brighton, Staten Island.

CYO Building. Formerly "Richmond Masonic Temple," Anderson Avenue, Port Richmond, Staten Island.

Village Hall, Lafayette Street, West Brighton, Staten Island (Home of Beacon Light Lodge for over 70 years).

The Garibaldi-Meucci Memorial Museum, Rosebank, Staten Island.

Our National Landmark is the "George Washington Memorial" in Alexandria, Virginia, to which every New York Mason supports.

The nearest thing to a New York Mason's heart which is supported by all, is our "Masonic Home in Utica," New York for our Elderly Brethren, their wives and widows and the Orphans of Masons, by our contributions to the "Masonic Brotherhood Fund." On the Grounds of the Home we also have a Research Laboratory, researching the diseases of the aged on "Geriatrics."

WILBUR L. DECKER,

Historian, Richmond Masonic District
Museum and Library Historical Society.

HOUSING PROGRAM

HON. LLOYD MEEDS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. MEEDS. Mr. Speaker, from time to time we Members of Congress get letters from constituents that demonstrate such a clear understanding of a particular matter and make such an urgent and rational appeal to the Congress to be concerned with the problems that we are tempted to share the letter with other Members.

I have received such a letter from Mr. Robert L. Kahn, Multifamily and Special Projects Division of the United Homes Corp. His concern is one that a great many of us in this Congress share; making a program work to assure adequate housing for the elderly, the infirm, the poor and, very importantly, the families in the \$5,000 to \$8,000 income bracket. As Mr. Kahn points out, we have a promising program. But the program is of only minor value if it is not funded adequately.

Mr. Kahn also underlines a point that is of increasing concern to me; the way in which Congress will authorize programs that hold out great hope for solving some of our emergent social problems and then renege on the "promise" when appropriations time comes. We do it again and again.

Finally, this letter points up the real dilemma that we Members of Congress have to deal with. If we must cut Federal spending in order to help fight inflation, what do we cut and how much? It is not an easy problem as we all know. Many, on the outside looking in at us trying to make these decisions, do not understand the complexity of the problem.

But Mr. Kahn's letter presents an argument on behalf of his program that is worth attention.

For all these reasons, and because Mr. Kahn has done his homework, I insert his letter in the RECORD and urge each Member of Congress to take the time to read it with care:

UNITED HOMES CORP.,

May 10, 1969.

The Honorable LLOYD MEEDS,
House of Representatives,
Washington, D.C.

DEAR SIR: We are now processing an application for an F.H.A. Section 236 rental housing, interest subsidy, loan through the Seattle F.H.A. Insuring office for a 220 unit project at Everett, Washington, within one mile of the new Boeing Plant. In addition, we are in process of having zoned a 35 acre parcel in Portland, Oregon, which we have under option, for 500 units of similar housing. We are also studying the possibilities of erecting two high rise buildings, one in the Northgate area of Seattle and the other in downtown Tacoma, Washington, for housing for the elderly under Section 236. The total number of units contemplated at this time is over 1200.

By the application of Section 236 we are able to bring well designed rental housing to families in the \$5,000-\$8,000 earnings bracket within the proper economic limits of not more than 25% of their annual income.

Our most pressing problem at this time is to obtain the letter of feasibility from the F.H.A. on the Everett project. We have made

a proposal and a request for feasibility to the F.H.A. Insuring office in Seattle and according to word received from them they had made such a finding of feasibility substantially as proposed by us and forwarded our papers to Washington, D.C., by way of the San Francisco zone office, for allocations of interest subsidy funds, a prerequisite to issuing a formal letter of feasibility to us.

These papers were received in Washington on March 3, 1969, but prior to their arrival the available funds had been preempted by earlier applications (many of which were in existing 221(d)3 commitments which were being converted to Section 236).

Of 48 requests for feasibility which had been forwarded to Washington by the Seattle office, 35 of them were returned and letters were issued to the applicants similar to the one received by us. This letter notified us that processing had been discontinued and only at such time as new funding was available would the processing continue. This experience, of course, is paralleled throughout the country and there is now a tremendous backlog of applications waiting for new funding.

When the 1968 housing law was passed in August of last year, the Congress authorized \$75 million dollars to cover the first year of interest subsidy for projects insured during that fiscal year. The law further stated that an additional \$100 million was authorized in the 1969 budget and an additional \$150 million in the 1970 budget. However, these are simply legal authority for appropriating the money but do not themselves constitute an appropriation. Congress saw fit last session to appropriate \$25 million out of the \$75 million allocated.

We are told that H.U.D. Secretary Romney has requested Congress that the additional \$50 million dollars authorized for F.Y. 1969 be appropriated immediately and that the \$100 million dollars for F.Y. 1970 be included in the new budget. We have received various reports that the supplementary appropriation is now under study and is contemplated to be voted on during the month of May.

It is now so well recognized that there must be some form of subsidized housing for people of low income that most of the large lobbying groups such as the Home Builders Association and the National Association of Real Estate Boards, who in the past have been opposed to public housing, have recommended not only the passage of Section 236, but the appropriations for it.

There have been a number of efforts made over the last 30 years to solve this problem, the best known of which, of course, has been Public Housing. This program has had many drawbacks in the past (which need not be explored at this time) and at the present time is going through the "Turnkey" phase which holds out good promise. However, this only answers the needs of the very lowest income group and does not affect at all that \$5,000-\$8,000 group which we are discussing. Public Housing pays only a minor portion of the normal Real Estate tax and for that reason is found objectionable by many people. Other avenues, which have been tried recently with some degree of success have been the F.H.A. Below Market Interest Rate Loans and the Rent Supplement Loans. These programs were beginning to achieve some good results but it was felt that the provisions under Section 236 went more directly to the heart of the problem and did not require the vast sums of special appropriations for buying the mortgages through FNMA. Therefore, they are being phased out and no new applications are being processed.

There are only a limited number of ways in which housing costs can be reduced. The end product, the rent which is charged to the tenant, is comprised of a number of factors, the profit to the operator being the least of these. The major items being:

- (1) The original cost of construction.
- (2) The interest rate.
- (3) The real estate taxes.
- (4) The operating expenses.
- (5) Profit.

Let us explore each of these items:

(1) The cost of construction has been increasing steadily. There are no technological breakthroughs now available to us which will have the necessary impact on costs. The Editors of House & Home have pointed out repeatedly in their editorials that this cannot be looked to as the answer. The best that can be hoped for at this time is sufficient betterment of technique and products to enable us to stay even. For the past several years we have been involved with a 4% annual increase in construction costs.

(2) The interest rate subsidy is by far the best approach as this permits the total population to assist those in need of help on a national basis and does not place the full impact on those given communities where the need is greatest. There is nothing new in this approach as it constitutes the basis for many of the acts of Congress which provide subsidies for many special groups, which in the long run are paid for by the total population.

(3) The reduction of taxes, of course, has been applied in some special cases, notably in housing for the elderly sponsored by non-profit groups and in the special programs of New York City and New York State where tax abatement is part of their program. If this process is carried too far many local communities having a large elderly population, or being situated in climatic regions which attract retired persons would soon find themselves with a much reduced assessment role resulting in much higher taxes for the relatively small population remaining on the tax rolls. Therefore, this approach should not be used on less than a State-wide basis and local communities should receive reimbursement from the State Treasuries where tax exemption has been given.

(4) Operating expenses are a direct result of the costs of labor, utility charges and maintenance material in most cases such expenses are not susceptible to a great deal of downward adjustments regardless of the caliber of professional management. In those cases where better techniques of management are applied it is most likely to result in better maintained or more profitable property, but rarely in a rent reduction to the tenant.

(5) The last of these, the return to the investor is the smallest. In the case of Section 236 we are talking about a 6% limited dividend requirement.

I feel that the urgency of this problem must somehow be made real to the members of Congress. They must understand that their legislative efforts have brought forth a program which will work and which is responsive to the needs of the country, but only if the necessary appropriations are a reality. These appropriations must be compared with other items in the budget and on a proper scale of values a proper sharing of the available monies will result in the speedy passage of the supplementary appropriations bill.

Last week, I attended a Conference of Urban America, Inc., in Seattle. For two days the subject of low rent housing was discussed. Andrew Hess, one of the most productive FHA Directors in the country spoke. Robert Pitt, the Regional Administrator for Zone 6, H.U.D. spoke. All they could tell us was they are stymied—their hands are tied—they have no way of moving without funds being provided. Congress must understand the devastating effect that the on again/off again approach has on the morale of all people working toward solving the low cost housing problem, not only in Government, but also in the private sector. We must be able to plan and use our best efforts with the

knowledge that there is some continuity to the effort. Land options must be obtained, plans and market studies must be arranged. Congress must understand the tremendous lead times involved in the production of housing and what a vital factor proper housing is to the solution of our most pressing social problems in the Urban environment. Allocating \$200 million dollars to clean up the rubble after the riots is not the answer.

We can only hope that Andrew Hess, Seattle F.H.A. Director, was correct in his summation to his speech last Thursday at the Urban American Conference when he stated that he believes H.U.D. Secretary Romney to be a sincere man, who understands the problem and who speaks with full authority for the Administration in requesting the funds. His second point—The Congress of the United States as presently constituted is fundamentally the same Congress that passed the 1968 Housing Act and that, therefore, we must be optimistic that, in logical sequence, the appropriation of additional funds will become a reality. The audience response to this was, in effect "Well and good, but time is of the essence".

It is our sincere hope you will agree with this statement.

Very truly yours,

ROBERT L. KAHN,
Multifamily and Special Projects Division.

GREATER KANSAS CITY'S CONSTRUCTION STRIKE

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. WINN. Mr. Speaker, for the past 2 months the construction industry in the Greater Kansas City area has been halted by crippling strikes. Negotiations have reached an impasse and each day the shutdown continues threatens further economic decline throughout the entire area. The gravity of the situation and some of the insoluble problems contributing to the work stoppage are outlined in a letter I received recently from the Builders' Association of Kansas City and in an editorial from station KCMO. I commend both to my colleagues for their serious consideration:

MAY 2, 1969.

Congressman LARRY WINN, Jr.,
House Office Building,
Washington, D.C.

DEAR LARRY: As you are probably aware, we are entering our sixth week of the construction shutdown in the Kansas City area due to strikes by Ironworkers and Painters Unions, which have made exorbitant demands upon our industry.

The Ironworker demands constitute, on a conservative estimate, around \$4.20 per hour increase for a one year period, which amounts to an increase in excess of 80%. The manner in which some of the demands are stated makes it quite difficult to put an absolute figure on certain items as they would not apply to every man and to every job situation across the board; but in terms of the overall costs to an employer, they must be taken into account in some form. Although they have stated they are negotiable on some of these items, after five weeks of strike they have not retracted or moved from any of these requests. The Painters have moved from their original demands, but are still seeking increases in excess of \$1.35 per hour for one year, which

amounts to nearly 30% increase for a one year period. Under this set of circumstances, there is no likelihood of settlement even with the Painters, so long as the Ironworkers are still out on their impossible demands.

Our Association has felt that these demands were so exorbitant and unrealistic that we could not make an offer anywhere in the realm of what was being demanded. We have assured the Unions that we are willing to grant substantial wage and contract changes if their demands were altered to some degree, whereby meaningful negotiations could be conducted.

The work stoppage which is now occurring in our area has created a hardship on employers, employees, and buyers of construction, as well as the local units of government which have construction projects underway or scheduled under fixed budgetary or bond limitations. It becomes more difficult each passing year for employers, particularly those in the construction industry, to fend off large powerful unions in their quest for inflationary and unwarranted cost increases. It would be much easier and less costly for construction employers to accede to these demands on a limited deferred basis and in a sense "buy" their way out of this dilemma, for in the long run the contractors are basically "middlemen" between the unions and the consuming public. The chain reaction of these increases throughout the building trades in this area will amount to a 40% increase in the cost of construction to the public and to the private purchasers of construction.

In periods of nationwide manpower shortages, and a great volume of construction to be performed in most areas of the United States, there is some feeling of futility in attempting to hold the line against this form of inflation in a single given area at such a great cost and loss to individual small contractors. It would seem that if the Congress has any real intent of checking inflation that it should take some affirmative direct action to prevent such inflationary actions at the grass-roots levels, as well as through indirect filtering down measures of taxes, interest, etc. I am sure that the Kansas City situation is being repeated a number of times in other cities and areas throughout the United States, and our existing economic and bargaining system just does not permit the small businessman, which constitutes the bulk of the construction industry, to effectively cope with the powerful and monopolistic unions. We earnestly urge that the Congress do some soul searching to determine if our country can afford to pay the price of the present trends and insatiable appetite of organized labor if it remains unchecked.

Sincerely yours,
BUILDERS ASSOCIATION OF KANSAS CITY.

CONSTRUCTION STRIKE

(By E. K. Hartenbower, KCMO vice president and general manager)

Everybody stands to lose in a prolonged construction strike. Weeks drag into months, and Greater Kansas City is now feeling a pinch from the prolonged construction strike by ironworkers, painters and truck drivers.

Although the numbers of strikers and payroll losses are not too accurate, estimates now range between ten and twelve thousand actual strikers, including walkouts at two major plants not involved in the construction dispute. Payroll losses may run as high as two million dollars per week. It must be remembered that numerous strikers have taken other jobs temporarily, and payroll loss figures are far from accurate.

An immediate side effect of the construction shutdown is loss of business by firms supplying material and services to the struck projects. Individual companies are beginning to see very serious losses unless the labor dispute is settled soon. Claims for unem-

ployment pay are not running excessively higher than normal for this time of year. This, however, could change rapidly.

Despite uncertain figures, individual businesses in Greater Kansas City can report visible effects from the strikes. It is hard for general business to bear such effects while not being directly involved in the dispute. A prompt settlement is the only answer.

ROBERT D. MORAN

HON. F. BRADFORD MORSE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. MORSE. Mr. Speaker, Robert D. Moran, the new Federal Wage-Hour Administrator of the Department of Labor, gave his thoughtful goals for his program as Administrator at his swearing in ceremony May 5. Mr. Moran, a respected attorney and experienced labor arbitrator is, at age 39, one of the Department's youngest Presidential appointees. I am highly pleased to include his views in the RECORD for the attention of my colleagues. Mr. Moran's statement follows:

STATEMENT BY ROBERT D. MORAN

Today, as I officially assume the position of the Federal Wage-Hour Administrator, I want to convey to those interested in its work my views on the role we will play in carrying out the goals of this Administration. As President Nixon has stated, it is not enough to have laws on the books. What we must do is give them meaning, make them work for the benefit of all our people. My goal as Administrator will be to implement this objective.

The Fair Labor Standards Act was landmark legislation when it was enacted in 1938. In the 31 years of its existence it has made giant strides towards its goal of eliminating "labor conditions detrimental to the maintenance of the minimum standard of living necessary for health, efficiency, and general well-being of workers." The delicate balances which were incorporated into this law have had the overall effect of increasing the earnings of those working people most in need of help without curtailing job opportunities.

It is my opinion that the Fair Labor Standards Act has enabled more progress to be made in the continuing battle against poverty than any subsequent or previous congressional enactment. I fully support its high purpose and pledge to administer this law—and all others that have been assigned to the Divisions I now head—with vigor, enthusiasm, and impartiality. Effective implementation of the various statutes in this field requires the cooperative efforts of working people, management, government and the public generally. I plan to expend every effort to promote this cooperation.

The new Administration's goal of law and order with justice includes compliance with labor standards laws. We will be vigilant to see that the wages to which workers are entitled will be paid, that equal pay for equal work becomes more than a slogan and that every possible effort is made to eliminate discrimination in employment on account of age.

At the same time I expect to work closely with the vast majority of responsible employers who have readily complied with the minimum standards established by law in the interest of making compliance less of an administrative burden. It is gratifying to know that most employers maintain labor standards far better than those required by

law. But we are still plagued with those who would gyp, swindle and shortchange low wage workers as well as many who are honestly uninformed as to their responsibility under the law. We shall strive to protect working people from both.

I shall also be seeking new approaches for improving the administration of the wage and hour laws and I will welcome suggestions in this regard from all interested parties. It will be our combined effort which will determine the effectiveness of this legislation and bring about those improvements which must be made if we are to meet the challenges of the future.

Finally, I want to pay tribute to the many dedicated and able employees of the Wage and Hour Divisions. Their reputation for professional skill, competence and solicitude is well known to me. The Wage-Hour investigators rank with the FBI and Secret Service in the elite of U.S. enforcement agents. I am very proud to join them and look forward to working with them in the months and years ahead.

UNREASONABLE WORLD

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HUNGATE. Mr. Speaker, in this age of violent actions and strident voices, it is reassuring to find in our newspapers the calm, rational words of Alan L. Otten. I would like to call to my colleagues attention his column from the Wall Street Journal, May 21, 1969, which deals with the difficulty of maintaining an objective viewpoint in today's world, and therefore include that column in the RECORD:

UNREASONABLE WORLD

(By Alan L. Otten)

WASHINGTON.—Somehow, it seems to be getting harder all the time to know and follow the path of right and reason.

More and more, people tend to polarize on controversial issues. The man of good will, trying his damndest to be rational and fair and decent, all too often winds up appearing absurdly naive or hopelessly out-of-date.

Abe Fortas, for example, obviously acted badly. The reason may have been incredibly bad judgment, lack of sensitivity, simple greed, a nagging wife, evil companions or merely misplaced confidence that he could get away with it. Whatever the cause, he acted badly, and every reasonable person must deplore his conduct and lament the damage it did to the court and to faith in government generally.

Yet comparatively few people seem even a little upset by the Justice Department's activity in the Fortas affair. Attorney General John Mitchell admits he privately gave Chief Justice Earl Warren additional information about Mr. Fortas—but refuses to say what this was, leaving suspicions possibly far worse than the facts. The Justice Department subpoenas Louis Wolfson to force him to talk about his relations with the justice, again implying considerable evil-doing; other stories quoting "high officials" suggest that the Wolfson statements are indeed damaging, and that the Attorney General warned he would make his information public by a certain time if Mr. Fortas hadn't quit the Court by then.

The department insists it leaked no stories, made no threats, is much maligned. Maybe so. But the stories certainly came from somewhere, and Chief Justice Warren has never been known as a blabbermouth. It would be nice to demand not only that an associate

justice show greater sensitivity for his job, but also that the Justice Department show greater respect for relations between the Executive Branch and the nation's highest court. Yet to suggest this, in the current emotional atmosphere over Mr. Fortas, risks denunciation as a far-out radical or a nut.

Similarly the man who believes in reasonable and steady progress toward racial integration and a concerted effort to improve the Negro's material lot has been made an unhappy anachronism by new militant Negro leaders preaching black separatism. He must continue to battle with die-hard segregationists still shouting "never" and with white power groups contending the Negro is being helped to move too far too quickly. But now he must also cope with far-out demands for unrealistic "reparations," for financial help to businesses that don't yet have the know-how to succeed, for Negro faculty and student quotas that can't possibly be filled. To the one side he's a nigger-lover, to the other just another hateful honkie.

The dilemma repeats itself endlessly. It's increasingly difficult to steer a middle course in the current campus controversy—to support some legitimate demands of the student activists and yet also insist they act legally and reasonably and not deliberately disrupt the college community. Yet more and more one is driven to choose one side or the other—for the authorities, whether right or wrong; for the students, whether right or wrong.

Editorial writers love to denounce Congressional trips as "junkets" wildly wasting taxpayer funds; lawmakers counter with a blanket defense. The truth is somewhere between. Many Congressional trips are indeed carefree vacations at taxpayers' expense; others are hard-working investigations earning their cost many times over.

So many factors make it difficult to be sensible and fair these days. There's a general disintegration of established authority—the family, the church, local government. The multiple annoyances and aggravations of urban society expose raw nerve-ends. Vietnam hardly provides a backdrop for easy, rational discourse. And the nonsense being talked by responsible political leaders sets a horrible example for the rest of us.

The President's recent Vietnam speech, for instance, was on the whole a valuable exposition of Administration thinking—skillfully combining standard U.S. positions with possibly just enough new flexibility to get negotiations moving. And yet Mr. Nixon jarred at least a few listeners by declaring early in the speech that one course open to him had been instant unilateral withdrawal—and that "this would have been an easy thing to do." Now if anything is clear, it's that this would not have been an easy thing to do, for reasons both strategic and political. Mr. Nixon contributed little to appreciation of the rest of his speech or to the general level of political dialogue by that remark.

Mr. Nixon's communications director, Herbert Klein, is quoted by the UPI to the effect that the Administration is concerned over Ted Kennedy's "effort" to make the ABM into "a campaign issue." What utter nonsense. How in the world does Ted Kennedy's opposing the ABM create a campaign issue any more than Richard Nixon's proposing it? This is not communication, it's noncommunication.

All last year, Democrats in the Senate and House were either conceding major flaws existed in the Job Corps or were conspicuously ignoring the program. Mr. Nixon now proposes to close a number of Job Corps centers, though, and the Democrats howl as though he were attacking motherhood itself. They make no serious attempt to look honestly at the criticism of the program, or the Administration's proposal for reshaping it. Strom Thurmond of South Carolina spends much of

his Senatorial life fighting Federal efforts to deny funds to school districts dawdling on integration. Yet he finds nothing absurd in now demanding that the Government deny funds to student demonstrators.

Or consider Senate Minority Leader Everett Dirksen, at the White House a few weeks ago, refusing to set forth his reasons for opposing Dr. John Knowles as assistant secretary of Health, Education and Welfare. "That matter has been, shall I say, adjudicated, in the sense that I have nothing more to say about it," the Senator declared. And when pressed to be a little more specific, he explained, "I have made all my discussions, and that is an adjudication for me."

Little wonder that, in such a world, reasonable men falter.

SAN ANTONIO POLICE DEPARTMENT OPEN HOUSE

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. GONZALEZ. Mr. Speaker, the city of San Antonio, which forms an integral part of the 20th Congressional District, which I have the honor to represent, is a notable city in many respects. It has been the pacesetter with respect to human relations since the beginning of urban living in the State of Texas, in fact, in the Southwest United States. Not only is San Antonio the most historical city but it is also a pioneer in the most sensitive area, and that is the relationships between citizens. San Antonio is a cosmopolitan city and it long ago learned the secret of how to get along. Parenthetically speaking, this is the reason why I have been so sensitive about the disturbing and insidious activities of a small group of racists that I have been exposing for the past 2½ months.

Last Sunday, the San Antonio Police Department held a historical event: An open house between the hours of 2 to 6 p.m. More than 1,600 persons on that Sunday afternoon in those few hours poured through the unique San Antonio Police Headquarters, one of the most modern and up-to-date structures in the Southwestern United States. I had the great honor and privilege to have been invited to this event by Capt. H. L. "Hank" Antan, the executive officer of the San Antonio Police Department and the chief of police, George W. Bichsel. Both of these men have distinguished themselves by an illustrious career in law enforcement.

What I and my fellow San Antonians who visited Sunday during the open house saw was most gratifying. We were guided by polite and courteous uniformed members and officers of the San Antonio Police Department. The names they bore reflected every type of national and racial background that we have in our country. The most gratifying thing of all was that we saw no massive purchase of new equipment such as armored cars, tear gas, and all of the paraphernalia that so often and so unfortunately many of the cities have had to strain their budgets to acquire because of the unhappy conditions in those

cities. On the contrary, what we saw in San Antonio was the reflection of a highly efficient, dedicated group of police officers. It was indeed a happy sight and it was the best proof of a happy and sound community.

I take this opportunity to commend to the Nation such outstanding public servants as Chief of Police George W. Bichsel and Capt. H. L. "Hank" Antan and the other notable and dedicated inspectors, officers, and men, as well as the secretarial workers and clerks. They were all present Sunday, and it was indeed a happy sight.

I offer for the RECORD at this point the program and schedule issued by the San Antonio Police Department on the occasion of the open house:

LAW ENFORCEMENT WEEK IN SAN ANTONIO:
MAY 11-17, 1969—OPEN HOUSE AT SAN ANTONIO POLICE DEPARTMENT—VISIT YOUR PUBLIC SAFETY FACILITY

Police Open House: 214 West Nueva Street, Sunday, May 18th, 1969, 2:00 p.m. to 6 p.m.

Free parking.

Refreshments will be served in the snack bar by the San Antonio Police Wives Auxiliary.

The San Antonio Police Department is constantly aware of its obligation to our proud heritage and takes great pride in announcing an "Open House" in observation of "Law Enforcement Week" on Sunday, May 18, 1969, from 2:00 to 6:00 p.m.

Special features will include:

- Tour guides of the Police facilities.
 - Firing range (Basement) Demonstration of Police Weapons and Equipment.
 - Uniform Patrol roll call at 2:30 p.m. (Assembly Room).
 - Traffic roll call at 3:00 p.m. (Assembly Room).
 - Narcotic Bureau display.
 - Juvenile Bureau display.
 - Robbery Office (Ident-A-Kit).
 - Training Bureau (Gym facilities and Cadet training).
 - Community Relations display.
 - Radio Maintenance facilities.
 - Records and Identification Offices.
 - Laboratory facilities.
 - Communications (Dispatcher's Office).
 - Accident Prevention Bureau (a short film).
 - Traffic Services Bureau display.
 - Vehicle Maintenance facilities (car wash facilities).
 - Corporation Court facilities.
- The following vehicles will be on display:
Vehicle with radar unit, Motorcycle, Patrol car, Expressway car, Police wrecker, Paddy wagon, Community Relations Bus, Bexar County patrol car, State Highway patrol car, and Armed Forces Police Detachment Vehicle.

INTERVIEW WITH GORDON LUCE

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. DON H. CLAUSEN. Mr. Speaker, California has long been credited with one of the finest transportation systems anywhere in the world. Our highway department, probably the best administered anywhere, has worked over the years to provide motorists the safest and most economical freeway and secondary systems available. Californians are proud of the fact that our toll-free roads have been paid for from user fees and not from general fund revenue.

The Reagan administration, when they took office in 1967, placed special emphasis on transportation. To head the all-important position of secretary of business and transportation, they found Gordon C. Luce of San Diego. Mr. Luce is 43 years old and holds a masters degree in business administration from Stanford University. Prior to joining the State service, he was a savings and loan executive in San Diego. As secretary of business and transportation, Mr. Luce serves as overall coordinator of the State's transportation network.

The April 1969 issue of *Westways* contains an informative interview with Secretary Luce. Mr. Speaker, I include in the RECORD the transcript of this interview:

INTERVIEW WITH GORDON LUCE
(By Paul Ditzel)

The Governor's Task Force on Transportation recently recommended ways in which California could plan and coordinate its current and future transportation requirements.

Major among the Task Force's recommendations was the suggestion that the state develop a transportation master plan that would include the encouragement of urban mass transportation and continued development of the state system of highways, roads and streets.

Formation of the Task Force was the idea of Gordon C. Luce, State Secretary of Business and Transportation. It included 24 business and professional leaders who were assisted by more than 100 transportation specialists. Chairman was architect and planner William L. Perella, whose views appeared as the first installment (November, 1967) in *Westway's* recent series, "Transportation: What's Ahead for Southern California?"

In this interview, Secretary Luce discusses the report and related matters.

Question. What is the significance of the Task Force report?

LUCE. Let me say, first of all, that there is an unfortunate, but understandable, tendency to weary of discussions of the transportation problem and to vow to do something or to build something before we really know what it is that should be built or done to best serve our economic, social and environmental needs. To their credit, the Task Force did not lay out, in a neat pile, all of the state's transportation problems and then proceed to solve them. Rather, it pointed out that the most serious deficiency in our approach to transportation is our inability to identify and to evaluate our current and future requirements. There is little correlation of presently available information that could correct this deficiency, and even less coordinated planning among land, sea and air modes of transportation.

The Task Force recommended, therefore, that the legislature create and fund a California Transportation Board and an Office of State Transportation Planning and set up Regional Transportation Districts. By correlating present information and plans as well as other material that will be developed, these agencies will evolve a transportation master plan for California—one that would interlock with programs of our neighbor states as well as those of the federal government.

Question. You mention other plans and there have, of course, been many of them. Is there a danger that this report, because it does not propose concrete solutions, will become another archival curiosity?

LUCE. I hope not. California cannot afford to cast off the Task Force report as just another study. The Governor and the legislature appreciate that this report was the product of 18 months of study by as knowl-

edgeable a group as has ever been formed anywhere to study transportation. The state could not have afforded to hire this combined expertise, which was voluntarily given to us. At the same time, I don't think we can say that past plans are necessarily bad because they are gathering dust somewhere. The master plan suggested by the Task Force could reactivate many of these plans, including, perhaps, the \$100,000 plan that the state contracted with North American Aviation, Inc. to prepare several years ago.

Question. What is being done to implement the Task Force recommendations?

LUCE. Most of the recommendations must be implemented by legislative action. In the meantime, I have appointed Charles G. Beer to the post of Transportation Planning Coordinator for the state. He is helping to prepare the necessary legislation that would bring the Task Force's recommendations into reality. Beer served as a Task Force advisor and project director. For the past six years he has headed the Urban Planning Department of the California Division of Highways, so he is especially well qualified.

Question. Will the creation of these state agencies result in the employment of large numbers of additional personnel?

LUCE. No. The Transportation Board would consist of no more than seven members appointed by the Governor, with the advice and consent of the legislature. The Office of Transportation Planning would be small—probably a few planners from the Highway Department, the Finance Department and the Public Utilities Commission. This would be a coordinating team and would retain consultants rather than build a large "in-house" staff. Such an office could assist the Regional Transportation Districts.

Question. What do you see as the first activity of these new agencies?

LUCE. Transportation finance. We always seem to end up pondering how we are going to pay for whatever transportation improvement is suggested.

The state does not now have the ability to explore, in depth, how transportation can best be funded. The Planning Office could study other states and learn what they are doing. And it will work with various communities in an attempt to draw up guidelines on how other modes of transportation—rapid transit, for example—could be financed. The Planning Office would also be the focal point for the pooling, coordination and exchange of information, whether it be in regard to land-use planning, coordination of transportation facilities or standardization of equipment—all of which would help lower the cost of systems supplemental to freeways.

Question. How else can the state encourage solutions to the transportation problems?

LUCE. Chiefly by passing enabling legislation to permit communities to vote for a half cent sales tax—over and above present sales tax—to provide a fund for any form of transportation they wish, whether it be rapid transit, buses or additional street, highway and freeway construction. We are working on such a bill for presentation to the legislature this year.

Every city is unique in its history and its layout. The community knows—far better than the state does—what they must do to gear their transportation to the needs of their area. We are here to help. But the state must never go into the business of building transportation systems, other than our present and future involvement with highways, streets and roadways.

Question. You obviously favor the sales tax over other approaches to financing transportation.

LUCE. Very much so. The sales tax is a more equitable way for us to pay for rapid transit than, for example, further increases in the property tax. I think that most people misunderstand the benefits of a sales tax.

This tax is paid by everybody. Whether or not each person in a community intends to use the transportation improvement, the facility benefits the area as a whole. There are some who argue that a sales tax is a hardship on low-income people, but I think the wealthier person certainly pays his share because his buying power is much greater. Sales taxes can, moreover, be turned off and on, quicker than any other form of taxation, a significant factor considering the urgency for solutions to public transportation problems. Another advantage to the sales tax is the slight cost to the state in collecting it.

Question. Is this how the Bay Area Rapid Transit (BART) will be helped out of its present financial distress?

LUCE. I hope so. There is a bill now that could result in a half cent sales tax—for four and a half years—in the three Bay Area counties that will benefit from BART. Another plan, which I strongly oppose, would double bridge tolls. This solution would require that BART's bonds be refinanced, thus resulting in added interest payments of around \$100 million—almost as much as BART needs to get out of its financial trouble. Increased bridge tolls also would put off for many years the construction of another bridge that is so badly needed in the Bay Area.

Question. Would you support a state constitutional amendment to permit diversion of highway user taxes for other purposes—such as building rapid transit systems?

LUCE. No, I would not. Highway user taxes have worked successfully in California. You have only to compare our situation with other states—notably New York—to see just how well it has worked. In New York, the gas tax money has been used for other purposes. Consequently, that state has fallen behind in its highway program. New York now has a \$2½ billion bond issue, which they hope will bring them back on schedule. The special fund for highways has worked well in California. It should not be tampered with.

Question. Are there other sources of finance?

LUCE. Yes. I would hope that we could obtain what I feel is due the state from the Federal Highway Trust Fund. When the fund was established in 1956, all the states contributed gas tax money to a national fund for building the Interstate Highway System. Four cents on each gallon of gasoline purchased by Californians still goes into that fund.

We have now put into the fund over a billion dollars more than has come back to the state; the federal government returns only 81 percent of our money. We are considered a "donor" state to help other states, such as Oregon, which gets back 126 percent; Arizona, which gets 138 percent; and Nevada, which gets 167 percent. The citizens of California are building roads in these other states.

While we recognize the validity of the concept and the need for the Interstate system, I believe that we should be getting back more than 81 percent of our money. Even the return of one additional percent of the over \$400 million we annually send to the federal government in gas taxes could result in a sizable amount to further our transportation programs.

Question. Do you foresee a gas tax increase? And if so, when?

LUCE. I would hate to say to the taxpayer that we need another two cents on every gallon of gasoline he buys. An increase is, however, inevitable, if inflation and the population growth and transportation demands continue, which certainly seems likely. But I would not expect any increase for at least two years.

Question. The Task Force recommended that the activities of these new transportation offices be funded by the state highway, aeronautics and general funds. Do you agree?

LUCE. Yes. I am aware that there are some who are against use of the general fund and some who say all of the cost should be borne by the highway fund. I am, however, opposed to use of the highway fund to pay the whole bill. Funding must come from as broad a number of sources as possible, because so many forms of transportation are under consideration.

Question. What role might the systems analysis approach hold for the transportation problems we face?

LUCE. Transportation planning requires a great amount of input, and the only way you can do this is to computerize that input and develop systems from it. Private enterprise has demonstrated these skills. I hope that sometime in the future, after we get the Planning Office off the ground, we will utilize some of these systems analysis specialists.

Question. To what extent do you see the private and academic sectors working with the state on its transportation problems?

LUCE. They will play the major role in the years ahead, although they have in the past performed a relatively minor role, considering the state's virtual monopoly in highway work. The state will continue its highway activity, of course, but I think the overall problem in transportation is so broad, considering the other transportation modes, that we must go outside for expertise. Rather than have the state perform studies and do all the planning and building, we have to look to private enterprise and find out who can do the best job and then put them to work doing it.

Question. Do you think our approach to urban transportation is lopsided in favor of highway, as compared to some other modes?

LUCE. As I pointed out earlier, the state's role has been primarily in freeway activity, and not among the other forms of transportation. However, I believe the creation and work of the Governor's Task Force demonstrates an increasing interest in other forms of transportation to supplement the highway system.

Additionally, of course, the Bay Area Rapid Transit District is going forward with the development of rapid transit lines on a regional basis.

Question. Ridership studies in the Bay Area Rapid Transit District are said to be among the best ever made. Does not the Bay Area's desire for rapid transit parallel that of southern California and suggest that a similar system should be built in Los Angeles?

LUCE. Not necessarily. Rapid transit may be more attractive in certain areas, such as San Francisco, where people have become accustomed to high-density living and have learned to use various modes in addition to the automobile. BART's own prediction in San Francisco is that the completed system will make a 10 to 13 percent dent in motor vehicular traffic on the San Francisco Bay Bridge. Bridge traffic, however, is growing between 4 and 5 percent a year, so they're buying themselves only about two and one-half years of time before they are back to the present carrying capacity of the bridge. I'm not saying we should not try to make a dent, because a dent is better than nothing, provided the public wants it.

Question. The Task Force said the state should determine the need or demand for mass transit. Do you think people really want to get out of their autos and ride mass transit?

LUCE. The only way you can win the motorist away from his car is to provide him with a service that is more convenient and perhaps less costly. It remains to be seen whether any mass transit system will appeal to a sufficiently large number of people to really do anything more than make a small dent in the urban transportation problem.

Question. What is your assessment of the

expanded use of buses as a prelude to rail rapid transit systems?

LUCE. It offers distinct and attractive possibilities. I think the first step before we make a major investment in a fixed rail rapid transit system is to work with something that costs less, can be laid out more quickly and seems to appeal more to the public. No doubt, if a modern type of bus were developed and used special street and freeway lanes, it would offer a flexibility of movement that would attract ridership.

Question. Should a study, similar to that made by the Task Force, have preceded the recent rapid transit Proposition A proposal that was defeated in Los Angeles?

LUCE. I believe so. While the rapid transit proposal had some outstanding citizen leadership, there were not enough leaders who were directly involved in its planning so that they could come forward and encourage everybody's support. With an overall involvement of business, professional, academic and transportation specialists—representative of the makeup of the Task Force—the outcome might have been different.

Question. Some blame rapid transit's failure on the proposed sales tax increase to pay for it.

LUCE. I doubt very much. People were not voting for or against a sales tax as much as they were not convinced that the system would solve their problem. Proposition A did better than some other measures that were far more financial in nature.

Question. Noting that Californians are concentrating in three regional areas—Los Angeles, San Diego and San Francisco—the Task Force said it is the "definite responsibility" of the state to encourage, if not directly underwrite, urban mass transit. Do you agree?

LUCE. No. The state should not underwrite transit. This is a regional issue and it is up to the people of the area to decide if they want it and how they will go about paying for it if they do. I do believe, however, that the state should enable and/or encourage the development of mass transit.

Question. The Task Force raised the possibility of developing a system of single purpose toll roads in the State of California. How do you feel about this?

LUCE. I am opposed to toll roads in California, except, possibly, for special uses such as the planned Mineral King Highway, tunnels or bridges. Toll systems are expensive in themselves because you must set up collection facilities and hire collectors. I think the public would prefer to pay a half cent more on their gas tax and have the freedom of driving toll-less highways.

Question. High-speed train service is receiving much attention on the East Coast, in Canada and Japan. Do you see it offering advantages to the traveler along the San Francisco-Los Angeles-San Diego corridor?

LUCE. Not particularly. In other areas, people have been train oriented for generations. In California, we are not. We are so accustomed to getting on and off airplanes serving this corridor that it is unlikely high-speed rail service would prove attractive—either in speed or in fares. Possibly it might when air congestion significantly worsens, but by then we will probably have developed the satellite airport concept, which would relieve the major air terminals.

Question. If the Task Force's recommendations are carried out, would you speculate on the makeup of urban transportation in southern California by 1985?

LUCE. Anything that is planned for the future in this area should be extremely conscious of environment, design standards, aesthetics and land use, in addition, of course, to mobility. In recent years we have emphasized a program of bringing the park people together with the planners, the architects with the highway engineers, so that some symmetry in transportation planning

results. We must also have a system that serves the needs of all the people. It is to be hoped, moreover, that there will be overall planning and coordination of efforts so that all the transportation modes we decide upon will work together.

There is no doubt in my mind that freeways will continue to be the major mode. We must make better use of them, however. We have an experimental project under way now that uses electronic sensors to monitor traffic along part of the Los Angeles freeway network. Eventually, this could lead to a surveillance system that would benefit motorists by making driving easier and safer. Maybe, too, there are forms of rapid transit that will help southern California's problem. We must, nevertheless, strive for balance and coordination in our transportation systems.

BOGUS MONEY, THE VERDICT OF AN AMERICAN JURY

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. RARICK. Mr. Speaker, the age-old battle as to whether money as a medium of exchange must have intrinsic value or whether by custom and educated usage money can be a theoretical value was judicially resolved by a jury trial on December 7, 1968, in Scott County, Minn.

The jury found that credit called "instant money" through a bookkeeping entry by a bank was not lawful consideration to support a promissory note.

Perhaps the soaring trend of inflation and the ever-increasing manipulation by the money destroyers to remove the historical metals of intrinsic value are making it harder to fool the people.

The bank having lost the case and wanting to perfect an appeal tendered two \$1 Federal Reserve notes which were refused with the statement that a \$1,000 Federal Reserve note was worth less in value than a 10-cent trading stamp.

Mr. Speaker, I include two news editorials on the paper money case:

[From the Central Valley (Calif.) Valley Times, May 15, 1969]

A \$1,000 BILL WORTH LESS THAN A 10 CENT TRADING STAMP
(By Jo Hindman)

A recent court ruling that affects your money reveals that Federal Reserve credit and currency—the same you are earning and spending—has no lawful value.

It came about this way: a bank foreclosed by advertisement on a borrower's note, bought the property (loan's collateral) at a Sheriff's sale, sued to acquire possession of the real estate in a case titled: First National Bank of Montgomery (Minn.) vs. Jerome Daly.

Martin V. Mahoney, Justice of the Peace, Credit River Township, Scott County (Minn.) presided at a jury trial on Dec. 7, 1968. The jury found the note and mortgage to be void for failure of a lawful consideration; also the jury refused to give any validity to the Sheriff's sale. The bank lost. Jerome Daly, the defendant, won and kept his land.

The president of the bank which is within the Federal Reserve System, admitted in testimony that the bank "created" the money/credit by a bookkeeping entry, the so-called consideration for the note and mortgage deed; also that no U.S. law or statute existed to give the bank the right to create

money in that manner. Handing down the judgment, Justice Mahoney said, "Only God can create something of value out of nothing."

The bank tried to appeal the case. The appeal fee of \$2 was offered by the bank, using two Federal Reserve Notes (\$1 bills); these were likewise declared unlawful and void. The bank agent failed to appear at a hearing on Jan. 22, 1969 and the appeal was dropped.

By comparison, a humble trading stamp is worth more than a \$1 bill (Federal Reserve Note), or even a \$1000 Federal Reserve Note. The two bills differ only in denomination and perhaps engraved design; each has paper-and-ink value of a fraction of a cent. On the other hand, basic trading stamps—the gold, the blue, the green—each has face value of one mill. Superior to paper money (FR notes), trading stamps have redemptive value in the merchandise offered in the stamp companies' catalogs. The Fed's currency cannot be converted into the gold or silver it purports to represent, and can be exchanged only for more of the same—paper or cheap clad-copper coins.

Fantastic? Remember the foregoing Daly case: a United States court prevented the bank's attempt to redeem its worthless note by seizing Daly's valuable land. The saga is explained with detailed clarity by Mr. Daly, a brilliant lawyer on monetary law, in "A Landmark Decision," price, \$2, 28 E. Minnesota St., Savage, Minnesota 55378.

You say "But paper money has been working out okay."

The practice works if nobody objects. Jerome Daly objected. Do you object to working 23 hours (three days) to pay for a new suit? Or two weeks to buy an automatic washing machine? While Federal Reserve banker needs only to uncup his pen to create and to multiply fiat dollars thousand-fold? "Fiat" means the money cannot be converted into metal coins—gold, silver, etc.

Worse, the Federal Reserve System is a private corporation, not a federal agency, despite its name and the 1913 Act that "blessed" it. The Fed's money-multiplication table appears on page 73 of The Federal Reserve System (1963), obtainable from the system, Wash., D.C., 20551.

Obviously, the wrong needs to be made right, Congress should outlaw the Fed's money-creating racket, should recall the clad-copper coins and replace the silver, should take steps to restore the gold that has been trucked off. Congress not The Fed, should regulate U.S. money.

Your U.S. Senators and Congressmen know, or should know about the critical mess.

THE FEDERAL RESERVE'S "INSTANT MONEY" OPERATION IS DECLARED NULL AND VOID BY COURT AND JURY

(By E. F. W. Wildermuth)

The never explained conspiratorial like silence by the news media of this nation has kept most people in ignorance concerning a decision of major importance to all Americans, rendered by a court and jury in Minnesota on the 27th anniversary of the prelude to World War II via sneak attack on Pearl Harbor.

To better understand the importance of this decision a brief review of the wisdom displayed by the framers of the U.S. Constitution is likely to prove helpful.

It was the purpose of the framers of the Constitution to provide for the creation of a firmly established common medium of exchange in payment for goods and services and in settlement of debts.

In an effort to achieve this end, it was mandated in the Constitution that the Congress of the United States shall have the sole and exclusive power to coin money and regulate the value thereof. To insure the uniformity of value of such money, the

power to coin money was denied to the States.

Since the adoption of the Constitution it appears that Americans have become victims of sundry self-styled "do-gooders" claiming wisdom far superior to that demonstrated by the Founding Fathers. Under the guise of "protecting" Americans, laws have been enacted designed to "protect" Americans from almost every conceivable shortcoming of fallible man, many of which have proved to be deadly boomerangs.

FEDERAL RESERVE ACT

Among those man-made laws which have boomeranged is the Act of Congress approved by President Wilson on 23 December, 1913. This Act created the Federal Reserve System, composed of 12 Federal Banks, their branches and numerous National Banks, etc.

Americans have come to believe that the Federal Reserve Banks are owned and operated by the federal government. The Federal Reserve Banks are privately owned and pay no taxes. The Federal Reserve System is the most complex "instant money" Frankenstein ever created in the recorded history of mankind.

Presently, the money manipulators of the Federal Reserve Board are trying desperately to make their unconscionably high interest rate stick in what must be their futile effort to stem the wild inflation in this nation now about to get out of hand. It is the same Federal Reserve "experts," now striving so mightily, who have wholly failed to stabilize the dollar and curb inflation after having successfully advocated the outlawing of the Gold Standard in 1933.

In this dark hour of financial crisis it appears that the money manipulators of the world, operating through the Federal Reserve System, may have met over-powering adversity.

MORTGAGE FORECLOSED

Jerome Daly, an attorney in Minnesota, executed a Note and Mortgage on May 8th, 1964 in the sum of \$14,000.00 to the First National Bank of Montgomery. In the Spring of 1967 Mr. Daly came into arrears in payments in the sum of \$476.00. The Note was secured by a Mortgage owned by Mr. Daly at Spring Lake Township in Scott County, Minn. The First National Bank of Montgomery foreclosed the Mortgage and bought the property at a Sheriff's Sale on June 26, 1967. Not having made payments after the sale or redeemed the property within the 12 months provided therefor by law, the Bank brought an action at common law to recover possession of the property . . . this is where the woes of the Bank began to sprout.

The suit by the Bank was instituted in the Justice of Peace Court at Savage, Minn. After two judges had been disqualified for prejudice and a third refused to preside at the trial, the case was transferred, pursuant to law, for trial before the Justice of Peace, Credit River Township, Scott County, Minn.

On December 7, 1968, the case was tried before Hon. Martin V. Mahoney and a jury of 12. The jury found against the First National Bank of Montgomery and in favor of Mr. Daly.

A BOOKKEEPING ENTRY

It was admitted at the trial by the President of the First National Bank that in combination with the Federal Reserve Bank of Minneapolis, by virtue of their interlocking activity and practice they were one and the same bank and that they created the entire \$14,000.00 which had been loaned to Mr. Daly, in money or credit upon their books by a bookkeeping entry. It was this "instant money" which the First National Bank of Montgomery used as "consideration" to support the Note and the Mortgage which it allegedly foreclosed. The jury found as a fact that the "instant money" created by the simple act of a bookkeeping entry by the

loaning institution (The First National Bank) was not the lawful consideration required to support the Note it took from Mr. Daly and the Mortgage he gave the Bank as security for the Note. It having been determined that the Note and Mortgage were void for want of lawful consideration, there could be no validity to the so-called Sheriff's sale.

"INSTANT MONEY"

There is no law or statute which permits or authorizes the creation of such "instant money" or any other money. Only Congress is vested with the power to create money and the Constitution does not authorize Congress to delegate its power to coin money and regulate the value thereof. Yet, the Federal Reserve Banks have been lawlessly creating "instant money" with impunity for ever so many years . . . until the Court and jury in the Daly case found in essence, if not in fact, that the Federal Reserve Banks are not above the law. It is self-evident that the champions of "instant money" do consider themselves above the law, especially in view of the fact that such is not the full nature and extent of the lawlessness practiced by the Federal Reserve Banks.

Most Americans are not aware of the brutal fact that in addition to their lawless practice of creating money and credit by the act of a bookkeeping entry, the Federal Reserve and National Banks exercise the ultimate prerogative of expanding and reducing the supply of money and credit in this nation. Those fiscal "experts" also indulge in manipulation of interest rates without authority therefor by law . . . sometimes for their self-styled humanitarian purpose of presuming to control inflation, etc. If a continuance of such lawless acts is to be condoned, the creators of "instant money" can any day make paupers of practically every law abiding American, among others, by the simple expedient of controlling the supply of money, credit, etc. The same money magicians who can create money out of nothing can also create, at their whim and caprice, a financial crisis in this nation which will make the financial debacle which plagued Germany in the early 1920's look like a Sunday school picnic. The price of money and the value of money are not one and the same thing . . . A carload of "printing press money" is of little or no value to a person who has not the means of transporting such money to pay for a loaf of bread. Federal Reserve Notes are printing press money.

FEDERAL RESERVE NOTES "VOID"

Undaunted by the fact that a Court and jury had judicially determined that the First National Bank of Montgomery could not lawfully create money or credit by the act of bookkeeping entry, it offered two \$1.00 Federal Reserve Notes in payment of the fee required by law to appeal from the judgment obtained against it by Mr. Daly. This "printing press money" was rejected by the Court upon the ground that it was void, among other reasons, because the sole consideration therefor was less than 1c, the cost of printing thereof: that the Notes lack a real or substantial fund for their redemption and because the portion of the U.S. Code which presumes to make such Notes legal tender was void as contravening Article 1, Section 10 of the U.S. Constitution.

Thus, it appears that Government has been permitted to become the enemy of all decent and well disposed Americans largely because Congress has surrendered the sole and exclusive power "to coin money."

Who, among the public officials of this day, undertakes to prove worthy of their forefathers by pledging their lives, their fortunes and their sacred honor in pursuit of whatever means are lawful and just in restoring to Congress "the sole and exclusive power to coin money and regulate the value thereof?"

**JUNIOR ACHIEVEMENT PROGRAM:
AN INTRODUCTION TO FREE ENTERPRISE**

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HORTON. Mr. Speaker, the vast majority of young people today are honest, enthusiastic, and conscientious.

Unfortunately, the headlines in today's news go to those seeking to disrupt our society. It is my feeling—and I am sure that many of my colleagues in the House agree with me—that more emphasis should be given to the constructive activities of young people.

In that light, I would like to share with you and my colleagues the results of one junior achievement project in Rochester, N.Y. As many of you know, there are junior achievement programs in 600 to 800 communities across the country. These programs are designed to teach teenagers about private enterprise.

Business and community leaders organize programs in cooperation with local high schools. The young people then form, operate, and finally liquidate the individual business.

An example of such an operation could be the manufacture of a toy by the youthful businessmen. The project would include designing, manufacturing, and then actually selling the product. Young people would handle all the financial aspects of the business, carefully preparing the profit-and-loss sheet and other data.

The junior achievement program demonstrates existing opportunities for young people in the business world. It also serves as a guide for schools and helps them to adapt curriculums to present-day circumstances.

One of the junior achievement projects in my district is a monthly newspaper called the Young Opinion. This newspaper is sponsored by the Gannett newspapers in Rochester. Of the 19 teenagers who put out the newspaper, 18 have won awards for exceptional performance.

An interesting sidelight is the benefit to two particular students.

One came from a very unsettled family background, did poorly in school and had very poor work habits. The student is now in a stable home. Schoolwork has improved tremendously and the student has won two free trips to junior achievement conventions because of exceptional performance.

Adult supervisors at the newspaper tell me that another youngster had no respect for the free enterprise system and was also a poor student when he started. After joining the staff of the newspaper, the student sold \$200 in advertising, applied for a college scholarship and is preparing to enter a cooperative educational program.

The Gannett newspapers have provided an outstanding public service in backing the junior achievement program. Mr. Al Mahar, Gannett director of sales, has worked closely with the Young Opinion staff and is also a member of the area junior achievement board of directors.

Mr. and Mrs. Theodore Warmbold, a husband and wife editor-reporter team for Gannett, are guiding the editorial direction of the Young Opinion. From the fresh, creative look of the newspaper, I would say they have done an extraordinary job with these young people.

Mr. J. Patrick O'Connor, chairman of the Gannett Co.'s junior achievement committee, has supervised the financial, production, and sales end of the operation.

The teenagers include Andrzej Gierczak, president; Vincent Giannantonio, vice president; Arlene Raybould, secretary; Roberta Torrance, treasurer; Patricia Pogroszewski, safety director; Nancy Berry, personnel director; Daniel Muldoon, advertising manager; and Johana Ambrose, Jeanne Barton, Carol Bojinoff, John Huber, Valerie Humnicky, Paul Miller, Robert Minges, Denis Pohl, Bill Ovellette, John Jones and James Wacht.

Mr. Speaker, I hope all of my colleagues here will join with me in wishing these young people success for their future and commending the efforts of all who helped them.

DRAFT TREATY PROHIBITING NUCLEAR AND OTHER WEAPONS FROM THE OCEAN FLOOR

HON. CORNELIUS E. GALLAGHER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. GALLAGHER. Mr. Speaker, as chairman of the International Organizations and Movements Subcommittee of the Foreign Affairs Committee and as congressional adviser to the Standing Committee on the Peaceful Uses of the Seabed and the Ocean Floor Beyond the Limits of National Jurisdiction, I applaud the action of the U.S. Government in proposing a draft treaty banning nuclear weapons and other implements of mass destruction from the ocean floor.

The draft treaty, unveiled today in Geneva, gives effect to proposals which the United States has been discussing during the past 2 years in different U.N. committees.

It constitutes a sensible and cautious first step—a very necessary step—toward the reservation of the oceans for peaceful purposes benefiting all mankind.

The United States has led the movement to make this principle operative in the domain of space; we now propose to extend it to the oceans.

I earnestly hope that the 18-Nation Disarmament Commission, meeting in Geneva, will give prompt and sympathetic consideration to the U.S. proposal.

In an age in which the threat of a nuclear holocaust has become a grim reality, we must exert every effort to extend the area of land, space, and the sea which will be denied to war-type activities.

The U.S. proposal does not jeopardize our national security; it respects the security requirements of all sovereign nations. At the same time, however, it at-

tempts to provide a better, a more secure foundation for future peace.

Contents of the treaty follows:

DRAFT TREATY PROHIBITING THE EMBLACEMENT OF NUCLEAR WEAPONS AND OTHER WEAPONS OF MASS DESTRUCTION ON THE SEABED AND OCEAN FLOOR

(Submitted by the United States at the 18-Nation Disarmament Conference in Geneva on May 22, 1969)

The States Parties to this Treaty, Recognizing the common interest of all mankind in the progress of the exploration and use of the seabed and ocean floor for peaceful purposes,

Considering that the prevention of a nuclear arms race on the seabed and ocean floor serves the interests of maintaining world peace, reduces international tensions, and strengthens friendly relations among States,

Convinced that this Treaty will further the principles and purposes of the Charter of the United Nations, in a manner consistent with the principles of international law and without infringing the freedoms of the high seas, Have Agreed as Follows:

ARTICLE I

1. Each State Party to this Treaty undertakes not to implant or emplace fixed nuclear weapons or other weapons of mass destruction or associated fixed launching platforms on, within or beneath the seabed and ocean floor beyond a narrow band, as defined in Article II of this Treaty, adjacent to the coast of any State.

2. Each State Party to the Treaty undertakes to refrain from causing, encouraging, facilitating or in any way participating in the activities prohibited by this Article.

ARTICLE II

1. For purposes of this Treaty, the outer limit of the narrow band referred to in Article I shall be measured from baselines drawn in the manner specified in paragraph 2, hereof. The width of the narrow band shall be three (3) miles.

2. Blank (Baselines).

3. Nothing in this Treaty shall be interpreted as prejudicing the position of any State Party with respect to rights or claims which such State Party may assert, or with respect to recognition or non-recognition of rights or claims asserted by any other state, relating to territorial or other contiguous seas or to the seabed and ocean floor.

ARTICLE III

1. In order to promote the objectives and ensure the observance of the provisions of this Treaty, the Parties to the Treaty shall remain free to observe activities of other States on the seabed and ocean floor, without interfering with such activities or otherwise infringing rights recognized under international law including the freedoms of the high seas. In the event that such observation does not in any particular case suffice to eliminate questions regarding fulfillment of the provisions of this treaty, parties undertake to consult and to cooperate in endeavoring to resolve the questions.

2. At the review conference provided for in Article V, consideration shall be given to whether any additional rights or procedures of verification should be established by amendment to this treaty.

ARTICLE IV

Any State Party to the Treaty may propose amendments to this Treaty. Amendments shall enter into force for each State Party to the Treaty accepting the amendments upon their acceptance by a majority of the States Parties to the Treaty and thereafter for each remaining State Party on the date of acceptance by it.

ARTICLE V

Five years after the entry into force of this Treaty, a conference of Parties to the Treaty

shall be held in Geneva, Switzerland, in order to review the operation of this Treaty with a view to assuring that the purposes of the Preamble and the provisions of the Treaty are being realized. Such review shall take into account any relevant technological developments. The review conference shall determine in accordance with the views of a majority of those Parties attending whether and when an additional review conference shall be convened.

ARTICLE VI

Each Party shall in exercising its national sovereignty have the right to withdraw from this Treaty if it decides that extraordinary events, related to the subject matter of this Treaty, have jeopardized the supreme interests of its Country. It shall give notice of such withdrawal to all other Parties to the Treaty and to the United Nations Security Council three months in advance. Such notice shall include a statement of the extraordinary events it regards as having jeopardized its supreme interests.

ARTICLE VII AND VIII

Blank (administrative provisions).

GET YOUR OWN HOUSE IN ORDER

HON. ALBERT W. WATSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1969

Mr. WATSON. Mr. Speaker, during the incredibly ridiculous New York subway strike several years ago as well as in the case of numerous other strikes which plague New York City constantly, I do not recall any Member of the South Carolina congressional delegation calling upon the President to intervene. Somehow, these strikes seemed to be a matter for the State of New York to settle, or at least attempt to settle.

However, I suppose it is just asking too much to expect some of our colleagues from the State of New York to reciprocate for this common courtesy and decent way of doing things. Frustrated with their own lack of success at being able to resolve the complex problems of "Fun City," they now are turning to the sovereign State of South Carolina in an attempt to inject themselves into the internal affairs of my State.

Yes, Mr. Speaker, it was very interesting to note that of the 26 Members of the House who asked the President to intervene in the Charleston, S.C., hospital workers strike, 13 of them were from New York City. In addition, they were joined by the two Senators from New York, who themselves were among 17 Senators also asking the President to intervene.

Mr. Speaker, it never ceases to amaze me how far sheer hypocrisy can go. In the case of these House and Senate Members shoving themselves into a matter that in no way concerns them, hypocrisy has gone about as far as it can go. In every State represented by these gentlemen I can point to any number of critical State problems which, by comparison, make the Charleston situation seem like a Sunday school picnic. Nevertheless, I believe that these States can resolve their problems without any interference from me.

Now, instead of calling upon the President to step in and settle the strike, these gentlemen should have called upon national union leaders to abandon their attempts to violate the law and public policy of the State of South Carolina. Of course, this would be asking too much. After all, labor laws have been violated so much in other areas, especially New York City, until I am certain these gentlemen inadvertently forgot that they ever existed.

But, the very least these gentlemen could have done is publicly denounce strike leader Leon Julius Davis, the president of Local 1199 of the Drug and Hospital Employees Union. Surely, they must have known of the Communist activities of Mr. Davis. Perhaps I can refresh their memory. In 1938, Davis was the signer of a Communist Party petition to place a candidate on the Communist Party ballot. Later, while testifying before the House Committee on Education and Labor, he conveniently invoked the first and fifth amendments when asked if he was or had been a member of the Communist Party. The list of Communist and pro-Communist activities by Davis is virtually endless. However, for the benefit of my New York colleagues who may have a short memory, this is the same Leon Julius Davis who in 1960 was characterized by the Greater New York Hospital Association in a public statement as a "ruthless man using the sick and suffering as hostages in an attempt to set himself up as a dictator in our voluntary, nonprofit hospitals." The Hospital Association had ample reason to issue their statement. After all, Davis almost put them out of business because of illegal strikes, demonstrations, and outright violence.

Mr. Speaker, down my way a man—if he is a man—does not throw rocks at the neighbor's dog unless he has first locked up his own dog. Possibly the dog pounds in New York City are run very efficiently. If they are, it is the only thing there that comes to mind. So, if it is not asking too much of these gentlemen who have all the solutions for South Carolina, go home and get your own house in order, then come back and dictate to us. But, until you do, both the people of South Carolina and the people of your areas would be a lot better off if you would just hold your tongue.

Mr. Speaker, as a part of my remarks I would like to include the following two editorials from the Columbia Record, Columbia, S.C., which point out some very interesting facts that should be considered by our colleagues who have been so quick to meddle in the affairs of my State:

[From the Columbia (S.C.) Record, May 7, 1969]

CHARLESTON AND LABOR LAWS

Those 26 liberal Democratic Congressmen who asked President Nixon to intervene in the Charleston strike of hospital workers included a sizable number of lawyers. But you'd never know it from their crisp capsulization of labor law in their open letter introduced on the House floor.

Indeed, so faulty is their argument that one wonders whether their law degrees shouldn't be recalled by their institutions. Not only do they misstate the facts of the Charleston argument but they fallaciously

interpret the Wagner Act and all subsequent history about relations between government as employer and public employees.

While the legal complications vary immensely from state to state, some facts of law are incontestable. The Wagner Act did not, as the Congressmen assert, make it clear that collective bargaining should extend into government as employer. Quite the contrary. (Perhaps the fact that exactly half, or 13, of the Congressmen come from union-dominated, strike-crippled New York City conditioned their thought.)

The facts are these: no one can prevent public employees from forming a union. Governor McNair has made this essential element clear in his several statements.

A second fact is equally important: no court can at present order governmental units to bargain or make contracts with public employee unions, except in those states with express provisions therefor.

A Federal court in North Carolina recently sustained these two elements of law. Additionally, the Court upheld the state law which forbids local or state governmental units from doing business with public employee unions. "There is nothing in the U.S. Constitution which entitles one to have a contract with another who does not want it."

Space does not permit extended review of government-organized labor problems, but it should be noted that differentiation can be made between three groups of civil employees: federal, state and local.

Also, it should be noted that a section of the Taft-Hartley Act of 1947 made the ban on strikes by federal workers explicit: "It shall be unlawful for any individual employed by the U.S. or any agency thereof, including wholly owned government corporations, to participate in any strike. Any individual . . . who strikes shall be discharged immediately from his employment, and shall forfeit his civil service status, if any, and shall not be eligible for re-employment for three years." This provision was replaced on August 9, 1955, by a new and stronger substitute which made it a felony, punishable by a year's imprisonment and a fine of \$1,000 for a federal employee to strike or assert the right to strike, or knowingly to maintain membership in an organization asserting that right.

Some states recognize public employee unions, but forbid them to strike. Other states do not recognize employee unions. Of those which do, at least 15 states have laws expressly forbidding strikes by these employees—but the laws have been ineffective.

In 1967 the New York legislature replaced its Condon-Wadlin law with the Taylor Law. But even the Taylor law was ignored, prompting New York State Supreme Court Justice Emilio Nunez to remark: "This (teachers') strike by a powerful union against the public was a rebellion against the government; if permitted to succeed, it would eventually destroy the government, with resultant anarchy and chaos." The judge simply echoed what Presidents Calvin Coolidge and Woodrow Wilson had said previously.

On March 7 of this year, the New York legislature revised the Taylor law, effective the first of last month. Courts may now impose unlimited fines on striking government unions, suspend indefinitely dues check-offs and impose mandatory penalties on individual strikers. Each public employee who strikes will lose two days' pay for every day on strike, will be placed on probation for one year and lose all seniority.

The Advisory Committee on State Employment Relations (of the Council of State Governments) is engaged in a comprehensive examination of changing relationships between the government as an employer and its employees. Its findings will certainly sustain the right of any state to recognize, or not to recognize, public employee unions in a bargaining process.

In the interim, it should be understood

that the Charleston confrontation is more a well-financed, sustained assault on the state of South Carolina's position vis-a-vis public employee unions and less a racial matter. Pacific settlement short of union recognition is realistic and attainable. The pity is that the Charleston workers naively chose to move in the very year that, at long last, a state employee classification system was scheduled to be enacted—meeting at least the salary upgrading desired by the hospital personnel. To strike to attain a union that—in the history of America labor relations—is technically and legally not allowed to strike is a basic absurdity.

[From the Columbia (S.C.) Record,
May 19, 1969]

PROJECTS FOR 17 SENATORS

Seventeen U.S. Senators, with profound expertise in the subtleties of the complex Charleston hospital strike that we did not know they possessed, have asked President Nixon to dispatch a mediator to South Carolina. They did so, they said, "because the importance of the dispute so clearly transcends the boundaries of Charleston, and even South Carolina." They added: "We believe the national interest demands efforts at the federal level to help resolve the impasse."

Interesting. Each of the 17, logically, subscribes to the doctrine that (a) internal affairs of a sovereign state, when they involve "the national interest," should be attended to by the federal Executive, and (b) "strategies of social change" should be non-violent.

All right. The assumptions being accepted, then let us suggest that Senators Thurmond and Hollings chat with their 17 colleagues about the dispatch of federal Executive representatives to each of the their states to help resolve problems that transcend the boundaries of their states and involve "the national interest."

The 17 are Senators Walter Mondale of Minnesota, Jacob Javits, and Charles Goodell of New York, Alan Cranston of California, Thomas Dodd of Connecticut, Fred Harris of Oklahoma, Philip Hart of Michigan, Edward Kennedy and Edward Brooke of Massachusetts, George McGovern of South Dakota, Gaylord Nelson of Wisconsin, Hugh Scott of Pennsylvania, Harrison Williams of New Hampshire, Ralph Yarborough of Texas, Stephen Young of Ohio, and Clifford Case of New Jersey.

Let us consider what the President could do to intervene in affairs of these states that concern the "national interest," transcending their boundaries:

Michigan—Desperate poverty of the Upper Michigan peninsula has not been solved by Senator Hart or the state; black unionists of the United Automobile Workers are rejecting UAW leadership as "discriminatory"; and Michigan's hegemony over U.S. automaking clearly needs in-depth surveillance.

New York City—Permanent offices of almost all Federal agencies are required to control mass corruption in dispensation of federal funds; permanent mediators should be present to help resolve the city's "a-strike-a-day" problems; and HEW must investigate the continuous violence in the city's schools. Surely Javits and Goodell would appreciate President Nixon's help.

Texas—Both federal and foundation funds are being used to create hatred among Mexican-Americans; braceros from Mexico and farmers of Mexico are being starved to death along the border by concerted action of organized American labor.

Oklahoma—A full-scale investigation of oil depletion allowances, on the spot, is an ancient requirement.

South Dakota—Rights of Indian-Americans consistently have been ignored and deserve on-the-spot mediation and improvement.

Massachusetts—The "one-man, one-vote"

philosophy of participatory democracy consistently has been ignored by the notoriously corrupt political structure of Massachusetts, an erosion of fundamental civil rights injurious to the "national interest"; and a full-scale inquiry of organized crime is obligatory.

Pennsylvania—Neither social welfare objectives of state or federal agencies are being met, with constant thwarting by Harrisburg; the City of Brotherly Love remains, in many aspects, a city of arrogant discrimination—particularly in building-trade unions.

New Jersey—Criminal influences upon the political system have been, and are, arrogant; open housing ordinances are ignored despite the best efforts of civil rights groups and ministerial organizations; and an inquiry into automobile insurance in the state should be welcome.

California—An objective inquiry into complaints of non-unionized grape-growers and workers, including violence against non-unionists, is mandatory; and several score of mediators should be placed on all state college campuses for an indefinite time.

Ohio—Mayor Carl Stokes complains that the Nixon administration isn't seriously interested in the nation's major cities and a team of government officials ought to probe deeply into what has been done and not done in Cleveland and elsewhere—and why.

Wisconsin—A very fundamental civil right of Americans to "freedom of worship" has been violently abused by individuals disrupting Sunday worship services in Milwaukee.

The list is far from complete and quite frankly comes "from the top of the head." Unquestionably, some even more important problems transcending the boundaries of these states and clearly involving the "national interest" have been overlooked. But we are certain that the 17 Senators, all being gentlemen of honor with abiding concern for their own constituents, will ask President Nixon to dispatch the necessary investigative and meditative crews to their states.

At least, we think we are certain. Senators Hollings and Thurmond might do a little checking.

CASUAL REFERENCES TO BOYS' CLUBS HARM IMAGE OF "BOYS' CLUBS OF AMERICA"

HON. FRED B. ROONEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ROONEY of Pennsylvania. Mr. Speaker, Boys' Clubs of America is a congressionally chartered, nationwide, citizens-supported, volunteer organization of over 830 Boys' Clubs serving close to 900,000 boys 6 through 18 years of age. Mr. A. L. Cole of the Reader's Digest has recently succeeded President Nixon as chairman of the national board. President Nixon is now honorary chairman of the organization.

Boys' Clubs of America is the only national, nonsectarian, all-boy, very low dues, building centered, full-time professionally staffed organization with a varied and diversified program which provides continuous informal guidance to all of its members on a daily basis.

Boys' Clubs are open to all boys regardless of race, color, background, or social or economic status. The same applies to professional staffs and volunteer workers.

Historically and currently Boys' Clubs

have a special interest in the disadvantaged boy usually not served by national youth organizations. Since a large percentage of Boys' Clubs are in the ghettos and since 34 percent of the boys are on the poverty level and another large number are near it, Boys' Clubs try very hard to reach the unreached, serve the unserved, motivate the unmotivated, and teach the untaught through programs of recreation, guidance, camping, health services, job counseling and placement, and family counseling to name a few.

Boys' Clubs are in their second century of service in building juvenile decency through programs aimed at promoting the health, social, educational, vocational, and character development of boys.

Unfortunately, there are many groups and organizations in this country which also call themselves Boys' Clubs but are in no way related to or affiliated with Boys' Clubs of America. In most instances these so-called "Boys' Clubs" are limited in scope and purpose. Thousands of athletic groups such as Little League and others call themselves "Boys' Clubs." Any group of boys banding together in their neighborhood can call themselves a "Boys' Club." Although many of these "Boys' Clubs" do provide some constructive activity, the program is seldom if ever as comprehensive in the total development of boys as that of Boys' Clubs of America.

More seriously, some organizations which have doubtful motives are operating under the guise of "Boys' Clubs."

One such example is that of the Boys' Club of Lexington, Ky., which has incorporated as a Boys' Club in the State of Kentucky but whose program and scope is questionable. They are currently under investigation by the House Banking and Currency Committee for tax gimmickry. This club does not have a building or a comprehensive program but as far as we know provides some scholarships to boys in Lexington. It also has a holding interest in a bank and possibly in a group of banks. Equally harmful is the confusion of identity resulting from newscasts about the "DuBois Club," a Communist Party group.

Derogatory publicity by these and other so-called "Boys' Club" organizations does not help the cause of Boys' Clubs of America. Boys' Clubs of America is vulnerable since it cannot control the use of the words "Boys' Clubs." It is difficult to convince the public that some of the less desirable types of Boys' Clubs are not the same kind of organizations as those affiliated with Boys' Clubs of America.

It is important that every opportunity be utilized to interpret the difference between a bona fide Boys' Club affiliated with Boys' Clubs of America and other "Boys' Clubs" in a community. Regular affiliated Boys' Clubs are normally members of a local Chest or United Fund and have a representative, high caliber board of directors responsible for the policy and operation of the Boys' Club. They have buildings, facilities, and camps and are operated by professionally trained workers. They provide a daily program of activities and services which are diversified and wide enough in scope to meet the in-

clination, interest and need of every boy in the community. Boys' Clubs of America affiliates are allowed to use the official Boys' Club keystone insignia on their buildings and stationery.

FATHER ROMAGNO AT 75—CALM WILL COME AND THE FACTS WILL TALK

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HOWARD. Mr. Speaker, on Saturday, May 24, 1969, the Reverend Marcellino Romagno, O.Ss. T., pastor of Mount Carmel Roman Catholic Church in Asbury Park, N.J., will celebrate the 50th anniversary of his ordination. He will be honored at a dinner in the Berkeley-Carteret Hotel, Asbury Park.

Father Romagno has made an outstanding contribution to his church and to Monmouth County and he has served as an inspiration to thousands of persons. Father Romagno married my wife, Marlene, and me so we have both had the pleasure of knowing him for some time.

Mr. Speaker, the Asbury Park Press recently published an article on Father Romagno which I found most inspiring. I know that my many colleagues in the House of Representatives will be interested in reading this article about a fine man and at this time I place that story in the RECORD:

[From the Asbury Park Sunday Press, Mar. 30, 1969]

FATHER ROMAGNO AT 75—CALM WILL COME AND THE FACTS WILL TALK

(By Ed Reiter)

ASBURY PARK.—There have been many milestones along the priestly path of the Rev. Marcellino Romagno, O.Ss.T.

And as the path grows longer, the milestones seem to grow larger.

Last year Father Romagno marked his 30th anniversary as pastor of Our Lady of Mt. Carmel Roman Catholic Church.

Earlier this month, he celebrated his 75th birthday.

And now he is preparing for an observance that looms as the largest milestone yet: The 50th anniversary of his ordination to the priesthood.

It was on July 13, 1919, that John Michael Romagno, third of 10 children in a "simple, struggling" Italian family, took his final religious vows and assumed the name "Father Marcellino" as a member of the Order of the Most Holy Trinity.

As he approaches his golden jubilee, Father Romagno—a short, portly man with an air of quiet dignity—has only happy memories of the last half century.

"I have pleasant remembrances," he says, speaking with a soft Italian accent, "and I do not regret that I chose this kind of life. If someone would ask me if I would start all over again, I would say, 'Yes, I would.'"

The life that he chose actually was that of a missionary priest. The Trinitarian Order sent him to the United States from Italy in 1921 to work in its American missions.

He served at St. Ann's Church in Bristol, Pa., for 17 years—eight of them as pastor—before coming here.

Even today Mt. Carmel technically is a

missionary church, designed to serve Americans of Italian extraction.

"Today, we have all different nationalities in our parish, on account of intermarriages," Father Romagno notes.

"But we still have the privilege of a national parish. That is, those of Italian extraction can still belong here, even if this is not the closest church."

There are some 900 families in the parish now—twice as many as there were in 1938 when he became the pastor. And many of them live in other towns, notably Neptune and Ocean Township.

The parish has acquired more than just new members during the last 31 years. It has gained a whole complex of new buildings, including its present church, at Asbury avenue and Pine street (completed in 1951); its rectory (built in 1955), and its 12-classroom school and convent (dedicated in 1963).

Nor is Father Romagno through with his building program.

He's had plans drawn up for a youth center and gymnasium, and he hopes to have it built this summer.

"The people are surprised that at my age I undertook another heavy task," he relates. "But I felt I was able to do it, and knowing the kindness and generosity of the congregation I started with full confidence."

"The youth should be kept busy all the time," he adds. "They should get tired, so that when they go home they go to sleep. We are building this youth center so they can enjoy themselves and keep away from doing wrong things in the streets."

Amid all the growth of the parish, the pastor has made it his business to know his people personally.

"I know the children, parents, and grandparents," he says. "In 31 years so many have died, been born, and been married."

"In all this time I have always been interested in keeping the families together, giving them some kind of attraction toward the church."

The winds of change within the Catholic church have made the job of the priest more difficult in recent years, Father Romagno admits. He views them, however, without alarm.

"There are many changes that now seem to disturb our minds," he remarks, "but eventually they will do us a lot of good."

"Years ago the people had simple faith, but now we must work in the minds of the people and put the doctrine in different ways. Eventually all the doubts will be cleared up."

"You wait: In 10 or 15 more years the calm will come and the facts will talk. The church will not be destroyed, just purified."

He regards the use of English in the Mass as one example of a change for the better.

"The people did not understand anything in Latin," he says. "Now they attend Holy Mass more effectually and more diligently."

"It was very hard for me in the beginning because of my age, but I willingly accept the changes which the church has made."

Despite his age, he takes an understanding attitude toward younger priests who have forsaken the priesthood because their consciences came into conflict with church regulations.

"We must admire the younger priest today," he declares. "It's very hard to be a priest today. People's minds are all confused with this new ecumenical teaching, and they want to follow their own way, their own conscience."

"Many priests give up the priesthood because they think they can do better in the world. This turmoil happened before, at the time of the Reformation. But the calm came then, later on, and so it will come now, too."

Father Romagno is one of two priests in his own immediate family. His younger brother, the Rev. Michael Romagno, is pastor of a church in Senandoah, Pa.

His own aspiration is "to stay here as long as possible, as long as my mind is clear and I have my health."

"I feel better now than I did 30 years ago," he says. "But a person my age can't foresee so well 10, 15 or 20 years. I must live day by day, year by year."

"When the good Lord will say, 'That's enough, that's all,' I must go and someone else will continue the work of God."

"I'm not indispensable. One pope dies, another one comes. And so it is in the parish: Father Marcellino dies, another pastor comes. The church will go on."

In the meantime, he'll stay on the job. "I enjoy my work," he remarks.

And does he hope to mark his diamond jubilee 25 years hence?

"That," he says, "is up to the Boss."

THE UNIVERSITY OF CALIFORNIA AT LOS ANGELES CELEBRATES ITS GOLDEN ANNIVERSARY

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. CORMAN. Mr. Speaker, the University of California at Los Angeles this week celebrates its golden anniversary. I warmly congratulate the university, its administration, and its student body on this momentous occasion. Not only as an alumnus of the university, but as one who has profited all his life from the high quality of education received at UCLA, do I participate in the well-deserved tributes that are being heaped upon this great institution during this week.

UCLA has a proud record to look back on since it opened its doors in 1919 as the southern branch of the University of California. In 1919, 1,250 students were enrolled. Today, almost 28,000 students are on campus daily; another 80,000 or so are registered in evening extension courses. UCLA is known as one of the very finest universities in the world. It has excelled in scholarship and in athletics. Its alumni have received fame and recognition in many fields of endeavor. Let me cite a few of the men and women UCLA has graduated: Dr. Ralph Bunche, Nobel Peace Prize winner; Dr. Glenn T. Seaborg, Chairman of the U.S. Atomic Energy Commission and Nobel Laureate in Chemistry; Agnes DeMille, famous choreographer; Jerome Hines, Metropolitan star; Jackie Robinson, the first Negro to play professional baseball; Louis Banks, managing editor of Fortune magazine; Rafer Johnson, Olympic decathlon winner; Dr. Walto Lyon, scientist who charted the first voyage of the U.S.S. *Nautilus* under the North Pole.

Indeed, UCLA is one of the finest in academia. The energy, integrity, the learning concepts, the hopes and aspirations of its faculty and student body have made it so. In a great measure, its achievements have been possible because of the unusual and prized system of free university education that the State of California has established for its citizens. The State's willingness to invest in the future of its citizens has contributed greatly to the exceptional institution that today is UCLA.

I am not unmindful that the problems which exist at many universities also exist on some of California's campuses, and that these unresolved problems must be solved if academic growth is to continue. Education at all levels is still the most meaningful opportunity this country can offer to its young people. This is especially true of higher education, because from that point, young people become this Nation's leaders—its doctors, scientists, businessmen; its educator, its artists, its writers, its politicians, and its statesmen—or whatever field of endeavor a young person wishes to pursue.

UCLA has extraordinary gifts to offer to these young people to prepare them for their place in society. UCLA's students will—and must—continue to be enriched in mind and in spirit, with freedom to learn and to create on the highest intellectual plane, without which this Nation will become a wasteland.

The university needs only to remember its past 50 years of accomplishments—through wars, depressions, and other times of great social change, to be able to look confidently toward an even greater future.

UCLA will continue to grow. Its influence will continue to be felt, and it will continue to be one of the best in academia.

MARITIME DAY

HON. JACOB H. GILBERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. GILBERT. Mr. Speaker, on this observance of Maritime Day, it would be well if we were to dedicate ourselves to actions in this Congress to bring a new sense of hope to those who operate and man our merchant marine—to the development of a program that will lead to a new era of construction of American vessels and an enlargement of the amount of cargo carried aboard these American vessels.

As we survey the disarray of our merchant marine fortunes on Maritime Day 1969 it must be obvious to all of us, Mr. Speaker, that we need a realistic program to properly carry out the provisions of the Merchant Marine Act of 1936 so that the maritime industry may prosper instead of continuing to suffer. What is urgently needed is a sweeping program that will lead our ailing fleet to reconstruction and recovery.

A strong merchant marine is vital to U.S. prestige and potency as a seapower and should be commensurate with the U.S. status as a leading world power.

A strong merchant marine provides direct economic benefits for shipowners, shipbuilders and shipworkers, and indirectly benefits every other segment of our economy by serving the commercial needs of the Nation and the world.

A strong merchant marine provides an important means for redressing the deficit in our balance of payments, because to the extent that our imports and exports move in foreign vessels we add to the deficit, and to the extent that they

move in American vessels we contribute toward an eventual surplus.

In short, Mr. Speaker, there are many reasons for having a strong merchant marine. Yet we have ignored these facts and allowed our fleet to practically diminish—and this is regrettable. I would hope, therefore, that we can move forward from this Maritime Day toward a new era of maritime strength.

NORWEGIAN INDEPENDENCE DAY

HON. JOHN J. ROONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ROONEY of New York. Mr. Speaker, this week many of us have had an opportunity to share with our admired Norwegian American friends in their celebration of Norwegian Independence Day.

These observances are a poignant reminder that 155 years ago the people of Norway were jubilant over the adoption of their new Constitution and its farsighted assurances of rights and privileges for them and for the subsequent generations to come.

It is no wonder that American citizens of Norwegian birth or extraction place the celebration of Norwegian Independence second only to our own American Independence Day. It is no wonder that these patriotic citizens who have consistently demonstrated their loyalty to this country, its flag, its laws, and its people pay such fervid tribute to their erstwhile homeland and the Constitution which their forebears adopted over a century and a half ago.

This noble and historic document came into being only after the most astute statesmen and proficient legal minds took from our Declaration of Independence and from the provisions for assuring personal freedom emanating from the French Revolution the best statements and principles which they wove into their own historically sound legal structure—a structure so sound and so far seeing that only a relatively few amendments have been required since its adoption on May 17, 1814.

With this magnificent background of independence both in theory and in practice, the people who left Norway to come to the United States brought an attitude of mind and a dedication of purpose wholly consonant with that of the pioneering people of this country.

No element among the races and nationalities who have migrated to our shores in the almost 200 years of its independent existence have made a more significant or lasting contribution to this Nation than those who came here from Norway. It is with both pride and appreciation that we acknowledge their signal influence on our westward expansion. It is with similar pride and gratitude that we acknowledge their great contribution to bringing to this country so many who pioneered and helped to expand this country's important maritime role.

Mr. Speaker, all America can be grate-

ful for what these God-fearing, law-abiding, and hard-working people have done to help build America into its present greatness. No group of new Americans has so quickly been blended and absorbed into the so-called American way than have these descendants of the Vikings. However, no group has been more capable of preserving the joyful customs and wholesome reminders of their forebears. Every American of Norwegian birth or extraction can be proud of his lineage and can be proud of what his people have done to make this country great.

Every American of whatever lineage can be proud of his fellow citizens who celebrate Norwegian independence, and every American can be grateful for what these fine people have done for him personally.

I congratulate once more these friends and neighbors who honor Norway's great constitution and who pay tribute to a country whose love for freedom and justice to all mankind has never wavered.

THE TACTICS OF TERROR IN VIETNAM

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ASHBROOK. Mr. Speaker, one aspect of the war in South Vietnam which has been either overlooked or ignored in some quarters is the extent to which civilians of South Vietnam have suffered at the hands of the Vietcong and North Vietnamese Communists. It is ironic, when one considers the propaganda war being waged by those who are against the U.S. effort in that beleaguered country, that full disclosure of the terror employed against these people is not given wider and regular publicity. When the U.S. presence in Vietnam is in defense of the South Vietnamese people in their fight to preserve their liberty against Ho Chi Minh, what better justification for our policy can we have than the brutal and widespread killings to which these free people are subjected? It is again ironic that attention is given to the fair packaging issue in order to insure that the housewife gets the proper quantity in a box of raisins, but the same housewife can lose a husband or a son in Vietnam and the cause for which he died is allowed to be buried in a welter of left-wing propaganda. The most simple yet eloquently compelling argument for our being in Vietnam—the protection of the lives of innocent people—goes virtually ignored in many circles. Just let five towns in any given State in our Nation suffer the loss by murder of a mayor, or a policeman, or a civil servant, or a teacher, or any other local leader at the hands of a group whose official policy is terror, and the people would be up in arms—and rightfully and fortunately so. But let literally thousands of village and hamlet chiefs, civil servants, policemen, schoolteachers and other village leaders

be dispatched to their graves over a period of 10 years or more in South Vietnam, by the same inhuman methods and motivated by the same godless philosophy which has snuffed out literally millions of lives throughout the world in the last 50 years, and this slaughter is matter-of-factly noted and forgotten.

One publication which has consistently put proper emphasis on Communist inhumanity to man in South Vietnam is the *National Observer*. One of its correspondents, Peter T. Chew, writing from Saigon, reports on the upsurge in terror in South Vietnam since the beginning of this year. It is indeed tragic that similar extensive articles on this issue do not appear day in and day out, month after month, to drive home to the American people the deliberately inflicted and policy-directed sufferings perpetrated by the enemy in that yet free land.

Accompanying Mr. Chew's article is a picture of a burial scene in South Vietnam which has been repeated thousands of times over the years. This particular picture is similar to others which were published in the weekly magazine, *National Review*, some months ago and which had been obtained from the Defense Department. The title of the *National Review* photo story was: "Vietnam—The Photographs We're Never Asked for."

The lead paragraph explained:

When *National Review* approached the Pentagon to secure photos of Vietcong atrocities, an official said, "You're the first people who ever asked for these." The photos on these four pages are clear—and, we know, sickening—evidence of atrocities outlawed by all laws of war, which have left Vietnam covered with butchered and desecrated corpses.

Under unanimous consent, I shall submit the article, "The Tactics of Terror in Vietnam—Viet Cong Strikes by Scalpel," by Peter T. Chew, and appearing in the May 19, 1969, issue of the *National Observer* for inclusion in the CONGRESSIONAL RECORD, as follows:

VIETCONG STRIKES BY SCALPEL—THE TACTICS OF TERROR IN VIETNAM
(By Peter T. Chew)

SAIGON.—With both sides pressing peace initiatives, why has the National Liberation Front (NLF) intensified its campaign of terror against South Vietnamese civilians?

Since the first of the year, some 3,000 non-combatants have been assassinated, or have otherwise lost their lives as the result of mounting terrorist activity. In recent weeks—in apparent celebration of Ho Chi Minh's 79th birthday on May 19—terrorist incidents have assumed an especially ghastly quality. Furthermore, the trend is expected to continue in the weeks ahead, President Nixon's peace overture notwithstanding.

There is no single, clear-cut answer. But psychological-warfare specialists say that important clues can be found by careful study of the daily "Roundup of Communist Terrorist Activities" issued by the Vietnamese national police here every evening. Written in chillingly understated prose—"A VC team entered Xom Lang Hamlet, Go Cong Province, took a woman named Phan Thi Tri, aged 33, from her home to a rice field 50 meters away and killed her by cutting her neck with a machete"—the roundup puts one in mind of a stock market of death which is analyzed for information concerning the enemy's strengths, weaknesses, and intentions.

WATCHING THE COMPUTERS

"When the computers show, for example, a sharp increase in Viet Cong abductions of villagers in a sector of a province," says a U.S. Government authority, "it is an almost certain bet that we can soon look for a Viet Cong attack in that neighborhood because the villagers have been impressed into service as porters."

Most authorities agree that terrorism is a weapon of the weak, and that this rule of thumb can be applied to the Viet Cong at the present time, decimated as their ranks have been in combat. This is especially true in the Mekong Delta, where North Vietnamese Army (NVA) troops were reported on the move last week for the first time in the traditional Viet Cong stronghold.

As a result of this attrition, the burden of fighting shifted almost completely last year from the Viet Cong to the NVA. The VC were, in a sense, shunted aside. Consequently, they lost face with their allies and with the South Vietnamese people whom they seek to subjugate. They began to lose the momentum that a revolution must maintain in order to succeed.

"The hard fact is that the National Liberation Front is trying to fudge over its impotence," says Douglas Pike, author of the recently published *War, Peace, and the Viet-Cong*, who is considered one of the foremost authorities on the NLF; he served here for nine years with U.S. Government agencies studying the enemy's political and military structure.

DRAWING ATTENTION TO THEMSELVES

"The Viet Cong can't raise the troops to do the job, so this terrorism, this rocketing of market places and the like, is a way of drawing attention to themselves on the cheap. They almost seem to be saying: 'Yes, there is talk of peace, but we still count; we are still potent.' It's as though they were afraid that the North Vietnamese will forget to invite them to the final peace settlement."

Other reasons for the terrorism are put forward. With the incessant talk of U.S. troop withdrawals, and Washington's fervent desire for peace, the Viet Cong are passing the word, as they have done before, that the United States plans to "sell out" the government of Vietnam (GVN). By demonstrating that Viet Cong assassination squads, grenade tossers, and mortar crews can strike almost at will, the enemy is saying to the South Vietnamese: "You had better come over to our side before it is too late."

In Saigon during last year's Tet offensive, the Viet Cong started a similar rumor with considerable success, according to a Rand Corp. survey taken after the fighting had ended.

"As variously spun out," says the report, "the rumor was often based on suspicions or fears that the U.S. Government had recently decided that it should pull out of Vietnam. This was considered plausible because of the past record of official U.S. pressure on the government of Vietnam to accept the National Liberation Front as negotiating partner, the existence of factions within the American political scene which favored a Viet Cong [Saigon] coalition government in South Vietnam, the enormous cost of the war to the United States in terms of men, material, and domestic morale. . . ."

RUMOR OF A SECRET MEETING

Thus the story spread through Saigon that the United States had met secretly with the Viet Cong and had agreed to allow them to attack the city, so weakening the government of Vietnam that "the United States would have an excuse to begin negotiations, to form a coalition government in Saigon, and to withdraw American troops in short order."

Ironically, the peace negotiations are credited, indirectly, with the increase in Viet Cong terrorist activity. Anxious to control as much of the population as possible when

peace does come, the government of Vietnam, with U.S. assistance and encouragement, began an "accelerated" pacification program late last year, a program that has met with considerable success. To counter this drive, the Viet Cong accelerated their time-tested terror tactics, which, by conservative estimate, have resulted in the deaths of more than 20,000 civilians and the wounding of twice that number since 1957. Their targets were the same as always: the village and hamlet chiefs, civil servants, policemen, schoolteachers, natural leaders of all kinds, self-defense forces, people in the employ of the Americans.

"They are particularly anxious to keep the schools closed," says a U.S. military man. "Not long ago they stopped a school bus and told the children not to go to school. When the children's parents allowed them to continue school, they stopped the bus again the next week, took a little girl off the bus, and cut her fingers off. The school has been closed ever since."

Last week, U.S. officials, who were busy setting the stage in Washington, Paris, and Saigon for President Nixon's Vietnam speech, found the Viet Cong terrorism difficult to ignore. By way of welcoming Secretary of State William P. Rogers to Saigon, the Viet Cong rocketed the runway of Tan Son Nhut Airport the day before his arrival for conferences with President Thieu.

"The indiscriminate and senseless killing and wounding of civilians in their homes and in the streets only raises questions about the intentions of the other side," said Mr. Rogers. "Symbolic acts of terrorism like those that took place in a number of cities in South Vietnam as recently as yesterday do not reinforce the hope of a settlement."

At first glimpse, much of the killing that has been taking place in recent weeks has appeared to be indiscriminate and senseless. Upon closer examination, however, most of the killing had a specific purpose, was not always indiscriminate, and, to the Viet Cong at least, was anything but senseless.

READING THE MESSAGE

Because it is so difficult to terrorize people in the mass—as, for example, Stalin was able to do with his purges—terrorism is more often employed as a scalpel. Hence there is invariably a carefully conceived reason for each attack. Sometimes the reason is quite obvious; sometimes it is incomprehensible to all but the person or persons to whom the "message" is directed.

Take some recent incidents. The other day, a terrorist threw a hand grenade into the yard of Adm. Eimo R. Zumwalt, commander of U.S. Naval Forces, Vietnam. One of the principal uses of terrorism is to gain publicity, and to boost the morale of one's followers. Names make news, and even though no one was harmed in the attack, the attempt was a major news item.

"It might not even have been as complicated as that," says one analyst of the daily terrorism roundup. "The attack was carried out in such an amateurish fashion that it could have been a disgruntled Vietnamese civilian employe of the Navy."

Early one morning, a terrorist tossed a hand grenade into the government's central post office and telegraph office opposite Saigon Cathedral, just a few blocks from the Caravelle and Continental Palace hotels, in the very heart of downtown Saigon. Why? Again, an attack on such an installation is newsworthy and conveys, momentarily at least, the impression that the Viet Cong is ubiquitous. Moreover, the Viet Cong constantly urge the citizenry to stay away from such government installations. The grenade was a reminder.

DEATH ON A CHOLON BUS

Two women terrorists boarded a bus in Cholon, the working-class and Chinese section of the city, shot the driver, and set fire

to the vehicle, the driver and a passenger perishing in the flames. Senseless? Probably not, in the Viet Cong view.

"The bus was probably owned by a Chinese businessman," says the analyst. "Now every commercial vehicle moving on the roads in Vietnam pays 'taxes' to the VC or to crooks who claim they are VC. The Chinese are pretty foxy; the businessman probably tried to get out of paying off."

Adding to the terror mix are straight forward attacks upon targets such as police stations and military installations in which innocent bystanders are inevitably killed and wounded. Terrorists casually wheeled a cart up to a police station in Cholon at midday last week and fled when suspicious policemen approached. Seconds later, a 40-pound explosive in the cart ripped through the police station, killing one woman and wounding 26 bystanders.

Another nervy terror squad was surprised in the process of setting up a 60mm mortar in a school house within range of the heavily guarded Presidential Palace. National police killed one of the mortar-men and arrested two others.

SENSELESS ACTS

Regardless of the rationale, Westerners find many acts of terrorism "senseless" in view of the extremely heavy toll of innocent persons. Terrorists one recent morning concealed a powerful bomb in a container and placed it on a street corner in front of a coffee shop in the most congested section of the market in Ben Tre, a city south of here. The bomb killed 6 persons and wounded 42; among the dead were two 60-year-old women and two girls, aged 3 and 12.

Equally horrible, in Western eyes, are the indiscriminate rocketings of market places, hospitals, and shacks of the poor in cities such as Saigon and Da Nang. Such actions are seen as attempts at mass terrorization. They fail because the enemy is not strong enough to send rockets and mortars over in sufficient quantity to induce this effect. As a result, the rocketings have had a tendency to backfire, infuriating many people who had often as not been indifferent to either the Viet Cong or the government. The rocketings have even converted some opponents of the Thieu government.

"Some militant Buddhists came to me in shocked surprise and righteous indignation," says one U.S. official. "They said, as though they had just discovered a great new truth: 'Why, they are killing innocent people with these rockets here in Saigon!' It was all I could do to keep from replying: 'Yes, you're at least getting a dose of what the people in the villages have been living with for nearly 15 years. Maybe now you'll wake up.'"

By far the most grisly, and significant, chapter in the history of Viet Cong and North Vietnamese terrorism in South Vietnam is still unfolding in the city of Hue where, since the end of the Tet offensive last year, more than 2,000 bodies of persons methodically assassinated by the enemy have been dug up from shallow mass graves. Volunteer grave-diggers, many of them teen-agers, are still finding bodies, and officials believe that another 1,000 and possibly 2,000 will be uncovered.

"It was the beginning of the 'night of the long knives' that is standard operating procedure after a Communist takeover," says a U.S. State Department man who has made a study of the Hue massacre. "The North Vietnamese held Hue for nearly a month, and they had planned to hold it permanently as an enclave. The assassination squads worked from prepared lists, just as the Nazis and the Stalinists did. What happened in Hue is just a smattering of what you can expect if the Communists succeed in taking over South Vietnam."

There is reason to believe that President Nixon had Hue in mind when he said in his Vietnam speech last week: "When we as-

sumed the burden of helping defend South Vietnam, millions of South Vietnamese men, women, and children placed their trust in us. To abandon them now would risk a massacre that would shock and dismay everyone in the world who values human life."

When the enemy was finally dislodged last year from the thick-walled Citadel of Hue where they made their last stand, 19 mass graves were found containing the bodies of 1,200 men, women, and children. Many of the dead were the usual victims: city and province officials, national policemen, military personnel, others with a reputation for anti-communism, and Catholic refugees from North Vietnam.

REDS TURN ON THEIR ALLIES

But what came as a shock to many was the fact that the Communists also assassinated militant Buddhists who had been involved in earlier attempts to overthrow the Saigon regime, men who had worked with the Communists toward this end. They eliminated, as well, members of numerous antigovernment political parties, foreign missionaries, and medical personnel.

Among the foreigners killed were Father M. Cressonier, 59, and Father Pierre Poncet, 36, of France, who belonged to the Societe des Missions Etrangeres de Paris, Father Cressonier having lived in Hue for 25 years. Two other French priests, members of the Benedictine Order, were also assassinated.

Students and faculty of Hue University were appalled at the murder of three German professors of medicine and the wife of one of them.

"They were discovered April 2, 1968," says a U.S. Government report. "They had been dumped into a single shallow grave in a freshly plowed potato field behind a rural pagoda not more than 1½ kilometers south of the walled city. All had been shot in the back of the head, their hands trussed behind them with wire. The victims were: Dr. Horst Krainick, 59, professor of pediatrics, and his wife Elizabeth (whose body had been mutilated); Dr. Raimund Discher, 44, professor of internal medicine; and Dr. Alois Altkoester, 36, professor of general medicine.

"These people had never done anything warlike or hurtful to the VC," said Dr. Nguyen The Anh, professor of history and rector of Hue University. "And Frau Krainick was a gracious lady. We simply don't understand it."

BURIED ALIVE

American and South Vietnamese investigating teams report that "almost half of the victims were found in conditions indicating that they had been buried alive. Many were found together in groups of 10 to 15, eyes open, with dirt or cloth in their mouths. Evidence also was discovered of victims having been clubbed unconscious prior to being buried alive."

In one official report of the massacre there appears this item: "Tang Quang Tu Pagoda. Coordinates: YD 764-240. Number of graves: 13. Number of bodies: 67. Date discovered: From 3/1/68. Comment: Victims shot. Buddhist monk in Pagoda heard nightly executions by pistol and rifle shots in plowed field behind pagoda during first two weeks in February, with victims pleading for mercy. Leader of Vietnam Nationalist Party Nguyen Ngoc Ky, was among victims found here."

In March of this year, a new search for bodies was begun at the instigation of a diminutive 40-year-old widow, Madame Ton That Lang of a neighboring district. Her husband, a school teacher, had been taken from their home by six Viet Cong soldiers six days after the city's occupation.

Madame Lang prevailed upon her district chief to ask for volunteers and trucks to begin a search for bodies in the sandy marshlands not far from Hue. The search was successful. Other committees were formed, other searches were begun, more bodies were found.

"One set of graves was discovered when someone noticed that the grass in that particular field was greener than it was in the next field," says an American official.

Identification, most of the time, has been impossible, for the enemy destroyed the victims' identification cards. One woman obviously had a premonition of her fate: She wrote her name, ID card number, and address in ink on the inside of her underwear.

The first batch of 1,200 bodies found last year was buried in a paddy. But the new finds, totaling 800 bodies so far, are so numerous that it was decided not to waste any more valuable rice-growing land with a cemetery; hence a new burial ground has been established in sandy scrubland.

The bodies are placed in plywood coffins, which are painted red and given numbers. Then mass funerals are held. Among the mourners at a recent funeral was Madame Lang. She hasn't found her husband's body yet. But she hasn't given up the search.

MICHIGAN'S BATTERED BABIES

HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mrs. GRIFFITHS. Mr. Speaker, the Detroit News recently carried a series of articles written by Ruth Carlton and Kathleen O'Brien on Michigan's battered babies. The tragedy of child abuse with its unbelievable horrors points to an area where there is great need for new approaches by the courts, welfare agencies, and the entire community toward solving this problem. In Michigan last year the reported number of child abuse cases totaled 766, and for the Nation as a whole it is reported that one or two children are killed by their parents every day.

Indeed, too little attention has been given to the innocent victims involved, many of whom are too young to talk and are forced to bear lifelong emotional and physical scars of this brutality. One of the reasons this problem has been overlooked is that it relates to the family and the personal relationship of its members. But this whole problem affects society and it demands solution.

At this point, I place the series in the CONGRESSIONAL RECORD for everyone to read:

MICHIGAN'S BATTERED BABIES: ARE THEY THE VICTIMS OF THEIR PARENTS' RAGE? OF SOCIAL WORKERS SNARLED IN REDTAPE? OR OF A SOCIETY THAT DOESN'T CARE?

(By Ruth Carlton and Kathleen O'Brien)

Two-and-a-half-year old twin girls died last year in Wayne County as a result of burns they suffered when their stepmother poured boiling water on them as they were taking their bath.

A six-month-old baby boy was found weak and close to death in a Detroit home where three other children seemed happy and well-fed.

A two-month-old baby was badly bruised when he was brought into a Detroit hospital emergency room. The mother said he had fallen out of his crib. Later, under questioning, she admitted throwing the baby across the room when he would not stop crying.

These are three of the 766 cases of child abuse reported in Michigan last year; 334 came from Wayne County. Four of the Wayne County children died—all under 27 months of age.

Most of the victims are under three . . . too young to tell what happened to them . . . too small to run away.

Doctors are required by a 1964 state law to report all suspected cases of child abuse to the Michigan Department of Social Services (MDSS). This law also protects the doctor's anonymity.

Still all authorities agree only a fraction of the abuse cases are reported.

Furthermore there is no agreement among authorities about what steps should be taken when a case of abuse is reported.

Should the abused child be removed permanently from the parents?

Should the parents be punished by having their child taken from them?

Or should an effort be made to rehabilitate the parents through social work counseling?

Should the child remain in the home while his parents go through this emotional re-education? Or should he be temporarily placed with foster parents until his own parents have learned to handle their anger and frustration a different way?

"There's a struggle in philosophy of how to handle beaten babies," says Judge James H. Lincoln of Wayne County Juvenile Court.

"The Department of Social Services seems to feel social work should be carried on without court intervention. I object; you wind up with dead kids.

"I want the Department of Social Services to offer social services; but I want them to bring each case immediately to court.

"I want an official petition filed to move the child out of the home on every abuse case."

He says parents will often agree to let children go into boarding homes without the case going to court.

"But two months later when they want the child back nothing can stop them.

"I'm in favor of social work to help the parents. But use the authority of the court to protect the child.

"Even if the court leaves the child in the home there is more control if the case has been reviewed by the court. Then the parents have to let the social worker in. It's different than social work visiting on a voluntary basis," Judge Lincoln says.

"I have a baby in the hospital now so savagely beaten he may not live," says Dr. Marilyn Heins, director of pediatrics for Detroit General Hospital.

He is an 18-month-old boy who weighed only 14 pounds when he was brought in. His tiny back is scarred from beating; his belly bloated from near starvation.

Half a dozen burn spots on his cheeks are the size of a cigarette coal.

His mother had been arrested two years ago when another of her children was brought in brutally abused.

"We (the doctor who examined him, the nurse and social worker who visited the home) all said this is a terrible situation; the children should be removed at once. But nothing happened.

"How many children from that home must suffer before someone takes action to protect the children?" the doctor asks.

A Detroit police woman says: "It is out of our hands. All we can do is report to the Michigan Department of Social Services." (Before the 1964 law, child abuse was reported to the police.)

The implication is: they report to the MDSS and nothing happens.

A social worker says, "One abused child, returned home for lack of proof that his parents were responsible, was dead two months later as a result of 'an accident'."

Another social worker who formerly worked for the Wayne County DSS says: "There is so much paper work involved with taking a child from his home and placing him in a foster home that the social worker can't possibly offer real service to the parents or the child."

Many cases of child abuse still go unreported, says Dr. Margaret Zolliker, director of maternal, child and school health for the City-County Health Departments.

"Most doctors in private practice are gun-shy; they won't turn in a case of abuse for fear of being sued." (Even though the law protects their anonymity, a family that takes a child to their family doctor can figure out where the report came from.)

Often the doctor simply cannot believe a patient he knows is capable of beating a child, she says.

"These parents fall into two groups," Judge Lincoln says. "Those who know they are doing wrong to break a child's bones and those who think they are following the Bible on spare the rod and spoil the child."

The greatest need in Wayne County is for adequate marriage counseling, family social work, which could shore up these families, Judge Lincoln says.

"With help for the parents many of the 3,000 kids now wards of my court might be in their own homes. We would not need the constant search for boarding homes and adoptive homes if we prevented the breakdown of the family—the child's own family."

"Child abuse is just one facet of the larger problem—unwanted children," says Dr. Marilyn Heins.

"We should attack it by all methods to prevent unwanted children . . . birth control, legal abortion and subsidized adoption. Anything rather than unwanted kids."

In the meantime Dr. Heins feels the emphasis should be on protecting the child . . . especially the very young child who has no defense.

Dr. Heins says 17 percent of the children coming into Detroit General are there because of neglect or abuse.

In a study of 47 families brought before Wayne County Juvenile Court for child abuse, these facts stand out:

Twenty-six of the 47 abusive parents were under 25 years of age.

Twenty-one of the parents had married before the age of 20.

Half of the parents had failed to graduate from high school.

Many of them were mentally retarded.

Thirty-three of the 47 children abused were under three years old.

In 23 of the families the abuse was confined to one child.

The majority of the families were from the inner city.

But Dr. Zolliker stresses that the problem is not confined to the inner city.

"Although pressures are greater on poverty families who live in the inner city, abuse cuts across all boundaries. It is not limited to any economic group, nationality, race or neighborhood," she says.

Police records show many forms and types of abuse. Children have been beaten with bare fists and baseball bats. They have been burned with open flames, lighted cigarettes, electric irons and boiling water.

They have been strangled or suffocated by pillows or plastic bags. And they have been stabbed, bitten, shot, subjected to electric shock and had pepper forced down their throats.

How does abuse start?

A psychiatrist at Wayne County Juvenile Court says abuse frequently begins when a child cries and the parent cannot quiet him, or when the parent begins to toilet train the child and finds it more difficult than he had expected.

In both cases patience runs out and the parent loses control, according to the doctor. Children who were unwanted pregnancies or children who have health problems are especially likely to be abused, he says.

"After you have seen some of these children you expect to find a huge brute of a parent who inflicted the abuse. This is not the case. The parents are usually pathetic

people who you think could hardly lift a beer bottle.

"Usually only one parent is the abuser, and it's as often the mother as the father," this doctor says.

Does the parent restrict his abuse to one child?

"We used to think so. But I find when the court moves the abused child to a foster home, the parents single out another child as their victim," says the psychiatrist.

"In checking into the family's history we often find another child in the family died mysteriously."

Doctors are not sure how abused children will grow up. Whether they can ever function as citizens after the terror they have experienced. They do know that quite often the abusive parent was himself an abused child.

Will the baby lying in the hospital with the angry whip marks on his back grow up to abuse his children?

Punishing the parent is not the answer. But what is?

Dr. Heins believes one step might be the formation of an agency that would be able to handle the entire problem of abuse in one facility.

"It is quite difficult to get treatment for parents who abuse their children," says Dr. Heins. "These parents need treatment before the child is returned to the home or we are going to wind up with more dead children."

Ideally such an agency would handle only the problem of child abuse instead of the multitude of problems the Department of Social Services handles.

"No child protective work is really being done when everything is closed Saturdays and Sundays," says Rosemary Klug, chief of women's division, Detroit Police Department.

"On weekends we (the police) are the only protection agency," she says.

"Before the law was changed in 1964, child abuse was reported to the police department and investigated by policemen. Now investigation is left to the agency (Department of Social Services) and reporting is required of doctors. They are not reporting.

"We get very few abuse cases now," Miss Klug said. "On one case last week we arrested a mother and placed the child in custody. We felt the child's life was in danger. But we will probably be criticized by Department of Social Services."

Some of the tiny cries for help from the children are being heard by the authorities.

The important job now is answering these cries before they are silenced forever.

ABUSED CHILDREN TAKE A BEATING: CHILDREN GET HURT WHILE SOCIAL WORKERS FIGHT LEGAL FORMS, REDTAPE

Detroit is failing its abused children. They get lost in a mountain of paper work which buries all efforts of the social workers hired to help them.

The social workers really care about what happens to kids or they wouldn't be there, but they can't cut through the red tape.

While I was supervisor of the Wayne County Department of Social Services abuse department, I took on an abuse case myself just to see what was involved. I thought maybe my staff was not coping efficiently. They were—as efficiently as possible under the circumstances.

On my one case I had to fill out some 30 forms—all of them long. I found myself doing hours and hours of paper work, but not doing a good job where the child and his parents were concerned.

And this was ONE case. My four social workers had an average case load of 35 families with some 130 children.

The paper road-block started 15 or 20 years ago with some simple documents. When a hole was discovered in one, a new document

was written to plug the hole. But no form was ever discarded. Health, Education and Welfare came along and wanted certain information which added more forms—all of them long.

If you care what happens to children and their families, it haunts you. I finally quit. Before leaving I had asked for a revision, cutting paper work, hiring of clerical help to do essential paper work to free social workers to give service.

I still believe it can be accomplished if the public knows the conditions.

The philosophy behind the Department of Social Services approach is sound. Basically it's to try to save the family—to help the parents change so the child can remain with them.

These are the only parents the child has. There is in most of these parents a love-hate relationship toward this child. They do love him. The parents have a great need for maturity, to solve some of their own problems.

We know when we take a child out of his home he does miss his parents even though he's been abused.

But the safety of the child is the first consideration. If he seems to be in danger, he is moved promptly to a carefully selected foster home.

Hopefully this foster home will nourish him for the year or more until he can return to his own home. The social worker will work regularly with the parents to help them mature enough to find different ways to reacting to this child. (Abusing parents are usually immature and reacting childishly to their child.)

The philosophy assumes it will take at least a year for the parents to change. And the social worker would need to see them at least once a week to bring about such a change.

In the meantime the social worker is also helping the child adjust to his foster home, arranging for visits with his own parents and after the visit help the child understand his conflicting emotions.

At the end of this ideal year the child is reconciled with his parents and moved back home.

That's the philosophy.

Would you like to hear how it works? In reality if the social worker visits the parents briefly once in three months she's doing well.

As for that carefully selected foster home—if there is a bed empty in any licensed foster home, the child is put in that bed.

Because the child is thrown into the first foster home available, he may be thrown out of it in a couple of weeks.

These children are usually damaged emotionally by the time they are two years old. They are difficult children to handle. They may be bed wetters, fighters, sulky, withdrawn, unreasonable in their demands for attention.

So they are moved from foster home to foster home to foster home, deteriorating on the way.

And if a child is returned to his own home at the end of the year, the family probably is no different than at the time the child was removed. Nor is the child.

Before quitting my job as a social worker for abuse cases, I also pleaded that some one set up priorities.

You have the hospital demanding that an abandoned baby be removed immediately.

You have Healey Home (a temporary shelter for Juvenile Court) demanding that a child be moved into a foster home, immediately.

You have to calm down a foster mother whose payments haven't arrived for six weeks.

You have another foster mother demanding you remove a five-year-old who wets the bed and beats the other kids.

What do you do first? Some priorities must be established.

Every night I went home haunted by the

things not done. Praying that the next day's papers wouldn't have a tragedy headline. For when you are dealing with abused children the thing you don't have time to do may mean a child will die . . . a parent commit suicide.

So eventually you give up the battle.

BATTERED BABY RESCUED BY SOCIAL WORKER: A 53-HOUR DRAMA

(By Ruth Carlton)

Here are the steps one social worker had to take to remove one obviously abused child from the parent's home. We will call her Miss Smith. She works for Wayne County Department of Social Services (DSS).

MONDAY

2:10 p.m. Doctor calls Wayne County Department of Social Services. He has just placed a 10-month-old boy in a private hospital whom he believes to be victim of parental abuse.

2:15 p.m. Miss Smith calls him back for his report. Baby has broken arm, black eye, burns on buttocks and possible internal injuries.

3 p.m. Miss Smith goes to hospital to see child; by coincidence meets parents there. Nurse finds private cubicle for them to talk. The parents deny everything. Miss Smith takes their address, tells them she will call on them later this afternoon.

4:20 p.m. To doctor's office, sees correspondence with California doctor who had treated this child before family moved to Michigan. California doctor had suspected parental abuse.

5 p.m. Social worker drives to child's parents' home. They had not told her it was an apartment building. No list of tenants is posted, the caretaker not at home. Miss Smith calls it a day.

TUESDAY

9 a.m. Phones caretaker and gets apartment number and telephone number for the parents.

9:30 a.m. Phones parents, explains why she had not kept her appointment the day before, outlines next steps: File a petition with the court (Wayne County Juvenile Court), judge to decide whether child returns to them. Preliminary hearing at Juvenile Court likely within three days. Angry father says he is going to hospital and get his child.

9:45 a.m. Miss Smith calls hospital, asks them to discourage parents about moving child. She assures hospital she is requesting an order of detention from court which she will deliver to hospital later today. Hospital promises nothing. Doesn't want to get involved.

10:15 a.m. She calls court to ask if detaining order can be given by phone. The answer is no. Nothing can be done without first having her written petition for the court to review the case.

10:30 a.m. Social worker types a two-page, single-spaced petition (in quadruplicate).

1 p.m. Delivers petition to court, waits for court order of detention to be typed and signed by judge.

2:45 p.m. Takes detention order to hospital. The father had left an hour earlier with the little boy.

4 p.m. Miss Smith calls the prosecutor. He advises her to request writ of apprehension the next morning.

5 p.m. Calls her supervisor and court to report.

WEDNESDAY

9 a.m. Applies for writ at Juvenile Court. 1 p.m. Phones California doctor who agrees to airmail his record of his case and x-rays. These will be vital for the court hearing.

4 p.m. Notified writ is ready. (Here comes a musical comedy situation of who is to serve writ on the parents. Wayne County Juvenile Court, seething under repeated refusals by the state legislature for adequate

financial help, refuses to send an officer of the court to get the child. That, in the court's opinion, is the state's responsibility.

Miss Smith who weighs 105 pounds seems an unlikely person to take a child away from two belligerent parents. Eventually able-bodied man from another office is asked to accompany her.)

4:30 p.m. Calls police in family's precinct requesting an escort.

5 p.m. Picks up writ of apprehension at Juvenile Court, drives by police station to pick up escort.

6 p.m. Arrives at parents' home. As writ is handed to the father, mother picks up the baby and walks into the bedroom. The father follows, closing the door.

6:20 p.m. Father reenters room and announces, "You can take me to jail but you can't take my baby out of here." He returns to bedroom. This scene is repeated several times until the father is persuaded to call his attorney. Attorney advises him to obey court order.

7:15 p.m. The father agrees to allow the child to be taken into care but says he and his wife will go too.

7:40 p.m. They start out . . . the social worker, the man who served the writ, the mother and her two other children in the social worker's car. The baby in the mother's arms. The baby's father drives alone followed by police car.

8 p.m. The child is placed in Detroit General Hospital—53 hours and 50 minutes after the abuse was first reported.

THURSDAY

9 a.m. Miss Smith dictates a series of reports on this case to go to the Michigan Department of Social Services in Lansing with carbons to prosecuting attorney and Juvenile Court. Various forms required for this one case fill her day.

11 a.m. She calls home-finder of Department of Social Services to ask for a foster home for the child. Fills out series of papers that set up payment to foster mother. Makes out clothing order. (When parents refuse to bring clothes to the child, new clothes must be bought.)

2 p.m. Calls hospital to arrange to pick up child and take him to foster home. But the doctor wants more tests so the baby is to be kept in hospital a few more days.

Monday the social worker will have to appear at the preliminary hearing at Juvenile Court. She is the petitioner asking the court to look into the case.

When the baby is placed in foster home, it will be Miss Smith's job to take him back to the hospital for medical followup.

She will also offer social work counseling to the parents. The first appointment will be in her office. If she thinks it safe, she will go to their home for subsequent appointments.

(This social worker is responsible for 32 child abuse cases at this time.)

MDSS goal is to close each case in 30 days referring the family to some other agency (Lafayette Clinic, Family Service, Child Study Clinic).

If the court decides not to return the child to his parents immediately, the child is made a temporary ward of the court and assigned to one of Detroit's child care agencies which will supervise him in a boarding home. All of this is accomplished with due amount of paper work.

With the total tonnage of paper involved in one case of child abuse, it is not hard to understand how the children "get lost" says one experienced social worker.

ABUSED CHILDREN: THEIR PARENTS WERE ABUSED KIDS

(By Ruth Carlton)

"Those people! I could kill them myself. "When I think of anyone beating a small child until they break his bones . . . " This explosion, from a gracious, poised,

normally compassionate woman is reflected by most of us.

The subject of battered babies strikes raw nerves and we react in anger.

"But these parents need sympathy as well as the child," plead the social workers.

"We must see abusive parents as troubled people, as greatly in need of help as is the child they have abused," says Robert Daniels, social work supervisor for Catholic Social Services of Wayne County.

"These parents are like children themselves, hostile because their own needs have been unmet and resentful because of the demands made on them as parents."

They themselves grew up in troubled families. "In fact if one point stands out, it is that problem-families beget problem-families," he says. "Somewhere we must break the cycle."

He and John A. Brown, district supervisor for Catholic Social Services of Wayne County, have followed three sets of parents since 1965 when they were referred to the agency for child abuse. Incidentally, none of these families was on public assistance.

In each case the small victim was moved immediately. With the child safe in a temporary foster home, intensive social work counseling was done with the parents.

Neither of these social workers talks in terms of success. But they are convinced these parents profited by social work.

"Now they are better able to fulfill their roles as mothers and fathers, as wage earners, than they were," says Mr. Daniels.

"We have no illusion of having solved all their problems. But because of social work they are able to function much more effectively," Mr. Brown says.

The social worker has to set modest goals in dealing with abuse cases, they say. Only one of these three battered babies has been returned to his parents. The other two have been placed in adoptive homes.

Here are the three cases:

CASE NO. 1

Danny Stevens, 14 months old, was removed from his home because of repeated abuse by his mother.

Mrs. Stevens was retarded and emotionally disturbed. She had had a troubled childhood centered around an alcoholic father and a disturbed, rejecting mother.

Her relationship to her mother had been hostile but dependent and the mother had exerted constant control over her life.

Danny had been born just a week after Mrs. Stevens' mother died. These two events were so closely associated in Mrs. Stevens' mind that she rejected her son from birth, could not bear to hold him. She reacted with rage if the baby cried to be fed or diapered.

After the court took Danny out of this home, Mrs. Stevens talked every week with the social worker. She made enough progress that Danny was returned home after 14 months. There has been no further abuse; Mr. Stevens continues to see the social worker once a month now.

CASE NO. 2

Mr. Carson was brought to court for abusing his infant son. He told the judge he had been angry when his wife left him babysitting. The baby cried, and because he could not stop the crying, he picked up the child and flung him across the room.

Mr. Carson was a depressed dependent person. He was still mourning for his father who had died four years before. His mother had recently married a man of whom Mr. Carson disapproved.

Some way Mr. Carson associated the helplessness of his son with his own helplessness which was compounded now by feeling deserted—deserted by his father's death, deserted by his mother's remarriage, deserted by his wife's leaving their baby with him.

The baby was moved to a foster home. Social work counseling began for Mr. Carson.

Both parents are what the social workers call "limited" . . . more popularly called retarded. The man was willing to give up the child, his wife was not. So the court took permanent court custody of the little boy.

Today Mr. Carson is in the process of getting a divorce.

Mrs. Carson and her daughter have gone to live with her mother.

An adoptive home is lined up for the son who is now four years old. The little boy has some brain damage from the abuse. But the adoptive parents want him even though the doctors do not know how severe the brain damage is.

CASE NO. 3

The Jones family came to the attention of the Juvenile Court when Mrs. Jones demanded they take her three-year-old son George. She threatened to kill him if they didn't.

Mrs. Jones also had three little girls. She was an inadequate mother, but this did not include abusing them. She could not tolerate her son George. She beat him severely and put him outside in near zero weather to punish him.

She resented the attention paid George by his father and other adults.

Mrs. Jones was retarded, came from a home where she was neglected, and had been placed in a state training school for delinquents in her early teens.

Mrs. Jones gave up her boy to be adopted. He is now thriving in an adopted home and the Jones family is still intact—mother, father and three daughters.

"These three parents who abused their children all came from problem families," says Mr. Daniels.

"In trying to help them we focused on the parents themselves and not on the act of abuse. We tried to convey to them our concern over their situation and to provide a climate of goodwill in which we could work with them."

Occasionally the social worker made suggestions about child care and the rearrangement of routines.

A housekeeper to be with a mother who had abused her child during the day while the father was at work.

Day care for a two-year-old so the mother could get some relief.

Mr. Daniels sees abuse as a result of a variety of forces operating on the parents: Their psychological needs, limited intellect, social pressures and economic adversities.

"Where there is a problem of child abuse, there are invariably other problems in the family," he says.

Mr. Daniels sees abuse "not as an intentional act of violence on a child or as merely the result of parental rage, but rather as a response to the parent's overwhelming anxieties and to the hostility engendered by them, which somehow the child seems to intensify."

He feels that social work might be more effective if the neighbors and relatives of abusive parents could stop looking upon them as criminals and see them as deeply troubled human beings.

Perhaps then the cycle could be broken . . . that destructive cycle of abused children become abusing parents.

BATTERED BABIES: LOTS OF ORGANIZATIONS BUT TRAGICALLY LITTLE SERVICE

(By Ruth Carlton)

Michigan's failure to protect battered babies and rehabilitate their parents is part of the reason State Department of Social Services is now under fire.

A bill has been introduced to remove child neglect (which includes abuse) from the State Department of Social Services (SDSS).

Senate Bill No. 198, introduced Feb. 26 by Senator Lorraine Beebe, of Dearborn, would set up a new state department—Department

of Youth Services—taking both child neglect and delinquency away from the State Department of Social Services.

Judge James H. Lincoln, of Wayne County Juvenile Court, who is one of the supporters of the bill, says: "I do not want to attack personalities. I'm really not interested in who is to blame. But some children's services have to be shifted from SDSS."

"There is no question that the Romney Commission (the Governor's Commission on Youth Problems) report is a hell of an indictment of lack of leadership." (The bill resulted from this report.)

Judge Lincoln referred to his recent request addressed to Bernard Houston, SDSS director, dated April 24:

"I wish to again reiterate the urgent need for five or more additional workers in Wayne County, to be assigned specifically to child abuse cases."

"The Department's (SDSS) policy of dropping cases after 30 days is just simply nonsense. The Department of Social Services is handling the entire neglect load of a number of counties. In Wayne County, their services are either paper thin or nonexistent."

"If the Department of Social Services were to give the same services to Wayne County that now are being furnished to some other counties, it would take no less than 50 workers," the letter said.

Houston's reply to the judge stated he was referring the request to the appropriations committee. "Which means he isn't going to do anything," the judge commented.

"Houston is in an extremely difficult position," the judge continued. "His requests for money from the state legislature are ignored unless some outside group comes up screaming."

"But to get money for a project you have to plan, document, present a five-year plan, and promote it. This SDSS has not done."

"If anything there has been a decrease in services in Wayne County since the merger (the 1966 merger of state, county and city welfare services under SDSS)."

From court to hospital to social workers there is agreement that the battered baby problem can be solved only with adequate casework for the parents. Helping unstable, frustrated, immature parents is also the best prevention known for battered babies.

Increasingly it is suggested the State of Michigan should set up these services rather than depending on the efforts of Catholic Social Services and Children's Aid Society, both private Torch Drive supported agencies.

"The battered baby is only one part of a broader problem of grossly inadequate care and protection of children in many kinds of situations," says Eben W. Martin, family and child welfare consultant of United Community Services and president of the Detroit chapter of National Association of Social Workers.

"A comprehensive, early, child protective and family strengthening service is greatly needed in Michigan. This kind of program is provided in many states by a public agency," Mr. Martin said.

What are protective services?

"Catching a family in trouble before tragedy overtakes them . . . working with them before they harm or kill a child," is one social worker's definition.

Actually Detroit has several fragmented, isolated attempts along this line. Five workers here, six workers there, against unknown thousands of families needing such services.

Here is what Detroit offers these families:

Wayne County Department of Social Services: Five abuse workers who, by plan, would work with the parents for 30 days. (The court calls the 30-day limit "simply nonsense." The social workers say they have no time left for social work if they complete the paper work.)

Wayne County Juvenile Court's Child Study Clinic: No long term service offered. Parents are interviewed before the court

hearing decides whether or not to return their child.

Children's Aid Society: The Torch Drive agency responsible for protective services to Protestant families. The department has decreased from nine workers to five in the last five years.

Catholic Social Services: Provides casework service "that contributes toward a stable and healthy family life" to Catholic families.

Protective Service Unit: Five workers. Set up two and a half years ago with services provided by Catholic Social Services, money by SDSS. Available to any family regardless of religion.

Families are referred by police or schools when children are so blatantly neglected that there is danger to the child.

"We go to their home saying, 'We hear you are having difficulty and we will try to help,'" says Virginia LaFalce, director of the unit.

She plans to introduce a new approach later this month: Group counseling for six to eight mothers.

The First Unitarian Church, 4605 Cass, has agreed to house the project, rent free. Miss LaFalce is looking for volunteer drivers who will pick up the mothers and their children.

She also needs volunteers experienced in nursery school techniques so the session will be a growing experience for children as well as mothers.

SDSS specifies that services be limited to 90 days.

Can parents be changed in 90 days?

"We try to find the family's most immediate problem related to the child and concentrate on that. In 90 days we know how it's going—whether the family is catching a gleam of hope or whether to refer the case to Juvenile Court," Miss LaFalce says.

"Sometimes in 90 days a parent decides he can't handle it. A man whose wife has died leaving him with young children may ask that they be placed in a foster home temporarily.

"Often we refer the family after our 90 days to other UCS agencies," she says.

Obviously the total combined services offered by these small projects can touch only an infinitesimal fraction of parents of neglected and abused children.

There's no way of knowing their total number but at least three thousand of their children are now wards of the Wayne County Juvenile Court.

The conviction that it is preferable to strengthen the existing family and hopefully return the abused child to it is based on:

The damage to the child when he is uprooted.

The difficulty in finding enough foster homes.

The danger that when a shortage of foster homes exists a child may be put into a home no better than the one he's leaving.

In fact Dr. Paul V. Woolley Jr., pediatrician-in-chief of Children's Hospital of Michigan, reports three cases of battered babies abused by foster parents.

Dr. Woolley was one of the pioneers in recognizing the battered baby syndrome. When he first published in medical journals a dozen years ago, many doctors were explaining the multiple fractures in infants as some mysterious ailment of bone fragility.

Dr. Woolley has just completed a chapter on battered babies for a new medical text in which he gives data on 55 constructive cases of physical abuse admitted to Children's Hospital.

Age:	Number
Under 3 months.....	12
3 to 6 months.....	13
6 to 12 months.....	14
12 to 24 months.....	7
24 to 36 months.....	5
Over 36 months.....	4

Six of the babies died. Four are known to have permanent damage.

In writing of possible solutions, Dr. Woolley says:

"Sometimes material assistance and moral support for those (parents) where frustration and immaturity are evident suffices.

"In others a close and constant tie to a person skilled in interhuman relations has helped. Some benefit from psychiatric approaches...."

As a last resort he lists "long-term removal of the victim through court action."

"Even this is not a cure-all," he writes, adding that three of his 55 cases were battered in foster homes after having been removed from their parents because of abuse or neglect.

"It is self-evident that no amount of legislation can help unless supported by an enlightened concern on the part of the community, the courts and the medical profession," he says.

BATTERED BABIES: VICTIMS OF THEIR PARENTS OR OF SOCIETY?

(By Ruth Carlton)

In this series on battered babies charges have been made against the State Department of Social Services (SDSS) headed by Bernard Houston.

A former head of the abuse department for one county Department of Social Services says she resigned because a ridiculous amount of required paper work prevented her from giving social work services.

Both court and police implied criticism of the handling of abuse cases by the Department of Social Services.

The social worker said she filled out as many as 30 forms on one case.

"Nowhere can we find where as many as 30 forms could possibly have been required," Mr. Houston says in a written statement. "We do have a forms problem but it is not within the battered child program itself.

"Only five forms are actually required for the department workers to carry out the responsibility vested in us through Act 98, which is to

(1) Determine if intentional injury occurred.

(2) Refer to proper law enforcement.

(3) Maintain information registry."

However, Mr. Houston then goes on to list circumstances in which "other forms will be necessary" if additional services are required through another agency "whether these are court forms or the forms of another program in this department."

Also two forms originate with the county board of auditors. And extra forms are necessary for Medicaid, he notes.

The News learned from another social worker that 30 forms is a conservative estimate in abuse cases. One must be filled out on every child in the family, not just on the one abused child.

Four children in the family means the same form must be filled out four times.

And this series of four must be repeated each time the abused child moves—say from hospital to foster home, on to a second foster home.

Mr. Houston says some forms had been discontinued before The Detroit News article, and three others have been combined since.

He says the required forms have not blocked the efficiency of his staff in Wayne County citing that out of 306 referrals in 1968, 177 were confirmed as abuse.

Sixteen children were removed permanently from their parents and 66 temporarily.

Answering the criticism of local police and court, as reported in Sunday's News, Mr. Houston wrote:

"To our knowledge there simply is no conflict of philosophy between SDSS and the juvenile court. Neither responsibility nor authority is removed from the hands of police and the court."

To indicate cooperation with the court, Mr. Houston points out 21 of the first 34

abuse cases in April were filed with Wayne County Juvenile Court.

State Department of Social Services has established protective services in 10 counties. Wayne County is not one of them.

Mr. Houston claims, "Extremely high priority has been given the battered child program in Wayne County. In January instructions went to staff to cut caseloads which had been 90 down to 30."

The abused child program was separated from neglect to form a separate unit, and the most qualified staff assigned to it, he says. Also one staff member was assigned as liaison to each large hospital.

Mr. Houston says, "A series of statewide workshops on battered children are being set up with Probate Judges Association, the Supreme Court, the Prosecutors' Association and the Attorney General's office."

He points out that while a 1965 law gave SDSS broad responsibility to investigate battered baby charges and provide services, sufficient money has never been allotted to carry out this responsibility.

Critics of SDSS agree the state legislature has never come through with the necessary money. But some believe this is as much due to lack of leadership and promoting on the part of SDSS as to any niggardly attitude of the legislators.

What does this all add up to?

Obviously Michigan babies are still being battered around.

Obviously not enough counseling is available to their parents.

Obviously a preventive approach is needed to keep more babies from being abused.

What is the answer?

Transfer of responsibility to a separate State Department of Youth as proposed in Senate Bill 198?

Preventing unwanted children by more emphasis on planned parenthood and abortion as suggested by Dr. Marilyn Helms, director of pediatrics at Detroit General Hospital?

More funds from the state legislature so State Department of Social Services can do a better job?

Aroused citizens who will demand attention for those too little to run their own protest movement?

As one social worker put it, "It boils down to too little money, too few workers, too few facilities. Only by getting citizens aroused can you ever change the establishment."

INCREASE SOCIAL SECURITY BENEFITS

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. ST GERMAIN. Mr. Speaker, the Congress must act this year on substantial social security legislation. Benefits are seriously deficient at the present time, and because of inflation continued delay means that every retired person's social security check, in effect, gets smaller and smaller with each passing month.

I consider it a duty today to cosponsor Representative VANIK's bill which provides for a 15-percent across the board increase in social security benefits; the bill would also raise the minimum monthly payment from \$55 to \$80, and very importantly, it provides for automatic adjustments in benefits when the cost of living rises. According to an estimate of the U.S. Bureau of Labor Statistics in

autumn 1968, for a retired couple to live moderately it cost \$4,100. Yet, the average monthly social security payment to a retired couple in December of that year was about \$165. Unquestionably, benefits must be increased to meet basic needs.

Let us keep before our minds that to our shame almost 6 million Americans over 65 years of age are living in poverty. Even by raising social security benefits by 15 percent only about one-fourth of these poor people will be brought above the poverty line.

President Nixon has asked the Congress for a 7-percent increase in social security benefits, and that increase is supposed to become effective in February of 1970. At current rates of inflation, half of that increase, or more, will have been wiped out between now and February 1970. A substantially higher figure is obviously called for.

When it was reported that the House Committee on Ways and Means would not consider social security legislation this year, I wrote to Representative WILBUR MILLS, chairman of the committee, urging him to somehow make room for a social security bill. We all recognize the importance of the tax reform legislation presently before the committee, and want effective legislation in that area. But a social security bill also deserves high priority. This is not something which affects just a few people; we are talking about the daily existence of a sizable segment of our population—about 25 million people. I strongly urge that the House Committee on Ways and Means find a way to consider a social security bill as soon as their tax deliberations come to an end.

The very delay we are threatened with here shows the necessity of an automatic adjustment provision linked to increases in the cost of living. Inflation moves more quickly than Congress acts. Why do we continue to allow retired persons to go through the painful in-between periods which exist once the cost of living rises significantly, and before the Congress enacts corrective measures to increase benefits?

The social security system must be updated so that older Americans can live their retirement in dignity and a certain deserved leisure without living in poverty today, or worrying that with their fixed income they will be living in poverty tomorrow.

BENEFITS FOR OUR ELDERLY CITIZENS

HON. WALTER S. BARING

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. BARING. Mr. Speaker, Congress must take note right now of our wasteful spending in foreign aid and of similar waste in the ineffectually waged war in South Vietnam.

The American people have to have the truth and the many upstanding senior citizens of our country, who have sur-

vived several hardships over the past 50 to 100 years, are deserving of some tranquility and ease of living.

We are in the middle of Senior Citizens' Month, May 1969. And, where do we find ourselves? Without enough money to continue some necessary domestic programs, which I deem first in priorities to be considered by Congress and the administration. This includes programs for the elderly. There are just too many instances I am aware of where our elderly friends receive very little, if anything.

Nevada senior citizens will note that the Nevada Legislature found it could not allocate State money to the tune of \$45,000 to keep six Nevada programs for the elderly in operation. Those programs have ended.

The picture looks just as bleak at the Federal level with a considerable amount of budget cutting underway. Witness the loss, at the moment anyway, of our fiscal year 1970 money for the vitally needed southern Nevada water project. I am still waging my own effective battle to reinstate these funds. Other cuts by the administration Budget Bureau eliminated the Lake Mead Base, a defense installation near Las Vegas. Also, the Clear Creek Job Corps Camp near Carson City, which is being phased out and then there is the closure at the end of June of the Elko Weather Bureau. I have fought to maintain these domestic operations in Nevada.

These cuts and others like them are coming from the Federal level and I say it is all due to the giveaway programs in so-called American foreign aid. I have steadfastly been opposed to our U.S. policy in aiding foreign countries when I know, along with other Members of Congress, that more often than not our financial help and our aid in the form of various goods ends up in the wrong hands—the hands of crooked politicians and the racketeers of the black markets. From these corrupt hands, I have learned, this American aid is turning up as aid to enemy Communist countries. I call our so-called foreign aid program treasonous aid to the enemy.

And then there is the waste of money, and life, in Vietnam. If we are going to do battle in Vietnam with honor—let us do battle and fight to win. Otherwise let us get out now with an orderly withdrawal.

When you correct these two major problems facing this country, we are well on the way to amending our domestic troubles, which have first priority in my opinion and for which I will consistently battle for and to win.

But until the wasteful spending, especially in foreign aid, is stopped, I see no easement on some of our immediate domestic problems and as a result, we must work together hard to achieve needed programs to help make the golden years of so many of our fine citizens' lives more fruitful. I will watch closely for methods where Congress may improve the situation to benefit our elderly citizens and, when the time comes, will take a stand with whom I hope will be the majority in favor of such benefits. In addition, I will vote for increased social security benefits.

A MESSAGE FOR NATIONAL MARITIME DAY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. BIAGGI. Mr. Speaker, as a member of the Merchant Marine and Fisheries Committee, I rise to pay tribute to the American merchant marine on this National Maritime Day. The President has seen fit to issue a proclamation calling on all America to honor our merchant marine industry on this day.

This is entirely fitting, since this year we are observing the 150th anniversary of the voyage of the SS *Savannah*. This voyage was unique in that for the first time an ocean-going vessel had employed steam for propulsion for part of the journey. We can still be proud that that pioneering voyage was accomplished by an American vessel.

In proclaiming this day, the President said:

A strong and profitable merchant fleet is vital to America's economic welfare and defense capability. The American flag on merchant vessels on the high seas and in foreign ports is a symbol of our Nation's dedication to peaceful trade throughout the world.

Mr. Speaker, this statement contains the basic points which emphasize and underline our need for a merchant marine industry. These points are: Our economic welfare, our defense capability, and our international trade. There is a fourth point which can be added to these three which is entirely pertinent. This is the contribution that U.S.-flag international carriers can and do make to our balance of payments, or our imbalance, as the case seems to be at present.

Together, these four points would seem to be sufficiently urgent and compelling to trigger a substantial response, especially in view of the gradual decline in our maritime industry. And make no mistake about it, the industry is on the decline. It is not too strong a term to call the situation alarming.

I think that the projected level of our privately owned U.S.-flag dry-cargo fleet of vessels very adequately demonstrates what is happening to our entire merchant marine industry. And this is why so many of us who are aware of the situation are concerned.

On January 1, 1968, there were 663 dry-cargo vessels in the U.S.-flag fleet, which were 25 years of age or less. In just 1 year, this total had dropped by 50 vessels to 613, on January 1, 1969. At the rate we are going, the 1968 total of 663 vessels will have fallen to 244 by January 1972.

This is the direction our merchant marine is going. It is not in the best interests of the United States to stand by and permit this decline to continue.

I am pleased to point out that your Committee on Merchant Marine and Fisheries did face up to its responsibilities and acted to arrest the decline in our maritime industry. The committee earlier this month reported out a meaningful authorization for the maritime program. For the item of ship construc-

tion assistance, the committee raised the amount requested, which had been only about \$16 million, to what it felt was a more appropriate level of \$145 million.

The level of \$145 million was selected, not as the maximum possible for a vessel revitalization program which we could or should be providing for, but as a floor below which we dare not go.

Subsequently, the House gave its full assent to the action taken by the committee by passing the authorization measure without amendment or even serious debate.

This country has almost endless shorelines, and exposure to oceans, gulf, and deepwater lakes. It creates an enormous demand for goods of all kinds, leading to vast levels of international trade. This was true of the past as well as at present. With these attributes, it is only natural that this country has a tradition of a strong and vigorous merchant marine.

But we could lose this important industry if we continue to permit it to decline. And there is not a great deal of time left in which to decide whether we intend to retain an active merchant marine, or to see it wither on the vine and disappear.

Let us hope the time never comes when National Maritime Day merely calls to memory something that once flourished in our midst and then passed out of existence.

A LEGISLATIVE REPORT FOR VOLUNTEER FIREMEN

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HORTON. Mr. Speaker, many of us in the House have taken a great interest in the problems facing volunteer fire departments and ambulance services. The dedicated men and women who give freely of their time and efforts are performing a most vital service, particularly in the less populated areas.

Mr. Harold Semling has written a very comprehensive article for the May issue of Fire Chief magazine on the legislation pending before the Congress which affects the volunteer firemen. I would like to share with my colleagues his rundown on this legislation:

A REPORT FROM WASHINGTON: BILLS AFFECTING THE FIRE SERVICE

Fire chiefs have a considerable stake in legislation now pending in the 91st Congress.

Among the thousands of bills already introduced in the House and Senate are many, which, if passed, could be of substantial value to fire departments. (Over 9,000 bills had been introduced in the House and 1,600 in the Senate by the end of March.)

Since most of these bills will never become law or even be given serious consideration, it is up to the fire chief to work now for his legislative objectives. Simply, this is best done by personal contacts and writing to his Senators and Congressman.

Here is a brief rundown of some major legislation pending in Congress of concern to the fire chief.

Federal benefits would be extended to all firemen killed or totally disabled in the line

of duty, whether or not a specific federal law was involved under a proposal pending in the Senate and House of Representatives.

Congress last year passed a bill to provide compensation in case of injury or death to law enforcement officers in cases involving violation of national law. Under proposals advanced by Sen. Birch Bayh (D. Ind.) and Rep. Andrew Jacobs (D. Ind.) and 20 other Congressmen this coverage would be extended to non-federal cases and firemen (S. 1277 and H.R. 7989).

"This expanded coverage would be justified," according to Senator Bayh, "because the job of . . . fire protection has in many cases become a national responsibility."

"It is truly difficult today to draw hard and fast lines which separate jurisdictional responsibility for public employees who are devoted to protecting the lives and property of all persons without regard to their domicile, place of origin, or final destination," according to Sen. Bayh.

Federal contributions would be supplementary and would be adjusted according to other compensation to which the local fireman was entitled. Under the bill, a widow who is the sole survivor would be eligible for 45% of the monthly wage rate of her deceased husband, Bayh explains. If there are dependent children the rate could go up to 75% of the deceased's wages.

Legislation to make it unlawful to injure, intimidate, or to interfere with any fireman performing his duties during the course of any riot is pending before the House Judiciary Committee (H.R. 7594, introduced by Rep. Thomas S. Kleppe [R. N. Dak.]).

Compensation would be provided for firemen not employed by the United States government who are killed or injured in the performance of duty during a civil disorder under a number of bills introduced in the House of Representatives and referred to the House Judiciary Committee. Many of these bills would also provide for damage or loss of firefighting equipment not covered by insurance. Some of these bills are: H.R. 890 by Rep. Philip E. Ruppe (R. Mich.), H.R. 3105 by Rep. Lawrence J. Hogan (R. Md.), H.R. 4166 by Rep. Henry Helstoski (D. N.J.); H.R. 5218 by Rep. Robert H. Michel (R. Ill.), and H.R. 9128 by Rep. Joseph E. Karth (D. Minn.).

The Federal Property and Administrative Act would be amended so as to permit donations of surplus property to volunteer firefighting organizations under legislation proposed in the House of Representatives. Among the legislation's sponsors are Rep. John O. Marsh (D. Va.) (H.R. 1210), Rep. Samuel S. Stratton (D. N.Y.) (H.R. 2132), Rep. Cornelius Gallagher (D. N.J.) (H.R. 1117), and Rep. Henry Helstoski (D. N.J.) (H.R. 2361). Stratton would include municipalities. Rep. Marsh would include volunteer rescue squads. Rep. Helstoski would include Indian groups under federal supervision and rescue organizations at 50 per centum of the estimated market value, as would Rep. Gallagher.

Legislation has been introduced in the House of Representatives to prohibit certain acts involving the use of incendiary devices (H.R. 7468 by James G. Fulton [R. Pa.] and H.R. 8159 by Hamilton Fish [R. N.Y.]). The bills were sent to the House Judiciary Committee.

The National Commission on Fire Prevention and Control would receive \$665,000 to carry out its functions under the Fire Research and Safety Act under legislation (H.R. 7208) introduced by Rep. H. B. Gonzalez (D. Tex.) and referred to the Appropriations Committee.

A dozen Senators are sponsoring a bill (S. 413) by Sen. Joseph M. Montoya (D. N.M.) to provide for cooperative rural fire protection. The legislation would provide for technical assistance, training, and equipping fire control forces to suppress both structural

and wildfires in rural areas which are now under no organized protection or have only limited protection. The bill would be administered by the Agriculture Department. It would, according to Sen. Montoya, be a local effort supported by federal-state cost sharing at a 75-25 percent level. The bill was referred to the Senate Agriculture and Forestry Committee.

The President would be authorized to proclaim the Second Saturday in May of each year as a "day of recognition" for firefighters under a bill (H.R. 3698) introduced by Congressman Jerome R. Waldie (D. Calif.) and referred to the House Judiciary Committee.

Congressman Charles C. Diggs, Jr. (D. Mich.), has suggested that Congress pass a resolution (H. Con. Res. 171) supporting one uniform, nationwide, fire-reporting telephone number. The proposal was referred to the House Interstate and Foreign Commerce Committee. There are other similar proposals.

Representative Henry J. Helstoski (D. N.J.) has proposed legislation under which the government would provide temporary assistance where public school buildings are destroyed by fire disaster or natural causes. The bill (H.R. 2360) was referred to the House Committee on Education and Labor.

There have been a number of bills to provide federal assistance for special projects to demonstrate the effectiveness of programs to provide emergency care for heart attack victims by trained persons in specially equipped ambulances. These bills have been referred to the House Interstate and Foreign Commerce Committee.

Statutory subsistence allowances, up to \$5 per day, received by firemen would be exempt from gross income for taxing purposes under a bill (H.R. 7911) introduced by Congressman Albert L. Watson (R. S.C.) and referred to the House Ways and Means Committee.

Congressman C. E. Gallagher (D. N.J.) has introduced a bill (H.R. 1121) which would change the Social Security Act to provide coverage under the hospital insurance benefits program for retired firemen and policemen who reach 65 years and who have at least ten years of service. The bill was referred to the Ways and Means Committee.

Ambulance drivers and attendants would be exempt from the minimum wage and overtime provisions of the Fair Labor Standards Act under a bill (H.R. 5490) introduced by Representative W. E. Brock (R. Tenn.) and referred to the House Committee on Education and Labor.

Fund raising activities of volunteer fire and ambulance companies would be exempt from federal excise taxation under a legislative proposal (H.R. 6987) of Rep. Frank J. Horton (R. N.Y.). The bill, sent to the House Ways and Means Committee, which is presently considering an overall revision of federal taxes, is aimed at providing more money for the volunteer fire departments.

Money is the biggest problem for the volunteer fire departments which now comprise 92 percent of all U.S. fire departments, Horton told the House when he introduced the bill. "Unfortunately, few local fire services have the resources to do the job properly," he said. Adding, "firefighting is no longer a question of jumping off the back step and running down the street to a brush fire. The job is bigger and more dangerous than ever before. Special equipment and special training are needed to fight today's fires. By 1975, we will need 20,000 more fire stations to adequately protect our smaller population centers."

"Local fire and ambulance departments need every penny of the money that they raise to meet the increasing demand for more facilities, equipment, and training centers," according to Horton.

Congressman Joseph P. Vigorito (D. Pa.) has proposed (H.R. 3696) that volunteer firemen's organizations be exempt from all

federal income taxes and reports. The bill was referred to the House Ways and Means Committee.

Congressman Ogden R. Reid (R. N.Y.) would have the Internal Revenue Code amended to provide a deduction from gross income for certain nonreimbursable expenses incurred by volunteer firemen. The bill (H.R. 2714), referred to the House Ways and Means Committee, would let volunteer fireman deduct expenses for uniforms, automobile accessories, maintenance and depreciation, gasoline and other items used in connection with his firefighting activities.

Volunteer fire companies would be allowed the same special postage rates on second- and third-class mail that is now available to certain nonprofit organizations under legislation introduced in the House of Representatives and the Senate.

Sen. J. Caleb Boggs, (R. Del.) with 29 cosponsors has re-introduced the legislation (S. 20) in the Senate which was referred to the Senate Post Office and Civil Service Committee.

Rep. William V. Roth (R. Del.) has introduced the bill (H.R. 1343) in the House and it was referred to the House Committee on Post Office and Civil Service. Bills similar to Roth's have been introduced by others.

"Other groups already authorized by statute to use such preferential rates include religious, educational, scientific, philanthropic, agricultural, labor, veterans, fraternal, associations of rural electric cooperatives, and one highway or development publication of each State of the Union," Sen. Boggs explains.

The Delaware Senator believes that "this is a group to which volunteer fire companies should belong. There is no more dedicated or unselfish group of men and women in the country than those belonging to volunteer fire companies and their auxiliaries."

"A prime fund raising program with most fire companies is a fund solicitation by mail. Enactment of this bill," according to Sen. Boggs, "would be of immediate specific assistance in this effort." The Internal Revenue exempts volunteer fire companies from taxes and allows as a personnel deduction any contributions to volunteer fire companies. Postal authorities have said from time-to-time they use the Internal Revenue Service's definition of a nonprofit organization as a guide for permitting nonprofit mailings by organizations.

The Senate on three separate occasions, despite objections from the Post Office, has passed such legislation and sent it to the House. In 1966, the House Committee on Post Office and Civil Service favorably reported the bill and sent it to the House floor for action. The legislation was never taken up in the closing days of that Congress.

Sen. Boggs expresses the hope that "Senate Post Office and Civil Service Committee would take early action on it and that hopefully the Congress would enact it and it could become law."

Legislation proposed by Rep. Thaddeus J. Dulski (D. N.Y.), Chairman of the House Post Office and Civil Service Committee, would improve conditions of firemen employed by the federal government. Other members of the House have introduced similar bills, all of which are pending before the Post Office Committee.

One bill (H.R. 7364) would improve the basic work week for firefighters employed by the government.

A second bill would liberalize the requirements as to age for the appointment of firefighters in the federal service.

Senator Ernest F. Hollings (D. S.C.) has proposed that federal firefighters be considered as being employed in hazardous occupations. His bill (S. 578) is before the Senate Post Office Committee.

Fire Chiefs have a considerable number of friends in Congress, but positive results will depend on hard work and concentrated action.

DISTORTION THREATENS FREE PRESS

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. RARICK. Mr. Speaker, apparently people the world over are coming to know the Washington Post.

The Russians have expelled their Moscow reporter for distorting the facts as antirevolutionary action—which apparently means that their news line for American consumption somehow got to the Kremlin. The Malaysians banned their Newsweek magazine on the grounds it contained "distortions of facts," and the Thais even refused admittance of one of their reporters to their country, because they feared distortion of the facts in reporting.

Yes, the Washington Post reputation would now seem worldwide—distorters of fact.

Mr. Speaker, I include a news clipping from the Evening Star in the RECORD at this point:

[From the Washington (D.C.) Evening Star, May 21, 1969]

THAILAND CONVINCED "LEFTISTS" WEAKEN U.S. WILL IN ASIA

BANGKOK.—Thal officials are convinced that what they consider to be leftist criticism in the American press and intellectual community are causing a softening of America's will to fight Communist aggression in Asia.

This conviction was reflected in the decision of the Thal government to refuse to admit a critical American correspondent into the country. But Thal Foreign Minister Thanat Khoman has spoken freely on the subject for the past two or three years.

In press conferences, on speaking tours, in letters to influential American friends and other contacts, the eloquent foreign minister has accused Western "subversives" of preventing the United States from winning the war in Vietnam and endangering America's relations with Thailand.

He has privately named correspondents whom he regards as pro-Communist or "liberal," a word he uses with considerable disdain.

ADMITTANCE DENIED

Thanat's abhorrence of Western criticism was epitomized in his government's decision to deny admittance to Stanley Karnow of the Washington Post, who arrived here Sunday night to cover the conference of the Southeast Asian Treaty Organization. Karnow was put on the next flight out of the country.

Officials were annoyed with articles in which Karnow had questioned the value of large-scale American aid to Thailand and had pointed out the Thal government's historic inclination to switch diplomatic allegiances depending on the needs of the moment.

Thal sensitivity to foreign criticism has grown in proportion to the country's increasing commitment to American interests in recent years.

The government did not admit American warplanes were flying from Thailand to bomb parts of North Vietnam until more than two years after the air war had begun.

BASE VISITS CURBED

Thal officials still do not let reporters visit the bases except on rare occasions. And they are equally reluctant to let the press cover Thailand's own long-smouldering conflict against guerrillas in the northern and north-eastern provinces.

The aura of secrecy surrounding military activities in Thailand reflects to some degree the feeling among certain officials that the government may have slipped into much too close relationship with the U.S. Thal leaders, although they welcome American aid and have indicated they would like to decrease their country's over-all dependence on the U.S.

A FORMER NEWSMAN COUNSELS JOURNALISTS

HON. ED EDMONDSON

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. EDMONDSON. Mr. Speaker, one of the most perceptive young Oklahomans I know is James R. Jones, formerly appointments secretary to President Johnson, and now a practicing attorney in Tulsa, Okla.

Mr. Jones has an extensive background in journalism acquired before he turned to law and public service. Against this background, he has written an article, "It's Time To Interview the Journalists," in the current issue of Pace magazine.

The article reflects Mr. Jones' understanding of journalism and the problems of the journalist. It also reflects his opportunity, while serving President Johnson, to become acquainted intimately with the machinery and workings of politics and Government. The article contains criticism of the press, but it is responsible and understanding criticism. It also makes a series of constructive suggestions to the profession of journalism.

Mr. Speaker, I believe this article will be of great interest to the Members of the House, and I would like to insert it in the RECORD at this point:

IT'S TIME TO INTERVIEW THE JOURNALISTS

(By James R. Jones)

Journalism and public service are, to me personally, the two greatest callings in life. In both areas you have difficult challenges and unlimited opportunity to serve your fellow man. In both areas your efforts can leave behind a heritage of accomplishment for society which no amount of wealth can purchase. And in both areas the cry for new thought and unprejudiced judgment was never greater.

The main safeguards of our democratic institutions are our First Amendment freedoms of speech and press. These are what basically distinguish this nation from every other people in the world.

With these freedoms the press has gained enormous power—which is as it should be because the press is our most effective deterrent to tyrannical government. But with all this power comes an equally enormous responsibility. The responsibility of courage. The responsibility to tell both sides of the story. The responsibility of accuracy. The responsibility of carefully distinguishing news from editorial opinion.

There are laws and regulations to protect society when a thief enters your home, a doctor carelessly performs surgery, the loan

shark extorts exorbitant interest, or the grocer sells spoiled meat.

But how much more damaging it is when a reporter misquotes or misidentifies an innocent citizen, an editor vilifies a man with an unpopular cause, the publisher preaches hate of minorities, the television commentator degrades an honest public official by reporting with a certain smirk on his face. For these instances of malpractice, society has virtually no remedy.

Despite all these shortcomings, of course, there is another 99 percent of the journalistic profession which is honest, accurate and unbiased.

But there are danger signals. The power of the press rests on its credibility and when this is tarnished, even by a few reporters, not only journalism but our whole society suffers. When the average citizen can't believe what he reads, a free press is in jeopardy.

Last fall 1,200 college journalists gathered in New York City for a conference. A New York Times reporter interviewed some of these young people. This is the lead on that Times article: "Most newspapers are biased. Television is superficial. Most magazines are immature."

This is not the judgment of some congressman who claims he was treated unfairly by a reporter. These are criticisms of young men and women who aspire to join the honored ranks of great reporters and editors.

Earlier this year a national weekly news magazine wrote in an "inside story" that Secretary of State Dean Rusk had strongly opposed any bombing halt. The magazine said it took the Secretary of Defense and a White House Assistant to convince President Johnson that Rusk should be overruled.

The first problem is the article was wrong in its facts. I know that Mr. Rusk did not oppose the bombing halt as indicated in the article. The appalling fact, however, is that this magazine never bothered to call Mr. Rusk to ask his side of the story. That's not professional reporting.

These are the kinds of examples that prompted one of the fine reporters of our time, Howard K. Smith, last year to terminate his nationally syndicated column for an indefinite period. In his final column Mr. Smith explained why. He said he felt that the American press, by creating phony heroes or phony villains, might be contributing to the confusion and frustration now damaging the nation's spirit. He said that some journalists have turned reporting into image making.

Stokely Carmichael is a good case in point. A few years ago, he was unknown. Today he is a household word. Of course, this ordinarily might do no harm, but in this case Mr. Carmichael is a flagrant example of extremism. Therefore he is automatically good copy—or made to be good copy—and this has had a damaging effect on Negro leaders who are not extremists. It would seem that the only Negro some of the media wish to pay attention to is one holding a torch or honing a knife. There are many responsible Negro leaders—in fact, the overwhelming majority. Mr. Smith reported one responsible Negro leader as saying: "If I say no to Stokely, you fellows won't print it in one sentence on the back page. My people think I am doing nothing. But if I go see him, it's on the front page and my people think I am in there pitching."

I do not object to the free publicity given the Carmichaels and the H. Rap Browns. But I do object when it's not balanced reporting. For then it makes it harder for a President and Congress to do what needs to be done and get the funds for programs to meet the problems. It makes life difficult for responsible Negro leaders who aren't getting publicity and acclaim. And worst of all, it frightens a large segment of our society and decimates the ranks of those working for racial progress.

Mr. Smith's last column might remind us all that the Fourth Estate forms one of the

most potent forces in this nation. He wrote that with this power, there must come responsibility, some restraint, some understanding, that the press quite literally can create movements and people and leaders and problems—and can make those stories come true.

My only quarrel with Howard Smith is that he didn't stay within the profession to try to correct the wrongs that exist. How do we right these wrongs?

This question bothered a group of high-level government officials last year. Here are some of their suggestions:

a) Journalism is one of the professions. Yet, it is the only profession that has no entrance examinations or requirements. The press might choose an examining board of distinguished journalists and require entrants to pass examinations showing that they understand the times and their circumstances.

b) This board of journalists should set high standards of professionalism and jealously keep watch to insure that reporters and editors live up to these standards. This should not be a board of censors. However, when injustices occur through inaccurate, unbalanced or false reporting, the board should be quick to correct the errors publicly.

c) Finally, it may be time to change the basic attitude of journalism. Perhaps more attention should be paid to the common, everyday problems that plague society, and to the efforts that succeed and therefore contain lessons we need to learn.

Many men are disturbed by the shortcomings of the few in journalism. But correction and change can only be meaningful when they come from within.

Just as no public official should rest with pride so long as one public servant is dishonest, just as no lawyer can take pride in his bar so long as one fellow barrister inadequately represents a client, so no responsible journalist should rest so long as any irresponsibility exists in his profession.

SENATE—Friday, May 23, 1969

The Senate met at 12 o'clock noon, and was called to order by the Vice President.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, from whom cometh every good and perfect gift, we lift our hearts to Thee in thanksgiving for life and health, for love and friendship, for work to do and strength to do it, for this good land and all its people. Come near to those who have special need of Thee—the poor, the infirmed, the unloved. Send out Thy light and truth through all who teach and heal and pray that the weak may be made strong and the strong kept pure and just.

Grant us in our daily duties here the higher wisdom which Thou dost bestow upon those who seek to serve Thee in spirit and in truth.

Through Jesus Christ our Lord. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, May 20, 1969, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

PROPOSED SUPPLEMENTAL APPROPRIATION—COMMUNICATION FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1969 in the amount of \$160,000,000, for payment of the first installment of the U.S. share of the 1969-71 increase in the resources of the International Development Association, which, with accompanying papers was referred to the Committee on Appropriations, and ordered to be printed.

MESSAGES FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT

Under the authority of the order of the Senate of May 20, 1969, the Secretary of the Senate, on May 21 and 22, 1969, received messages in writing from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(For nominations received on May 21, and 22, 1969, see the end of the proceedings of today, May 23, 1969.)

EXECUTIVE REPORTS OF COMMITTEES SUBMITTED DURING ADJOURNMENT

Under authority of the order of the Senate of May 20, 1969, the following favorable executive reports of nominations were submitted:

On May 21, 1969:

By Mr. JACKSON, from the Committee on Interior and Insular Affairs:

William T. Pecora, of New Jersey, to be Director of the Geological Survey.

On May 22, 1969:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Francis J. Galbraith, of South Dakota, to be Ambassador to the Republic of Indonesia; Sheldon B. Vance, of Minnesota, to be Ambassador to the Democratic Republic of the Congo;

Oliver L. Troxel, Jr., of Colorado, to be Ambassador to the Republic of Zambia;

John Davis Lodge, of Connecticut, to be Ambassador to Argentina;

Matthew J. Loomam, Jr., of the District of Columbia, to be Ambassador to the Republic of Dahomey;

Francis E. Meloy, Jr., of the District of Columbia, to be Ambassador to the Dominican Republic;

Spencer M. King, of Maine, to be Ambassador to Guyana;

Armin H. Meyer, of Illinois to be Ambassador to Japan;

Jack Hood Vaughn, of Virginia, to be Ambassador to Colombia;

David H. Popper, of New York, to be Ambassador to the Republic of Cyprus;

Kingdon Gould, Jr., of Maryland, to be Ambassador to Luxembourg;

Bert M. Tollefson, Jr., of South Dakota, to be an Assistant Administrator of the Agency for International Development; and

James F. Leonard, Jr., of Maryland, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency.

Mr. STENNIS. From the Committee on Armed Services, I report favorably the nominations of two flag officers and one general officer in the Navy and Marine Corps. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations ordered to be placed on the Executive Calendar are as follows:

Rear Adm. Maurice F. Weisner, U.S. Navy, having been designated for commands and other duties determined by the President, for appointment to the grade of vice admiral while so serving;

Vice Adm. John B. Colwell, U.S. Navy, for appointment to the grade of vice admiral on the retired list; and

Lt. Gen. Lewis W. Walt, U.S. Marine Corps, for appointment to the grade of general while serving as Assistant Commandant of the Marine Corps.

Mr. STENNIS. Mr. President, in addition, I report favorably 5,162 nominations in the Navy in the grade of commander and below and 120 appointments in the Marine Corps in the grade of second lieutenant. Since these names have already been printed in the CONGRESSIONAL RECORD, in order to save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations ordered to lie on the desk, are as follows:

Jon F. Abel, and sundry other officers of the Navy, for permanent promotion to the grade of lieutenant;

Guy H. Able III, and sundry other midshipmen (Naval Academy) to be permanent ensigns in the line of staff corps of the Navy;

Richard S. Ploss, and sundry other U.S. Army cadets to be permanent ensigns in the line or staff corps of the Navy;

David V. Edling, and sundry other Naval Reserve Officers Corps candidates to be permanent ensigns in the line or staff corps of the Navy;

Bert M. Anderson, and sundry Naval enlisted scientific education program candidates to be permanent ensigns in the line or staff corps of the Navy;

Robert F. Birtcil, Jr., and sundry Naval Reserve officers to be permanent lieutenants (junior grade) and temporary lieutenants in the Dental Corps of the Navy;

John F. Clymer and Robert D. Staub, Naval Reserve officers to be permanent lieutenant and temporary lieutenant commander in the Medical Corps of the Navy;

Jim D. Anderson, and sundry Naval Reserve officers to be permanent lieutenants (junior grade) and temporary lieutenants in the Medical Corps of the Navy; and

Nicolas E. Walsh (Air Force cadet) to be a permanent ensign in the line of the Navy.

Kenneth D. Aanerud, and sundry other officers for permanent promotion to the grade

of lieutenant (junior grade) in the line and staff corps of the Navy;

Lt. Comdr. Lowell J. Brown, Medical Corps, U.S. Navy, for temporary promotion to the grade of commander in the Medical Corps;

Stanley A. Bloustine, and sundry other officers, for temporary promotion to the grade of lieutenant commander in the Medical Corps, Navy;

Ervin A. Ashford, and sundry other officers, for temporary promotion to the grade of lieutenant in line and staff Corps, Navy;

Lt. (jg.) Joanne L. Schmitt, U.S. Navy, for permanent promotion to the grade of lieutenant;

Nathaniel S. Barbour, and sundry other U.S. Navy officers, for permanent promotion to the grade of lieutenant (junior grade);

Charles R. Jackson, U.S. Navy, for transfer to and appointment to the Judge Advocate General's Corps in the permanent grade of lieutenant and the temporary grade of lieutenant commander;

Lt. Carl H. Horst, U.S. Navy, for transfer to and appointment in the Judge Advocate General's Corps in the permanent grade of lieutenant (junior grade) and the temporary grade of lieutenant.

Thomas J. Jarosz, and sundry other Naval officers for transfer to and appointment in the Civil Engineer Corps in the permanent grade of lieutenant (junior grade) and the temporary grade of lieutenant;

Seley E. Moore and George B. Reynolds, U.S. Navy, for transfer to and appointment in the Civil Engineer Corps in the permanent grade of lieutenant (junior grade);

Larry A. Graves and William W. Weissner, U.S. Navy, for transfer to and appointment in the Supply Corps in the permanent grade of lieutenant (junior grade);

Lt. (jg.) Ray K. W. Hartzell, Supply Corps, U.S. Navy, for transfer to and appointment in the line of the Navy in the permanent grade of lieutenant (junior grade);

Ronald J. Frederick and R. K. M. Hartzell, U.S. Navy, for transfer to and appointment in the line of the U.S. Navy in the permanent grade of ensign;

Randall C. Allen, and sundry other Naval officers for transfer to and appointment in the Supply Corps in the permanent grade of ensign;

Harvey B. Lemon and Robert D. Mason, U.S. Navy, for transfer to and appointment in the Civil Engineer Corps in the permanent grade of ensign;

John P. Budrenich, U.S. Navy, for promotion to chief warrant officer;

Marvin M. Aldrich, and sundry other U.S. Navy officers, for promotion to chief warrant officer;

Lt. (jg.) Joseph H. Frates, Chaplain Corps, U.S. Navy, for temporary promotion to lieutenant commander;

Lt. (jg.) William R. Broadwell, U.S. Navy, for permanent promotion to lieutenant (junior grade);

Michael R. Andrew and sundry other Naval Reserve Officer Training Corps candidates to be permanent ensigns;

Raymond F. Fike, and sundry naval enlisted scientific education program candidates to be permanent ensigns;

Howard A. Platt (Naval Reserve officer) to be a permanent lieutenant and a temporary lieutenant commander;

Stephen H. McCoy (civilian college graduate) to be a permanent lieutenant (junior grade) and temporary lieutenant in the Medical Corps of the Navy;

John D. Berryman, and sundry other Naval Reserve officers to be permanent lieutenants (junior grade) and temporary lieutenants;

Adam E. Feret, Jr. and several Naval Reserve officers to be permanent lieutenants (junior grade) and temporary lieutenants;

Max A. Harrell, and several U.S. Navy off-

cers to be reverted to permanent chief warrant officers;

Frank E. Kline, U.S. Navy retired officer, to be a lieutenant, limited duty only.

John E. Allen and sundry U.S. Naval Academy graduates, for permanent appointment to the grade of second lieutenant in the Marine Corps;

Perc L. Jones and Viet S. Reid, U.S. Air Force Academy graduates, for permanent appointment to the grades of second lieutenant in the Marine Corps;

Steven A. Bosshard, and several other U.S. Military Academy graduates, for permanent appointment to the grade of second lieutenant in the Marine Corps;

Ronald M. Gilbert and Harbert H. Markie, Naval Reserve Officer Training Corps, for permanent appointment to the grade of second lieutenant in the Marine Corps;

Allen L. Force, naval enlisted scientific education program, for permanent appointment to the grade of second lieutenant in the Marine Corps; and

Joseph H. Anderson, and sundry other staff noncommissioned officers for temporary appointment to the grade of second lieutenant in the Marine Corps.

REPORTS OF COMMITTEES SUBMITTED DURING ADJOURNMENT

Under authority of the Senate of May 20, 1969, the following report of a committee was received on May 21, 1969:

Mr. SPARKMAN, from the Committee on Banking and Currency, reported an original bill (S. 2224) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes, and submitted a report (No. 91-184) thereon, which was printed.

Under authority of the Senate of May 20, 1969, the following reports of committees were received on May 22, 1969:

Mr. MAGNUSON, from the Committee on Commerce, without amendment, the bill (S. 1373) to amend the Federal Aviation Act of 1958, and submitted a report (No. 91-185) thereon, together with individual views of Mr. PEARSON, which report was printed.

Mr. FELL, from the Committee on Labor and Public Welfare, with amendments, the bill (S. 1611) to amend Public Law 80-905 to provide for a National Center on Educational Media and Materials for the Handicapped and for other purposes and submitted a report (No. 91-195) thereon, together with individual views of Mr. DOMINICK, Mr. PROUTY, and Mr. MURPHY, which was printed.

By Mr. ALLOTT, from the Committee on Interior and Insular Affairs, without amendment:

S. 574. A bill to authorize the Secretary of the Interior to engage in feasibility investigations of certain water resource developments (Rept. No. 91-186).

By Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, without amendment:

S. Res. 177. A resolution authorizing the printing of a manuscript entitled "The First Army in Europe" as a Senate Document (Rept. No. 91-193);

S. Res. 195. A resolution authorizing the printing of additional copies of Senate Document 91-13 entitled "Review of U.S. Foreign Policy and Operations, 1968" (Rept. No. 91-192);

S. Con. Res. 21. A concurrent resolution to print additional copies of parts 1 and 2, thermal pollution 1968 hearings (Rept. No. 91-191);

H. Con. Res. 35. A concurrent resolution authorizing the printing of additional copies of a Veteran's Benefits Calculator (Rept. No. 91-187); and

H. Con. Res. 95. A concurrent resolution authorizing certain printing for the Committee on Veterans' Affairs (Rept. No. 91-188).

By Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, with an amendment:

H. Con. Res. 192. A concurrent resolution to reprint brochure entitled "How Our Laws Are Made" (Rept. No. 91-190).

By Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, with amendments:

H. Con. Res. 162. A concurrent resolution authorizing the printing of the book "Our American Government," as a House document (Rept. No. 91-189).

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, without amendment:

S. 126. A bill to designate certain lands in the Pelican Island National Wildlife Refuge, Indian River County, Fla., as wilderness (Rept. No. 91-197); and

S. 1652. A bill to designate certain lands in the Monomoy National Wildlife Refuge, Mass., as wilderness (Rept. No. 91-198).

By Mr. YARBOROUGH, from the Committee on Labor and Public Welfare, with an amendment:

S. 1519. A bill to establish a National Commission on Libraries and Information Science, and for other purposes (Rept. No. 91-196).

By Mr. PASTORE, from the Committee on Commerce, with amendments:

S. 1046. A bill to protect consumers by providing a civil remedy for misrepresentation of the quality of articles composed in whole or in part of gold or silver, and for other purposes (Rept. No. 91-194).

KATHLEEN T. O'LEARY—REPORT OF AN ORIGINAL RESOLUTION

Under the authority of the Senate of May 20, 1969, Mr. JORDAN of North Carolina, reported on May 22, 1969, from the Committee on Rules and Administration, the following original resolution (S. Res. 202) to pay a gratuity to Kathleen T. O'Leary:

S. RES. 202

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Kathleen T. O'Leary, widow of Jeremiah A. O'Leary, Senior, an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

DORA L. DOWNING—REPORT OF AN ORIGINAL RESOLUTION

Under the authority of the Senate of May 20, 1969, Mr. JORDAN of North Carolina, reported on May 22, 1969, from the Committee on Rules and Administration, the following original resolution (S. Res. 203) to pay a gratuity to Dora L. Downing:

S. RES. 203

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Dora L. Downing, widow of Carl Downing, an employee of the Senate at the time of his death, a sum equal to ten and one-half months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

RESOLUTION TO CONSERVE OIL AND GAS

Under authority of the Senate of May 20, 1969, the following report of a committee was received on May 23, 1969:

By Mr. MOSS, from the Committee on Interior and Insular Affairs, without amendment:

S.J. Res. 54. A joint resolution consenting to an extension and renewal of the interstate compact to conserve oil and gas (Rept. No. 91-199).

MESSAGE FROM THE HOUSE RECEIVED DURING ADJOURNMENT

Under the authority of the order of the Senate of May 20, 1969, the Secretary of the Senate, on May 21, 1969, received the following message from the House of Representatives:

That the House had passed, without amendment, the bill (S. 256) to confer U.S. citizenship posthumously upon L. Cpl. Theodore Daniel Van Staveren.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution:

S. 256. An act to confer U.S. citizenship posthumously upon L. Cpl. Theodore Daniel Van Staveren;

H.R. 2948. An act for the relief of Maria Prescilla Caramanzana;

H.R. 3464. An act for the relief of Maria Balluardo Frasca;

H.R. 8188. An act to provide for the striking of medals in commemoration of the one hundredth anniversary of the founding of the city of Wichita, Kans.; and

S.J. Res. 104. To authorize the President to reappoint as Chairman of the Joint Chiefs of Staff, for an additional term of 1 year, the officer serving in that position on April 1, 1969.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Hackney, one of its reading clerks, informed the Senate that pursuant to the provisions of section 1, Public Law 86-42, the Speaker had appointed as a member of the U.S. delegation of the Canada-United States Interparliamentary Group the gentleman from Florida, Mr. PEPPER, vice Mr. GIBBONS of Florida.

The message also informed the Senate that pursuant to the provisions of section 1, Public Law 86-42, the Speaker had appointed as a member of the U.S. delegation of the Canada-United States Interparliamentary Group, the gentleman from New York, Mr. STRATTON, vice Mr. KEE of West Virginia.

The message announced that the House had passed the joint resolution (S.J. Res. 99) to authorize the President to issue annually a proclamation designating the first week in June of each year as "Helen Keller Memorial Week," with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills in

which it requested the concurrence of the Senate:

H.R. 1749. An act for the relief of Eagle Lake Timber Co., a partnership, of Susanville, Calif.;

H.R. 1948. An act to confer U.S. citizenship posthumously upon Pfc. Joseph Anthony Snitko;

H.R. 2238. An act to provide for the relief of certain civilian employees paid by the Air Force at Tachikawa Air Base, Japan;

H.R. 5615. An act for the relief of Maria Camilla Giuliani Niro;

H.R. 6400. An act for the relief of Reddick B. Still, Jr., and Richard Carpenter;

H.R. 6581. An act for the relief of Bernard A. Hagemann;

H.R. 8136. An act for the relief of Anthony Smilko;

H.R. 9088. An act for the relief of Clifford L. Petty;

H.R. 10060. An act for the relief of L. Cpl. Peter M. Nee, 2465662;

H.R. 10149. An act for the relief of Jack W. Herbstreit;

H.R. 10153. An act for the relief of Frances von Wedel;

H.R. 10595. An act to amend the act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program; and

H.R. 11400. An act making supplemental appropriations for the fiscal year ending June 30, 1969, and for other purposes.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred, as indicated:

H.R. 10595. An act to amend the act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program; to the Committee on Agriculture and Forestry.

H.R. 11400. An act making supplemental appropriations for the fiscal year ending June 30, 1969, and for other purposes; to the Committee on Appropriations.

H.R. 1749. An act for the relief of Eagle Lake Timber Co., a partnership, of Susanville, Calif.;

H.R. 1948. An act to confer U.S. citizenship posthumously upon Pfc. Joseph Anthony Snitko;

H.R. 2238. An act to provide for the relief of certain civilian employees paid by the Air Force at Tachikawa Air Base, Japan;

H.R. 5615. An act for the relief of Maria Camilla Giuliani Niro;

H.R. 6400. An act for the relief of Reddick B. Still, Jr., and Richard Carpenter;

H.R. 6581. An act for the relief of Bernard A. Hagemann;

H.R. 8136. An act for the relief of Anthony Smilko;

H.R. 9088. An act for the relief of Clifford L. Petty;

H.R. 10060. An act for the relief of L. Cpl. Peter M. Nee, 2465662;

H.R. 10149. An act for the relief of Jack W. Herbstreit; and

H.R. 10153. An act for the relief of Frances von Wedel; to the Committee on the Judiciary.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

MR. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

THE VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar, beginning with "new reports."

There being no objection, the Senate proceeded to the consideration of executive business.

The VICE PRESIDENT. The nominations on the Executive Calendar will be stated, as requested by the Senator from Montana.

OFFICE OF ECONOMIC OPPORTUNITY

The bill clerk read the nomination of DONALD RUMSFELD, of Illinois, to be Director of the Office of Economic Opportunity.

Mr. MANSFIELD. Mr. President, may I say that I, personally, am pleased that this nomination has been reported by the Committee on Labor and Public Welfare—unanimously, I understand.

It is my belief that Mr. RUMSFELD, a colleague of ours in the House, will do a good job as the Chief of the OEO. He of course, has indicated opposition to certain aspects of the poverty program in the past, but it is my belief that, on the basis of the questioning approach he has taken, he will do a better job as a result. I wish him well in his difficult endeavors.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I am delighted to yield to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, when this nomination went to the Committee on Labor and Public Welfare, I appeared in behalf of the nominee. I have known DON RUMSFELD for a long time, and I have watched his legislative career as well as his career before he came to Congress.

For a young man of his age, he has done extremely well, and he is in his fourth term in the House of Representatives. He has made his presence felt in many fields of endeavor, and I share with the majority leader the belief that he will do an excellent and forthright job in giving direction to this very important and sometimes highly controversial agency.

Mr. PERCY. Mr. President, I wish to commend the administration on its appointment of the Honorable DONALD RUMSFELD, of Illinois, as the Director of the Office of Economic Opportunity. He has, since 1962, been the able Representative from my own congressional district, and has rendered great service to the United States in that post. I know full well he has given up one of the safest seats in the Congress in order to

take up a position—I might say a perilous position, in the opinion of some—as head of the Office of Economic Opportunity. But he is man of courage, a man of great dedication, a man of concern for his fellow man, and a man who is committed to fulfill the broad sweep of authority of this office, and carry out the mandate that has been given to him by the President of the United States to care and to show concern for the underprivileged in this country.

I know that the administration is well aware of the sacrifice Representative RUMSFELD has made, and I think this is full evidence of the degree of dedication of the Nixon administration in appointing men of great competence, ability, and proven skill, with particularly great emphasis on the administrative skill that the men might have, and also the innovative skill that they might possess in pioneering new programs to break through, to find new answers for the old problem of poverty.

In recent weeks there has been criticism of a supposed lack of commitment of the Nixon administration to the problems of poverty and hunger in the United States. These criticisms have focused on hunger and the Job Corps. Yet the record clearly shows that President Nixon has now recommended the most ambitious and far-reaching program ever advanced by any administration in the field of hunger. Moreover, the Labor Department has revamped and consolidated manpower training programs so that a far more effective overall manpower training program can be undertaken.

At the same time, perhaps the most sweeping proposal ever made to fight the problems of poverty goes almost ignored by the same congressional critics—a proposal that means real dollar help to millions of Americans. I refer to the low-income allowance which would exempt 2.2 million families below the official Federal poverty standard from paying Federal income taxes. The Nation's poor will be completely relieved of income tax liability as well as the burden of making out returns. It lets poor people keep what they most need—their own hard-earned cash.

How simple, how logical, yet it could not be thought of in the past 8 years. It only took the new administration and Edwin Cohen, Assistant Secretary of the Treasury for Tax Policy, 6 weeks to work out the plan. For the first time the American Government recognizes the fact that it is an inequitable system that forces people to pay taxes when they cannot afford adequate food and clothing for their children or a decent place to live.

The low-income allowance is a simple plan. It is a variable amount that when added to the minimum standard deduction would total \$1,100. When added to the \$600 personal exemption, the total almost exactly matches the Federal poverty standard for each family size. A single individual would have no Federal tax liability up to \$1,700; for a couple the cutoff would be \$2,300; for a family of four \$3,500.

Above the cutoff point, the low-income

allowance would be reduced by \$1 for each \$2 of added income, thus phasing out gradually. It would not be reduced dollar for dollar of added income as so many welfare schemes today are established.

At one stroke the President has improved the economic situation of millions of Americans. I hope critics of this administration will give credit where credit is due. This is a brilliant step in the right direction.

If the President's plan had been introduced by administration critics and had been labeled a modified guaranteed annual income plan or a negative income tax plan these same critics might have hailed it as a major step forward. Never mind that the tired rhetoric of the past would have stirred unnecessary controversy and probably killed the idea. To many critics of the President a slogan that falls seems more important and worthwhile than a workable plan capable of being enacted into law. We now have a plan before us that will work. It does not have a fancy title but for those concerned with substance rather than veneer there should be no question of its far-reaching end results to improve the lot of million of America's less fortunate low-income individuals and families.

A look at the overall policies of the President to date in the field of poverty deserves a resounding commendation. I congratulate the President for this magnificent forward step, and for his appointment of Hon. DONALD RUMSFELD as the Director of the Office of Economic Opportunity.

Mr. BYRD of Virginia. Mr. President, I am sorry to report that the Office of Economic Opportunity once again is in the subsidized propaganda business.

A revealing article on this subject was written by Shirley Scheibla and published in the April 14 edition of Barron's magazine. I ask unanimous consent that Miss Scheibla's article, entitled "Subsidized Press," be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BYRD of Virginia. Mr. President, in 1967, the Senate approved an amendment which I offered to a supplementary appropriations bill which provided that none of the money furnished in that bill could be used "for establishing or operating a general coverage newspaper, magazine, radio station, or television station." Of course, that amendment does not affect the use of currently appropriated funds.

But the intent of Congress is plain. Thus, tax funds are being used in a way not intended by Congress.

I hope that former Representative RUMSFELD, whose nomination will be confirmed today, will give this matter prime attention as he takes over as Director of the Office of Economic Opportunity.

Among the publications to which Miss Scheibla calls attention is the Spokesman, published by the Office of Economic Opportunity Council, 1449 Mendell Street, San Francisco, Calif.

The February 1969 edition of the *Spokesman* includes a "News Sketch" column including datelines from New York, Sacramento, Washington, Memphis, Chicago, and Jacksonville, Fla. Nearly all of these so-called news sketches have a black racist theme.

The quality of the journalism is suggested by the fact that the senior Senator from California is described as "right-wing conservative dancer MURPHY."

The item from Memphis reports as follows:

MEMPHIS, TENN.—A committee of the National Council of Churches has reported violence is an acceptable tool for use by the victims of injustice. It further stated that there is a vast difference between the violence used in oppressions and violence used by the oppressed. And, that violence may be justified to seek social justice if nonviolent means fail.

The same page of the *Spokesman* includes an announcement of a birthday celebration for Huey P. Newton, the Black Panther leader jailed for murder. This announcement states that some of the proceeds from the celebration were to go to the Eldridge Cleaver bail fund. Mr. Cleaver, of course, is the Black Panther leader missing since late last year after his bail was revoked.

The same page of the *Spokesman* also advertises the Malcolm X Educational Center, which is called "a black school for black children operated by black people in the total black community."

The *Spokesman* is only one extreme example of a large number of publications subsidized by OEO. The "Marin City Memo," issued by the Marin City Economic Opportunity Council Area Office, 630 Drake Avenue, Marin City, Calif., is a similar propaganda sheet.

The August 15, 1968, issue quotes Dick Gregory as saying:

Riots are nothing new. They're just a ghetto version of a fire sale.

Another OEO-backed publication is the *Crusader*, published by United Community Corp., 449 Central Avenue, Newark, N.J. The September 1968, issue of the *Crusader* had an editorial entitled, "Communications and the Poor," which said in part:

The federally-supported war against poverty has given new hope to the poor, the disinherited, the neglected and the abused. The poor have come to recognize that their demand for a free and equal access to the mass media is an intrinsic part of their being able to succeed in the struggle for freedom from hunger, from privation, from exclusion. They have come to understand that generic to their struggle is the battle for men's minds, a battle that must be won also if our democratic process is to survive intact, not be torn by divisiveness. . . . No one outside believes that what is happening here is important enough to assign any priority to. . . . We need a voice now. That is clearly indicated. We need access to mass communications capability now to save and rebuild our cities now, not when it becomes convenient to consider it.

The May-June 1968, issue of the same publication carried a story on an investigation of the antipoverty program in Newark by the senior Senator from Arkansas who called it a witch hunt and a shocking misuse of public funds.

In Utica, N.Y., the Inner City Opportunity Center publishes the *Voice of INCO*, which recently published a solicitation for teen members for the Congress of Racial Equality.

The source of many of these publications is a manual in newspaper form issued by the New Jersey Community Action Training Institute last year. This publication, called *News Man*, advises how to launch a community action newspaper.

Clearly, the antipoverty agency seems to be in the propaganda business in a big way.

EXHIBIT 1

SUBSIDIZED PRESS: THE POVERTY PROGRAM IS BUILDING ITS OWN PROPAGANDA MACHINE (By Shirley Scheibla)

"When the press is supported or subsidized by federal funds, it is disabled to perform its rightful function as a great interpreter between the government and the people. This is so because the press is no longer free. On the contrary, it is enslaved and enslavement of the press will inevitably be followed by enslavement of the people." (Senator SAM J. ERVIN, Jr., Democrat, of North Carolina).

WASHINGTON.—Commenting on the violence-ridden strike at San Francisco State College, a leading story in a San Francisco newspaper in February ran as follows: "The only reason the strike was called was as a last resort to bring out into the open their (the students') grievances and the present injustices and irrelevances on the campus of a school which belongs to this community. . . . The basic truth of the strike is the freedom of self-determination of students in their education versus the present misuse of the schools by irrelevant and outside political forces such as the office of the governor, state superintendent of schools and the like in trustees and such boards of directors who are totally alien to the needs and desires of Black and Third World students. The activities and grievances of the students deserve the sympathy of the local community."

CIVIL DISRUPTION

The publication which featured the story is *The Spokesman*, one of a growing number of newspapers published with the encouragement and financial support of the Office of Economic Opportunity. Issued by community action groups all over the country, many of the newspapers are promoting black militance, racial hatred, civil disruption, the cry of police brutality, community control of schools and colleges, and, not least, the war on poverty and all its works.

Congress has prohibited the use of federal anti-poverty funds for establishing or operating general coverage newspapers. However, OEO claims that the publications really are "newsletters," aimed at bridging "the communication gap often existing between the community action program and the people it serves."

According to a Public Affairs Handbook, *The Printed Word*, published by OEO last year and distributed to community action agencies, a publication is a "newsletter" if it "has a specific information objective and a limited audience," is not sold for profit, carries no paid advertising and is run by the local anti-poverty program. "Grantees," the Handbook declares, "are encouraged to publish newsletters or house organs which assist local anti-poverty efforts. These publications are generally financed under the administrative budget of the local agency."

Pictured in the Handbook, to illustrate what OEO means, is the front page of a "newsletter" called *The Crusader*, a product of the United Community Corp., top community action agency of Newark, N.J., which says it is "a free city-wide community news-

paper for the promotion of community action." Looking remarkably like a tabloid newspaper, the page carries a story about Newark citizens marching in front of the White House. In another issue *The Crusader* called the McClellan Committee's investigation of the role of anti-poverty workers in Newark's riots, "a witch hunt and a shocking misuse of public funds."

The OEO Handbook also includes elementary instructions for publishing "newsletters." With OEO funding, the Community Action Training Institute at Trenton, N.J., has gone a step further by publishing *The CATI News Man*, which the subheading identifies as "A Manual—In Newspaper Form—On How To Produce A Community Action Newspaper." The essentials, it says, are community problems, angry people and publishing facilities. A good community action newspaper, it declares, "makes people mad."

Enlarging on the Handbook's idea of not selling the newspapers for profit, the manual advises soliciting donations. "Be sure you don't ask people to buy a subscription to your paper, since this will cause difficulties with income tax and licensing laws," it explains.

The Office of Economic Opportunity is so pleased with the work of CATI that it has asked the Institute to provide assistance to community action training centers all over the country, at federal expense, of course. (There are 10 training centers to serve over 1,000 community action centers.) While the exact number and circulation of community action newspapers in existence are unknown, it is abundantly clear that they constitute a vast propaganda network.

Specifically, anti-poverty newsletters churn out vast quantities of propaganda for the war on poverty. For instance, the *TEOC News*, published by the Tampa (Fla.) Economic Opportunity Council, Inc., recently declared that an independent OEO is an absolute necessity.

CHRISTMAS ISSUE

Referring to OEO, Community Action News, a monthly publication of the Knox County Economic Opportunity Council at Barbourville, Ky., said in its Christmas issue: "Our country cannot afford to risk an interruption of a program experiment which is the last link of communication between the poor and non-poor." An offer to fund the 1969 anti-poverty programs of Wayne County, Mich., at the same level as 1968 is unacceptable, according to a front page story in the Wayne County OEO Newsletter, a slick, printed publication of the Economic Opportunity Committee of Eloise, Mich.

"Do not panic with the coming of the Nixon Administration," said a recent Community Action Newsletter published by the Ninth District Opportunity, Inc., of Gainesville, Ga. "America," it declared, "is a country of compassionate people, and humanitarian programs will not be stopped by any administration."

Publications which have lavished praise on OEO projects include *With the People*, issued by half-a-dozen community action agencies in Chicago; the *Neighborhood Journal*, by Community Progress, Inc. of New Haven, Conn.; *STOP Newsletter*, by the Southeastern Tidewater Opportunity Project of Norfolk, Va., and *The Advisor*, by the Charleston County Economic Opportunity Commission at Charleston, S.C.

HAPPY BIRTHDAY, HUEY

Black power and race hatred are also favorite themes of OEO-subsidized journalism. On this score, the story on the San Francisco State College strike was not the only one worthy of notice in the February issue of *The Spokesman*. It also carried an announcement of a birthday celebration in honor of Black Panther leader Huey P. New-

ton, now jailed for allegedly killing a man in California.

Scheduled as a speaker at the Black Panther celebration was Kathleen Cleaver, wife of Black Panther Eldridge Cleaver. (Mr. Cleaver was jailed in 1958 after conviction for assault with intent to commit murder. He was paroled in 1966, but had his parole revoked in connection with a gun battle with Oakland police officers. Subsequently he was released by a judge who ruled Mr. Cleaver was "a political prisoner." This action subsequently was overruled; both California and federal authorities have been seeking Mr. Cleaver since December 27, 1968.)

According to The Spokesman, tickets for the affair were available at Black Panther Party Headquarters at 1419 Fillmore and More's Books, 1435 Fillmore, and for \$2.50 at the door. It added that part of the proceeds would be used for the Newton-Cleaver Defense Committee and the Eldridge Cleaver Ball Fund.

The same issue sought contributions to the Malcolm X Educational Center, advised its readers to write or call the Black Draft Counseling Union and join the Welfare Rights Movement. In addition, it announced a community meeting to "amend the city charter to forbid the creation of para-military squads (by the San Francisco police)." . . .

Such inflammatory contents are nothing new for The Spokesman. In 1968, the February-March issue decried the jailing of Huey Newton for alleged murder and reported "some very significant ideas" of the Black Panthers, which included freeing Mr. Newton or bringing about "retribution," freeing of imprisoned black men not tried by their peers and exempting all Negroes from military service.

(The latest word on the Black Panthers came on April 2, when a New York grand jury indicted 21 members for conspiring to bomb five department stores, a police station and a railroad.)

A front-page story in the March-April 1968 issue of The Spokesman said, "Black people wake up; we are all in prison; we are all Huey Newtons. He may be doing time in jail but we are doing it in the ghetto." Signed by Adam Rogers, it declared, "If you want action, come join me in my fight for identity, equality, not civil rights, but human rights."

The Spokesman has accused the nation's cities or arming to carry out plans of genocide against black people, and said the U.S. is preparing concentration camps for blacks. It also quoted Richard Robers, executive director of the San Francisco Family Service Agency, as saying, "A civil war is almost inevitable unless the powers of white America face up to the fact that they have a responsibility to see that all children have some guarantee—decent economic income, housing, education and health assurances that exist for their own children."

Copies of all the aforementioned issues of The Spokesman are in the files at OEO headquarters.

In the same vein, the August 15, 1968, issue of the Marin City (Calif.) Memo, published by the Marin City Economic Opportunity Council, printed an editorial by Area Director James W. Coleman, who, after visits to Chicago, Detroit and Cleveland, found: "The social revolution continues to move across this nation. . . . There must be drastic social changes in the society now. . . . I talked to many black youths who still had anger and revenge for the white power structure." The same issue quoted black activist Dick Gregory as saying, "Riots are nothing new. They're just a ghetto version of a fire sale."

NEED POWER

"Power is the essential for the poor," according to the tabloid newspaper, The New Day, published by the Human Development Corp. of St. Louis. "If you want to beat the

small store cheating you. If you want to keep 'the man' off your back. If you want to get a job. If you want to get decent housing out of the slum lord. You have to have power," proclaimed the March 1968 issue of The New Day.

From a sister publication in Elizabeth, N.J., comes a similar theme. The May 1968 Community Action News, published by Community Action for Economic Opportunity, Inc., carried a letter to the editor signed by Josephine Nieves, acting director of the Northeast Regional Office of OEO in New York, which said, "Jobs alone will not necessarily solve the problems of the poor in America since it is to a large extent a question of power."

The same issue featured a story which said that a teenage community action group had petitioned the city to incorporate black history into the regular school curriculum. Another story said, "The Black Power Conference held July 20 through July 23 was an inspirational and educational gathering." Among the proposals reported were "developing Liberation Schools, setting up a Black Teachers Union—Separate From The White Summer Camps for Blacks only, development of Black Political Power. . . ." The Washington Evening Star called that same conference "a festival of hate."

The tabloid newspaper, The Neighborhood Journal, states in its masthead that it is owned and operated by the five Denver community action councils and "funded by a grant from the Office of Economic Opportunity." The September 20, 1968, issue devotes half a page to the views of "resident participants" in the Model Cities program. It charges that minority persons are abused when arrested, charged, jailed and sentenced, and calls for "greater protection from unjust police and judicial action" to command top priority after planning in the Model Cities program.

WASHINGTON DOESN'T KNOW

No one in Washington seems to know how many anti-poverty, "newsletters" are being published, or how many more will be launched in response to OEO's Handbook. Besides those mentioned, others have come out of Long Beach, Calif.; Bridgeport, Conn.; Miami and Pensacola, Fla.; New York; Columbus, Ohio, and many Indian reservations. OEO headquarters have three filing cabinet drawers packed with samples of the newsletters.

Almost unbelievably, they are being distributed in slums all over the country without the knowledge of Congress. That body thought it had made its intent amply clear when it set up the Small Business Administration. Congress banned SBA loans to newspapers to avoid government interference with the press. In 1967 an amendment to the second supplemental appropriation act said flatly: "None of the federal government anti-poverty funds may be used for establishing or operating a general coverage newspaper, magazine, radio station or television station."

When he introduced the amendment, Senator Harry F. Byrd, Jr. (D., Va.) stated: "I am unalterably opposed to government ownership or control of newspapers because it leads inevitably to government control of the news. I believe we have too much government management of the news already without this additional weapon being put into the hands of federal officials."

Enactment followed disclosure that WAMY-Community Action, Inc., of Boone, N.C., proposed to establish a newspaper and radio station with \$179,000 from OEO in response to OEO pressure to emphasize communications instead of job training. At the time, Senator Ervin commented that the proposal was wholly "incompatible with the free enterprise system and a free press."

Senator Strom Thurmond (R., S.C.) declared: "If every poverty agency were to get

a 100% subsidy for the publication of its own propaganda—freed from the responsibility of business losses and restrictions—then a medium would be created to promote social unrest and dissatisfaction on a nationwide scale."

As noted, OEO maintains that the publications it now subsidizes are "newsletters" which do not engage in "general coverage," cited in the wording of the 1967 ban on subsidized newspapers. Newsletters or newspapers, the publications are only one segment of a vast OEO-subsidized propaganda network—encompassing television, radio, films and even speakers' bureaus—now in operation and growing daily.

Mr. PROUTY. Mr. President, in the 4 months since his inauguration, President Nixon has moved purposefully to reform and revitalize the Federal Government's delivery system for the vast expanse of Federal programs intended to alleviate poverty.

President Nixon's positive steps have, I trust, allayed the unfounded fears of some who had foretold of a premature end of the war on poverty. The President's actions affirm my contention that while there has been almost complete accord on the need for and intent of poverty programs, though well-intentioned differences have arisen over the methods.

The President has, during the brief period of incumbency, done much toward the goal of matching performance with promise.

For the first time, an Urban Affairs Council has been established to provide a unified approach to the problems of our cities. This domestic equivalent to our National Security Council is developing a national urban policy to allocate resources on a priority basis.

For the first time the President has established an office of intergovernmental relations to provide a single service center for State, municipal, and county governments.

For the first time Federal agencies' field offices will serve uniform regions and the field offices of the Department of Health, Education, and Welfare; Housing and Urban Development; Labor; the Office of Economic Opportunity, and the Small Business Administration will operate from a single city. Wednesday, the President added two regional offices to the eight set up 2 months ago making a total of 10 such offices.

For the first time regional councils combining their interrelated Federal agencies have been established to maximize program coordinating in the field.

For the first time the President of the United States has directed the many Federal departments, bureaus, and agencies working with State and local governments to come up with a plan to decentralize decisionmaking authority to expedite Federal assistance to community projects.

For the first time an office of minority entrepreneurship has been established in the Department of Commerce to give enterprising individuals a special solid start in business.

For the first time the OEO is to be freed of some of its program responsibilities to better fulfill its intended function as an "incubator" or ideas. OEO's successful Headstart program will be op-

erated in the new Bureau of Child Development within HEW, where the lessons of Headstart can be applied within a comprehensive program for this Nation's children. The Job Corps will be realigned within the Labor Department's manpower training programs.

Attendant with this revamping of the machinery for delivery of these programs has been the sweeping evaluations of the programs at the highest levels of administration.

But machinery and studies cannot by themselves bring performance to the level of our promises. Dedicated men are needed to manage this essential governmental machinery. I am pleased that President Nixon has paid such close attention to the "human factor." The nomination of Representative DONALD RUMSFELD to be Director of the Office of Economic Opportunity is in keeping with President Nixon's pursuit of excellence at all levels of government. I am further encouraged by the President's designating the Director of OEO as assistant to the President and by according the position full cabinet status. This affirms President Nixon's oft-stated intent to revitalize, not as some would say to demolish, the OEO.

In his testimony before the Labor and Public Welfare Committee, Congressman RUMSFELD was perfectly candid in explaining why he had voted against the Economic Opportunity Act of 1964. At the time, he, like many of us, questioned not the intent but the methods outlined in the original act. Since then there have been successes, failures, and modifications in these programs. We have learned much and Representative RUMSFELD shares the President's determination to build upon our knowledge without letting up our efforts against poverty.

As I admire his candor I also have deep respect for Representative RUMSFELD's courage in leaving a "safe" seat in the House of Representatives for a position which seems certain to be a center of controversy. If it were to be free of controversy that to me might indicate that the OEO was not assuming the dynamic innovative role that Congress has mandated for it.

The President has nominated a man of candor, courage, and dedication to be the next Director of the Office of Economic Opportunity. I urge my colleagues to confirm the nomination of Representative DONALD RUMSFELD.

Mr. DIRKSEN. Mr. President, on behalf of the Senator from New York (Mr. JAVITS), I ask unanimous consent to have printed in the RECORD a statement by him in support of the nomination of DONALD RUMSFELD, of Illinois, to be Director of the Office of Economic Opportunity.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR JAVITS

When Representative Rumsfeld appeared before the Committee on Labor and Public Welfare, he made it clear that as director of the Office of Economic Opportunity he would feel it his duty to be "counsel for the poor."

The word "counsel" is very significant because it reflects, in my opinion, an under-

standing of the proper role that the director should play at the highest level of government. In designating Representative Rumsfeld, the President indicated that he would serve not only as director, but also as a special assistant to the President with cabinet rank. Representative Rumsfeld has indicated that he would be willing to disagree with any Cabinet officer or the President himself if need be in order to carry out the special responsibility given to him. There are still more than 22 million poor in our Nation, and we need no reminders that although this group has been "rediscovered" in recent years, its voice has still not been effectively heard.

The word "counsel" is important in another respect because it emphasizes the role of the director as an advisor to rather than a guardian of the poor. There are many programs for the poor. But there is only one agency where the emphasis is so clearly on action by the poor.

We have failed to deliver on promises based upon direct assistance. But in moving away from old approaches, we have made new promises. We have promised the poor that they are to participate in their own flight from poverty, but we are unfairly critical of the exercise of local initiative through community action agencies. The poor are told that they should establish their own businesses, but loans under the Economic Opportunity Loan Program totalled only 1,700 last year, considerably short of the 10,000 goal. The disadvantaged are encouraged to work their way out of poverty, but only recently have resources been channeled into training programs meaningfully related to actual jobs.

I am pleased with the sincerity of purpose displayed by Representative Rumsfeld and his commitment to a continued role for the community action agencies. I have every expectation that under his strong leadership these concepts of which I have spoken will be translated into reality, and new initiatives will be taken on behalf of the poor.

The President has indicated that he will soon submit comprehensive recommendations for the future of the poverty program. With Representative Rumsfeld's confirmation, we must move quickly and conscientiously from the broad outlines to a specific course of action for the coming years.

The VICE PRESIDENT. The question is: Will the Senate advise and consent to this nomination? [Putting the question.] The nomination was confirmed.

COMMISSION ON AGING

The bill clerk read the nomination of John B. Martin, Jr., of Michigan, to be Commissioner on Aging.

Mr. PROUTY. Mr. President, the needs of 20 million older Americans are many. Eight million of them are poor or near poor with failing health, little education, few jobs, and inadequate housing.

The plight of these elderly should be a source of deep concern to all Americans. Remedies should be sought without delay.

Amidst the needs of the elderly is one need which can be met today by our action. This is the need for a strong advocate for the elderly. John B. Martin is eminently qualified for this role.

With him as Commissioner on Aging, I am confident that our elderly Americans will receive the voice they need at all levels of Government. He has a full grasp of the needs of our older citizens, a complete dedication to meeting these

needs, and a proven ability to get things done. I urge my colleagues to favorably consider the President's nomination of John B. Martin as Commissioner on Aging.

The VICE PRESIDENT. The question is: Will the Senate advise and consent to the nomination?

The nomination was confirmed.

GEOLOGICAL SURVEY

The bill clerk read the nomination of William T. Pecora, of New Jersey, to be Director of the Geological Survey.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

AMBASSADORS

The bill clerk proceeded to read sundry nominations of Ambassadors.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations of Ambassadors be considered en bloc.

I do this reluctantly, because it is an extraordinarily good list of nominees. As a matter of fact, among them are friends of many of us in the Senate. I note, for example, the names of Matthew J. Loomer, Jr., who will be our next Ambassador to the Republic of Dahomey; John Davis Lodge, who will be our Ambassador to Argentina; Francis E. Meloy, Jr., our next Ambassador to the Dominican Republic—a promotion which in my opinion is long overdue; Armin H. Meyer to Japan, where I am confident he will do an outstanding job; and our old friend Jack Hood Vaughn, born in Montana, who will now become our Ambassador to Colombia.

The VICE PRESIDENT. Without objection, the nominations are considered and confirmed en bloc.

AGENCY FOR INTERNATIONAL DEVELOPMENT

The bill clerk read the nomination of Bert M. Tollefson, Jr., of South Dakota, to be an Assistant Administrator of the Agency for International Development.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

The bill clerk read the nomination of James F. Leonard, Jr., of Maryland, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

U.S. NAVY

The bill clerk proceeded to read sundry nominations in the U.S. Navy.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The VICE PRESIDENT. Without objection, the nominations are considered and confirmed en bloc.

U.S. MARINE CORPS

The bill clerk read the nomination of Lt. Gen. Lewis W. Walt to be general.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK—NAVY AND MARINE CORPS

The bill clerk proceeded to read sundry nominations in the Navy and Marine Corps which had been placed on the Secretary's desk.

The VICE PRESIDENT. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The VICE PRESIDENT. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of unobjected to items on the calendar, beginning with Calendar No. 170, and after that has been disposed of, proceed to the consideration of Calendar No. 174 and the succeeding measures in sequence.

The VICE PRESIDENT. Without objection, it is so ordered.

SPECIAL PAY FOR CERTAIN NUCLEAR QUALIFIED SUBMARINE OFFICERS

The bill (H.R. 9328) to amend title 37, United States Code, to provide special pay to naval officers, qualified in submarines who have the current technical qualification for duty in connection with supervision, operation, and maintenance of naval nuclear propulsion plants, who agree to remain in active submarine service for one period of 4 years beyond any other obligated active service, and for other purposes, was announced as next in order.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MCINTYRE. Mr. President, I would like to briefly discuss the pending business, H.R. 9328, which would authorize a new system of special pay for junior nuclear-trained submarine officers.

WHAT THE BILL DOES

First, Mr. President, I would like to outline the provisions of the bill. It provides that naval officers who are both technically qualified in submarines and technically qualified in the operation of

naval nuclear propulsion plants, and who have not completed 10 years of commissioned service, will receive special pay in the amount of \$3,750 per year on a 4-year basis, if they voluntarily agree to remain in active service for an additional 4 years beyond any period of obligated service. In effect, this legislation is temporary since it applies only to officers who execute active service agreements on or before June 30, 1973.

NECESSITY FOR BILL

Mr. President, I would like to comment briefly on the necessity for this legislation which singles out a small group of officers for special military compensation. The fact of the matter is that the resignation rate for nuclear-qualified junior naval officers has reached the point that the readiness and safety of our nuclear submarines could be affected if this rate is not reversed. The adverse effect would be caused by the lowering of the experience and qualification level of this small group of officers. As we all know, Mr. President, the survival of this Nation and of the free world depends to significant degree on the effectiveness of the nuclear deterrent provided by the nuclear submarine force of the U.S. Navy. This problem is therefore very critical and necessitates the additional pay provided by this bill as a means of attempting to reverse this alarming trend.

Up through 1968, Mr. President, the retention percentage for junior nuclear-trained officers had been approximately 75 percent, but based on resignations already applied for it appears that the retention rate for fiscal year 1970 will be only 38 percent. The Navy presently has on hand approximately 440 applications for resignation and the overwhelming portion of these officers are regulars, some of which have already been involuntarily extended on active duty for 1 year beyond their normal required period of active service.

I would interject at this point, Mr. President, that there are other activities in the Navy which have a much less retention rate than 38 percent. These other groups, such as the surface fleet, however, are able to tolerate much lesser retention percentages, and still remain effective, than the nuclear submarine force.

Mr. President, I should note that the total nuclear submarine officer community is rather small, consisting of only about 1,900 officers. About 950 of this total are in the grade of lieutenant. The total number of officers who would be affected over the course of this legislation until June 30, 1973, is about 1,100 officers.

COST OF LEGISLATION

Mr. President, the estimated cost of this legislation is relatively modest, the estimate being around \$2.4 million in fiscal year 1970 and increasing thereafter to \$3.8 million in fiscal year 1973.

COMMITTEE OBSERVATIONS

Mr. President, I would call the attention of the Senate to the Committee Report No. 182 on this bill, which discusses not only the pay provisions, but some of the other problems associated with the entire matter of having an adequate officer force for our nuclear submarines.

Let me first say that as a form of military pay this special bonus poses a number of problems. There will be some pay inversions, that is, situations where junior officers as a result of receiving this annual bonus will have a total compensation in excess of some of their superiors. Moreover, there are junior officers in the other services of comparable rank serving under varying conditions of hardship throughout the world who will likewise feel that they should be compensated for the particular hardships or conditions under which they serve.

The committee does recognize, Mr. President, that we do have other forms of special pay, such as the continuation pay for medical officers and the variable reenlistment bonus for enlisted personnel with critical skills.

The committee was also concerned that this special submarine pay would be used as an excuse or precedent for the military departments to seek general legislation under which any number of groups could be brought under this same type of system. The committee report is emphatic that the department should not consider this bill as an argument for other legislation.

Despite all these foregoing reservations, Mr. President, the committee felt that the criticality of our nuclear submarine force makes it essential that we enact this bill in order to provide one means of reversing this alarming resignation rate.

Mr. President, I would also like to note that the committee realizes that while pay may be an essential element, compensation alone is not likely to solve this problem. The committee report goes into some detail on other measures the Navy should also consider, including the creation of a larger force of nuclear officers to permit greater shore rotation and opportunities for this group. The Navy should also intensify its efforts to relieve the pressures and other drawbacks of nuclear submarine officers. The committee also hopes, Mr. President, that the Navy will do all in its power to seek public recognition of the importance of the nuclear fleet to the security of the Nation and thereby expand the public image of this essential element of our national security.

Mr. President, I trust that the foregoing remarks have summarized the provisions and problems of this legislation and I urge the Senate to enact H.R. 9328.

The VICE PRESIDENT. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, was read the third time, and passed.

RECLAMATION PROJECT FEASIBILITY STUDIES—1969

The bill (S. 574) to authorize the Secretary of the Interior to engage in feasibility investigations of certain water resource developments was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 574

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That the Secretary of the Interior is hereby authorized to engage in feasibility studies of the following proposals:

- (1) Missouri River Basin project, Oregon Trail division, Corn Creek unit, in south-central Goshen County, in the vicinity of Hawk Springs, Wyoming;
- (2) Missouri River Basin project, Longs Peak division, Front Range unit, in Cache la Poudre River and Saint Vrain Creek Basins and adjacent areas in the general vicinity of Boulder, Colorado; and
- (3) Missouri River Basin project, Upper Republican division, Armel unit, on the South Fork of the Republican River in the vicinity of Hale, Colorado.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-186), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

The purpose of this measure is to authorize the Secretary of the Interior to undertake feasibility investigations of three Federal reclamation projects. This authority is required to permit the orderly continuation of the Bureau of Reclamation's program of investigations leading to recommendations for authorization of water resource development projects.

BACKGROUND OF MEASURE

Section 8 of Federal Water Project Recreation Act (Public Law 89-72, 79 Stat. 213) provides:

SEC. 8. Effective on and after July 1, 1966, neither the Secretary of the Interior nor any bureau nor any person acting under his authority shall engage in the preparation of any feasibility report under reclamation law with respect to any water resource project unless the preparation of such feasibility report has been specifically authorized by law, any other provision of law to the contrary notwithstanding.

The first measure to authorize such feasibility projects was enacted on September 7, 1966, and became Public Law 89-561 (80 Stat. 707). Because it was the first legislation submitted under the new requirement found in the Federal Water Project Recreation Act set out above, it involved a very extensive list of projects. The list included a number of new planning starts as well as authority to continue feasibility studies which were already underway at that time.

A second measure was enacted on February 13, 1968, and became Public Law 90-254 (82 Stat. 5). It authorized six additional studies to provide for the continuation of the Bureau's investigation program. Additional measures will be necessary from time to time as projects are identified by reconnaissance studies and feasibility studies are found to be warranted.

PRESENT LEGISLATION

The present bill was submitted to the Congress by the Department of the Interior by letter of January 18, 1969, and was introduced by Senator Jackson, by request, on January 23, 1969, and became S. 574. It will authorize feasibility studies of three projects as follows:

- (1) Missouri River Basin project, Oregon Trail division, Corn Creek unit, in south-central Goshen County, in the vicinity of Hawk Springs, Wyo.;
- (2) Missouri River Basin project, Longs Peak division, Front Range unit, in Cache la Poudre River and St. Vrain Creek basins and adjacent areas in the general vicinity of Boulder, Colo.;
- (3) Missouri River Basin project, Upper Republican division, Armel unit, on the

South Fork of the Republican River in the vicinity of Hale, Colo.

Feasibility studies of all three projects have been shown to be warranted by favorable reconnaissance reports. The Bureau of the Budget has expressed no objection to enactment of the measure.

COMMITTEE RECOMMENDATIONS

The Interior and Insular Affairs Committee recommends S. 574 as introduced, be enacted.

AUTHORIZATION FOR THE PRINTING OF ADDITIONAL COPIES OF A VETERANS' BENEFITS CALCULATOR

The concurrent resolution (H. Con. Res. 35) authorizing the printing of additional copies of a Veterans' Benefits Calculator was considered and agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-187), explaining the purposes of the concurrent resolution.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

REPT. 91-187

House Concurrent Resolution 35 would provide that after the conclusion of the second session of the Ninety-first Congress there be printed 50,070 copies of a Veterans' Benefits Calculator prepared by the House Veterans' Affairs Committee, of which 2,000 copies would be for the use of that committee, 2,000 copies for the use of the Committee on Finance, 37,315 copies for the use of the House of Representatives (85 per Member), and 8,755 copies for the use of the Senate (85 per Member). Copies of the document would be prorated to Members of the House of Representatives and Senate for a period of 60 days, after which the unused balances would be distributed by the respective Senate and House document rooms.

The printing-cost estimate is as follows:

Printing-cost estimate

1st 1,000 copies.....	\$288.75
49,070 additional copies, at \$105 per thousand	5,152.35

Total estimated cost, H. Con.

Res. 35..... 5,441.10

AUTHORIZATION FOR CERTAIN PRINTING FOR THE USE OF THE HOUSE COMMITTEE ON VETERANS' AFFAIRS

The concurrent resolution (H. Con. Res. 95) authorizing certain printing for the Committee on Veterans' Affairs was considered and agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-188), explaining the purposes of the concurrent resolution.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

REPT. 91-188

House Concurrent Resolution 95 would provide that there be printed for the use of the House Committee on Veterans' Affairs 56,100 copies of a publication entitled "Summary of Veterans Legislation Reported, Ninety-first Congress, First Session," with an additional 43,900 copies for the use of Members of the House of Representatives (100 per Member). Copies of the document would be prorated to Members of the House of Representatives for a period of 60 days, after

which the unused balance would be distributed by the House document room.

The printing-cost estimate is as follows:

Printing-cost estimate

1st 1,000 copies.....	\$2,401.19
99,000 additional copies, at \$44.65 per thousand.....	4,420.35

Total estimated cost, H.

Con. Res. 95..... 6,821.54

AUTHORIZATION FOR PRINTING OF A REVISED EDITION OF THE PAMPHLET "OUR AMERICAN GOVERNMENT" AS A HOUSE DOCUMENT

The Senate proceeded to consider the concurrent resolution (H. Con. Res. 162) authorizing the printing of the book "Our American Government," as a House document which had been reported from the Committee on Rules and Administration, with amendments, on page 1, line 10, after the word "printed" strike out "one million eighty-four thousand" and insert "nine hundred and twenty-nine thousand five hundred"; and in line 12, after the word "which" strike out "two hundred and six thousand" and insert "fifty-one thousand five hundred".

The amendments were agreed to.

The concurrent resolution, as amended, was agreed to, as follows:

H. CON. RES. 162

Resolved by the House of Representatives (the Senate concurring), That,

SECTION 1. With the permission of the copyright owner of the book, "Our American Government and How It Works: 1001 Questions and Answers by Wright Patman, Member of Congress", published by Bantam Books, Incorporated, there shall be printed as a House document, with emendations, the pamphlet entitled "Our American Government. What Is It? How Does It Function?"; and that there shall be printed nine hundred and twenty-nine thousand five hundred additional copies of such document, of which fifty-one thousand five hundred copies shall be for the use of the Senate, and eight hundred and seventy-eight thousand copies shall be for the use of the House of Representatives.

SEC. 2. Copies of such document shall be prorated to Members of the Senate and House of Representatives for a period of sixty days, after which the unused balance shall revert to the respective Senate and House document rooms.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-189), explaining the purposes of the resolution.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

House Concurrent Resolution 162 would provide that (with the permission of the copyright owner of the book, "Our American Government and How It Works: 1001 Questions and Answers by Wright Patman, Member of Congress," published by Bantam Books, Inc.) there be printed as a House document, with emendations, the pamphlet entitled "Our American Government. What is it? How Does It Function?" and that there be printed 1,084,000 additional copies of such document, of which 206,000 copies would be for the use of the Senate (2,000 per Member) and 878,000 copies would be for the use of the House of Representatives (2,000 per Member). Copies of the document would be prorated to Members of the Senate and House of Representatives for a period of 60 days, after which the unused balances would

be distributed by the respective Senate and House document rooms.

The printing-cost estimate of House Concurrent Resolution 162 as approved by the House of Representatives, is as follows:

To print as a document (1,500 copies)	\$4,297.59
1,084,000 additional copies, at \$50.27 per thousand	54,492.68
Total estimated cost	58,790.27

AUTHORIZATION FOR PRINTING OF A REVISED EDITION OF "HOW OUR LAWS ARE MADE" AS A HOUSE DOCUMENT

The Senate proceeded to consider the concurrent resolution (H. Con. Res. 192) to reprint brochure entitled "How Our Laws Are Made" which had been reported from the Committee on Rules and Administration with an amendment, on page 2, at the beginning of line 1, insert a new section, as follows:

SEC. 2. There shall be printed fifty-one thousand five hundred additional copies of the document specified in section 1 of this concurrent resolution for the use of the Senate.

The amendment was agreed to.

The concurrent resolution, as amended, was agreed to, as follows:

Resolved by the House of Representatives (the Senate concurring), That the brochure entitled "How Our Laws Are Made", by Doctor Charles J. Zinn, law revision counsel of the House of Representatives Committee on the Judiciary, as set out in House Document 125 of the Ninetieth Congress, be printed as a House document, with emendations by the author and with a foreword by the Honorable Emanuel Celler; and that there be printed two hundred and thirty-nine thousand five hundred additional copies, of which twenty thousand shall be for the use of the Committee on the Judiciary and the balance prorated to the Members of the House of Representatives.

SEC. 2. There shall be printed fifty-one thousand five hundred additional copies of the document specified in section 1 of this concurrent resolution for the use of the Senate.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-190), explaining the purposes of the resolution.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

House Concurrent Resolution 192 would provide that the brochure entitled "How Our Laws Are Made," by Dr. Charles J. Zinn, law revision counsel of the House of Representatives Committee on the Judiciary, as set out in House Document 125 of the 90th Congress, be printed as a House document, with emendations by the author and with a foreword by the Honorable Emanuel Celler; and that there be printed 239,500 additional copies of such document, of which 20,000 would be for the use of the Committee on the Judiciary and the balance prorated to the Members of the House of Representatives (500 per Member).

The Senate Committee on Rules and Administration has amended House Concurrent Resolution 192 to authorize the printing of 51,500 additional copies of the document for the use of the Senate. This would provide Members of the Senate with the same quan-

tity as House Members (500 each) for distribution to their constituents.

AUTHORIZATION FOR THE PRINTING OF ADDITIONAL COPIES OF SENATE HEARINGS ENTITLED "THERMAL POLLUTION—1968"

The concurrent resolution (S. Con. Res. 21) to print additional copies of parts 1 and 2, thermal pollution 1968 hearings was considered and agreed to, as follows:

S. CON. RES. 21

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Committee on Public Works, one thousand additional copies of part 1, and seven hundred additional copies of part 2, thermal pollution, 1968 hearings, held during the second session of the Ninetieth Congress.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-191), explaining the purposes of the concurrent resolution.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Concurrent Resolution 21 would authorize the printing for the use of the Senate Committee on Public Works of 1,000 additional copies of part 1 and 700 additional copies of part 2 of its hearings entitled "Thermal Pollution—1968," held during the second session of the 90th Congress.

The printing-cost estimate, supplied by the Public Printer, is as follows:

Printing-cost estimate	
Part 1, 1,000 copies	\$3,744.85
Part 2, 700 copies	1,985.73
Total estimated cost	5,730.58

AUTHORIZATION FOR THE PRINTING OF ADDITIONAL COPIES OF SENATE DOCUMENT 91-13, ENTITLED "REVIEW OF U.S. FOREIGN POLICY AND OPERATIONS, 1968"

The resolution (S. Res. 195) authorizing the printing of additional copies of Senate Document 91-13 entitled "Review of U.S. Foreign Policy and Operations, 1968," was considered and agreed to, as follows:

S. RES. 195

Resolved, That there be printed for the use of the Committee on Appropriations eight hundred additional copies of Senate Document 91-13, entitled "Review of United States Foreign Policy and Operations, 1968", by the Honorable Allen J. Ellender, United States Senator from the State of Louisiana.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-192), explaining the purposes of the resolution.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 195 would authorize the printing for the use of the Committee on Appropriations of 800 additional copies of Senate Document 91-13, entitled "Review of United States Foreign Policy and Operations, 1968," by Hon. Allen J. Ellender, a U.S. Senator from the State of Louisiana.

The printing-cost estimate, supplied by the Public Printer is as follows:

Printing-cost estimate

Back to press, 800 copies

\$1,200

AUTHORIZATION FOR THE PRINTING OF THE MANUSCRIPT ENTITLED "THE FIRST ARMY IN EUROPE" AS A SENATE DOCUMENT

The resolution (S. Res. 177) authorizing the printing of a manuscript entitled "The First Army in Europe" as a Senate document was considered and agreed to, as follows:

S. RES. 177

Resolved, That the manuscript entitled "The First Army in Europe," written by Colonel Elbridge Colby, be printed with one map as a Senate document, and that one thousand five hundred additional copies of such document be printed for the use of the Senate Committee on Armed Services.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-193), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 177 would provide that the manuscript entitled "The First Army in Europe," written by Col. Elbridge Colby, be printed with one map as a Senate document, and that 1,500 additional copies of such document be printed for the use of the Senate Committee on Armed Services.

The printing-cost estimate, supplied by the Public Printer, is as follows:

Printing-cost estimate	
To print as a document (1,500 copies)	\$4,115.11
1,500 additional copies, at \$398.04 per thousand	597.04
Total estimated cost, S. Res. 177	4,712.15

KATHLEEN T. O'LEARY

The resolution (S. Res. 202) to pay a gratuity to Kathleen T. O'Leary was considered and agreed to, as follows:

S. RES. 202

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Kathleen T. O'Leary, widow of Jeremiah A. O'Leary, Senior, an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

DORA L. DOWNING

The resolution (S. Res. 203) to pay a gratuity to Dora L. Downing was considered and agreed to, as follows:

S. RES. 203

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Dora L. Downing, widow of Carl Downing, an employee of the Senate at the time of his death, a sum equal to ten and one-half months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GOLD AND SILVER CONTENT MANUFACTURED ARTICLES

The Senate proceeded to consider the bill (S. 1046) to protect consumers by providing a civil remedy for misrepresentation of the quality of articles composed in whole or in part of gold or silver and for other purposes which had been reported from the Committee on Commerce, with amendments, on page 1, line 3, after the quotation mark strike out "an" and insert "An"; in line 5, after the word "falsely" insert "or spuriously"; in line 7, after the word "amended" strike out "October 4, 1961 (75 Stat. 776; 15 U.S.C. 294 et seq.)" and insert "(15 U.S.C. 294-300)"; on page 2, at the beginning of line 1, strike out "(a) Inserting" and insert "(1) inserting"; in the same line after the word "after" strike out "the section number"; in line 2, after the word "designation" strike out "(a)" and insert "(a)"; at the beginning of line 3, strike out "(b) Adding" and insert "(2) adding"; in line 4, after the word "subsection" strike out "Sec. 5(a)" at the beginning of line 6, strike out "(b) Any competitor, customer, or competitor of a customer of any person in violation of sections 1, 2, 3, or 4 of this Act, or any subsequent purchaser of an article of merchandise which has been the subject of a violation of section 1, 2, 3, or 4 of this Act," and insert "(b) (1) Any competitor, customer, or competitor of a customer of any person who has mismarked or caused to be mismarked any article of merchandise, or any competitor, customer, or competitor of a customer of any person who has imported or caused to be imported any mismarked article of merchandise"; in line 16, after the word "restraining" insert "such person from".

After line 21, insert:

(2) For the purposes of this subsection, the term 'customer' refers to the first purchaser or any subsequent purchaser of an article of merchandise.

After line 24, strike out "(c) Any duly organized and existing jewelry trade association shall be entitled to injunctive relief restraining any person in violation of section 1, 2, 3, or 4 of this Act" and insert "(c) Any duly organized jewelry trade association shall be entitled to injunctive relief restraining any person who has mismarked or caused to be mismarked any article of merchandise, or who has imported or caused to be imported any mismarked article of merchandise"; in line 18, after the word "Act," insert "In addition, if the court determines that such action has been brought frivolously, for purposes of harassment, or in implementation of any scheme in restraint of trade, it may award punitive damages to the defendant."

In line 25, after the word "this" strike out "Act," and insert "Act."; on page 4, at the beginning of line 1, strike out "(c) Inserting" and insert "(3) inserting"; in the same line after the word "after" strike out "the section number" and insert "Sec. 6." and insert "(a)"; at the beginning of line 3, strike out "(d) Adding" and insert "(4) adding"; in line 4, after the word "subsection" strike out "Sec. 6. (a)" and in-

sert "(a)"; in line 6, after the word "person", insert "as used in this Act,"; in line 9, after the word "association", insert "as used in this Act," at the beginning of line 14, strike out the word "businesses." and insert "businesses"; after line 14, insert:

(d) The term 'mismarked' as used in this Act, means having stamped, branded, engraved, or printed upon any part of any article of merchandise, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed, any mark in violation of section 1, 2, 3, or 4 of this Act..

At the beginning of line 21, strike out "(c) Changing paragraph (A), subsection (b)," and insert "(5) amending clause A"; in line 22 after "4" insert "(b)"; at the beginning of line 23, after "(A)" strike out "Apply" and insert "apply"; on page 5, line 3, after the word "person," strike out "and" and insert "and."; and in line 5, after the word "any" strike out "person, as that term is herein defined," and insert "person"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act forbidding the importation, exportation, or carriage in interstate commerce of falsely or spuriously stamped articles of merchandise made of gold or silver or their alloys, and for other purposes", approved June 13, 1906 (34 Stat. 260), as amended (15 U.S.C. 294-300), is amended by—

(1) inserting immediately after "Sec. 5." the subsection designation "(a)";

(2) adding at the end of the newly designated subsection (a) the following new subsections:

"(b) (1) Any competitor, customer, or competitor of a customer of any person who has mismarked or caused to be mismarked any article of merchandise, or any competitor, customer, or competitor of a customer of any person who has imported or caused to be imported any mismarked article of merchandise, shall be entitled to injunctive relief restraining such person from further violation of this Act and may sue therefor in any district court of the United States in the district in which the defendant resides or has an agent, without respect to the amount in controversy, and shall recover damages and the cost of suit, including a reasonable attorney's fee.

"(2) For the purposes of this subsection, the term 'customer' refers to the first purchaser or any subsequent purchaser of an article of merchandise.

"(c) Any duly organized jewelry trade association shall be entitled to injunctive relief restraining any person who has mismarked or caused to be mismarked any article of merchandise, or who has imported or caused to be imported any mismarked article of merchandise, from further violation of this Act and may sue therefor as the real party in interest in any district court of the United States in the district in which the defendant resides or has an agent, without respect to the amount in controversy, and if successful shall recover the cost of suit, including a reasonable attorney's fee.

"(d) Any defendant against whom a civil action is brought under the provisions of this Act shall be entitled to recover the cost of defending the suit, including a reasonable attorney's fee, in the event such action is terminated without a finding by the court that such defendant is or has been in violation of this Act. In addition, if the court determines that such action has been brought

frivolously, for purposes of harassment, or in implementation of any scheme in restraint of trade, it may award punitive damages to the defendant.

"(e) The district courts shall have exclusive original jurisdiction of any civil action arising under the provisions of this Act."

(3) Inserting immediately after "Sec. 6." the subsection designation "(a)";

(4) Adding at the end of the newly designated subsection (a) the following new subsections:

"(b) The term 'person', as used in this Act, means an individual, partnership, corporation, or any other form of business enterprise, capable of being in violation of this Act.

"(c) The term 'jewelry trade association', as used in this Act, means an organization, consisting primarily of persons actively engaged in the jewelry or a related business, the purposes and activities of which are primarily directed to the improvement of business conditions in the jewelry or related businesses.

"(d) The term 'mismarked' as used in this Act, means having stamped, branded, engraved, or printed upon any part of any article of merchandise, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed, any mark in violation of section 1, 2, 3, or 4 of this Act."

(5) Amending clause A of section 4(b) to read as follows:

"(A) Apply or cause to be applied to that article a trademark of such person, which has been duly registered or applied for registration under the laws of the United States within thirty days after an article bearing the trademark is placed in commerce or imported into the United States, or the name of such person; and".

SEC. 2. If any provision of this Act or any amendment made thereby, or the application thereof to any person is held invalid, the remainder of the Act or amendment and the application of the remaining provisions of the Act or amendment to any person shall not be affected thereby.

SEC. 3. The provisions of this Act and amendments made thereby shall be held to be in addition to, and not in substitution for or limitation of, the provisions of any other Act of the United States.

SEC. 4. This Act shall take effect three months after enactment.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-194), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

S. 1046, as amended, would amend the National Gold and Silver Stamping Act of 1906 to provide a civil remedy for misrepresentation of the quality of articles made from gold and silver. It would enable consumers who have purchased falsely marked gold or silver, and any competitor, customer, or competitor of a customer of anyone violating the marketing act, as well as jewelry trade associations, to seek civil relief. A successful plaintiff would be able to obtain an injunction and could recover his court costs and a reasonable attorney's fee. In addition, persons and firms, other than trade associations, could recover for any actual monetary damage which they may have suffered as a result of the false marking. Conversely, an unsuccessful plaintiff would be

liable to the defendant for the defendant's costs and attorney's fee, and if the action was brought "frivolously, for purposes of harassment, or in implementation of any scheme in restraint of trade," the defendant could also recover punitive damages. Finally the bill would make a technical change to correct a drafting error in the 1961 amendment to this statute.

NEED

The National Gold and Silver Stamping Act of 1906, requires that any article of merchandise made in whole or in part of gold or silver, which is shipped in interstate commerce, must be properly marked as to its actual fineness. That act contains criminal sanctions for any violations of its provisions. However, despite indications of constant and substantial violations of the act, the Department of Justice has never brought a suit to enforce this statute.

At hearings before the Commerce Committee representatives of the Jewelers Vigilance Committee testified that in 1967 they purchased 15 quality marked items in nine different stores and tested them for the accuracy of their markings. Ten of these 15 items were found to be falsely marked as to gold or silver content. In a similar recent test, 26 items selling for less than \$5 each were purchased. All of these items were in violation of the National Gold and Silver Stamping Act. Only four of the items were correctly stamped as to quality, but these items failed to carry the identifying trademark required under the law.

In purchasing items made from gold or silver, the consumer must rely entirely upon the honesty of both the manufacturer who makes the item and the retailer who sells it to properly disclose its quality. Yet consumers who shop for jewelry are apparently frequently receiving much less than they think they are buying. In order to help these consumers receive full value for their purchasing dollars, and in order to protect the many ethical members of the jewelry industry from the unfair competition of those who are mis-marking the quality of their merchandise, it is essential that a method be devised to insure adequate enforcement of the Gold and Silver Stamping Act. This bill, by authorizing civil injunctive relief, should create an enforcement mechanism which will deter the unscrupulous from mis-marking their goods.

BILL PASSED OVER

The bill (S. 1611) to amend Public Law 80-905 to provide for a National Center on Educational Media and Materials for the Handicapped and for other purposes was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

THE NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE ACT

The Senate proceeded to consider the bill (S. 1519) to establish a National Commission on Libraries and Information Science and for other purposes which had been reported from the Committee on Labor and Public Welfare, with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "National Commission on Libraries and Information Science Act".

POLICY

SEC. 2. The Congress hereby affirms that library and information services adequate to meet the needs of the people of the United

States are essential to achieve national goals and to utilize most effectively the Nation's educational resources and that the Federal Government will cooperate with State and local governments and public and private agencies in assuring optimum provision of such services.

ESTABLISHMENT

SEC. 3. (a) There is hereby established, in the Office of the Secretary of the Department of Health, Education, and Welfare, a National Commission on Libraries and Information Science (hereinafter referred to as the "Commission").

(b) The Department of Health, Education, and Welfare shall provide the Commission with necessary administrative services.

CONTRIBUTIONS

SEC. 4. The Commission shall have authority to accept in the name of the United States grants, gifts, or bequests of money for immediate disbursement in furtherance of the functions of the Commission. Such grants, gifts, or bequests, after acceptance by the Commission, shall be paid by the donor or his representative to the Treasurer of the United States, whose receipts shall be their acquittance. The Treasurer of the United States shall enter them in a special account to the credit of the National Commission on Libraries and Information Science for the purposes in each case specified.

FUNCTIONS

SEC. 5. (a) The Commission shall have the primary responsibility for developing or recommending overall plans for, and advising the appropriate governments and agencies on, the policy set forth in section 2. In carrying out that responsibility, the Commission shall—

(1) advise the President and the Congress on the implementation of national policy by such statements, presentations, and reports as it deems appropriate;

(2) conduct studies, surveys, and analyses of the library and informational needs of the Nation, including the special library and informational needs of rural areas and of economically, socially, or culturally deprived persons, and the means by which these needs may be met through information centers, through the libraries of elementary and secondary schools, and institutions of higher education, and through public, research, special and other types of libraries;

(3) appraise the adequacy of library and information resources and services and evaluate the effectiveness of library and information science programs;

(4) develop or recommend overall plans for meeting national library and informational needs and for the coordination of activities at the Federal, State, and local levels taking into consideration all of the library and information resources of the Nation to meet those needs;

(5) advise Federal, State, local, and private agencies regarding library and information sciences;

(6) promote research and development activities which will extend and improve the Nation's library and information-handling capability as essential links in the national communications networks; and

(7) submit through the Secretary of Health, Education, and Welfare to the President and the Congress (not later than January 31 of each year) a report on its activities during the preceding fiscal year.

(b) The Commission is authorized (1) to contract with Federal agencies and other public and private agencies to carry out any of its functions under subsection (a) and (2) to publish and disseminate such reports, findings, studies, and records as it deems appropriate.

(c) The Commission is further authorized to conduct such hearings at such times and places as it deems appropriate for carrying out the purposes of this Act.

(d) The heads of all Federal agencies are, to the extent not prohibited by law, directed to cooperate with the Commission in carrying out the purposes of this Act.

MEMBERSHIP

SEC. 6. (a) The Commission shall be composed of the Librarian of Congress and fourteen members appointed by the President, by and with the advice and consent of the Senate. Not less than five members of the Commission shall be professional librarians or information specialists, and the remainder shall be persons having special competence or interest in the needs of our society for library and information services, at least one of whom shall be knowledgeable with respect to the technological aspects of library and information services and sciences. One of the members of the Commission shall be designated by the President as Chairman of the Commission. The terms of office of members of the Commission shall be five years, except that (1) the terms of office of the members first appointed shall commence on the date of enactment of this Act and shall expire three at the end of one year, three at the end of two years, three at the end of three years, three at the end of four years, and three at the end of five years, as designated by the President at the time of appointment, and (2) a member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term.

(b) Members of the Commission who are not in the regular full-time employ of the United States shall, while attending meetings or conferences of the Commission or otherwise engaged in the business of the Commission, be entitled to receive compensation at a rate fixed by the Secretary, but not exceeding the rate specified at the time of such service for grade GS-18 in section 5332 of title 5, United States Code, including traveltime, and while so serving on the business of the Commission away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, and authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

(c) (1) The Commission is authorized to appoint, without regard to the provisions of title 5, United States Code, covering appointments in the competitive service, such professional and technical personnel as may be necessary to enable it to carry out its function under this Act.

(2) The Commission may procure, without regard to the civil service or classification laws, temporary and intermittent services of such personnel as are necessary to the extent authorized by section 3109 of title 5, United States Code, but at rates not to exceed the rate specified at the time of such service for grade GS-18 in section 5332 of title 5, United States Code, including traveltime, and while so serving on the business of the Commission away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. There are hereby authorized to be appropriated \$500,000 for the fiscal year ending June 30, 1970, \$750,000 for the fiscal year ending June 30, 1971, and for each succeeding fiscal year for the purposes of carrying out the provisions of this Act.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that a statement prepared by the Senator from Texas (Mr. YARBOROUGH), be printed in the RECORD.

There being no objection, the state-

ment was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR YARBOROUGH

Mr. President, I support S. 1519. This bill would authorize the appointment of a 15-member National Commission on Libraries and Information Science which would have responsibility for recommending improved services and improved coordination of services and resources.

In plain terms, what do we intend this Commission to accomplish? Why do we need it?

We know there has been a so-called knowledge explosion. We know there is more to know now than ever before, and the amount of this knowledge, in every conceivable field, is indeed increasing explosively.

We know our educational system is expanding at every level, now that higher levels of skill and knowledge are required for virtually every job in the economy. There is not only more than is known, but there is also more that must be learned.

In the middle of this knowledge explosion and transformation of education and training are the libraries and information systems. More and more, they take advantage of technology. The wisdom of the ages is now as likely to be on a tiny bit of film, access to which is through a computer, as it is to be in a musty volume on a back shelf.

The cost of acquiring the materials of scholarship and research and education is also increasing steadily. But our resources are not unlimited. Our schools, our colleges and universities, our Federal agencies, our research centers, our business enterprises—all must operate within budgets and all must make do with less than they would consider ideal.

It is therefore necessary to find ways of cutting costs without impairing service. As one avenue to greater efficiency, libraries voluntarily agree to specialize in various fields instead of competing with one another. We anticipate that the National Commission on Libraries and Information Science will study this and other expedients, evaluate them, and recommend wider use of those that offer greater effectiveness at lower cost.

There is the question of unmet needs and the priority in which they should be met. Our libraries and information services span the entire range of human experience and activity. In the light of the needs of the Nation as a whole, the improvement of some of these activities are undoubtedly more important than are others. Those of us in positions of responsibility in the Federal Government and elsewhere, want to know what an authoritative, independent group such as the Commission considers to be the more important needs that should be addressed without delay.

Next, there is the vital question of technology. New machinery, new methods are coming on the market and into use in the libraries and information services. Are they compatible? Can the computer of one library, in effect, talk to the computer of another? Without attempting to impose unwanted standardization on industry, I believe the National Commission can nevertheless do a great deal by pointing out the necessity for harmonization and compatibility among these devices and systems, and by encouraging the designers and the purchasers and users of the new equipment and services to insist upon compatibility.

There are many other topics that will perhaps be of urgent concern to the National Commission on Libraries and Information Science. One is the question of manpower. Are the needs for specialized personnel being met? If now, how can the capacity of the training institutions be expanded? How many trained people will be needed to staff our libraries and information systems? Where will they be obtained?

There is also the question of the Federal Government itself as a publisher and as proprietor of some of the world's greatest libraries, and as a substantial contributor to the support of libraries, especially in the schools and colleges of the Nation. I venture to assert that no one can now state with precision the amount that the Federal Government is spending in its various library and information activities. If the cost can not be counted, I doubt that the vital contribution of the Federal Government to the support of libraries is a coordinated, balanced program. Surely, the National Commission on Libraries and Information Science can make a start at developing a rational Federal program. The Federal Library Committee, an inter-agency unit under the auspices of the Bureau of the Budget and the Library of Congress, has endorsed the establishment of a National Commission on Libraries and Information Science.

For these reasons, Mr. President, I urge enactment of S. 1519, and I hope that the National Commission on Libraries and Information Science can get an early start on its important work. With this measure, we are not only conserving our vital resources in the fields of librarianship and information science and enhancing their productivity and efficiency.

Mr. President, the Committee on Labor and Public Welfare significantly amended S. 1519, the National Commission on Libraries and Information Science Act, before reporting it, and so that the legislative history may be completely clear, I shall briefly explain the changes made in the bill as it was introduced.

The National Commission on Libraries and Information Science that would be authorized by the bill is to be established in the Office of the Secretary of Health, Education, and Welfare, and that Department is authorized and directed to provide the Commission with necessary administrative services.

As the bill makes clear, the Commission is to have the primary responsibility for developing or recommending overall plans that will assure library and information services adequate to meet the needs of the people of the United States, and to utilize most effectively the Nation's educational resources. To this end, the policy declared in the bill is that the Federal Government will cooperate with State and local governments and public and private agencies to assure optimum provision of library and information service.

It is clear, Mr. President, that we intend the Commission to have a mandate and a field of influence that is far broader than the Federal Government alone, and broader than that of public library and information services alone. The Commission is to be charged with responsibility for developing and fostering national planning and policies which will gain voluntary adherence and execution by public and private libraries and information services alike.

The fact that S. 1519 locates the National Commission in the Office of the Secretary of Health, Education, and Welfare should be construed as a matter of administrative convenience only. The Commission is not intended to concern itself solely or even primarily with the many programs and activities of interest to libraries that are conducted in the Department of Health, Education, and Welfare, nor is the Secretary intended to have any more influence in the deliberations and recommendations of the Commission than any other Cabinet officer or other official of the Federal Government.

The bill provides that the Commission is to submit its annual report to the President and the Congress through the Secretary of Health, Education, and Welfare, but the Committee's intention is that this and the other reports, surveys and studies of the Commission are to be wholly independent. We seek through this legislation the most

comprehensive, and cogent advice with respect to libraries and information science that we can secure. For this reason, we wish to assure that the National Commission on Libraries and Information Science will be independent and impartial as it appraises the adequacy of present services, evaluates their effectiveness, and recommends steps that can be taken to overcome deficiencies, coordinate activities, and meet needs to improve the Nation's library and information-handling capability.

As a further assurance that the Commission will avail itself of the best and most comprehensive data available, the bill provides that the Commission may hold hearings in various parts of the Nation from time to time, and all heads of Federal agencies are directed to cooperate with it.

The independence and high calibre of the National Commission on Libraries and Information Science is safeguarded, also, by the provisions of the bill requiring that its membership be composed of the Librarian of Congress and 14 other persons, and that at least 5 of the Commission's members shall be professional librarians. Although the other members of the Commission are to be persons having special competence or interest in the needs of our society for library and information services, at least one of these persons is to be knowledgeable with respect to the technological aspects of library and information services. We seek here a balanced approach, in which the views of the most competent and knowledgeable are heard, but the needs of the public are also kept in perspective at all times.

The National Commission on Libraries and Information Science would also be authorized, under the bill, to accept grants, gifts or bequests of money for the support or conduct of its activities, which include the possibility of research and development work. With the many contracts and relationships that the Commission will undoubtedly develop with many libraries and information systems and organizations and institutions of many kinds, public and private, it is expected that there will be some opportunities for appropriate activities on the part of the Commission that cannot be carried out with the Government funds available to it. For this reason, the Committee has amended the bill to give the Commission explicit authority to accept private funds if these should be offered and if, in the wisdom of the Commission's distinguished members, they should be accepted by the Government.

Mr. JAVITS. Mr. President, as a sponsor of S. 1519, together with my distinguished colleague from Texas, I should like to urge support by my fellow Senators on both sides of the aisle of this bill which is a milestone in the field of library and information science, and which will affect every citizen of the United States. This bill declares as national policy that the American people should be provided with library and informational services adequate to their needs, and that the Federal Government, in collaboration with State and local governments and private agencies, should exercise leadership in assuring the provision of such services.

The information explosion is producing tons of materials on the world's presses—about 1,000 new books daily. The citizen is overwhelmed, and libraries are so burdened with the problems of selecting and storing information that they are hard pressed to meet the demands, even with the aid of computers. The goal of library adequacy will be achieved only as a consequence of immediate broad planning and coordina-

tion which would be provided by the National Commission on Libraries and Information Science.

The bill would establish such a permanent National Commission on Libraries and Information Services which would have the primary responsibility for developing overall plans to meet the needs of the American people for library and information services and for advising public and private agencies of the recommended policies it has developed.

The National Commission would carry out these responsibilities by analyzing the information needs of the Nation, including the special needs for library and informational services of rural areas and of the economically, socially, and culturally disadvantaged; by determining how these needs may best be met; by evaluating current resources and programs; by promoting necessary research and development activities; by developing overall plans for meeting needs for library and information services, which would include coordination of activities at the Federal, State, and local levels; and by advising Congress and the President of the extent to which national policies are being effected.

As stated in the report of the temporary National Advisory Commission on Libraries:

It is now clear that library services are needed, to greater or less extent, directly or indirectly, by the entire citizenry of the country. Such services are increasingly essential for education, scholarship, and private inquiry; for research, development, commerce, industry, national defense, and the arts; for individual and community enrichment; for knowledge alike of the natural world and of man—in short, for the continuity of civilization on the one hand and increasingly for the preservation of man's place in nature on the other.

In a message to the Senate committee on May 5, Dan Lacy of New York, a distinguished member of the temporary National Advisory Commission on Libraries, told us:

Library activities support in one way or another almost every national objective and they are scattered through numerous agencies of the government. What is needed above all is some continuing, competent, distinguished, neutral body, in itself, not responsible for any library operations or grant programs, that can bring into focus our diverse library needs and our varied programs to meet them. This is as essential for economy and efficiency in the identification of duplicating or ineffective programs as is the great task of identifying our critical needs and devising the means to meet them.

These library needs cover the range of our national responsibilities from the preschool training of children in Head Start and similar programs, the attack on functional illiteracy, the provision of new educational and social services in urban ghettos and other poverty areas and the improvement of education throughout our school and university systems to the maintenance and support of advanced research programs in medicine, scientific technology, international relations, social studies, and the humanities, and the nurture of an independently informed citizenry.

The crushing library appropriation cuts just proposed by the Administration coming, as they do, in the midst of a nationwide crisis in the state and local support of educational and library services, threaten summarily to choke off the promising new de-

velopments in library services so desperately needed. Yet they probably reflect no intention on the part of the Administration to bring about so drastic an effect. Rather, we have stumbled into this position because we have no agency that can survey the entire national picture of library needs and activities, assess the result of particular actions, and make informed recommendations for priorities and programs. There could be no more urgent and emphatic demonstration of the need for S. 1519.

Mr. President, I concur with the opinions of these outstanding citizens whose views I have cited. I urge enactment of S. 1519, and I especially urge its early implementation by the administration. I would hope that the President would appoint the National Commission on Libraries and Information Science at his earliest convenience so that it may begin its very important duties as soon as possible.

Mr. PROUTY. Mr. President, in the last Congress we made immense strides in meeting the challenges of the "information explosion." We considered and approved amendments extending title II of the Higher Education Act, which continues for 3 years Federal assistance to bolster college library resources, training and research in librarianship, and cooperative cataloging by the Library of Congress. In addition, we considered and approved various programs such as the Public Broadcasting Act, Inter-Library Cooperation and the new Networks of Knowledge.

Toward the end of the last session of the 90th Congress this momentum for progress was further highlighted by the comprehensive report of the National Advisory Commission on Libraries, which was established in September 1966.

The Commission made a number of notable recommendations. Foremost among these recommendations was the establishment of a National Commission on Libraries and Information Sciences. The bill now before us for consideration follows this recommendation by establishing such a commission within the office of the Secretary of Health, Education, and Welfare.

The challenges to this National Commission on Libraries and Information Sciences will be vast but the bill clearly specifies a Commission membership that will be equal to these challenges.

As the bill delineates a membership with the required expertise, it also enunciates a congressional mandate that the Commission's studies, surveys and analyses of the library and informational needs of the Nation include "the special library and informational needs of rural areas and of economically, socially, or culturally deprived persons."

This language was added to the bill as a result of two amendments, one mine and one offered by the minority members of the Education Subcommittee upon the recommendation of the administration.

My amendment to include the language "rural areas" in this mandative section rounds out the administration recommendation adopted by the committee that the Commission concern itself with the library and informational needs of the "economically, socially or culturally deprived persons."

The "information explosion" is heard only as a distant echo by many of our citizens whose place of residence or economic circumstances place them out of the mainstream of libraries and informational services.

The language of these two amendments clearly encourages the Commission to undertake a comprehensive advisory and coordinating role to insure that the aspirations of all Americans for knowledge will be met.

The need for this legislation has been clearly enunciated in the report of the National Advisory Commission on Libraries and the unanimous favorable action of the Committee on Labor and Public Welfare. As a cosponsor of this measure, I urge my distinguished colleagues to favorably consider this measure.

Mr. MONDALE. Mr. President, one of the issues of paramount importance in our time is that of providing a decent life and full opportunity for all our people. I believe that we wholeheartedly agree that education is the stepping stone to that fundamental goal.

In that connection and as a cosponsor of S. 1519, I am particularly urging unanimous approval of this bill to establish a permanent National Commission on Libraries and Information Science. If one examines the policy we have set forth in this measure, I think it is immediately evident that the basic objective of the Commission—its overall reason for being—is ultimately to help every man, woman, and child to achieve his full potential by helping the Nation's libraries to provide the necessary informational, cultural, and recreational resources.

In section 2 of S. 1519, we affirm:

Library and information services adequate to meet the needs of the people of the United States are essential to achieve national goals and to utilize most effectively the Nation's educational resources and that the Federal Government will cooperate with State and local governments and public and private agencies in assuring optimum provision of such services.

Many people do not understand the various kinds of libraries there are, even though they may be library users. They may not realize the extent to which they benefit directly and indirectly, from these sources of information. All of society can benefit from the improvement of library and information sources which are currently fragmented and inadequate. The users are multiple and diverse; scholars, scientists, business, professional, students at all levels as well as the public at large.

The report of the temporary National Advisory Commission on Libraries, which recommended establishment of the permanent Commission we are considering today, states:

We should look at the value to our people and our culture that accrues from the activities of the user whose functions are to be enhanced by the improved availability of library and information services. A library can be understood only as it enhances a socially valuable function, one of which—and one that all libraries can enhance—is the personal intellectual and ethical development of every individual in our society. The variety of the other socially valuable functions de-

termines the need for variety in kinds of libraries.

The goal of library adequacy will be achieved only as a consequence of long-range planning and fostering of the evolutionary process of library development, but we cannot wait—we have to start where we are and solve the short range, immediate problems at the same time that we are working on the long range. The need for planning, in its broadest sense, is a primary need identified by the Advisory Commission which proposed this function for an ongoing permanent Commission.

Effective multidisciplinary research and activity can be hampered by the growth of too many incompatible informational services, and the development of anything approaching a national library network can encounter great difficulties without uniformity of standards. The need for coordination of multiple efforts through a system of interlocking bodies—a built-in flexibility and adaptability to continual change—was an obvious conclusion of the Advisory Commission. The ongoing National Commission on Libraries and Information Science was conceived not as an authoritarian body, but rather as an advisory agency for broad planning—a communications switching point, an essential structure in the coordination of diversity. The broad outlook is evolutionary rather than revolutionary—the goal is to foster evolving responsiveness to user needs.

We cannot afford the waste of our basic resources—men, money, and materials. We must plan constructively and wisely. When these potentials are brought to fruition, our Nation will reap the benefits and in years ahead this fuller utilization of our resources will benefit all of mankind.

The United States can demonstrate to the world that we support our convictions regarding intellectual freedom by providing free access to all types of information and all shades of opinion for all citizens. Our libraries can strive to become a vital positive force in the social and intellectual reconstruction of a broadening and changing society. (From the Report of the NACL.)

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-196), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

On September 2, 1966, the President established, by Executive Order 11301, a National Advisory Commission on Libraries, which was directed—

(1) to make a comprehensive study and appraisal of the role of libraries as resources for scholarly pursuits, and centers for the dissemination of knowledge, and as components of the evolving national information systems;

(2) to appraise the policies, programs, and practices of public agencies and private institutions and organizations, together with other factors, which have a bearing on the role and effective utilization of libraries;

(3) to appraise library funding, including Federal support of libraries to determine how funds available for the construction and sup-

port of libraries and library services can be more effectively and efficiently utilized; and
(4) to develop recommendations for action by Government or private institutions and organizations designed to ensure an effective and efficient system for the Nation.

The recommendations of the Commission were submitted as a report to the President on October 15, 1968. The report recommended the establishment of a National Commission on Libraries and Information Science. The following are excerpts from the report:

“According to figures supplied to the Commission by the U.S. Office of Education in June 1968, it would require a lump sum expenditure in 1968 of \$1.6 billion to stock school libraries optimally. Just to make up the backlog of space required to construct centralized public school libraries where they did not exist in 1961 would require \$2.145 billion. Space requirements for replacement and new growth for public libraries have been estimated at \$1.132 billion for the period 1962-75. As for the academic libraries, available figures compare present trend with optimum trend over the total period 1962-75: \$1.945 billion compared with \$9.891 billion for books and materials, \$120 million compared with \$360 million for new construction.

“Obviously such large amounts are beyond immediate achievement, but the estimates afford some general measure of the magnitude of the financial problem that lies ahead in the development of library resources.

“It already seems perfectly clear, however, that the need for additional financial support for our libraries is great at present and will grow rapidly in the future.

“... The present Commission has not attempted to make its own specific estimate of the dollar needs of libraries—in part because the members have not found it possible to evaluate existing standards and do not believe an adequate factual basis for a reliable estimate exists; and in part because any estimate would quickly be made obsolete by changing needs and costs—but primarily because the principal need is to create machinery for continuing examination of changing library needs for devising means of meeting them, and for determining priorities and costs. This would be the task of the permanent National Commission on Libraries and Information Science proposed in this report.

“... Finally, it should be stated here that the tasks of analyzing the needs, planning, setting standards, allocating resources, measuring performance, and coordinating efforts will be difficult and complex in the years ahead. Effective progress will require the sustained effort of the present Commission's recommended ongoing National Commission on Libraries and Information Science working with Federal agencies, the national libraries, and many other institutions, groups, and individuals.”

S. 1519 implements the major provisions of this recommendation.

SUMMARY

S. 1519, if enacted as amended by the committee, would—

(1) affirm it to be the policy of the United States that library and information services adequate to meet the needs of the people of the United States are essential to achieve national goals and to utilize most effectively the Nation's educational resources and that the Federal Government will cooperate with State and local governments and public and private agencies in assuring optimum provision of such services; and

(2) establish a National Commission on Libraries and Information Science as an independent component of the Office of the Secretary of Health, Education, and Welfare.

ROLE OF THE COMMISSION

The Commission would have the primary responsibility for developing and recommending overall plans for carrying out the national policy with respect to libraries and information science and for advising appropriate governmental agencies at all levels with respect to the means of carrying out those plans. The Commission shall—

(1) advise the President and the Congress on the implementation of the national policy;

(2) conduct studies, surveys, analyses of the library and informational needs of the Nation and the means by which those needs may be met;

(3) appraise the adequacy of library and information resources and services and evaluate the effectiveness of library and information science programs;

(4) develop and recommend overall plans for meeting national library and informational needs and for coordinating the activities of the Federal, State, and local levels;

(5) advise Federal, State, local, and private agencies with respect to library and information sciences, services and programs;

(6) promote research and development activities; and

(7) submit to the President and the Congress a report on its activities.

The Commission would be authorized to contract to carry out its functions, publish and disseminate reports, and conduct hearings.

The Commission will not take over any of the programs now being administered by the Library of Congress, the Department of Health, Education, and Welfare, the Department of Agriculture, the National Science Foundation, or any other Federal agency. The Commission is solely a planning and coordinating body. The planning which the Commission is to carry out is overall planning involving the establishment of goals and the recommendation to Federal and non-Federal public library and information science centers the means by which those goals may be obtained.

The Commission will not seek to replace the detailed planning now being undertaken by the various operating agencies. The Commission is given authority to promote research. The committee intends that the Commission within the limits of its authority and its small budget be able to conduct surveys and research on questions which merit such activities. The committee notes that the Commission does not have grant authority; therefore, all its research activities would be conducted either by contracting under section 5(b)(1) or by in-house research and survey activities under section 6(c). The research conducted by the Commission ought not to duplicate the research now being carried out by the operating agencies. However, the committee expects all agencies conducting research in the library and information science areas to cooperate with the Commission by providing it with the information the Commission needs to carry out its mission.

Although the Commission has been placed within the Office of the Secretary of Health, Education, and Welfare, the committee wishes to stress the fact that the Commission has independent status and that the Secretary does not have authority to direct the activities of the Commission or to edit any of the reports or materials published by the Commission. The committee understands that the National Advisory Commission set up under the Executive order was delayed by the fact that each agency had to clear those aspects of its report which dealt with that agency. The committee wishes to make clear that the National Commission established in this bill is not responsible to any department or agency with respect to the content of its reports. Of course, any department may comment on the activities of

the Commission but no department has the authority to change or withhold reports the Commission wishes to make to the President and to the Congress.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

DESIGNATION OF CERTAIN LANDS IN THE PELICAN ISLAND NATIONAL WILDLIFE REFUGE AS WILDERNESS

The bill (S. 126) to designate certain lands in the Pelican Island National Wildlife Refuge, Indian River County, Fla., as wilderness was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 126

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 3(c) of the Wilderness Act of September 3, 1964 (78 Stat. 890, 892; 16 U.S.C. 1132 (c)), certain lands in the Pelican Island National Wildlife Refuge, Florida, which comprise about four hundred and three acres and which are depicted on a map entitled "Pelican Island Wilderness—Proposed" and dated July 1967 are hereby designated as wilderness. The map shall be on file and available for public inspection in the offices of the Bureau of Sport Fisheries and Wildlife, Department of the Interior.

Sec. 2. The area designated by this Act as wilderness shall be known as the "Pelican Island Wilderness" and shall be administered by the Secretary of the Interior in accordance with the applicable provisions of the Wilderness Act.

Mr. MANSFIELD. Mr. President I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-197), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

This bill, S. 126, is identical to S. 3343 of the 90th Congress which was favorably reported by the committee and unanimously passed by the Senate, but which did not receive House consideration. S. 126 would designate a wilderness area of about 403 acres of the Pelican Island, National Wildlife Refuge in Florida as part of the National Wilderness Preservation System.

BACKGROUND

President Theodore Roosevelt, by an Executive order of March 13, 1903, established the Pelican Island National Wildlife Refuge—the first refuge of a system that has since grown to be the most far-reaching and comprehensive wildlife resource management program in the history of mankind. It is located in Indian River County, Fla., between the towns of Sebastian and Wabasso, some 75 miles north of West Palm Beach. The refuge area islands extend for several miles along the east side of the Indian River north of the Wabasso Bridge.

Visitor use of the islands proper must be held to a minimum throughout the year to avoid conflict with colonial bird nesting, which is the primary refuge objective. Opportunities for public enjoyment of the wildlife resources and water oriented recreation will be provided in the surrounding waters.

A public hearing proposal was conducted by the Bureau of Sport Fisheries and Wild-

life in Vero Beach, Fla., on April 5, 1967. Testimony was unanimously in favor of the wilderness proposal. The primary reason given for supporting the wilderness proposal included protection of colonial birds and their nesting and feeding habitat; protection of estuarine and fisheries resources; long-range preservation of natural areas for scenic, esthetic, and ecological values; preservation vital to long-range social and economic interests of citizens of Indian River County; and preservation of Pelican Island Refuge because of its historical value as the Nation's first national wildlife refuge.

DESCRIPTION

The wilderness area proposal includes all islands within Pelican Island National Wildlife Refuge within T. 31 S., R. 39 E., Tallahassee meridian. The islands are Roseate, Pelican, Roosevelt, Horseshoe, North Horseshoe, Long, David, Plug, North, and South Oyster, Preachers, Middle, Nelson, Pauls, and the four small islands designated as Egret Island.

A portion of the refuge is on the mainland, but this part was cut up by a mosquito control project before being added to the refuge. It contains numerous roads and is, therefore, not included in the proposal.

RECOMMENDATION

The Senate Interior and Insular Affairs Committee reports favorably on S. 126 and recommends early enactment.

COST

No additional budgetary expenditures are involved in enactment of S. 126.

DESIGNATION OF CERTAIN LANDS IN THE MONOMOY NATIONAL WILDLIFE REFUGE AS WILDERNESS

The bill (S. 1652) to designate certain lands in the Monomoy National Wildlife Refuge, Mass., as wilderness was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1652

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 3(c) of the Wilderness Act of September 3, 1964 (78 Stat. 890, 892; 16 U.S.C. 1132 (c)), certain lands in the Monomoy National Wildlife Refuge, Massachusetts, which comprise about two thousand six hundred acres and which are depicted on a map entitled "Monomoy Wilderness—Proposed" and dated August 1967, are hereby designated as wilderness. The map shall be on file and available for public inspection in the office of the Bureau of Sport Fisheries and Wildlife, Department of the Interior.

Sec. 2. The area designated by this Act as wilderness shall be known as the "Monomoy Wilderness" and shall be administered by the Secretary of the Interior in accordance with the applicable provisions of the Wilderness Act.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-198), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

This bill, S. 1652, is the same as S. 3425 of the 90th Congress which the committee favorably reported and the Senate passed without opposition. The bill did not receive

House consideration. S. 1652 would designate the 2,600-acre Monomoy Island, located in the Monomoy National Wildlife Refuge in Barnstable County, Mass., as part of the National Wilderness Preservation System.

BACKGROUND

Monomoy is a roadless island extending about 9 miles south from the elbow of Cape Cod, in the town of Chatham, Barnstable County, Mass. It was established on June 1, 1944, as part of the Monomoy National Wildlife Refuge, all but some 4 acres of the island having been acquired by the Secretary of the Interior under authority of the Migratory Bird Conservation Act (45 Stat. 1222), as amended (16 U.S.C. 715 et seq.). Boston, Mass., and Providence, R.I., are about 100 miles from Monomoy Island.

DESCRIPTION

The Monomoy Wilderness proposal is a barrier beach island located 9 miles south of Cape Cod in the town of Chatham, Barnstable County, Mass. Bounded on the west by Nantucket Sound and on the east by the Atlantic Ocean, the island varies from one-fourth to 1½ miles in width and is separated from the mainland by a shallow waterway about one-half mile wide. The exterior boundaries of the wilderness proposal are all lands on Monomoy Island to the line of mean low tide which coincides with the national wildlife refuge boundary around the island.

MANAGEMENT REQUIREMENTS

The Monomoy National Wildlife Refuge has been managed as a wild area since its establishment. There are no improved roads on the island. No changes in management are envisioned if the island is designated as wilderness. The laws and regulations of the Secretary of the Interior governing the management and administration of the island as a national wildlife refuge will continue to apply. Such laws and regulations provide for public uses such as hunting and other wildlife oriented forms of outdoor enjoyment, as well as other necessary wildlife refuge management programs.

The Department of the Army is currently studying the feasibility of a project for navigation for Pleasant Bay and tributary waters, Massachusetts. The proposed project would include the closing of the gap between Monomoy Island and Nauset Beach. The wilderness proposal would not preclude the planning and construction of this project. The Department of the Interior would expect to work closely with the Department of the Army if the project is authorized.

Of the approximately 4 acres of Monomoy Island in private ownership, 2 acres contain private summer camps and 2 acres are owned by the Massachusetts Audubon Society. These inholdings will be acquired. Until they are acquired it will be necessary to allow access to the inholdings via over-the-sand vehicles. National wildlife refuge administration of the island will require the retention of two existing buildings and the use of an over-the-sand vehicle for administrative and public safety purposes.

A permanent staff is required to administer the Monomoy National Wildlife Refuge. Present and future staffing requirements for the refuges will not be adjusted because of designation of Monomoy Island as wilderness.

If the island should join the mainland at some future date, the Monomoy Wilderness would be delineated by a fence.

THE HORSE IS KICKING STILL

Mr. METCALF. Mr. President, since the Nixon administration decided to close 59 Job Corps centers, including the Kicking Horse Center near Ronan, Mont., and pledged to provide "constructive alternatives" for the trainees affected, the senior

Senator from Montana (Mr. MANSFIELD) and I have been working hard to insure that the alternative in Montana is "constructive."

The Kicking Horse Job Corps center is the only Job Corps center truly oriented to the training of Indian youth. Montanans were happy with it and it seemed to be on the threshold of its greatest contribution. Either the administration did not know that, or, if it knew, did not choose to consider it when the order was issued to close the centers. Kicking Horse will be "phased out" as a Job Corps center on June 30.

Senator MANSFIELD and I felt that the decision was unacceptable. So did hundreds of Montanans, including the Confederated Salish and Kootenai Tribes of the Flathead Reservation on which the center is located. We began to convey the concern of Montanans to the authorities.

As a result, the Department of Labor has proposed to establish the "Northwest Indian Manpower Skills Center" to operate in the Kicking Horse facilities. Senator MANSFIELD and I still are concerned about the proposal and we want now to enter into the RECORD communications that express our concern and in which we receive certain assurances.

I ask unanimous consent that copies of correspondence between Senator MANSFIELD, me, and the Labor Department be printed in the RECORD.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
OFFICE OF THE MAJORITY LEADER,
Washington, D.C., April 10, 1969.

The President,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I was deeply disturbed to read in today's newspapers, April 10, that the Administration plans to close a large number of Job Corps camps on very short notice. If these reports are accurate, and this is the only source of information I have, the action seems to have been taken without proper consultation with the Congress and the personnel in the field who are responsible for administering the Job Corps camps.

Sudden closing of the three camps in my State has brought immediate pleas from Anaconda, Hamilton, Ronan, and other points in western Montana. This sudden decision will spread disillusionment among recruits whose training is abruptly terminated and will be a disappointment and economic blow to thousands of communities not only in Montana but the entire Nation. These people have worked hard to make camps in their area a success. What started out in many instances to be a rather difficult situation has developed into a fine working relationship between all concerned.

I urge that all three Montana Job Corps Camps be retained in any revision which is adopted as a result of the transfer of jurisdiction over the program. All three, Anaconda, Trapper Creek, and Kicking Horse, are successful and vital camps.

I share your concern that this and other poverty programs be efficient and effective as possible. This can be done and must be done, but through a cooperative effort on the part of all concerned.

In the beginning I had serious reservations about certain aspects of the Job Corps program, but experience, refinements and still more changes have impressed me as to the value of this aspect of our war on poverty.

I would hope the the Administration would delay any final decision on closing Job Corps camps until Congress has had an opportunity to work with the Administration. I share the view expressed by many of my colleagues expressing the hope that some solution be developed which would not abruptly terminate the training of those already enrolled and send them back to their disadvantaged environments. Such action would be consistent with your message of February 19 recommending a temporary extension of the anti-poverty program to give the Administration and Congress an opportunity to consider long range improvements with "full debate and discussion."

Your personal consideration in this matter will be sincerely appreciated by the people of Montana and all others concerned.

With best personal wishes, I am

Respectfully yours,

MIKE MANSFIELD.

U.S. SENATE,
OFFICE OF THE MAJORITY LEADER,
Washington, D.C., April 15, 1969.

Hon. GEORGE P. SCHULTZ,
Secretary, Department of Labor,
Washington, D.C.

DEAR MR. SECRETARY: The announced closing of the Kicking Horse Job Corps Camp in Montana has generated a great deal of opposition and concern about the Administration's attitude towards programs designed to assist the unfortunate and economically deprived.

In the past year, the Kicking Horse Camp has been converted into a predominately Indian camp serving young Indians from Montana and neighboring states. This facility has just begun to fill a real need among Indians. It has also been enthusiastically supported by the various tribal governments. Many within the Administration and the Congress have supported a variety of programs to assist the Indian people in developing their own personal resources. This Job Corps Camp seems to be one of the most successful. The closing of the facility at the end of this fiscal year would be in my estimate a serious mistake. If the administration persists in this decision, I would suggest that it be converted to a vocational or technical training center for Indians. It would seem that this could be done through the cooperation of both the Department of Labor and the Bureau of Indian Affairs.

The Secretary and Manager of the Polson Chamber of Commerce, Fred Mauley, has suggested that Washington personnel be sent to Montana to discuss this situation with both State and local officials. I concur in this suggestion and I hope that in the near future you can assign personnel to work closely with the Kicking Horse Job Corps Camp to see that its resources are not dissipated and that this camp can continue to serve Indian youth.

With best personal wishes, I am

Sincerely yours,

MIKE MANSFIELD.

U.S. DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, D.C., April 24, 1969.

Hon. MIKE MANSFIELD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: Thank you for your letter of April 15, concerning the Kicking Horse Job Corps Center.

We are concerned about providing training opportunities for Indian youth and have already discussed with representatives from the Departments of Interior and Agriculture the use of the Trapper Creek Job Corp Center as a training facility for Indian youth. I am very hopeful that this can be done so that there will be no decrease in the services provided Indian youth. We are working on arrangements to send a team from the Job

Corps and the Departments of Labor, Interior, and Agriculture to Montana to make an on-site appraisal of the situation. We will keep you closely advised of our plans as they develop.

I will also discuss your letter with Department of Interior officials to ascertain the possibility of using the Kicking Horse facility in a productive way that will benefit the residents of the area. Contact has already been made with the Secretaries of Interior and Agriculture concerning the constructive disposition of Job Corps camps designated for closure.

I am keenly aware that a change in the structure of the Job Corps may create transitional problems; but we will bend our best efforts to minimize any difficulties and to develop more effective manpower programs.

Sincerely,

GEORGE P. SCHULTZ,
Secretary of Labor.

APRIL 25, 1969.

Hon. GEORGE P. SCHULTZ,
Secretary of Labor, Department of Labor,
Washington, D.C.:

Thank you for your letter concerning the Kicking Horse Job Corps Center. Reports of early dismantling of this center, demoralization of staff and Indian youth at Kicking Horse needs a much more detailed explanation of decision to close this center. I strongly request that no further action be taken on status of Kicking Horse Job Corps Center until such time as realistic on-site appraisal of situation can be made, with full consultation with Montana congressional delegation and the appropriate committees of Congress. Please answer following questions, inadequately answered to date.

Why was Kicking Horse Job Corps Center selected from three Montana camps as one to be closed?

What purpose can be accomplished by moving a highly successful Job Corps camp (Kicking Horse) with predominately Indian enrollees, located on an Indian reservation with strong Indian tribal support to a Job Corps Center (Trapper Creek) administered by the U.S. Forest Service and in area whose response to such action is unknown?

What other use can be made of the Kicking Horse Job Corps camp when the property must revert to the original ownership when it no longer is used for its intended purpose?

I find it extremely difficult to understand why a very successful program of assisting disadvantaged Indian youth in responsive climate and fully supported by Indian groups should be disrupted and confused. I have expressed similar sentiments to the President and I would appreciate your giving this matter your immediate and sympathetic consideration. Regards.

MIKE MANSFIELD,
Majority Leader, U.S. Senate.

MAY 5, 1969.

Hon. MIKE MANSFIELD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: Following a visit of a Department of Labor evaluation team to Montana, we have developed a plan for the constructive disposition of the Kicking Horse Job Corps facility:

1. The Kicking Horse Job Corps facility will be phased out as of the end of June 1969.

2. The existing facilities will be used to establish a new Northwest Indian Manpower Skills Center. This Center will be funded from the MDTA account administered by the Department of Labor. We hope that the Center will be administered by the Bureau of Indian Affairs in cooperation with the Department of Labor.

3. The new Center will have a capacity of 150. It will be devoted to the training of Indians. The clientele will be drawn from the

Northwest region, coextensive with Region VI of the Manpower Administration. (The regional headquarters currently is located in Kansas City, but is scheduled to move to Denver.)

4. It is expected that the program will be developed so that the Center will serve adults as well as Indian youth.

5. I have directed the Regional Manpower Administrator, in cooperation with the various States, to initiate an extensive survey of occupational needs in the areas to which the trainees plan to return following training. This survey will then be used to change the range of skills for which training is presently offered at the Center. Currently, the Center offers only a few skills and provides access to only limited opportunities in the labor market.

6. I have directed my staff to commence discussions with the Concentrated Employment Program (CEP) in Butte, Montana to modify the boundaries of the CEP to incorporate the Blackfoot and Flathead reservations. This will permit the training center to draw upon the facilities of the CEP in providing orientation and placement support.

7. I have directed our staff to conduct discussions with officials of the Bureau of Indian Affairs to determine the willingness of the Bureau to administer the new Northwest Regional Indian Manpower Skills Center. In addition, by establishing a Center designed to serve the needs of Indians, I understand that the BIA will be able to utilize resources that are available for relocation assistance to trainees when they leave the Center and choose to move to labor markets where job opportunities are available.

8. It is significant to note that the planned Northwest Center draws on the experience of the Department of Labor in working with BIA for the establishment of a training center for Indians at Ft. Lincoln, North Dakota, and other locales. However, the Ft. Lincoln project is designed to serve Indian families as a unit, while the new Center would focus on the needs and occupational requirements of Indian males.

I will keep you posted as our plans are moved forward, but the above spells out the specific approach that we intend to follow in providing a constructive program to serve a group that has been characterized by major problems of employment in the past.

Sincerely,

ARNOLD R. WEBER,
Assistant Secretary for Manpower.

May 15, 1969.

HON. ARNOLD R. WEBER,
Assistant Secretary for Manpower, Department of Labor, Labor Building, Washington, D.C.

DEAR SECRETARY WEBER: We would like to convey to you certain misgivings that have been expressed to us by persons who attended your staff planning sessions for the development of the Northwest Indian Manpower Skills Center.

You will recall that the Skills Center is an MDTA program proposed by your department to be conducted in the facilities of the Kicking Horse Job Corps Center, near Ronan, Montana, after the Job Corps Center is phased out on June 30.

We share the misgivings. Chiefly, we understand, it is the Department of Labor's intention to fund the Manpower Skills Center for only one year.

Question. Are we to understand from this that the center is to operate for only one year?

Question. If not, what does the Department of Labor propose as future sources of revenue?

We have been told that the Department of Labor has been considering turning over the operation of the Skills Center to the Bureau of Indian Affairs after the first year.

Question. If that is true, why can't the Bureau of Indian Affairs become the planning and administering agency at once?

Secondly, the Kicking Horse Job Corps Center was geared to the training of a specific age group, ranging from late teens to early twenties. We understand the new center would be open to all ages. It seems to us to be a highly inappropriate policy to mix hardened unemployables with young men of high school age embarking on a training program.

Question. Is it not possible to direct your recruitment policies to young men?

Thirdly, there were mutual benefits from the program operated at the Kicking Horse Job Corps Center. For example, youth being trained in the operation of heavy equipment performed useful road and trail clearing and conservation work on the Flathead Indian Reservation, where the Center is located.

Question. Will this policy of mutual benefit continue at the Northwest Indian Manpower Skills Center?

From what we have heard of the planning sessions, we have the impression that there are men in your department who have little stake in whether the Northwest Indian Manpower Skills Center succeeds. We would like to impress upon you our high hopes for the development of a continuing program, acceptable to the community, and devoted to the training of Indian youth in an environment they understand and in which they feel comfortable.

That was the unique benefit of the Job Corps Center that the Administration has seen fit to close. We want very much for the Northwest Indian Manpower Skills Center to fill this critical need. We trust that you will be able to reply favorably and in detail to our questions and hope that you will keep us informed as the Center takes shape.

Thank you.

Very truly yours,

MIKE MANSFIELD,
U.S. Senate.
LEE METCALF,
U.S. Senate.

U.S. DEPARTMENT OF LABOR, OFFICE
OF THE ASSISTANT SECRETARY FOR
MANPOWER,
Washington, D.C., May 20, 1969.

HON. LEE METCALF,
U.S. Senate,
Washington, D.C.

DEAR SENATOR METCALF: I hope this letter will serve to answer the questions you raised in your letter of May 15, and to allay some of the concerns expressed.

First, it is our intention to operate the Northwest Indian Manpower Skills Center at Ronan, Montana on a continuing basis. Initially, we discussed with the Bureau of Indian Affairs the possibility of that agency assuming some of the financial responsibility after one year. This is a procedure that we have followed in other corporate activities with BIA, particularly in Ft. Lincoln, North Dakota. BIA informed us that while the idea was attractive, they doubted that such an arrangement could be carried out because of budgetary considerations. Therefore, I directed our representatives to indicate to BIA that we would continue to assume the cost of operation beyond the first year. This information has been conveyed to BIA by the Acting Associate Manpower Administrator of the United States Training and Employment Service.

Second, the Department of Labor will support the Northwest Indian Manpower Skills Center from MDTA funds or other manpower funds, as appropriate. It is not unusual to provide support for a particular project from several different accounts when the project serves several objectives. For example, the JOBS (Job Opportunities in the Public Sec-

tor) and (Concentrated Employment Program) are supported by both MDTA and EOA funds.

Third, we have informed the Bureau of Indian Affairs that we want that agency to continue in its administrative role with respect to the Skills Center. We think that we should retain planning authority in view of our responsibilities in the manpower area. However, we recognize that BIA has special competence in dealing with Indians and will continue to draw this expertise in the planning process. We have followed this course of action in our current meetings dealing with the Skills Center and in previous projects as well.

Fourth, the Northwest Indian Manpower Skills Center will emphasize training opportunities for younger workers. However, we do not think that enrollment should be bound by rigid age standards. In our other manpower centers we have enrolled both young workers and older workers without any difficulty. We agree that great care should be exercised in order to avoid any deleterious effect, and this will be taken into account in the screening and counseling process. But we are also concerned that the facilities be utilized so as to provide the maximum opportunity for benefiting individuals within the area to be served.

Fifth, with respect to the mutual benefits associated with the operation of the Center, we intend to maintain this situation where possible. However, we believe that such elements of mutual benefit should be related to the training requirements of enrollees. For example, where there are training courses in heavy equipment, no doubt there will be the opportunity to use the training for constructive work activities in the area. In other instances involving other skills, this may not be possible. While we agree that such work projects may be desirable, we believe that the interests of the enrollees will be best served in the long run by equipping them with skills that will meet the requirements of the labor market.

I hope that I have answered the questions you have raised. I have given the Northwest Indian Manpower Skills Center my personal attention and have checked on its progress with considerable frequency. I understand that the project is now under consideration in the BIA and that such consideration will be favorable. BIA has also agreed to utilize some of its additional resources in the areas of education, relocation, and placement to support the program.

I appreciate your interest in our manpower programs, and if you have any additional questions, please feel free to contact me directly. An identical letter is being sent to Senator Mansfield.

Sincerely,

ARNOLD R. WEBER,
Assistant Secretary for Manpower.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. METCALF. I am glad to yield to the senior Senator from Montana.

Mr. MANSFIELD. Mr. President, I wish to join in what my distinguished colleague has said about the establishment of the Northwest Indian Manpower Skill Center on the Flathead Reservation in western Montana.

Thanks to the initiative shown by my distinguished colleague from Montana (Mr. METCALF), it appears to me that in conjunction with the Department of Labor and the Bureau of Indian Affairs, we have been able to work out a situation that will be of tremendous benefit to our Indian population, and in so doing the only real "all Indian center" in the United States will be kept alive on

an expanded basis, with its life assured over years to come.

On the basis of correspondence which my colleague has had printed in the RECORD, this is not to be a one-shot affair but it will have continuity and hope and will take into account the needs of at least a small segment of our Indian population, which in our opinion is the most neglected minority in the United States.

Mr. President, the future and the administration of the Job Corps program has generated a great deal of discussion here in the Halls of Congress, as well as among our constituents. The transfer of jurisdiction over the program to the Department of Labor is a matter which has been accomplished by executive authority. There are some compelling arguments both for and against this decision.

The more recent announcement about the closing and realignment of many Job Corps centers generated a considerable opposition. The Job Corps was one of the programs under the Office of Economic Opportunity which got off to a rocky start. Most of the centers have now become popular and well accepted by local communities and they have done a great deal for a number of disadvantaged youth. Montana had three Job Corps centers, two under the jurisdiction of the Forest Service and one under the Bureau of Indian Affairs. Quite frankly, in the face of the severe cutback, I anticipated Montana might lose one of its centers. However, when the announcement was made, my colleagues, Senator LEE METCALF and Representative ARNOLD OLSEN and I were distressed to learn that the one to be closed in Montana was the Kicking Horse Job Corps Center at Ronan. This is a very unique center, in that a majority of its enrollees are Indian youth, being trained on an Indian reservation. It is the only center which was concentrating on Indian youth, a group deserving of all the help they can get. The center has a very good record of cost per trainee, and its placement record competes favorably with all other camps.

Since the original announcement about the closing, there have been a number of discussions with the Department of Labor, and I believe that they are now convinced that this unique center should not be abandoned. This Job Corps center has now been converted to the Northwest Indian Manpower Skills Center. The center will be funded through the Department of Labor in cooperation with the Bureau of Indian Affairs and the State of Montana. This center will serve the educational and training needs of Indians in my State and the surrounding area. The center will provide a unique opportunity to assist Indians who are in need of employable skills. This center will be operated within the Indian community, thus making the program more attractive and successful to the Indian youth. I am convinced this center can make a major contribution, and the Montana congressional delegation wants to see it succeed, as I am sure all interested Federal agencies do. This is a rare opportunity on which we can expand and

improve a program of assistance which is long overdue, insofar as our Indian people are concerned. My colleague, Senator METCALF, has had printed in the CONGRESSIONAL RECORD a series of letters which document the establishment of the Northwest Indian Manpower Skills Center, a program which, I am assured, will be operated on a continuing basis.

Mr. METCALF. Mr. President, as the Senator has pointed out, this center is going to be an all-Indian center, a center that is above and beyond some of the Job Corps prospectives. We have been assured this is not to be a 1-year affair or a phasing out program, but that it will be a permanent and continuous training area for the long neglected Indian population of America.

FRIGHTENING BOMBAST FROM DEFENSE SECRETARY LAIRD

Mr. YOUNG of Ohio. Mr. President, Secretary of Defense Laird made a frightening statement that even after the Vietnam war is ended there will be no significant cutback in defense spending. How many Senators and how many Members of the other body will tolerate this kind of nonsense?

Secretary Laird should be informed that instead of yielding subservience to the powerful profiteering military-industrial complex and yielding to power and promotion hungry generals, we in the United States have real wars to fight—wars against disease, poverty, malnutrition, and the hopelessness of millions presently living in rat-infested slums and some 20 million men, women, and children living on the verge of starvation. We must wage battles in behalf of youngsters who have been denied an opportunity to acquire work skills. We must win the war which confronts us, to better the lives of little children who go to sleep hungry night after night.

We must rebuke Secretary of Defense Laird and his collaborators in the Pentagon and in war production industries. As matters now stand, too many top officials in the Pentagon continuously seek more and more taxpayers' money for more and more armaments that are not necessary for our national security, weapons that are nothing more than the playthings of the Joint Chiefs of Staff and other admirals and generals. They constitute a real threat to this Nation and the general welfare of the rank and file of our citizens.

Unless the greed of war profiteers and the influence of the military-industrial complex against which the late President Eisenhower warned is curbed, every aspect of American life is likely to be affected adversely.

The arrogant campaign to install the ABM whether the American people need it or not and whether or not this fantastic boondoggle costs taxpayers many billions of dollars seems of no concern to the wheeler-dealers in the Pentagon and power and promotion hungry generals.

The rank and file of Americans in every part of our country are really concerned and fearful over the direction

these leaders temporarily in power in the Pentagon are taking us. Instead of opposing any cutback in defense spending, Secretary Laird and his advisers should be working on a program to bring hundreds of thousands of our boys home from Vietnam. They should start bringing them home without any further delay, bringing at least 100,000 home before next September and in the same way they went over to Vietnam, by ships and planes.

BEST KEPT SECRET OF THE VIETNAM WAR

Mr. YOUNG of Ohio. Mr. President, General Westmoreland is the author of an amazing book. My purpose in speaking out in the Senate today is not to provide a book review, although it is my conclusion that General Westmoreland's literary achievements in writing this book are far superior to his military achievements as a general commanding more than half a million fighting men in South Vietnam.

His book, entitled "Report on the War in Vietnam," and embellished with charts and photographs and printed on expensive paper, occupies more than 300 pages. I think every Senator would do well to read this book.

Section I of this report is authored by Adm. U. S. G. Sharp, U.S. Navy, then naval commander in chief, Pacific. Section II of this report, consisting of 276 pages, is a most interesting document, authored by General Westmoreland.

We are indebted to I. F. Stone's Weekly for calling special attention to revealing disclosures in General Westmoreland's report. General Westmoreland is in position to know the facts. He was the supreme commander of the U.S. ground and air forces involved in the civil war in Vietnam throughout the years of its greatest escalation by our Government. His account is not only interesting, but as I. F. Stone pointed out, he is a complacent author reporting his own achievements. His leadership and our involvement in Vietnam according to his book was a continuous triumph, a military marvel, in which any shortcomings and the surprising lack of a final devastating defeat to the VC, or forces of the National Liberation Front, were all due to other factors and eliminating himself altogether from any blame. He attributes any failure to the limitations imposed on him by civilian superiors in Washington and the impatience of the U.S. public.

General Westmoreland became supreme commander in 1965. He was commanding in Vietnam in June of that year when the duly elected government in Saigon was overturned in a nighttime coup by 10 generals, nine of whom, including President Thieu and Vice President Ky, were born in North Vietnam. Vice President Ky, a flamboyant and boastful air marshal of South Vietnam, was the first Prime Minister of the Saigon military junta. Then, following that rigged election in September 1967, and since, he has functioned as Vice President.

Americans have been told that Presi-

dent Johnson committed our troops in large numbers to a land war in South Vietnam, due entirely to commitments made to save the Saigon government from defeat. Not so, writes General Westmoreland. His narrative states that the commitment of U.S. combat troops in large numbers and the bombing of North Vietnam, which commenced in 1965, were not at the request of the Saigon militarist regime to save it from defeat. No, indeed. According to his narrative, that commitment was a unilateral decision by our military leadership. It could be by no other than by the Joint Chiefs of Staff of our Armed Forces. General Westmoreland states in his report that the South Vietnamese were not only reluctant to permit our combat troops to enter South Vietnam in great numbers, but when our Armed Forces did arrive in South Vietnam they tried to restrict their deployment and keep them as far as possible from Saigon and other populated areas in South Vietnam.

The direct inference from this detailed report of General Westmoreland is that leaders of the Saigon regime feared Americanization of the war. If this statement of General Westmoreland, who should know what he is writing about, is true, then back in 1965 we Americans should have urged that the Saigon government negotiate for a cease-fire and an armistice instead of escalating the war as we did at that time.

Now, finally following 4 years of futile fighting and bloodshed, and more than 270,000 American GI's killed or wounded in combat in fighting an unwinnable war, the President of the United States, who is the Commander in Chief of the Armed Forces of our country, is finally getting around to negotiating for a withdrawal of Americans and ending the bloodletting.

Mr. President, I wish President Nixon every success in that endeavor.

It is noteworthy and heartbreaking, as was reported by I. F. Stone, that up to February 1, 1965, just before President Johnson and General Westmoreland drastically escalated the war, only 258 Americans had been killed in combat in Vietnam. The number now exceeds 41,000. Their average age was 20. General Westmoreland wrote that by the late spring of 1965 he was convinced that the Saigon government could not survive for more than 6 months unless the United States put in "substantial numbers" of combat troops. This is reported on pages 98-99 of his book.

Nowhere in his book does he say that the leaders of the Saigon regime asked for additional troops—only that he, General Westmoreland, became convinced of their need.

General Westmoreland discloses in his report that officials of the Saigon government requested that all U.S. combat troops be concentrated in the central highlands of South Vietnam near Pleiku and in the areas north of that, distant from Vietnamese cities and far distant from Saigon. General Westmoreland, who throughout his book takes the position that he is a great general, disclosed with some disdain that Saigon authori-

ties suggested that all U.S. combat forces be deployed and concentrated in comparatively remote areas well away from Saigon and other cities "in order to minimize the impact of the South Vietnam economy and populace." In other words, leaders of the Saigon militarist regime were less fearful of defeat by the Vietcong than of an American invasion.

General Westmoreland stated he decided to override Saigon objections. In his wisdom, he felt it was "essential" that U.S. combat units be available to reinforce and stiffen South Vietnamese forces in the critical areas of high population density. Consequently, he reports that he not only overruled the requests coming from Saigon rulers, but his combat plan was "to build up U.S. forces in an arc around Saigon and in the populous coastal bases and not to restrict U.S. troops to the central highlands." In other words, U.S. leadership in Washington and Vietnam rejected the wishes of the Saigon rulers. No wonder 80 percent of the Vietnamese living in South Vietnam regard the United States to be the successors to their French colonial oppressors.

Rejecting their wishes as General Westmoreland did was clearly to treat South Vietnam as a colonial possession with final decisions made by Americans, just as those final decisions were made by the French before Dienbienphu.

This did not prevent General Westmoreland later in his report from referring blandly, as I. F. Stone said, to "the enemy's absurd claim that the United States was no more than a colonial power."

It will be remembered that in 1965 there was a strong sentiment for peace in South Vietnam. At that time the Buddhists launched a campaign for a negotiated settlement with the National Liberation Front. They demanded withdrawal of both the United States and Communist forces from South Vietnam. In fact, just before the last civilian government of Saigon was overturned by the generals in a nighttime coup, the claim was made by the militant minority opposing the civilian government of Phan Huy Quat that he was secretly conspiring with the Buddhists to purge the military in Saigon and negotiate peace. This leads to the conclusion that General Westmoreland at that time placed U.S. troops around and in Saigon to be ready to intervene if a South Vietnamese Government committed to negotiating peace came into power.

General Westmoreland admitted that there was a conflict in his strategy as contrasted with the strategy of Saigon leaders. In telling how he positioned American troops around Saigon he said that Secretary McNamara, visiting Saigon, supported him "in my opposition to yet another South Vietnamese suggestion that the U.S. forces be deployed only to remote areas such as the central highlands."

Admittedly Saigon government authorities desired then as they desire now that the tremendous U.S. firepower should be deployed in remote unpopulated areas trying to have the VC give

battle there. General Westmoreland admitted:

This would enable a full U.S. fire potential to be employed without the danger of civilian casualties.

Jonathan Schell, the New Yorker correspondent, in his book on Vietnam reported:

The overriding fantastic fact that we are destroying, simply by inadvertence, the very country we are supposedly protecting.

Admittedly, this was the report attributed to an American correspondent Schell, who spent some weeks flying over Quang Ngai Province in South Vietnam in 1967 in aircraft seeking to find targets for air strikes. He reported that 70 percent of the villages in the province had been destroyed by our firepower, and that 40 percent of the population had been moved to refugee camps and that the survivors who remained lived underground beneath their destroyed homes in areas that we shelled regularly.

General Westmoreland and also Admiral Sharp who was in charge of naval bombardment termed our method of warfare Operation Bulldozer making use of overwhelming firepower to terrorize the men, women, and children of South Vietnam into submission.

In General Westmoreland's report, there is no mention whatever of the No. 1 problem occupying the minds of men and women of South Vietnam—land reform and the distribution of land from the absentee landlords and the French to the peasants. In South Vietnam 80 percent of all arable land under cultivation has been throughout the past 20 years cultivated by peasants, men and women, who own no land whatever. These peasants are supporting the National Liberation Front because they are convinced that its victory against the Saigon regime of Thieu and Ky will mean that the absentee landlords will be dispossessed of their stranglehold on the people.

Nevertheless, former Secretary of Agriculture Orville Freeman recently revealed that in 1966 the U.S. Embassy in Saigon "informed Washington it opposed land reform on the grounds that it would create political instability."

In reality General Westmoreland wrote a repulsive report on the war he waged, even advertising to body counts as his primary index of military progress. He voiced with pride the body count estimate, which was used for the first time in any war fought anywhere in the world, that the VC lost 5½ men killed for each American and South Vietnamese soldier.

I. F. Stone makes the statement that General Westmoreland figures body count the same as a baseball fan would figure a baseball box score. With that sort of body count warfare he adds the thought that if we Americans are going to continue to fight a ground war in Southeast Asia in the long run we could run out of American bodies, even at a 4-to-1 or 5-to-1 or 6-to-1 ratio in our favor, in view of the fact that teeming of millions of Asians are on the other side.

APPOINTMENT BY VICE PRESIDENT

The VICE PRESIDENT. Pursuant to Public Law 84-372, the Chair appoints the Senator from Hawaii (Mr. INOUE) to the Franklin D. Roosevelt Memorial Commission, in lieu of the Senator from Maryland (Mr. TYDINGS), resigned.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider a nomination at the desk, having to do with the Tennessee Valley Authority. The nomination which was reported unanimously by the committee earlier today and has been cleared by the leadership on both sides.

The PRESIDING OFFICER (Mr. SPONG in the chair). Without objection it is so ordered.

TENNESSEE VALLEY AUTHORITY

The legislative clerk read the nomination of Aubrey J. Wagner, of Tennessee, to be a member of the board of directors of the Tennessee Valley Authority for the term expiring May 18, 1978. (Reappointment.)

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, the President will be notified as requested.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

INVESTMENT COMPANY AMENDMENTS ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at the conclusion of morning business the Senate proceed to the consideration of Calendar No. 172, S. 2224.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. I ask that the bill be read by title now.

The PRESIDING OFFICER. The clerk will read the title.

The LEGISLATIVE CLERK. A bill (S. 2224) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes.

The PRESIDING OFFICER. Without objection, at the end of the morning business, the Senate will proceed to the consideration of the bill.

ORDER FOR ADJOURNMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business this afternoon, it stand in adjournment until 12 o'clock noon Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTROL OF THE MILITARY

Mr. COOK. Mr. President, I ask unanimous consent to proceed for not to exceed 6 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COOK. Mr. President, as a Republican, it is not often that I find myself in the unlikely position of commending John Kenneth Galbraith and inserting in the RECORD an article from Harper's, which recently referred to me as "a hardcore reactionary." However, as improbable as it may be, I am compelled to call to the attention of my colleagues an article by Galbraith in the June 1969 edition on a subject of great concern to me and to many Americans—"How To Control the Military." In a truly constructive fashion, the author dwells as much on suggestions for reducing the unparalleled influence of the Military Establishment as he does in criticizing it. Our military services have done a magnificent job throughout our history in protecting our country. By keeping our criticism within the realm of constructive proposals, as Galbraith has in this article, we shall be better able to present this issue clearly, and not in a demagogic fashion, to the American people. I ask unanimous consent that the article appear in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Harper's magazine, June 1969]

HOW TO CONTROL THE MILITARY

(By John Kenneth Galbraith)

(NOTE.—J. K. Galbraith has written more than one man's share of the influential books of this era, including "American Capitalism" and "The Affluent Society" (just reissued in a new edition by Houghton Mifflin). He was a supporter of Adlai Stevenson and John F. Kennedy, was Ambassador to India 1961-63, and continues to teach at Harvard as Paul M. Warburg Professor of Economics.)

I

In January as he was about to leave office, Lyndon Johnson sent his last report on the economic prospect to the Congress. It was assumed that, in one way or another, the Vietnam war, by which he and his Administration had been destroyed, would come gradually to an end. The question considered by his economists was whether this would bring a decrease or an increase in military spending. The military budget for fiscal 1969 was \$78.4 billions; for the next year, including pay increases, it was scheduled to be about three billions higher. Thereafter, assuming peace and a general withdrawal from Asia, there would be a reduction of some six or seven billions. But this was only on the assumption that the Pentagon did not get any major new weapons—that it was content with what had already been authorized. No one really thought this possible. The President's economists noted that

plans already existed for "a package" consisting of new aircraft, modern naval vessels, defense installations, and "advanced strategic and general purpose weapons systems" which would cost many billions. This would wipe out any savings from getting out of Vietnam. Peace would now be far more expensive than war.

With Richard Nixon the prospect for increased arms spending would seem superficially to be better. During the election campaign he promised to establish a clear military superiority over the Soviets, an effort that he could not believe would escape their attention. Their response would also be predictable and would require a yet larger effort here. (At his first press conference Mr. Nixon retreated from "superiority" to "sufficiency.")

Melvin Laird, the new Secretary of Defense, while in the Congress was an ardent spokesman for the military viewpoint, which is to say for military spending. And his Under Secretary of Defense, David Packard, though the rare case of a defense contractor who had spoken for arms control, was recruited from the very heart of the military-industrial complex.

Just prior to Mr. Nixon's inauguration the Air Force Association, the most eager spokesman for the military and its suppliers, said happily that "If the new Administration is willing to put its money where its mouth is in national defense some welcome changes are in the offing." And speaking to a reporter, J. Leland Atwood, president and chief executive officer of North American Rockwell, one of the half-dozen biggest defense firms, sized up the prospect as follows: "All of Mr. Nixon's statements on weapons and space are very positive. I think he has perhaps a little more awareness of these things than some people we've seen in the White House." Since no one had previously noticed the slightest unawareness, Mr. Atwood considered the prospect very positive indeed.

Yet he could be wrong. Browning observed of Jove that he strikes the Titans down when they reach the peak—"when another rock would crown the work." When I started work on this paper some months ago, I hazarded the guess that the military power was by way of provoking the same public reaction as did the Vietnam war. Now this is no longer in doubt. If he remains positive, the military power will almost certainly do for President Nixon what Vietnam did for his predecessor. But it might also lead him to a strenuous effort to avoid the Johnson fate. Mr. Nixon has not, in the past, been notably indifferent to his political career. The result in either case would be an eventual curb on the military power—either from Mr. Nixon or his successor.

Or so it would seem. What is clear is that a drastic change is occurring in public attitudes toward the military and its industrial allies which will not for long be ignored by politicians who are sensitive to the public mood. And from this new political climate will come the chance for reasserting control.

The purpose of this article is to see the nature of the military power, assess its strength and weaknesses, and suggest the guidelines for regaining control. For no one can doubt the need for doing so.

II

The problem of the military power is not unique; it is merely a rather formidable example of the tendency of our time. That is for organization, in an age of organization, to develop a life and purpose and truth of its own. This tendency holds for all great bureaucracies, both public and private. And their action is not what serves a larger public interest, their belief does not reflect the reality of life. What is done and what is believed are, first and naturally, what serve the goals of the bureaucracy itself. Action

in the organization interest, or in response to the bureaucratic truth, can thus be a formula for public disservice or even public disaster.

There is nothing academic about this possibility. There have been many explanations of how we got into the Vietnam war, and action on which even the greatest of the early enthusiasts have now lapsed into discretion. But all explanations come back to one. It was the result of a long series of steps taken in response to a bureaucratic view of the world—a view to which a President willingly or unwillingly yielded and which, until much too late, was unchecked by any legislative or public opposition. This view was of a planet threatened by an imminent takeover by the unified and masterful forces of the Communist world, directed from Moscow (or later and with less assurance from Peking) and coming to a focus, however improbably, some thousands of miles away in the activities of a few thousand guerrillas against the markedly regressive government of South Vietnam.

The further bureaucratic truths that were developed to support this proposition are especially sobering. What was essentially a civil war between the Vietnamese was converted into an international conflict with rich ideological portent for all mankind. South Vietnamese dictators became incipient Jeffersonians holding aloft the banners of an Asian democracy. Wholesale graft in Saigon became an indispensable aspect of free institutions. An elaborately rigged election became a further portent of democracy. One of the world's most desultory and impermanent armies became, always potentially, a paragon of martial vigor. Airplanes episodically bombing open acreage or dense jungle became an impenetrable barrier to men walking along the ground. An infinity of reverses, losses, and defeats became victories deeply in disguise. Such is the capacity of bureaucracy to create its own truth.

There was nothing, or certainly not much, that was cynical in this effort. Most of the men responsibly involved accepted the myth in which they lived a part. For from the inside it is the world outside which looks uninformed, perverse, and very wrong. Throughout the course of the war there was bitter anger in Washington and Saigon over the inability of numerous journalists to see military operations, the Saigon government, the pacification program, the South Vietnam army in the same rosy light as did the bureaucracy. Why couldn't they be indignant instruments of the official belief—like Joseph Alsop?

As many others have observed, the epitome of the organization man in our time was Secretary of State Dean Rusk. Few have served organization with such uncritical devotion. A note of mystification, even honest despair, was present in his public expression over the inability of the outside world to accept the bureaucratic truths just listed. Only the eccentrics, undisciplined or naive, failed to accept what the State Department said was true. His despair was still evident as he left office, his career in ruins, and the Administration of which he was the ranking officer destroyed by action in pursuit of these beliefs. There could be no more dramatic—or tragic—illustration of the way organization captures men for its truths.

But Vietnam was not the first time men were so captured—and the country suffered. Within this same decade there was the Bay of Pigs, now a textbook case of bureaucratic self-deception. Organization needed to believe that Castro was toppling on the edge. Communism was an international conspiracy; hence it could have no popular local roots; hence the Cuban people would welcome the efforts to overthrow it. Intelligence was made to confirm these beliefs, for if it didn't it was, by definition, defective information. And, as an unpopular tyranny, the Castro

government should be overthrown. Hence the action, thus the disaster. The same beliefs played a part in the military descent, against largely nonexistent Communists, on the Dominican Republic.

But the most spectacular examples of bureaucratic truth are those that serve the military power—and its weapons procurement. These have not yet produced anything so dramatic as the Vietnam, Bay of Pigs, or Dominican misadventures but their potential for disaster is far greater. These beliefs and their consequences are worth specifying in some detail.

There is first the military belief that whatever the dangers of a continued weapons race with the Soviet Union these are less than those of any agreement that offers any perceptible opening for violation. If there is such an opening the Soviets will exploit it. Since no agreement can be watertight this goes far to protect the weapons race from any effort at control.

Secondly, there is the belief that the conflict with Communism is man's ultimate battle. Accordingly, one would not hesitate to destroy all life if Communism seems seriously a threat. This belief allows acceptance of the arms race no matter how dangerous. The present ideological differences between industrial systems will almost certainly look very different and possibly rather trivial from a perspective of fifty or a hundred years hence if we survive. Such thoughts are eccentric.

Third, the national interest is total, that of man inconsequential. So even the prospect of total death and destruction does not deter us from developing new weapons systems if some thread of national interest can be identified in the outcome. We can accept 75 million casualties if it forces the opposition to accept 150 million. This is the unsentimental calculation. Even more unsentimentally, Senator Richard Russell, the leading Senate spokesman of the military power, argued on behalf of the Army's Sentinel Anti-Ballistic Missile System (ABM) that, if only one man and one woman are to be left on earth, it was his deep desire that they be Americans. It was part of the case for the Manned Orbiting Laboratory (MOL) that it would maintain the national position in the event of extensive destruction down below.

Such, not secretly but as they have been articulated, are the organization truths of the military power. The beliefs that got us into (and keep us in) Vietnam in their potential for disaster pale as compared with these doctrines. We shall obviously have accomplished little if we get out of Vietnam but leave unchecked in the government the capacity for this kind of bureaucratic truth. What, in tangible form, is the organization which avows these truths?

III

It is an organization or a complex of organizations and not a conspiracy. Although Americans are probably the world's least competent conspirators—partly because no other country so handsomely rewards in cash and notoriety the man who blows the whistle on those with whom he is conspiring—we have a strong instinct for so explaining that of which we disapprove. In the conspiratorial view, the military power is a collusion of generals and conniving industrialists. The goal is mutual enrichment; they arrange elaborately to feather each other's nest. The industrialists are the *deus ex machina*; their agents make their way around Washington arranging the payoff. If money is too dangerous, then alcohol, compatible women, more prosaic forms of entertainment or the promise of future jobs to generals and admirals will serve.

There is such enrichment and some graft. Insiders do well. H. L. Nieburg has told the fascinating story of how in 1954 two modest-

ly paid aerospace scientists, Dr. Simon Ramo and Dr. Dean Wooldridge, attached themselves influentially to the Air Force as consultants and in four fine years (with no known dishonesty) ran a shoe-string of \$6,750 apiece into a multimillion-dollar fortune and a position of major industrial prominence.¹ (In 1967 their firm held defense contracts totaling \$121 million.) Senator William Proxmire, a man whom many in the defense industries have come to compare unfavorably to typhus, has recently come up with a fascinating contractual arrangement between the Air Force and Lockheed for the new C-5A jet transport. It makes the profits of the company greater the greater its costs in filling the first part of the order, with interesting incentive effects. A recent Department of Defense study reached the depressing conclusions that firms with the poorest performance in designing highly technical electronic systems—and the failure rate was appalling—have regularly received the highest profits. In 1960, 691 retired generals, admirals, naval captains, and colonels were employed by the ten largest defense contractors—186 by General Dynamics alone. A recent study made at the behest of Senator Proxmire found 2,072 employed in major defense firms with an especially heavy concentration in the specialized defense firms.² It would be idle to suppose that presently serving officers—those for example on assignment to defense plants—never have their real income improved by the wealthy contractors with whom they are working, forswear all favors, entertain themselves, and sleep austere alone. Nor are those public servants who show zeal in searching out undue profits or graft reliably rewarded by a grateful public. Mr. A. E. Fitzgerald, the Pentagon management expert who became disturbed over the C-5A contract with Lockheed and communicated his unease and its causes to the Proxmire Committee, had his recently acquired civil-service status removed and was the subject of a fascinating memorandum (which found its way to Proxmire) outlining the sanctions appropriate to his excess of zeal. Pentagon officials explained that Mr. Fitzgerald had been given his civil-service tenure as the result of a computer error (the first of its kind) and the memorandum on appropriate punishment was a benign gesture of purely scholarly intent designed to specify those punishments against which such a sound public servant should be protected.

Nonetheless the notion of a conspiracy to enrich and corrupt is gravely damaging to an understanding of the military power. It causes men to look for solutions in issuing regulations, enforcing laws, or sending people to jail. It also, as a practical matter, exaggerates the role of the defense industries in the military power—since they are the people who make the most money, they are assumed to be the ones who, in the manner of the classical capitalist, pull the strings. The armed services are assumed to be in some measure their puppets. The reality is far less dramatic and far more difficult of solution. The reality is a complex of organizations pursuing their sometimes diverse but generally common goals: The participants in these or-

¹ *In the Name of Science* (Chicago, Quadrangle Press, 1966). This is a book of first-rate importance which the author was so unwise as to publish some three years before concern for the problems he discusses became general. But perhaps he made it so.

² General Dynamics 113, Lockheed 210, Boeing 169, McDonnell Douglas 141, North American Rockwell 104, Ling-Temco-Vought 69. All of these firms are heavily specialized to military business; General Dynamics, Lockheed, McDonnell Douglas and North American Rockwell almost completely so.

ganizations are mostly honest men whose public and private behavior would withstand public scrutiny as well as most. They live on their military pay or their salaries as engineers, scientists, or managers or their pay and profits as executives and would not dream of offering or accepting a bribe.

The organizations that comprise the military power are the four Armed Services, and especially their procurement branches. And the military power encompasses the specialized defense contractors—General Dynamics, McDonnell Douglas, Lockheed, or the defense firms of the conglomerates—of Ling-Temco-Vought or Litton Industries. (About half of all defense contracts are with firms that do relatively little other business.) And it embraces the defense division of primarily civilian firms such as General Electric or AT&T. It draws moral and valuable political support from the unions. Men serve these organizations in many, if not most, instances, because they believe in what they are doing—because they have committed themselves to the bureaucratic truth. To find and scourge a few malefactors is to ignore this far more important commitment.

The military power is not confined to the Services and their contractors—what has come to be called the military-industrial complex. Associate membership is held by the intelligence agencies which assess Soviet (or Chinese) actions or intentions. These provide more often by selection than by any dishonesty, the justification for what the Services would like to have and what their contractors would like to supply. Associated also are Foreign Service Officers who provide a civilian or diplomatic gloss to the foreign-policy positions which serve the military need. The country desks at the State Department, a greatly experienced former official and ambassador has observed, are often "in the hip pocket of the Pentagon—lock, stock, and barrel, ideologically owned by the Pentagon."³

Also a part of the military power are the university scientists and those in such defense-oriented organizations as RAND, the Institute for Defense Analysis, and Hudson Institute who think professionally about weapons and weapons systems and the strategy of their use. And last, but by no means least, there is the organized voice of the military in the Congress, most notably on the Armed Services Committees of the Senate and House of Representatives. These are the organizations which comprise the military power.

The men who comprise these organizations call each other on the phone, meet at committee hearings, serve together on teams or task forces, work in neighboring offices in Washington or San Diego. They naturally make their decisions in accordance with their view of the world—the view of the bureaucracy of which they are a part. The problem is not conspiracy or corruption but unchecked rule. And being unchecked, this rule reflects not the national need but the bureaucratic need—not what is best for the United States but what the Air Force, Army, Navy, General Dynamics, North American Rockwell, Grumman Aircraft, State Department representatives, intelligence officers,

and Mendel Rivers and Richard Russell believe to be best.

In recent years Air Force generals, perhaps the most compulsively literate warriors since Caesar, have made their views of the world scene a part of the American folklore. These in all cases serve admirably the goals of their Service and the military power in general. Similarly with the other participants.

Not long ago, Bernard Nossiter, the brilliant economics reporter of the *Washington Post*, made the rounds of some of the major defense contractors to get their views of the post-Vietnam prospect. All, without exception, saw profitable tension and conflict. Edward J. Lefevre, the vice-president in charge of General Dynamics' Washington office, said "One must believe in the long-term threat." James J. Ling, the head of Ling-Temco-Vought, reported that "Defense spending has to increase in our area because there has been a failure to initiate—if we are not going to be overtaken by the Soviets." Samuel F. Downer, one of Mr. Ling's vice-presidents, was more outspoken. "We're going to increase defense budgets as long as those bastards in Russia are ahead of us." A study of the Electronics Industries Association also dug up by Mr. Nossiter (to whom I shall return in a moment) discounted the danger of arms control, decided that the "likelihood of limited war will increase" and concluded that "for the electronic firms, the outlook is good in spite [sic] of [the end of hostilities in] Vietnam."

From the foregoing beliefs, in turn, comes the decision on weapons and weapons systems and military policy generally. No one can tell where the action originates—whether the Services or the contractors initiate decisions on weapons—nor can the two be sharply distinguished. Much of the plant of the specialized defense contractors is owned by the government. Most of their working capital is supplied by the government through progress payments—payments made in advance of completion of the contract. The government specifies what the firm can and cannot charge to the government. The Armed Services Procurement Regulation states that "Although the government does not expect to participate in every management decision, it may reserve the right to review the contractor's management efforts. . . ." (Italics added.)

In this kind of association some proposals will come across the table from the military. Some will come back from the captive contractors. Nossiter asked leading contractors, as well as people at the Pentagon, about this. Here are some of the answers.

From John W. Bessire, General Manager for Pricing, General Dynamics, Fort Worth: "We try to foresee the requirements the military is going to have three years off. We work with their requirements people and therefore get new business."

From Richard E. Adams, Director of Advanced Projects, Fort Worth Division of General Dynamics, who through the source was the military: "Things are too systematized at the Pentagon for us to invent weapons systems and sell them on a need."

On the influence of the military he added: "We know where the power is [on Capitol Hill and among Executive Departments]. There's going to be a lot of defense business and we're going to get our share of it."

From John R. Moore, President of Aerospace and Systems Group of North American Rockwell: "A new system usually starts with a couple of military and industry people getting together to discuss common problems."

After noting that most of his business came from requirements "established by the Defense Department and NASA," he concluded: "But it isn't a case of industry here and the government here. They are interacting continuously at the engineering level."

And finally from a high civilian in the Pentagon: "Pressures to spend more. . . . In part they come from the industry selling new weapons ideas and in part from the military here. Each military guy has his own piece, tactical, antisubmarine, strategic. Each guy gets where he is by pushing his particular thing."

He added: "Don't forget, too, part of it is based on the perception of needs by people in Congress."

The important thing is not where the action originates but in the fact that it serves the common goals of the military and the defense contractors. It is, in the language of labor relations, a sweetheart deal between those who sell to the government and those who buy. Once competitive bidding created an adversary relationship between buyer and seller sustained by the fact that, with numerous sellers, any special relationship with any one must necessarily provoke cries of favoritism. But modern weapons are bought overwhelmingly by negotiation and in most cases from a single source of supply. (In the fiscal year ending in 1968, General Accounting Office figures show that 57.9 per cent of the \$43 billion in defense contracts awarded in that year was by negotiation with a single source of supply. Of the remainder 30.6 per cent was awarded by negotiation where alternative sources of supply had an opportunity to participate and only 11.5 per cent was open to advertised competitive bidding.)⁴ Under these circumstances the tendency to any adversary relationship between the Services and their suppliers is minimal. Indeed, where there are only one or two sources of supply for a weapons system, the interest of the Services in sustaining a source of supply will be no less than that of the firm in question in being sustained.

Among those who spoke about the sources of ideas on weapons needs, no one was moved to suggest that public opinion played any role. The President, as the elected official responsible for foreign policy, was not mentioned. The Congress came in only as an afterthought. And had the Pentagon official who mentioned the Congress been pressed, he would have agreed that its "perception of needs" is a revelation that almost always results from prompting by either the military or the defense industries. It was thus, for example, that the need for a new generation of manned bombers was perceived (and provided for) by Congress though repeatedly vetoed as unnecessary by Presidents Kennedy and Johnson. But in the past the role of the Congress has been overwhelmingly acquiescent and passive. As Senator Gaylord Nelson said in the Senate in February 1964:

"An established tradition . . . holds that a bill to spend billions of dollars for the machinery of war must be rushed through the House and the Senate in a matter of hours, while a treaty to advance the cause of peace, or a program to help the underdeveloped nations . . . guarantee the rights of all our citizens, or . . . to advance the interests of the poor must be scrutinized and debated and amended and thrashed over for weeks and perhaps months."

IV

We see here a truly remarkable reversal of the American political and economic system as outlined by the fathers and still portrayed to the young. That view supposes that ultimate authority—ultimate sovereignty—lies with the people. And this authority is assumed to be comprehensive. Within the ambit of the state the citizen expresses his will through the men—the President and members of the Congress—whom he elects. Outside he accomplishes the same thing by his

⁴ Testimony of Elmer B. Staats, Comptroller General, before Senator Proxmire's Committee (November 11, 1968).

³ Ralph Dungan, formerly White House aide to Presidents Kennedy and Johnson and former Ambassador to Chile. Quoted in George Thayer, *The War Business* (Simon and Schuster). The appearance of the State Department as a full-scale participant in the military power may have been the hopefully temporary achievement of Secretary Rusk. Apart from a high respect for military acumen and need, he in some degree regarded diplomacy as subordinate to military purpose. In time such attitudes penetrate deeply into organization.

purchases in the market. These instruct supplying firms—General Motors, General Electric, Standard Oil of New Jersey—as to what they shall produce and sell. But here we find the Armed Services or the corporations that supply them making the decisions and instructing the Congress and the public. The public accepts whatever is so decided and pays the bill. This is an age when the young are being instructed, in my view rightly although with unnecessary solemnity, to respect constitutional process and seek change within the framework of the established political order. And we find the assumed guardians of that order, men with no slight appreciation of their righteousness and respectability, calmly turning it upside down themselves.

How did this remarkable reversal in the oldest of constitutional arrangements come about? How, in particular, did it come about in a country that sets great store by individual and citizen rights and which traditionally has been suspicious of military, industrial, and bureaucratic power? How did it come to allow these three forces to assert their authority over a tenth of the economy and something closer to ten-tenths of our future?²

v

Six things brought the military-industrial bureaucracy to its present position of power. To see these forces is also to be encouraged by the chance for escape.

First there has been, as noted, the increasing bureaucratization of our life. In an economically and technologically complex society, more and more tasks are accomplished by specialists. Specialists must then have their knowledge and skills united by organization. Organization, then, as we have seen, proceeds to assert its needs and beliefs. These will not necessarily be those of the individual or community.

In what Ralph Lapp has called the weapons culture, both economic and technological complexity are raised to the highest power. So, accordingly, are the scope and power of organization. So, accordingly, is the possibility of self-serving belief.

It is a power, however, which brings into existence its own challenge. The same technical and social complexity that requires organization requires that there be large numbers of trained and educated people. Neither these people nor the educational establishment that produces them are docile in the face of organization. So with organization come people who resist it—who are schooled to assert their individual beliefs and convictions. No modern military establishment could expect the disciplined obedience which sent millions (in the main lightly schooled lads from the farm) against the machine guns as late as World War I.

The reaction to organization and its beliefs may well be one of the most rapidly developing political moods of our time. Clearly it accounted for much of the McCarthy strength in the last year—for if Dean Rusk or General Westmoreland were the epitome of the organization man, Eugene McCarthy was its antithesis. Currently one sees it sweeping ROTC off the campuses—or out of the university curricula. It is causing recruiting problems of big business—and not alone

the defense firms. One senses, if the draft survives, that it will cause trouble for the peacetime Armed Forces.

But so far the impressive thing is the power that massive organization has given to the military industrial complex and not the resistance it is arousing. The latter is for the future.

Second in importance in bringing the military-industrial complex to power were the circumstances and images of foreign policy in the late Forties, Fifties and early Sixties. The Communist world, as noted, was viewed as a unified imperium mounting its claim to every part of the globe. The post-war pressure on Eastern Europe and on Berlin, the Chinese revolution, and the Korean war, seemed powerful evidence in the case. And, after the surprisingly early explosion of the first Soviet atomic bomb, followed within a decade by the even more astonishing flight of the first Sputnik, it was easy to believe that the Communist world was not only politically more unified than the rest but technologically stronger as well.

The natural reaction was to delegate power and concentrate resources. The military Services and their industrial allies were given unprecedented authority—as much as in World War II—to match the Soviet technological initiative. And the effort of the nation's scientists (and other scholars) was concentrated in equally impressive fashion. None or almost none remained outside. Robert Oppenheimer was excluded, not because he opposed weapons development in general or the hydrogen bomb in particular, but because he thought the latter unnecessary and undeliverable. That anyone, on grounds of principle, should refuse his services to the Pentagon or Dow Chemical was nearly unthinkable. Social scientists responded eagerly to invitations to spend the summer at RAND. They devoted their winters to seminars on the strategy of defense and deterrence. The only question in this time was whether a man could get a security clearance. The extent of a man's access to secret matters measured his responsibility and influence in public affairs and prestige in the community.

The effect of this concentration of talent was to add to the autonomy and power of the organizations responsible for the effort. Criticism or dissent requires knowledge; the knowledgeable men were nearly all inside. The Eisenhower Administration affirmed the power of the military by appointing Secretaries of Defense who were largely passive except as they might worry on occasion about the cost. The Democrats, worrying about a nonexistent missile gap and fearing, as always, that they might seem soft on Communism, accorded the military more funds and power, seeking principally to make it more efficient.

This enfranchisement of the military power was in a very real sense the result of a democratic decision—it was a widely approved response to the seemingly fearsome forces that surround us. With time those who received this unprecedented grant of power came to regard it as a right. Where weapons and military decision were concerned, their authority was meant to be plenary. Men with power have been prone to such error.

Third, secrecy confined knowledge of Soviet weapons and responding American action to those within the public and private bureaucracy. No one else had knowledge, hence no one else was qualified to speak. Senior members of the Armed Services, their industrial allies, the scientists, the members of the Armed Services Committees of the Congress were in. It would be hard to imagine a more efficient arrangement for protecting the power of a bureaucracy. In the academic community and especially in Congress there was no small prestige in being a member of this club. So its influence was

enhanced by the sense of belonging and serving. And, as the experience of Robert Oppenheimer and other less publicized persons showed, it was possible on occasion to exclude the critic or skeptic as a security risk.

Fourth, there was the disciplining effect of personal fear. A nation that was massively alarmed about the unified power of the Communist world was not tolerant of skeptics or those who questioned the only seemingly practical line of response. Numerous scientists, social scientists, and public officials had come reluctantly to accept the idea of the Communist threat. This history of reluctance could now involve the danger—real or imagined—that they might be suspected of past association with this all-embracing conspiracy. The late Senator Joseph R. McCarthy would not have been influential in ordinary times; but he and others saw or sensed the opportunity for exploiting national and personal anxiety. The result was further and decisive pressure on anyone who seemed not to concur in the totality of the Communist threat. (McCarthy was broken only when he capriciously attacked the military power.)

Fear provided a further source of immunity and power. Accepted Marxian doctrine holds that a cabal of capitalists and militarists is the cutting edge of capitalist imperialism and the cause of war. Anyone who raised a question about the military-industrial complex thus sounded suspiciously like a Marxist. So it was a topic that was avoided by the circumspect. Heroism in the United States involves some important distinctions. It requires a man to stand up fearlessly, at least in principle, to the prospect for nuclear extinction. But it allows him to proceed promptly to cover if there is risk of being called a Communist, a radical, an enemy of the system. Death we must face but not social obloquy or political ostracism. The effect of such discriminating heroism in the Fifties and Sixties was that most potential critics of the military power were exceptionally reticent.

In 1961, in the last moment before leaving office, President Eisenhower gave his famous warning: "In the councils of government we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex. The potential for the disastrous rise of misplaced power exists and will persist." This warning was to become by a wide margin the most quoted of all Eisenhower statements. This was principally for the flank protection it provided for all who wanted to agree. For many years thereafter anyone (myself included) who spoke to the problem of the military power took the thoughtful precaution of first quoting President Eisenhower. He had shown that there were impeccably conservative precedents for our concern.

Fifth, in the Fifties and early Sixties the phrase "domestic priority" had not yet become a cliché. The civilian claim on federal funds was not, or seemed not, to be overpowering. The great riots in the cities had not yet occurred. The appalling conditions in the urban core that were a cause were still unnoticed. Internal migration had long been under way but millions were yet to come from the rural into the urban slums. Poverty had not yet been placed on the national agenda, with the consequence that we would learn how much and how abysmal it is. And promises not having been made to end poverty, expectations had not been aroused. The streets of Washington, D.C., were still safer than those of Saigon. Travel by road and commuter train was only just coming to a crawl. The cities' air and water were dirty but not yet lethally so.

In this innocent age, in 1964, taxes were reduced because there seemed to be danger of economic stagnation and unemployment from raising more federal revenue than could quickly be spent. The then Director of the

² I have argued elsewhere (*The New Industrial State*, Houghton Mifflin, 1967) that with increasing industrialization the sovereignty of the consumer or citizen yields to the sovereignty of the producer or public bureaucracy. Increasingly the consumer or citizen is made subordinate to their needs. I have been rather sharply challenged. But in the very important area of military production, about 10 per cent of the total, we see that producer sovereignty is accepted and avowed. Not even my most self-confident critics would be wholly certain of my error here.

Budget, Kermit Gordon, was persuaded that if an excess of revenue were available the military would latch on to it. Inflation was not a pressing issue. Military expenditures, although no one wished to say so, did sustain employment. Circumstances could not have been better designed, economically speaking, to allow the military a clear run.

Sixth and finally, in these years, both conservative and liberal opposition to the military-industrial power was muted. Nothing could be expected, in principle, to appeal less to conservatives than a vast increase in bureaucratic power at vast cost. In an earlier age the reaction would have been apoplectic. Some conservatives in an older tradition—men genuinely concerned about the Leviathan State—were aroused. Ernest Weir, the head of National Steel and the foe of FDR and the New Deal, Alf M. Landon, the much-underestimated man who opposed Roosevelt in 1936, Marriner Eccles, banker and longtime head of the Federal Reserve, and a few others did speak out. But for most it was enough that the Communists—exponents of a yet more powerful state and against private property, too—were on the other side. One accepted a lesser danger to fight a greater one. And, as always, when many are moderately aroused some are extreme. It became a tenet of a more extreme conservatism that civilians should never interfere with the military except to provide more money. Nor would there be any compromise with Communism. It must be destroyed. Their military doctrine, as Daniel Bell has said, was "that negotiation with the Communists is impossible, that anyone who discusses the possibility of such negotiation is a tool of the Communists, and that a 'tough policy'—by which, *sotto voce*, is meant a preventative war of a first strike—is the only means of forestalling an eventual Communist victory." To an impressive extent, in the Fifties and Sixties this new conservatism, guided by retired Air Force generals and the redoubtable Edward Teller, became the voice of all conservatism on defense policy.

The disappearance of liberal criticism was almost as complete—and even more remarkable. An association of military and industrial power functioning without restraint would have been expected to arouse liberal passion. So also the appropriation of public power for private purpose by defense contractors, some of them defining missions for the Services so as to require what they had to sell. But liberals did not react. Like conservatives they accepted a lesser threat to liberty to forestall a greater one. Also it was not easy for a generation that had asked for more executive power for FDR and his successors over conservative opposition to see danger in any bureaucracy or remedy in stronger legislative control. This was a too radical reversal of liberal form.

The generation of liberals which was active in the Fifties and Sixties had also been scarred by the tactics of the domestic Communists in politics and the trade-union movement. And members of this generation had seen what happened to friends who had committed themselves to the wartime alliance with the Soviets and had nailed their colors to its continuation after the war. Stalin had let them down with a brutal and for many a mortal thump. Those who escaped, or many of them, made common cause with the men who were making or deploying weapons to resist Communism, urging only, as good liberals, that there was a social dimension to the struggle. As time passed it was discovered that many good and liberal things—foreign aid, technical assistance, travel grants, fellowships, overseas libraries—could be floated on the Communist threat. Men of goodwill became

accomplished in persuading the more retarded to vote for foreign-aid legislation, not as a good thing in itself but as an indispensable instrument in the war against Communism. Who, having made this case, could then be critical of military spending for the same purpose?

Additionally in the Fifties and Sixties American liberals were fighting for the larger federal budget not for the things it bought but for the unemployment it prevented. Such a budget, with its stabilizing flow of expenditures and supported by personal income taxes which rose and fell with stabilizing effect, was the cornerstone of the New or Keynesian Economics. And this economics of high and expanding employment, in turn, was the cornerstone of the liberal position. As noted it was not easy for liberals to admit that defense expenditures were serving this benign social function; when asked they (i.e. we) always said that spending for education, housing, welfare, and civilian public works would serve just as well and be much welcomed as an alternative.

But there was then no strong pressure to spend for these better things. Accordingly it was not easy for liberals to become aroused over an arms policy which had such obviously beneficial effects on the economy.

By the early Sixties the liberal position was beginning to change. From comparatively early in the Kennedy Administration—the Bay of Pigs was a major factor in this revelation—it became evident that a stand would have to be made against policies urged by the military and its State Department allies—against military intervention in Cuba, military intervention in Laos, military intervention in Vietnam, an all-out fallout shelter program, unrestricted nuclear testing, all of which would be disastrous for the President as well as for the country and world. A visible and sometimes sharp division occurred between those who, more or less automatically, made their alliance with the military power, and those—Robert Kennedy, Adlai Stevenson, Theodore Sorensen, Arthur Schlesinger, Averell Harriman, and, though rendering more homage to the organizations of which they were a part, George Ball and Robert McNamara—who saw the dangers of this commitment. With the Johnson Administration this opposition disappeared or was dispersed. The triumph of those who allied themselves with the bureaucracy was the disaster of that Administration.

The opposition, much enlarged, then reappeared in the political theater. Suspicion of the military power in 1968 was the most important factor uniting the followers of Senators Kennedy, McCarthy, and McGovern. Along with the more specific and more important opposition to the Vietnam conflict, it helped to generate the opposition that persuaded Lyndon Johnson not to run. And the feeling that Vice President Humphrey was not sufficiently firm on this issue—that he belonged politically to the generation of liberals that was tolerant of the military-industrial power—unquestionably diluted and weakened his support. Conceivably it cost him the election.

VI

To see the sources of the strength of the military-industrial complex in the Fifties and Sixties is to see its considerably greater vulnerability now. The Communist imperialism, which once seemed so fearsome in its unity, has broken up into bitterly antagonistic blocks. Moscow and Peking barely keep the peace. Fear in Czechoslovakia, Yugoslavia, and Romania is not of the capitalist enemy but the great Communist friend. The more intimate calculations of the Soviet High Command on what might be expected of the Czech (or for that matter the Romanian or Polish or Hungarian) army in the event of war in Western Europe must not be without charm. Perhaps they explain the odd military

passion of the Soviets for the Egyptians. The Soviets have had no more success than has capitalism in penetrating and organizing the backward countries of the world. Communist and capitalist jungles are indistinguishable. Men of independent mind recognize that after twenty years of aggressive military competition with the Soviets our security is not greater and almost certainly less than when the competition began. And although in the Fifties it was fashionable to assert otherwise ("a dictator does not hesitate to sacrifice his people by the millions") we now know that the Soviets are as aware of the totally catastrophic character of nuclear war as we are—and more so than our more articulate generals.

These changes plus the adverse reaction to Vietnam have cost the military power its monopoly of the scientific community. This, in turn, has damaged its claim to a monopoly of knowledge including that which depends on security classification. Informed critics are amply available outside the military-industrial complex. When earlier this year Under Secretary of Defense Packard sought, in an earlier tradition, to discredit the opposition of Dr. Herbert A. York, former Director of Defense Research and Engineering, to the ABM, on the grounds that the latter did not have access to secret information, the effort backfired. The only person whose credibility was damaged was Secretary Packard. In consequence men are now available to distinguish between what weapons are relevant to an equilibrium with the Soviets, what destroys this balance by encouraging a new competitive round, and what serves primarily the prestige of the Services and the prestige and profits of the contractors. The attack on the Sentinel-Safeguard ABM system could never have been mounted in the Fifties.

Additionally, civilian priority has become one of the most evocative words in the language. Everywhere—for urban housing and services, sanitation, schools, police, urban transportation, clean air, potable water—the needs are huge and pressing. Because these needs are not being met the number of people who live in fear of an urban explosion may well be greater than those who are alarmed by the prospect of nuclear devastation. For many years I have lived in summers on an old farm in southern Vermont. In the years following Hiroshima we had the advance refugees from the atomic bomb. Now we have those who are escaping the ultimate urban riot. The second migration is much bigger than the first and has had a far more inflationary effect on local real-estate values.

Certainly the day when military spending was a slightly embarrassing alternative to unemployment is gone and, one imagines, forever.

With all of these changes has come a radical change in the political climate. Except in the darker reaches of Orange County and suburban Dallas (where defense expenditures also have their influence) fear of Communism has receded. We have lived with the Communists on the same planet now for a half-century. An increasing number are disposed to believe we can continue doing so. Communism seems somewhat less triumphant than twenty years ago. Perhaps the Soviet Union is yet another industrial state in which organization—bureaucracy—is in conflict with the people it must educate in such numbers for its tasks. Mr. Nixon in his many years as a political aspirant was not notably averse to making capital out of the Communist menace. But neither, if a little belatedly, was he a man to resist a trend. Many must have noticed that his warnings overt or implied of the Communist menace in his Inaugural Address were rather less fiery than those of John F. Kennedy eight years earlier.

The anxiety which led to the great con-

* Quoted by Ralph E. Lapp in *The Weapons Culture* (Norton, 1968).

centration of military and industrial power in the Fifties having dissipated, the continued existence of that power has naturally become a political issue. There are many who think that Mr. Nixon sacrificed some, perhaps much, of his lead when, in the closing days of the Presidential campaign, he promised to revitalize the arms race with an effort to establish clear superiority over the Soviets. There can be little question that General Curtis LeMay, far from attracting voters to Governor George Wallace in 1968, was a disaster. At a somewhat lower level than Eisenhower, MacArthur, Patton, and Bradley, LeMay was one of the *bona fide* heroes in the American pantheon. But his close association with the military power, especially his long efforts to make nuclear warfare palatable, if not altogether appetizing, to the American public, was unnerving. As noted a stand-up-to-it heroism is combined with a deep sensitivity when the nuclear nerve is touched.

If the potential followers of Governor Wallace were capable of alarm over the military power, then the potential opposition is not confined to the bearded and barefoot left. (This, as in the case of Vietnam, will be the first assumption of the bureaucracy.) Nor is it. Concern reaches deeply into the suburban middle class and business community. During the summer of 1968, if I may recur once more to personal experience, I was concerned with raising money for Eugene McCarthy. We raised a great deal: the efforts with which I was at least marginally associated produced some \$2.5 million. Overwhelmingly we got that money from businessmen. Opposition to the Vietnam war was, of course, the prime reason for this support. But concern over the military power was a close (and closely affiliated) second. When one is asking for money one very soon learns what evokes response.

Social concern, however inappropriate for a businessman, was most important but there were also very good business reasons for being aroused. In 1968, the hundred largest defense contractors had more than two-thirds (67.4 per cent) of all the defense business and the smallest fifty of these had no more in the aggregate than General Dynamics and Lockheed. A dozen firms specializing in military business (e.g., McDonnell Douglas, General Dynamics, Lockheed, United Aircraft) together with General Electric and A T & T had a third of all the business. For the vast majority of businessmen the only association with the defense business is through the taxes they pay. Not even a subcontract comes their way. And they have another cost. They must operate in communities that are starved for revenue, where, in consequence, their business is exposed to disorder and violence and where materials and manpower are preempted by the defense contractors. They must also put up with inflation, high interest rates, and regulation on overseas investment occasioned by defense spending. The willingness of American businessmen to suffer on behalf of the big defense contractors has been a remarkable manifestation of charity and self-denial.

Two other changes have altered the position of the military power. In the Fifties the military establishment of the United States was still identified in the public mind with the great captains of World War II—with Eisenhower, Marshall, MacArthur, Bradley, King, Nimitz, Arnold. And many members of a slightly junior generation—Maxwell Taylor, James Gavin, Matthew Ridgway, Curtis LeMay—were in positions of power. Some of these soldiers might have done less well had they been forced to fight an elusive and highly motivated enemy in the jungle of Vietnam encumbered by the leisured warriors of the ARVN. (At one time or another, Eisenhower, MacArthur, Gavin all made it explicitly clear that they would never have got involved in such a mistake.) The present military generation is intimate-

ly associated with the Vietnam misfortune. And its credibility has been deeply damaged by its fatal association with the bureaucratic truths of that war—with the long succession of defeats that became victories, the victories that became defeats, and brilliant actions that did not signify anything at all. In the Fifties it required courage for a civilian to challenge Eisenhower on military matters. Anyone is allowed to doubt the omniscience of General Westmoreland.

Finally, all bureaucracy has a mortal weakness; it cannot respond effectively to attack. The same inertial guidance which propels it into trouble—which sends it mindlessly into the Bay of Pigs or Vietnam even when disaster is evident—renders it helpless in self-defense. It can, in fact, only mimic itself. Organization could not come up with any effective response to its critics on Vietnam. The old slogans—we must resist worldwide Communist aggression, we must not reward aggression, we must stand by our brave allies—were employed not only after repetition had robbed them of all meaning but after they had been made ludicrous by events. In the end Secretary of State Rusk was reduced to mnemonic speeches about our commitments. Organized thought was incapable of anything better.

So with the military power—only more so. One of the perquisites of great power is that its use need not be defended. In consequence kings, czars, dictators, capitalists, even union leaders—when their day of accounting comes have rarely been able to speak for themselves. As the military power comes under scrutiny, it will be reduced to asserting that its critics are indifferent to Soviet or Chinese intentions, unacquainted with the most recent intelligence, militarily inexperienced, naive, afraid to look nuclear destruction in the eye. Or it will be said that they are witting or unwitting tools of the Communist conspiracy. Following Secretary Laird's effort on behalf of the ABM (when he deployed from new intelligence an exceptionally alarming generation of Soviet missiles) a special appeal will be made to fear. A bureaucracy under attack is a fortress with thick walls but fixed guns.

VII

It is a cliché, much beloved of those who supply the diplomatic gloss for the military power, that not much can be done to limit the latter—or its budget—so long as "American responsibilities" in the world remain unchanged. And for others it is a persuasive point that to reduce the military budget will require a change in foreign policy.

But these changes have already occurred. In the years following World War II there was a spacious view of the American task in the world. We guarded the borders of the non-Communist world. We prevented subversion there and put down wars of liberation elsewhere. In pursuit of these aims we maintained alliances, deployed forces, provided military aid on every continent. This was the competition of the superpowers. We had no choice but to meet the challenge of that competition.

We have already found that the world so depicted does not exist. Superpowers there are but superpowers cannot much affect the course of life within the countries they presume to see as on their side. In part that was the lesson of Vietnam; annual expenditures of \$30 billion, a deployment of more than half a million men, could not much affect the course of development in one small country. In lands as diverse as India, Indonesia, Peru, and the Congo we have found that our ability to affect the development is even less. We have also found, as in the nearby case of Cuba, that a country can go Communist without inflicting any overpowering damage.

What we have not done is accommodate our military policy to this reality. Military aid, bases, conventional force levels, weapons

requirements still assume superpower omnipotence. (And the military power still projects this vision of our task.) Our foreign policy has, in fact, changed. It is the Pentagon that hasn't.

VIII

To argue that the military-industrial complex is now vulnerable is not to suggest that it is on its last legs. It spends a vast amount of public money, which insures the support of many (though by no means all) of those who receive it. Many Senators and Congressmen are slow to criticize expenditures in their districts even though for most of their supporters the cost vastly exceeds the gain. (Defense contracts are even more concentrated geographically than by firm. In 1967 three favored states out of fifty—California and New York and Texas—received one-third. Ten states accounted for a full two-thirds. In all but a handful of cases the Congressman or Senator who votes for military spending is voting for the enrichment of people he does not represent at the expense of those who elect him.) And there is the matter of habit and momentum. The military power has been above challenge for so long that to attack still seems politically quixotic. One recalls, however, that it once seemed quixotic to be against the Vietnam war.

Nonetheless control is possible. I come to my final task. It is to offer a political decalogue of what is required. It is as follows:

(1) *The goal, all must remember, is to get the military power under firm political control. This means electing a President on this issue next time. This, above all, must be the issue in the next election.*

However, for the next three and a half years, not much can be done about the Presidency. Also if Mr. Nixon does not resist the military power he will follow President Johnson into oblivion—conceivably taking quite a few others with him. This one must suppose he will see. So while all possible moral pressure must be kept on the President, the immediate target is Congress.

(2) *Congress will not be impressed by learned declamation on the danger of the military power. There must be organization. The last election showed the power of that part of the community—the colleges, universities, concerned middle class, businessmen—which was alert to the Vietnam war. Now in every possible Congressional District there must be an organization alert to the military power. Anciently, legislators up for election have pledged themselves to an "adequate national defense," a euphemism for according the Pentagon a blank check. In the next election everyone must be pressed for a promise to resist military programs and press relentlessly for negotiations along lines indicated below. Any Senator or Congressman who does not believe that the Congress should exercise strict supervision over the Pentagon, that the latter should be strictly answerable to Congress both for its actions and its expenditures, confesses his indifference to the proper role of the legislative body. He will be better at home.*

This effort must not be confined to the North, the Middle West, or West. In the last five years there has been a rapid liberalization of the major college and university centers of the South. Nowhere did McCarthy or Kennedy draw larger and more enthusiastic crowds than in the big Southern universities. Mendel Rivers, Richard Russell, Strom Thurmond, John Tower, and the other sycophants of the military from the South must be made sharply aware of this new constituency—and if possible be retired by it.

(3) *The Armed Services Committees of the two houses must obviously be the object of a special effort. They are now, with the exception of a few members, a rubber stamp for the military power. Some liberals have been reluctant to serve on these fiefs. No effort, including an attack on the seniority*

system itself, should be spared to oust the present functionaries and to replace them with acute and independent-minded members. Here too it is important to get grassroots expression from the South.

(4) *The goal is not to make the military power more efficient or more righteously honest. It is to get it under control.* These are very different objectives. The first seeks out excessive profits, high costs, poor technical performance, favoritism, delay, or the other abuses of power. The second is concerned with the power itself. The first is diversionary for it persuades people that something is being done while leaving power and budgets intact.

(5) *This is not an antimilitary crusade. Generals and admirals and soldiers, sailors, and airmen are not the object of attack. The purpose is to return the military establishment to its traditional position in the American political system.* It was never intended to be an unlimited partner in the arms industry. Nor was it meant to be a controlling voice in foreign policy. Any general or admiral who rose to fame before World War II would be surprised and horrified to find that his successors in the profession of arms are now commercial accessories of General Dynamics.

(6) *Whatever its moral case there is no political future in unilateral disarmament.* And the case must not be compromised by wishful assumptions about the Soviets which the Soviets can then destroy. It can safely be assumed that nuclear annihilation is as unpopular with the average Russian as it is with the ordinary American, and that their leaders are not retarded in this respect. But it is wise to assume that within their industrial system, as within ours, there is a military-industrial bureaucracy committed to its own perpetuation and growth. This governs the more precise objectives of control.

(7) *Four broad types of major weapons systems can be recognized.* There are first those that are related directly to the existing balance of power or the balance of terror vis-à-vis the Soviets. The ICBMs and the Polaris submarines are obviously of this sort; in the absence of a decision to disarm unilaterally, restriction or reduction in these weapons requires agreement with the Soviets. There are, secondly, those that may be added within this balance without tipping it drastically one way or the other. They allow each country to destroy the other more completely or redundantly. Beyond a certain number, more ICBMs are of this sort. Thirdly there are those that, in one way or another, tip the balance or seem to do so. They promise, or can be thought to promise, destruction of the second country while allowing the first to escape or largely escape. Inevitably, in the absence of a prospect for agreement, they must provoke response. An ABM, which seems to provide defense while allowing continued offense, is of this sort. So are missiles of such number, weight, and precision as to be able to destroy the second country's weapons without possibility of retaliation.

Finally there are weapons systems and other military construction and gadgetry which add primarily to the prestige of the Armed Services, or which advance the competitive position of an individual branch.

The last three classes of weapons do not add to such security as is provided under the balance of terror.⁷ Given the response they

provoke, they leave it either unchanged or more dangerous. But all contribute to the growth, employment, and profits of the contractors. All are sought by the Armed Forces. The Army's Sentinel (now Safeguard) Anti-Ballistic Missile system is urged even though it is irrelevant and possibly dangerous as a defense. As Mr. Russell Baker has said, it is based at least partly on the assumption that the Chinese would "live down to our underestimates of their abilities and produce a missile so inferior that even a Sentinel can shoot it down." But it holds a position for the Army in this highly technological warfare. The Air Force wants a new generation of manned bombers, their vulnerability notwithstanding, because an Air Force without such bombers—with the key fighting men sitting silently in underground command posts—is much less interesting. And Boeing, General Dynamics, Lockheed, North American Rockwell, Grumman, and McDonnell Douglas are naturally glad that this is so. The Navy wants nuclear carriers and their complement of aircraft, their vulnerability also notwithstanding, for the same reason.

A prime objective of control is to eliminate from the military budget those things which contribute to the arms race or are irrelevant to the present balance of terror. This includes the second, third, and fourth classes of weapons mentioned above. The ABM and the MIRV (the Multiple Independently-targeted Reentry Vehicle), both of which will spark a new competitive round of a peculiarly uncontrollable sort, as well as manned bombers and nuclear carriers are all of this sort. Perhaps as a simple working goal, some five billions of such items should be eliminated in each of the next three years for a total reduction of fifteen billion.⁸

(8) *The second and more important objective of control is to win agreement with the Soviets on arms control and reduction.* This means, in contrast with present military doctrine, that we accept that the Soviets will bargain in good faith. And we accept also that an imperfect agreement—for none can be watertight—is safer than continuing competition. It means, as a prac-

gain from additional 'superiority' in nuclear forces . . . we cannot attain a first-strike capability. And if we can retaliate with devastating force against a Soviet attack, what do we gain by having twice or three times that force? It adds nothing to our diplomatic strength in situations short of nuclear war. It does not add to deterrence—devastation twice over is no greater deterrent than devastation once. We can, to some extent, limit damage to the United States by having the capability, in a retaliatory strike, to target Soviet missiles and bombers withheld in a first strike. But the 'ample margin of safety' described above gives us such a capability already. Excessive superiority, in other words, gains us little of value, costs substantially in budget terms, and almost inevitably forces a Soviet response which eliminates the superiority temporarily gained." Unpublished memorandum. A valuable recent document on this whole subject is George W. Rathjens' *The Future of the Strategic Arms Race* (Carnegie Endowment for International Peace, 1969).

⁸ I would urge leaving the space race out of this effort. The gadgetry involved is not uniquely lethal; on the contrary it channels competition with the Soviets, if such there must be, into comparatively benign channels. It has so far been comparatively safe for the participants—strikingly so as compared with early efforts at manned flight in the atmosphere and across the oceans. One observes, between ourselves and the Soviets, a gentlemanly obligation to admire each other's accomplishments which, on the whole, compares favorably with similar manifestations at the Olympic games or involving music and the ballet.

tical matter, that the military role in negotiations must be sharply circumscribed. Military men—prompted by their industrial allies—will always object to any agreement that is not absolute, self-enforcing, and watertight. Under such circumstances arms-control negotiations become, as they have been in recent times, a charade. Instead of halting the arms race they may even have the effect of justifying it. "After all we are trying for agreement with the bastards." The Congress and the people must make the necessity for this control relentlessly clear to the Executive.

(9) *Independent scientific judgment must be mobilized in this effort—as guidance to the political effort, for advice to Congress, and of course, within the Executive itself.* The arms race, in its present form, is a scientific and mathematical rather than a military contest. Those military can no longer barricade themselves behind claims of military expertise or needed secrecy, opposing views must be reliably available.

But decisions on military needs are still made in a self-serving compact between those who buy weapons and those who sell. So the time has come to constitute a special body of highly qualified scientists and citizens to be called, perhaps, the Military Audit Commission. Its function would be to advise the Congress and inform the public on military programs and negotiations. It should be independently, i.e. privately, financed. It would be the authoritative voice on weapons systems that add to international tension or competition or serve principally the competitive position and prestige of the Services or the profits of their suppliers. It would have the special function of serving as a watchdog on negotiations to insure that the military power is excluded.

(10) *Control of the military power must be an ecumenical effort.* Obviously no one who regards himself as a liberal can any longer be a communicant of the military power. But the issue is one of equal concern to conservatives—to the conservative who traditionally suspects any major concentration of public power. It is also an issue for every businessman whose taxes are putting a very few of his colleagues on the gravy train. But most of all it is an issue for every citizen who finds the policy images of this bureaucracy—the Manned Orbiting Laboratory preserving the American position when all or most are dead below—more than a trifle depressing.

IX

A few will find the foregoing an unduly optimistic effort. More, I suspect, will find it excessively moderate, even commonplace. It makes no overtures to the withdrawal of scientific and other scholarly talent from the military. It does not encourage a boycott on recruiting by the military contractors. It does not urge the curtailment of university participation in military research. These, there should be no mistake about it, will be necessary if the military power is not brought under control. Nor can there be any very righteous lectures about such action. The military power has reversed constitutional process in the United States—removed power from the public and Congress to the Pentagon. It is in a poor position to urge orderly political process. And the consequences of such a development could be very great—they could amount to an uncontrollable thrust to unilateral disarmament. But my instinct is for action within the political framework. This is not a formula for busy ineffectuality. None can deny the role of those who marched or picketed on Vietnam. But, in the end, it was political action that arrested the escalation and broke the commitment of the bureaucracy to this mistake. Control of the military power is a less easily defined and hence more difficult task. (To keep the military and its allies and spokesmen from queering international ne-

⁷ Charles L. Schultze, the former Director of the Budget under President Johnson and his associate William M. Capron, neither of them radicals in this matter, have recently observed that "Once we have achieved a minimum deterrent, plus an ample margin of safety and a healthy R&D program to be prepared for the future, it is difficult to conceive of any value the United States could

gotiations will be especially difficult.) But if sharply focused knowledge can be brought to bear on both weapons procurement and negotiation; if citizen attitudes can be kept politically effective by the conviction that this is the political issue of our time; if there is effective organization; if in consequence a couple of hundred or even a hundred members of Congress can be kept in a vigilant, critical, and aroused mood; and if for the President this becomes visibly the difference between success and failure, survival and eventual defeat, then the military-industrial complex will be under control. It can be made to happen.

HONOR GUARD SERGEANT IS ORDERED TO VIETNAM

Mr. COOK. Mr. President, symptomatic of the arrogance and irresponsibility of some of those in our military services pointed out in Galbraith's article, is an experience Senator COOPER and I had only yesterday. We noticed in the Evening Star an article by Robert Walters, one of the Star's staff writers, concerning a report that a young Kentuckian, Sgt. Michael Sanders, had been assigned to Vietnam as a result of expressing his views publicly in opposition to our military intervention in Vietnam. I ask unanimous consent that this article appear in the RECORD, at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HONOR GUARD SERGEANT IS ORDERED TO VIETNAM

(By Robert Walters)

A member of the Army's most elite unit—the honor guard at the Tomb of the Unknown Soldier—has been abruptly ordered to Vietnam combat duty following the interview in which he offered criticism of U.S. military involvement in Southeast Asia.

The reassignment is highly unusual because members of the spit-and-polish ceremonial unit based at Ft. Myer are almost never transferred during an enlistment period if they meet the rigorous requirements for service in the "honor company" which represents the Army at all major military and state functions.

The case of Sgt. Michael Sanders, 22, who is being sent to Vietnam at the end of this week, is even more noteworthy because he:

Was selected as one of the military escorts for Mrs. Mamie Eisenhower during the state funeral this year for her husband, President Dwight D. Eisenhower.

Has served in the White House color guard and was, until his reassignment, one of the three sergeants in charge of the specially selected unit of 15 men who stand guard around the clock at the Tomb of the Unknown Soldier at Arlington National Cemetery.

Has only eight months remaining in his military obligation. The standard tour of duty for men assigned to Vietnam is at least one year, and soldiers are seldom sent to Southeast Asia if they have less than that amount of service time remaining.

Claims that the inquiry leading to his transfer was initiated at the highest military level, the office of Gen. William C. Westmoreland, chairman of the Joint Chiefs of Staff.

The Army has refused comment on the case, but Sanders, who lives at 2303 Georgian Way in Wheaton, is willing to fully discuss his side of the issue.

A native of Owenton, Ky., and a permanent resident of Lexington, Ky., he enrolled at the University of Kentucky in the hope of becoming a doctor, but left college in January

1967 after his junior year was completed, because he was persuaded to enlist in the Army by two recruiting officers who visited the campus.

He signed up with the Army medical internship program, but gave that up after learning that he would have to spend a year in the service for each year of Army medical schooling he received.

Before leaving the medical program, however, he was designated the outstanding trainee of his battalion and received the American Spirit Honor Medal from the Association of the Army, Navy and Air Force. Among the traits listed in that citation was loyalty to the service.

REJECTS OCS CHANCE

Sanders turned down an opportunity to attend Officers Candidate School and requested reassignment to the 1st Battalion, 3rd Infantry—the Army's famed "Old Guard" stationed at Ft. Myer.

Organized in 1784, the "Old Guard" is a precision unit which serves as a personal escort to the President, honors foreign dignitaries visiting Washington and participates in numerous ceremonial activities.

Sanders was assigned for a three-month trial period to the unit's most elite company—Company E, also known as the "honor company." He was assigned to the company's first platoon, which includes the Army's official color guard and drill team.

The most valued assignment within the "Old Guard" is with the 15-man unit which stands guard around the clock at the Tomb of the Unknown Soldier. In November 1967, Sanders won a spot with the unit.

In August 1968, he became one of the three sergeants assigned to supervise the 12 men who guard the tomb and a month later, became the ranking sergeant.

RANKING SERGEANT

During the state funeral for Eisenhower, Sanders was selected to escort Mrs. Eisenhower from her limousine to the steps of the Capitol, then back to her car on the day the casket was taken to the Rotunda to lie in state.

In early February, prior to the Eisenhower funeral, the Louisville Courier-Journal asked military authorities if it could interview Sanders for a "hometown boy" feature story.

The story appeared in the paper Feb. 9. In the middle of that account, Sanders was quoted as saying:

"It's unfortunate that when people see me here on duty they will associate me with the Vietnam thing. I am very much opposed to our Vietnam involvement and I think so is practically every one else on duty here."

OTHER GUARDS REACT

The story said Sanders was interviewed in the tomb guards' underground quarters at the cemetery, and that when he made the statement, other soldiers looked up from their uniform-pressing and shoe-shining to wink at him or throw a two-fingered "V" sign of the peace movement toward him.

The story noted that Sanders carefully added: "My duty is here, and I consider myself a representative of the American people, paying tribute to the unknown soldiers of World Wars I and II and Korea. I don't see any conflict at all in that."

There was no immediate response to the article from the Army, and Sanders went on leave during the first week of March because his wife, Maryanne, was expected to give birth to her first child. While on leave, he said, a friend from the Army unit called to warn him: "They've got the article and they're really mad."

Sanders said he called his immediate superior and was told to report directly to the company commander when he returned to duty on March 26. In that conversation, the company commander notified Sanders that he was being shipped to Vietnam, the soldier said.

"He apologized and said he wanted me to know that nobody in the battalion cut the orders for me to go to Vietnam. I said the orders must have come from the Pentagon, but he remained silent," Sanders said.

Sanders said the company commander said the battalion commander had been contacted by Westmoreland and asked for a full explanation of the quote in the newspaper article, which Sanders says is accurate.

The company commander said he had been told to submit a report in the form of a letter to the battalion commander, Sanders said. He answered affirmatively when asked if he opposed the war in Vietnam, but replied negatively when asked if he was a pacifist, a description used by the writer of the Louisville article.

Sanders said he told his company commander he did not consider the Army uniform a disgrace, but in an interview yesterday he said: "Sometimes I do, but I didn't tell him that."

He worked through the end of March, then reported to Ft. Meade, Md., for a week of rifle and jungle training in preparation for the Vietnam assignment. Sanders' new orders, dated March 17, call for him to report to Oakland, Calif., a major point of embarkation for Vietnam-bound troops, at noon Saturday.

In the almost two years he has been with the "honor company," Sanders said, no other man assigned to the unit has been transferred, with the exception of one soldier reassigned to Germany after one month—before he completed the training period.

Sanders said he is willing to serve in Vietnam, but he is also looking for a lawyer to press his case because "even if it's too late to help me, it'll help other guys later on."

Mr. COOK. Now, I fully admit that I am in no position to verify the allegations of this story at this time. But certainly an explanation is required, and Senator COOPER and I sought one in a joint telegram which we sent to Army Secretary Resor yesterday afternoon. The text of that telegram was as follows:

We have just read the story in today's Evening Star, May 22, about Sergeant Michael Sanders. It appears from the story that Sergeant Sanders, who has an outstanding record during his service in the Army, has been ordered to report to Oakland, California on Saturday, May 24, for assignment to Vietnam. The reasons attributed by the story for his assignment to Vietnam, eight months before the completion of his service, is that he was reported to have made a statement criticizing the United States military involvement in Vietnam. If this is correct, we view his assignment as a punishment not in accord with the rules of military justice and certainly against the declared policy of the Department of Defense. We think this is wrong. If such an order of assignment has been made, we request its immediate suspension until the facts have been ascertained by your order and by proper procedure and a public report is made. We would appreciate an immediate response.

In addition, we called Secretary Resor on the telephone and repeated our request for a public explanation. He informed us that he would put a hold on the boy's case pending the review we had requested.

If Sergeant Michael Sanders' allegations are true—and I repeat, if they are true—then this is a crushing indictment of a military procedure amounting to extreme vindictiveness. Briefly, according to the article, here are the pertinent facts: Sanders, first, was selected as one of the military escorts for Mrs. Mamie Eisenhower during the state funeral this year for her husband, President Dwight

D. Eisenhower; second, has served in the White House Color Guard and was, until his reassignment, one of the three sergeants in charge of the specially selected unit of 15 men who stand guard around the clock at the Tomb of the Unknown Soldier at Arlington National Cemetery; third, has only 8 months remaining in his military obligation. The standard tour of duty for men assigned to Vietnam is at least 1 year. And soldiers are seldom sent to Southeast Asia if they have less than that amount of service time remaining; and fourth, claims that the inquiry leading to his transfer was initiated at the highest military level, the office of Gen. William C. Westmoreland, Chairman of the Joint Chiefs of Staff.

I bring this experience to the attention of my colleagues knowing full well that a satisfactory explanation may be forthcoming. However, the possibility that such a sequence of events could lead to punitive reassignment to Vietnam is repugnant to every fair-minded American. Surely, one does not, or should not, in a free and democratic society, waive all of his first amendment freedoms when he enlists in our armed services. Surely, one does not, or should not, forego his right to express his political opinion about official justification for Americans fighting in a war not declared by Congress. These are some of the matters which I raise today for the consideration of my colleagues because I am becoming more and more convinced that our attitudes about the military and its role in our society, acquired since World War II, must be reexamined.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. COOK. I yield.

Mr. CHURCH. I wish to commend the Senator for the initiative he has taken. Last night, when I heard the account on the radio that Sergeant Sanders, assigned to the Honor Guard, here in Washington, had been reassigned to Vietnam, after expressing his own opinion critical of our involvement in that country, it came to me as a shocking disclosure.

If the account is true, then it certainly bears the investigation the Senator and his colleague from Kentucky (Mr. COOPER) have initiated. I commend him for the action he has taken. I want to associate myself with his remarks.

Mr. COOK. I wish to thank the Senator and add that these remarks are made without knowledge of Sergeant Sanders. As a matter of fact, he has never contacted my office in any way, shape, or form.

Mr. CHURCH. May I add that if the report is true, then, in my judgment, Sergeant Sanders is a better American than the high-ranking officer in the Pentagon who assigned him to Vietnam as punishment for expressing his own honest convictions in the matter of the war.

Mr. COOK. I thank the Senator.

FADING PROSPECTS FOR MEANINGFUL ARMS TALKS

Mr. CHURCH. Mr. President, Marquis Childs, writing in this morning's edition

of the Washington Post, describes the dangers inherent in the belligerent statements which continue to be issued by the Secretary of Defense and other Pentagon officials on the proposed anti-ballistic-missile system. Mr. Childs is especially concerned about the adverse impact these statements are having on the long-heralded arms talks with the Soviet Union.

As Mr. Childs notes:

All of the speeches and statements by Laird, Dr. John S. Foster, Jr., director of defense research and engineering, and others carrying the torch for ABM are avidly read in the Kremlin. It is hardly necessary to add that they serve the cause of the hardliners who, it is safe to conjecture, argue that it is useless to try to come to any agreement with the warmongering imperialists in Washington.

Putting the shoe on the other foot, Mr. Childs continues:

Imagine Marshall Andrei A. Grechko, Soviet Defense Minister, writing in *Pravda* or trumpeting in a speech on Armed Forces Day that the United States was accelerating the buildup in both offensive and defensive nuclear weapons. And what for? Why, to knock out the Soviet's retaliatory capability, with America triumphant in a first strike and the Soviet Union forever crippled, if not destroyed.

Mr. Childs continued:

The consequences for any future arms talks would be pretty serious. How can we ever deal with people like that who charge us with such dastardly intentions? The arguments that the Laird blasts do not matter, since there is no public opinion in the Soviet Union, is fallacious. A kind of opinion at the very highest level is subject to the news from everywhere and particularly from the other nuclear giant across the divide.

Mr. President, the point made by Mr. Childs is sound. Slowly, but surely, what may be the last chance to head off what could be the ultimate round in the arms race is slipping by.

I recommend Mr. Childs' column to all Senators, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PROSPECTS FOR ARMS TALKS SEEM TO BE LOSING GROUND

(By Marquis Childs)

Not long before he left on his Asian trip, Secretary of State William P. Rogers met with Soviet Ambassador Anatoly F. Dobrynin. Rogers wanted to reaffirm to Dobrynin what he had said publicly—that the United States would be prepared to enter into arms negotiations with the Soviet Union in the late spring or early summer.

Reporting the discussion to colleagues, Rogers stressed Dobrynin's concern over delay in the long-heralded talks. He quoted the Soviet Ambassador as saying with the wry humor that is one of his characteristics: "You are sure you don't mean Indian summers?"

It now appears there will be a delay in the start of the effort to checkmate another sharp upward spiral in the nuclear arms race. What in bureaucratese is called "slippage" has taken place. From White House sources comes word it may be August before the American side bears out this pessimistic estimate.

As the days slip by, the fear grows that a last chance to head off another and perhaps the ultimate round in the race will be lost.

Two reasons underscore this fear. One is evidence of a hardening attitude in Moscow. The military appear to have increasing weight in the Kremlin.

The second fear is of an accident that suddenly in flaring headlines puts an end to all hopes of talks. The U-2 spy plane shot down in 1960 wrote finish to the attempt of President Eisenhower to abate the cold war and arrive at competitive coexistence with the Soviets. The Russian invasion of Czechoslovakia last August cut across the carefully laid plans of President Johnson to begin arms talks. An accident would all too obviously suit those who in private oppose arms limitation.

If any single factor has damped the prospect for areas talks it is the decision of the Nixon Administration to start deployment of anti-ballistic missiles to safeguard intercontinental missiles. This is not so much because it will mean any significant change in the strategic balance between the two nuclear giants, but because of the loud propaganda coming from Secretary of Defense Melvin R. Laird and other defense officials to convince Congress the Soviets are preparing a first-strike capability to cripple the United States.

No walls of silence, such as can be imposed by an authoritarian system, surround the United States to keep the angry ABM debate within the American family. All of the speeches and statements by Laird, Dr. John S. Foster Jr., director of defense research and engineering, and others carrying the torch for ABM are avidly read in the Kremlin. It is hardly necessary to add that they serve the cause of the hardliners who, it is a safe conjecture, argue that it is useless to try to come to any agreement with the warmongering imperialists in Washington. A recent visitor from the Soviet Union put this question:

"What if Grechko was saying the things Laird is saying?"

Imagine Marshal Andrei A. Grechko, Soviet Defense Minister, writing in *Pravda* or trumpeting in a speech on Armed Forces Day that the United States was accelerating the buildup in both offensive and defensive nuclear weapons. And what for? Why, to knock out the Soviet's retaliatory capability, with America triumphant in a first strike and the Soviet Union forever crippled, if not destroyed.

The consequences for any future arms talks would be pretty serious. How can we ever deal with people like that who charge us with such dastardly intentions? The argument that the Laird blasts do not matter, since there is no public opinion in the Soviet Union, is fallacious. A kind of opinion at the very highest level is subject to the news from everywhere and particularly from the other nuclear giant across the great divide.

The director of the Arms Control and Disarmament Agency, Gerard C. Smith, will be the principal negotiator in the first round when—and at this point caution dictates an if—it begins. Smith is determined that the talks will succeed. While they may not bring a reduction in nuclear arms, at a minimum they should checkmate a new spiral. The disarmament agency is hopefully setting a date between July 15 and August 1 for the start of the talks. Since spring ends on June 20, July 15 would still be within Secretary Rogers' pledged timing.

No one questions Smith's dedication and sincerity. But he faces many handicaps within the Administration. A month ago the word was put out that he would have a strong, capable deputy. An approach was made to William H. Sullivan, former Ambassador to Laos and one of the ablest Foreign Service officers. Subsequently, Sullivan was named Deputy Secretary for the Far East, with emphasis on the Vietnam task force, which may say something about priorities. No deputy has been named.

Why are the forces in the inner council cold, hot and lukewarm on the arms talks? What is the reason for the slippage? This will be examined in a following column.

**SENATE JOINT RESOLUTION 112—
INTRODUCTION OF JOINT RESOLUTION TO AMEND SECTION 19(e) OF THE SECURITIES EXCHANGE ACT OF 1934**

Mr. SPARKMAN. Mr. President, I introduce, for myself, the senior Senator from Utah (Mr. BENNETT), and the junior Senator from New Jersey (Mr. WILLIAMS), a joint resolution to amend section 19(e) of the Securities Exchange Act of 1934, and I request that the joint resolution be appropriately referred. In addition, I ask unanimous consent that the joint resolution be printed in full in the RECORD.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD, in accordance with the Senator's request.

The joint resolution (S.J. Res. 112) to amend section 19(e) of the Securities Exchange Act of 1934, introduced by Mr. SPARKMAN (for himself and other Senators), was received, read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

S.J. RES. 112

Whereas additional time is required for the Securities and Exchange Commission to complete its study, and file a report with respect thereto, pursuant to section 19(e) of the Securities Exchange Act of 1934; and

Whereas the actual amount to be expended by the Commission in making such study and report will not exceed the original authorization of \$875,000; and

Whereas an increase of \$70,000 in such authorization is required because of the sums heretofore appropriated pursuant to such authorization \$70,000 will be returned unexpended to the Treasury as of June 30, 1969: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That section 19(e) of the Securities Exchange Act of 1934 (15 U.S.C. 78s(e)) is amended—

(1) by striking out in paragraph (1) "September 1, 1969" and inserting in lieu thereof "September 1, 1970"; and

(2) by striking out in paragraph (4) "\$875,000" and inserting in lieu thereof "\$945,000".

Mr. SPARKMAN. Mr. President, the purpose of this joint resolution is to extend, by 1 year, the time in which the Securities and Exchange Commission is to make an institutional study of certain features of our securities markets. In addition, the resolution would provide that the funds authorized for this study would be continued at the same level that they were originally authorized.

APOLLO 10

Mr. SPARKMAN. Mr. President, last Sunday it was my privilege and pleasure to be at Cape Kennedy when Apollo 10 was launched. It was a thrilling experience.

We who live at Huntsville, Ala., take unusual pride in recalling that the world's most powerful vehicle which hurled the astronauts into space on their way to the moon was dreamed up, designed, built, tested in the beginning stages at Redstone Arsenal and Marshall Space Flight Center at Huntsville, Ala.

B. J. Richey, a very competent reporter on space and scientific activities for the Huntsville Times, was at Cape Kennedy and wrote a very interesting article regarding the launching which was published in the Huntsville Times on May 19. Believing that the Senators will find this article interesting and informative, I am asking unanimous consent to have printed in the RECORD the article entitled "MSFC's Baby Gets Better With Each Shot Skyward," written by B. J. Richey and published in the Huntsville Times of May 19, 1969.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MSFC'S BABY GETS BETTER WITH EACH SHOT SKYWARD

(By B. J. Richey)

CAPE KENNEDY.—The rocket that boosts astronauts into a path to the moon makes the girls cry, the men curse and Dr. Werner von Braun cheer.

The Saturn 5 moon rocket is almost as tall as the Washington Monument, weighs more than a small warship and with its five million parts is a technological marvel.

Getting all those parts pumping and pushing perfectly at once is astounding—and so difficult some people have wondered if the moon rocket would ever fly.

But fly it does. And on time at that. There is no doubt, the monster rocket is an incredible machine.

Sunday's launch—the fifth for the vehicle—was 569 millionths of a second late.

In fact, all of the Saturn 5's have gone off the pad less than one second late.

Dr. Von Braun, Marshall Space Flight Center director in Huntsville, says the day is fast approaching when climbing aboard rockets will be as safe as getting aboard a jet-liner.

"I have more confidence in this flight than any other so far," Von Braun said the night before launch.

Watching the fiery behemoth rise majestically off its concrete and steel pedestal is an emotional sight.

Von Braun's Alabama rocket team designed the Saturn 5 booster and it was first flown in November, 1967, prompting the German missileman to yell "Go, baby, go."

Pretty secretaries watched the proceeding with tears rolling down their cheeks and the male spectators shouted obscenities as the 36-story-tall rocket climbed upward.

Sunday's performance was just like a summer rerun.

Out of the five Saturn 5 launches, there were some problems though. During its second flight, the three-stage rocket lost two engines in its second stage and its third stage engine failed to restart, an exercise that is essential to going to the moon.

But these problems are three flights behind now and the big machine appears to have all its surprises played out.

Von Braun credits the almost unbelievable on-time launches to what he calls "management discipline." Before each shot, the rocket goes through a practice countdown, right up to the point of firing up its five engines. Usually there are a number of questions raised about the rocket and its spacecraft.

But once officials thrash these problems

out, the real countdown starting six days before launch rolls along smoothly.

In the days before the Saturn 5, the Von Braun team built and flew 15 smaller Saturn rockets, running up a record now of 20 straight successful flights.

America's moon rocket is the largest booster ever launched, but Von Braun firmly believes the Russians now have one in the works with twice the thrust and twice the size. The Saturn 5 has the equivalent of 160 million horsepower.

One space agency official said the ease with which the launch crews here prepare the big rocket for flight makes it "look like an obsolete vehicle" already.

S. 2237—INTRODUCTION OF A BILL TO PROVIDE THAT A FAMILY SEPARATION ALLOWANCE SHALL BE PAID TO ANY MEMBER OF A UNIFORMED SERVICE ASSIGNED TO GOVERNMENT QUARTERS PROVIDING HE IS OTHERWISE ENTITLED TO SUCH SEPARATION ALLOWANCE

Mr. BELLMON. Mr. President, on behalf of the junior Senator from Kansas (Mr. DOLE), and at his request, I introduce a bill to provide that a family separation allowance be paid to any member of a uniformed service assigned to Government quarters providing he is otherwise entitled to such separation allowance.

Mr. President, I am introducing this bill at the request of the junior Senator from Kansas because he is unavoidably absent from the Senate today.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2237), to amend title 37 of the United States Code to provide that a family separation allowance shall be paid to any member of a uniformed service assigned to Government quarters providing he is otherwise entitled to such separation allowance, introduced by Mr. BELLMON for Mr. DOLE, was received, read twice by its title, and referred to the Committee on Armed Services.

NEED FOR EARLY AGREEMENT ON A SEABED ARMS CONTROL ARRANGEMENT

Mr. PELL. Mr. President, on March 25 of this year, I drew the attention of my colleagues to the reopening of the 18-Nation Disarmament Conference, and I pointed out that prospects for early agreement on a seabed arms control arrangement were encouraging. With both the United States and the Soviet Union declaring their intent that the seabed and ocean floor should not become the spawning ground for a new generation of mass destruction weaponry, the members of the ENDC began to focus immediately on the complexities of this issue. For its part, the Soviet Union put forth a draft treaty on March 18, and 7 days later the United States responded on three of the four major points contained in that proposal.

Today, Mr. President, I am pleased to report that another major step forward has been taken toward arriving at a

meaningful seabed arms prohibition. Yesterday in Geneva, Ambassador Fisher, the U.S. representative in the 18-Nation Disarmament Conference, tabled a draft seabed arms control treaty which brings sharply into focus the real issues involved in this intricate and complex problem. I ask unanimous consent that the preamble and substantive provisions of the U.S. draft treaty be inserted at this point in the RECORD.

The PRESIDING OFFICER (Mr. ALLEN in the chair). Without objection it is so ordered.

The material was ordered to be printed in the RECORD, as follows:

DRAFT TREATY PROHIBITING THE EMBLACEMENT OF NUCLEAR WEAPONS AND OTHER WEAPONS OF MASS DESTRUCTION ON THE SEABED AND OCEAN FLOOR

The States Parties to this Treaty, Recognizing the common interest of all mankind in the progress of the exploration and use of the seabed and ocean floor for peaceful purposes,

Considering that the prevention of a nuclear arms race on the seabed and ocean floor serves the interests of maintaining world peace, reduces international tensions, and strengthens friendly relations among States,

Convinced that this Treaty will further the principles and purposes of the Charter of the United Nations, in a manner consistent with the principles of international law and without infringing the freedoms of the high seas,

Have Agreed as Follows:

ARTICLE I

1. Each State Party to this Treaty undertakes not to emplace or emplace fixed nuclear weapons or other weapons of mass destruction or associated fixed launching platforms on within or beneath the seabed and ocean floor beyond a narrow band, as defined in Article II of this Treaty, adjacent to the coast of any State.

2. Each State Party to the Treaty undertakes to refrain from causing, encouraging, facilitating or in any way participating in the activities prohibited by this Article.

ARTICLE II

1. For purposes of this Treaty, the outer limit of the narrow band referred to in Article I shall be measured from baselines drawn in the manner specified in paragraph 2, hereof. The width of the narrow band shall be three (3) miles.

2. Blank (Baselines).

3. Nothing in this Treaty shall be interpreted as prejudicing the position of any State Party with respect to rights or claims which such State Party may assert, or with respect to recognition or non-recognition of rights or claims asserted by any other state, relating to territorial or other contiguous seas or to the seabed and ocean floor.

ARTICLE III

1. In order to promote the objectives and ensure the observance of the provisions of this Treaty, the Parties to the Treaty shall remain free to observe activities of other States on the seabed and ocean floor, without interfering with such activities or otherwise infringing rights recognized under international law including the freedoms of the high seas. In the event that such observation does not in any particular case suffice to eliminate questions regarding fulfillment of the provisions of this treaty, parties undertake to consult and to cooperate in endeavoring to resolve the questions.

2. At the review conference provided for in Article V, consideration shall be given to whether any additional rights or procedures

of verification should be established by amendment to this treaty.

ARTICLE IV

Any State Party to the Treaty may propose amendments to this Treaty. Amendments shall enter into force for each State Party to the Treaty accepting the amendments upon their acceptance by a majority of the States Parties to the Treaty and thereafter for each remaining State Party on the date of acceptance by it.

ARTICLE V

Five years after the entry into force of this Treaty, a conference of Parties to the Treaty shall be held in Geneva, Switzerland, in order to review the operation of this Treaty with a view to assuring that the purposes of the Preamble and the provisions of the Treaty are being realized. Such review shall take into account any relevant technological developments. The review conference shall determine in accordance with the views of a majority of those Parties attending whether and when an additional review conference shall be convened.

ARTICLE VI

Each Party shall in exercising its national sovereignty have the right to withdraw from this Treaty if it decides that extraordinary events, related to the subject matter of this Treaty, have jeopardized the supreme interests of its Country. It shall give notice of such withdrawal to all other Parties to the Treaty and to the United Nations Security Council three months in advance. Such notice shall include a statement of the extraordinary events it regards as having jeopardized its supreme interests.

Mr. PELL. Mr. President, as my colleagues will note, the U.S. proposal prohibits the emplacement of mass destruction weaponry on, within, or beneath the seabed beyond a 3-mile maritime band, which is established exclusively for the purposes of this treaty. In addition, there is provision for verification, but in accordance with the Geneva Convention on the High Seas. Consultation on verification is also provided for. Moreover, and of particular significance in terms of future undersea technological developments, article V stipulates that after the treaty has been in force for 5 years, the parties to the treaty shall meet in Geneva to review these developments and to determine whether amendments are needed in order to maintain the treaty's original purpose and intent.

Mr. President, having devoted much of my own time and effort over the past several years to the establishment of a legal regime for the oceans and to the formulation of a seabed arms control agreement, I do believe that the administration's proposal marks a very significant beginning, one which, I think, will be particularly helpful to the other members of the ENDC as they continue to formulate in their minds what the contents of such a treaty should be in order to guarantee that the seabed and ocean floor be used exclusively for peaceful purposes.

As chairman of the Subcommittee on Ocean Space of the Foreign Relations Committee, I assure my colleagues that the subcommittee will keep close watch over the negotiations in Geneva. I myself am very hopeful that during the next session of the ENDC the major differences

between the United States and Soviet proposals can be ironed out in a manner reflective of the true interests and desires of the international community as a whole.

DIPLOMATIC RELATIONS WITH THE MONGOLIAN PEOPLES' REPUBLIC

Mr. PELL. Mr. President, for several years, the United States has had under consideration the question of establishing diplomatic relations with the Mongolian Peoples' Republic. We have reportedly not done so because the war in Vietnam has made Mongolian authorities reluctant so to act and because the Government of Nationalist China has apparently expressed to us strong opposition to the idea.

Yet, from the viewpoint of our national interest, I believe it would be greatly to our advantage to have such a diplomatic mission and listening post in this country, the only one that lies between and is bounded only by the Soviet Union and mainland China.

Officially, from 1945 to 1961, the United States questioned whether the Mongolian Peoples' Republic was in fact a sovereign state. During the first 10 years of this period, Mongolia had diplomatic relations only with the Soviet Union and other Communist countries. But beginning in the mid-1950's, relations with non-Communist countries were established, and today Mongolia has diplomatic relations with 39 countries.

Twenty-six of these countries are non-Communist. The first non-Communist country to establish relations with Mongolia was India in 1955, and the first non-Communist European state was the United Kingdom in 1963. Canada established relations with Mongolia in 1964.

In mid-1961 the United States explored the possibility of establishing relations with Mongolia. Talks were held in Moscow with the Mongolian Ambassador. However, nothing came of these conversations, reportedly because we dropped the idea as a result of opposition on the part of Nationalist China.

It seems to me that the time has now come to renew these talks with Mongolian authorities. Now that the United States is no longer bombing North Vietnam, one of Mongolia's fellow Socialist states, one political obstacle to the establishment of diplomatic relations has been removed. I read with interest Harrison Salisbury's interview in the New York Times of Wednesday, May 21, with the Premier of Mongolia. Mr. Harrison asked:

What are the prospects for the developments of relations between the United States and the Mongolian People's Republic?

The Premier replied:

As you know, in 1961 on the initiative of the American side, the question of establishing diplomatic relations between our two governments was discussed. At that time we expressed our positive approach to this question, but the United States halted the conversations, referring to certain developments in the international situation. The Government of the M.P.R., as always, stands for de-

velopment of normal relations among states with different social political systems on the basis of the principle of peaceful co-existence.

For our part, I would think it important to have some contact with this country which lies between mainland China and the Soviet Union and which has ties with both. Since 1961 Mongolia has been a member of the United Nations and has joined a number of U.N.-affiliated organizations, including the Economic Commission for Asia and the Far East, UNESCO and the World Health Organization. Mongolia is thus an active member of the international community. I see no reason why we should not give our own *de jure* recognition to that fact, nor do I see any reason why the United States should not have "normal relations" with another state which wishes to have such relations with us.

I ask unanimous consent that the full text of the article by Mr. Salisbury, including the interview excerpts, which appeared in the New York Times on May 21, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MONGOLIAN, IN INTERVIEW, VOICES FEAR FOR ASIAN PEACE

(By Harrison E. Salisbury)

ULAN BATOR, MONGOLIA, May 19.—Premier Yumzhagin Tsedenbal has expressed deep concern over the maintenance of peace in Asia, particularly in view of the continuance of the war in Vietnam, tensions over Korea and the Soviet-Chinese conflict.

Mr. Tsedenbal, who has headed Mongolia for 17 years, made his remarks in one of his rare personal interviews. He gave prepared answers to a series of questions and then, in a lengthy conversation, outlined in some detail his views on the Soviet-Chinese dispute. The Premier granted the interview on the eve of a state visit by President Nikolai V. Podgorny of the Soviet Union, whose swing to North Korea and Mongolia was believed to be connected with tensions in Korea and along China's frontiers.

The Mongolian leader took the view that Soviet-Chinese border clashes on the Ussuri River in March were the total responsibility of the Chinese.

CLASHES HELD DELIBERATE

He emphatically rejected the theory that the fighting could have occurred because of trigger-happy Chinese frontier guards. It was, in his opinion, organized and ordered from above—at a high level in the Chinese Government—and was a deliberate act of aggression. To his mind it simply fitted a pattern of steadily heightening chauvinistic acts flowing from Mao Tse-tung, the Chinese leader himself.

Mr. Tsedenbal said that China had attempted by every means to split Mongolia from the Soviet Union. But the Soviet-Mongolian association, he said, has endured 50 years and Mr. Mao's efforts will not be successful.

The premier said Mongolia with the aid of the Soviet Union had demonstrated her ability to defend her frontiers. Before World War II, he recalled, Japanese forces were stationed in Manchuria only a few hundred miles from the Ulan Bator. Later hostile forces of the Chinese Nationalists were strung out along the Mongolian frontier. But with Soviet aid, Mongolia managed to beat off all challenges and is prepared to do so again, he said.

The Mongolian Premier characterized Mr. Mao as a "great-power chauvinist" and said he felt the Chinese leader had lost all connection with Marxist-Leninist principles and traditions.

"Clashes such as those on the Ussuri are impossible between genuine Marxist-Leninists," Mr. Tsedenbal said. "There is nothing in common between Mao's policies and those of a genuine socialist state."

The Mongolian has had many dealings with Mr. Mao and said he saw no hope of change in China's policies so long as the present Chinese leader remained in power.

Mr. Tsedenbal spoke with sarcasm of a Maoist charge that Mongolia was both a "Soviet puppet" and an "American pawn." "This shows how far things have gone," he said.

The Premier did not discuss China in his prepared responses, except for a peripheral reference to mongol minorities in China. He expressed the hope that they would be accorded the same rights that Mongols in Mongolia and in the Soviet Union received.

The Premier's concern over Vietnam was expressed both in his formal response to questions and in conversation. He said he supported the peace program offered by the Vietcong in the Paris talks and considered it a basis for serious negotiation.

Mr. Tsedenbal said he was also concerned about Korean tensions and he accused the United States of "provocative" actions in its intelligence-gathering flights off the North Korean coast.

Although the Premier spoke critically of United States foreign policy in Vietnam and Korea, he emphasized Mongolia's dedication to the principle of diplomatic, cultural and economic relations with Western countries and specifically the United States.

Any progress on the question of diplomatic relations, he said, is up to the United States. Mongolia has been prepared since the first contacts on the subject in 1961 to go forward to normal diplomatic relations, he said.

The Mongolian recalled with warmth his visit to the United States in 1967 at the time of the conference of Premier Aleksei N. Kosygin of the Soviet Union and President Lyndon B. Johnson at Glassboro, N.J.

Premier Tsedenbal said he had a pleasant chat with Mr. Johnson at that time and he remembered with enthusiasm his visit to Niagara Falls.

Domestically, the most critical Mongolian problems are in agriculture, he said, particularly in measures to protect livestock against heavy losses in winter.

Mongolia lost two million head of livestock last winter and another two million the previous winter. These losses are from a herd of 22 to 23 million head.

Soil erosion from new plowed grain areas is also a problem, but Mr. Tsedenbal said he was confident of resolving it.

INTERVIEW EXCERPTS

Following are excerpts from the interview with Premier Tsedenbal:

"Q. What are the prospects for the development of relations between the United States and the Mongolian People's Republic?"

"A. As you know, in 1961 on the initiative of the American side, the question of establishing diplomatic relations between our two governments was discussed. At that time we expressed our positive approach to this question, but the United States halted the conversations, referring to certain developments in the international situation. The Government of the M.P.R., as always, stands for development of normal relations among states with different social political systems on the basis of the principle of peaceful co-existence."

"Q. What is Mongolia's view of the current

international situation, in particular in Asia?"

"A. As a result of aggressive policies of imperialist forces in different parts of the world, tension continues to exist, causing serious concern for all peace-loving nations. This is borne out by the aggressive war of the United States in Vietnam and the dangerous situation in the Middle East."

"Convinced of the necessity to solve disputes peacefully through negotiations, we in Mongolia watch with attention the four-sided talks on Vietnam taking place in Paris. The Mongolian people and Government are convinced that in order to settle the Vietnam problem the first thing that must be done is the stopping of the aggressive war of the United States in Southeast Asia, withdrawal of its troops and military personnel and arms from South Vietnam, and the granting to the Vietnamese people the opportunity to determine their destiny independently. The Government of the M.P.R. supports the new proposal of the National Liberation Front of South Vietnam."

"As to the crisis in the Middle East, we firmly stick to the view that it must be settled in accordance with the United Nations resolution of Nov. 22, 1967, on the basis of withdrawal of Israeli troops from occupied Arab territory."

"In these days the peoples of the world watch with concern the situation created in the Far East in connection with the concentration of American naval and air forces off the shores of Korea and the continuing provocative actions by the American military against the Korean Democratic People's Republic."

"Public opinion in Mongolia resolutely demands that the U.S.A. should stop the dangerous provocations aggravating tensions in this area."

"Q. What is the future of Mongols living in Mongolia, in the Soviet Union and in China?"

"A. To my mind it is hard to find a state in the world whose population will be uniform regarding national origin or status. As is known Communists have the fairest approach to the solution of the national problem. They are guided by the principles of equality, mutual respect, friendship and co-operation of different peoples and national minorities. These principles are fully realized in Mongolia as in the Soviet Union. We have always supported the idea that all nationalities in all states, whether in China, the U.S.A. or another country, live in friendship and complete equality without humiliation, discrimination or exploitation."

"Q. What are the recent achievements and prospects of development of Mongolian industry and agriculture as well as education, science and culture?"

"A. With every new year, the Mongolian people gain new successes in development of the national economy and culture, in the improvement of its standard of living. Our industry develops persistently its role and importance in the economy of the country. Backed by the cooperation and aid of the Soviet Union and other socialist states we built tens of new industrial enterprises in recent years and started construction of new industrial centers."

"A. Industry accounts for 30 per cent of the gross national product and its share in joint agricultural-industrial production is greater than 50 per cent. We shall further develop fuel and energy, metal processing, light and food industries, construction materials and other branches of industry."

"Much work was done to strengthen the material basis of agriculture, in particular in the mechanization of preparing fodder for livestock, watering of tens of millions of hectares of pasture, construction of sheds for livestock, and so on. Mongolia now fully provides herself with grain and flour."

"We have a compulsory seven-year pro-

gram of education. We have 165 students for every 10,000 people, one physician for every 600 people.

"Q. Is there any possibility of expansion of trade and cultural ties of Mongolia, especially with the United States?"

"A. With every new year, our trade and cultural relations with different countries grow on the basis of equality and mutual profit. These relations may be established with the United States as well.

"Q. How can Mongolia's experience in economy and social life be followed in other developing countries?"

"A. The Mongolian people within a short historical period made a transition from feudalism to socialism passing by the capitalist stage of development and, having overcome the backwardness of centuries, gained important successes in creation and development of a new economy and culture. The experience of M.P.R. shows that the non-capitalist way of development is the shortest and most efficient road to quick social and economic progress."

S. 2230—INTRODUCTION OF A BILL TO REMOVE THE PRESENT LEGAL RESTRICTIONS ON THE USE OF FOREIGN-BUILT VESSELS BY U.S. FISHERMEN IN U.S. DOMESTIC FISHERIES

Mr. PELL. Mr. President, the economic condition of the U.S. fishing industry has been the subject of growing concern for more than a decade. The reasons for the concern are best illustrated by a few statistics:

As recently as 1956, 13 years ago, the United States ranked second among the nations of the world in the tonnage of fish and shellfish landed by domestic fishermen. By 1968, the United States had slipped to sixth place among the fishing nations of the world.

A decade ago, U.S. fishermen supplied about 70 percent of the fishery products consumed in this country. During the past 10 years, the domestic demand and consumption of fishery products has increased dramatically, but virtually all of the increased demand has been filled by imported products. As a result, the U.S. domestic fishing industry last year supplied less than one-third of the fishery products consumed in this country.

The condition of our fishing industry was summarized concisely by the President's Commission on Marine Science, Engineering, and Resources in its excellent and comprehensive report to the Congress in January of this year. The Commission reported:

The situation of the U.S. flag fisheries stands in sharp contrast to the record growth of the world's high seas fisheries. Landings by U.S. vessels have remained almost constant over the past three decades, and during that period the United States has dropped from second to sixth among the world's fishing nations. U.S. vessels land about one-third of the total fish consumed in the United States and harvest less than one-tenth of the total production potential available over the U.S. continental shelf. Although there are areas of successful performance—most notably in the tuna and shrimp industries—and although the U.S. catch is third or fourth if measured by dollar value, the U.S. fishing fleet by and large is technically outmoded. It cannot mount the high seas fishing effort required to maintain a position of world leadership, and it is incapable of attracting a stable and efficient labor supply.

Mr. President, the fishing industry in my own region, New England, unfortunately has shared fully in the problems of the industry, nationally. Indeed, the problems can be seen very dramatically in the rich fishing grounds off the New England coast.

Just 9 years ago, 93 percent of the fish caught in the waters overlying the Continental Shelf off New England were caught and landed by New England fishermen. By 1965, the share of the catch claimed by New England fishermen had declined to 35 percent of the total; and, in that same year, the modern fishing fleet of the Soviet Union landed more tons of fish from these waters than all the other nations combined.

In short, Mr. President, our fishermen are being badly outfished in their own traditional fishing grounds. Knowing the commercial fishermen from my own State, I know the fault does not lie in a lack of resourcefulness or enterprise on their part.

Rather, our fishermen have been confronted with economic conditions over which they have little control, and against which competitive spirit, fishing skill, and resourcefulness are insufficient.

Mr. President, the Marine Science Commission, in its report entitled "Our Nation and the Sea," recommended a series of actions to revitalize our domestic fishing industry. I am today introducing a bill to implement one of those recommendations.

The Commission recommended, and I quote, "that legislation be enacted to remove the present legal restrictions on the use of foreign built vessels by U.S. fishermen in the U.S. domestic fisheries." The bill I am introducing would do just that. I ask unanimous consent that the bill be printed at the conclusion of my remarks.

I do not claim, of course, that this act would solve all the problems of the fishing industry. Indeed, I agree with the Marine Science Commission that a coordinated program on the State, Federal, and international levels is required to restore the commercial fishing industry to a vigorous condition. But I do believe this act, in itself, would be an important first step.

It would permit our fishermen to begin the process of updating and modernizing their fishing fleets. The Marine Science Commission made it clear that obsolescence of our fleet is a major factor in the current malaise of the industry.

The Commission noted:

Although the U.S. fishing fleet is the world's second largest, about 60 per cent of the vessels are over 16 years old and 27 per cent have been in service over 26 years. Some fisheries, like tuna, shrimp and Alaska King Crab, have fairly modern fleets; but advances in fishing technology during the past few decades have made most of the U.S. fleet economically, if not physically, obsolete.

Under existing laws, including one adopted by Congress in 1793, our fishermen are required to use vessels built in this country. This places our fishermen at a severe economic disadvantage because construction costs in U.S. yards are from 50- to 100-percent higher than costs in foreign yards. This cost differen-

tial is a major reason why our fishermen continue to use vessels and equipment that are, in the words of the Marine Science Commission, "economically obsolete."

The intent of these restrictive laws, Mr. President, was to protect and preserve a market for our domestic shipbuilding yards. The actual effect has been to restrict severely the demand for new fishing vessels. Faced with noncompetitive costs for new vessels, our fishermen frequently continue operating the old noncompetitive vessels they already have.

I submit that the restrictions on use of foreign-built vessels have been of no significant aid to our shipbuilders but have operated to the significant detriment of our fishermen.

It is interesting to note that other major fishing nations do not impose this kind of restriction. The Soviet Union, for example, has mounted in the past 10 years a major worldwide fishing effort. The Soviets have purchased their vessels where the price was right and where the technology was most advanced. The Soviets have constructed a large number of their own vessels but have also purchased modern fishing vessels, factory ships, and floating canneries from East Germany, Poland, Finland, Sweden, West Germany, Japan, England, Denmark, and the Netherlands.

The Congress has recognized that the restrictions on foreign-built vessels worked a hardship on U.S. fishermen. To redress the inequity, Congress established a construction differential subsidy program. This program has been ineffective. I would like to cite, briefly, the comments of the Marine Science Commission on the subsidy program:

The subsidy has not achieved its objectives. A provision requiring a finding that the grant of subsidy not cause economic hardship to others in the fishery has resulted in denial of subsidy to those parts of the industry most in need of aid to modernize their fleets. Because there is no provision for retiring obsolete vessels, the program has operated in other cases simply to add to the problems of fisheries already heavily overburdened by excess capacity. Statutory limitations on annual expenditures prevent approval of all qualified applicants, and the subsidy generates new inequities as it corrects old ones.

The alternative, Mr. President, to removing these restrictions is an extensive and expensive overhaul of the fishing vessel construction subsidy program. I do think that neither Congress nor the American people are prepared to embark on another expensive subsidy program, especially since this economic inequity can be ended, without cost to the taxpayers, simply by removing the restriction on use of foreign-built fishing vessels.

In conclusion, I would point out a curious paradox in our current policies in regard to imported vessels. A man of means may purchase a foreign-built vessel for his leisure entertainment and relaxation, subject only to a modest import duty of 3 percent or 8 percent, depending on the value of the vessel. But a man who depends on his vessel to make a living is required to pay a severe eco-

nomic penalty. And, interestingly enough, U.S. builders of pleasure craft have managed to compete very effectively with foreign yards, without the protection of restrictive laws.

I think it is time, after 176 years, to eliminate this obsolete restriction on our commercial fishermen and permit them to compete effectively.

Mr. President, I ask unanimous consent that an article on the economics of the fishing industry in New England, prepared by Mr. Jake J. Dykstra, president of the Point Judith Fishermen's Cooperative in Narragansett, R.I., and Dr. Andreas Holmsen, associate professor of the Department of Food and Resource Economics of the University of Rhode Island, be printed in the RECORD at the conclusion of my remarks. This excellent paper, presented at the National Conference on the Future of the Fishing Industry, in the State of Washington last year, makes a cogent argument for the bill I have introduced today.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the article and bill will be printed in the RECORD.

The bill (S. 2230) to authorize foreign-built vessels owned by citizens of the United States to be documented under the laws of the United States for the purpose of engaging in the fisheries, introduced by Mr. PELL, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 2230

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any provision of law to the contrary, any foreign-built vessel may be documented under the laws of the United States for the purpose of engaging in the fisheries if such vessel is owned by a citizen of the United States. Any such vessel so documented may continue to engage in the fisheries as a vessel of the United States so long as it is owned by such a citizen. For the purpose of this Act the terms "documented under the laws of the United States" and "citizen of the United States" shall have the meanings provided in sections 1 and 2 of the Shipping Act, 1916 (46 U.S.C. 801 and 802).

The material presented by Mr. PELL follows:

COST OF FISHING AND FOREIGN COMPETITION— NEW ENGLAND

(By Jake J. Dykstra and Andreas A. Holmsen)

(NOTE.—The authors: Mr. Dykstra is president of the Point Judith Fishermen's Cooperative, Narragansett, Rhode Island; and Dr. Holmsen is associate professor, Department of Food and Resource Economics, University of Rhode Island.)

INTRODUCTION

It is a well-known fact that ten years ago the United States fisherman accounted for about 70% of the domestic supply of fish while now he accounts for only one-third. It might not be equally well known that the decline in New England has been even more serious than those figures might indicate. The New England fishermen have faced and are facing an increasing pressure of foreign competition, both on the fishing grounds and in the market place—on the fishing grounds, particularly from the Soviet Union; in the market place, particularly from Canada, but also from Western Europe, especially Nor-

way, Iceland and Denmark. In 1960, New England fishermen landed 93% of the fish caught on the New England continental shelf¹ (the remainder was landed by Canadians); five years later, the New England fishermen landed only 35% and the Russians landed more fish from this area than all other nations combined. During the last years, Polish and German trawlers have also entered this fishery in increasing numbers.

Groundfish is the most important category of fish in these waters and already in 1964 we imported 77% of our domestic supply of this commodity.

Over the last decade, the New England fishing fleet declined from 885 vessels over 5 tons to 721 vessels and the number of fishermen on these vessels declined from 5,544 to 4,058. The total landings by New England fishermen declined from 852 million lbs. in 1960 to 687 million lbs. in 1966. In 1967 landings dropped further. The eight major ports in New England experienced a 19% decline in food fish and a 4% decline in industrial fish during 1967.²

THE PROBLEM

To determine the causes for the decline in the New England fishing industry, one might first look at the various factors that affect industry's competitive ability, and one should have it clearly in mind that it is a question of relatively and not of absolute magnitudes. Prices of meat and poultry might affect the price for food fish as the price of soybeans might affect the price for industrial fish, but the price level for fish in the U.S. might also hurt or benefit our foreign competitors. The basic factors that affect the competitive ability of fishermen are therefore:

1. The distance to the fishing grounds.
2. The distance to the market.
3. The cost of catching fish.
 - a. Cost of capital.
 - b. Cost of labor.
 - c. Managerial skills (productivity).
 - d. Cost of processing.
5. Tariffs.

The New England fishermen have no comparative disadvantage when it comes to the closeness of good fishing grounds. They are in a favorable position when it comes to good markets and the few studies made indicate that processing of fish is equally efficient here in this region as among our competitors. Tariffs for imported fishery products also produced in New England have been minor up to the present. Several commodities such as lobster and scallops have been imported into this country duty free. The Kennedy round of tariff negotiations last year cut the already low tariffs in half so they are now rather insignificant. Nevertheless, an import duty of whatever size is an advantage to local fishermen.

Thus, the whole problem boils down to the fact that the cost of catching fish for New England vessels is so much higher than in competing nations that it more than offsets the other advantages we enjoy.

The greatest cost item in the New England fishing industry is the cost of labor. The most common lay in the fleet seem to be the broken 40, which means that 40% of the gross stock goes to the boat and 60% to the crew after trip expenses have been deducted. In addition to this, 10% of the boat share (or 4% of gross after trip expenses) is paid to the captain. Based upon figures from Rhode Island, about 56% of the gross stock goes to labor, since trip expenses constitute about 12% of gross stock. This 56% compares with 39% for the Atlantic provinces of Can-

ada and 33% for near and middle water trawlers in Britain (Grimsby and Fleetwood). The difference in return to labor is even greater than these figures would imply, because of higher gross stocks and smaller crew size on our vessels. To attract labor, however, the fishing industry has to pay wages that are better than can be obtained ashore.

When using a specific lay, an owner can not improve his return on investment by improving labor productivity through labor saving devices. This will only affect the crew share per man. The only means of improving return on investment is through increased gross stock or reduction in non-labor cost.

The relatively high cost of labor is not unique to the fishing industry. U.S. industries have for a long time faced lower foreign wages but have been able to compete through efficient operation and substitution of capital for labor. In the trawler fleet, however, only 32% of a gain from increased use of capital goes to the vessel (with a 40% lay), and more important, the New England fishing industry is facing considerably higher cost of capital than its foreign competitors—higher cost of vessels, higher cost of gear and higher cost of operating capital. *The relatively high cost of capital is the key problem in the New England fishing industry and the prime reason for its inability to compete.*

In the United States, it is forbidden by law to use a foreign built vessel in the commercial fisheries, and the cost of building a vessel in this country is now about 100% higher than in some foreign countries. This means that American fishermen are forced to subsidize a high-cost ship building industry, a "luxury" they can ill afford. In addition, significant subsidies are given to the foreign producers. These subsidies can take the form of subsidies for vessels, gear or bait or as price subsidies for the catch; as loans or grants at interest rates far below market level or as welfare programs only applicable to the fishing industry. Despite a concern by OECD (Organization of Economic Cooperation and Development) over the high subsidies to fishing industries in various countries and an awareness of their negative aspects, subsidies are increasing rather than declining. In Canada for instance, the federal subsidy is up to 50% of the approved costs for steel trawlers and up to 40% of the approved cost for vessels of wooden construction, and vessels over 100 feet in length can be imported from most-favored-nations duty-free. In addition to the subsidies, the fisheries loan boards give liberal loans, so the cash downpayment necessary for the fishermen is very low. A study of 102 fishing enterprises in the Atlantic Provinces in Canada reveals that the average cash down payment by fishermen was 27%. The requirements are less. Small trawlers in Nova Scotia were bought with about 20% cash downpayment, in New Brunswick and Prince Edward Island with about 10%, and in Quebec, with even less. For the five steel trawlers (average 82') in Quebec included in the study, the cash down payment was only 4.4%.

The New England fishermen are faced with considerably higher construction cost, and in addition, the cost of financing here is excessive. The terms by commercial banks in Rhode Island are 50% down payment, a true interest rate of about 11%, and a 5 year repayment period. In ports where there is a closer cooperation between the banks and the fishing industry, for instance in New Bedford, Mass., the interest rate for vessels over 60 tons is 6% (summer 1967), but smaller vessels are facing much higher interest rates. The cost of vessels and high downpayment required are the reasons why New England firms buy vessels abroad and let them fish out of Canadian ports rather than investing at home.

¹ ICNAF sub area No. 5.

² The first month in 1968 was so extraordinarily poor (only 40% of previous year's landing of food fish) that we hope it will not be indicative of the year.

The Fisheries Loan Program in the U.S. Bureau of Commercial Fisheries has been a blessing for many local fishermen, but it is not sufficiently funded and is too limited in scope. It can loan up to 80% of liquidating^{*} value for 10 years at 6% interest, but only to owners of vessels or captains with an earnings record. In a fleet that consists primarily of owner-captains, it is difficult for a deckhand to become a captain, so when he buys his first vessel he can not make use of the B.C.F. program. To recommend a change in this lending policy without increased funding might not be sensible, however, since the program already is short of funds.

With the high cost of capital, vessel-owners are better off buying a somewhat bigger used vessel than venturing into new construction. This is supported by the findings by Fredrick Bell of the Federal Reserve Bank of Boston in his study of 101 fishing enterprises in Massachusetts. The best return to capital was obtained by trawlers 60 tons and over, more than 20 years old, fishing out of Boston, while the poorest return, or heaviest loss was by newer vessels less than 60 tons out of New Bedford.

The subsidy (Fishing Vessel Construction Differential Payment) program is not much suited for the fishing industry in Rhode Island, and no subsidy has been applied for. The purpose of this program is to upgrade the fleet, but unfortunately it seems that the B.C.F. regards efficiency and economic operation as incompatible with smaller trawlers. At least in private discussions, applications for subsidies for 60-70' draggers have been discouraged by the B.C.F., and the government is now using a major share of the funds to subsidize large factory vessels. The fact is, we have not seen any findings that will support the view that large trawlers give a better return to capital than small trawlers, or even a better return to labor. Britain has recently laid up part of its *Fairtry* fleet as uneconomical. In Norway, the small draggers have as often as not shown a better return to capital than the large trawlers and, closer to home, in Canada, the experience seems to be consistently better for the smaller vessels. The Canadian government is studying the economics of the fleet in the Atlantic provinces on a continuing basis, and the results are interesting. The vessel category which gives the best return on investment is 54'-60' wooden stern draggers, while the medium and large stern trawlers go in the red. Despite the fact that these small draggers were at sea on the average of only 92 days each in 1966, the large and medium sized steel side trawlers were at sea 287 days, and the large and medium sized stern trawlers were at sea 242 days, the small draggers also gave a better annual income to the fishermen. This was reflected by a crew share for deckhands of \$73.74 per day at sea for the small draggers, while the comparative figures for the two categories of large vessels were \$16.59 and \$17.82, respectively. The fishermen in Rhode Island feel that the optimum vessel size in their area might be 60 to 80' vessels with strong engines, and feel that building of vessels this size should be encouraged rather than discouraged.

We have put stress here on the cost of vessels, but no doubt the fishermen also are facing a general cost-price squeeze. Even with a stable gross stock, the economic position of vessel owners would deteriorate due to rising costs. When costs rise because of general inflationary pressure, market values of both new and old vessels go up. This creates a cost in taxes for the fisherman who would like to replace his vessel. If he sells a vessel (to buy another) the difference in the book value and the sales value of the vessel will be taxed. Thus, if a vessel has been depreciated

to \$5,000, and has a market value of \$25,000, the owner will have to pay income tax on \$10,000.⁴

CONCLUSIONS AND RECOMMENDATIONS

The rate of decline of the New England fishing industry is so rapid that programs with only a long term effect are basically of academic interest. The cost of labor is high, but the industry might have to live with this to attract sufficient manpower for the vessels. The basic problem is the relative cost of capital—our cost versus our foreign competitors' cost. The high cost of capital (or lack of risk capital) prevents funds being spent on technological improvements. To improve the position for the industry, the law prohibiting import of fishing vessels should be repealed, and the vessel subsidy program abolished. A repeal of the embargo on fishing vessels would hardly deteriorate our balance of payments position, as increased landings would substitute for imports, which now cost this country close to \$700 million a year in foreign exchange. Tariffs should be increased to eliminate the effect of foreign subsidies and thereby give our fishermen an opportunity to compete on an equal basis. Further, the B.C.F. loan program should be better funded and its lending policy liberalized.

From this discussion it is evident that the major problems in the New England fishing industry are not caused by the industry but are caused by relative government actions—actions of our government and of foreign governments. To solve these problems the fishermen have to learn to talk with a unified voice to influence government decisions.

AMERICANS NEED REAL TAX REFORM

Mr. MCINTYRE. Mr. President, I ask unanimous consent that I may be permitted to proceed for 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCINTYRE. Mr. President, I wish to address myself to the issues raised by the tax proposals presented to Congress on April 22 by the Nixon administration.

These proposals, taking up 310 pages of a committee print made public through the House Committee on Ways and Means, appear under the guise of tax "reforms." The manner in which they were presented to the Nation—with a brief statement from the President himself on April 21, and another brief statement from the Under Secretary of the Treasury on the following day—gave the public the impression that the administration had finally moved to eliminate the substantial tax loopholes which for years have forced low- and middle-income taxpayers to pay more than their fair share of the national budget. Unfortunately, the public was misled.

None of the particularly unfair special privileges which our tax laws give to enormously wealthy individuals and large corporations have been substantially reduced. The administration proposal avoids any head-on confrontation with the forces of the special tax privileges which have so unfairly thrown the bulk of the taxpaying burden upon our average citizens.

There are, of course, a few minor exceptions in the President's proposal, exceptions which I fully support. Large

corporations, for example, are able to accumulate the advantage of low tax rates which small corporations enjoy by the simple expedient of forming a number of small corporate subsidiaries. The President has recommended that this multiple-corporation privilege be eliminated. There have been abuses of the privileges given to charitable foundations and religious bodies, and to the extent that the President has proposed to curb these abuses, he has my full support.

I do not wish to give the impression that I am dissatisfied with every paragraph in the administration proposal. As I have indicated above, I believe that the administration's proposal with respect to the multiple-corporation exemption is highly desirable. I shall support the President's proposal to provide tax allowances for low-income families, and I support his proposals for taxing mineral production payments.

But I do have very serious reservations about the remainder of the proposals.

LTP LIMITATION ON TAX PREFERENCES

I believe that I should begin my discussion of the LTP—limitation on tax preferences—proposal of the Nixon administration by stating that it does represent, limited though it is, a tardy recognition by the executive branch of the Government of the unfairness of the tax structure, unfairness of the tax structure which has been imposed upon the American people over the past half century through the gradual accumulation of one seemingly minor loophole after another. President Nixon is to be congratulated for this recognition, and for his courage in taking even this very modest step toward spreading the tax burden more equitably among American taxpayers.

The LTP proposal recognizes that, through a selected number of tax loopholes, citizens who are able to exercise control over the source and application of their income are able to avoid the tax burden thrown upon the shoulders of their less fortunate fellow citizens. Those taxpayers who invest in oil properties, who make gifts including unrealized appreciation and who participate in real estate transactions taking advantage of accelerated amortization provisions can reduce their tax burden to the point where, in some cases, it disappears. Under President Nixon's proposal, no more than 50 percent of an individual's income could be exempt from tax because of these loopholes.

There are three major drawbacks to the LTP proposal, however. The first, and most obvious, is that by specifically including only a selected list of loopholes, it excludes many others. It will thus have the effect of simply channeling the funds of wealthy citizens out of the included areas and into those which are still safe from tax. Thus, it will not have the desired effect of finally putting an end to the situation where middle- and lower-income taxpayers bear a heavier share of the tax load than their wealthy neighbors.

On this, Mr. President, let me point out that my information indicates that: More than 1,000 persons with incomes over \$200,000 paid the same proportion

^{*} Somewhat less than the market value, but more than is expected from a foreclosure.

⁴ Half of capital gain to be declared as income.

of their total income in taxes as did the typical person in the \$15,000 to \$20,000 income group;

The majority of taxpayers in the \$500,-000 to \$1 million income group paid as small a proportion of their income in taxes as did most taxpayers in the \$20,-000 to \$50,000 category, and those with incomes of more than \$5 million paid only half as much tax, proportionately, as those with one-tenth as much income.

Taxlessness among those with incomes of more than \$1 million has increased fivefold in the past 12 years. For those with incomes greater than \$200,000 taxlessness has increased sevenfold.

Mr. President, I say there is something sadly amiss with a system that can take more from an individual on the poverty level than it does from a millionaire, something badly wrong with a system that can even enable a man to report a negative income on paper when his actual income is in the hundreds of thousands of dollars.

Now let me continue my comments on the LTP proposal:

The second drawback to the proposal is that it simultaneously recognizes the unfairness of certain tax loopholes and yet continues them. If only one penny less than 50 percent of a taxpayer's income is derived from the sources included in the LTP proposal, he is able to take full advantage of the loophole. What are needed are changes in the basic tax structure to plug up these loopholes once and for all.

I recognize that this is a difficult challenge for the Congress and the administration. Perhaps a stopgap measure, such as the LTP proposal, is necessary. If this is so, however, I believe that an expanded form of the minimum tax proposal of former Secretary Barr is more desirable. I believe that the least we should settle for is a plan to impose the full tax rates, not just on 50 percent of income, but on the full 50 percent of all tax-exempt or tax-deductible income, regardless of how that income was derived. While this system would, it is true, perpetuate the basic loopholes in the tax structure, it would still make all tax preferences and subsidies much more fair in their application.

The third, and in many ways the most significant problem with the LTP proposal is that it does not affect corporate income. After all, Mr. President, much, if not most, of the benefits of such tax preferences as the percentage depletion allowance go to corporations. It is the uninhibited use of these tax preferences by large corporations which gave rise to the situation which compelled the President to seek tax reform. Corporations like the Atlantic-Richfield Corp., with profits running each year into hundreds of millions of dollars, have been able in the past to completely escape the bite of the Internal Revenue Service.

It is this omission of corporate income from the LTP program which makes me feel that the proposal could only have been offered in an effort to stall on basic tax reform, to, in effect, serve as an appeasement to an outraged public, and thus avoid the need for getting to the heart of the problems with our tax struc-

ture—the multitude of tax loopholes and subsidies which would still remain even after the President's program had been enacted.

TAXATION OF CAPITAL GAINS AND LOSSES

Our tax laws, like those of many other countries, recognize a preferred status for long-term capital gains. I happen to agree with this recognition of an essential difference between ordinary income and accretions of capital investment—a difference which involves both investment expectations and encouragement of further—necessary capital development.

Nevertheless, I believe that our present tax laws apply three unnecessary generous subsidies to the treatment of long-term capital transactions.

One of these, the use of long-term capital losses to fully offset ordinary income, has been recognized by the Treasury Department in its proposals. I fully concur with the administrations' recommendation that long-term capital losses be subject to the same 50 percent elimination as is applied to gains when combined with taxable income. I believe that this is an eminently justifiable recommendation, and I shall support it.

However, as in so many other areas, the Nixon administration proposals merely scratch the surface, and fall far short of meaningful reform. I feel that two more steps must be taken to bring our tax treatment of long-term capital transaction into line with the ideal of an equitable tax system, while still retaining a justifiable easing of the tax burden on such transactions.

First, I believe that the alternate maximum rate of 25 percent should be eliminated. This would still retain for persons benefiting from long-term capital gains the privilege of receiving half of their gains completely free from tax, but it would insure that the 50-percent gains to be taxed would be taxed at normal rates.

A particularly objectionable feature of the 25 percent alternate maximum tax is that it, more clearly than any other tax subsidy, can only be used by persons with very high incomes, over \$40,000 for taxpayers filing joint returns. Middle-income taxpayers simply cannot obtain any advantage at all from its employment, and thus we are confronted with a special Federal subsidy designed exclusively for wealthy individuals.

This is precisely the one category of taxpayers in least need for public subsidy. Our sense of national priorities must be very strange indeed to retain in our laws a special cash subsidy for wealthy people while at the same time we are cutting back Federal support for education, health, our elderly citizens, and other needed causes. Thus I strongly recommend the elimination of the alternate maximum tax on long-term capital gains.

Second, I believe that Congress should extend the required holding period for qualification as long-term capital assets. I know of no logical, reasonable theory under which 180 days can be justified as the minimum amount of time required to establish a capital asset as one held for a long term.

How long should the holding period be? This is essentially a matter of informed judgment. The Congress has exercised such judgment before, in its treatment of the income tax laws for the District of Columbia. In that statute, we established a 2-year period as the minimum holding time.

In any event, it makes no sense at all to confer privileged status on gains on assets held for less than a single tax year. I recommend, as a bare minimum, that the Congress extend the present 6-month period to at least a full year, and, if sufficient economic data can be gathered as to the effects on our capital markets, that we consider extending it well beyond the basic 1 year period.

TAX SUBSIDIES TO THE PETROLEUM INDUSTRY

The two most deplorable illustrations of the use of economic and political power to obtain special public subsidies are the treatment of the petroleum industry in our present tax laws, and the treatment of the petroleum industry in the Nixon administration proposals for tax reform.

Our present tax laws are shameful in the magnitude and the variety of special handouts from the public treasury to the oil industry. The administration proposals, which, as I have noted before, purport to represent some sort of tax reform, are equally shameful in their neglect of the need for prompt elimination of this special treatment.

The principal subsidies received by the oil industry from the taxpayers through various tax loopholes are as follows:

First. The 27½ percent depletion allowance, which will cost taxpayers approximately \$1.5 billion this year.

Second. The application of the depletion allowance on a property by property basis, and not on a company wide basis. This little gimmick lets producers take a large depletion allowance on efficient, large wells, without having to reduce their allowance to take account of inefficient, or high-cost wells.

Third. The application of the depletion allowance to foreign wells as well as American wells.

Fourth. The use of foreign royalties, disguised as taxes, as credits against American income taxes.

Fifth. The immediate writeoff subsidy for intangible drilling costs, which cost the American taxpayers this year three quarters of a billion dollars.

The administration proposals do not have any substantial effect upon the enormous public subsidies paid to the petroleum industry under these five categories.

One might imagine, from the attendant publicity when the administration proposals were launched, that something was finally going to be done about percentage depletion and intangible drilling costs. The only impact which the administration proposals have on these two enormous handouts is contained in the proposals for limitations on tax preferences and allocation of deductions. As I pointed out earlier, however, these proposals affect personal income only marginally, and corporate income not at all.

And it is the corporations which get

the major advantage from this subsidy. A look at the 1960 figures makes this very clear. In that year, percentage depletion claimed by individuals amounted to \$370 million. Partnerships claimed some \$65 million for oil and gas percentage depletion. But corporations claimed \$2.3 billion for this purpose.

Incidentally, \$750 million of this corporate depletion was claimed on foreign properties.

Of course, the most obvious proposal which the administration should have made was to reduce substantially, if not completely eliminate, percentage depletion. I personally favor the elimination of percentage depletion—although, of course, I recognize the legitimacy of cost depletion—but perhaps the best practical approach at this time would be a reduction of the percentage-depletion formula to 10 or 15 percent. Since many other Members of the Congress have also expressed an interest in this reform, I am willing to rely on the judgment of my colleagues as to where in that range percentage depletion might be most appropriately set.

An outrageous abuse of the principle of percentage depletion is the application of that concept on a property-by-property basis. Our neighbors to the north, in Canada, more properly apply percentage depletion on a nationwide basis, and thus remove the temptation to juggle startup dates and leasing arrangements for the simple purpose of maximizing depletion subsidies.

Senator MUSKIE has pointed out the absurdity of continuing to subsidize foreign operations through use of the percentage-depletion allowance while our national policy is, apparently, trying to encourage the use of capital for domestic exploration. I have cosponsored Senator MUSKIE's proposal to eliminate this particular subsidy to the international oil companies and their Arab friends.

I am certain that those experts in the use of tax loopholes, the financial institutions and the giant manufacturers, look longingly at the most unusual subsidy given to the oil industry, the privilege of immediately deducting intangible drilling costs. In no other major industry can capital expenses be written off immediately—as they can in the oil industry when the capital invested in development results in a producing well. I believe that this special subsidy simply cannot stand on its own logic, and deserves an even higher priority than percentage depletion for immediate elimination.

Finally, Mr. President, the most outrageous, the most unfair loophole of all, was not mentioned in the administration reform proposals. I refer to the so-called Aramco decision which permits royalty payments by American companies to foreign rulers, masquerading under the guise of taxes, to be applied as full credits against the payment of Federal income taxes. To the extent that this situation is embodied in tax treaties with foreign nations, they should be denounced. To the extent that it is supported by the regulations of the Treasury Department, they should be promptly changed, without waiting for congressional action.

Mr. President, the very thought that royalty payments to some Arabian sheik can be equated with American taxes, and can permit huge international oil companies to ignore their national responsibilities as American corporations to help bear the costs of their own Government, boggles the mind. No other industry benefits so much from Federal expenditures as does the oil industry. Whether we are sending diplomats to South America to defend the rights of the Standard Oil Co. of New Jersey, or subsidizing tankers, or administering oil import policies, or developing geological surveys, or purchasing POL for our Armed Forces, the oil industry is benefiting from the expenditure of the taxpayers' dollar. And not only does this industry escape paying its fair share of the Federal tax burden, it has the effrontery to claim that it may substitute foreign royalties, or taxes, for American taxes.

In summary, Mr. President, I regard President Nixon's proposals for new tax legislation as a barebones base for congressional efforts to achieve meaningful tax reform. We need to make our tax system more fair to middle income taxpayers by stripping away the special loopholes which enable corporations and individuals with large incomes to avoid paying their fair share of our Nation's expenses.

I believe that our particular attention should be focused on the need for general taxation of all presently exempt corporate and personal income, revision of our rules for the treatment of long-term capital gains, and a wholesale housecleaning of the tax laws relating to the oil industry. Then we will truly be able to report back to our constituents that the basic unfairness of the present tax system has come to an end.

ORDER OF BUSINESS

Mr. INOUE. Is there further morning business?

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. INOUE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME FOR CONGRESS TO STOP INFLATION WITH SPENDING CUTS

Mr. PROXMIER. Mr. President, yesterday's announcement of the huge consumer price rise means that inflation is not slowing down but is hitting harder. Any thoughtful analysis indicates that prices will continue to go up rapidly for at least another year unless Congress acts.

The Wall Street Journal this morning indicated that in their judgment prices will go up for several years unless Congress acts and unless there is a change in the situation.

There is nothing in President Nixon's prescription which will stop inflation

now. The surtax has been tried and has failed. The time has come to cut spending which has a much more prompt and incisive impact.

Congress must act. We must cut the President's budget and cut it drastically. And there is plenty of wasteful spending where the cuts can be made.

I urge the following specific actions:

We can cut the military budget where fat and waste and excess costs have weakened rather than strengthened the security of this Nation. With 10 men in support jobs for every man in a combat outfit, the military could rearrange its priorities without affecting combat efficiency.

With huge cost overruns, late delivery dates, and weapons which do not function—tanks, helicopters, and submarines to name only a few—vast efficiencies could be made.

Congress should pare the military budget by at least \$10 billion. Even Pentagon experts agree this could be done without impairing our combat strength, according to the Congressional Quarterly's superb review of this question.

Congress should also cut sharply the big \$3.7 billion space budget. The needs on earth are more important than those in outer space where prestige rather than security has been the driving motive. Certainly this is a highly inflationary program.

Above all we should cut public works spending—dams, highways, water projects, which have the dubious distinction as the biggest engines of inflation with the least payoff. Public and private spending for capital investment and public works are the root cause of this inflation. We should cut big here.

Those hurt most by inflation are those who can afford it least. This is clear from the rise in particular items. The increase in public transportation costs—7.9 percent since a year ago—hits hardest at the poor who have no choice but to travel by public means.

The increase in medical care services—8.4 percent since a year ago—hits at the sick, the aged, and the needy at precisely the time when their incomes drop and their costs skyrocket.

The 13-percent rise in the cost of insurance and finance services harms most the poor and the weak. It hits hardest at the insecure who need security and who can least afford it.

The rise in home ownership costs—10.6 percent in a year—is a cruel charge at the very time when we need to build 1 million housing units a year more than we have been building if we are to house all Americans decently.

The timid actions taken by the Nixon administration have not worked and show no sign that they will work. To stop inflation Congress must cut the budget and cut it hard.

I ask unanimous consent that the Department of Labor release on the Consumer Price Index for April 1969 be printed in the Record.

There being no objection, the release was ordered to be printed in the Record, as follows:

CONSUMER PRICE INDEX FOR APRIL 1969

A 0.6 percent rise in April brought the Consumer Price Index to 126.4 (1957-59=100), the Labor Department's Bureau of Labor Statistics announced today.

Over the year the Consumer Price Index has risen 5.4 percent. Over the past three months consumer prices have gone up at a 7.6 percent annual rate, steepest for a comparable period since mid-1956. For major components of the Consumer Price Index, percent changes at annual rates over the last 3 months and for the past year are shown below:

	April 1969 from—	
	January 1969	April 1968
Consumer Price Index:		
All items.....	7.6	5.4
Commodities.....	6.4	4.4
Services.....	8.8	7.2

Higher prices for services—particularly household services such as mortgage interest charges on FHA loans, residential electric rates, and home repairs—and food accounted for a large part of the April advance.

Medical care costs continued rising sharply, led by increases in dentists' fees. Medical care services have gone up nearly 8½ percent over the year. Other services headed for

higher levels were movie admissions, golf fees, automobile insurance, and local transit fares.

Food prices rose 0.7 percent, mostly because of higher meat prices, especially beef. Pork prices failed to decline as they usually do in April, apparently in response to the strength in beef. Restaurant meals also continued to climb. There was some help for the family food budget from lower prices for many fresh vegetables, thanks to larger supplies.

Prices rose for furniture and used cars. New car prices declined about in line with seasonal expectations, as dealers increased concessions in order to trim inventories.

Apparel prices increased 0.6 percent, led by such basic items as men's suits, slacks, and shirts, and women's dresses, skirts, and shoes. Alcoholic beverages, toilet goods, and cigarettes also showed significant increases.

COST-OF-LIVING ADJUSTMENTS

Approximately 117,000 workers will receive cost-of-living pay increases based on the April Consumer Price Index. About 62,100 workers, mostly in the aerospace, motor-vehicles and parts, farm machinery and office machinery industries will receive hourly increases ranging from 3 to 7 cents an hour, based on the rise in the national index between January and April. An additional 35,500 workers will receive wage increases based on annual or semiannual reviews of

the national Consumer Price Index, the largest group of these being classified employees of the State of Wisconsin. In addition, 17,700 local transit workers in Chicago, Boston and Pittsburgh will receive 5 or 6-cent hourly increases, based on the 3-month advance in the indexes for the respective areas. An estimated 43,000 workers in various industries who would otherwise receive cost-of-living increases, will not receive them this month because they have already received the maximum stipulated in their contracts.

A NOTE ABOUT CALCULATING INDEX CHANGES

Movements of the indexes from one date to another are usually expressed as percentage changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period while percentage changes are not. The following example illustrates the computation of index point and percentage changes:

Index point change

April 1969 CPI (1957-59=100).....	126.4
Less March 1969 index.....	125.6

Index point difference..... 0.8

PERCENTAGE CHANGE

Index point difference divided by the index for the previous period:

$$\frac{126.4 - 125.6 \times 100}{125.6} = 0.6 \text{ percent}$$

1 Area coverage includes the urban portion of the corresponding standard metropolitan statistical area (SMSA) except for New York and Chicago where the more extensive standard consolidated areas are used. Area definitions are those established for the 1960 census and do not include revisions made since 1960.

2 Foods, fuels, and several other items priced every month in all cities; most other goods and services priced as indicated:

M, every month.

1, January, April, July, and October.

2, February, May, August, and November.

3, March, June, September, and December.

ADDRESS BY SENATOR MONDALE ON DEFENSE PROCUREMENT

Mr. PROXMIRE. Mr. President, there is no more pressing issue confronting the Nation today than the character and size of the defense budget. The military procurement system, from project conception through contract administration, significantly affects that budget.

On May 19, 1969, our distinguished colleague, the junior Senator from Minnesota (Mr. MONDALE), made a thoughtful and constructive speech on defense procurement to a meeting of purchasing management executives. It contains suggestions for desperately needed improvements in defense procurement which, I believe, should be considered by all Members of the Senate. Accordingly, I ask unanimous consent, Mr. President, to have this speech printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE GOVERNMENT AS PURCHASER

(Remarks by Senator WALTER F. MONDALE, before the National Association of Purchasing Management, Minneapolis, May 19, 1969)

It is a pleasure to be with you this morning at your International Purchasing Conference. My good friend Stanley Cowle is President of the Twin City Purchasing Management Association, which is your host. I am glad to see Bill Bunin, the Program Chairman, from the Tony Company, Mr. Fred Fisher, the Assistant Program Chairman from Minnesota Mining, and Mr. Beverly Countryman, your General Chairman, also from Minnesota Mining.

I believe you know that your business, purchasing management, is one of the hottest

subjects now confronting the world's largest enterprise, the United States Government. I speak to you as a member of the "Board of Directors" of the U.S. Government, whose expenditures in the current fiscal year are expected to approximate \$190 billion. That is a staggering amount of money.

How much is \$190 billion? From the founding of this nation in 1789, it took us until we were well into World War II, in fiscal year 1942, before the Government had spent \$190 billion in the aggregate. And now we are spending that amount of money in just one year!

A great deal of that money is spent on procurement and that is what you are experts in. As the world's largest enterprise, the Government has an obligation to develop and use the best procurement practices that man can conceive in carrying out its tremendously complicated mission.

Much of the Government's procurement is centered in two agencies. The first is the General Services Administration, which buys the large majority of common supply items used by all civilian agencies of the government, as well as a great deal of the material which is used by the Defense Department. The Defense Department, however, dwarfs the General Services Administration with its own procurement programs. Though many of you have no direct connection with Defense procurement, as citizens and taxpayers you are vitally affected.

As you know, the budget of the Defense Department is now in the order of \$80 billion. About half of that total goes into procurement. Thus, your tax rates, and the size and complexion of the civilian portion of the Federal Budget, are significantly influenced by Defense procurement. In addition, many of your concerns are deeply involved in Defense business, so I know that the subject is important to you.

Congressmen and taxpayers no longer consider procurement policy a dull and uninteresting subject. Our national priorities cry

out for a shift in Federal funds from military to urgent civilian programs. By drastically improving our defense procurement systems, I believe we can meet these pressing needs with no sacrifice to national security. In fact, some think we could greatly strengthen our security through more intelligent procurement practices.

During fiscal 1968, the Defense Department made almost ten million purchases, under contract with about 24 thousand firms. This would be a difficult enough job if either the personnel managing the system or the material in the system remained stable. Unfortunately, that is not the case. At least 25% of the personnel working in the field of defense logistics are new to their jobs every year. And one of every ten items in stock is brand new. Thus, it can readily be seen that intelligent and wise procurement in the Department of Defense is both essential and exceedingly difficult.

For many years now, the Defense budget has somehow escaped the close scrutiny in the Congress to which all other programs are subjected. But a new mood is evident in the Congress, reflecting a mood which is taking shape in the nation. The people are tired of the Vietnam war. And they are tired of the huge tax burden that has been placed on their shoulders. And they are writing and telling their Congressmen how tired they are.

In years past, it was sufficient for the Pentagon to tell its advocates in the Congress that the programs proposed were vital—and that the systems would work—and that the cost estimates were accurate. Recently, a large number of Congressmen have reluctantly come to conclude that "essentiality" is mere rhetoric; that "reliability" is merely a hope; and that "cost estimates" are merely seductive offers.

Yes, there is a growing crisis of confidence with respect to the Defense establishment. It is manifested in terms of strong opposition to the President's proposal for an ABM system—both in the Congress and among the public. I was heartened to see that a poll in this State recently revealed that a slight plurality opposed this costly and futile ABM system.

The Pentagon's promises with respect to the prosecution of the war in Vietnam have also contributed to this decline in confidence. And a series of revelations about incredibly shoddy contractor performance, and equivalent shoddy government supervision, have, I believe, truly placed in jeopardy confidence in our national security establishment.

I would like to review briefly with you some aspects of defense procurement which have contributed to this crisis. For I believe you can help us in correcting the serious flaws and in restoring the country's confidence in the nation's defense effort.

To begin with, the entire system is operated under a hopelessly obsolete statute. The Armed Services Procurement Act of 1947 is actually based, in large part, on Section 3709 of the Revised Statutes—which dates from 1861. This statute assumes that the typical method of procurement will be through advertised competition, sealed bids, awards based principally on the lowest price, and fixed price contracts. In actuality, however, only a small minority of defense procurement follows the pattern anticipated in the statute.

After years of intensive efforts initiated at the beginning of the Kennedy Administration, the percentage of procurements of this type was substantially expanded, but still reached only about 13% of the total. All of the rest have to be treated, essentially, as exceptions to the basic approach of the 1947 Statute. True, these exceptions are covered in the very detailed Armed Services Procurement Regulations. These regulations spell out the conditions for 17 different types of procurement for which adequate provi-

sions is not made in the basic legislation. But, surely, we should have a law which substantially covers our predominant practices.

Another problem is the insistence by the Pentagon that military personnel rotate at frequent intervals and, moreover, that they not become too specialized. The objective seems to be to prepare most of them ultimately to qualify for appointment as Chief of Staff. It is no surprise that a system, many of whose key personnel pass through it as if in a revolving door, cannot achieve the levels of efficiency and effectiveness that we would like.

This rotation policy has been seriously criticized by other observers—for it is very costly just in terms of personnel operations. One estimate of cost savings through reduced assignment changes is \$500 million per year. But the cost in reduced effectiveness may be even greater.

The early retirement system leads to employment of many retired military personnel in senior positions in defense industries. As Senator Proxmire has recently reported, 2072 retired military personnel are now serving in key positions with defense contractors. Though there are regulations governing the participation of such officers in procurement activities with their former services, this does not seem to be true with respect to civilians who leave the Defense establishment, as a result of this pattern of employment, public confidence in these arrangements has weakened badly.

We urgently need a thorough study of the role of personnel who move from defense industry into the Pentagon and from the Pentagon into defense industry. Certainly, former military and civilian personnel of the Defense Department are entitled to seek gainful employment in fields for which they are qualified. But the public needs to be assured that this employment is earned entirely on the strength of the individual's ability to perform—and not on his ability to "deliver," based on his previous contacts.

The Congress has been greatly disturbed by an analysis recently completed by Senator Stuart Symington, a former Secretary of the Air Force. He listed 43 missile systems which were abandoned prior to their deployment or have been replaced because they became obsolete. He estimated that \$23 billion had been expended on these systems before they were abandoned. We must develop better planning and evaluation techniques so we do not rush prematurely into procurement of these high-cost systems.

We have also been troubled by the tendency of the defense establishment to seek the most elaborate—the most sophisticated—hopefully the most reliable—and clearly the most expensive equipment that man can imagine. We cannot fault the military planners for this. Their job is to try to get the country the best equipment which can be made. But we must find ways to temper their zeal with prudent judgment.

The tendency to use over-elaborate specifications has earned the name of "gold plating." And a specialty has grown up just to combat this tendency. That specialty is known as "Value Engineering." Though it is estimated that hundreds of millions of dollars have already been saved through value engineering, I believe we have only scratched the surface.

We have more than mere dollars to save through rigid scrutiny of specifications. If we assure that they are reasonable, we can shorten the lead time and get our equipment into service faster—perhaps before it becomes obsolete. Most importantly, the equipment will likely be more reliable in the event it ever must be used in wartime.

And now I would like to turn to one of the most critical problems in defense procurement. That is, the consistent and virtually fantastic cost "overrun" which we have experienced in major weapons systems. The

problems which I have been discussing so far pale by comparison with some of the gross deficiencies which have recently come to light in cost estimating. A recent Brookings study reports that the initial cost estimates for major weapons systems in the 1950's and early 1960's were exceeded by amounts ranging from 200% to 700%. And another study by a Budget Bureau officer revealed that the performance of these complex weapons systems fell as far short of specifications as the actual costs exceeded those originally estimated.

For example, of 13 major missile and airplane systems begun in the late 1950's, only 4 could be counted on to function 75% as well as promised. Of 11 systems begun in the 1960's, only 3 reached performance levels of 75% expectations.

So it is here in these major weapons systems that a big payoff can, and must, be found—both in cost savings and in improved performance.

What we need is a thorough-going overhaul of the entire philosophy and operation of the defense procurement system. As a civilian procurement executive of the Navy Department recently stated:

"No matter how poor the quality, how late the product and how high the cost . . . defense contractors know nothing will happen to them. Until or unless this climate is changed, there will be little or no improvement in our procurements."

The problem lies in those 17 kinds of procurements which I mentioned earlier; that is, the exceptions to the advertised, competitive, fixed price contracts which were envisioned under the Armed Services Procurement Act. A great number of these "exceptions" are procurements made by cost-type contracts.

Under cost-type contracts, the contractor may be reimbursed for all of his costs, regardless of how they vary from the original estimate upon which the award was made. Of course, in many contracts, we now have provisions for denying certain elements of contractor cost-escalation. But the contractors have developed methods for avoiding these controls, often with the acquiescences of the Government.

Under former Secretary of Defense McNamara, increased use was made of incentive-type contracts. But recent testimony in the Congress reveals how far we have to go to safeguard the interest of the taxpayer in major procurements, such as those for the C-54 aircraft system and for the F-111 fighter bomber.

The \$2 billion cost escalation on the \$3 billion original C-54 cost estimate amounts to more money than was appropriated for the War on Poverty this year.

The initial cost estimate for the engines for the F-111 was \$270,000 each and a recent estimate has reached \$700,000 each. The Air Force's Manned Orbiting Laboratory (which substantially overlaps with the civilian space program) was first projected at \$1.5 billion. Current estimates are about \$3 billion and the end is not in sight.

One basic cause of understated costs appears to be that the Services, in vying for roles and missions, and the contractors, in vying for business, have a tremendous incentive to keep their estimates low so as to increase the chances that their proposals will be accepted. For example, it was reported in the *Washington Post* just last week that the cost estimates for the Mark II electronics equipment for the full F-111 program (the size of which has now been cut-back sharply) and soared from \$610 million in June 1966 to \$2,510 million by November 1968—more than a 300% increase. The article quotes an internal Defense Department memo, as follows:

"Both the contractor and the Air Force were unrealistic in assessing the ultimate cost of the system. It appears the contractor

knew very well what he was getting into but was so anxious to win the competition that he was willing to buy in by quoting a low price."

Then, "the contractor pursued a strategy of using change notices (blaming higher costs on Government-ordered changes) as a means of 'getting well' . . ."

As recently reported in the *Minneapolis Tribune*, numerous companies depend on the defense program to keep them alive. Fifteen of the 38 largest defense contractors, from 1961 to 1967, derived more than half of their business from defense contracts. Thus, they compete avidly for cost-type contracts, being confident that the Defense Department will underwrite the excess costs if the estimates prove low.

Once the Congress is persuaded to accept the deceptively low estimates of these firms, it seldom is presented with the choice of dropping the project when the funding requirements multiply. In such cases, an accurate presentation might have made the program very much more vulnerable to Congressional rejection at an early stage.

In civilian programs, the Congress permits no such freedom. Many of our most vital domestic programs operate under fixed authorization ceilings. If the program unexpectedly eats up the money which was authorized, without reaching its goals, the agency must come back to the Congress—both for an increase in the authorization and for additional funds.

When the Defense Department runs short, it does not consult generally with a wide range of Members of Congress. Many of us often do not hear of these huge cost-overruns.

But, as I have indicated, a new mood is evident. The Congress is becoming restive. The people are unhappy. We are afraid that the vaunted "power of the purse" is being made a mockery.

Many of us intend to see that the Congressional watchdog role is taken more seriously—both by the executive branch and the Congress itself. As a result, I hope for significant challenges to the Defense Budget on the floor of the Senate this year.

Cost overruns are only part of the problem. Not only have the contractors typically been "let off the hook" when they have greatly exceeded their cost estimates, but they have also been absolved of any responsibility for the fantastic shortfalls in the performance of their weapon systems which I mentioned earlier. What we need to do is strengthen the resolve of the procurement officials in the Defense Department to demand that systems measure up to specifications. And we should exact penalties from the contractors if the systems fail to measure up.

Solving these problems which I have outlined is exceedingly complex. But a start must be made. Reducing the Defense Budget merely treats the symptoms, not the disease. We need to do more. I believe that a serious and thorough study of the entire Defense procurement apparatus is needed. Senator Jackson and Representative Holifield have introduced bills to provide for such a study by an independent Commission. The bills, S. 1707 and H.R. 474, are pending before the Government Operations Committees.

The proposed Commission on Government Procurement would not limit its attention to Defense Procurement. I think that is fine because some of the same problems exist in other large government procurement programs, such as the Supersonic Transport Program, the Space Program, and the Atomic Energy Program. Obviously, the bulk of expenditures is in the Defense area, and I would expect the Commission to devote a preponderant amount of its attention to Defense procurement. I intend to support the enactment of this legislation.

You could help in a number of ways. First, you could urge the establishment of the

Commission on Government Procurement. Then you could volunteer, either as individuals, or through your national or local associations, to assist this Commission in evaluating present procurement practices and in designing improvements.

I would also welcome any other suggestions or assistance in bringing to bear the most serious and expert attention of the Nation upon these problems. For they are not transitory. Charles Schultze, a former U.S. Budget Director, has estimated that Defense systems, *already approved*, could eat up the entire savings to be realized from an end to the war in Viet Nam.

If we are not to become saddled permanently with an overblown Defense budget, we need an aroused and enlightened electorate. The problems of our crowded and polluted cities, of our hungry and undernourished children, or our undeveloped rural areas, of our millions still living in poverty, and of our repressed and deprived minorities, demand attention.

As long as we fail to control the machinery we have created to "provide for the common defense", we will be unable to carry out the equally compelling mandates of the U.S. Constitution to "promote the general Welfare" and to "insure domestic Tranquillity". We, in the Congress, need your help.

OUR RECORD ON THE HUMAN RIGHTS CONVENTIONS

Mr. PROXMIRE. Mr. President, of the human rights conventions adopted since the creation of the U.N., the United States has ratified only two—the Supplementary Convention on the Abolition of Slavery, in 1967; and the Protocol on the Status of Refugees, in 1968.

The United States has not adopted the Convention on Genocide, Political Rights of Women, and Abolition of Forced Labor. This record is matched only by Yemen, South Africa, and Bolivia. Three of the new countries in the U.N.—Mauritius, Maldives Islands, and Western Samoa—also have a poor record, but they have not yet had much time to act.

Taking into account the entire range of human rights conventions since 1945, including those developed by the ILO and UNESCO as well as the U.N., and again omitting countries which have become independent only in the last few years, our record of two brings us above Yemen—which has never ratified any—and above Bolivia, Saudi Arabia, Thailand and San Marino, which have each ratified one human rights convention.

For a country dedicated to the principles of the Bill of Rights and the humanity of nations, we have a poor record indeed. The time has come to change that record. Again, I would urge my colleagues in the Senate to ratify the Conventions on Genocide, Political Rights of Women, and Abolition of Forced Labor. Let us, as a nation, give meaning to our words and substance to our hopes.

O. & C. TIMBER PAYMENT PROBLEM CLOUDED BY INACCURATE FACTS

Mr. PROXMIRE. Mr. President, earlier this year I announced my opposition to the continued payment of Federal receipts on certain timber lands in western Oregon in an amount that was two to three times as great as the county governments would have received had the land been in private hands. In my esti-

mation tax equivalency is, the most the counties should be receiving.

I am happy to say that I have had a chance to discuss this problem with my colleague from Oregon, Mr. PACKWOOD, and certain representatives of the 18 western Oregon counties receiving these Oregon and California land payments. These representatives, including Ray Doerner, Douglas County commissioner, made a compelling case for the continuation of the payment of 50 percent of the receipts on these lands, even though this payment may balloon to \$30 million in fiscal 1970 as compared with \$25.5 million in fiscal 1969.

Apparently the Bureau of the Budget also felt the force of some of the arguments used, for in a revised Nixon budget in which budget cuts were the order of the day the proposed limitation on Oregon and California land payments was hiked from \$24 million to \$25.5 million. This compares with cuts in other Bureau of Land Management activities such as oil shale research and improvement of land appraisals.

An editorial reprinted in the May 6 edition of the Portland Journal and originally appearing in the Albany, Oreg., Democrat-Herald, gave particular force to the arguments Mr. Doerner and his colleagues set forth when it stated that Linn County, one of the 18 western Oregon counties receiving O. & C. payments, would receive more if the land were on private tax rolls than the county currently received. This estimate was completely at variance with the figures I had received earlier in the year from the Bureau of the Budget.

My inclination to look behind the presumed facts set forth in the editorial to the figures on which they were based was reinforced by one obvious error. The editorial stated that payments in lieu of taxes would be limited to \$24.5 million if the Bureau of the Budget recommendation were followed. Actually the Bureau had recommended its ceiling of \$25.5 million some weeks earlier. I then found that Linn County had 86,166 acres of O. & C. land according to a study Mr. Doerner left with me—"The Significance of the O. & C. Forest Resource in Western Oregon"—rather than the 58,932 acres mentioned in the editorial.

The editorial stated that value of the merchantable timber on these acres was \$127,121,170. Yet according to the figures contained in the 28th biennial report—1964-66—of the Oregon State Tax Commission the assessed value of timber on all private land in the State of Oregon was a mere \$104,382,107. Furthermore the assessed value of the timber on private land in Linn County was only \$21,585,800. Yet this land, according to the O. & C. county study, amounted to 515,000 acres.

Making a projection I discovered that if the timber on 58,932 acres in Linn County was assessed at \$127,121,170 then the entire O. & C. resource of 2.5 million acres should contain about \$5.5 billion worth of timber. Yet the return on these lands was not even \$55 million, or 1 percent of this presumed value, this past year.

The figure given in the editorial for tax payments on the O. & C. land's mer-

chantable timber was \$607,312.54. We are told that this figure is based on "the formula assessors use in determining timber taxes." Of course the figure is arrived at by applying that formula to the hypothetical \$127,121,170 at which the merchantable timber on Linn County's O. & C. lands is valued—a figure that exceeds the value of all the private timber in the State.

In any event we can determine the tax per dollar of assessed valuation by dividing the tax into the assessed valuation. It works out to about .00478 cents per dollar of timber, or approximately one-half cent on the dollar. In a similar way it is also possible to find that the tax on the land, as opposed to the timber is about .0465 or approximately 4½ cents per acre. This figure is arrived at by dividing the acreage mentioned in the editorial, 58,932 acres, by the property tax the editorial estimates would come from from these acres—\$2,740.

Using these figures and information contained in the Oregon State Tax Commission's report, we learn that the \$21,585,880 worth of private timber in Linn County on the assessment rolls in 1966-67 would have been taxed at .00478 cents on the dollar or \$1,031,769. Again going to the O. & C. county study, which tells us that there were 515,000 acres of private timber land in Linn County, and applying the tax rate of .0465 per acre we find that the land would have been taxed at \$23,947.50. Adding the figures together we are able to determine that both land and timber taxes on the 515,000 acres come to approximately \$1,055,000, or about \$2.05 cents per acre.

This \$2.05 per acre compares favorably with Dr. Albert Worrell's estimate contained in a 1967 study for the Industrial Forestry Association that land and timber taxes in this area average \$1.73 per acre, varying from 24 cents to \$2.62.

If, in fact, the private forest tax in Linn County is about \$2.05 cents per acre the 86,166 O. & C. acres would have paid only \$180,000 in taxes rather than the \$607,312.54 cited in the article or the \$577,000 actually paid based on 50 percent of O. & C. revenues. Thus the actual payments on O. & C. lands in this instance appears to be over three times greater than taxes paid on comparable private land.

Furthermore, if \$2.05 cents per acre is a representative figure the 7.6 million acres of private timber land in Oregon as given in appendix D of the O. & C. county study would pay approximately \$15 million in taxes while the O. & C. lands, which amount to only 2.5 million acres, paid \$25.5 million to 18 Oregon counties last year and may well pay \$30 million this year unless Congress acts to accept the Budget Bureau's recommended ceiling of a generous \$25.5 million.

In summation, Mr. President, on the basis of the figures presented in the editorial I have referred to, as well as the information left with me by Mr. Doerner and his associates, I feel it would be a substantial mistake to fail to put a ceiling on O. & C. land payments. I intend to continue my fight for such a ceiling.

I ask unanimous consent that the editorial from the Portland Journal be printed at this point in the Record.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Portland (Oreg.) Journal, May 6, 1969]

WHAT'S DUE FROM O. & C. LANDS

Before we will admit there is justice in proposed curtailment of payments by the Bureau of Land Management in lieu of taxes on O&C timberlands to the 18 counties containing them, we should like to know the basis for the U.S. Budget Bureau's curtailment schedule. The federal agency proposes to place a ceiling on BLM payments at about \$24.5 million this year and a continued annual reduction in such amounts as would be necessary in 10 years to reduce payments to what the counties would receive if the timber were privately owned.

This assumes that the counties have a "golden goose" that is laying excessively large eggs—that the O&C lands would yield far less under private ownership than they do now.

What we would like to know is how the Budget Bureau determined what it contends the O&C payments should be.

At our request Linn County Assessor Hal Byer has ascertained what the 58,932 acres of O&C timberlands in Linn County would yield to the county in taxes if they were on the tax rolls. The assessable value of the land was found to be \$153,169. It would have yielded a tax of \$2,740 had it been privately owned. Value of the merchantable timber on this land was estimated at \$127,121,170. Under the formula assessors employ in determining timber taxes it was estimated that Linn County would have derived a tax payment of \$607,312.54. The amount was determined by applying the 1968-69 levy in two code areas or districts selected as typical.

Instead of \$607,312.54 in taxes which the county would have received from private owners of this land Linn County actually received only \$577,000 in BLM payments last year.

These figures, the assessor admits, might be altered if all BLM timber were re-cruised and assessed on the basis of more accurate knowledge than is now available as to board feet of timber per acre on O&C lands, but he is convinced that cruising would show an increase rather than a decrease in the amount of taxable timber and therefore would increase revenues to the O&C counties.

We suggest that a thorough investigation into current true cash values of O&C timberlands be demanded before the 18 counties give up what we are convinced is due them.

ORDER OF BUSINESS

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may be permitted to proceed for 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

EFFICIENCY IN GOVERNMENT AND PPB: SOME PROPOSALS FOR REFORM OF THE BUDGETARY PROCESS

Mr. PROXMIRE. Mr. President, the level of inefficiency in Federal Government expenditure programs is enormous. We seem to be spending our money on low-ranking priorities and even in the management of this spending, we are terribly wasteful.

In recent months, a number of important investigations of inefficiency and waste in the Federal Government have been published. A study by the independ-

ent Congressional Quarterly—June 28, 1968—for example, estimated that \$10.8 billion could be eliminated from the Defense Department budget with no reduction in the level of national security. A report by Richard Stubbings of the Bureau of the Budget, printed in the CONGRESSIONAL RECORD, February 7, 1969, page 3171, presented hard evidence that many of our most costly weapons systems perform at a level substantially below expectation. It also indicated that those systems whose production generated the greatest profits displayed the largest performance shortfall. A paper by Robert Benson in the Washington Monthly, March 1969, presented evidence that a \$9.2 billion reduction in the Defense budget could be achieved without loss of military capability.

Over the past year, the Subcommittee on Economy in Government of the Joint Economic Committee, of which I am chairman, has encountered numerous instances of inconsistent, uneconomic practices in Federal agencies. These have dealt with military procurement matters, the application of discounting analysis to proposed investments throughout the Government, and the procedures for consistently estimating the benefits of Government expenditures. The existence of cost overruns entailing unexpected expenditures of billions of dollars and the construction of public works projects which return far less production for society than comparable private investments are now well documented.

As our economy grows and as the demands of the people on the Federal Government burgeon, it becomes increasingly important that we seriously appraise our priorities and find ways of determining which of our various programs are most effective in attaining our objectives. In my comments, I wish to focus on some of the problems in the executive and, especially the legislative branches of the Government, which impede us in making open, explicit—indeed, rational—decisions. The proposals which I will offer hold out substantial promise for improvements in the budgetary decision process in the Federal Government.

It is now 3½ years since all major Federal agencies were instructed to develop and implement planning-programming-budgeting systems. During this period there has been great activity in connection with program analysis and evaluation and a tremendous amount of discussion and debate. There has not been, however, any systematic look at how the application of these tools was worked out in practice, at what lessons have been learned and what changes made, and what policies should be followed in the future. It is time for the Congress to inform itself on the progress of the PPB System and to consider how the legislative branch can improve its effectiveness in the budgetary process.

THE PPB SYSTEM AND RATIONAL DECISIONMAKING

It should be emphasized that the use of PPB and systematic analysis in the Government is not a partisan issue. While originally implemented pursuant to the instruction of President Johnson, it also is supported by the new adminis-

tration. As Budget Director Robert Mayo has stated, it is now quite clear that any administration needs techniques of program analysis and evaluation if it is to make effective decisions on resource allocation and affirm the objectives of planning, programming, and budgeting.

The absence of partisan dispute over the use of PPB points to the recognition by responsible Government officials that we must be rational in our approach to public policy decisions. For, to use PPB to obtain information about the gains and losses to be anticipated from a decision is to demand no more than that the decision be rational. Properly defined, PPB is the most basic and logical planning tool which exists: it provides for the quantitative evaluation of the economic benefits and the economic costs of program alternatives, both now and in the future, in relation to analyses of similar programs.

Any decisionmaker, whether he be the head of a household or the head of a business firm, must rely on the comparison of the gains and costs of his decisions if he is to be successful at achieving his objectives. To ignore the careful consideration of gains and losses is equivalent to saying that he has no objective at all; no goal which he is attempting to achieve. While the objectives of the Federal Government are less tangible and more complex than those of a household or a business firm, they do exist, and analysis should be carried out to determine which of our alternatives will allow us to satisfy these objectives at least cost. I would add that the very effort of attempting to evaluate alternatives is of substantial assistance in determining what our objectives really are.

I have never been able to understand why we are only now getting around to the task of developing such a system of analysis and evaluation in the Government. It is even more difficult for me to understand why many officials and private groups sometimes object so violently to the application of this logic to public sector choices. Obviously, they themselves demand such information before they buy a new car or trade 15 shares of one common stock for seven shares of another.

THE CONGRESSIONAL BUDGETARY PROCESS

As a Member of the U.S. Senate, I have a strong interest in the potential of PPB for improving decisionmaking in the legislative branch as well as in the executive. This is a very important possibility because, in my view, the legislative resource allocation process is sorely in need of improvement. In a very real sense, the congressional appropriation process is a classic example of an inexplicit, closed, and uninformed decision process. I am not arguing that the executive budgetary process is perfect, or even that it is, in fact, very good on any absolute scale of values. But it is both informed and open compared with the budgetary process which exists in the legislative branch.

In the Congress, with its appropriations committees and subcommittees, there is very little explicit consideration of program objectives or trade-offs, of alternative means of attaining objectives,

or of the benefits and costs of budget proposals this year and in the future. In short, Congress does not really give the budget a meaningful review because it fails to ask the right questions.

Perhaps the primary reason for this is the traditional policy of executive branch dealings with the Congress. The executive branch comes to Congress with only one budget, with only one set of program proposals, and typically with no quantitative information on the benefits and the costs of even their own proposals. In fact, the only program area in which the Congress is presented with substantive cost/benefit evaluation information is that of water resources development. Since the Flood Control Act of 1936, project proposals in this area have been accompanied by a benefit/cost ratio. This number enables Congressmen and Senators to get some sense of the economic value of the choices which they are making and of the implicit costs involved when they choose to accept a project with a low benefit/cost ratio despite the fact that one displaying a higher ratio is available. Even so, the usefulness of these analyses has been impaired by the use of artificially low discount rates in computing the present values of benefits over time. This has made bad projects look far better than they should.

A second reason why the Congress has performed so badly in the budgetary and appropriations area has to do with the interests of Congressmen and Senators. Many in the legislative branch have little interest in or patience for careful deliberations on budgetary matters. The careful consideration of alternatives requires much effort and concentrated study of the relative merits and demerits, the costs and the gains, of alternative policy proposals. This is hard and grubby work. Those not used to thinking in such terms find it easier simply to rely on the executive agencies. Unfortunately, these agencies are often more interested in selling their programs, regardless of merit, than in having Congress analyze them.

A final reason for Congress poor performance in this area is the severe staffing constraints under which the legislative branch operates. Currently, we do not have the staff either to interpret or to evaluate the analysis done by the executive branch were it presented to us, nor does Congress have the staff to do policy analysis of its own. Indeed, in my judgment, this is one of the primary barriers to the ability of the Congress to fulfill its mandate as controller of the public purse. Dr. Jack Carlson, who is Assistant Director of the Bureau of the Budget, stated this well in his recent testimony before the Subcommittee on Economy in Government:

You (the Congress) have some outstanding people who can provide (program) evaluation, but very few. I frankly think that Congress is not very well equipped to provide that evaluation.

THE EFFICIENCY CONSEQUENCES OF THE COMMITTEE STRUCTURE

Even if the interest and the staff existed, though, there would still be substantial organizational problems which would impede the development of an effective public expenditure decision process. The primary difficulty is the committee structure. In considering appro-

priations requests from the executive, both the House and the Senate organize themselves into appropriations committees and subcommittees with each subcommittee having control over a particular portion of the budget. The subcommittees consider the executive's proposed budget, deliberate on it, perhaps amend it, and ultimately report out an appropriations bill. The structure of this arrangement is such that the powerful people on the appropriations subcommittees—the chairmen—almost inevitably desire increases in the budgets which they oversee. They are not interested in careful scrutiny and evaluation of their own budgets. Other budgets should be cut, of course, but everyone knows that defense—or agriculture, or space, or public works, as the case may be—is "absolutely necessary" to the further growth and prosperity of the Nation.

My experience on the steering committee of the Democratic Party confirms all of my misgivings on this matter. In the deliberations of this committee, which assigns the Democratic membership to the available committee vacancies, there are enormous pressures to place those Senators whose States benefit from, let us say, public works appropriations on either the Senate Interior Committee or the Public Works Subcommittee of the Appropriations Committee. In fact, a Senator who is from a State which benefits substantially from these programs is at least in the short term rather clearly serving his own best interests and those of at least some of his constituents if he attains a seat on one of these committees. The net result of all of this, however, is that the committee structure develops a built-in bias toward higher budgets. Because the people who serve on each committee have an interest in seeing the budget for which they are responsible increase, they often fail to encourage careful evaluation and analysis of expenditures.

An example of the bias which results from this process is clearly seen by observing the State membership of the Senate Committee on Interior and Insular Affairs. The Democratic members on that committee are from Washington, New Mexico, Nevada, Idaho, Utah, North Dakota, Wisconsin, Montana, and Alaska. The Republican membership is from Colorado, Idaho, Arizona, Wyoming, Oregon, Alaska, and Oklahoma. With the exception of my able colleague, GAYLORD NELSON, there is no Senator on this committee representing a State east of the Mississippi River. A similar kind of situation holds in the Public Works Subcommittee of the Senate Appropriations Committee. The Democratic membership of this committee represents Louisiana, Georgia, Arkansas, Washington, Florida, Mississippi, Rhode Island, Nevada, West Virginia, and Wyoming. Again, a substantial concentration of Senators from those Southern and Western States which receive major water resource appropriations. Much the same is true with the Republicans on that subcommittee, although I should add that at least two of these are from the Eastern States—Maine and New Jersey.

Largely as an outgrowth of this built-in committee bias, the relationships between the staffs of the committees and

subcommittees and their counterparts in the executive agencies is hardly one of arms-length dealings. The degree of mutuality of interest between the executive staff and those on legislative branch committees is substantial. I would add that this problem is not peculiar to legislative-executive relationships. The serious collegiality between Budget Bureau examiners who work on the military budget and their counterparts in the Pentagon has recently been the cause of much concern.

TOWARD AN IMPROVED APPROPRIATIONS PROCESS

Given the institutional constraints which inhibit change in this situation, is there anything which can be done to improve the congressional budget-making process? In my judgment, there are a number of important steps which can be taken. Many of them entail bringing to bear additional PPB-type information on the appropriations process. Congressmen and Senators who are concerned with national priorities and efficiency in Government must have the information and data necessary to raise and debate the right basic questions about program effectiveness and worth.

BUILDING A CAPABILITY TO ASK THE RIGHT QUESTIONS: THE FIRST STEP

The most basic and elementary step which the Congress needs to take in improving the appropriation process is to develop a capability to ask the right questions. Whether this means a substantial increase in staff capability or a special office of budgetary analysis or an increase in the PPB capability of the General Accounting Office is not clear. What is clear, however, is that the Congress cannot respond to the demands of the people, cannot establish proper national priorities, cannot improve the quality of its decisions, cannot properly scrutinize the executive budget unless it equips itself to ask the right questions.

The right basic questions as I define them are those having to do with the outputs of a program and its inputs and the economic values of each. They are questions concerning the total costs of program decisions, and not just the given year costs. They are questions having to do with the distribution of a program's costs and benefits among the people. We must, for example, determine the economic losses which will be sustained—or gains which will be foregone—if program X is reduced by 10 or 50 percent, or increased by 10 or 50 percent.

The following are a few examples of the kinds of questions which I have in mind:

What are the real national security costs of removing Southeast Asia from the primary defense perimeter and what are the budgetary savings from its removal? On the basis of very little evidence and information, I am inclined to say that the costs of removing Southeast Asia may well exceed the value of the budgetary savings which we would experience. However, I cannot make a rational decision on this matter, nor can my colleagues in the Congress, unless we have the best analysis available on the costs and gains of such a policy alternative.

What would be the national security impact of a 30-percent reduction of total

U.S. ground forces, and what would be the budgetary savings from this reduction? The article in the *Congressional Quarterly** which I referred to earlier, claimed that \$10 billion could be cut from the defense budget with no loss of national security effectiveness. Over 50 percent of this suggested \$10 billion cut was in the area of manpower. The efficiency of the Department of Defense in the handling of manpower policy is very low. Indeed, the national security costs of reducing ground forces by 30 percent may well be zero. In any case, it is evidence—data and information—on the costs and gains of that sort of decision which Congress requires if the level of rationality is to be increased.

What are the total costs of adding a nuclear carrier force with all of its required support to our existing 15 carrier complex? What would be the gain in national security? How much elementary and secondary education could we purchase for the dollar cost of the new carrier?

What national economic benefits would the Nation sacrifice and what national costs would it avoid, if the Trinity River project is not constructed? This project involves the creation of a channel from Dallas-Fort Worth to the Gulf of Mexico. Some observers have argued that it would be cheaper to move Dallas-Fort Worth to the Gulf than the construct this channel.

What benefits are available from manned space flights that are not available from unmanned flights? What are the incremental costs of manned over unmanned flights? The space agency is now asking us for funds for 10 moon landings and for the exploration of still additional planets. Those planets are going to be there 10 years from now, or even 20 years from now. On what basis can we justify the current expenditure of these funds in view of the other social objectives which we could attain if these funds were not allocated to the space program? Moreover, some scientists believe that all of the information that we need from space flights can be obtained from unmanned flights, that manned flights are not necessary for this purpose. We need hard analysis of this decision.

What are the real costs to the American economy of specific protectionist measures that are sought by industry, such as the oil import program? What, in hard economic terms, do similar measures by other countries cost us? Such information is essential for effective bargaining.

How much do we spend to maintain a military capability to keep open important transportation bottlenecks, such as the Panama Canal, Gibraltar, or the Strait of Malacca? What costs would be incurred if such bottlenecks were not open?

What is the relationship between resources put into Federal criminal investigation, prosecution, and judicial activities and the outputs of those activities in terms of cases actually processed? What are the benefits obtainable through Federal payments for increasing the number of State and local law enforcement personnel versus those obtainable from increasing the support available to

existing personnel? In particular, to what extent are trained police officers now used less than optimally because of a lack of subprofessionals, dictating equipment, vehicles, cameras, or other fairly elementary support items?

Which policy of preschool education produces greater benefits: a policy which is going to reach all poverty children to at least some extent, or a program of intensive work with fewer children? What economic losses will be incurred in the future—in terms of loss of productivity and increased welfare costs—that could be prevented by child nutritional and health care programs? How do the benefits available from such programs compare with the benefits available from further extension of the Medicare program? For each type of program, upon whom would the costs and benefits fall or accrue?

What are the costs and benefits involved in the construction of mass transit systems in cities which do not presently have them? What should be included in our calculation of benefits, and how accurate can we be in our judgments? In the Northeastern United States, are the costs of constructing a high-speed ground transit system for intermediate intercity journeys less than those of constructing additional airport capacity?

What is the likely yield from the Government's investment in fast breeder reactor R. & D. and how does it compare with the return that the relevant private sector would demand? Are there possibilities for international cooperation that would avoid the overlap between this work and similar work in other countries?

These are the kinds of questions that Congress needs to ask, and for which responsible executive branch agencies must develop and supply answers. In my judgment, concerned Congressmen and Senators can reduce much gross waste from our budgets if we can first develop enough information to ask the right questions, and second, have the cooperation of the executive branch in getting answers.

In this same vein, it seems to me that the current ABM discussion which is going on in the Congress is one of the few examples of careful policy analysis by the legislative branch. It is a case in which Congress—the whole Congress—is asking the right questions about the benefits which will be achieved from this decision, about the costs which it will entail. As in good policy analysis, the question of objectives is being explicitly discussed and the interrelationships between the program proposal and the attainment of objectives is being investigated with some care. It is my belief that with more PPB-type information, the Congress can do this kind of policy analysis on increasing numbers of issues and expenditure proposals.

GAINING ACCESS TO APPROPRIATE DATA AND ANALYSIS: A SECOND STEP

In addition to developing the capability to ask the right questions, the Congress needs to be provided with certain basic kinds of PPB-type information on an ongoing basis. The executive branch must be asked to develop this information and submit it to the Congress in ap-

propriate form. The Bureau of the Budget must assume the leadership in this effort. Let me describe a few specific kinds of information which are essential to a more open and explicit congressional decision process.

OVERVIEW INFORMATION

The first items of analysis and data I will call overview information. We need a display of each program in the Federal budget and an estimate of its benefit-cost ratio—that is, the efficiency impact of that program. We also need information on the distributional pattern of project outputs by income level, race, and geographic location—its equity impact. This information is often as important to those of us in the legislative branch as is the efficiency information. We can frame good policy only if we have knowledge of who we are helping when we appropriate money and who is bearing the cost. Even though many of these estimates would have to be rough, they would generate a major improvement in the appropriation process by giving Congress a better perspective on the probable impacts of these public expenditures. I urge the agencies to develop this kind of information, and I urge the Bureau of the Budget to collect and supply it to the Congress for individual programs and in summary form.

BUDGET PROJECTIONS

A second body of information which Congress requires is out-year budget information. For each program, what are the expenditures to which we are committed over the next 5 years because of decisions which we have already made? For each new program proposal, what are the total 5- or 10-year costs entailed by the decision? An example of what happens when we do not have this kind of information is the Higher Education Act of 1965—Public Law 89-329. In this legislation, we provided thousands of student scholarships for the first year without really recognizing that to maintain our commitment the funding would have to double in the second year, triple in the third year, and quadruple in the fourth. By keeping the program at its present level, and refusing to honor the implied commitment, we have placed college and university administrators in an impossible position. They now either have to reduce the scholarship aid for the class which entered school last year, or they have to eliminate completely scholarship aid from this source for students currently entering school. If Congress had been oriented toward explicit consideration of the future costs of present decisions, I think it would have avoided this bind.

I urge the executive branch to formulate a framework and procedure to develop this out-year budget information across the Federal budget and to present it to the Congress. Moreover, I would propose that the President use the out-year budget framework which is developed to convey his budgetary priorities to the Congress. The numbers which he would place in the appropriate slots in this framework would not commit him, and would change over time. However, they would show the level of program outlays for which commitments have already been made as well as the budgetary areas to which the President would like

**Congressional Quarterly*, June 28, 1968.

to see uncommitted funds devoted. They would give the Congress an ongoing description of how the President hoped to allocate the Federal budget over the next several years and how much discretionary room remains in the budget if existing laws remain unchanged. They would give the Congress a bird's-eye view of the executive's plans and priorities. I would hope that the Bureau of the Budget could play the leadership role in developing this information.

QUANTITATIVE ANALYSES OF ALTERNATIVES

The final type of information which is essential to improvements in Congress' performance of its budgetary function entails the quantitative economic analysis of alternatives.

As stated earlier, when the administration comes to Congress with a new program, it typically comes with a single recommendation. If Congress is to carry out effectively its decisionmaking role, it must do more than simply accept or reject an administrative recommendation. The Congress needs to be presented with a number of alternatives which would achieve a given objective. These alternatives should be accompanied by quantitative analyses of the benefits and the costs of each. It is only slightly less than absurd that the Congress is expected to participate meaningfully in the policymaking process when it is not asked to consider alternatives, but only to approve or disapprove or to amend slightly at the margins. This problem is especially severe in the area of defense spending and military budgets. The development by the executive branch of a policy to provide the Congress with more alternatives and more benefit and cost information will, I suspect, not occur overnight. Current policies are rooted in the concrete of both tradition and realistic gamesmanship. Nevertheless, it is something that we should work hard to change.

THE FURTHER DEVELOPMENT OF PPB

All of these improvements in PPB in the legislative branch are tied to the further development of the PPB system by the Executive.

As is obvious, I am a strong supporter of program analysis. I also think the efforts that have been made recently to strengthen the process are important. In particular, the narrowing of the number of issues which receive special analytic attention was an important step, as is the insistence that these issues deal with the larger budget questions. Hopefully, agencies will be able to respond with more quantitative and more pointed analyses on the reduced list of issues. I also support the goal of increasing the role of agencies in the PPB process.

In my judgment, of high priority to the further development of PPB systems is the issuance by the Bureau of the Budget of a number of guideline documents to insure consistency in the economic analysis of public expenditures applied throughout the Federal Government. Last year, the Subcommittee on Economy in Government, of which I am chairman, learned of the enormous divergence in the discounting analysis of public investment programs, ranging from rates of zero percent in some programs to 20 percent in others. In testi-

mony before the subcommittee, we learned from reputable economists that the discount rate to be used by public agencies should be at least 8 percent. This would eliminate the economic waste of diversion of resources from the private sector, where they are producing at least this return to the public sector where, if rates of discount lower than this are applied, they will be likely to produce less. As stated earlier, I am well aware that the equity aspects are as important as the efficiency ones. However, one should not think that programs with low rates of return automatically produce equity, because they do not. Nor do I doubt our ability to find programs which meet both sets of criteria.

In the report of the Subcommittee on Economy in Government, we recommended that: First, the Bureau of the Budget should require all agencies to develop and implement consistent and appropriate discounting procedures on all Federal investments entailing future costs or benefits; and second, the Bureau of the Budget, in conjunction with other appropriate government agencies, should immediately undertake a study to estimate the weighted average opportunity-cost of private spending which is displaced when the Federal Government finances its expenditures. In response to these recommendations, the Bureau of the Budget has assured us that it is developing procedures for insuring consistency in discounting practice across the Federal Government. I am anxious to see how the committee recommendations are going to be implemented by the Bureau and Federal agencies.

On the basis of recent hearings before the Subcommittee on Economy in Government, I judge that Federal Government practice in benefit estimation is also extremely disparate. The issuance of a guideline document on the procedures for benefit estimation is necessary. We need to develop a consistent concept of program benefits viewed from a national accounting stance. We need to establish a consistent procedure for handling benefits such as regional effects and secondary impacts, which are not appropriately considered from a national economic viewpoint.

In addition to increasing the role of consistent analysis through the issuance of guideline documents, the executive branch should build explicit procedures for the ongoing evaluation and appraisal of programs into new and experimental social programs. The Congress should require that provision for ongoing evaluation be included in appropriations for these programs. We know little about the kinds of inputs and program structures which will yield the outputs we desire and if we ever hope to generate improvements in programs in the areas of education, health, labor retraining, and so on, we must have follow-up evaluation. This information must be available to Congress on an ongoing basis as these programs evolve.

Finally, we need a new budget analysis which breaks down and evaluates the economic impact of tax expenditures, as well as direct expenditures. In testimony before the Joint Economic Committee, Joseph Barr, former Secretary of the Treasury, pointed out that the special

provisions, exceptions, and deductions in the Federal tax structure cause an enormous reallocation of the Nation's resources. The volume of these tax expenditures is huge; in some of the functional categories of the Federal budget they outweigh direct expenditures. So far we have little analysis of these expenditures; we know very little about the kinds of outputs which they are producing, and the kinds of resource diversions they entail. The Federal budget should include information on these items, as well as the information which it currently includes.

As a recent UPI article by Louis Casells states:

Tax expenditures are not subject to careful annual scrutiny in the budget and appropriation process and are not reviewed annually or periodically to measure the benefits they achieve against the amounts expended.

The tax provisions which now involve an annual revenue loss equivalent to one-fourth of the total federal budget have built up piecemeal over many years, sometimes in response to social and economic needs, and sometimes as concessions to potent political or lobbying interests.

If they were translated into open cash subsidies, which had to be voted by Congress each year, it is highly questionable whether some of them would survive.

But present budget procedures tend to hide them from public attention, so that they remain in effect year after year, with little or no debate about their merits except in the comparatively rare instances when the House Ways and Means Committee undertakes to write a tax reform bill.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries.

MESSAGE FROM THE PRESIDENT— APPROVAL OF A BILL

A message in writing from the President of the United States was communicated to the Senate by Mr. Leonard, one of his secretaries, and he announced that on May 15, 1969, the President had approved and signed the bill (S. 1130) to provide for the striking of medals in commemoration of the 100th anniversary of the founding of the American Fisheries Society.

AMERICAN CASUALTIES IN VIETNAM

Mr. BYRD of Virginia. Mr. President, the figures for American casualties last week in Vietnam have just been announced. In that 1 week 430 Americans were killed and 2,185 Americans were wounded, which makes a total for that 1 week of 2,615. To put that figure in perspective, Mr. President, during all of 1968 the average weekly casualty rate for Americans in Vietnam was 2,040. Therefore, one can see that the casualties this past week are extremely high.

Mr. President, from the beginning I have felt that involvement by the United States in a ground war in Vietnam or a ground war in Asia was a great error of judgment; but that since our country decided to draft men and send them to Asia to fight, I feel we must give them

full support. That is why I wish to emphasize and reemphasize the severe casualty figures in the hope that it will focus attention on the difficulties facing our troops in Vietnam.

Almost weekly for more than 3 years I have been calling attention to the severe casualties being suffered by our troops in Vietnam. I think it worthwhile today, almost on the anniversary date of the beginning of the Paris talks, to consider what has happened during that year. If we go back a moment to April 1, 1968, that was the date that President Johnson restricted the bombing of North Vietnam. That was less than 14 months ago. Now what has happened in Vietnam since that time?

From April 1, 1968, through May 17, 1969, 13,891 Americans have been killed and an additional 98,085 have been wounded.

Totalling those figures shows that during the period when President Johnson restricted the bombing and, subsequently, in October cut out all bombing of North Vietnam, the United States suffered 111,976 total casualties.

The significance of that figure shows that during that period, 42 percent of the 262,344 casualties which the United States has suffered in Vietnam during the long history of the war, occurred since the bombing was restricted on April 1, 1968—less than 14 months ago.

Mr. President, in commenting on the bombing, a greater tonnage of bombs has been dropped during the Vietnamese war than was dropped on all of Europe during World War II plus all the bombs dropped during the Korean war.

But where were those bombs dropped? Only 7 percent of that great tonnage of bombs dropped was on North Vietnam. About 80 percent was on South Vietnam with the remainder on the Ho Chi Minh in Laos.

Mr. President, during the past 3½ years, I have invited the attention of the Senate almost weekly to the casualty figures coming out of the war in Southeast Asia.

I suggest again that I think it is so important we develop a sense of urgency to bring the Vietnam war to a close.

The figures show that during the year of the Paris peace talks—slightly more than a year—virtually nothing has been accomplished in Paris, yet American casualties have continued and, in many cases, they have increased.

I cite again the casualty figures from last week. They totaled 2,615 as compared with the average weekly casualty rate during all of 1968 of 2,040.

I cite again the total casualty figures suffered by the American people in Vietnam since President Johnson restricted the bombing on April 1, 1968. That figure is 111,976 from the period April 1, 1968, through May 17, 1969.

APPOINTMENTS TO 30TH SESSION OF INTERGOVERNMENTAL COMMITTEE FOR EUROPEAN MIGRATION

The PRESIDING OFFICER. On behalf of the Vice President, the Chair appoints the Senator from Ohio (Mr. YOUNG) and the Senator from New York (Mr. JAVITS)

to the 30th session of the Intergovernmental Committee for European Migration to be held in Geneva, Switzerland, beginning May 21, 1969.

THE GENERATION GAP AND THE CAMPUS

Mr. MANSFIELD. Mr. President, with respect to the relationship between the generations, there has been increasing concern expressed in various segments of our society. There have been serious difficulties among young people, to be sure, but there has also been a good deal of fanaticism in reaction. In this situation, there is no justification for pomposity on the part of the older generation any more than there is for anarchism on the part of the younger generation.

That there is a gap between the old and young is an inescapable biological reality. Nothing can be done about that except to accept it. That there is a lack of credibility or of mutual tolerance of ideas between the generations is also a fact. That difference, too, has a certain inevitability; down through the generations, it has been more the norm than the abnorm between old and young.

We need only go back, in all honesty, to our own younger days to sense the similarity between past and present. There were strains and tugs then as there are now. The principal difference is that we who are older, now, were younger then and were doing most of the straining and tugging.

The older generation has its faults which, in my judgment, tend to center on a shirking of responsibilities toward the young who, in their own way, for better or for worse, are striving to grapple with a world which they did not make. The faults of the younger generation, in turn seem to me to center on a tendency to reject whatever has gone before as, at best, irrelevant. On the part of the mini-minorities, moreover, there is an apparent determination not merely to reject the past but to rampage over past, present, and future and reduce them all to a rubble heap.

What is needed is a realistic appraisal of the situation. The present generation of youngsters was born into a world which they did not make and which we elders helped to make. These kids are not to be dismissed as some sort of monsters from another planet. They are, after all, our progeny. If we start from that point, perhaps we can bridge the gaps between the generations with a degree of honesty and humility, even if we cannot close them.

I would also have the temerity to suggest to young people that they resist the temptation to blame everything on the previous generation. Those of us who are older should, in turn, act our age and stop the flatulent berating of youngsters when we ourselves are not without blame. Young people have to make their own lives. They have to find a way to face the responsibilities which go with life. They have to make and correct their own mistakes along with the accumulated mistakes of the past and, in that way, to come forward, as we tried in our turn to do, with a responsible and reasonable way of life of their own.

With particular reference to the present unrest on a small minority of the Nation's college campuses, it is my belief that the following criteria should be used:

First. The Federal Government should, if at all possible, not become involved in the settlement of campus disputes.

Second. As far as peaceful demonstrations, dissent, and petitions are concerned, they are entirely lawful and guaranteed to all our citizens under the Constitution; as far as violence and license are concerned, they are contrary to the law of the land and, therefore, are punishable. The law must be upheld and the punishment made to fit the crime and this punishment should be applicable to all our citizens on or off the campus.

Third. The universities of the country have rules and regulations, the enforcement of which is their responsibility. They also have penalties such as suspension and expulsion to use should these rules and regulations not be adhered to.

Fourth. The administrators of the universities and colleges as well as the students and the faculty are, in effect, in the process of passing through permanent institutions. The institutions and the maintenance of their effectiveness ought to take precedence over the predilections of any transient or group of transients.

Fifth. Congress passed an amendment to the Higher Education Act in 1968 which gives authority and responsibility to administrative officials of the universities and which was designed to assist in restraining violence and license.

To the best of my knowledge, no administrator in any college which has been subject to violence and license by students has seen fit to put this amendment into operation even though the authority to do so rests with them.

It is my further understanding that the reason that this has not been done is that the administrative authorities of the colleges have indicated that they do not believe this amendment is constitutional. I can only say that if that is the principal basis for their reticence, they should take the matter to the courts and get a ruling as to whether or not it is constitutional.

Sixth. On the other side of the coin, the responsibility for listening to and heeding legitimate grievances and maintaining law and order is the prime responsibility of the colleges themselves and this includes not only the administrators but the faculties and the student bodies as well.

Insofar as all generations are concerned, we should face up to the difficulties which confront us today. Our most profound obligation—young and old—is to keep this society, this Nation, and this world livable not only for ourselves but for those many generations which will come after us.

GIFT TO SUPREME COURT OF WRITINGS OF LATE JUSTICE BURTON

Mrs. SMITH. Mr. President, this past Monday there was a ceremony at the Supreme Court of the United States that held significant interest to many people

in Maine. It was the ceremonial occasion of the court's acceptance of the gift made to it by the family of the late Justice Harold H. Burton of Justice Burton's writings.

Justice Harold H. Burton served on the Supreme Court from 1945 to 1958 and sat with the U.S. Court of Appeals in the District of Columbia until his death in 1964. The book of Justice Burton's writings was offered by William S. Burton, of Cleveland, an attorney and son of the Justice.

Many citizens of Maine have great interest in this matter, since Justice Burton was a graduate of Bowdoin College, of Brunswick, Maine. The book was edited by another graduate of Bowdoin College, a man long associated with the Supreme Court as its Assistant Librarian—Edward G. Hudon of Brunswick, Maine, a distinguished scholar with five earned degrees, including a doctorate.

I have a great personal interest in this event because it was my privilege to have been a good friend of the late Justice Burton and to be a good friend of Mrs. Burton—and Dr. Hudon is the husband of Mrs. Blanche B. Hudon, who was my right hand for so many years as my personal secretary.

This ceremonial occasion came at the first of a week which marked a beginning of restoration of public confidence in the Supreme Court. For when President Nixon chose Judge Warren Earl Burger to be the next Chief Justice of the United States, he made an excellent start on the rehabilitation of the Supreme Court.

THE SERIOUS CONDITION OF THE U.S. BALANCE OF PAYMENTS

Mr. SPARKMAN. Mr. President, among the enduring concerns which I have had over the years are that the United States maintain a strong balance-of-payments position, and that the base of U.S. companies participating in international commerce be broadened to include the many talented firms of the small business community.

About 5 years ago, we in the Senate detected threats to both of these objectives, and commenced investigations within several committees to see what could be done.

With the passage of time, I have become increasingly worried about the deterioration of the U.S. trade account, which was once the anchor of our international payments position. The following table reflects the decline of the U.S. trade surplus in recent years:

U.S. merchandise export account ¹	
[Net, in billions of dollars]	
Year:	
1964	+6.676
1965	+4.772
1966	+3.658
1967	+3.483
1968	+1.029

¹ Statistical Abstract of the United States, 1968, House Document No. 206, 90th Congress, Table No. 1198, Balance of Payments: 1960 to 1967. Comparable figures for 1968 from "Highlights of U.S. Export and Import Trade," U.S. Department of Commerce, No. FT 990, February 1969, p. 3.

In 1969, the prospects appear to be worse instead of better. Even the terms of discussion seem to be changing from "trade surplus" to the "trade deficit."

In the first quarter of 1969 the Census Bureau reported a deficit of \$68.1 million of imports over exports. Although there were 4 months during 1968 when the country experienced such deficits, this was the first full quarter of deficit since the start of the Korean war.²

It is common knowledge that there have been overall balance-of-payments deficits for 17 of the past 19 years. With the shift of our trade account from healthy surplus to a quarterly deficit, however, this matter has become more serious.

As a consequence, both Government and private commentators have publicly predicted very large overall balance-of-payments deficits for this year.³

PROSPECTS BEYOND 1969

The longer term perspective, it seems, is no more comforting. In mid-April, the Department of Commerce published a 5-year "outlook" for world trade.⁴ I would like to commend the Department for this publication. When the Small Business Committee commenced its investigations in 1964 and 1965, one of the first things we requested was a long-term 5- or 10-year program from the Department of Commerce and other agencies. It is logical that the basis for such a program would be some idea of what would happen during the years when such a program would be running course. Thus, the 5-year outlook is a significant step forward. I am gratified that the Department is being responsive in this area of its responsibilities.

Turning again to the subject matter, the position of the Commerce Department, as stated in this report and other documents, was reported by one newspaper as follows:

As summarized . . . (the Department) suggests that the United States may be doing well if in 1973 it can attain the relatively modest export surplus of \$1.2 billion. Other projections in the study foresee shifts in the trade balance by 1973 to deficits (between) \$1.2 to \$1.8 billion.

A \$1.2 billion export surplus (is) expected to require considerable promotional effort . . .⁵

Mr. President, this is indeed a gloomy forecast. It confirms the worst fears that many of us in the Senate had in this matter.

Still, I believe that it is better to know of the problems we must face. We can then proceed to work together for their solution. There is wide agreement, I feel, that fundamental steps must be taken to

improve the balance of payments at an early date.

An official publication of the Commerce Department puts it this way:

The surplus on non-military merchandise trade declined \$3.4 billion (during 1968) to a mere \$100 million . . . The extraordinary deterioration in the merchandise trade balance . . . is not likely to be repeated . . . But this would not mean a return to the sizable trade balances of the (past) several years.⁶

As the Outlook report states: considerable promotional effort will be required.

The editorial voice of an experienced international bank pinpoints the need for action:

In particular, the United States needs to give high priority to improving its trade accounts. It cannot safely depend on volatile capital flows or on restraints on overseas lending and investment to shore up a sagging payments structure.⁷

ACTION SHOULD BE TAKEN

We in the Congress have been attempting to encourage such action. The results of our investigations have been made available in a stream of hearings, reports, and statements over the past several years.

Many of the main lines of action have already been marked out. Some departments, agencies, and business organizations, as we have seen, have begun to respond.⁸

On May 8, I reintroduced one piece of legislation, S. 2079, offering some possibility of favorably affecting the balance-of-payments situation—CONGRESSIONAL RECORD, page 11804. A second bill, S. 2190 was reintroduced on May 15. Others will follow.

However, I urge all of those concerned not to wait for congressional recommendations before doing what needs to be done. The need has been great for quite a while.

We in the Senate have limited resources in the area of trade expansion, and responsibilities which from time to time extend to other matters. We have hoped that the executive branch, the independent agencies, and the major business organizations would go ahead with the steps that many experienced and knowledgeable people acknowledge are required. It is much to their credit to initiate these changes in advance of a congressional report.

Mr. President, I have outlined some of the steps which we in the Senate have taken to make the Nation aware of the gravity of our balance-of-payments problems and have touched upon a few of the recommendations which we are making in an attempt to improve matters.

As in the past, we will continue to do all that we can to increase the opportunities for small, regional, and all American business to increase their in-

ternational markets, and correspondingly bolster the U.S. balance of payments.

UNITED STATES TRAILS SOVIET IN EXOTIC POWER

Mr. MANSFIELD. Mr. President, I ask unanimous consent to insert in the CONGRESSIONAL RECORD a copy of an article which appeared in the Business and Finance section of the New York Times on May 18 under the headline "United States Trails Soviet in Exotic Power."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES TRAILS SOVIET IN EXOTIC POWER (By Gene Smith)

LOS ANGELES.—The Russians have a word for it, and so do we. Scientifically it's known as magnetohydrodynamics (MHD).

It's one of several promising methods that are being carefully evaluated to determine the eventual successor to the tried and true systems of generating electricity—namely, steam generation by fossil fuels (coal, oil and gas) and water power.

EXPERIMENTAL WORK

The more promising challenges include: thermionics, thermoelectricity, electrohydrodynamics, fuel cells, fusion and MHD. The present evolutionary step is nuclear-fueled power which is in reality steam generation coupled with nuclear fission to supply heat to produce steam.

The breeder reactor, which produces more fuel than it consumes and is not expected to become practical until the mid nineteen-seventies at the earliest—is basically just a variation of existing pressurized water and boiling reactor water concepts.

Meanwhile, experimental work goes on around the world. Few would question that the leadership in nuclear power rests in this nation, a comforting thought in light of ever increasing demands for energy. But it is equally important to know where the United States stands in the race for development of the newer methods and when there will be a major breakthrough.

Joseph C. Rengel, executive vice president for nuclear energy systems at the Westinghouse Electric Corporation, in a discussion of all major methods, concluded that "Miss Nuclear Power is not easy to displace; Miss Fuel Cell has some promise, but Miss MHD is a long way back." He dismissed each of the other methods as well beyond reach of serious consideration at this time in an address to a forum on future power in mid-February in Washington, D.C.

More recently at a symposium on engineering aspects of MHD at the Massachusetts Institute of Technology, it became clear that the Russians are well in the world lead in the development of MHD. The top Russian scientist, Dr. Aleksandr Sheindlin, said he personally believed that thermionics and fuel cells are not in the proper perspective to large scale power developments, thus echoing Mr. Rengel's diagnosis.

An MHD generator somewhat resembles a rocket nozzle or a piece of pipe. Electrodes are imbedded in the walls of the pipe, which is placed between the poles of a powerful electromagnet. Hot gas from the combustion chamber or a nuclear reactor is forced through the pipe at high speed, butting the magnetic lines of force, which generate current in accordance with physical laws of induction. The current is picked up by the electrodes and then flows into a power distribution system.

LACK OF DISCUSSION

The theory comes under the same physical laws that govern the operation of conven-

tional generators and turbines, but it has certain inherent advantages, chief among which are: the ability to handle extremely high temperatures, the ability to handle power levels of much greater magnitude and the fact that there are no moving parts.

In an interview after the M.I.T. meeting, Dr. Sheindlin said he felt that in this country there seems to be a lack of careful discussion of the other methods of power generation besides nuclear.

"In your country, nuclear power has a great potential for many years, but so does conventional power from fossil fuels and there will be equally important applications so long as fossil fuel still accounts for a large part of your over-all power generation," he said, adding:

"Look how orders for nuclear power have fallen off even in this country this year."

THEORIES CONFIRMED

Only last Wednesday was Westinghouse able to announce receipt of the first order this year for a large nuclear power plant. The 800,000-kilowatt unit was ordered by the Alabama Power Company.

Dr. Sheindlin said he expected to be able soon to place in operation a pilot MHD plant with a total capacity of over 75,000 kilowatts, of which the MHD generator would account for some 25,000 kilowatts.

"We are at that state of development where our knowledge is such that without a practical test we do not know exactly what the future limits will be," he said.

The Russian scientist was equally pleased to report that the work of the leading American MHD scientist, Dr. A. R. Kantowitz of the Avco Research Laboratory in Everett, Mass., had confirmed many of his own theories.

"Dr. Kantowitz has suggested that large capacity MHD peaking stations would cost significantly less than conventional units. He also pointed out that such plants could be started up in a few seconds and would, thus, have great significance on electric systems now in use. We intend to report this to our Soviet colleagues," Dr. Sheindlin said.

Dr. Kantowitz warned a House subcommittee in March, 1968, that "without your enthusiastic support, the United States, which was privileged to first create the promise of MHD, is now and will continue to fall behind the other leading countries where MHD has vigorous government support."

He called for funds to develop a 30,000-kilowatt pilot plant and pointed out that MHD could save this nation a billion dollars a year based on the present rate of energy consumption due to the 50 per cent or better efficiency of MHD plants.

THE FUEL CELL

He also stressed the fact that MHD plants would result in a dramatic reduction in thermopollution of water bodies as well as air pollution. Through 1968, the Avco Corporation, working with a group of electric utilities had spent \$8-million to reach the technical competence for the nation, only to reach the point where Dr. Kantowitz predicted that MHD machines of the future would bear the "made in Japan" or "made in the Soviet Union" labels.

Much more attention has been paid to the fuel cell, which is a device consisting of a positive and a negative electrode and an electrolyte that converts chemical energy directly into electric energy, thus eliminating heat engines and electromechanical generators. Those who backed fuel cells see in them the often-promised "little black box" that supplies all the power needs for each house and building.

Fuel cells have been given strong impetus by the nation's space program and have reaped the attendant publicity of the space age. The Columbia Gas System, working with the Pratt & Whitney Division of the United

Aircraft Corporation, has been experimenting since 1961 with a natural gas fuel cell.

Officials of the gas company feel that such cells might become economically competitive and reliable by 1975. A large group within the gas industry has now joined in a \$21-million, nine-year program to see whether this may come true.

There are more companies involved in this phase than in any of the other new systems. Chief among the would-be developers are Westinghouse; General Electric Company; Leeson Corporation; Bolt, Beranek & Newman, Inc.; Cleveite Corporation; ESB, Inc.; Gulton Industries, Inc.; Union Carbide Corporation; Yardeney Electric Corporation, and others.

The search for new and economical means of producing electricity has gone into many fields. The Marks Polarized Corporation received in 1967 a patent for a charged aerosol generator that is described as a direct heat-to-power device and in mid-March the Edison Electric Institute announced it would sponsor a three-year research project at M.I.T. to determine the practicality of using super conducting magnets in power generators to increase output.

Mr. MANSFIELD. Mr. President, I was particularly struck by the fact that a major portion of the article is devoted to the assertion that the United States is trailing the Soviet Union in the development of a magnetohydrodynamic electric power generator. This, indeed, is a sad commentary on the attention this Nation is giving to advanced power generator techniques, especially since it was an American scientist who developed the Nation's first MHD generator just 10 years ago. The Soviets have used our 10 years of pioneering research and have put it to practical use to generate power for private and industrial use. MHD powerplants promise to be 50 percent more efficient than the most advanced electric power generators now available. Electricity is generated by passing a hot gas through a magnetic field. Because of its unique operating characteristics, it will operate without polluting the atmosphere; it will operate in areas which lack the water to sustain conventional plants, and MHD plants can operate with a variety of coals. This last point is especially important to Montana. Montana has extensive deposits of coal in the eastern half of the State.

It seems unfortunate, Mr. President, that so little attention is given to fuel generators, since coal is our most abundant resource. Today the United States manufactures only a small percentage of the total electric generators used in this country, and it appears from this article that we are now losing the opportunity to assume a major role in the future electric generator market, both here and abroad.

For some time now, my colleague, Senator METCALF, and I have been interested in the progress here in the United States involving magnetohydrodynamics. We have had correspondence with the Office of Coal Research in the Department of the Interior concerning the development of an MHD pilot plant in Montana which would generate at least 10 megawatts of electricity. We have asked the Appropriations Committee of the Senate to provide funds in the fiscal 1970 budget for such a pilot plant. The purpose of such a plant would be to work out

the practical engineering and operating problems of bulk power MHD generators. Hopefully this would lead to the construction of large-scale commercial MHD powerplants so that they can bring low-cost power to our growing population and to industry without the side effects of air and water pollution.

URGENT NEED TO EXPAND OUR FOOD ASSISTANCE PROGRAMS

Mr. MONTTOYA. Mr. President, yesterday I testified before the Committee on Agriculture and Forestry in support of an expansion and improvement of the food stamp and commodity distribution programs. I ask unanimous consent that a summary of my remarks before the committee be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF STATEMENT BY U.S. SENATOR JOSEPH M. MONTTOYA
INTRODUCTION

Mr. Chairman, I have a rather lengthy statement with attachments which I would like to submit for the record and proceed to summarize for the Committee the essence of the observations I have made therein.

I come to this Committee today with a sense of nostalgia having served as a member of the Committee for four years since first coming to the U.S. Senate. It was with regret that I left the Committee in January of this year. I had many fond memories of our deliberations and accomplishments. It's a pleasure to be back and to appear to testify on a subject I know is of considerable interest to the Committee—that is, food assistance programs.

I have always been a strong supporter of the Food Stamp Program and was pleased to have played a role in getting San Miguel County, New Mexico designated as one of the original national pilot Food Stamp project areas in 1961. We now have 22 of New Mexico's 32 counties participating.

HUNGER AND MALNUTRITION IN NEW MEXICO

There is hunger in New Mexico, my colleagues, just like there is hunger throughout the Nation.

I have appended a table, Appendix I, to my statement which shows a county by county breakdown of the number of "poor" families in New Mexico. The number is astounding—being almost twice that of the national average.

The percentage of poor families, by OEO standards, in the Nation is 15.1%, but in New Mexico it is a dramatic 27.4%.

The problem is even worse in many of the counties of the State. For example, in Mora County 67.1% of the families have been classified by OEO as poor; in Taos County, 63.5%; in Guadalupe County, 45.3%; in Rio Arriba County, 50.7%; in Sandoval County, 58.2%; in San Miguel County, 49.1%; and in Torrance County, 40.5% of the families are classified as "poor." Only three of the 32 New Mexico counties are on a par with the Nation as a whole—which itself is no source of pride. The other 29 counties have two, three, and four times, the national average of "poor" families.

In many of these counties, the average income is extremely low. In Taos County, for example, 29% of the families had no income and 30% of the families had incomes below \$100 per month. The average family income was \$76.20 per month with the average size of family being 4.13. This would

average to less than \$19 per month per individual to provide the necessities of life.

Cases of physical defects as a result of improper diets, undernourishment and malnutrition have been reported. There was even one case last year where one little boy was said to have "probably starved to death" in Socorro County, New Mexico. Nurses, educators and others have commented on hunger in New Mexico, and I have made additional references in my statement to some of these instances.

Suffice it to say that "there is hunger in New Mexico" and not just in isolated cases. Hunger in New Mexico, like elsewhere in the country, is too prevalent to let our conscience rest. We must do more than we have been doing to correct this despicable situation.

FOOD STAMP PROGRAM IN NEW MEXICO

The Food Stamp Program has been a God-send to those 22 counties participating in New Mexico. The food-buying power of low income families has been increased measurably, improving the quality and quantity of their diets. Appendix II to my statement shows the level of participation by county on February, 1969.

Since inception of the first pilot program in 1961, through March of this year, the total value of coupons issued in New Mexico was \$23,780,000, of which \$10,771,000 was in "bonus" stamps. I think it is significant to note that two counties—Bernalillo and Los Alamos—have been added since December, 1968, increasing the number of participants by about 20,000—from approximately 36,500 to the present 56,500. Thus, the benefits to New Mexico have been significantly greater in the past five or six months than ever before and will continue to improve.

While we are speaking of "benefits," I think we should pause and ask ourselves, "Who does benefit from the Food Stamp Program?" The answer to this would be, "everybody!" Not only have the Food Stamp participants benefited but also the farmers and ranchers who produce the food; the processors who process the products; the wholesalers and the retailers who sell the products; communities which in turn receive additional revenues; and society which has been hamstrung by having to care for the sick, the deformed, and others who cannot contribute to society because of diseases brought on by malnutrition but who, instead, draw on our resources.

In New Mexico, for example, it was reported that, "The benefits of this program are manifold. Revenue to the State and communities received from the 4% sales tax collected on the food purchases made with only the bonus coupons amounted to \$108,385.60 for the last fiscal year (FY 1968)."

Who benefits from the Food Stamp Program? Everybody!

IMPROVEMENTS NEEDED

Praiseworthy as the Food Stamp Program and other food assistance programs have been, the magnitude of the hunger and malnutrition problems we have seen revealed, attest to the fact that we have only scratched the surface in attempting to meet the nutritional needs of our citizenry.

Among the shortcomings and weaknesses I have heard voiced, I would list:

The fact that needy persons cannot afford the cost of the stamps;

Upon changing from the Commodity Program to the Food Stamp Program there is as much as a 60% decrease in participation partly due to more stringent requirements; Lack of nutrition education and consumer education programs that would make available services and information concerning better nutrition;

Insufficient food stamp purchases for large, poor families;

A need for intensive outreach to increase participation of needy persons as well as additional Spanish-speaking persons administering the program in Northern New Mexico; More stamp distribution centers; and Lack of funds.

In New Mexico, out of an estimated 235,000 persons falling below the poverty level, only about 56,500 participate in Food Stamps. Another 18,000 or 19,000 participate in the Commodity Distribution Program. Thus, a total of approximately 75,000 participate in some kind of food assistance program in my State. While all of the remaining 160,000 individuals falling below the poverty level may not be in need of food assistance, obviously there is still a great need that is not being met.

The above-mentioned shortcomings and weaknesses in the program have led to this gap.

LEGISLATIVE PROPOSALS

You have pending before this Committee at least five bills proposing numerous amendments to the Food Stamp and Commodity Distribution Programs. Two of these bills, S. 339 and S. 1608, I introduced. A third, S. 2014, introduced by Senator McGovern, I joined in cosponsoring. Senator Talmadge has a bill, S. 1864, and Senator Mondale has a bill, S. 6.

I will not take your time to go into detail about these various proposals. I have attached as appendices III and IV summaries of my bills before you.

I think it is significant to note that all these bills, although differing in some lesser respects, are very similar, if not identical, in their major provisions. I would urge this Committee to pick the best features from the various proposals before you and to report out a measure that is meaningful in terms of meeting the problems we face.

As a minimum, however, I believe that any proposal recommended by this Committee should include at least the following provisions:

(1) Remove needless constricting limitations on the appropriation of funds for operating the Food Stamp Program in any fiscal year subsequent to 1969;

(2) Permit direct operation by the Secretary of Agriculture of a Food Stamp Program in any political subdivision of a State where local governing officials refuse or are not able to provide a food assistance program for needy families;

(3) Provide for cost-sharing arrangements whereby the Secretary of Agriculture could contribute up to 50% of the administrative costs of local food stamp programs;

(4) Authorize the establishment of minimum nationwide eligibility standards for participation in the Food Stamp Program;

(5) Provide free food stamps to the lowest income families;

(6) Lower the purchase price of stamps for those who pay;

(7) Increase the total stamp value so that all participants are able to purchase an adequate diet; and

(8) Place a limitation on the maximum percentage of a household's income that shall be charged for their coupons, and permit a family to purchase less than its full coupon allotment.

In addition to these suggested changes, I have itemized other changes on pages 6 and 7 of my statement which I feel are absolutely essential and to which I call your attention.

COMMODITY DISTRIBUTION PROGRAM

In closing, I would like to make a brief comment in relation to the Commodity Distribution Program. One of the bills I introduced, S. 339, refers specifically to the Commodity Distribution Program and not to the Food Stamp Program. The Commodity Distribution Program still plays a vital part

where there are no Food Stamp Programs and could play an even bigger role if improved upon and combined with the Food Stamp Program.

S. 339 would bring about a number of needed reforms. As I have stated, I have attached a summary of the provisions and the need for this bill as appendix V. Briefly, however, the bill would:

Specifically direct the Secretary of Agriculture to distribute food to needy families and households and in sufficient quantities and at a sufficient number of locations so as to provide recipients with at least the minimum daily nutritional allowances recommended by competent authority;

Direct the Secretary to establish food distribution outlets in any State or political subdivision where the need exists and where appropriate authorities have failed to provide either an adequate food distribution or food stamp program; and

Authorize the Secretary, when he has to take such independent action to contract with any competent person, firm, or nonprofit organization for the distribution of foods. Under such contracts, food must be distributed without discrimination, and recipients must be informed that it has been donated by the Federal government.

S. 2014, introduced by Senator McGovern and in which I have joined as cosponsor, would authorize operation of both the Food Stamp and Commodity Distribution Programs in the same community if such was found to be feasible and desirable in meeting the nutritional needs of the community. I urge your favorable consideration of S. 339 along with the other measures pending before you.

CONCLUSION

Mr. Chairman, I appreciate this opportunity to present my views on the need to expand and improve on our food assistance programs. I do not in any way mean to prejudge the findings and recommendations to be made by the Senate Select Committee on Nutrition and Hunger. That Committee, chaired so ably by Senator McGovern and on which five members of this Committee serve, has been doing a magnificent job in exposing the hunger problem in America and seeking solutions to it.

I do feel, however, as I know Senator McGovern, Senator Talmadge, Senator Mondale feel, in introducing their measures, that there are a number of basic adjustments that can be made at this time without waiting for the final report which is not due until after December, of this year.

There is much that can be done now. The Committee on Agriculture and Forestry has the primary jurisdiction in this matter. You are the legislative Committee. You have served us well in the past, and I am confident you will do so again. Thank you.

Mr. MONTTOYA. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD, the full text of my testimony before the Committee on Agriculture and Forestry on the need to expand our food assistance programs.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

STATEMENT BY U.S. SENATOR JOSEPH M. MONTTOYA

INTRODUCTION

Mr. Chairman, Colleagues, It is with a sense of nostalgia that I appear before you today to testify in support of legislation to extend and expand our food assistance programs. I say a sense of nostalgia because I have fond memories of the four years that I served as a member of this Committee. I have fond memories and recollections of our

many deliberations and the many accomplishments of this Committee during that time. It is indeed a pleasure to be back at this time for I had not had the opportunity to visit with the Committee since leaving it in January.

While I look with fond memories at what has been accomplished in the past, I cannot help but reflect upon the fact that we could have done better. Of course, we can always say that we could and should have done better; however, action is the better test of our intentions. For that reason I wanted to take a few moments this morning to voice my strong support of measures presently pending before you to extend and expand on the success of the Food Stamp Program and other food assistance programs. I view the Food Stamp Act of 1964—in spite of all the anti-poverty measures that we have seen enacted in recent years—as the single most meaningful, and potentially most far-reaching, measure of any in the constant struggle against poverty.

I have always supported the Food Stamp Program. I am pleased to have played a role in getting San Miguel County, New Mexico, designated as one of the original national pilot Food Stamp project areas. Since then, I have fought for and supported not only the Food Stamp Act of 1964, but every effort to strengthen and expand it. I have introduced a number of measures of my own in the past and expect to continue to lend my support to the program.

HUNGER AND MALNUTRITION IN NEW MEXICO

I remember reading in *The Evening Star* a few weeks ago, an article reporting on testimony of our colleague, Senator Hollings. The article was entitled, "Yes, Senators, There is Hunger in South Carolina." I wish to state to you today that, "Yes, Senators, there is hunger in New Mexico." But more than that, there is hunger throughout this rich nation of ours. This, of course, is no secret. It certainly has been no secret to those who have been suffering. It has been no secret to us in Congress. And, in light of the revelations of the Senate Select Committee on Nutrition and Human Needs, on which five members including the Chairman of this Committee, serve, these conditions are no secret to the nation as a whole.

I would like to discuss with you the problems and needs of New Mexico—problems and needs which I am sure are reflected nationwide. New Mexico is a sparsely populated State. We are among the largest States in the Union in terms of geography, but among the smallest in population. We have only roughly over one million population. With perhaps 400,000 of these concentrated in Albuquerque, the remaining 600,000 citizens of New Mexico are scattered throughout the State, many of whom live in villages or communities of only a few people, far removed from other villages or from centers of commercial activity.

Poverty exists in New Mexico, but in Northern New Mexico, where the Spanish-speaking citizens and the American Indian citizens are concentrated, poverty abounds and is at its worst.

For the State of New Mexico as a whole, 27.4% of all families were "poor" in 1966 by the Office of Economic Opportunity standards. This compares with 15.1% for the nation as a whole. These 1966 OEO figures were based on the definition of poverty family income level of the Social Security Administration, according to family size and urban-rural residence.

The Executive Director of the New Mexico Health and Social Services Department stated to me in a letter in response to an inquiry on my part, that, "The most recent estimate of the number of persons below the poverty level in New Mexico indicates that we have

234,554 persons falling within an income class that could be considered as below the poverty level." This again, is out of a population of approximately one million.

However, the problem is even worse for many counties in New Mexico than even this gruesome statistic. For example:

In Mora County where approximately 85% of the 5,900 residents are Spanish surnamed, 67.1% of the families were classified as "poor" by the OEO in 1966. Of these, only 1,502 were participating in the Food Stamp Program as of February 1969.

In Guadalupe County with a population of 5,100, 45.3% of the families are classified as "poor" by the OEO.

In Rio Arriba County with a population of 26,300, 50.7% were classified as "poor".

In Taos County, with a population of 17,600, 63.5% of the families are classified as "poor".

Sandoval County has 58.2% of its families in the "poor" category.

San Miguel County has 49.1 of its families classified as "poor".

Torrance County has 40.5% of its families in the "poor" classification.

I could go on through the remainder of New Mexico's 32 counties and we would find that conditions are little better in very few of them.

In fact, only three counties out of 32 in New Mexico have a percentage of "poor" families lower than the national percentage: Los Alamos County has 2.1% of its families in the "poor" classification; Lea County, 13.0%; and Bernalillo County is right at the national average of 15.0% of its families "poor". All the other 29 counties are far above the national average in "poor" families—some of them as much as two, three, and four times, and more.

I am appending a table, Appendix I, to my statement showing the breakdown by county in New Mexico.

In Taos County, New Mexico, where, as I have stated, 63.5% of the families are classified as "poor" by OEO, the Program Director of the Emergency Food and Medical Project for the County, was quoted as stating that, "... this matter of hunger was one of the most hidden problems within the county. We at no time suspected that in a country so advanced that problems of food would exist..." He went on to state that, "We are more firmly convinced at this point that there is a starvation situation within many family units."

From a survey taken of 100 families in this county, 29% of the families had no income and 30% of the families had incomes below \$100 per month. The average family income was \$76.20 per month, 24% of the families were receiving welfare aid, and the average size of the family was 4.13.

In Rio Arriba County, a county health nurse was quoted as stating that six out of ten individuals handled through her office suffered from physical defects as a result of improper diets, undernourishment and malnutrition.

In Socorro County, a Community Action Program Director has reported on the malnutrition that exists in the county and says he knows of at least one little boy who "probably starved to death."

I will not bore the Committee with additional examples. I think it suffices to say as I indicated earlier that "there is hunger in New Mexico," and it is not just in isolated cases. Hunger in New Mexico, like elsewhere in the country, is too prevalent to let our consciences rest. We need to do more than we have been doing to correct this despicable situation.

FOOD STAMP PROGRAM IN NEW MEXICO

In these areas I have been speaking of in New Mexico, the Food Stamp Program has

been a God-send. San Miguel County in New Mexico was one of the eight original counties designated in 1961 for a pilot food stamp program. The success of the program in San Miguel County and in the other seven initial counties in the Nation, of course, have led to additional designations and eventually to the Food Stamp Act of 1964.

In those counties in New Mexico where the Food Stamp Program is in existence, the food buying-power of low income families has been increased measurably. As a result the quality and quantity of their diets has been improved.

We have 22 of the 32 New Mexico counties participating in the Food Stamp Program. The remaining 10 are participating in the Commodity Distribution Program. In February of this year, we had 56,340 persons participating in the Food Stamp Program, with a total coupon value of \$950,493 of which \$438,346 was in "bonus coupons". The "bonus" was 46% of the total value of the coupons, with the average bonus per person being \$7.78 for the month of February. For the first eight months of fiscal year 1969 (July 1968 through February 1969), the total coupon value of Food Stamp coupons issued in the 22 counties in New Mexico was \$5,607,858 of which \$2,622,405 was in bonus coupons.

The total value of Food Stamps issued in the State since inception of the program in 1961 is approximately \$22,000,000, including over \$9,500,000 worth of "bonus" stamps.

The impact of this program has been of great significance. I might add that the impact is even greater than might appear from a glance of the above statistics. Bernalillo County, with almost 19,000 participants of the approximate 56,500 participants, has only been in the program since December of 1968. For the three months of December 1968 through February 1969, this County, because of its large number of participants, has received \$1,034,930 in total coupons, of which \$551,339 was in bonus coupons. This accounts for almost 20% of the entire amount received by New Mexico during an eight month period. The point I am making here is that in time, the Food Stamp Program will be of far more assistance to individuals in New Mexico than it has been in the past because of the increased number of participants.

Attached as Appendix II is a chart showing, by county in New Mexico, participation in the Food Stamp Program on February 1969.

I think one should pause in speaking of the aid that New Mexico, and the Nation as a whole, has received from the Food Stamp Program and ask ourselves, "just who has benefited?"

The answer to the above question would be, "everybody." Not only have the Food Stamp participants benefited, but also the farmers and ranchers who produce the food, the processors who process the products, the wholesalers and the retailers who sell the products, communities who in turn receive additional revenues, and society who has been crippled and hamstrung by having to care in its hospitals and other institutions for those who cannot contribute to society because of diseases brought on by malnutrition.

I think too often we hear the complaint that the only ones that benefit are those that are too lazy to work and who prefer to be leeches. This is a gross misrepresentation of the real facts and a revelation that those who make such charges are blind to the real situation.

Most of the individuals receiving Food Stamps have little or no income, not because they do not want to work, but because they do not have any work. In Rio Arriba County, New Mexico, for example, the unemployment rate is 20.7% as of 1967. In Mora County the

unemployment rate was 12.5% in 1967, and had been as high as 17.7% in 1966 and 20.7% in 1964. In San Miguel County in 1967, the unemployment rate was 12.0% and was as high as 15.6% in 1964.

These are not individuals unwilling to work, as anyone who is familiar with the counties would inform you. They are individuals who simply have no work and no prospects of any jobs. They thus have no income with which to buy the necessities of life. To compound the matter, there are many others, not reflected in the above statistics, who are underemployed and consequently cannot earn enough to buy an adequate diet for their families.

Because of their lack of proper and adequate diets, individuals in these families suffer a higher incidence of illnesses, infant mortalities, and crippling diseases. Our welfare rolls are taxed, but so are our limited hospital facilities, our limited medical services, and other needs that must be met by society because of the increased illnesses. No one need remind us either that a sick man not only drains society but can do little or nothing to contribute to it. The cost of society by not providing an adequate diet for the less fortunate is far more in the long run than the cost of providing a nutritional diet.

As I have also stated, the farmers and ranchers of this country benefit as well from the Food Stamp and Commodity Distribution Programs. There is an increased demand for food and food products as more and more people are enabled to eat more and better foods. More livestock will be required. More feed grains to feed the livestock. More feed lots to feed the livestock. More crops will need to be grown with the chain of other economic benefits that will thus be set off. More people can be put to work and eventually taken off the assistance programs.

Our food outlets likewise will benefit from increased sales, and sales of better quality foods. Sales of other necessities such as clothing and shelter will increase as money is released from the need to buy food.

Does this sound too far-fetched? I think not!

Let me quote, if I may, from a comment made by the Executive Director of the New Mexico Health and Social Services Department. He states:

"It is apparent that the increase in purchasing power of the families participating in the Food Stamp Program has a significant impact on the business community in those counties where the program is operating. The benefits of this program are manifold. Revenue to the State and Communities received from the 4% sales tax collected on the food purchases made with ONLY the bonus coupons amounted to \$108,385.60 for the last fiscal year (FY 1969)."

If there is any doubt of the favorable impact of the Food Stamp Program on other segments of society, I think that this one example should dispel the doubt.

IMPROVEMENTS IN FOOD ASSISTANCE PROGRAMS NEEDED

Praiseworthy as the Food Stamp Program and other food assistance programs have been, the magnitude of the hunger and malnutrition problems we have seen revealed—some of which I have spoken of this morning—attest to the fact that we have only scratched the surface in attempting to meet the nutritional needs of our citizenry. There are many short-comings and weaknesses in existing programs.

In Taos County, for example, it was stated that: "... the Welfare Department and the Food Stamp Program in no way is adequate to offset the problem of malnutrition of starvation in the area. Less than 20% of the participants in the Emergency Food Project were receiving assistance from the Welfare or

other programs within the area. The other percentage was left to hustle for themselves concerning the necessity for food."

In this same county it was indicated that the Food Stamp Program has a "very bad image" due to the fact that needy persons cannot afford the cost of the stamps. Some borrow money when stamps are available and then repay the loan as they are able to.

It has also been reported that upon changing from the Commodity Program to the Food Stamp Program there is a 60% decrease in participation in some areas partly due to more stringent requirements. In some of these areas there has been a gradual increase with time, but in others there is none.

Another complaint I have heard voiced on numerous occasions is that the high cost of food stamps is a very significant limiting factor on participation. One Community Action Program Director reports that, "The Community Action Program finds families every day that are living in poverty conditions, qualify according to the OEO guidelines, and yet are not eligible for Food Stamps or must pay 80 to 90 dollars. Large families are extremely victimized." He suggests that free Food Stamps should be made available to eligible families who cannot afford to buy the stamps.

The Executive Director of the New Mexico Health and Social Services Department indicates that in his opinion, among the conditions leading to malnutrition in New Mexico are: inadequate family income to provide proper diets; inadequate education about proper nutrition; the lack of nutrition education and consumer education; programs that would make available services and information concerning better nutrition; and the combination of quite minimum financial assistance standards and the relatively high purchase requirements in the Food Stamp Program.

These problems are echoed in county after county in New Mexico.

In addition to the problems of cost and minimum eligibility standards there is an additional problem with large, poor families for whom the food stamp purchases are very insufficient.

There is obviously a need for intensive outreach to increase participation of needy persons. In New Mexico out of an estimated 235,000 persons falling below the poverty level, only about 56,500 participate in Food Stamps. Another 18,000 or 19,000 participate in the Commodity Distribution Program for a total of approximately 75,000 participating in some kind of food assistance program. While all of them remaining 160,000 individuals falling below the poverty level may not be in need of food assistance, obviously there is still a great need that is not being met.

More stamp distribution centers are needed to facilitate transportation for participants. In many small communities there is no center and the costs of transportation make the program infeasible for many.

Persons need to be educated concerning the benefits they can obtain from the program and assisted in applying for certification. Spanish-speaking persons administering the program are essential in many communities for this type of outreach. I urge the Department of Agriculture to make a conscious effort to make such trained individuals available not only in New Mexico, but elsewhere where Spanish is the mother tongue.

LEGISLATIVE PROPOSALS

You have pending before you at least five bills (S. 6, S. 339, S. 1608, S. 1864, and S. 2014) aimed at meeting the food needs of the millions of Americans that are presently going hungry. Two of these measures, S. 339 and S. 1608, are bills which I have introduced. A third, S. 2014, the Food Stamp Reform Act introduced by our colleague, Senator McGovern

ern, I have joined in cosponsoring, as have some thirty other Senators. A fourth bill, S. 1864, has been introduced by my good friend from Georgia and a member of this Committee, Senator Talmadge. The fifth and first to be introduced this session, S. 6, was introduced by another former member of this Committee whom I remember having served the Committee so well, Senator Mondale. And finally, we have received a Presidential message and other statements from the Nixon Administration expressing support of some type of expansion of our Food Stamp program.

I will not take the time of the Committee to go into detail on each and every one of the above proposals or to urge consideration of my bills over the other measures pending before you. All of the measures introduced have been introduced with one purpose in mind; that is, to expand and improve on our efforts to carry out the declaration of policy expressed by Congress in passing the Food Stamp Act of 1964 of "maintaining adequate national levels of nutrition."

I think it is significant to note that the above-mentioned bills, although differing in some lesser respects, are very similar, if not identical, in their major provisions.

I would urge this Committee to pick the best features from the various proposals before you and to report out a measure that is meaningful in terms of meeting the problems we face.

As a minimum, however, I believe that any proposal recommended by this Committee should include at least the following provisions:

Authorize the establishment of minimum nationwide eligibility standards for participation in the Food Stamp program;

Permit direct operation by the Secretary of Agriculture of a Food Stamp program in any political subdivision of a State where local governing officials refuse or are not able to provide a food assistance program for needy families;

Provide for cost-sharing arrangements whereby the Secretary of Agriculture could contribute up to 50% of the administrative costs of local Food Stamp programs; and

Remove needless constricting limitations on the appropriation of funds for operating the Food Stamp program in any fiscal year subsequent to 1969.

The above are the main provisions of my bill, S. 1608, and are also found in one form or another in some of the other proposals before you.

In addition to the above, however, much more must be done. Senator Talmadge's bill, S. 1864, would make a number of additional significant improvements. Some of Senator Talmadge's suggestions are also found in S. 2104, of which I am a sponsor. S. 2104, in addition to the above provisions, would: provide free food stamps to the lowest income families; lower the purchase price of stamps for those who pay; increase the total stamp value so that all participants are able to purchase an adequate diet; provide that a family may purchase less than its full coupon allotment and that the price will be adjusted accordingly; provide that after June 30, 1971, no household shall be charged more than 25% of its income for its coupons; provide for nutrition education, including informing all eligible households of the program's existence and giving any help needed to apply it; provide that coupon issuance and the collection of payment be carried out through the local post office, by mail, in retail stores, or in any way to best insure participation of eligible households; and authorize the Secretary to pay the full cost of administering the program in any political subdivision if he determines that such payment is necessary to enable the program to be operated there.

The need for many of the above reforms in our Food Stamp program is obvious and should not need further commenting on in light of the conditions that exist throughout the country and the complaints that have been registered.

We must make a more conscious effort to educate all Americans on nutrition, to make more readily available to the needy the Food Stamps that they require, and to make them available at a cost they can afford even if this means giving free food stamps to some.

We must remove the funding limitations that we have imposed before to give the Secretary of Agriculture more flexibility in asking for appropriations sufficient to meet the problems. It does us little good to isolate the problem, analyze it, legislate on it, and then provide insufficient funding to solve it.

We must provide some national standards for eligibility so that potential participants may not be barred from the program by unnecessary restrictive standards within a particular state or states.

We must insure that if state and/or local officials either cannot or do not institute a Food Stamp program, that the needy of those communities shall not be denied the opportunity of participating in the program.

Finally, many communities simply do not have the resources available to cover the cost of administering an adequate food assistance program. In some cases, they cannot afford to begin to pay the administrative costs of starting a program locally. In others, their limited funds prevent expansion of existing programs to adequately reach out to all those who need it most. In New Mexico, for example, plans to expand the Food Stamp program to seven additional counties during FY 1969 (Catron, Dona Ana, Grant, Hidalgo, Luna, Sierra, and Socorro Counties) were dropped by the State because of lack of funds. The problem has been analyzed as simply a lack of money.

S. 1608 would authorize the Secretary of Agriculture to enter into cost-sharing arrangements and would greatly assist these resource-poor communities. It would permit the Secretary to contribute up to 50% of the administrative costs of these local programs. This would also help ensure that the certification and issuance of food stamps could be carried out at locations more convenient to all needy persons, rather than at a few, hard-to-get-to sites as is now the case in many counties.

S. 2014 would also authorize the payment of 100% of the administrative costs if the Secretary determines that this is essential to enable the program to be operated there.

Administrative costs are a real problem in the State of New Mexico, and I am sure elsewhere, not only for the Food Stamp program but other programs. In FY 1968, for example, the State of New Mexico turned back \$40,000 in Federal funds for the School Breakfast Program because it lacked sufficient personnel to administer the program.

We should not place ourselves in a position where a major effort is undertaken on the Federal level but which is stymied when it gets to the States because of a lack of funds to administer the program. We should authorize cost-sharing of the administrative costs of the program and provide for a full 100% Federal funding when it is absolutely necessary and there is no other way to operate a program.

COMMODITY FOOD DISTRIBUTION PROGRAM

Finally, I would like to make some comments with regard to the Commodity Distribution program.

I think that the consensus of the Congress and of the country is that primary emphasis should be placed on moving from Commodity Distribution participation to Food Stamp participation. However, I think that

the Commodity Distribution program still plays a vital part where there are no Food Stamp programs and could play an even bigger role if improved and combined with the Food Stamp program. But to make it meaningful, it, too, needs reforming.

One of the bills pending before this Committee, S. 339, is a bill which I introduced in a modified version last Congress and which I have reintroduced again this Congress.

Congress has committed itself to the concept that our overabundance of food, rather than be needlessly wasted, should be used to help feed the Nation's needy. Thus, under basic authority contained in section 416 of the Agricultural Act of 1949, the Secretary of Agriculture makes surplus foods available to States for distribution to needy persons.

However, due to the vague generality of this enabling statute, there are serious gaps in Congressional intent that leave implementation of this program to the whims of a Secretary of Agriculture and/or State and local agencies.

Specifically, there is no clear mandate directing the Secretary to make food available—no guidelines upon which to determine the quantity of variety of foods that should be distributed—no specific authority directing how the Secretary should proceed when State or local agencies fail to accept their responsibility—nor provisions authorizing alternatives for the Secretary to use in expanding distribution outlets to effectively serve recipients.

Sufficient evidence has been presented in the past year attesting to the fact that far too many persons do not receive, or cannot obtain, at least the minimum amount of food needed to protect their health and sustain productive lives.

To correct these deficiencies, I introduced S. 339. This bill would:

Modify existing language of Section 416, Agricultural Act of 1949, to specifically direct the Secretary of Agriculture to distribute food to needy families and households.

Direct the Secretary to make food available to such persons in sufficient quantity and variety, and at a sufficient number of locations, so as to provide recipients with at least the minimum daily nutritional allowances recommended by competent authority.

Direct the Secretary to establish food distribution outlets in any State or political subdivision where the need exists and where appropriate authorities have failed to provide either an adequate food distribution or Food Stamp program within 120 days from enactment of the bill.

Authorize the Secretary, when he has to take such independent action, to contract with any competent person, firm, or non-profit organization for the distribution of foods. Under such contracts, food must be distributed without discrimination, and recipients must be informed that it has been donated by the Federal government.

The above bill was introduced independently of any consideration of expansion of the Food Stamp program. It was introduced in an attempt to streamline the Commodity Distribution program to serve those areas where Food Stamp programs did not exist. Since then, however, I have joined in sponsoring S. 2014, which would authorize the use of both the Commodity Distribution program and the Food Stamp program in the same community if such was found to be feasible and desirable in meeting the nutrition needs of the community. Traditionally, I know, the two have been separated and not authorized to operate in the same county. However, if it is found that one could feasibly complement the other to accomplish the end we all seek—that is, an attack on hunger and malnutrition—I do not see why we shouldn't

provide the authority to the Secretary of Agriculture to permit the two to operate together.

CONCLUSION

Mr. Chairman, I have gone on at some length here and I apologize for taking so much time of the Committee. However, this matter is one of very deep concern to me as I know it is to you.

The hunger problems of this country are shocking and impossible to justify. The Senate Select Committee on Hunger and Nutrition, so ably chaired by our colleague Senator McGovern, and on which five members of the Committee on Agriculture serve, is performing a tremendous service to this country in not only exposing the problem but in seeking to find solutions.

I do not, by my recommendations for legislative action at this time, wish to prejudge the findings of the Select Committee nor to anticipate the recommendations the Select Committee may make. I do feel, however, like Senator Talmadge, Senator McGovern, Senator Mondale, and others, that there are a number of basic adjustments that can be made at this time without waiting for the final report of the Select Committee which is not due until after the end of this calendar year.

There is much that can be done now. The Committee on Agriculture and Forestry has the primary jurisdiction over the Food Stamp program and is the Committee with the legislative authority. It has served us well in the past, and I am confident it will serve us well again. Thank you.

ANALYSIS OF S. 1608, A BILL INTRODUCED BY U.S. SENATOR JOSEPH M. MONTOYA, MARCH 20, 1969

PURPOSE

To eliminate four obvious legislative flaws in the Food Stamp Act of 1964, as amended, which hinder effective implementation of the inherent purpose of that Act.

PROVISIONS

1. Authorize the establishment of minimum nationwide eligibility standards for participation in the Food Stamp program;
2. Permit direct operation by the Secretary of Agriculture of a Food Stamp program in any political subdivision of a State where local governing officials refuse or are not able to provide a food assistance program for needy families;
3. Provide for cost-sharing arrangements whereby the Secretary of Agriculture could

contribute up to 50 percent of the administrative costs of local Food Stamp programs; and

4. Remove needless constricting limitations on the appropriation of funds for operating the food stamp program in any fiscal year subsequent to 1969.

ANALYSES OF S. 339 INTRODUCED BY U.S. SENATOR JOSEPH M. MONTOYA, JANUARY 16, 1969

NEED

Congress has committed itself to the concept that our overabundance of food, rather than be needlessly wasted, should be used to help feed the Nation's needy. Thus, under basic authority contained in section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431), the Secretary of Agriculture makes surplus foods available to States for distribution to needy persons.

However, due to the vague generality of this enabling statute, there are serious gaps in Congressional intent that leave implementation of this program to the whims of a Secretary of Agriculture and/or State and local agencies.

Specifically, there is no clear mandate directing the Secretary to make food available—no guidelines upon which to determine the quantity or variety of foods that should be distributed—no specific authority directing how the Secretary should proceed when State or local agencies fail to accept their responsibility—nor provisions authorizing alternatives for the Secretary to use in expanding distribution outlets to effectively serve recipients.

Sufficient evidence has been presented in the past year attesting to the fact that far too many persons do not receive or cannot obtain at least the minimum amount of food

needed to protect their health and sustain productive lives.

PROPOSAL

It is these deficiencies to which this bill is directed, namely by:

1. Modifying existing language of section 416, Agricultural Act of 1949, to specifically direct the Secretary of Agriculture to distribute food to needy families and households.

2. Directing the Secretary to make food available to such persons in sufficient quantity and variety and at a sufficient number of locations so as to provide recipients with at least the minimum daily nutritional allowances recommended by competent authority.

3. Directing the Secretary—when appropriate authorities fail to provide either an adequate food distribution or Food Stamp program within 120 days—to establish food distribution outlets in any State or political subdivision where the need exists.

4. Where the Secretary must take such independent action, authorizing him to contract with any competent person, firm, or nonprofit organization for the distribution of foods. Under such contracts, food must be distributed without discrimination, and recipients must be informed that it has been donated by the Federal government.

GUY H. HARVEY, OF SOUTH DAKOTA

Mr. MUNDT. Mr. President, it is with a feeling of sadness that I note the passing of an illustrious son of South Dakota, Guy H. Harvey, of Yankton.

Guy Harvey was a good man, an honest man, and he was a leader in the Masonic Lodge for many years. Guy was a leading Democrat in our State, and he and I used to indulge in some good-natured joshing about the fact. Nevertheless, he was a forthright citizen, and he was my friend.

The Daily Argus Leader of Sioux Falls, S.D., sums it up in an editorial about him. I ask unanimous consent to have printed in the RECORD the words of praise which the Argus Leader had for this able man.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HARVEY CONTRIBUTED MUCH TO STATE

Guy H. Harvey of Yankton was a great and good South Dakotan. In his many active years, he made a substantial contribution to that which was worth while.

His endeavors were varied. He devoted much time to charitable organizations and assumed a state leadership in the March of Dimes campaign. He served with enthusiasm and ability the cause of education and was an important official in Masonry. He took an active part in politics, vigorously promoting the principles which he endorsed. He was never so busy, it seemed, that he couldn't find time to promote a useful civil endeavor.

Men such as Mr. Harvey leave behind them a series of memorials in the good they have accomplished. Many such memorials in Yankton and in South Dakota generally are associated with his name. We are a better state because he was a part of it for so many years.

SALUTE TO THE FLAG

Mr. BROOKE. Mr. President, on Monday, May 12, Maj. Hal Hughes, executive director of the Volunteers of America, Inc., delivered a moving address on the two flags of America. I ask unanimous

consent that the text of his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

A SALUTE TO THE AMERICAN FLAG

(Address of Maj. Hal Hughes, New Bedford Post, the grand field council, Volunteers of America, Philadelphia, Pa., May 12, 1969)

The United States has two flags, a visible red, white and blue banner that we see flying proudly wherever we go, and an invisible flag that we cannot see because it flies only in the hearts and imaginations of all the poor people, the enslaved people, the hopeless people of the world.

We all know about the visible flag; how the thirteen white and red stripes stand for the thirteen original colonies; the fifty white stars on the blue background stand for the fifty states of the United States; how the red, white and blue stands for equality, brotherhood and freedom.

In our history books we learned how a lady named Betsy Ross made the first American flag. In our flag books we learned the proper ways to show respect for the flag, how to hang it in display, how to carry it in a parade, how to fold it for respectful storage.

I am sure we all know quite a bit about the cloth flag that we see so often. However, I do not think we know as much as we should about the invisible flag flying in the hearts and imaginations of all the poor, mistreated and hopeless peoples of the world.

I'm sure it is because we know so little about the invisible American flag, that so many discourtesies are sometimes shown to the visible American flag.

The American flag has often been called God's flag, and there is a good reason for the heartwarming title. The American flag symbolizes the Constitution as well as the nation. The Constitution of the United States is the first government charter in history to grant to the poorest and humblest person the right to be free and equal in opportunity.

The American flag stands for much more than that. It represents the unconquerable foundation of the American government; the idea that the rights of freedom, equality and justice which all the people have, come from God.

Obviously, if the people's rights come from God, they can only be taken away by God. But if the people's rights come from the government, naturally the government has the right to take them away.

This is why dictators have to be atheists. This is why there is a strong atheist movement in this country. This is why there is so much unnecessary talk about separation of church and state. You do not hear any talk about separation of atheism and state. Remember this . . . if your rights do not come from God, if your rights come from the government, then the government can take all your rights away, and, undoubtedly, the government will.

It is a source of sadness to me that so often so many ignorant smartalecks show disrespect for the American flag, even going so far as to make a mockery of it and what it stands for.

One college art class in Massachusetts even made and displayed an American flag in the form of the Nazi swastika emblem.

Occasionally you read in the newspapers about the American flag burned or spat upon. I shiver a little because to me it is God's flag that is being burned or spat upon. I prefer to remember the story of the only man in New Bedford, Massachusetts who ever won the Congressional Medal of Honor. His name was Sgt. William Carney and he won the medal by picking up the American flag from the hands of a wounded flag-bearer, carrying it to the top of a hill in

the Civil War in the very face of Confederate gunfire. When he found himself alone with all his comrades killed, he brought the flag back safely to the Union lines with every rifle in the fort trying to shoot him down. He would not leave the flag behind, not even to save his own life. When he finally stumbled back to safety, he refused to give up his flag, except to his own officers, to whom he reported happily, "The old flag never touched the ground, sir."

I left out one detail of that story. Sgt. Carney was a Negro. To me color is not important, except merely as a detail of description. First and foremost, Sgt. Carney was an American of the highest type.

The American flag flies over Arlington National Cemetery and over Valley Forge. Great honor is paid to the tomb of the Unknown Soldier of World War I at Arlington. But at Valley Forge, there are graves of 3,000 unknown soldiers of the Revolutionary War. They died because they respected the newborn American flag.

During World War II, when the Communists were taking over China, a battle took place near an American religious mission which was being used as an orphanage. The place was so crowded with deserted babies that the nuns had ran out of clothes with which to cover them. In the midst of the barking guns, the nuns heard a baby crying outside the door. They ran and brought in a naked baby. Without clothes, how were they going to protect the child? Just then, the American flag was shot down off the flagpole. A nun ran out, brought back the flag and wrapped the shivering baby in it.

To me that is a most appropriate use of the flag, as a shelter and a hope for the helpless and the hopeless.

This is why the American flag still flies invisibly in the hearts and imaginations of all the poor, enslaved and hopeless people of the world.

And we had better make sure that the American flag flies invisibly in our hearts and imaginations.

If the American flag stops waving in our hearts and minds, it will not wave long in our streets and public buildings.

And those who secretly are eager to offer a so-called better flag in its place are lying to themselves, because there can be no better flag than God's flag.

The American flag is truly God's flag, the flag of hope and peace and self-respect for all the poor peoples of the world. If this great banner of civilization is torn down, mankind itself will slide back into a world of insane and meaningless savagery.

Let us all lend a hand to keep Old Glory from falling to the ground. On June 14, 1969 we celebrate the anniversary of the birth of the American flag . . . it will be 192 years old.

We must realize that the greatest menace to our freedom is ingratitude and lack of respect for constituted authority. Let us resolve to rededicate our loyalty to and respect for the Stars and Stripes, and instill in our children in their earliest years, this love and respect for the flag.

FEDERAL TRADE COMMISSION CIGARETTE ADVERTISING PROPOSAL

Mr. JORDAN of North Carolina. Mr. President, it appears that the Government is ready to strike again in its war on the tobacco industry.

And it is reviving for that drive some of the same tactics employed in an unsuccessful attempt of 4 years ago to achieve that goal.

I refer in this regard to the just-announced proposal of the Federal Trade Commission for regulation of cigarette advertising.

Unlike the Federal Communications Commission, which wants to prohibit such advertising on radio and television, the FTC does not propose an advertising ban.

It would, instead, impose a requirement for a much stronger health warning in such advertisements than that now provided under the Cigarette Labeling Act and would make failure to include the warning an unfair and deceptive act punishable by law.

There is nothing really new in the FTC proposal. It relies on the same unsubstantiated and, in some cases discredited, charges which have been brought periodically against tobacco by various Government agencies over the past 5 years.

It does, however, represent a new attempt to achieve arbitrary rule by administrative dictation pre-empting a legislative area which properly belongs to Congress.

As we all are aware, the Cigarette Labeling Act of 1965 specifically bars the FTC from imposing such advertising rules at any time prior to June 30 of this year.

In recognition of that, the proposal now unveiled calls for a public hearing on the rule opening July 1.

The House Committee on Interstate and Foreign Commerce has already completed extensive hearings on extension of the Labeling Act which would leave the regulation in the hands of Congress where it belongs.

Significantly, testimony in those hearings weakened rather than strengthened the case against tobacco and cast new doubts on the validity of claims against smoking.

In the face of this new FTC move, I think it imperative that Congress act promptly to approve the extension of the Labeling Act prior to the June 30 deadline.

I have supported, and will continue to support, meaningful research by both the Government and the tobacco industry to identify and remove factors in smoking which may be suspect. I think such research should be pursued swiftly and vigorously.

Meanwhile, however, I will oppose the FTC proposal as well as that advanced by the Federal Communications Commission earlier as unwarranted. Allowed to stand unchallenged they would, in my view, set dangerous precedents with far-reaching implications for all of the Nation's business and industry.

ENFORCEMENT OF TITLE VI OF CIVIL RIGHTS ACT OF 1964

Mr. CASE. Mr. President, if there are any who doubt the determination of the Department of Health, Education, and Welfare to enforce firmly and fairly the school desegregation program under title VI of the Civil Rights Act of 1964, I urge that they read a speech delivered recently by the Director of the Office for Civil Rights of the Department of Health, Education, and Welfare.

In a speech at Atlanta, Ga., before school officials from throughout the South, Leon Panetta, Director of the Of-

fice of Civil Rights, made it absolutely clear that the Department of Health, Education, and Welfare intends to continue effective enforcement of the title VI program to end discrimination and illegal segregation in formerly dual school systems. At the same time, he made it clear that the Department will move against illegal segregation which may exist in school systems which have never been organized formally on a racially segregated basis.

I congratulate Mr. Panetta for his unequivocal statement. So that all Members of Congress will have an opportunity to read it, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

OPERATION BOOTSTRAP

(Remarks by Mr. Leon E. Panetta, Director, Office of Civil Rights, Atlanta, Ga., May 16, 1969)

First of all, I would like to express my deep appreciation for this opportunity to appear before you today. Since I assumed this office only about 45 days ago, I don't feel I should be held accountable for a presentation on my first 100 days in office . . . at least, not yet. I can report, however that during that short time, I have already had the pleasure of meeting with a number of you and your southern colleagues . . . and, despite all of the occupational hazards involved, I am still able to be here. I consider that in and of itself a significant accomplishment . . . even for the first 40 days. Seriously, I do want to express my appreciation for this opportunity to be here with you. I am deeply honored by this invitation.

Each of you are responsible for the educational welfare of the children of the State of Georgia. Your positions present the most important and exciting challenge of our times. What America is today—what it can become tomorrow rest largely in your hands. It is a tremendous responsibility. But it is also a tremendous opportunity—to take young, untrained minds and shape them into productive citizens who will contribute to the continued growth and strength of this Nation. The fulfillment of these ends requires a great and total commitment to the advancement of education for all children. I know that each of you here have made that commitment. I can assure you that this Administration has also made that commitment to education . . . meaningful education . . . from childhood through manhood, from kindergarten through college.

We hear a good deal of criticism—from both young and old alike these days—about the problems of our educational system . . . and I am sure that all of us here would agree that it cannot afford to stand still . . . it must meet the challenge of change. We cannot return to just the 3 R's when the 3 R's are no longer adequate in facing the harsh demands of a highly competitive and advanced society. This is not, however, to deny that great progress has been and is being made in education—with new equipment, new methods of teaching, and imaginative designs for physical plants. The Department of Health, Education, and Welfare is currently devoting much of its time to studying and supporting these innovative efforts—plans have been prepared for the placement of the successful Head Start Program into a new and exciting Child Development Center at HEW; work has begun on developing and expanding Federal assistance for community colleges; the bilingual, cooperative and vocational education programs are well on their way to fruition; additional funds are being sought for experimental pro-

grams in education and for improved teacher training.

But all of these efforts—and many others—cannot succeed nor can meaningful educational opportunities result unless such education is presented equally—to all children, regardless of race, color, or national origin. One of the great problems facing this Nation today is that of race relations—are we to live as separate societies (as the Kerner Commission warned) or are we to go forward together (as the President urged)? These are the questions facing America. The answers—there are many—but the one that must be of the highest priority is the need to provide better education for all children.

I believe it is educationally and morally compelling for each of us to be committed to the principle of equal educational opportunities for every American child. But beyond that . . . yes, beyond that . . . it is also legally compelling that we be so committed.

The Congress and the courts clearly require that equal education—free from discrimination—be a reality in America. Since *Brown v. Board of Education* was decided exactly 15 years ago this month, the courts have continued to interpret and reinterpret the meaning of the 14th Amendment—each time making it clearer and clearer what they felt the Constitution required—the complete and immediate elimination of discrimination in our schools. In 1964, the Congress passed the Civil Rights Act and told, indeed, directed the Secretary of Health, Education, and Welfare that it was his responsibility to assure that school systems which received Federal funds do not discriminate on the basis of race, color, or national origin. From that date, there were no longer just commitments and promises that had resulted in 10 years of delay . . . but actions followed as well—significant actions that have resulted in bringing over 89% of the southern school districts into compliance with the law. This is a tremendously significant fact . . . but tragically, it is little recognized. I believe it is a fact that not only destroys the misconception that the South in general is unwilling to abide by the law but testifies to the significant and courageous steps that have been and are being taken by thousands of school superintendents throughout the South. To be sure, there are many who have sacrificed their jobs in attempts to abide by the law; to be sure, there are many of the remaining 11% which are truly difficult and challenging cases to resolve . . . but the clear fact is that a major portion of the task has been completed . . . that out of the 4,476 school districts in the 17 Southern and Border States, 3,961 are today in compliance with the law.

I realize that there are many who would disagree with the Civil Rights Act and the decisions of the courts—many who feel that both the Congress and the courts have gone too fast. But ours is a system based on law and order and the Department of Health, Education, and Welfare, just like every other arm of the Executive Branch, has the duty of doing what it is told by the Federal Legislature it must do, and has the duty of doing it in the manner that the Federal judiciary says it should be done.

I never cease to be amazed at how many people feel that somehow, somehow HEW and the Office for Civil Rights can operate in a legal vacuum—free of the will of the Congress—free of the will of the courts. They contend that somehow, HEW can accept what the Justice Department refuses to accept in court; that HEW can give what the courts have forbidden it to give; that HEW can avoid the responsibility that the Congress said it must assume. Over and over again, I am asked such questions as—

"Why can't we continue to use free choice?" The answer is not that HEW will not allow it... the answer is that the Supreme Court ruled against it. In May of 1968, the Court held in the *Green* Case that "if there are reasonably available other ways... promising speedier and more effective conversion to a unitary, nonracial school system, 'freedom of choice' must be held unacceptable." HEW's policies are controlled by that decision.

Again, I am asked—"Why can't we have more time to do the job?" And the answer again rests with the Supreme Court which held: "The burden on the school board today is to come forward with a plan that promises realistically to work, and promises realistically to work *now*." In addition to what the Court has said, it is clear that if additional time is allowed for any of the remaining 11% beyond that given to the other 89%, the entire structure of enforcement will be seriously undermined.

Finally, I am often asked the choicest question of all: "Did not President Nixon promise a slowdown on school desegregation?" Let me quote from the President's news conference of February 6:

"As far as school segregation is concerned, I support the law of the land. I believe that funds should be denied to those districts that continue to perpetuate segregation. I think that what we have here is a very difficult problem, however, in implementing it. One is our desire, a desire that was emphasized by Dr. Allen, to keep our schools open, because education must receive the highest priority. The other is our desire to see to it that our schools are not segregated. That is why I have, in discussing this with Secretary Finch and Dr. Allen, urged that before we use the ultimate weapon of denying funds and closing a school, let's exhaust every other possibility to see that local school districts to comply with the law."

Thus, the President himself has made it quite clear that the law will be enforced. Very simply, as the Secretary has himself reiterated, HEW is not in the business of making law... our job is to implement and enforce the law and, certainly, to assist those seeking to comply with that law. The policies of HEW—as contained in the so-called guidelines—merely implement the law as given to us. It would be a tragic charade for this or any Administration to wink at or ignore this law while pleading for respect for law and order on the campuses and in the streets of our Nation. Surely, should the Congress act or the courts render new decisions, we would be obliged to follow those laws... but until that happens, the law as it stands today must be enforced.

But beyond the controversy and resentment surrounding the law itself, there remains the more pressing issue of how shall that law be enforced. In this area, there is a great deal HEW can and will do.

In the past, the guidelines became a symbol of Federal bureaucracy—they were the first requirements a Superintendent saw; oftentimes, enforcement officials were young and inexperienced in the ways and problems of school administration. None will deny the fact that mistakes were committed in the past... that the scars of personality conflicts, of misunderstandings, of haphazard enforcement still remain. The total effort, therefore, must be to reopen lines of communication that have been closed by past controversy; to develop incentives to encourage a continuing dialogue between all the parties concerned; to recognize and support the efforts of the thousands of school officials who have successfully desegregated under the law; and to provide as much assistance as possible to ensure that the law is objectively enforced with understanding, compassion and fairness to every American.

How often I am asked: "Are you saying integration and to hell with education?"

No... I am not saying that... but neither am I saying "education and to hell with compliance with the law." The effort must be to move forward on both fronts. HEW, as the Department responsible for education in America, must recognize that the desegregation of schools in accordance with the law brings with it complex social, economic and political pressures for a community to cope with. I have come to understand the tremendous burdens which are faced by the requirement to desegregate school districts—community apprehension, inadequate school facilities, limited finances, teacher preparation and curriculum adjustments. These pressures cannot be ignored for they can mean the difference between success and failure in the broader effort to provide equal educational opportunities.

I believe the Federal Government and HEW have the responsibility to help these communities... I do not believe it is solely our task to tell a school district it is in non-compliance and leave it up to them to develop an answer. Oftentimes, courts have acted in this manner. Effective desegregation recognizing educational needs is not a matter for courts or lawyers, but for educators. There is no one way to desegregate the schools of all communities; the makeup and problems of each town and city are different. HEW must have the financial and technical flexibility to provide needed assistance to those who wish to comply with the law but lack the necessary resources to accomplish the task alone. It is our policy to offer Title IV assistance to each district in order that meaningful educational help on the development of alternative desegregation plans can be provided. What I believe is needed is not less but more Federal help aimed at implementing this mandated change as smoothly and as soon as possible... aimed at exhausting every possibility before the ultimate step of termination must be taken. Along these lines, the Secretary has requested an increase of \$8 million for the Title IV program—and we hope additional legislation will be forthcoming in this area.

But even before such assistance can be provided—before steps can be taken to provide needed help to a school district—there must be a willingness to negotiate. No one is claiming that the problems are simple. No one is claiming that it will not be politically or educationally difficult to do the job. But these problems can never be answered if in the very least people are unwilling to sit down and reason together. If a school superintendent says "to hell with the law and HEW"—then there is little that can be achieved on behalf of the children in that community. If HEW says "obey the law or the hell with the school district"... then little can be accomplished. It is only when both parties, recognizing their responsibilities and the needs of the children, come together and attempt to find the answers that, in the end, answers can be found.

Am I being overly optimistic that solutions can be achieved by free and honest negotiations... I ask you to consider Martin County, North Carolina and South Panola, Mississippi—both terminated in January and both returned to compliance in February as a result of negotiations. None gave either a chance of coming back... but they did through persistence on our part and through the willingness of local school officials to keep trying. Bleckely County, Georgia—terminated in April—returned to compliance in May before the effective date of termination. A majority Negro district that had some very difficult problems—but they overcame them with our help and with their persistence—we worked together to protect that district from losing its Federal funds.

Unfortunately, not all of our efforts are successful—of the 11 districts terminated by the Secretary, 7 refused to return to compliance... but we tried. In one district, we

developed 8 alternative plans... in another, we provided an extension of the termination date in order for the school board to come to Washington. In the case of Washington County, Georgia, for example, immediately upon notifying them that termination would become effective in 30 days, assistance was offered to the district. One Title IV team developed several desegregation plans but the board rejected them. Another Title IV representative went in a few days later to recommend another approach... but no action was taken. On May 2, the school officials were invited to Washington and the possibility of an acceptable plan developed... an additional 30 days extension on the termination date was granted and the school board advised that a representative would be dispatched from Washington to assist them in developing a plan... the response: members of the school board will be out of town. As so, HEW gets blamed for terminating funds... but the responsibility does not just lie with HEW, particularly when we can substantiate the fact that every possible step was taken to assist the district... no, the responsibility is not just HEW's... it is equally the responsibility of every local school official to exhaust his alternatives as well, particularly where the welfare of thousands of school children, black and white, are involved. There can be no excuse for inaction—on the part of HEW or the school district.

As with all other difficult social problems, no one agency or level of government can hope to do the job alone. This Administration is committed to a local-state-Federal partnership in resolving the complex challenges of school desegregation. Too little has been done in the past to encourage State and local government to participate in this effort to achieve equal educational opportunities. I intend to seek out the assistance and counsel of State officials in this area. Local universities have already proven their value in providing consultant and training services in this area and should be given greater encouragement to exert leadership and assistance to schools in their region. Every possible step must be taken to nourish and develop the cooperation necessary to do this job right. We must at the same time see that this issue is not allowed to be one affecting one region of the country alone. For too long, the South has been singled out as the only villain in this area. Discrimination in education exists and is illegal in all parts of the country. For the first time, my staff is balanced North and South... and we only recently cited the first northern school district for noncompliance with Title VI. There is no question but that the law should and must be enforced equitably without regard to geography. In addition, the law should and must be enforced uniformly.

Too often, enforcement has varied between the Justice Department and the Department of Health, Education, and Welfare... too often, court ordered districts are getting away with less than is being required by HEW. In these areas, Justice has agreed to bring these districts up to minimum compliance with the law as soon as possible. In addition, in order to protect against prolonged termination of funds, a procedure is being developed whereby Justice will proceed against those districts that have been terminated and are still out of compliance with the law. It is also my hope to hold a conference of terminated districts this summer to reopen our lines of communication and hopefully provide whatever assistance may be necessary to bring them back into compliance.

Gentlemen, as educators, you must seek to improve education in your districts—but you must at the same time meet the challenge of providing equal educational opportunities. As Director of the Office for Civil Rights, I have a duty to enforce the law but I pledge

to each of you the support and assistance you need to comply with that law. The spirit and even the life of a community and the short and longterm well being of its citizens, both black and white, are at stake in every decision in this area. Misunderstandings respecting the law, confusion as to its enforcement and the encouragement of false hopes can pit man against man, student against student, and government against government. We must not allow this to happen. We must work together to see that a strong and equal education is provided to ensure a strong and equal America for tomorrow.

SENATOR BENNETT WINS GOOD GOVERNMENT SOCIETY 1969 AWARD

Mr. HRUSKA. Mr. President, I had the privilege and pleasure recently to attend the 1969 award banquet where the American Good Government Society presented its annual George Washington Award to our esteemed colleague and friend, the senior Senator from Utah (Mr. BENNETT).

In addition, for the other body the society presented its 1969 prize to the chairman of the House Appropriations Committee, Representative GEORGE MAHON, of Texas.

Another Senate colleague, the distinguished Senator from Mississippi (Mr. STENNIS), presented the award to Senator BENNETT and in his introductory remarks praised the Senator from Utah "as a living example of what can be accomplished by hard work and individual initiative." I feel that the full text of Senator STENNIS' remarks should receive the wide distribution available through the CONGRESSIONAL RECORD, and I request they be printed in the RECORD.

In addition, Senator BENNETT in his response gave a very thought-provoking and excellent speech which I also would like to see receive wider distribution. I ask unanimous consent that it, too, be printed in the RECORD.

As a past winner of the same Good Government Society Award, I know that Senator BENNETT and Representative MAHON have received many congratulations for this 1969 presentation, and once again I wish to add my own congratulations, publicly and in the RECORD.

There being no objection, the speeches were ordered to be printed in the RECORD, as follows:

INTRODUCTION BY SENATOR JOHN STENNIS, DEMOCRAT, OF MISSISSIPPI, AT GOOD GOVERNMENT SOCIETY 1969 AWARD DINNER, APRIL 30, 1969

Tonight I have the singular honor of presenting one of the 1969 Awards for Good Government to a truly great American, an outstanding Utahn, and an excellent legislator, Senator Wallace F. Bennett.

For 19 years I have watched him in action under all sets of circumstances. I have never seen him falter. I have never met a man who does not respect him.

Senator Bennett brings success to his every endeavor. This includes success as a businessman; as a United States Senator; in services to the Nation and to his beloved Utah. We honor him and trust him in the Senate—not alone for what he has done but for what he is. We honor the man.

He is the heir to the best frontier qualities of leadership, sound judgment and a capacity for hard work.

His father traveled across the plains as a child in a covered wagon with a group of

Mormon Pioneers seeking to build a new life in a new land. This is exactly what they did.

Determination overcame all obstacles. With this spirit—which Senator Bennett inherited—his father transformed a bankrupt paint business into a thriving paint manufacturing and distribution organization. Senator Bennett entered this business as a clerk and became President of the Company in 1938.

From those beginnings he has continued to widen his range of interests. He has served as a school teacher and principal; as founder of an automobile dealership; as an important leader in his Church; as author of two books; as President of the National Glass Distributors Association; as the first representative of small business to serve as National President of the National Association of Manufacturers; as a member of six prestigious Senate committees.

He is a living example of what can be accomplished by hard work and individual initiative.

Many men who achieve this high prominence do so at the expense of their family life. But not Wallace Bennett. He has been happily married for 47 years to a woman we have all come to know and love. Wallace and Frances Bennett have raised five fine children and proudly claim the Senate championship for 26 grandchildren—26 at the last count.

Senator Bennett has accomplished his lifelong worthy attainments with the timely assistance of Mrs. Bennett, and because of his fortunate combination of fine personal qualities, his unflinching faith, and his unswerving dedication to the basic principles of our republic. I know of no Senator more devoted to the concepts of representative government than Wallace Bennett.

I have always admired his abiding faith in his Divine Creator. He has been and is very active in his Church, where his work will bear fruit for decades to come. Those who attend the Weekly Senate Prayer Breakfasts know him as a dedicated member. His messages are always well-prepared, worthy and inspiring.

His committee work on both the Senate Finance and the Banking Committees has made him one of the most important monetary and fiscal spokesmen in the Senate.

It has been a heart-warming experience for me to work very closely with him in the Senate Ethics Committee. His judgments, when finally passed, reflect logic, a fidelity to duty, a keen sense of fair play, and above all, the courage of his convictions.

Too, it is Wallace Bennett who often walks eight miles to work in the morning; who works with and advises Presidents and Cabinet members; yet who cheerfully handles the most undramatic of Utah problems. This is Wallace Bennett, a winner of the American Good Government Society 1969 George Washington Award.

It is my very high privilege and honor to present this award to him and to read the citation:

"THE 1969 GOOD GOVERNMENT SOCIETY RESOLUTION OF TRIBUTE AND HONOR

"Wallace F. Bennett, statesman and industrialist, author and religious leader, gained the summit of his business career as president of the National Association of Manufacturers; and then came to the United States Senate where he is in his fourth term of quiet and steady service to his country.

"His recognized knowledge and understanding of fiscal and monetary problems have brought him the signal honor of being the only man serving on both the Finance and Banking and Currency Committees of the Senate, where he upholds sound policy—a sound currency and credit system and a sound dollar. He also serves on the Joint Committees on Atomic Energy, Defense Production and Internal Revenue Taxation and

is vice chairman of the Senate's Select Committee on Standards and Conduct.

"Senator Bennett is a key leader to his church. He sets a high standard in public life, and gives a strong and honored leadership to all of us. The State of Utah should be proud of the illustrious son she has given to the United States of America."

GOOD GOVERNMENT IS REALLY GOOD PEOPLE
(Speech by Senator WALLACE F. BENNETT, Republican, of Utah, Apr. 30, 1969, at Good Government award dinner)

This is a great honor which you, my friends, have done me tonight, and I am humbly grateful for it. I value it especially as an expression of your faith in me and I am humbled by the realization that it places me in the distinguished company of the other, greater men who have been similarly honored including the Honorable George H. Mahon, the distinguished chairman of the House Appropriations Committee. And, I am especially delighted that Senator John Stennis who has already received this honor himself and whose friendship I cherish has been your spokesman in my behalf.

The fact that we are met here in the name of Good Government has naturally started my mind in search of the meaning of the phrase. What is "good government?" There is apparently no simple, single, definition of this vital concept—no exclusive set of principles, no one and only pattern of organization or administration. That being so, one must fall back on a variety of observations, in which, hopefully, some common basic elements may be discovered.

In such a situation, I like to begin with the meaning of the key word, in this case, "government." If we go to the dictionary, we learn that "to govern" means to steer—as with a rudder in a boat. No wonder a poet coined the phrase "The Ship of State." If government is to be good, those who steer it, must know and avoid all the hidden dangerous rocks and shoals that lie along its way, political, social and economic. The pilots of good government must also be capable of holding their course in rough weather when the waves of revolt are raging and the decks are awash.

If government can be likened to a ship to be steered through the reefs and storms to what fair harbor is she bound. Over the centuries many wise mariners with actual experience and good records as servants in government have made the same observation—namely that the goal and safe harbor of good government is the happiness of the governed.

This same idea must have been in the mind of Thomas Jefferson when he wrote into the Declaration of Independence his deathless phrase—"life, liberty and the pursuit of happiness."

Some have believed and many today still believe that government itself has the power as well as the specific duty to bring this about. But I agree with William Ellery Channing's version of this theme. He wrote: "The object of good government is not to confer happiness, but to give men opportunity to work out happiness for themselves." To me, this is an accurate restatement of the words of Jefferson.

Why should the search for happiness, a quest that is intensely personal also be thought to be the goal of good government? There is an obvious answer—government is an institution which men have created in their own image—endowed with their own powers and charged with their own responsibilities. Into its laws they write their own standards of conduct—onto its own administrators they cast their burden of self-discipline—unto its courts they look for wise and prudent judgment on their weaknesses.

For government, even good government, has the same weaknesses as well as the same strengths as are possessed by its human cre-

ators. Just as water cannot rise above its source government can never possess superhuman or moral force wisdom.

When people created government as a device to solve their common problems they had to endow it with power to act and agree to be bound by its actions. Power thus became the vital living force in government and in this sense it may be likened to a huge magnifying glass capable of focusing the united personal powers of a whole people on their common problems. But magnifying glasses can become burning glasses if the power is carelessly concentrated. Similarly, governments too powerful can become destructive even of those who created them. Indeed, one might say that governments may be said to resemble the creature made out of human parts by Dr. Frankenstein and that for us as for the good doctor in the story the ultimate risk is that government may turn on its creators and destroy them.

Because power can corrupt and destroy as well as serve—it's easy to understand why the men in every generation have been concerned with its size and its rate of growth as well as today. One quotation of government will serve to represent the feelings of most of us. This comes from Oliver Wendell Holmes who said, "The less government we have—the better." Today perhaps we might be inclined to paraphrase that by saying good government should be like a miniskirt—large enough to perform its essential function without waste.

I began these rambling remarks by saying that there is no simple single definition of good government. But as these apparently unrelated ideas have developed in my mind I began to realize that there is at least one common thread that runs through all of them—one ultimate key to good government. To me, the common key is "good people."

In our American concept of government the ultimate sovereignty rests with the people. If government is an institution created by the people then it takes good people to create good government. If those selected to pilot the ship of state are to be good public servants, they cannot be truly representative of any but good citizens. If the power of government is to be kept under control those who exercise it must be good people, with an attitude of service rather than personal ambition—and at the same time those who selected them must also be good people with faith enough to obey the laws their good representatives have made in their names.

If government falters or falls only the faith and courage of good people can renew its strength. And if, as is the more frequent occurrence—it becomes too powerful only good people can drain away that excess by assuming more responsibility themselves. Leon Blum, the one-time French Premier, has wisely said: "No government can remain stable in an unstable society and an unstable world."

If the key to good government is good people then one of the responsibilities of good government is to preserve the source of goodness in people—stable families, happy homes, sound educational systems and churches free to speak out for righteousness. Good people—may there always be enough of them.

NOMINATION OF JUDGE WARREN E. BURGER TO BE CHIEF JUSTICE OF THE UNITED STATES

Mr. DIRKSEN. Mr. President, on behalf of the distinguished Senator from Colorado (Mr. ALLOTT), I ask unanimous consent to have printed in the RECORD a statement by him relating to the nomination of Judge Warren E. Burger to be Chief Justice of the United States.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ALLOTT

At this time in our Nation's history, when respect for the law has never been under greater attack, all loyal Americans, I am sure, take heart from the appointment by President Nixon of Judge Warren E. Burger as Chief Justice of the United States.

I have known Judge Burger as a friend for more than 25 years. I know him to be a man, as President Nixon suggested, of unquestioned integrity and having the quality of judicial temperament so desperately needed on the Supreme Court today.

If Judge Burger holds true to his reputation—and I have every reason to believe that he will—the Court will be working long and hard to keep up with its caseload.

I have heard a great deal of talk about whether Justice Burger is a "conservative," a "moderate," or a "liberal." If labeling a political figure is often difficult, if not meaningless, labeling a judicial figure is impossible. What is important is that Judge Burger believes that the primary business of the Court is the interpreting of laws, not the legislating.

The President could not have, in my judgment, made a better selection for what he describes as one of the most important appointments of his Presidency. It is a selection for the times in which we live, and indeed for all times, for I predict the work of Warren Burger will be far more appreciated even by future generations, than by the present.

I congratulate the President on having made this appointment. I congratulate Judge Burger on his selection and wish him and his family the very best from my family as he carries out this most difficult of assignments.

THE RUSSIANS ALSO READ

Mr. HART. Mr. President, time is running out on chances to achieve a meaningful arms limitation agreement with the Soviet Union.

With each new hardline statement from Washington and Moscow, the atmosphere becomes less conducive to fruitful talks.

With each delay in starting talks, chances for international incidents which might block such talks increase.

With each advance in development and deployment of new weapons systems, the task of reaching agreement becomes more complicated.

Mr. President, if we miss this opportunity for arms talks, the world may well witness an escalation of the arms race that will postpone indefinitely an end to this madness.

I do not contend that arms limitation negotiations with Moscow will be easy or even that they will necessarily be successful.

However, to refuse to move promptly into such talks because they will be difficult or because they may fail is to demand conditions for negotiations which probably will never come.

To demand such conditions may be, in effect, to rule out arms talks for perhaps the foreseeable future.

Mr. President, our intent should be to improve and not damage chances for successful talks.

In a column published today in the Washington Post, Marquis Childs makes a good case that hardline statements

about Russian intentions issued by defense officials in support of immediate deployment of the Safeguard ABM system have "damped the prospects for arms talks."

Mr. Childs' point is that even as Kremlin experts pore over statements emanating from the Soviet Union, the Russians also can and do read statements emanating from Washington.

Let us turn the current situation around.

What would be our reaction if Moscow at the same time were charging us with development of a first-strike capability and calling for disarmament talks?

I suggest that we might well doubt Moscow's intention to participate in serious arms talks.

Since the Russians also read and interpret our statements, I suggest that the voice of the Defense Department may well be drowning out the voice of the State Department which says that this Nation wants arms negotiations.

Mr. President, there is no reason why chances of successful talks should be endangered in an effort to win the debate over immediate deployment of the ABM.

Let this Nation speak with one voice, and let that voice be in favor of immediate arms talks.

I ask unanimous consent that Mr. Childs' column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 23, 1969]

PROSPECTS FOR ARMS TALKS SEEM TO BE LOSING GROUND (By Marquis Childs)

Not long before he left on his Asian trip, Secretary of State William P. Rogers met with Soviet Ambassador Anatoly F. Dobrynin. Rogers wanted to reaffirm to Dobrynin what he had said publicly—that the United States would be prepared to enter into arms negotiations with the Soviet Union in the late spring or early summer.

Reporting the discussion to colleagues, Rogers stressed Dobrynin's concern over delay in the long-heralded talks. He quoted the Soviet Ambassador as saying with the wry humor that is one of his characteristics: "You are sure you don't mean Indian summer?"

It now appears there will be a delay in the start of the effort to checkmate another sharp upward spiral in the nuclear arms race. What in bureaucratese is called "slippage" has taken place. From White House sources comes word it may be August before the American side bears out this pessimistic estimate.

As the days slip by, the fear grows that a last chance to head off another and perhaps the ultimate round in the race will be lost. Two reasons underscore this fear. One is evidence of a hardening attitude in Moscow. The military appear to have increasing weight in the Kremlin.

The second fear is of an accident that suddenly in flaring headlines puts an end to all hopes of talks. The U-2 spy plane shot down in 1960 wrote finish to the attempt of President Eisenhower to abate the cold war and arrive at competitive coexistence with the Soviets. The Russian invasion of Czechoslovakia last August cut across the carefully laid plans of President Johnson to begin arms talks. An accident would all too obviously suit those who in private oppose arms limitation.

If any single factor has damped the prospect for arms talks it is the decision of the Nixon Administration to start deployment

of anti-ballistic missiles to safeguard intercontinental missiles. This is not so much because it will mean any significant change in the strategic balance between the two nuclear giants, but because of the loud propaganda coming from Secretary of Defense Melvin R. Laird and other defense officials to convince Congress the Soviets are preparing a first-strike capability to cripple the United States.

No walls of silence, such as can be imposed by an authoritarian system, surround the United States to keep the angry ABM debate within the American family. All of the speeches and statements by Laird, Dr. John S. Foster Jr., director of defense research and engineering, and others carrying the torch for ABM are avidly read in the Kremlin. It is hardly necessary to add that they serve the cause of the hardliners who, it is a safe conjecture, argue that it is useless to try to come to any agreement with the warmongering imperialists in Washington. A recent visitor from the Soviet Union put this question: "What if Grechko was saying the things Laird is saying?"

Imagine Marshal Andrei A. Grechko, Soviet Defense Minister, writing in Pravda or trumpeting in a speech on Armed Forces Day that the United States was accelerating the build-up in both offensive and defensive nuclear weapons. And what for? Why, to knock out the Soviet's retaliatory capability, with America triumphant in a first strike and the Soviet Union forever crippled, if not destroyed.

The consequences for any future arms talks would be pretty serious. How can we ever deal with people like that who charge us with such dastardly intentions? The argument that the Laird blasts do not matter, since there is no public opinion in the Soviet Union, is fallacious. A kind of opinion at the very highest level is subject to the news from everywhere and particularly from the other nuclear giant across the great divide.

The director of the Arms Control and Disarmament Agency, Gerard C. Smith, will be the principal negotiator in the first round when—and at this point caution dictates an if—it begins. Smith is determined that the talks will succeed. While they may not bring a reduction in nuclear arms, at a minimum they should checkmate a new spiral. The disarmament agency is hopefully setting a date between July 15 and August 1 for the start of the talks. Since spring ends on June 20, July 15 would still be within Secretary Rogers' pledged timing.

No one questions Smith's dedication and sincerity. But he faces many handicaps within the Administration. A month ago the word was put out that he would have a strong, capable deputy. An approach was made to William H. Sullivan, former Ambassador to Laos and one of the ablest Foreign Service officers. Subsequently, Sullivan was named Deputy Secretary for the Far East, with emphasis on the Vietnam task force, which may say something about priorities. No deputy has been named.

Why are the forces in the inner council cold, hot and lukewarm on the arms talks? What is the reason for the slippage? This will be examined in a following column.

DR. KISTIAKOWSKY DISCUSSES THE ABM

Mr. PERCY. Mr. President, I ask unanimous consent to have printed in the RECORD a significant article written by Dr. Irving S. Bengelsdorf and published in the Los Angeles Times of May 6, 1969. The article, drawing heavily on the experience and judgment of Dr. George B. Kistiakowsky, President Eisenhower's science adviser, questions the effective-

ness of the proposed Safeguard ABM System. It is an important contribution to the debate on the merits of ABM deployment.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, May 6, 1969]
OF ATOMS AND MEN: EXPERT TELLS HAZARDS OF ANY ABM SYSTEM

(By Irving S. Bengelsdorf, Ph. D.)

Let's make a nuclear fission bomb, known more popularly as an A-bomb. The essential explosive ingredient is either uranium 235 or plutonium 239. The amount of explosive required depends upon the fissionable material used—somewhat more for uranium 235 than for plutonium 239. In either case, the quantity of fissionable material needed for a nuclear explosion to take place is called the supercritical size.

Imagine a ball or sphere of U 235 or Pu 239 of supercritical size. Suppose the U 235 or Pu 239 explosive is fabricated into the shape of a half-sphere or hemisphere of such size that when two hemispheres are brought together they then form a sphere of supercritical size. Now you have your nuclear fission bomb. Since each hemisphere is below supercritical size, it can be kept in storage and will not explode. When you want the bomb to go off, just bring the two hemispheres together to produce a supercritical size and explosion.

HOW IT WORKS

Both hemispheres of fissionable material must be brought together suddenly and vigorously. So, each hemispherically shaped nuclear explosive is surrounded with ordinary chemical explosives, arranged and shaped in such a way, that when the chemical explosion occurs, the two hemispheres are pushed and driven together. Pow!

During World War II, Dr. George B. Kistiakowsky helped in the development of American nuclear fission bombs. He worked out the arrangement and shape-design of chemical explosives used to push together pieces of fissionable material so that they suddenly would come together to form a mass of supercritical size. Kistiakowsky is professor of physical chemistry at Harvard and is one of America's outstanding scientists. In mid-1959, he was selected by President Eisenhower to be his special assistant for science and technology.

One of the first problems Dr. Kistiakowsky faced was the Army's request to install an antiballistic missile system (ABM) called Nike Zeus. It had serious technical shortcomings. The performance of both its radars and intercepting missiles was poor for the defense job that had to be done. President Eisenhower decided not to deploy the Nike Zeus ABM. So did President Kennedy.

In recent testimony to the U.S. Senate, Dr. Kistiakowsky pointed out, "Had the deployment of Nike Zeus been authorized in 1960-1961, we would have just about now the full system in operational readiness, after spending what was then estimated at \$20 billion and could have been—judging by analogy with other large weapon systems—twice as much. Considering the current numbers and sophistication of offensive missiles now being deployed by the superpowers, it is technically certain that the Nike Zeus ABM system would now be of little value."

And the same can be said of the small Soviet ABM defense system that for several years has ringed Moscow and has not been expanded into a massive Soviet ABM system to protect other Soviet cities or sites.

Kistiakowsky added, "Nike Zeus would be obsolescent or even obsolete, judging by the fact that the probably somewhat more modern Soviet (Galosh) ABM defenses around

Moscow are rated of little value to the Soviet Union by our competent military experts." ABM systems of the Soviet Galosh type easily can be overwhelmed by sophisticated penetration aides of the types carried by American offensive missiles.

FUNCTIONAL UNCERTAINTY

Dr. Kistiakowsky also expressed doubt about the smooth functioning of any complex ABM system. He stated, "The components used in presently proposed American ABM systems, the radars, missiles and computers, are much more advanced than were those of Nike Zeus. But the new systems are extremely complex and a massive failure cannot be excluded for a system that must function the very first time it is tried out as a whole."

"The proposed ABM systems involve mammoth computers because in the few minutes that would pass between detection and interception of incoming missiles, no human command organization could decide upon and then manually execute the proper defense tactics."

But computers, however fast they are in making decisions, must be instructed in advance by humans on what to decide upon in every situation that will confront them.

"Thus, however, elegant the electronics, in the end one must trust that the computer programmers (the humans who write the sets of instructions or programs that computers follow) will correctly anticipate all the future tactics that will be used against our defenses. They must write correct programs for discriminating between warheads and decoys, without knowing for sure what their characteristics will be."

This dependence on radars and computers to make "Doomsday" decisions has led Dr. Herbert F. York, UC San Diego physics department chairman, to state, "When we pursue the ABM we are not on the track of the ultimate weapon, but on the trail of the ultimate absurdity."

Dr. Kistiakowsky concluded, "Having tried to use the Boston automatic telephone system after a great snowstorm of a few weeks ago, I feel sensitive about the ability of complex automatic devices to overcome even the blind vagaries of nature, not to mention skilled human intellects of a potential enemy."

KUSKOKWIM BATTLE: THE STORY BEHIND IT

Mr. GRAVEL. Mr. President, the American public has recently been informed about the development of co-operatives in Alaska, primarily because of the controversy surrounding a particular case on the Kuskokwim River in 1968.

The following story, taken from the weekly newsletter of the Rural Alaska Community Action Program, describes the real meaning of the controversy. The author of the article, Mr. John Wiese, is the fisheries editor of the Anchorage Daily News. Mr. Wiese is unquestionably one of the foremost working experts on Alaska fisheries, and the leading commentator on Alaska fisheries matters.

As many Senators well remember, the Kuskokwim case involved the sale of a harvest of king salmon to a private Japanese company. The sale was negotiated by the Kuskokwim Co-Op, a wholly owned and operated Eskimo co-op, under the management of local Bethel fishermen.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KUSKOKWIM BATTLE: THE STORY BEHIND IT

(EDITOR'S NOTE.—The RURALCAP board of directors last week passed a resolution supporting the Kuskokwim Fishermen's Cooperative in its efforts to be an independent business and in its rights to proceed with competitive business transactions without interference from the Fish and Game Board. RURALCAP helped the cooperative last year in getting established. The following analysis of the situation is reprinted with permission of the Anchorage Daily News.)

(By John Wiese)

The big flap over Kuskokwim river salmon, a fishermen's co-operative and Japanese buyers involves a broader issue than that which appears on the surface. It's like an iceberg. . . .

At first glance it appears to be a case of officialdom looking askance at a small group of Native fishermen delivering salmon to a foreign outfit, with some observers disapproving because they feel that it amounts to unwarranted action against a deprived people, while others see the Kuskokwim project as an unfair activity on the part of those fishermen and foreign competitors.

Beneath the surface there is a history of chronic conflict that involves a long-established set of fisheries operators—generally called "the Alaska canned salmon industry"—and most of their fishermen.

The industry people are almost exclusively from out-of-state. The fishermen are principally Alaska residents, including Natives and non-natives.

In the past few days the Alaska Board of Fish and Game adopted a policy opposing any arrangement to allow foreigners to buy salmon from Alaska fishermen. The board's act—the exact impact of which is hazy at this time—drew reactions from several leaders among fishermen that help to illuminate the issue.

For the most part these expressions condemned the board's position. Where it wasn't condemned it was condoned—but out of a feeling of futility.

Truman Emberg, a veteran leader of Bristol Bay resident fishermen, observed: "The board sure exceeded its authority in that one. In the past, whenever any fishermen's group has gone to the board for a regulation based on an economic rationale, the argument has been rejected with the excuse that the board only has authority in biological-conservation matters."

"This makes a man wonder who got to them. If the fishermen in Alaska are ever going to make any headway they've got to get some competition to face the canned salmon industry and it looks like the board acted to make sure that this won't happen."

In Cordova, fishermen's co-op business manager Harold Hansen said, "This is an issue affecting fishermen of the entire state. The canned salmon boys must have influenced the board. And the board did something that makes it clear that they want to remove the Alaska fishermen from any competitive market whatsoever."

"They want to keep the fishermen here in the state totally dominated by the Alaska canned salmon industry. Their action to try to keep Japanese competition out is completely arbitrary and it comes from a board that wants to see the fishermen totally dominated by the canned salmon industry, just as they were prior to statehood."

In Kodiak, Sam Selvig who is president of a fisherman's marketing organization said, "It is unrealistic to try to use Japanese buyers as competition and it isn't going to make any difference."

Selvig contributed this pessimistic observation supporting his sense of futility:

"We have tried to use the threat of Japa-

nese against our canners but over 90 per cent of the fishing fleet is owned and controlled by them in one way or another—at least here in Kodiak—and we're only kidding ourselves trying to run a bluff with a threat like that."

"We had cases here recently—when we were trying to make a deal with them—where they cut off the groceries and credit and forced fishermen to take what they wanted anyway. I can't see bucking a situation making empty threats. It only does harm in the long run."

"The Japanese have never left us anything good anyway, as I see it. So I don't see why we should let them in."

Commercial salmon fishermen of Alaska are faced with a unique condition that is historic and chronic. They are producer-laborers in an outmoded industrial operation in which few modern-day benefits reach them.

Technically they are "independent entrepreneurs" but their independence is largely mythical. They are legally restricted from employing any effective form of collective bargaining.

As a substitute they are permitted to get together in what is termed "marketing co-operatives," but which are usually ineffective because of legal restraints and because they lack any appreciable degree of independence from canners.

Leaders in the past several years have placed hopes for a remedy in a three-pronged assault on the status quo:

1. Bring in meaningful competition to the established canned salmon industry, even if this means bringing in Japanese buyers as a temporary expedient. This was begun in 1964 when Cordova fishermen and canners deadlocked and the fishermen, aided by a sympathetic state regime, sold most of their catches to Japanese (plus one break-away canned salmon operator.)

2. Establish genuine fishermen's cooperatives to compete with (or to replace, if necessary) the established industry. Since this requires funds far beyond the present abilities of fishermen, there has been slow progress in this direction.

3. Work for the establishment of modern processing facilities in fishing towns to compete with canneries, especially public cold storages. These facilities would have to be financed by such public funds as the U.S. Economic Development Administration or the Small Business Administration.

Three such facilities have been applied for and are moving forward, exclusive of the one secured for the Kuskokwim Fishermen's Cooperative at Bethel. The three would be located at Dillingham in Bristol Bay, at Cordova and in Yakutat.

It is understandable, then, that Alaska's fishermen generally are closely following the latest Kuskokwim River flap.

If the Kuskokwim co-op and its program can be scuttled, they too can founder. If it succeeds, then they have a precedent to help their cause.

And, conversely, the masters in the established canned salmon industry of Alaska are aware that a successful Native-Japanese venture on the Kuskokwim can spell trouble for them. . . .

If the Kuskokwim Native fishermen can be advanced toward their goal of a genuine co-operative operation, and a freezer of their own, by interim Japanese competition this year (especially after last season's ruckus) then the same formula can be worked out for Bristol Bay, or for Cook Inlet, or Cordova, or anywhere else.

BERNICE GIBBS ANDERSON—ONE OF THE TRUE MOVERS OF THE GOLDEN SPIKE CELEBRATION

Mr. BENNETT. Mr. President, the recent Golden Spike Centennial Celebration

was a special tribute to one lady, Mrs. Bernice Gibbs Anderson. In the words of the Salt Lake Tribune, Mrs. Anderson is "undisputedly acknowledged as the persistent force behind the preservation of Promontory Summit as a national historic site and the memorializing of the driving of the Golden Spike."

The Tribune goes on to point out that "her struggles have spanned nearly half a century and at an estimated personal expense of \$10,000 primarily in transportation costs, stationery, and postage."

When she was 5 years old, Mrs. Anderson's family moved to Corinne, Utah. More than any other town in the State, Corinne was a railroad town. It had come into existence because of the construction of the transcontinental railroad and owed its existence to the railroad. While living there, Mrs. Anderson developed a fascination with the railroad.

This fascination was deepened by her research. Some of this research has already been published and has brought international interest.

Mrs. Anderson's great knowledge of this subject and her untiring efforts to bring proper public attention to the wedding of the rails at Promontory Summit made an enormous contribution to the success of the centennial celebration of the driving of the Golden Spike.

Mr. President, I ask unanimous consent that the article written by Hazel S. Parkinson, published in the May 17, 1969, Salt Lake Tribune, outlining Mrs. Anderson's accomplishments, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Salt Lake Tribune, May 17, 1969]

DREAM OF GOLDEN SPIKE COME TRUE

(By Hazel S. Parkinson)

CORINNE.—The matron of honor at the "wedding of the rails" centennial was Mrs. Bernice Gibbs Anderson (Mrs. Laren G.) undisputedly acknowledged as the persistent force behind the preservation of Promontory Summit as a national historic site and the memorializing of the driving of the Golden Spike.

Her struggles have spanned nearly half a century and at an estimated personal expense of \$10,000 (primarily in transportation costs, stationery and postage).

With the big centennial day now recorded in history, she and her husband are relaxing, recovering from the strain of the occasion. And they have time to reflect both the recent and past events.

LOOKS TO FUTURE

She is contemplating the future as well . . . the annual May 10 re-enactment presented by the Golden Spike Association of Box Elder County of which she is president. She is hoping the association will sell lots of centennial souvenirs including the association's own medallion which preceded the medal minted by the Golden Spike Centennial Celebration Commission (the federal commission). Funds, she says, will be used to sponsor May 10 ceremonies in the future.

Taking the national honors bestowed upon her in stride, she talks about the fact that Secretary of Transportation John Volpe paid tribute to her during his address last week at the Promontory Summit ceremonies. And she modestly shows the framed certificates for "appreciation" presented her by the National Park Service and the American Assn. of Railroaders.

She almost forgot the gold centennial medal given her by the GSCCC. She was

given the third (of the first six minted), the first two being presented to former President and Mrs. Lyndon B. Johnson, Gov. and Mrs. Calvin L. Rampton each received medallions of the first six.

SOMETIMES DISCOURAGED

Like any struggle there have been many discouraging moments, trying to get people interested in her cause and in getting support and in seeking donations (for expenses for annual driving of the Golden Spike reenactments).

Murray Mason, former secretary of the Brigham City Chamber of Commerce and ardent supporter, told her after an especially trying experience, "You'll never amount to anything until you've been kicked out of eight or 10 offices." She remembered that advice when things were dark and it helped, she said.

The broad shoulders of her husband were used for "crying." He has encouraged her all these years to continue, though he sometimes admits to being a little vexed at having to fix his own supper.

He teases her by saying she was just too stubborn to give up. The six Anderson children, too, have encouraged their mother's work. Daughters, Mrs. Ruth Michelli, Corinne, and Mrs. Gay Nelson (now living in Venezuela) are most interested of the children, she says. Though sons, Wayne (living in Tremonton); Clinton, (Plymouth Meeting, Pa.); Darrell, (Palm Dale, Calif.) and Max G. (Pleasant View) also support their mother's efforts. The Andersons have 27 grandchildren and four great-grandchildren.

As a child of five, Bernice moved to Corinne with her grandmother (who raised her). She recalls cattle being nervous when the trains roared by. Trains were being re-routed over the old line when trestles of the Lucin Cutoff (built, 1904-05) were being repaired. The trains were fascinating to the child. And when from a horse and buggy, she helped her grandmother herd cattle over the Promontory enroute to summer range in Black Pine Canyon, it was exciting, especially when the cowboys encountered would tell tales of the coming of the railroad, wedding of the rails and their experiences.

And her interest in the history of the Pacific Railway and in Corinne was consuming. In the early 1920s, she began writing, recording and researching.

COLLECTION'S PRIVATE

Her private collection of historical data, pictures, negatives is priceless. Many of her writings have been published. An article published in the Home Magazine section of The Salt Lake Tribune in 1942 (when the old line was dismantled), found its way all over the world. Historians by the scores wrote for more information, she said. Mrs. Anderson was a Tribune correspondent for many years.

It was the interest of college students in the history of the joining of the rails and Utah history that has been the motivation many times for her to continue the fight. She has shared many historical facts with students, historians.

Yet she still has material that has never been printed. Perhaps now that the Visitors' Center is built and the historic site is preserved and will be maintained by the National Park Service, Mrs. Anderson will find the time to publish all of her research.

She'll find release from writing, talking railroad in the iris garden behind the white frame home. The garden is the pride of her husband.

CUBAN INDEPENDENCE DAY

Mr. DIRKSEN. Mr. President, on behalf of the distinguished Senator from

Colorado (Mr. ALLOTT), I ask unanimous consent to have printed in the RECORD a statement by him relating to Cuban Independence Day.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ALLOTT

On May 20, 1902, or 67 years ago, the island nation of Cuba became independent. Today it is an understatement that Cuba is no longer independent. Rather, she is completely dependent upon the Communist bloc.

It is easy to forget how dangerous the continued presence of Fidel Castro's Communist regime is to the United States in view of our involvement in Vietnam, the problems in the Middle East, and the turmoil at home.

The people of Cuba who have been enslaved for a decade now cannot forget. The people of Latin America who must constantly fight Cuban-trained rebels and cope with Cuban-originated subversion and propaganda cannot forget. The American people must not forget either.

Cuba is as much of a menace as she ever was. Recent reports in the press and elsewhere have documented the fact that campus revolutionaries are receiving aid from Cuba. Many of the leaders of the campus revolt, and also of the Black Panther movement, have been trained in Cuba.

Refugees from Cuba continue to report the presence of dangerous missiles on the island with a striking capability that poses a clear and present danger to large American cities. Just recently, some newly arrived refugees have said that there are now more missiles in Cuba than at the time of the 1962 missile crisis.

I have no way of verifying what these refugees report, but it does seem clear that Cuba remains a military and diplomatic threat to the United States.

Just last month, in fact, the United States found it necessary to deny re-entry visas to two Cuban diplomats on the grounds that they conducted intelligence activities and gave financial and directional aid to the Black Panthers. The same action is expected to be taken against an additional five Cuban diplomats involved in the same activity.

With the threat to our cities that these revolutionaries pose, especially this summer, we cannot in any way tolerate continued support by Cuban Communists for militant disruptive activities.

Nor can we tolerate Cuban aid to student rebels. Nor should we tolerate the "exporting of revolution," which Castro mentions so frequently, to our neighbors in Latin America.

Presently, the Administration is looking toward the re-building of bridges to Latin America. The Administration is also searching for a new and effective policy toward Cuba. Certainly the best favor we could do for all of our neighbors in Central and South America—as well as for ourselves—would be to rid Cuba of Communism. Undoubtedly the President's ultimate policy will be directed toward that end, because in Mr. Nixon's own words last year: "Havana cannot remain forever a sanctuary for aggression and a base for export of terror to other lands." I emphatically support a policy directed toward that end.

STEBEN SOCIETY MARKS 50TH ANNIVERSARY

Mr. HRUSKA. Mr. President, the Steuben Society of America is a national patriotic society of persons wholly or partly of German descent, founded 50 years ago this week—on May 19, 1919.

The society this year is celebrating its golden anniversary.

Founded just 6 months after the First World War, the society concentrated its efforts on healing the wounds of war and the reestablishment of good relations with the new government and people of defeated Germany. As the flames of war subsided, Congress was considering the creation of a law to control immigration. The Steuben Society raised its voice then and assisted in obtaining a generous quota for German immigrants. Since this first law in 1923, the society has participated actively in discussions on every revision to the present, including passage of the special Emergency Relief Act of 1953.

The Steuben Society stands for the pride of ancestry that places each ethnic group's strength into the melting pot that is America. These diverse heritages are woven into the American heritage and blend to become a force of democracy unequalled in the world today.

Some of the brightest colors in the weave, some of the strongest threads, some of the most exciting designs, come from the German origin represented by the Steuben Society.

The Germans and my people, the Czechs, came to Nebraska in the early days because the land was good and prices were low. Many Germans were farmers who had, and who still have today, a love for the soil and a talent to make it bloom. Many Germans were tradesmen with a keen eye for goods and a kindness for people. These men and women came to this country and to Nebraska with ambition and a willingness to work diligently. This is the kind of honesty, integrity, and sincerity that is the foundation of this Nation and the hallmark of the Steuben Society.

I have been an honorary member of the society since 1967 and have seen the dedication and perseverance of people who feel close to a heritage and close to America.

As the Steuben Society meets on May 24, 1969, for its golden jubilee, its 50th anniversary, I am proud to commemorate this outstanding achievement which is a tribute to those who believe in the kind of devotion for America felt by Friedrich Wilhelm von Steuben, who said:

I should willingly purchase at the expense of my blood the honor of having my name enrolled among the defenders of your liberty.

EVANGEL COLLEGE STUDENTS HOSTS TO SENIOR CITIZENS

Mr. SYMINGTON. Mr. President, we read so much in the daily press and see and hear so much on television and radio about the unrest on the college campuses throughout America that we all too often overlook the fine work being done by the great majority of students.

As an illustration I ask unanimous consent to have printed in the RECORD a press release from Evangel College of Springfield, Mo., about Senior Citizens Day on their campus on Friday, May 9.

At that time, Evangel students brought to the campus senior citizens from the area for a 1-day visit to the college halls.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

PRESS RELEASE FROM EVANGEL COLLEGE

Evangel College students will build bridges across the generation gap Friday as they play host to elderly Springfieldians from three rest homes.

It will be Senior Citizens Day, sponsored by SCOPE, the all-student Christian outreach organization at Evangel.

The corridors connecting Evangel's buildings, a legacy from the days of O'Reilly Hospital in World War II, will simplify the campus visit. Many of the guests will be in wheelchairs, or walking with canes.

The collegians will furnish the cars and call for their guests at 7:30 a.m. at Mercy Villa, Grand Acres, and Sunshine Acres. Each guest will receive a name tag, prepared by the students. The students have also made posters promoting the day and placed them in the college halls.

First scheduled event will be chapel service with the student body at 8:30 a.m., when the senior citizens will be honored. Speaker will be Wayne Kraiss, Evangel director of development.

After chapel, refreshments of angel food cake and punch, suitable for diabetics, will be served in the college cafeteria. Slides of the college and SCOPE will be shown.

Following will be a classroom visit and campus tour, ending at the library, where the guests will be picked up to return home in time for lunch.

Senior Citizens Day is the climax of a rest home visitation program carried on by SCOPE throughout the school year. Judy Zimmerman, rest home visitation chairman and chairman for Mercy Villa, is coordinating the day. She is a junior elementary education major from Bedford, Penna. Rosanna Stoughton, St. Louis, also a junior elementary education major, is chairman for Grand Acres, and David Murray, Cusseta, Ga., a freshman history major, is chairman for Sunshine Acres.

"Since we go to the rest homes regularly, this is a chance for them to see where we live. We want to give them an enjoyable day. Another purpose is to have the kids think a little about these people who are so often forgotten," Miss Zimmerman says.

This is the second year the students have sponsored Senior Citizens Day. Last year, 16 senior citizens were guests. The students expect considerably more Friday.

SAFEGUARD ANTI-BALLISTIC-MISSILE SYSTEM

Mr. BAKER. Mr. President, previously I addressed the proposition that congressional debate on ABM should be free of partisan crystallization and hopefully as free of emotion as possible. In that light, I am especially pleased to invite the attention of the Senate to a resolution adopted without dissent by the Senate of the State of Tennessee endorsing the proposed Safeguard ABM system.

The resolution was signed by 26 of the 33 members of the Tennessee Senate and was authored by a leading and distinguished Democratic member of that body. It had total bipartisan support.

I commend the Tennessee State Senate for their statesmanlike handling of this matter, and I commend their action and attitude to the attention of this body.

I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF TENNESSEE STATE SENATE

A resolution commending President Richard M. Nixon for his foresight in the decision to deploy a Safeguard Anti-Ballistic-Missile System and petitioning Congress to appropriate the necessary moneys for immediate implementation of same

Whereas, President Richard Nixon has, for the safety and security of the United States, announced his decision to deploy an anti-ballistic missile system designed to protect U.S. land-based retaliatory installations which constitute the greatest deterrent to nuclear war with the Soviet Union and

Whereas, As envisioned by President Nixon, the outlined "Safeguard" ABM system will have the additional merit of defending our country against the threat of attack by Communist China, whose nuclear potential is less sophisticated and more limited than that of the Soviet Union and

Whereas, Opponents of President Nixon's "Safeguard" ABM plan have expressed concern as to its effect upon Russian public opinion, as expressed in the government-controlled press, even though Soviet Russia has already established an ABM system, apparently without concern for American public opinion and

Whereas, Said opponents seem to have many greater concerns, including that noted above, than concern for the safety of this country, being in many instances the same individuals who have given aid and comfort to the North Vietnamese and Viet Cong Communists against whom Americans and South Vietnamese young men are fighting a bloody war, by publicly harassing every President who has been charged with the unwelcome responsibility of directing the conduct of that war; and

Whereas, The United States Congress will be asked for funds to implement the "Safeguard" system; now, therefore

Be it resolved by the Senate of the 86th General Assembly of the State of Tennessee, That President Richard M. Nixon be commended for his courage and foresight in taking this action which is so vital to the welfare of the people of the world; and

Be it further resolved, That the Congress of the United States be petitioned to provide moneys necessary for the system deployment without delay; and

Be it further resolved, That these presents be spread upon the official records of this body and that copies thereof be sent to President Nixon, to Defense Secretary Melvin Laird, to the members of the Tennessee Congressional delegation and to the news media.

MAJOR OIL COMPANIES USE TAX-FREE PROFITS TO SQUEEZE OUT SMALL BUSINESSMEN

Mr. PROXMIRE. Mr. President, for a long time I have been working to close the gaping tax loopholes enjoyed by the oil companies. Because the oil companies do not pay their fair share of the tax burden, we all have to pay more in taxes than we should. However, there is another, just as significant, inequity resulting from the present tax treatment of the oil industry.

The present tax structure encourages the oil industry to shift as much of its profit as possible into the producing end of the business in order to take advantage

of the oil depletion allowance, intangible expensing and so forth.

The independent gasoline and fuel oil distributors and gas station operators do not have the benefits of all these tax loopholes. They do not have gigantic untaxed profits, but must compete with the major oil companies who do.

I have received two letters from such independent businessmen. I ask unanimous consent that they be printed in the RECORD at the conclusion of my remarks.

The letters, from small businessmen involved in the oil business, point out precisely the points which I have been making. They cannot compete with the major oil companies which do not have to make a profit in the distributing and marketing of oil because of their untaxed profits in the producing of oil.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CLAREMONT, CALIF.,
May 20, 1969.

Senator WILLIAM PROXMIRE,
New Senate Office Building,
Washington, D.C.

DEAR SENATOR PROXMIRE: I am an independent gasoline jobber in Southern California and I am writing to you because the retail price wars and the predatory pricing of the major oil companies are ruining me financially. These conditions are also ruining fellow independent jobbers and independent gasoline dealers in this area. Here are the facts about our situation:

1. In February 1969, the major oil companies raised the price of crude oil 20¢ per barrel. Since they own their own crude oil sources, they were, in effect, raising the price to themselves on crude oil production where they happen to get a 27½ percent depletion allowance. They have thus increased their net, untaxable income by 5.5¢ per barrel.

2. In late February and early March of 1969 the major oil companies raised the wholesale price of gasoline to their independent customers and dealers from 0.6¢ to 1.0¢ per gallon because, they said, the price of crude oil had gone up. Thus the oil companies raised the buying price of all their small independent customers who have no tax advantages, because of a price increase in crude oil which the companies buy from themselves and on which they receive a 27½ percent depletion allowance.

3. In late March 1969, the retail market in the Los Angeles basin began to drop. It is still doing so. The small, independent jobbers, such as myself, the independent service station operators and the dealers of the major oil companies were all caught in the margin squeeze—the wholesale price was up and the retail price was down.

The major oil companies have placed themselves in an ideal position: They are getting more for their crude oil, more for their gasoline, more depletion-allowance protected profit, and are forcing the retail market down to wipe out the small, independent gasoline merchants while making more money than ever.

While the major oil companies fight in Southern California and crush the small gasoline retailers here, they maintain high retail prices elsewhere throughout the United States and the world. But after they have put us out of business here, or hurt us so badly that we are no longer a factor, they will raise retail prices in Southern California and move to other markets to drive other jobbers and dealers out of business. Thus, eventually, they gain control of the entire retail market. All the time the major oil companies are doing this, the small businessmen whom they are destroying, and the

other taxpayers, are carrying the tax load that these corporate giants are evading through their depletion allowance.

Major oil corporations don't vote. They don't pay their fair share of taxes. But they do try to buy influence, to pose as social benefactors who must be sheltered for the national good; and they use the tax benefits taken from our gullible society to get a stranglehold on every facet of the oil industry, to destroy their independent competition and to branch out into other businesses. Among their widening interests are: real estate, banking, grocery stores, trucking, airframe and space technology, plastics, paint and chemicals.

We feel that the major oil companies should be allowed to sell gasoline only at a definite, established wholesale price free from rebates, competitive allowances and all other devices used by them to lower retail markets in local areas and thereby destroy their independent competition.

We believe the oil depletion allowance should be carefully scrutinized by Congress, and either abolished entirely or else regulated so that it can only be used against actual drilling costs. Further, we believe that all oil companies receiving a depletion allowance should be divested of all their holdings that do not relate to oil production, refining or marketing, including real estate.

We small businessmen vote, the American taxpayers vote; we work for our candidates and on election day each of us is more important than the largest oil corporation.

We ask you for the protection of our government from destruction by these corporate monsters; we must have it now or we will surely perish.

Sincerely yours,

JAMES L. BEEBE.

S. E. RONDON Co.,

Pasadena, Calif., May 19, 1969.

Hon. Senator WILLIAM PROXMIER,
New Senate Office Building,
Washington, D.C.
(Attention of Mr. Martin Lobel.)

DEAR SIR: Upon the suggestion of Mr. Martin Lobel, in which I had a long distance phone conversation May 19, 1969 12 noon Pacific Daylight time, I am writing my complaint on unfair competitive advantage of the major oil companies in the retailing of gasoline.

The S. E. Rondon Company has been a gasoline jobber and distributor for 24 years in Southern California.

The major oil companies increased the price of crude oil 20¢ per bbl. and as a result increased wholesale prices 1/10 of a cent to 1¢ per gallon. This was their justification: This increase in price gives the majors another increase of tax advantage, as a result, of 5 1/2¢ per bbl. on the depletion allowance.

All majors in most cases have enough crude oil to supply their own needs up to 90%. In effect they increased the crude oil price which they are buying from themselves.

In Southern California retail prices of gasoline in major stations have dropped from a normal 34.9 to a low of 24.9. Resulting in elimination of competition by financial squeeze. This competitive advantage by the major is due and only due to 27 1/2% depletion allowance which is used to support their drop in retail price of gasoline.

By using the depletion allowance they take specific areas to destroy independent competition of small business men who do not have this tax advantage. After competition is destroyed they raise the retail price and move to another area. Small independent business men pay a fair share of the tax and vote. Oil corporations pay little tax and don't vote.

I sincerely hope you can prevail to restore competition on an equal basis then the tax

paying public would not be footing the bill of the major in these costly retail price wars.
Sincerely yours,

S. E. RONDON.

P.S. I'll gladly fly to Washington to further relate my problem as a small business man or pay your expenses to come to Southern California for a personal observation.

U.S. RELATIONS WITH CUBA

Mr. DOMINICK. Mr. President, on March 30, Mr. John Plank wrote for the New York Times magazine an article entitled "We Should Start Talking With Castro." In effect, the article urged us to turn over Guantanamo Naval Base to Castro; to reopen trade and diplomatic relations; and to treat that Government as though it were normal; instead of as being repressive, repulsive, retrogressive, and exporting revolution as it seems to most of us with sound vision.

On May 11, 1969, Mr. Paul Bethel's letter to the editor replying to Mr. Plank was printed in the New York Times. It is, as usual, effective, knowledgeable, readable, and backed by facts instead of the wishful thinking of Mr. Plank. Mr. Bethel is an expert not only on Cuba, but on Castro's revolutionary activities throughout Central and South America.

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the New York Times Magazine,
May 11, 1969]

LETTERS: A POLICY FOR CUBA

To the Editor:

John Plank in "We Should Start Talking With Castro," March 30, asserts that there is "one school of thought in the hemisphere that, unhappy with current policy, would turn—instead of toward accommodation with Castro's regime—toward increased pressure, military or other, against it. Paul Bethel, who with Spruille Braden and others, speaks for the Citizens Committee for a Free Cuba, reflects this viewpoint. . . ." So, may we add, does President Nixon.

In his public utterances made during last fall's campaign, Mr. Nixon had this to say about Cuba: "It has become the center for external aggression and the export of revolution to the Western Hemisphere. . . . Therefore, U.S. foreign policy requires—and foreign policies of all other nations of the world require—that this kind of government be quarantined; quarantined for the sake of peace." Moreover, Mr. Nixon said: "New leadership is pledged to do better."

Mr. Plank also implies that it is only through groups such as the U.S. Citizens Committee for a Free Cuba that, in his words, "one gets a steady stream of alarmist reports: of Cuban caves chockablock with missiles, of secret Soviet submarine bases along Cuban coasts. . . ." Then he states: "Such thinking is certainly unhelpful and could be dangerous." Unhelpful to whom? Dangerous to what? These are strong accusations.

Here is what Hanson Baldwin, recently retired military editor of The New York Times, had to say on the subject of missiles: "Caves on the island are known to be packed with military equipment of various sorts, and if missiles are not included in these below-ground inventories today, it is perfectly possible that they may be tomorrow." On submarines, Mr. Baldwin states that the "likeliest utilization of a Communist Cuba by Russia is as a naval and submarine base or refueling and replenishing station."

Mr. Plank, in saying that the U.S. Naval Base at Guantanamo ought to be turned over to Castro, overlooks Mr. Baldwin's warning. It is only the incredibly naive who can believe that by handing the base to Cuba we would not, in fact, be turning it over to the Soviet Navy—and Bayles Manning, dean of the law school at Stanford University, Henry Wriston and many others hit hard at the thought of relinquishing control. In the face of this formidable array of expertise, Mr. Plank flatly asserts: "It is legitimate to ask who would be more disturbed, the United States Navy or Fidel Castro, if we were to decide to turn the base back to Cuba. A persuasive case can be made that our presence at Guantanamo is more useful to Fidel than to us." If such a case can be made, Mr. Plank has failed to present it.

As for the indirect threat to the hemisphere and the United States itself, Mr. Plank states that we should not "exaggerate" Castro's capacity to export wars and subversion. He also finds Soviet diplomatic and economic penetration of Latin America to be a wholesome development. As to the latter point, there is abundant evidence that the Soviet Union is using its trade missions and diplomatic establishments to advance Communist penetration, as well as to help Castroite guerrilla wars.

It should therefore be a matter of concern, not of subdued elation by Mr. Plank, who notes a "growing number of serious voices . . . calling for a fundamental reassessment" of the isolation of the Castro regime. It is not difficult to imagine, since the missile crisis resulted in the lodgment of Soviet power in the Caribbean, that Mr. Plank's "serious voices" actually are frightened voices, desecrating in their determination to maintain their free domain inviolate.

Another point regarding the Russian-Cuban combination is this. Castro's allegiance to Moscow is strong, perhaps irreversible. Knowing this, Mr. Plank solves the problem by simply inviting the Russians to take a seat in hemispheric affairs, advancing the obvious fiction that they are merely "regularizing" their diplomatic and trade relations and no longer are acting like Communists. The Kremlin knows that its office is to wait upon events and policies such as those advanced by Mr. Plank to gain recognition of its position in Cuba.

Should the United States accommodate the Castro regime, it would result in an intolerable bipolarization of power in Latin America. The left would see in it a license to seize power; the traditional right would move to prevent it; weak political institutions in the middle would be overwhelmed. Capital investments would simply disappear, along with the Alliance for Progress.

From the Marxist-Leninist point of view, the Cuban "revolution" can be considered successful only to the extent that it envelops Latin America and isolates the United States. Only by submitting ourselves abjectly to Castro's wishes (actually proposed in detail by Mr. Plank) would even a frail coexistence be possible. It would break whenever we refused to do so. This was true in 1959; it is even more true in 1969.

I have not taken the time to challenge Mr. Plank's assertion that Castro enjoys "vast popular support," simply because Mr. Plank saved me the trouble by writing, "he has exported or imprisoned most of his potential and actual effective opposition," quite obviously the mark of an unpopular and oppressive regime.

A policy of rapprochement at this time could have no effect other than to rescue Fidel Castro from the wrath of his own people and advance him along the road of conquest.

I might add that the quotes of Hanson Baldwin and the positions cited by Bayles Manning and Henry Wriston appeared in a book of essays published in 1967 by the

Brookings Institution, "Cuba and U.S. Policy." The editor, curiously enough, was John Plank.

PAUL D. BETHEL,
Executive Director, Citizens Committee
for a Free Cuba, Inc., Washington.

FOURTH INTER-AMERICAN CONFERENCE OF THE PARTNERS OF THE ALLIANCE—A MAJOR SUCCESS

Mr. BENNETT. Mr. President, Salt Lake City recently was host to the Fourth Inter-American Conference of the Partners of the Alliance. All Utahans joined me in the anticipation that the Partners Conference, May 10-14, would be a productive and successful meeting of peoples representing the private sector in North, Central, and South America. I am pleased to report to the Senate today that the conference was a major success.

From the reports that I have seen following the conclusion of the conference in Salt Lake City, I am convinced the working sessions in which more than 300 U.S. and Latin American delegates, representing 37 U.S. States in partnership with 37 areas in 16 Latin American countries, reflected a determination on the part of the delegates to develop specific action-oriented projects designed to make an impact on the fields of agriculture, education, public health, and business and industry.

Many favorable reports have also reached me regarding the outstanding leadership displayed by the cochairman of the Fourth Inter-American Partners Conference, Mr. Royden G. Derrick, president of Western Steel Co., of Salt Lake City; and Dr. Edgar Barboosa Ribas, outstanding physician of Curitiba, Brazil, who joined, in exemplary partnership fashion, to conduct an outstanding conference of citizens who are voluntarily giving of their time and talents collectively to attack the basic problems impeding the economic and social development of this hemisphere.

One of the highlights of the Partners Conference was an address by the Assistant Secretary of State for Inter-American Affairs and the U.S. Coordinator of the Alliance for Progress, Hon. Charles Appleton Meyer, who addressed the banquet session on May 13, 1969. In his speech, Mr. Meyer praised individual and group initiatives in the field of foreign relations, stating that such initiatives are perhaps "the shortest description possible for the Partners of the Alliance." He added:

In fact, you and hopefully more like you, may be the great ingredient that, together with science and technology, enables Latin America to close the gap between what are called less-developed nations and developed nations.

At the beginning of his remarks, Mr. Meyer delivered a message from President Nixon who characterized the participants in the Partners of the Alliance program as "the vanguard of voluntarism in the Americas." I ask unanimous consent that the text of the President's message to the delegates be printed in the RECORD.

There being no objection, the message was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, May 12, 1969.

I want you to know the great importance that I attribute to your work. The Partners of the Alliance exemplify the best of the Hemisphere's joint efforts. Any working Alliance for Progress which has set challenging goals such as ours must be a partnership of people as well as nations. You have recognized this, and you are meaningfully advancing our common objectives.

Productive international cooperation must be between partners—partners who listen to each other, who share a cause, and pursue it with equal vigor. Your continuing success in furthering such cooperation is rewarding for all of us.

The creative potential of our societies can be fully realized only if individual citizens exercise initiative and are willing to reinforce the work of their governments. It is imperative that we realize this full potential if we are to deal effectively with our immense problems and achieve the kind of progress we seek.

As civic-minded individuals and groups, the Partners of the Alliance are in the vanguard of voluntarism in the Americas. You are using your talents and your time constructively for our benefit, and for that of all our Sister Republics.

I send you my warmest best wishes for sustained achievement.

RICHARD NIXON.

Mr. BENNETT. Mr. President, I ask unanimous consent that the address delivered by Secretary Charles A. Meyer be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY CHARLES MEYER, ASSISTANT SECRETARY OF THE STATE FOR INTER-AMERICAN AFFAIRS

Jim Boren, aided by two of my associates, Datus Proper and Hoyt Ware, labored mightily to write a speech for me to deliver to you tonight. It is a good one and it challenges you Partners with ideas. I don't know that you need challenges with ideas. You may be like the U.S. farmer who wrote to the Department of Agriculture and said: "Please don't send me more of your manuals on how to farm better. We ain't farming as well as we know how right now."

In honesty I should have been here all day Monday and Tuesday to learn more about your successes, your disappointments (if any) and your plans. Had I, I would not run the present risk of saying the unnecessary. Given my preferences, my wife and I would have sneaked out of Washington Friday, spent the weekend in our house at Vail, Colorado, and been here late Sunday night, 50% courtesy of Uncle Sam! Instead we looked for, found, and on Monday made a down payment on a house in Washington.

Six weeks ago today I was sworn in but not paid for; our house in Philadelphia was sold but not paid for; our house in Washington is found but not paid for. I am in the process of exchanging offices with Him Fowler, Deputy Assistant for AID, and redoing both. Not only am I committed by personal conviction but when Uncle Sam pays the bill for the revised office arrangement, he can't afford to hire me without at least a second thought.

So damas y caballeros—

Here we are on May the 13th. Yesterday Governor Nelson Rockefeller began his series of four survey trips to each of the twenty-two nations represented by my bureau. President Nixon, in his address to the Pan American Union told us all that Governor

Rockefeller's report (or reports) would weigh heavily in this, the president's decisions re Policy for us.

As many of us present know, President Nixon has been interpreted as disenchanted with the Alliance.

I am learning the dangers of interpretive reporting. It seems that if the president were to say:

"Today is absolutely beautiful", he could be interpreted as follows:

"Nixon criticized yesterday and cast some serious doubts on tomorrow."

The fact remains that the administration has not leapt into the first 100 days with policies on everything—including us.

The fact is that I agree with this deliberate technique one hundred per cent.

Everything in my experience points to the fact that anything important and constructive involving millions of others that is done quickly is wasteful or worse.

The old saying, "Rome was not built in a day", is still valid. Brasilia may be an exception.

We are, in short, too important to be rushed into programs. Time is important too, but relative. One hundred days or two hundred days invested in deliberative analysis of the future of 450 million North, Central, Caribbean and South Americans—with as much as 400 years or countless centuries of past history on these continents and, God willing, a limitless future, seems to me a good investment.

There is, however, impatience in the air. Our U.S. press reflects this. Our U.S. Congress feels it. All of us have been so conditioned to motion, to a cult of "instantaneism", to a new model every year that we feel adrift without a pause (except for coca cola).

If this is true, it is not applicable to people-to-people relationships as exemplified by you, the Partners of the Alliance. Or it need not be. Flying West today (and it has been an absolutely beautiful day), it kept occurring to me that there would be little or perhaps nothing between Washington, D.C., and San Francisco, if the U.S. Government had had to plan it all. It kept occurring to me that Central and South America are a land area two and one half times the size of the U.S.A. and that our governments have been involved in developmental planning for this massive area with increasing intensity for about 20 years.

The extraordinary complexity of the development task loomed bigger and bigger and it occurred to me somewhere in Kansas that programs only accomplish what people accomplish. No organizational chart is worth a damn—only the people it represents, and people with a defined objective can do wonders with no organizational chart at all.

In short, I honestly believe it would have been impossible to build the U.S.A. with a master plan. The U.S.A. with its strengths and weaknesses is only the sum of all its parts, which parts are almost wholly the sum in turn, of individual and group initiatives, aided, abetted and regulated by government.

Individual and group initiatives—perhaps that is the shortest description possible for the Partners of the Alliance. In fact, you and hopefully more like you may be the great ingredient that, together with science and technology, enables Latin America to close the gap between what are called less-developed nations and developed nations.

It may be that you and more like you can plant or have planted the basic ingredient of motivation without which no individual can believe he or she can succeed.

Admittedly, in the human race, given equality at any grade on the scale from none of the advantages to all of the advantages, some humans just aren't motivated. I have just read of (and have asked one of my right arms to check more on Thursday) a social scientist from Harvard who has conducted

developmental sessions in India to identify those who are unmotivated; those who have latent entrepreneurial talents, and to develop confidence in them to break out of inherited resignation or traditionally imposed ceilings of commercial achievement. And this appeals to me as an exciting concept and one that is potentially implementable on a partnership basis. One other thing that is exciting about the Partners. I do not believe we in the U.S.A. know everything. I know that we can learn from Latin America. Sure, there are certain basic fundamentals in the conduct of a modern society that are immutable, but we in the U.S.A. can and often do assume that our way of doing things within those norms is the only way. Often, in my experience, we overpower the less-developed nations. Putting it another way, big governments and big business and even big labor think in terms that are unrealistic because these terms are U.S. terms, but with our people-to-people approach like the Partners, there can be give-and-take on a scale appropriate to the local situations.

One final expression—faith in people. I firmly believe that the same formula that made Ivory Soap famous is applicable to the human race—.9944/100% pure was that slogan. The world and this hemisphere, then, depends on quality of leadership. And that quality is vitally important in the less-developed nations. You, Partners, are leaders. You can lead and have led others to an understanding of profit and its contribution to development, you can spark and have sparked creative concepts. You can and do build ties that bind. Don't get bogged down in organizational politics, don't sacrifice performance at all levels for organization at the top. The world and this hemisphere have lots of politics and even more committees, and both are essential in their appropriate contexts. The Partners should continue to be Partners.

Mr. BENNETT. Mr. President, I invite special attention to the Utah Partners Committee on Arrangements who so successfully hosted visiting delegates from not only the United States, but also were so gracious and hospitable to our guests from Central and South America.

General chairman, Royden G. Derrick, drew together a number of talented men and women who voluntarily served the purposes of planning and executing a successful conference, and much credit is due him for the skill he displayed in this organizational effort. I ask unanimous consent that the roster of the committee on arrangements and a listing of the companies and institutions which assisted in the conference arrangements be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

FOURTH INTER-AMERICAN CONFERENCE, PARTNERS OF THE ALLIANCE COMMITTEE ON ARRANGEMENTS, UTAH PARTNERS

General chairman, Royden G. Derrick; special assistant, Douglas R. Mabey.

Vice chairman, Gary Neeleman.

Finance Chairman, Gordon L. Lawry.

Personal services, R. Perry Ficklin; transportation, E. Dale Peak; pre and post conference trips, Frank Murdock; hospitality, Lyle M. Ward; entertainment, Allen Behunin; registration, Laird Snelgrove.

Program and Activities, J. Clark Ballard; conference program, Lyman Tyler; conference promotion, J. Clark Ballard; physical arrangements, Frank Newman; exhibits, Richard Groen; barbeque, Don Lund, and Bill Waldron.

Communications, R. Hector Grillone; publicity, J. R. Allred; language services, Bruno

E. Tokarz; duplicating, William Backman; distribution, Ned Anderton; technical equipment, Richard A. Welch.

THANKS

The Committee on Arrangements expresses its most sincere gratitude to the many individuals, companies and institutions which voluntarily assisted them in accomplishing a multitude of vital tasks in connection with the Fourth Inter-American Conference of the Partners of the Alliance, including the following:

American Paper Supply, Ballet West, Bonnevill International Corporation, Brigham Young University, Christensen Diamond Products Company, The Church of Jesus Christ of Latter-day Saints, Deseret News, East High School, Elmco Corporation, Moore Supply Company, Murdock Travel Agency, Murray City, Prudential Insurance Company, Salt Lake Council for International Visitors, Salt Lake Mormon Tabernacle Choir, Salt Lake Valley Convention and Visitors Bureau, Snelgrove Ice Cream Company, United Air Lines, United Press International, University of Utah, Utah Cattlemen's Association, Utah State University, Warshaw's Giant Foods, Western Steel Company, ZCMI.

PFEIFFER COLLEGE STUDENTS OCCUPY SCHOOL BUILDING FOR A GOOD CAUSE

Mr. ERVIN. Mr. President, in recent months our university and college campuses have been victimized by a handful of selfish individuals who are more concerned about violating property and individual rights than gaining an education which will better enable them to make meaningful contributions to society and the Nation. Probably the most tragic thing about these disruptions is the total disregard these individuals have for the rights of thousands of students who desire to benefit from an orderly educational process. I should like to point out to the Congress, and to the public in general, that not all campuses are beset by this lawlessness. At Pfeiffer College, Misenheimer, N.C., students have occupied the administration building for laudable reasons. These students have unselfishly embarked upon a program to share their knowledge with local youngsters who have had difficulty with certain subjects in their regular schooling. I should think that the activities mentioned in newspaper articles in the Winston-Salem Journal of April 29, 1969, entitled "New Twist to Campus Activities," and the Salisbury Evening Post of April 26, 1969, written by Alene Ventura, would be of interest to college officials and students who have a sincere desire to engage in constructive activities, rather than disruptive tantrums.

I ask unanimous consent that these two newspaper articles be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Winston-Salem (N.C.) Journal, Apr. 29, 1969]

PFEIFFER STUDENTS TEACH KIDS: NEW TWIST TO CAMPUS ACTIVITIES

MISENHEIMER, N.C.—When Pfeiffer College students decided to occupy the school's administration building, officials smilingly vacated the premises.

It was for a good cause.

The students offer tutorial assistance in

the building one night each week to under-achieving students in nearby elementary schools.

Since the program began about eight weeks ago, 41 students have shown up each Wednesday night to teach the youngsters reading, mathematics and other subjects they've had trouble with in school.

It is not, say the college tutors, a program to benefit them as future teachers. Less than half plan teaching careers.

It is, say the tutors, a program that allows them to do something constructive; at a time when many college students are engaging in disruptive activities.

William Tyson, a faculty adviser for the program, said, "This has been a tremendous learning and growing experience for both pupils and instructors."

"The contact of our college students with three or four elementary children in a highly personal situation has been most valuable," he said.

The classes are limited to four or five pupils per instructor.

The program has been successful enough to draw the support of local public school officials, who say the college students are fulfilling a function worth thousands of dollars to the school system.

Many parents have appealed to Pfeiffer to offer accelerated courses next year.

Tyson said the program has been budgeted for next year and many of the student tutors have said they again will help.

[From the Salisbury (N.C.) Evening Post, Apr. 26, 1969]

PFEIFFER STUDENTS OCCUPY CAMPUS BUILDING—FOR USEFUL REASON

(By Alene Ventura)

MISENHEIMER.—A group of Pfeiffer College students has taken over the Administration Building on the campus here.

But not for the usual publicized reasons. This group is not protesting anything.

Neither are they asking for anything. On the contrary, they are giving something.

These Pfeiffer students are a clean-cut group of young men and women dedicated to the cause of assisting youngsters to obtain a better education.

There are no beards among the men—nor do they wear necklaces.

They are clean-shaven, well groomed young men, attired in neatly pressed suits or sport coats and slacks, and a shirt and tie. The women are attractively dressed in sports clothes.

The Pfeiffer students were spurred into action by an editorial months ago in The Pfeiffer News, the campus publication.

A spokesman said that the editorial in essence asked why assistance to "under-achieving children" couldn't be provided by Pfeiffer students.

The article's challenge gave the incentive for members of the Pfeiffer Chapter of the Student National Education Association to design and plan a program of tutorial service for area elementary school children.

Joe Internicola of Elmont, Long Island, N.Y., a rising senior, along with other interested students formed a committee to set up a tutorial service on the campus.

APPROVED

Given the green light by the college administration and the teacher education committee, the program was launched. Letters were sent to the Richfield and New London elementary schools to be given to patrons. Along with the letter was an application blank for participation in the tutorial classes.

For lack of time to select a name for the service—the effort has unofficially been named the Pfeiffer Tutorial Program.

Joe is chief coordinator or director, with

two assistants—Mike Africa who is from Pennsylvania, but presently calls Atlantis, Fla., home; and Sandra Allen of Gastonia.

Joe is a social studies major, and Mike and Sandra are majoring in elementary education. All three plan teaching careers.

Seven weeks ago, the service was formed and classes began. The eight-week series will conclude Wednesday.

On the first night of classes, people were startled to see the lights burning brightly in the Administration Building where there was a beehive of activity.

Pfeiffer College had its first traffic jam on an ordinary working day that first night.

Two college students were required to direct traffic for those clamoring for registration.

There were 173 elementary students enrolled for the courses that first night. Every Wednesday night since then, the average attendance has been 180 students.

Bill Tyson of the college department of education is faculty adviser for the tutoring group.

He said the program has 41 tutors, including 11 men and 30 women of the Pfeiffer student body.

Surprisingly, there are about half of the tutors who are freshmen, and less than half who plan to be teachers.

DRESS SET

Tyson, a tall young man who could pass for one of his students, wryly remarked that when the mode of dress for instructors in the program was discussed "I thought they were carrying things a little too far."

But, he admitted that the requirement of shirt and tie for men had lent dignity to the program.

Sometimes on a warm night, the men do remove their coats while instructing—but immediately don them again on leaving the classroom.

Only one showed up last Wednesday night without a coat and tie. He was late for his volunteer job as tutor—coming directly from the athletic field.

Joe says "we try to steer away from a school-like atmosphere as much as possible. Instead of being called 'principal,' he encourages the students to refer to him as a coordinator. He handles organizational matters, while Mike's job concerns discipline problems—if they occur. But, both are tutors too.

The service offers four subjects from which the pupil may choose—English or language arts, science, history and mathematics.

There are two 45-minute sessions, beginning at 6 p.m.

The first session is a reading workshop for the students, regardless of what subject they have enrolled to take. After the reading period, the other 45 minutes are devoted to the chosen specialized area of study.

Classes are small. There are no more than five students per tutor in each class period—sometimes only two pupils.

The "administrators" of the tutoring service believe the small class gives more individual attention to students.

Tyson said that "this has been a tremendous learning and growing experience for both pupils and instructors" in the tutoring program.

He commented that "the contact of our college students with three or four elementary children in a highly personal situation has been most valuable. Their enthusiasm confirms the fact that Pfeiffer students are eager and ready to work in community service projects."

All the students attending the tutoring classes this year are from New London and Richfield elementary schools.

The program has the full support of C. P. Misenheimer, principal of Richfield School, and J. F. Turner, New London School principal.

Regular grade school teachers in the two schools provided textbooks and backgrounds on the individual students responding to the introductory letter.

Parents have also given their whole-hearted support to the program, providing transportation for the children.

Many of the parents "wait" while their children get the extra individual instruction from 6 to 7:30 p.m. on Wednesday.

Tyson said that transportation sometimes presents a hardship for parents, interfering with farm chores and other family activities.

But, most of the parents and children have been faithful in attendance.

Tyson commented that the Pfeiffer student volunteers for the program "wouldn't tell you themselves, but I will—they have provided coffee for the waiting parents out of their own pockets."

He revealed, too, that the group has had so many requests for "exacerbated work," that the program has "wound up a higher exacerbated program requiring more work than originally anticipated."

Joe said he had been working in physical education with students at the Richfield and New London schools for a year or so.

On his first day at one of the schools, Joe said he walked in and told his class name.

"My Yankee accent, plus my name, threw them," he laughed.

MR. INTERN

On the spur of the moment he came up with a shorting of his name (Internicola) and told his students he was simply "Mr. Intern."

Since then, they call me Mr. Intern, or sometimes "Mr. Doctor!"

Wednesday night Joe was teaching the New Math to a class, and it was clear his students adored him and were learning the new method.

All hands went up when Joe asked the equalization of 7 plus 3, according to Mode 5 (whatever that means).

The smug look on the face of one visitor when most of the students answered "20" to the problem, changed perceptibly to astonishment when Joe said "right, very good."

Later, the visitor was overheard asking to be notified when classes start next year—she wants to enroll.

Tyson tells the story about one young woman instructor who took her students on a stroll across the campus to the lake.

Seems that because of insurance reasons, Pfeiffer instructors were asked to keep their students within the confines of the building.

The faculty adviser watched the young woman and her pupils slowly stroll across the grass, not talking, evidently in deep concentration.

"Where were you going," Tyson later asked the young woman.

"Across to the lake," she replied.

"What were you doing?"

"We were listening to the sounds of nature!"

Tyson wondered how one could chastise such an instructor for a broken rule.

The faculty adviser says the problem has been a great success—so much so that it has been budgeted for next year by the Pfeiffer Student Government.

Joe, or Mr. Intern, is obviously pleased with the program, commenting that the student tutors are not professional teachers and that was not the idea, anyway.

"In no way are we trying to interfere with the regular teachers," and that the idea was not to discover geniuses or uncover spectacular talent.

"We are sorta playing it by ear," he explained, "Trying to provide a stimulating boost through individual attention to the children who may be having difficulty with one subject or another."

Joe says that he hopes for a more ex-

panded program next year, possibly including students through the ninth grade.

Credit for the program and its success goes to a number of other people.

Dr. Lloyd Lowder, chairman, division of education; Miss Elizabeth Huntly, department of education; and Dr. Fred Hollis, adviser, student NEA; who assisted the tutors in developing the reading program.

Also, N. E. Lefko, audiovisual coordinator; Charlie Misenheimer, maintenance manager; and Wallace Martin, college business manager.

Sharing in the tutorial program are students from the great Salisbury area.

They are Charlotte Cooper, James M. Shoaf, and Nancy Shoaf, president, student NEA.

Miss Cooper is the daughter of Mr. and Mrs. Grant Cooper, Henderson Street, Spencer; Miss Shoaf, the daughter of Mrs. H. W. Shoaf, Third Street, Spencer; and Shoaf, son of Mr. and Mrs. Walter C. Shoaf, Gold Hill Drive, Salisbury.

THE ATTORNEY GENERAL'S ROLE

Mr. GRIFFIN. Mr. President, a recent column by Laurence Stern in the Washington Post cast additional light on the Attorney General's role in the recent controversy concerning a Justice of the Supreme Court. I ask unanimous consent that this column be printed at this point in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

MITCHELL IS UPSET BY REACTION TO HIS ROLE IN FORTAS CASE

John Mitchell, the New York bond lawyer President Nixon appointed his Attorney General, is not exactly the kind of man whose presence warms up a room. He is a quiet, frosty-eyed gentleman not given to displays of pique or recrimination.

Yet he is known to be disturbed at press criticism of his conduct in the matter of former Justice Abe Fortas. Mitchell is smarting at suggestions that his visit to Chief Justice Earl Warren on May 7 and his subsequent public confirmation that the session had taken place were politically motivated acts.

All the evidence, in fact, suggests that Newsweek magazine's disclosure of the meeting between the Chief Justice and the Attorney General was nothing more than lively journalistic enterprise. By the same token the scoop that broke the case, Life magazine's disclosure of the first \$20,000 payment from financier Louis Wolfson to Fortas, was gathered in the declining days of the Johnson Administration and well before Mitchell entered the Justice department.

All this would amount to little more than intramural gossip if it were not for the implicit assumption that the Nixon-Mitchell Justice Department was out to get Abe Fortas—and eventually did.

No doubt there are those in the Justice Department and Congress who would like nothing better than to frolic through the files of the Kennedy and Johnson Administrations, unearthing every real or imagined misdeed. But nothing in Mitchell's official behavior so far suggests that he shares this passion for a witch hunt.

There is a species of story in Washington—and the Fortas case is an example—that is particularly hard for liberal establishmentarians here to swallow. When the controversy over the TFX first broke in the McClellan Committee it was intellectually fashionable to portray it as an attempt by the Pentagon brass hats to put a round through the white hat of former Secretary of Defense Robert S. McNamara. Subsequent

events proved the TFX critics on Capitol Hill to have been right.

In the early stages of the Bobby Baker scandal there was the same cold-eyed suspicion toward the story by those who identified the former Senate Majority Secretary with the parliamentary good works of his political mentor, Lyndon B. Johnson.

Now in the Fortas affair the charge is incontrovertible, having been acknowledged by the central figure in the case. Nonetheless it is being cast in some quarters as a political vendetta by a malevolent Justice Department. One can disagree with Attorney General Mitchell on a wider range of issues, from wiretapping to counter-insurgency on the campus, and still sympathize with his private annoyance at this sort of kneejerk surmise.

The background of Mitchell's actions in the Fortas case might be no more Machiavellian than this:

When the Life story broke the only known financial involvement between Fortas and Wolfson was the \$20,000 disbursed to the then Justice by the Wolfson Family Foundation and returned 11 months later.

By the time the magazine appeared on the stands, however, Mitchell knew that the \$20,000 check was only the first installment in a life-long sinecure, transferable to Mrs. Fortas upon her husband's death.

This is not a crime, short of evidence that Justice Fortas interceded with Government officials in Wolfson's behalf. But it might easily have occurred to the Attorney General that the life-time stipend arrangement between a convicted stock swindler and perjurer, on the one hand, and an Associate Justice of the Supreme Court, on the other, might fall short of the standards of conduct expected on the Nation's highest tribunal.

And so on May 7, two days after Life's story appeared, Attorney General Mitchell went to see Chief Justice Warren and provided him with "certain information." It was not until his resignation eight days later that Fortas acknowledged the existence of the lifetime contract with the Wolfson Family Foundation.

The differences between the first Fortas statement published on May 5 and his final letter to Chief Justice Warren reveal the full measure of Fortas' talent as a draftsman. With his amazingly precise use of words, the former Justice etched two sharply contrasting though literally consistent versions of his relationship with Wolfson. It was a triumph of lawyerly skill over personal credibility.

Had Fortas told his story straight the first time, Attorney General Mitchell's trip would probably not have been necessary.

A MOTHER EXPRESSES CONCERN

Mr. CRANSTON. Mr. President, every Senator occasionally feels overwhelmed by the bulk of mail which pours into his office. Then, from time to time, a single letter seems to crystallize a prevalent mood of restlessness and dissatisfaction. Such an insight makes me grateful that Americans do take the time to write their representatives with candor and with confidence that their voices will make a difference.

I would like to share with my colleagues a letter from Mrs. Robert Konrath, of Madera, Calif. She speaks as an average American wife and mother, and her concerns both symbolize and summarize those of thousands of my correspondents. I ask that her letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MADERA, CALIF., May 14, 1969.

Senator ALAN CRANSTON,
U.S. Senate,
Washington, D.C.,

HONORABLE SENATOR CRANSTON: I am a mother and I am afraid!

While we sit together, discussing the overwhelming problems of our beloved country, as we debate and yes, even argue, I begin to realize many thousands of other mothers must be faced with the same distressing fear. We have guided and nurtured our children to ready them for their place in life as responsible adults. We see their future threatened!

Senator Cranston, we are directing this to you because we are sure of your integrity, out-spokenness and sensitivity, a saneness (that seems to have abandoned some of the others).

We are three, my husband, age 50, has a modest position. I teach an adult class at the high school one night a week; a wife and mother the rest of the time. Our son, Bob, will soon be 19. We three are trying to provide funds for Bob's college education. He was awarded a small scholarship at Stanford after a year's stay in Germany having won an American Field Service Scholarship. We have a modest home, live within our means trying to educate Bob and still put a little away for the future. I think we are an average American family.

My husband and I look upon the faces of our college students; we hear, see and feel their intelligence, we rejoice in their idealism, we are overwhelmed by their impatience and we are embarrassed by their questions. Today's youth is aware! But the clouds of fear approach.—

Because of their awareness, their impatience, their knowledgeability they feel trapped. We understand their questioning, concern, for their future and their children's future and the future of America. They see their parents troubled by the complexities, contradictions, and inequalities of American life; the growing inflation and taxation. They feel trapped and we feel fearful. These are the reasons:

1. They see billions upon billions of tax dollars spent for an unending war in Vietnam, poverty programs, agricultural pay for "no-grow," on foreign aid, on military budgets with no real effectiveness and no end in sight.

2. They see an insidious development of a military-industrial-labor complex, a war economy. They don't want their futures limited to those fields of human endeavor. They feel that the constant threat of Communism is a gimmick to justify military and defense expenditures.

3. They see yet another vast expense for the A.B.M. that even the top scientists say can't work and they ask, "Is this just another scheme to bolster the economy such as the F.D.R. highway program?" They believe China or Russia would hardly commit suicide by attacking us first. They ask about radar and all the other protective paraphernalia they were told was protection.

They view the burgeoning population which results in mindless air and water pollution; the decaying cities.

4. I feel anxious concern because the students are vulnerable. The number of young people involved with these problems grows ever rapidly, they are seeking answers. The Students for a Democratic Society have some answers—here is one—taken from a pamphlet sent to me from the Stanford Campus. "M.D.S." Movement for a Democratic Society (off-campus non-student wing of S.D.S.), 131 Prince Street, New York, N.Y. "Consumption: Domestic Imperialism." "We propose a strategy that posits on the one hand a critique of the reality of meaningless jobs, manipulated consumption, maldistribution of wealth and on the other hand a vision of the liberating potential of a fully automated, fully communistic society."

Our students are exposed to black and white militancy, Mexican-American militancy, they see militancy *win* as college presidents resign under intolerable pressures. In one instance the militants were rewarded with \$1700 worth of Bongo drums! We are sickened by the recipients of federal aid who riot, burn and destroy; who would desecrate our schools.

5. They have lost faith in the representative when they see his obvious interest in war-implemented employment in his voting district.

6. They are disenchanted while facing military conscription. Conscription has allowed wars (like that in Vietnam), to be directed by administrative policies rather than Congressional action. They ask about the effectiveness of the United Nations.

7. They see their universities, the home of reason, the halls of knowledge, suffering the indignities of ruthless attacks by black and white militants; the sight of guns on campus.

8. They are faced with such realities as: (1) biological-chemical research, (2) hunger in the U.S. (Appalachia included), (3) unspeakable living conditions of the poor, (4) the death of their friends in an insane war, (5) men in high positions making fortunes, manufacturing instruments of war.

Senator Cranston, what are parents to do about it? How can we honestly tell them "everything will be all-right, change takes time?" Because they will ask, "how long, in our life time? Is the only recourse to sit down, demonstrate so that somebody will listen?"

We must not be complacent about the small minority involved in college riots because we have seen that barely one percent of the Russian people, mostly students and intellectuals brought about the Russian revolution. Consider the Nazi minority!

I don't know that I have any answers but since I am a worried, concerned mother about our students today and their place in the world tomorrow, may I offer these suggestions?

1. Colleges and universities should encourage student participation in planning their education as it relates to the new environment and future of this environment. Free and open discussions between trustees, administrators, faculty and students.

2. Colleges and universities should permit no militancy, including seizure of buildings or other wise breaking the law and no rioting. The participants should be arrested and jailed. Federal Aid should also be denied. (A kind of preparatory college for black students, before entering a university might encourage a more sensible attitude toward improving relationship with whites and a future of integration. I believe Rutgers University has such a plan.)

3. A thorough investigation of the S.D.S. is vital. Prosecution if necessary.

4. I support the idea of a voluntary Army. Through competitive pay scales the military manpower needs can be met. I believe, easy access to an almost unlimited number of conscripts has contributed to the use of military force rather than political diplomacy.

5. Pull out of Vietnam now.

6. Take the R.O.T.C. out of the colleges and universities. Take war-related research out of the universities.

7. An all-out program against drug abuse should be instigated immediately.

8. We have a Peace Corp. Why is it not feasible to undertake a project which could acquaint, educate and involve student groups with Washington Senators, Congressmen, etc.? Is it possible they could learn from each other and in so-doing find some degree of understanding? (Opinions are uninfluenced except by their desire for a better America.)

Finally, I join with all the other concerned mothers in asking that America begin to listen, respect and cherish the *voices of tomorrow*—let us build a bridge that not only spans the "generation gap" but gives to the dedicated students and leaders of tomorrow a path to the dedicated leaders of today.

Very respectfully,

(Mrs.) ROBERT KONRATH.

SENATOR JAVITS PROPOSES HEALTH CARE PROGRAM

Mr. GOODELL. Mr. President, in an address to the AFL-CIO Conference on Community Service at the Shoreham Hotel in Washington, D.C., on May 20, the distinguished senior Senator from New York (Mr. JAVITS) announced that he will soon introduce legislation aimed at bringing adequate health care within the reach of all Americans, including those now on medicare and medicaid, through a universal health insurance program. Senator JAVITS' speech described America's burgeoning health crisis which threatens to deny adequate care to growing numbers of Americans and to obstruct the progress of expanded medical services to the disadvantaged in urban and rural areas. I commend the speech to all Senators and ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

UNIVERSAL HEALTH INSURANCE: PRESCRIPTION FOR AMERICA'S HEALTH CRISIS

America's capacity for the cure and prevention of illness and disease has never been greater. Yet our ability to deliver needed health services at a reasonable cost and to provide for the most basic physical needs has never been more in doubt. We face a burgeoning health crisis which threatens to deny adequate care to growing numbers of Americans and to obstruct the progress of plans for expanding medical services to the disadvantaged in urban and rural areas. This crisis is evidenced by skyrocketing health costs and exacerbated by marked shortages of doctors and other health personnel and by seriously inadequate, obsolete and outmoded health facilities.

Our objectives for the next decade must be to provide every American with accessible health care. When Walter Reuther said, "The people of the United States have in the last few years made an addition to the Bill of Rights. The right to good health for all has become a stated national purpose and an integral part of national policy," he espoused a principle enunciated by Herbert Hoover in his inaugural address more than 40 years ago. President Hoover equated the right to public health with public education. He said: "Public health service should be as fully organized and as universally incorporated into our governmental system as is public education. The returns are a thousand-fold in economic benefits, and infinitely more in reduction of suffering and promotion of human happiness."

Every person—no matter what his economic status—must have the means to obtain comprehensive health care. This will require a two-pronged national health program: First, to guarantee that every American has the purchasing power to acquire at least a "floor" of health services; and second, to allocate sufficient resources to bring about necessary change in the health care system—so that the "supply" of health services which are to be "delivered" are adequate to meet the increased "demand" which will be established. It must be emphasized that, if the medical personnel and facilities are

unavailable, insufficient or difficult to secure because of remoteness or shortages, then the financial means to purchase adequate health care is but a promise which cannot be fulfilled.

Neither the massive growth of private health insurance over the last thirty years nor the increasing role of the Federal Government in health has been adequate to overcome these everworsening problems.

Although about 85 percent of the American people have some form of private health insurance, that insurance covers only about one-third of their health care expenditures. Moreover, those who need protection the most cannot afford to join a voluntary health insurance program because rates are not adjusted to income.

Similarly, the major Federal programs—Title XVIII (Medicare) and Title XIX (Medicaid) of the Social Security Law—are not adequate to meet the need. We must regard both of them essentially as first steps in establishing a Federal obligation in the field of health care. In New York City, only 35 percent of the Medical costs of the aged are covered by Medicare. Moreover, neither Medicare nor Medicaid has brought about significant changes in the national system of health care. While both programs give additional Americans the power to "purchase" health care, neither brought that expansion of our new allocation in medical resources which made that health care more accessible to all Americans.

Accordingly, in going forward, we must profit from and remedy these weaknesses. We must establish a national system of prepaid comprehensive health care for all Americans, and it is my intention to introduce legislation which will move us toward that goal in the immediate future.

In order for such legislation to be effective, it is crucial that it take a comprehensive approach to the problems of health care. It must not only increase purchasing power and thereby equalize access, but it must also bring about significant change in the health care system.

Thus, the program for which I will seek enactment will not be aimed at just one aspect of this problem. It will recognize the interrelationship of four elements: first, health, manpower and facilities; second, financing and health care cost control; third, organization and delivery of health services, and fourth, the quality of health care.

I will introduce legislation in this 91st Congress that has the following objectives:

First, a system of prepaid comprehensive health care designed so that it may eventually replace the existing Federal health assistance programs, including Medicare and Medicaid.

Second, financial support of the system would come from employer-employee contributions and, on behalf of indigent and dependent persons, from Federal, state and local government contributions. An employer-employee based contributory health insurance system is far preferable to the financing of all health services out of general public revenues. Beneficiaries make a direct financial contribution to the system and, consequently, have a personal stake in its fiscal health.

Third, there must be a wide diversity of systems of prepaid comprehensive care, with free "consumer choice" between competing plans, although ultimate participation in a plan would be compulsory. The Federal government must provide incentives and requirements to groups of "consumers" to negotiate and enter into contracts with groups of "sellers" of health care, including insurance companies, hospitals, and physicians, to provide the full range of health care services.

Fourth, each plan would be required to provide full health care—preventive, diagnostic, ambulatory and rehabilitative care, as well as physicians' and acute hospital treatment.

Fifth, each plan would have to submit itself to realistic and meaningful cost controls and to the requirements of state health facilities planning agencies.

Sixth, the Federal government should finance the necessary capital development and construction costs of participating institutions, which will permit them to "reach out" to the prepaid population they serve with neighborhood family-care clinics, expanded outpatient departments, and other forms of ambulatory care.

Seventh, the health care system must be structured in such a way as to insure the availability of adequate medical care to everyone no matter where they live.

We must recognize that, if any such program of prepaid comprehensive health care is to be successful, we must at the same time provide for a dramatic increase of health personnel and of facilities, through "companion" Federal programs.

To many Americans, the "health crisis" means escalating costs. There has been a fantastic increase in the cost of health services. While the general Cost of Living Index rose 70 percent between 1946 and 1967, medical care costs increased almost twice as much, 123 percent. The average cost of a day in a hospital in New York State, for example, went up from \$10.72 in 1950 to \$21.00 in 1960 to \$58.00 in 1967. In 1968 one day of care in a hospital increased more than 12% over the 1967 figure, and average cost now stands at \$65.24. In many hospitals in New York City, the daily charge is now well in excess of \$100 a day.

However, the crisis in health care in America is not solely a matter of rapidly rising costs. Rather, it is a crisis in inadequate and misallocated resources and in our inability to provide medical care in a rational, effective, and systematic manner. Health care is today provided in a chaotic "multitude of individual transactions" way. There is insufficient community planning and control which would bring efficient utilization of facilities and health manpower. The many types of skills required to provide the potential range of services essential to the maintenance of health, the prevention of illness, and the care and therapy required by those who have become ill must be brought together in such a way that they are effective and efficient.

There are serious shortages of doctors and nurses. For example, vacancies in nursing positions in hospitals in New York State range from 20 percent in the best-run hospitals to an incredible 75 percent in some proprietary and in most municipal hospitals. Upper and middle-income persons have long waits before they can see a doctor or enter a hospital.

For the poor, often their only contact with health care is through the outpatient department and/or emergency rooms of "core-city" hospitals. During 1968, for example, Johns Hopkins outpatient department registered a total of 480,000 visits, including 119,000 visits to the emergency room. For the poor, this means incredibly long waits—up to and beyond four or five hours—at the end of which they often receive brief examinations and impersonal care. And yet, there is nowhere else for the poor to go for medical care. They must go to an emergency room even for minor illnesses. In the East Baltimore slum in which Johns Hopkins Hospital is located, there are only eight physicians, most of whom are elderly and do not practice actively, to serve about 100,000 people.

New York City figures mirror a national disparity in health services between rich and poor. In 1964, Bedford-Stuyvesant contained nine percent of Brooklyn's population but produced 24 percent of its tuberculosis deaths and 22 percent of its infant deaths. And yet, only four new physicians located in that area between 1960 and 1966. In 1964, a New York City child from a family earning less than \$4000 a year was half as likely to

have had a polio immunization as a child from a family earning over \$6000. A former New York City health commissioner has rated poverty as the third leading cause of deaths in that city.

We must overcome the slow and steady aging process which today has brought one-third of this nation's hospitals into the obsolete, outmoded and outdated column. Time may well be a healer, but it will not heal outmoded hospital facilities or cure mounting costs. Delays are costly in economic and human terms. Each year of delay means that some American is shortchanged on health care. We need only examine the crisis which now surrounds the closing of Harlem Hospital in New York City—an example of the price that we pay by continually putting off the modernization of hospital facilities and the recruitment of adequate medical personnel.

We cannot provide 20th century medical care in 19th century hospitals. The Federal government can no longer stand immobilized as problems escalate. At the Federal level, I have introduced the Hospital Modernization and Improvement Act, which, at a relatively modest cost of \$12 million the first year, will provide needed hospital modernization and also the development of new techniques in hospital procedures and construction. The idea is to use the resources of the private enterprise system by making available Federal guarantees of up to 90% for loans for hospital modernization and to provide subsidy payments of interest charges above 3%. This loan-guarantee, interest-subsidy plan is the key to moving forward in providing health services regardless of the other demands of the Federal Government. This is a necessary beginning.

We must give priority to the expansion of specially designed health facilities and pilot projects in slum areas. I commend the Administration and Secretary Finch for their emphatic recommendation that the Hill-Burton Act be amended to devote greater financial resources to the construction of innovative projects reflecting critical needs of national significance, such as outpatient clinics and neighborhood health centers.

Certainly, we must overcome the severe shortages of health manpower. This means greatly increased Federal assistance to medical schools and to medical students, to nursing schools and nursing students. It also means that we must develop new careers in the allied health professions and give qualified young men and women—such as medical corpsmen discharged from the armed forces—the opportunity to enter them.

The recruitment and training of health assistants in public and private employment and in hospitals, nursing homes, home health agencies, laboratories, clinics, health departments and other health facilities are essential to the efficient provision of health services of the highest quality. Persons employed in the production and distribution of such services must have proper training in the special skills required. Within the month I will offer legislation to assist the expansion of the allied health—or so-called paramedical—professions and to develop new curriculum and innovative programs to provide efficient utilization of such new types of personnel in the health care system.

Finally, we must not forget that hunger and malnutrition is perhaps the primary health concern of the poor. We must begin to immediately establish a national system of health care, of disease prevention and nutrition which will extend to every American child the fruits of our scientific and medical knowledge and the opportunity for a full and rich life.

I am convinced that this is the year such legislation must be offered and that we must make a beginning on the establishment of

an organized, coordinated and total health care system—a system which emphasizes delivery and accessibility to every person in need. I believe that there is a growing willingness within the medical profession, particularly among medical students and young doctors, to establish and participate in such a system. Increasingly, leading medical schools have begun to emphasize community health and the delivery of health services, and several of them have initiated demonstration programs of prepaid comprehensive health care. And there seems to be a renewed interest among both private and public leaders in making this commitment to health care. There have been an increasing number of hearings in both Houses of the Congress on this subject and of statements from political leaders, businessmen, insurance companies and labor leaders.

We have talked about these issues for decades. We have made great progress in health, but that progress has been largely in the quality of available health care. That exceedingly high quality is a great tribute to the medical profession and to the hospitals and medical schools of this country. However, the sad fact remains that to many, many Americans, quality health care is still unavailable.

The objective is difficult: to improve and broaden accessibility, while improving and preserving quality of health care. In a word, we must, at long last, end the chaos which characterizes health care in America and begin to move toward the organization of a system which will benefit all Americans.

THE CHINESE HARD-LINE STAND

Mr. SCOTT. Mr. President, at a time when a United States-Red China so-called detente continues to be discussed in the news, I believe that we must take a more realistic look at recent events in the latter country to get some much-needed perspective. The proceedings of the Ninth Party Congress in Red China indicate that, in the words of New York Times correspondent Tillman Durdin:

The Chinese Communist Party has adopted as its basic program a plan for continued hard-line revolutionary action, both at home and abroad.

Since World War II, I have held the view that no country which is at war with the United Nations should be a member of the U.N. Every pronouncement emanating from Peking indicates that there has been no significant change in word or deed to negate its belligerence toward the United Nations and, as such, I must continue to object to Red China's admission.

I will continue to support our efforts to relieve tensions and to improve communications with Red China. But I believe that Red China must adopt a more conciliatory stance before any meaningful headway can be made.

Mr. President, I ask unanimous consent to have inserted in the RECORD, following my remarks, articles entitled "Chinese Affirm Hard-Line Stand in Party Report," by Tillman Durdin; "New Charter a Paean to Mao," by Donald Kirk; "Lin: Prepared for A-War," by Robert E. Udick; and a New York Times editorial entitled "Lin Piao's Chinese Stalinism."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 28, 1969]
CHINESE AFFIRM HARD-LINE STAND IN PARTY REPORT—LIN ASKS WAR PREPARATION—UNITED FRONT TO OPPOSE UNITED STATES AND SOVIET URGED

(By Tillman Durdin)

HONG KONG, April 27.—The Chinese Communist party has adopted as its basic program a plan for continued hard-line revolutionary action, both at home and abroad.

The program was set out in a 24,000-word report by Lia Piao, the party's deputy chairman, and adopted at the ninth party congress, which met in Peking the first 24 days of this month. It was made public tonight by Hsinhua, the official Chinese Communist press agency.

Mr. Lin, who is also Defense Minister, denounced the United States and the Soviet Union, and said that China must prepare for the eventuality of nuclear war with either country. He pledged continued support for revolutionary movements everywhere and called on nations to form a united front to resist Soviet and United States efforts to divide up the world.

SPEECH MADE APRIL 1

The report said that the Chinese had rejected an offer by the Soviet Premier, Aleksei N. Kosygin, to discuss the Chinese-Soviet border dispute over the telephone.

The report asserted that the Cultural Revolution, initiated by the party chairman, Mao Tse-tung, in 1966 to purge Communist China of revisionist leaders and influences, had achieved a smashing victory. However, it declared that the revolution was not yet over and that further long struggle lay ahead before complete political transformation in China and world revolution abroad were attained.

The report underlined the new primacy of the military in the affairs of Communist China by quoting Chairman Mao as having said, "The main component of the state is the army." It proclaimed Mao Tse-tung's thoughts, in equal status with Marxism-Leninism, as the basis for all the actions of the people of China.

Mr. Lin gave his report, which sums up the genesis, development and future perspective of the Maoist Cultural Revolution, on April 1. It was adopted by the congress after protracted discussion and some emendations on April 14.

The report is the basic document for policy and action to come from the congress of 1,512 carefully selected delegates—the first party congress held since 1958. In addition to adopting the report, the congress approved the draft of a new party constitution, the text of which has not been made public, and named a new governing party Central Committee. A majority of the members on the previous Central Committee were purged in the Cultural Revolution, which shattered the party and government structure.

The holding of the party congress was intended to represent a consolidation of a purged and renovated Communist system. Delegates to the congress were selected by the new Revolutionary Committees, which have emerged as the organs of control for provinces, cities and lower social units.

A large percentage of the delegates were military men or political commissars of military units. The new Central Committee, consisting of 170 regular and 109 alternate members, has roughly 40 per cent military men among the regulars and 35 per cent among the alternates.

REPORT IS REVOLUTIONARY

The report was, on the surface at least, a tougher and more revolutionary document than had been expected by many specialists in Chinese affairs here. It not only contained a clarion call for revolution and opposition

to the world status quo, but also proclaimed continued conformity to Maoist doctrine and pursuit of Maoist economic and social policies internally.

However, aside from proscribing further internal struggle against opposition elements, the report was not specific about economic or social programs. It gave no indication of what role the new Revolutionary Committees, which combine both party and governmental functions, would play in the new party system.

Continuation of the production drive now under way was indicated by injunctions that the people must "firmly grasp revolution and energetically promote production and fulfill and overfulfill our plans for developing the national economy."

SLOGAN IS ECHOED

Mr. Lin did not call for another Great Leap Forward—the drive in 1958-59 to achieve rapid industrialization, which seriously set back the economy—but used a slogan of that time: "Going all out, aiming high and achieving greater, faster, better and more economical results in building socialism," to emphasize the demand for intensive production efforts.

He repeated charges that have frequently been made from Peking about the aggressiveness of the United States and the Soviet Union, their "paper tiger" weakness caused by internal economic and social problems and their aims to collaborate to oppose and encircle China. He denounced the United States for its "occupation" of Taiwan and said that Chinese troops "are determined to liberate their sacred territory of Taiwan and resolutely, thoroughly, wholly and completely wipe out all aggressors."

Mr. Lin pledged Communist China's support for revolutionary movements in the United States, the Soviet Union and elsewhere, citing in particular backing for Albania, the Vietnamese people "in their struggle against the United States" and "the revolutionary struggles of the people of Laos, Thailand, Burma, Malaya, Indonesia, India, Palestine and other countries in Asia, Africa and Latin America."

The report reviewed the history of the Chinese Communist party in the light of struggles to maintain proletarian predominance against continued threats of bourgeois, counterrevolutionary influences and, quoting Marx, Engels and Lenin, portrayed Mr. Mao as having consistently advocated the correct party line.

Liu Shao-chi, Chairman Mao's former deputy who since 1959 has been China's head of state, was denounced as "a hidden traitor, scab and a crime-soaked lackey of the imperialists, modern revisionism and Kuomintang reactionaries." Accusations against Mr. Liu were the same as those that have already been made repeatedly in the last two years.

No other person was referred to by name as associated with Mr. Liu, but he was called the "arch-representative" of "renegades, enemy agents and capitalist-roaders in power" who formed an underground bourgeois headquarters and schemed against Mr. Mao to restore capitalism and serve the interests of the "U.S. imperialists, the Soviet revisionists and the reactionaries of various countries."

LENIENCY IS BACKED

There was no indication what punishment, if any, would be meted to Mr. Liu, but in discussing policy toward opposition elements, Mr. Lin again endorsed leniency toward those who confess and can be reformed.

He said "the policy of killing none and not arresting most should be applied to all except the active counterrevolutionaries against whom there is conclusive evidence of crimes, such as murder, arson or poisoning and who should be dealt with in accordance with law."

Calling attention to the continued presence of class enemies and revisionist influence, Mr. Lin said that though the establishment of

Revolutionary Committees marked a "great decisive victory" for the Cultural Revolution, the "revolution is not yet over." He said the proletariat must continue to advance, "carry out the tasks of struggle-criticism-transformation, and carry the socialist revolution in the realm of the superstructure through to the end."

He cited a quotation from Mr. Mao that was new to China-watchers here, quoting the party chairman as having stated in October, 1968, presumably at the meeting that month of the old Central Committee, that the defeated class enemy was still around and would still struggle. In view of this, he quoted Mr. Mao as having said "we cannot speak of final victory, not even for decades."

Mr. Lin depicted the road to continued success as lying in absolute reliance on the thoughts of Chairman Mao and his leadership. He said the wide dissemination of Chairman Mao's thoughts in Communist China "is the most significant achievement of the Great Proletarian Cultural Revolution." He called for a further "deep-going" mass movement for the study of the thoughts

Mr. Lin repeatedly emphasized the congress was a demonstration of victory and unity. He praised the military forces as the "pillar of the dictatorship of the proletariat" and said the solidarity of the people and the army had insured the defeat of the opposition elements.

[From the Washington Evening Star, Apr. 30, 1969]

NEW CHARTER A PAEAN TO MAO (By Donald Kirk)

HONG KONG.—The new constitution of the Chinese Communist party epitomizes the vast changes that have shaken China since the previous constitution was adopted 13 years ago.

"The Communist party of China takes Marxism-Leninism-Mao Tse-tung thought as the theoretical basis guiding its thinking," proclaims the constitution adopted this month in Peking by the 9th Congress of the party. "Mao Tse-tung's thought is Marxism-Leninism of the era in which imperialism is heading for total collapse and socialism is advancing to worldwide victory."

Never before the 9th Congress, analysts here said, had "Mao Tse-tung's thought" been elevated to the level of "Marxism-Leninism," embodying the most sacred dogmas of the Communist movement.

ALL HONOR TO MAO

The new constitution, in fact, appears to be a paean to Mao, the "great helmsman" who has guided his troubled country through three years of turmoil optimistically described as "the Great Cultural Revolution."

It is not really a legal document, but a series of slogans and catchwords aimed at uniting and galvanizing the populace behind Chairman Mao.

The constitution contrasts completely with its predecessor, whose 60 articles set forth literal rules for guiding the party and did not mention Mao.

Indeed the 1956 constitution opposed the kind of personality worship in which Mao has immersed himself throughout the "cultural revolution."

DRAFTED BY MAO'S FOES

The reason for the neglect of Mao in the old constitution was that the 8th Party Congress which adopted it was dominated by the men who later merged as Mao's most bitter foes, former Chief of State Liu Shao-chi and the ex-party secretary, Teng Hsiao-peng.

In 1956, one of the best years for China economically, the country was definitely headed on a pragmatic if not "revisionist" course.

Mao was not prepared 13 years ago to retallate directly against Liu, but he revealed his own penchant for radical idealism by launching the "great leap forward" in 1958.

After the "leap" proved a failure, Mao began to turn on Liu and eventually mustered the support that enabled him not only to oust the chief of state, but also to produce a constitution that defied his own figure.

THEORY, PRACTICE HELD LINKED

"Comrade Mao Tse-tung has integrated the universal truth of Marxism-Leninism with the concrete practice of revolution," says the new constitution, reflecting the purges that eliminated not only Liu and Teng but also two-thirds of the party central committee produced by the 8th Congress as well as thousands of other "power-holders" in all phases of national life.

Perhaps the single most unusual feature of the new constitution is that it attempts to insure the continuity of the ideals of Mao by proclaiming his own handpicked successor, Lin Biao, who, it says, "has consistently held high the great Red banner of Mao Tse-tung's thought and has most loyally and resolutely carried out and defended Comrade Mao Tse-tung's proletarian revolutionary line."

Even while formalizing as law the unprecedented adulation for Mao, however, the constitution also indicates some of the problems now besetting the country. While calling for "unified discipline" in the party, for instance, it also states that "party members have the right to criticize party organizations and leading members at all levels and make proposals to them up to and including the central committee and the chairman of the central committee."

COULD CREATE CONFUSION

Analysts here believe these provisions are designed to give the top leadership of the party more authority on a local level. At the same time, the effect of the provisions could be to create more nationwide confusion and lack of discipline.

In any case, the constitution, for all its brave slogans, is a vaguely worded document designed, perhaps, to please as many of China's diverse elements as possible.

In this respect it may reflect the bitterness created by the "cultural revolution and the desire for moderation and unity."

The constitution, in fact, probably represents the same kind of compromising that has enabled the army to gain more control than ever before on the new central committee and politburo.

Although it would seem to give the party more scope than ever, it carefully calls on politburo leaders to set up "a number of necessary organs, which are compact and efficient," to "attend to the day-to-day work of the party, the government and the army in a centralized way."

INTEGRATION SUGGESTED

The mention of party, government, and army on the same level suggests an attempt at integrating overlapping functions of these organizations and perhaps even reducing the party's power.

The army almost certainly would be the only organization capable of enforcing this kind of reform.

Thus the constitution, although it might at first appear to represent an overwhelming personal triumph for Mao, carries in it the seeds for still more changes.

This time, however, the military leaders in power hope to effect the changes in an atmosphere of moderation and efficiency—all in the name, of course, of Chairman Mao Tse-tung.

[From the Washington Daily News, Apr. 29, 1969]

RED CHINA SAYS U.S. DAYS ARE NUMBERED— LIN: PREPARED FOR A-WAR (By Robert E. Udick)

HONG KONG, April 28.—Communist China has declared itself prepared for full-scale war and even a nuclear exchange with its two arch-enemies, the U.S. and the Soviets.

Peking Radio made the disclosure yesterday in a broadcast of Defense Minister Lin Piao's 24,000 word political report to the Ninth Congress of the Chinese Communist Party, which ended last Thursday.

It was a complete restatement of China's hard line policy—to carry out revolution at home and export it abroad as Peking has in Southeast Asia, Africa and the Middle East.

"Whether it is revolution that leads to war or war that leads to revolution, the days of U.S. imperialism and Soviet revisionism are numbered," reported Mao Tse-tung's No. 1 deputy.

"We should make adequate preparations, be prepared for a full-scale war with them, be prepared for their all-out war effort, be prepared for a long-term war with them and also be prepared for nuclear war with them," Lin said.

INEVITABLE STRIFE

He indicated that Peking's stance internationally is based on the belief that either global revolution or global war is inevitable.

Observers here, hoping to find a new, neighborly tone from Peking, found little warmth in Lin's quoting Mao as seeing two possibilities in the international situation: either that war would lead to revolution or that revolutions would occur first, preventing a war.

Lin said that, if a third world war was "imposed," it would only help "arouse the people of the world to rise in revolution and send the whole pack of imperialists, revisionists and reactionaries to their graves."

Lin did re-state that China approved of peaceful co-existence with countries of different social systems on the basis of the "five basic principles" mentioned by Peking frequently in the past.

But minutes later, after endorsing the principle of noninterference in each other's affairs, he elaborated on Peking's policy of "firmly supporting the revolutionary struggles of the people of all countries."

The world trend, according to Mao, is that "the enemy rots with every passing day while for us things are getting better daily," Lin said.

In line with "things getting better" he described the "armed struggles of the peoples of South Vietnam, Laos, Thailand, Burma, Malaysia, Indonesia, India, Palestine and other countries and regions of Asia, Africa and South America."

He said it was also heartening that "an unprecedented gigantic revolutionary mass movement has broken out in Japan, Western Europe and North America, the 'heart' areas of capitalism."

LESS EFFECTIVE

The "batons" of both the U.S. and Russia are "getting less and less effective," he declared.

As for the U.S., Lin said: "Since he took office, Nixon has been confronted with a hopeless mess." Then turning to Russia, he denounced "two foul performances" by the Soviets in the cases of Czechoslovakia and Chenpao Island.

He also revealed that Soviet Premier Alexei Kosygin tried to talk by telephone with Peking's leaders at the height of the Chenpao Island Sino-Soviet border incident. Lin said Mr. Kosygin was told that hot line effort was "unsuitable" and he could forward anything he wanted to say by diplomatic channels.

Despite the hard international line expressed by Lin, analysts here still saw hope that in the weeks ahead Peking will exhibit a willingness to crank up its foreign relations, paralyzed since the Red Guard movement began.

[From the New York Times, May 12, 1969]

LIN PIAO'S CHINESE STALINISM

Lin Piao's major policy speech to the Chinese Communist Party Congress gives

very little comfort to those who have hoped for greater stability within China, and for a more moderate Peking foreign policy. What emerges most vividly from the speech is Mr. Lin's dedication to a sort of permanent cultural revolution within China, and to deep and really ferocious hostility toward both the United States and the Soviet Union.

Many key features of Mr. Lin's speech propel the reader's mind inevitably back to the atmosphere that existed in Russia at the height of the Stalin tyranny. Here again is the obsequious and servile public worship of the great leader—Mao Tse-tung in this instance—whose every word is treated as holy writ and whose infallibility is proclaimed as a self-evident truth for which no evidence is required. Here again, too, is the vicious attack upon a defeated party great—yesterday's close comrade in arms now cursed as the soul of treachery from the day of his birth. For the uses to which Stalin put Trotsky, Lin Piao employs Liu Shao-chi, Liu, who a few years ago stood second only to Mao, is now described as a "crime-soaked lackey of the imperialists" who as early as the 1920's "betrayed the party, capitulated to the enemy and became a hidden traitor and scab."

Stalin used to argue that the closer the Soviet Union came to attaining its ideological goals, the more dangerous and fierce was the opposition of internal enemies. This was the rationalization for the secret police and the slave labor camps. Maoism, as presented by Lin Piao, sees counter-revolution as an ever-present threat, requiring unending struggle and unending vigilance, until the world revolution triumphs. On this premise turmoil of the sort that convulsed China in 1966 and 1967 could be started again at any time.

The spirit with which Lin views China's former ally is best typified by his description of the Soviet Union as "a dark, fascist state of the dictatorship of the bourgeoisie." Like Stalin, Lin Piao, moreover, based his analysis of the world's future on the Leninist assumption that "imperialist wars are absolutely inevitable." Lin seems almost to welcome the prospect of a third world, declaring that such a struggle would "help arouse the people of the world to rise in revolution and send the whole pack of imperialists, revisionists and reactionaries to their graves." He lumps what he calls "U.S. imperialism" and "Soviet revisionism" together, predicts they will not last long, and calls on the workers of the world to "bury" them.

Some will claim, no doubt, that this is all empty rhetoric, sycophantic nonsense designed only to assure Lin Piao his role of crown prince while Mao is still alive and has power. The precedent will be recalled of Stalin's bootlickers—notably Khrushchev—who reversed themselves completely after the old tyrant's death. Perhaps future developments will show Lin Piao as a Chinese Khrushchev. But his speech to the Ninth Party Congress was Chinese Stalinism.

A NEW SPIRIT IN THE COOPERATIVE EXTENSION SERVICE

Mr. HUGHES. Mr. President, when American institutions which have served the country well in the past demonstrate their ability to adapt to changing conditions and new needs, it is worth noting. In this connection, I was interested in an editorial that appeared this spring in one of Iowa's respected newspapers, the Creston News Advertiser, about the "new spirit" in the Cooperative Extension Service. Long associated almost exclusively with agriculture, the Extension Service is now moving ahead to provide

significant services for town as well as country. Mr. President, I felt that this encouraging commentary was worth sharing with my colleagues, and, at this time, ask unanimous consent to have the editorial included in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

EXTENSION—A NEW SPIRIT

The other day we had the privilege of sitting in with the Iowa State Extension Service advisory committee. This is a particularly unusual time to become involved with the extension service programs.

They are heading out into new country, as it were.

For years, most of us have considered the Cooperative Extension Service as dealing with agriculture. Once upon a time, the county representative was known as the "county agent." It is amazing how that county agent tag has stuck down through the years.

But the extension service has properly noted some changes in the way of things. First, the number of persons engaged in agriculture has declined quite drastically over the years. Second, the agriculture community has become more and more identified with urban associations. We can't say that living in the country is the same as living in town and vice versa. But certainly things that affect one also affect the other more than ever.

Extension has a marvelous organizational setup, not only here in Iowa but throughout the nation. It is probably in one of the best positions—because of its inter connections with both farm and city—to evolve programs in keeping with the changing times.

Extension will continue its efforts to assist in matters of agriculture, as it should. This is a basic field. In addition now it is developing programs that cover social and economic development, in town as well as in the country; and on improving the quality of living. These sound pretty general, we agree, but broken down—which we intend to do in future discussions—they are covering some of the most vital fields.

Now to cite just a case—in the new type of program—already under way: a food and nutrition educational program in which sub-professional food aides are employees. By sub professional is meant persons who haven't had special professional training in the field. Non professional might be a better description.

This program is just getting underway in a dozen or so counties in Iowa as a sort of pilot effort. Union and Adair counties, in this area, are involved.

The results to date—and it is just getting started—are amazing. They are working basically with low income families, helping devise ways to make the family food budget go farther and so on. And the people doing the "teaching" are these non professionals who reside right here in the community. All under the general direction of the home economists in the extension service.

The people being contacted live in town as well as in the country. This is extension working in the entire community. There is no rural Mason and Dixon line here.

It is too early to say that things are a big success. But the responses from the non-professional aides and from people they have contacted has been good. For example, an "aide" arranged to call on a low income wife. By the time the aide got there, two neighbors had joined in and she was able to go over things with three families instead of one.

The new Extension is reaching out to the people of the entire community more completely than in its history. This can be just quite a thing for all of us.

A NATIONAL POLICY ON LIQUEFIED NATURAL GAS

Mr. INOUE. Mr. President, Carl Bagge, Commissioner of the Federal Power Commission recently delivered a thoughtful address in Honolulu on liquefied natural gas and the need for a rational national policy in this area. I commend this speech to the attention of my colleagues and request unanimous consent that it appear in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE LIQUEFIED NATURAL GAS REVOLUTION: THE NEED FOR A RATIONAL NATIONAL POLICY (An address by Carl E. Bagge, Commissioner, Federal Power Commission, before the Sixth Mid-Pacific Gas Marketing Conference, Honolulu, Hawaii, Feb. 19, 1969)

Governor Burns, President Gary, distinguished representatives of Pacific Basin nations, members of the Board of Directors of the American Gas Association and participants at this 6th Biennial Pacifica Gas Energy Forum.

I am pleased to be here. My delight in accepting your invitation, however, was not inspired solely by a desire to visit Hawaii. It was based, at least in part, by the opportunity which this forum provides for me to continue a dialogue in a setting which is not only beautiful but could not be more appropriate for my subject.

The recent emergence of a new LNG technology and what it means to the Nation are exciting developments which have interested me for quite a while. Last April, I was privileged to address the First International Conference on LNG, where 700 experts in LNG technology and marketing from fourteen countries gathered to evaluate the potential of LNG on a world-wide scale. Shortly after that, I again directed my attention to LNG in an article published in the October issue of *Pipe Line Industry*. In both of these forums, my purpose was to demonstrate the need for a national LNG policy and to call for its establishment.

Perhaps it was presumptuous to expect an answer. I listened carefully, but heard none. And, lest my echo fade unnoticed, I will use this forum to answer myself—to outline the essential elements of a national LNG policy—one which both encourages and responds to the new technology.

Just months ago, twenty-one cities, including Washington, D.C., were visited by a car propelled by LNG. And, only weeks ago, an LNG tanker from Libya arrived in Boston Harbor with 2,000 tons of LNG. What could be told as fiction not long ago has thus come to pass. And in its wake has surfaced a new fuel.

LNG has a truly revolutionary potential. It could change the structure of the gas industry as we know it today. It could re-channel the international trade in energy, or alter well-established marketing practices, or even shatter the efficacy of contemporary regulatory principles.

I am convinced that the interaction between the new technology and government policy will affect the direction and success of the developing LNG industry. Government policy will either inhibit or encourage the interstate and international movement of LNG. And it will affect the Nation at large. Hawaii and Alaska, isolated from the main stream of natural gas, will, if government policy permits, figure prominently in the LNG trade.

Next May, I will have served four years as a member of the Federal Power Commission. In that short time span, I have observed developments which have had a profound effect upon the gas industry. One of the more significant was the accelerated pace at which

the industry matured from fratricide to fraternity. It has become an industry more capable of meeting the inexorable competitive challenges of the future because of this.

It would be impossible to pinpoint the instant that maturation was initially discernable—for several come to mind. Was it the revitalization of the Industry Better Understanding Task Force following the heated exchanges between Bud Rutherford and Stan Learnard in 1966—or the initiation of the Long Range Supply and Demand Study in 1967—or was it another? When it happened does not matter. It matters only that it happened.

As I look back on the past four years, there are other moments which stand out as auguries of all that followed. These were the moments of significant decisions—when government or the industry, or both, set major policy for the future. None of these decisions stopped the march of time. But to innumerable consumers, investors and personnel of the gas industry, and often to the Nation at large, these were the moments that really counted. As I observe the industry today, I believe that time has brought upon us such a moment once again.

The technological advances in cryogenics and the rapid pace of these developments challenge us to formulate a government response to LNG technology. But to delineate the detail, we must first appreciate the general—national energy policy.

Energy resources are critical to the security and economic welfare of the Nation. So it follows that an object of the Federal government is to develop and maintain adequate supplies of low-cost energy. In the United States, unlike some other countries, this does not burden the industry with centralized energy production plans and allocation directives. The government instead is called upon to establish an environment conducive to the growth of the energy industry. Government is the economic climatologist charged to forecast only sunny days. But, unlike the weatherman, an error in prognosticating the effect of government energy policy means more than just a foot in a puddle.

Government energy policy offers incentives to promote the exploration and development of various fuels. It embraces conservation laws to prevent the waste of valued resources. And it encourages scientific research to increase supply and decrease cost. Often imports and exports are regulated. Always inter-fuel competition is favored. And when the muscle of competition does not flex, government regulation is no ninety-seven pound weakling.

National energy policy aspires to make available maximum number of alternative fuels to satisfy consumer demand. It is a quest for flexibility of supply. It is compatible with LNG technology.

Mirrored with the image of the new technology what posture should the Federal government assume over LNG? Should government policy instinctively, perhaps quixotically, extend the Natural Gas Act to LNG—or should the dynamics of the market define its future role? Like so many issues of regulatory policy, these questions light fires under the cauldrons of semantic and legal debate. And often, when the fires dim, the questions remain unanswered.

We must not ensnarl ourselves in such a debate. Arguments flourish on both sides. And though the Gas Act's literalists may hail and embrace the advent of LNG, even they must concede that the draftsmen never contemplated an LNG fuel with a multitude of markets and a market structure then beyond imagination.

I do not seek refuge from a hard decision. I simply call for objectivity. Of course, we must consider the application of the Gas Act to LNG. But as government policy takes its form, the Gas Act's scheme must be a

frame of reference and not a point of conclusion. To stipulate for convenience that the Gas Act reaches LNG would do little more than to forsake an opportunity to weight the implications of the new technology in the light of current economic demands and regulatory needs.

Rather than forge a national LNG policy in the crucible of offsetting legalisms, I submit that we should instead look at LNG as a welcome addition to the energy market. Our touchstone should be to determine the government response that will best promote the Nation's energy policy. Our method must evaluate the new technology. It must appreciate the new form of energy. And it must assess its potential for competition. Only then should we prescribe what government intervention, if any, the public interest demands.

In offering this alternative, I recall the Commission's policy pronouncement of 1963, which stated, upon the advice of counsel, that the Commission would assert jurisdiction over all phases of LNG. I submit that this policy should be re-examined.

THE DEVELOPMENT OF LNG TECHNOLOGY

What was the chronology of LNG development? How did it happen? And why? These line the backdrop of my proposals.

The economic motives to liquefy natural gas trace their lineage to the seasonal variations in consumer demand. Injecting gas into nearby storage during the months of low demand afforded distributors plentiful supplies to meet the peaks of winter's cold. Soon these practices became commonplace. Distributors found solace in the nearness of reliable supply. And consumers benefited from year-round operating efficiencies. But where geology denied distributors access to natural storage formations, alternative methods were explored. And through these efforts the technology of LNG storage made its way ahead.

The success of LNG storage technology foretold other advances in LNG. In 1958, the Methane Pioneer, forerunner of today's LNG tanker, proved the feasibility of LNG tanker transport. Imagine, the sages must have thought, gas could move by ship. No longer did pipelines hold the single key to unlock gas reserves. International trade of LNG now stood clearly on the horizon.

International projects soon appeared. Algerian LNG was imported into England and France. Libyan gas supplied the needs of Italy and Spain. Boston hosted LNG from Algeria. And soon there will be more. Alaskan LNG for Japan. Venezuelan gas for Philadelphia.

The LNG tanker antedate even greater developments. Trucks and trailers carry LNG—the pavement but a concrete pipeline. Air Products & Chemicals, Inc., Cryogenic Enterprises, Ltd., Pratt & Whitney Aircraft—names unknown to natural gas transmission are now moving to center stage. From California to Florida to British Columbia, they are the authors of the LNG drama. And there is more to come. Before the curtain falls, many isolated communities and homes which have been denied gas service will greet the truck that brings them LNG. At San Diego Gas & Electric Company this is happening now. Regularly that company serves LNG by truck to a remote military camp and to an isolated trailer park.

THE PROMISING USES OF LNG

Once thought far-reaching, these storage and transportation advances soon will fill the shadows of exciting new uses for LNG. Mr. Jack Lofstrom, Supervisor of Marketing Research at the Institute of Gas Technology, recently wrote¹ that LNG's domestic market

¹ *Uses of LNG for the Future*, Pipe Line Industry, October 1968, Vol. 29, No. 4, pp. 95-97.

potential for the year 1980 totals 12.9 trillion cubic feet. Of this sum, only 3.25 trillion cubic feet represents the conventional utility uses of local distribution and power generation. A total of 9.65 trillion cubic feet represents markets to date unknown to the gas industry. These are markets that will consume LNG as a liquid commodity, distinct from the vapor characteristics of natural gas. Given even modest penetration of these potential markets, Mr. Lofstrom writes that we can expect LNG's share in 1980 to be 2.3 trillion cubic feet. And of this, nearly one trillion cubic feet will fuel new industrial and transportation uses.

A nation-wide tour of a conventional automobile modified by the San Diego Gas & Electric Company to consume LNG recently portrayed the imminence of these new markets. The automobile is a standard 1967 six cylinder vehicle with a cryogenic fuel tank in the trunk. It looks and operates no different from gasoline-fueled vehicles, but it has the advantage of reducing smog-producing exhaust emissions. It has indeed an added social value.

The transportation fuel uses to which LNG is particularly suited include the SST, military aircraft and missiles. The marine industry and the railroad industry could use LNG as a propellant. Vehicles used in agriculture and industry, fork-lift trucks, delivery trucks, cranes and bulldozers, could operate on LNG. So could virtually all motor-driven equipment. And still there are more new uses for LNG. It could be used in water desalination processes—and even in magnetohydrodynamic production of power.

But the most likely use of the LNG commodity in the immediate future will be to fuel buses and other commercial and passenger vehicle fleets. Perhaps government agencies, Federal, state or local, will be first to fuel their fleets with LNG. With these fleets will come demand for LNG fueling stations—perhaps entirely new chains that link the Nations highways. And these, in turn, will signal the demand for more LNG vehicles—an endless spiral.

REGULATORY IMPLICATIONS

When used for these new purposes there is a sharp distinction between LNG and natural gas. LNG in this perspective is not the life-blood of a gas utility. It is not the backbone of a service requiring public oversight. LNG in this perspective is a new liquid fuel, its essence and character different from natural gas. It is a distinct physical commodity. And it has distinct economic attributes.

I believe that the LNG commodity is a potentially competitive fuel, and that it will indeed be a competitive fuel. Its markets are those characterized by aggressive competition. Its marketers will be those prepared for competition. Government's response is critical—it must not hinder this competition. And to effect an appropriate government response, I submit that the transportation and sale of the LNG commodity should not be subject to Federal Power Commission regulation.

Authority over the rates and safety of LNG transportation in interstate commerce are matters properly before the Interstate Commerce Commission, the Federal Maritime Commission, and the Department of Transportation. Analogous issues at the state level lie within the province of the state utility commissions. Other than this, the LNG commodity is ripe for the marketplace.

THE HINSHAW EXEMPTION

The LNG commodity offers gas distribution companies a unique opportunity to expand their operations into new markets and an unregulated enterprise. This is a constructive development for the gas industry. But a deterrent may exist—section 1(c) of the Natural Gas Act, the so-called Hinshaw exemption.

Section 1(c), simply stated, exempts from the jurisdiction of the Federal Power Commission a gas distributor whose gas is received and consumed entirely within its state of franchise. It should be made clear that a distributor's Hinshaw exemption will not be jeopardized by the sale of the LNG commodity for new uses. And, it should be made known that section 1(c) will not hinder development of the LNG industry.

The sale of LNG by exempted distributors for new uses as fuel or cargo in vehicles or aircraft moving in interstate commerce, in my opinion, should not deprive distributors of their Hinshaw exemptions. I do not believe that these kinds of situations bear relevance to the jurisdictional status of distributors insofar as section 1(c) is concerned. The very substance of interpretations to the contrary, spawned by the manipulation of literalisms, emphasizes the difficulties of trying to square the LNG commodity with all of the provisions of the Natural Gas Act.

IMPORTS AND EXPORTS

Once considered far-fetched, LNG imports and exports to and from the United States are with us. Recently, the Federal Power Commission authorized the import of two shiploads of LNG, each bearing 2,000 metric tons, from Algeria to the Boston Gas Company. And some months ago the Commission authorized the export of LNG from Alaska to Japan. The east and west coasts, now exposed to the pioneers of international LNG trade, indeed have taken on an added significance.

These events freshen the spirit of section 3 of the Natural Gas Act—a provision long grown accustomed to pipeline movement of natural gas to and from Canada and Mexico. With the blessings of section 3, new names and places, ships and countries, will breathe life into the dusty tomes of FPC reports. And as these reports grow, so will new concepts and ideas influence the tenor of regulation.

Should section 3 apply to LNG imports and exports? Should it be modified? Are facilities used for LNG import and export subject to the Executive Order that requires Federal permission before border facilities may be constructed? These are questions that now tease the imagination because when section 3 was enacted and the Executive Order was promulgated, they contemplated natural gas only in its vapor phase and export and import only by pipeline.

LNG tanker imports and exports do not involve the border facilities contemplated by Executive Order 10485. Indeed, the Federal Power Commission made this specific finding in authorizing both the Algerian import and the Japanese export under section 3. But the difference in regulatory method between section 3 and Executive Order 10485 is substantial. While the Executive Order requires the Commission to consult the Secretaries of State and Defense and provides for presidential resolution of a disagreement, there is no similar requirement in section 3. When faced with a hearing record in an LNG import or export proceeding under only section 3, consultation with the Secretaries of State and Defense would violate the rules prohibiting *ex parte* communications. As a result, disagreements which might exist between the Executive Departments and the Commission could not be resolved systematically by the President.

I believe that section 3 should be re-examined—specifically with respect to LNG and generally with respect to all imports and exports. International commerce in LNG simply underscores a problem endemic in section 3 proceedings where additional border facilities are not required. An adversary proceeding, where an export or import is challenged and collateral national concerns can only be acknowledged, is far too limited a forum in which to arrive at a decision with broad foreign policy and national security implication.

The Commission's recent experience in the West Coast Import Case dramatically illustrates the pains of struggling solely with the economic issues peculiar to section 3 on an adversary record which cries for help to resolve sensitive questions of international consequence. In that proceeding, the Commission could not properly solicit and consider the views of the Secretaries of State and Defense. The *ex parte* rules forbade it. Yet the reflection of these views in the decisional process is indispensable to the public interest.

Based on these kinds of situations, I have come to the conclusion that another institutional device is essential to the effective exercise of our authority over the import and export of natural gas. It is especially imperative with respect to LNG, where the dimensions of the problem are world-wide and may often transcend the regulatory expertise of the Federal Power Commission.

Though the Commission must share a meaningful role in overseeing important aspects of international LNG trade, the spectrum of relevant national interests is so broad as to extend beyond the Commission's field of vision. I am not now prepared to suggest with precision all of the qualities of the appropriate solution. But I believe that they must provide a forum sensitive to the procedural safeguards of due process, yet exposed to the concerns I have mentioned as well as those of routine consideration.

Given the appropriate forum, the question then is to determine what standards should apply to exports and imports. How are broad national interests balanced against the distinct interests of a pipeline, distributor or producer which may be adversely affected by the proposed importation of LNG? The encouragement of LNG imports, at least at this state of the art, would seem consistent with our national energy policy of promoting the supply and availability of natural gas. Would it not therefore seem appropriate to develop import standards that place the burden of persuasion on those who oppose the import? These and other related questions can be answered later. What must be answered now is the call for a new institutional device—a forum free of the shortcomings of section 3. A forum in which we can more effectively evaluate the many issues raised by LNG imports and exports.

BENEFITS TO HAWAII AND ALASKA

A national policy for LNG does not end with sorting regulatory matters into place. There are still other considerations. A significant one is to assure that all areas of the Nation and all segments of the populace share the fruits of the new technology. And, of course, this includes the non-contiguous states—Hawaii and Alaska.

At present, the prices of gas in Hawaii are the highest of any state in the Nation. It is not the fault of Hawaii's suppliers. It is the result of the unavailability of natural gas and the need to distribute higher-cost LPG and manufactured gas. What the gas consumers and suppliers of Hawaii need is a meaningful choice—the logical one now is LNG.

Alaska natural gas is at the heart of this. The technology exists for the exportation of LNG by tanker from Alaska to Pacific ports. In a matter of months, LNG will be exported in tankers by Phillips and Marathon from Alaska to Japan. There is no technological reason why LNG could not be transported to Hawaii also, either as part of the Alaska-Japan shipments or independently.

The economics of such a venture are favorable—but the law, that is the Jones Act, is not. I am convinced that the new LNG technology and the benefits it could bring to consumers in Hawaii and to natural gas suppliers in Alaska require an amendment to the Jones Act—one which would permit LNG trade between these states in foreign

vessels. This would not be without precedent. In the past, Congress has exempted specific ventures from the strictures of the Jones Act. The rationale is equally persuasive here.

The primary purpose of the Jones Act was to develop a permanent American Merchant Marine—built in American shipyards by American labor, manned by American seamen, flying the American flag, carrying American products, owned by American citizens. Designed to enhance the commercial growth of the United States, it was intended to protect the stability of domestic industry in times of peace and to provide for the Nation's defense in times of national emergency.

The Act became law in 1920, when a large tonnage of government-owned ships was available for sale. Congress anticipated that the Act would encourage the development of a merchant fleet capable of carrying a major part of the United States' foreign trade and a fair portion of the world's carrying trade. Contrary to expectations, however, this did not follow. And recent figures show that while in 1947 United States flag ships carried over 57% of the Nation's commercial waterborne export-import trade, they carried only 7% of that total in 1966.

Efforts to implement a more productive maritime policy have been notably unsuccessful. In 1968, former Secretary of Transportation Boyd offered remedial legislation to the Senate Subcommittee on Merchant Marine and Fisheries. Among the items he proposed was a provision to amend section 27 of the Jones Act. The purpose of this amendment was to authorize the transportation of goods in domestic trade on foreign-built vessels—so long as an administrative determination could be made that there would be no serious effect on other vessels in the trade. No bill embodying this proposal, however, was introduced in Congress.

In 1967, Senators, Fong, Inouye, and Gruening introduced S. 2454 to amend section 27 of the Jones Act. Their bill proposed the exemption of "the transportation of merchandise between points in the State of Alaska and points in the State of Hawaii." Senator Gruening's statement described the complementary relationship of Alaska-Hawaii trade, the planned export of Alaskan LNG to Japan in Swedish-built ships, and the proscription of section 27 which prohibits these ships from delivering Alaskan LNG to Hawaii—a detriment to both states. The bill was referred to Committee but no hearings were held.

But section 27 has not been sacred. Congress has granted a limited number of statutory exemptions to the requirements of that section. Section 27 does not apply to the coastwise transportation of empty containers under certain conditions. It does not apply to the coastwise transportation of passengers and merchandise on Canadian vessels under certain conditions. It does not apply to certain foreign-built vessels which were engaged in United States coastwise trade during the First World War. It does not apply to merchandise carried in part over Canadian rail lines under certain conditions. In addition, section 27 has been suspended for temporary periods to permit the transportation of merchandise or passengers in certain foreign vessels over specified routes.

Indeed, section 27 could also be amended to accommodate Alaska-Hawaii LNG trade. An amendment exempting Alaska-Hawaii LNG trade from the proscription of section 27 could take a variety of forms—from a broad exemption in the image of S. 2454 to a narrow exemption for a single ship. Possibilities include the type of amendment proposed by Secretary Boyd, or that relating to water transportation between specific points or that providing a temporary exemption. Whatever the form of the amendment, I believe that it is a necessary means of extending the benefits of LNG technology to the

citizens of Hawaii and Alaska—and an indispensable element of national LNG policy.

Transporting the untapped reserves of Alaskan gas to the contiguous states in the form of LNG is still another exciting possibility. Its potential value as a competitive source of supply to the West Coast market should not be overlooked by industry and government policy-makers. The Jones Act, however, also operates to deter this development. While I believe that an Alaska-Hawaii LNG exemption can now be achieved, an Alaska-West Coast exemption appears to be more difficult because of the size of the market and the potential volumes involved. In the absence of legislation making such movements economically feasible, technology appears to afford the only means of surmounting this artificial barrier by achieving a breakthrough in costs. This brings me to the final element of LNG policy.

RESEARCH AND DEVELOPMENT

A national policy for LNG must include a program of continuing research and development of the new technology. Although considerable success has attended LNG storage and liquefaction facilities at the distribution level, efforts by pipelines to operate in-ground LNG storage facilities have met with failure.

The Federal Power Commission has authorized three pipelines to construct and operate LNG storage facilities. The first was Transcontinental Gas Pipeline Corporation's proposal to construct a storage facility in New Jersey, just outside New York City. This facility contemplated the in-ground storage of LNG in an unlined container with frozen earth as its walls and a man-made lid. The second was Tennessee Gas Pipeline Company's proposal to construct a storage facility in Massachusetts. Tennessee's project used technology similar to Transco's, but it was larger and was built in solid rock. The third proposal was Texas Eastern Transmission Corporation's plan to construct a storage facility on Staten Island. This facility soon will be completed. It differs from Transco's and Tennessee's projects insofar as the walls and lid of the container are made of concrete rather than using the so-called "mud pipe" technique.

The liquefaction and vaporization processes of the Transco and Tennessee projects performed successfully, but the facilities developed serious problems in their in-ground storage containers. Both containers failed because excessive heat leakage created a boil-off above anticipated levels. In view of these failures, it will be of considerable interest to see whether existing technology has the know-how to cope with these design problems. Indeed, the economies to be realized by the successful operation of in-ground LNG storage facilities are sufficient to warrant funding of further research and development. I would hope that the pipeline industry will make the necessary commitment.

This brings me to my suggestion of several months ago—that a Gas Research Council is the appropriate means for the industry to meet the mounting demands for research and development. This council should comprise all segments of the industry and representatives of government, universities, and research organizations. Its very existence would signal the commitment of both the Federal government and the gas industry to essential research objectives.

I submit that at an early date there should be convened a select group of industry, academic, and government personnel to lay the groundwork for the Gas Research Council. The Council should be represented by a wide spectrum of interests, just as the Electric Research Council comprises members of all segments of the electric power industry. As its first project, I propose that the Gas Research Council direct itself to the matter of gas supply. The need for improved drilling methods, the gasification of coal and oil shale, nuclear fracturing, deep ocean ex-

ploration, and other related methods of facilitating the recovery of reserves are a worthy priority for the industry.

In addition, the Gas Research Council should focus on LNG and how to maximize its benefits. A necessary LNG research project should study the beneficial recovery of refrigeration and promote techniques which will enhance the economics of LNG. I also propose specifically that the Gas Research Council develop means of integrating LNG import receiving facilities with facilities designed for the desalination of sea water. The technology exists for such a process, and so does the opportunity for desalination to provide a substantial credit to the costs of operating LNG facilities. This could make economic the movement of Alaskan gas to West Coast markets.

There are other projects worthy of consideration. An improved membrane design for tankers which integrates LNG tanks with the hulls to effect economies. Improved liquefaction systems to reduce the horsepower requirements of liquefaction. Back-haul systems for LNG tankers and overland trucks to reduce operating costs.

All of these research projects are significant to the industry and to the Nation. All of these projects will stand or fall on the initiative of the industry to take an early step in the right direction. The moral of inaction can only bring to mind the tale of the speedy hare, who, upon awakening from his nap, saw the tortoise plodding past the winning post. This is certainly no time for the gas industry to take a nap. It is the time to take advantage of an opportunity.

CONCLUSION

These, then, are the elements of a national policy for LNG. It must be formulated with particular reference to the Nation's energy policy of promoting competition among alternative fuels. It must respond to today's economic demands and regulatory needs. It must stimulate the development of an emerging LNG industry in large part directed at entirely new markets. It must comprehend all aspects of LNG imports and exports. None of the 50 states must be deprived of the benefits of the new technology. And continuing research and development of this technology must be encouraged.

To provide practical substance to these elements, appropriate action by the Congress, the Federal regulatory agencies, and the industry is called for. Some of the elements require the action of just one of these, while others require coordinated and parallel actions. Only with a conscious commitment by both government and industry will the Nation realize the potential benefits of the new LNG technology.

HIGH COURT INTEGRITY NECESSARY

Mr. GRIFFIN. Mr. President, the recent controversy over the extra-judicial activities of a Justice of the Supreme Court precipitated thoughtful and constructive comment by a number of this country's outstanding journalists and newspapers. I ask unanimous consent that these comments be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Star,
May 9, 1969]

HIGH COURT INTEGRITY NECESSARY (By Carl T. Rowan)

The most charitable thing one can say about Supreme Court Justice Abe Fortas and the proffered \$20,000 fee from the family foundation of financier Louis Wolfson is that Fortas raised serious doubts about the quality

of his judgment and jeopardized unnecessarily the integrity of the Court.

It is not necessary to argue about whether and when he returned the money to the Wolfson Foundation. Nor is it necessary to speculate as to whether the Justice did, or contemplated doing, anything in behalf of Wolfson, who was facing criminal charges at the time the fee was tendered. It is enough to note that, by Fortas' admission, he was given the money in 1966, after he became a member of the Court, because he thought he could undertake "research functions, studies, and writings connected with the work of the . . . Wolfson family foundation."

It is patently obvious now, and should have been in 1966, that this is not a proper arrangement for any member of the nation's highest court.

Through a generation of internal dissension and conflict, when McCarthyism, racism, and law-and-orderism have bedevilled the American people, this country has been blessed to have an independent judiciary that was ever mindful of the constitutional safeguards our forefathers erected against those times when impassioned mobs would seek to override the Bill of Rights.

Demagogues have tried to smear the Supreme Court. Rabble-rousers have cried for the impeachment of Chief Justice Earl Warren. Some congressmen have tried to make careers of their demands that Congress override various rulings of the Court. But it was mostly sound and fury signifying nothing because of the deep-rooted respect most Americans have for this nation's highest tribunal.

If future generations are to remain secure against tyrannies of all persuasions—against a tyranny even of a confused or frightened American majority—it is utterly essential that the Supreme Court remain "pure." It must not become defiled by suspicions generated by financially—or politically—grasping indiscretions by its members.

The Wolfson affair, and other of Justice Fortas' outside arrangements for which he received substantial pay, have occurred in a welter of confusions and contradictions about the ethics of the nation's public servants.

It makes no sense whatsoever that the President should ask top officials in the executive branch to join the government at great financial sacrifice and forbid them to take a nickel for outside lectures and other activities when members of the Congress and the courts are engaging in lucrative outside activities.

There ought to be a single "sanitary" standard. But if that is impossible to achieve, let our highest tribunal stand above all the rest for its simon-pure principles.

There is a serious question as to whether Supreme Court Justices ought to be running about the country giving speeches, even without a fee.

There isn't anything worth talking about these days that isn't likely to become the subject of litigation, including a constitutional challenge, and it compromises the integrity of the Court, to some degree, every time a Justice expounds on the issues of the day.

For example, millions of Americans surely agree with Justice Thurgood Marshall, who told a Dillard University audience Sunday that Negroes should realize that "nothing will be settled with guns, firebombs, and rocks," and thus reject black militant leadership.

But are we not to assume that one day soon some of the issues raised by black militants will come before our highest tribunal? Has not Justice Marshall made it clear in advance that they will not find him to be a friend in court?

Sure, a Justice may be able to view the law uncolored by his prejudices of age or political persuasion, but it is a fact that airing those prejudices creates doubt. And doubt erodes the integrity without which

the Court cannot function as the powerful arbiter it is in American life.

So, more than any other branch of government, the judiciary ought to be given the security, financial and political, that permits it to stand aloof from the money-grabbing and the influence-peddling that is so common among those of us of lesser ultimate responsibility.

[From the Los Angeles Times, May 16, 1969]

LESSONS IN FORTAS TRAGEDY

(ISSUE.—Now that Abe Fortas has resigned from the Supreme Court, how can the cloud over the high bench be removed?)

Abe Fortas is a brilliant lawyer, an independent thinker who could have made a great contribution to the Supreme Court and to his country. The fact that he has been forced to resign under circumstances that indelibly stain his reputation is a genuine human tragedy.

It is, however, a tragedy that he brought upon himself by an incredible insensitivity to the ethical standards which are properly applied to members of the Supreme Court.

The important thing, from the standpoint of the public interest, is to see that steps are taken to restore faith in the nation's highest temple of justice.

President Nixon has an initial responsibility to give full weight to considerations of character, as well as ability, in nominating a replacement for Fortas—and later for Chief Justice Earl Warren, when he retires at the end of June.

The U.S. Senate, for its part, should henceforth refuse to confirm any Supreme Court nominee who feels he needs a moonlighting job to augment the \$60,000 a year lifetime salary which the justices are now paid.

No Supreme Court justice has any business accepting money for outside work while a member of the court. In cases of private income deriving from activities prior to appointment, trust arrangements should be made to remove all possibility of interest conflicts.

These standards should apply not only to new members of the court, but to those already sitting. Associate Justice William O. Douglas, whose paid services to the Albert Parvin Foundation have been criticized in these pages before, should set an example by either severing the connection or quitting the court.

Legislation has been proposed which would require federal judges up to and including Supreme Court justices to make full disclosure of any outside income. The appropriate congressional committees should give the proposal serious and expeditious attention.

Unfortunately, some lawmakers who endorse disclosure requirements for judges hypocritically continue to object to the imposition of such requirements on themselves. Senate Republican Leader Everett Dirksen is the most prominent example.

The Times has consistently taken the view that elected officials at all levels—local, state and federal—should make full and public disclosure of their incomes from non-official sources.

Neither the U.S. House nor Senate, however, has shown any disposition to adopt meaningful disclosure rules.

We urge the lawmakers to face up to the fact that they—as well as Supreme Court justices and Caesar's wife—should be above suspicion if public faith in public institutions is to survive.

[From the Jewish Week, May 22, 1969]

WHO WILL SUCCEED ABE FORTAS?

The great wrong in the tragic-comedy of the Abe Fortas affair is his contention that he committed no wrong.

His real offense was not so much in the specific arrangements that loomed to the public as a major scandal, but in his accept-

ance of a place on the Supreme Court as an Associate and, later, in permitting President Johnson to place his name in nomination as Chief Justice. If the major part of the blame attaches to the President for pressing these unsought-for honors on his very close personal friend and unpaid servitor, one had a right to hope that a man with Fortas' keen awareness of the psychology of public life might have more firmly resisted these unwanted honors.

The President had needed to reward his servitor, and the need with him verged on compulsion. Driving taskmaster that he was, he could not endure his failure to reward and even over-reward a true and faithful servant. The President thus craved to shower unwanted honors on the man who had once saved his political career in a tight Texas election and had been at his beck and call ever since.

Fortas must have suffered from a greater sense of self-sacrifice, when he accepted the court appointment, than other, more receptive appointees had ever felt. Having reluctantly given up his happy role as the President's unpaid servitor and one of the best earners in the Washington bar, he was not prepared to apply a Spartan code of suprallegal propriety to himself.

Fortas was the fifth Jew to have served on the Supreme Court in a half-century, and his resignation leaves that court without a Jewish member for the first time in that period. We do not believe that President Nixon is obligated in any respect to succeed Fortas with another Jew, but it is understandable that he may feel a sense of noblesse oblige to name a Jew. If that is the case, it is to be hoped that the selection will not be on a personal or political basis.

Until the Johnson administration, the fact of a Jewish presence on the Supreme Court had grown into a splendid tradition. The first Jew named to the court, Louis D. Brandeis, was clearly not named out of political motive, since he was obviously a political liability at the time. Brandeis, however, represented a point of view on American life that President Wilson wished to contribute to the court.

Justice Cardozo was named by President Herbert Hoover in spite of his personal preference for others, and only because of his towering reputation as a great scholar and jurist. Justice Frankfurter was scarcely a practicing lawyer, having devoted his career to scholarship in the law. Justice Goldberg, far from being among the influence-wielders in Washington, had represented a minority influence in American life—organized labor.

If there is to be a sixth Jew on the Supreme Court, it is to be hoped that he will come out of the ranks of the great jurists, scholars and men of public service, rather than out of the practicing careerists, the politicians or the personal circles of the men in power.

One thing is certain: Jewish voters will be anything but flattered or pleased by the appointment of a Jew who does not clearly and unquestionably qualify for the position.

[From the Washington Post, May 12, 1969]
FORTAS' ACTS FLOUT TRADITION, COULD HARM COURT'S REPUTATION

(By Marquis Childs)

In February the Associate Justices and the Chief Justice of the Supreme Court got a raise in salary. The Associate Justices went from \$39,500 to \$60,000, the chief from \$40,000 to \$62,500. This pay raise was part of the package recommended for Congress and certain levels of the Executive Branch by the Federal Salary Commission.

With one-third of the Nation's families having incomes of \$5,000 or less, \$60,000 a year looks mighty big. When the salary package was up for passage, cries of indignation rose at what seemed unwarranted increases. While

members of Congress protested, the Senate rejected by a vote of 49 to 36 a resolution to strike down the whole business.

Whatever the justification, or the lack of it, for the size of the pay raises there was a valid rationalization behind the salary commission's recommendations. Public officials should not be penalized in a period of rapid inflation for public service. While public office can never be a source of enrichment, it should not, in a concept going back to America's founding fathers, be so poorly paid as to make it a form of servitude and a refuge for the unambitious and the second rate.

Against this background Associate Justice Abe Fortas' conduct on the Court flies in the face of the long tradition of the dedicated public servant. When his nomination to be Chief Justice was before the Senate, it was noted he had taken \$15,000 for a series of lectures delivered at American University. This sum had been raised by his former law partner, Paul Porter, from big-business clients of the firm.

Now Life magazine has shown that he took \$20,000 from a foundation controlled by the family of financial raider Louis Wolfson who had just gone to prison for violation of Securities and Exchange Commission regulations. In addition, Fortas lectures around the country at public forums for fees ranging from \$1500 to \$2000 a lecture. He kept the \$20,000 for 11 months and then returned it on the ground that he was too busy to advise on the foundation's work in race relations, the announced reason for the payment.

What makes this harder to understand is that Fortas is far from being a poor man. The head of a large Washington law firm, thoroughly familiar with the workings of a big-scale practice of the Fortas and Porter type, gave a horseback judgment that the justice in the 10 years prior to going on the bench would have been able to keep out of his share of the firm's earnings as much as \$3,000,000. The income of his wife, Carolyn Agger, now with Fortas' former firm, has been reported as \$100,000 a year. She is a highly resourceful tax lawyer.

At the time President Johnson nominated Fortas to be Chief Justice in succession to Earl Warren, there were few who questioned the brilliance of his legal mind. It was not until the disclosure of the \$15,000 fee for the University lectures that even some of his most ardent advocates began to cool. Doubt also centered on the closeness of his continuing relationship with Mr. Johnson.

For many years he had been the former President's personal attorney. Fortas was also the attorney for Bobby Baker, who rose to power as secretary to the Senate majority and Mr. Johnson's protegee. In the inner council of the Johnson Administration it was no secret that Fortas consistently gave the most hawkish advice to the President, confirming the Johnson view that the Vietnam war could be won.

In this history is a sober lesson on the nature of appointments to the Court. However brilliant the legal capacity, cronyism comes close to being a disqualifying factor. The dedication of a public servant, whether in State or Federal government, in the judiciary should be evidence weighing heavily on the positive side.

On the High Court today is a classic example of such service. When he was in California in early January for a brief holiday the retiring Chief Justice observed without fanfare 50 years in public office, beginning as a young attorney in the prosecutor's office in Alameda County and going on to an unprecedented third term as Governor of his native state. With quiet pride he told friends that he had never received a cent of income from any source other than his public salary. A pension from the State augmented his Supreme Court salary.

The Fortas disclosures have done the Court, and specifically the Warren Court, incalculable harm. If the outcry in Congress results in legislation requiring Federal judges to make public their holdings and their sources of income, some good will come of it. In the self-righteous voices raised on Capitol Hill is an audible hypocrisy, since the House of Representatives' own disclosure law is as full of holes as a sieve. The recently published list of holdings by Congressmen shows investments and directorships that appear plainly in conflict with Congressional responsibilities. The selfless public servant is shown on that roster to be the rare exception, rather than the rule.

[From the New York Times, May 18, 1969]

THE FORTAS CASE—CONCERN AND QUESTIONS OVER ACCEPTANCE OF A FEE

(By Fred P. Graham)

WASHINGTON.—Soon after the Supreme Court was established, Alexis de Tocqueville observed that the justices' power "is enormous, but it is the power of public opinion." To maintain this power, he felt, "not only must the Federal judges be good citizens, and men of that information and integrity which are indispensable to all magistrates, but they must be statesmen."

This has become even more valid in recent years as the Supreme Court has become more powerful—and controversial. The concept of judicial review by nine men who are appointed for life to rule on the constitutionality of the country's laws makes no sense unless they are men of uncommon integrity and good sense.

Last week many people were asking aloud if Justice Abe Fortas had demonstrated these qualities.

The questions were first raised by Life magazine in an article that accused the justice of having accepted, and later paid back, a \$20,000 fee from the family foundation of Louis H. Wolfson, a wealthy but shady stock manipulator who has since been sent to prison. Life said it had found no evidence the money was a bribe. But it charged that Wolfson used his relationship with Justice Fortas for name-dropping purposes in his efforts to stay out of jail.

Justice Fortas then compounded his difficulties by declaring unequivocally in a statement that since he became a justice in 1965 "I have not accepted any fee or emolument from Mr. Wolfson or the Wolfson Family Foundation or any related person or group."

He conceded, however, that the Wolfson Family Foundation "tendered" a fee to him (to do "studies and writings" about racial religious amity) and that "I returned it with my thanks."

LACK OF CANDOR

The lack of candor in Justice Fortas' reply served to emphasize his failure to deny or explain the alleged 11-month delay in returning the fee, and demands began to be heard on Capitol Hill for a further statement from him. Even the Democratic leaders who had stood by him when it came to light last summer that he had accepted a \$15,000 lecture fee fell silent this time. Senator Edward M. Kennedy even suggested that Justice Fortas might consider explaining himself to the Senate Judiciary Committee—a body stacked with conservatives who raked him over the coals when he appeared before them last summer.

Congressional Republicans were less subtle. Representative Robert Taft Jr. predicted that a bill of impeachment would be filed in the House if Justice Fortas does not quickly give a better account of the incident. Senator Robert P. Griffin of Michigan promised that "more information" will come out about the Wolfson fee unless Justice Fortas either elaborates or resigns.

At the week's end Justice Fortas was going

forward as if the matter were closed. He continued with his scheduled lecture schedule, with one change—his fees were either cancelled or donated to worthy causes.

His critics appeared content to let his case fester for a few days, while insisting privately that the incident is not yet over.

In the meantime, the ill winds of scandal and rumor seem to have stirred official Washington to realize something that had previously been missed: that the other branches of Government have begun in this decade to do something about conflicts of interest—and that the judiciary, alone, has done nothing.

Over the years, the Supreme Court has kept itself remarkably free of scandal—so much so that almost any judicial involvement with worldly goods is looked upon with deep public concern.

PROPERTY DEAL

The Washington Daily News ran large black headlines last November when it learned that Justices Fortas and William J. Brennan Jr. had invested in a large property project near here. There were more headlines when it was disclosed last year that Justice William O. Douglas was receiving a \$12,000 per year stipend as president of the Albert Parvin Foundation. Mr. Parvin had large Las Vegas casino interests. Justices Fortas, Brennan and Douglas have used lecture agents to book appearances that bring as much as \$2,500 per speech, and other members of the Court have lectured on a smaller scale.

Next to Justice Douglas, a man who has had four wives and, presumably, many expenses, Justice Fortas appears to be the member of the court who devotes the most time to making money on the side.

He is apparently not in want. His wife, a lawyer, is said to receive an annual salary in six figures, they have no children, and his salary has been raised from \$39,500 to \$60,000 since he became a Justice. But he is a self-made man of great energy and he has not until recently been loath to accept fees for his outside activities.

One reason for the interest in justices' money-making efforts is that they seem to be among the few high officials in Washington who can actually live on their pay. They don't have to run for re-election or spend money to keep up with the Joneses, and others almost always pick up the tab.

Thus, outside income is viewed askance, mainly because nobody can say with certainty which extra judicial activities are proper and which are not. Now bills to regulate judges' outside income or to require reporting of it flowed like confetti into the legislative hoppers last week and it seemed likely that some standards would be established as a result of Justice Fortas' present discomfort.

[From the Washington (D.C.) Post, May 19, 1969]

FORTAS CASE CARRIES A LESSON FOR ALL PRESIDENTS TO COME

(By Marquis Childs)

With the furor over Abe Fortas beginning to subside it is worth examining how it happened. As an example of how not to manage the relationship between the Chief Executive and the judiciary it should be a warning for the man now in the White House and for other Presidents to come.

While the flak rains down on Fortas, the principal actor was Lyndon Baines Johnson, currently playing it very quiet offstage in Texas. As in almost every aspect of his Presidency, Mr. Johnson was the political animal, the wheeler dealer, in his approach to the Supreme Court. This is not to say that other Presidents have excluded politics from their appointments to the court. But seldom have politics and the motivations of self-interest been so obvious.

It began immediately after the death of Adlai Stevenson in July, 1965. Who was to take his place as Ambassador to the United Nations? President Johnson summoned Arthur Goldberg, then an Associate Justice, to the White House.

Those familiar with the background say that Mr. Johnson exerted all his mastery of persuasion on Goldberg to get him to give up his lifetime place on the court and take the U.N. post. The U.N. Ambassador with his background of brilliant mediation in the labor field could bring peace to the world. His would be an unparalleled opportunity to calm the strife and, with constant access to the President and the Secretary of State, lead the way to a new Haven on earth. Having at least a normal share of human vanity, Goldberg left the court and went to the United Nations.

This created a vacancy. Not only that, but since Goldberg was of Jewish origin it opened the way for the appointment of Fortas. An unwritten rule, observed at least once in the breach, prescribes that in the political-religious balance on the court there shall be one Jew and one Roman Catholic.

Fortas was a long-time Johnson friend and his personal lawyer at critical moments in the Johnson career. He had managed the certification of Mr. Johnson's election to the Senate in 1948 when 87 votes in a bossed county were at stake. Even after he had formally withdrawn as Bobby Baker's lawyer, Fortas continued behind scenes to try to help get the Secretary of the Senate majority and Mr. Johnson's protege out of the mess of his wheeling and dealing.

Confirmation of Fortas by the Senate to be an Associate Justice was a formality. He had many distinctions in public service to his credit. The Warren Court had appointed him counsel for Charles Earl Gideon, who had been convicted in Florida of breaking and entering a poolroom and at his trial denied the right of a defending lawyer. Fortas carried the case through to a successful conclusion, establishing a new rule of law that defendants in state courts as well as Federal courts had a right to counsel.

The suspicious believe that in making Fortas an Associate Justice Mr. Johnson had looked down the road to the time when he would elevate him to Chief Justice. In 1965 he had three more years to go in the Presidency and he could in the normal course of events anticipate re-election to another full four-year term.

The storm broke when Earl Warren decided a year ago to retire, and Mr. Johnson named Fortas in his place. The nomination was twinned with that of Homer Thornberry, a Circuit Court of Appeals judge and another longtime Johnson crony, to fill the Associate Justiceship made vacant by the Fortas elevation.

Determined opposition soon developed, led by Sen. Robert P. Griffin (R-Mich.). At the outset this seemed to be based on Fortas' record as a liberal. Facts soon developed, however, notably the \$15,000 American University lecture fee and what appeared to be Justice Fortas' intervention in behalf of Mr. Johnson in a phase of the Vietnam controversy, that cooled his Senate backers. With confirmation blocked, Fortas asked that his name be withdrawn. If the damage of the *Affaire Fortas* could have been any greater to the court and to public policy, it would have been if the disclosure of the Wolfson Foundation \$20,000 had come after he had taken the foremost place on the bench.

In 1967 another Johnson intrigue brought a dramatic "first" on the court. Mr. Johnson named Ramsey Clark, the son of Associate Justice Tom Clark, a longtime Texan ally of the President, to be attorney general. It would have been anomalous for a son to plead a case before his father, and Justice Clark retired. Thereupon, Mr. Johnson nominated Thurgood Marshall to be the first Ne-

gro on the court. Marshall had a distinguished legal record, with six years as a Circuit Court of Appeals judge.

In the machinations leading to Fortas' resignation, the hand of Attorney General John N. Mitchell was evident in a now-you-see-it, now-you-don't fashion. This was unfortunate, to say the least, because the removal of Fortas by the constitutional process was clearly in sight. Mitchell, President Nixon's law partner and his campaign manager last year, has been mentioned as a replacement for Warren. That would seem today to be ruled out. No matter how high the qualifications, cronyism, as the Fortas case illustrates, is no criterion for the Federal judiciary.

[From the Washington (D.C.) Post, May 8, 1969]

IMPORTANCE FORTAS CASE BEARS ON NEW COURT APPOINTEES

(By Joseph Kraft)

The painful case of Justice Abe Fortas is important chiefly because of its bearing on future appointments to the Supreme Court. For now more than ever the moral authority of the Court is in question and requires enhancement.

But the qualities that can redeem the Court are qualities rare and fine—qualities that are, in the true and little-used sense of the word, religious. And these unworldly qualities do not find conspicuous expression in any of the men long close to the President who are now widely touted for appointment as Justices.

Behind the present low estate of the Supreme Court there are manifold reasons that go well beyond anything Justice Fortas has done or not done. Most important of all there was for two decades, at the Federal, state and local levels and in both the executive and legislative branches, a stalemate on fundamental social and political questions.

Given that enormous backlog of inaction, it fell to the Supreme Court to break long-standing deadlocks on such highly inflamed issues as racial segregation, legislative apportionment and criminal justice. In all of these difficult matters, the Court came down basically on the right side. It is very hard to imagine—indeed for me it is impossible—how any group of educated men could have endorsed manifest inequities for Negroes, urban voters and prisoners.

Decisions on these vexed questions of public policy inevitably aroused hostility to the Court among certain groups—notably Southerners, rural politicians, and law enforcement officials. Moreover, if these enemies were made by the matter thrust upon the Court, still other enemies were made by the manner in which the Court did its business.

For the fact is that during recent years, opinions often seemed to flow more from the social and political preferences of the justices than from the impersonal authority of precedent and the Constitution. In one reapportionment case, for example, Justice William Douglas wrote that: "The conception of political equality from the Declaration of Independence to Lincoln's Gettysburg Address, to the Fifteenth, Seventeenth and Nineteenth amendments can mean only one thing—one person, one vote."

Such indiscriminate assertions of sentiment, not to say whim, offended many thoughtful persons normally sympathetic to the Court. Particularly in the law schools the Court's lack of judicial restraint has made it an object of feelings verging on intellectual contempt.

Comes now, on top of all this, the revelations of financial dealings between Justice Fortas and a foundation set up by the stock market operator, Louis Wolfson. It is a seedy business that can only damage the Court—the more so as Justice Fortas was nominated by President Johnson to be Chief Justice and ardently backed by many people pleased to consider themselves apostles of the Court.

Already the know-nothings are seizing the occasion to launch murderous attacks on the Court, and the principle of judicial supremacy. Defending the Court against these attacks is now a central responsibility. And it is against that background that the President must select replacements for Chief Justice Warren, who has resigned as of this summer, and other Justices sure to step down in the near future.

The requirement in these circumstances plainly goes beyond mere honesty. Many of the worst of the know-nothings—for instance Senator Strom Thurmond of South Carolina—would pass that test.

The requirement is for persons of noble character, high-minded and philosophic, with feelings of reverence for the role of the Supreme Court, and a deep sensitivity to the best qualities in our national life. That standard can hardly be said to be met by the worldly business and political lawyers long associated with the President and now widely noised about as possible appointments—Attorney General John Mitchell, Secretary of State William Rogers, former Governor Thomas Dewey, former Attorney General Herbert Brownell or the former President of the American Bar Association, Charles Rhyne.

The President can best help the Court, and add luster to his own record, by going outside the worlds of politics and business. His best bet is to look to the bench and such judges as John Brown, Carl McGowan and Henry Friendly; or to the universities and such professors as Paul Freund of Harvard or Phil Neal of Chicago.

[From the Washington (D.C.) Star, May 9, 1969]

CLOSE SCRUTINY OF NEXT CHIEF JUSTICE LIKELY

(By Clayton Fritchey)

Confirmation of Presidential appointees is peculiar to the United States, but the framers of the Constitution knew what they were about, for the country has often profited from this unique provision. The latest proof is that Abe Fortas would have become the Chief Justice of the United States if the Senate had not rejected his nomination.

It is unfortunate that the Senate resorted to a filibuster rather than a vote in turning him down, but in the final analysis it was the testimony developed during the confirmation hearings that really blocked the appointment. Then, as now, the Senate was seriously disturbed by evidence that Fortas had accepted money under questionable circumstances after joining the court.

What also strongly militated against him, however, was his unusual closeness to President Johnson and the Democratic administration. Some of the Republican senators who initiated the fight against Fortas because of this relationship were criticized at first, but they had a point, and it's a point that President Nixon would do well to keep in mind when he soon appoints the successor to Chief Justice Earl Warren.

After the Fortas experience, Nixon can be sure the Senate will scrutinize the next nominee under a microscope. If the President wishes to save himself the same kind of embarrassment that Lyndon Johnson suffered over Fortas, he will be well advised to choose a man who is not politically vulnerable.

At this point there are thought to be about 10 men still in the running for the Chief Justiceship, and not all of them would inspire an enthusiastic reaction in the Senate. This is particularly true of one of the most prominent possibilities, former Attorney General Herbert Brownell.

The wiser politicians learn to let bygones be bygones but there are many Democratic senators who will never be able to forget that Brownell set some kind of a record for

partisanship when, as attorney general under Eisenhower, he accused Harry Truman of having knowingly appointed a Russian spy to a high government post. It was perhaps the most serious charge ever made against a former president.

Nixon has always admired Brownell (he wanted him for his campaign manager last year), but this view is not shared by leaders of the Democratic party who think of Truman as the man who stopped Stalin by forging the Atlantic Alliance and NATO, by defending Greece and Turkey, by going to war in Korea.

To the staunch friends of the ex-president, the insinuation that he was soft on communism still seems almost like blasphemy. Brownell is a clever, even brilliant lawyer and politician, but he has always been intensely partisan. He managed Thomas Dewey's presidential campaign in 1948 and four years later he was in the thick of Eisenhower's successful campaign.

The immense success of Earl Warren in unifying the Supreme Court for the last 16 years should indicate to Nixon how important the nonpartisan spirit is on the court. As the governor of California, Warren was so above narrow partisanship that he was elected by winning the Democratic as well as the Republican primary. It was this serene and generous spirit that enabled him to achieve a unanimous court on historic decisions like desegregation.

None of the chief justices appointed in this century have been abrasive. Warren was preceded by the expansive William Howard Taft, the courtly Charles Evans Hughes, the lofty Harlan Stone, and the amiable Fred Vinson, all were esteemed by both the public and the other members of the court regardless of party.

Nixon seems to have been personally looking over the prospects for the Warren vacancy. He invited seven of them to the recent White House dinner for the chief justice. Besides Brownell, the guest list includes Dewey, Secretary of State Rogers, Attorney General Mitchell, Solicitor General Griswold, Warren Burger of the U.S. Court of Appeals, and Charles Rhyne, former president of the American Bar.

[From the New York Times, May 16, 1969]
MR. FORTAS RESIGNS

The decision of Justice Fortas to resign from the Supreme Court was in the best interests of the court, the country and Mr. Fortas himself. By departing voluntarily, he has bowed to the iron rule that a judge must be beyond suspicion and he has thus helped preserve the reputation for integrity of the nation's highest court, which his own actions had so severely shaken.

In his letter of resignation to Chief Justice Warren, Mr. Fortas provides a more comprehensive explanation of his involvement with Louis Wolfson, a convicted financier. On the basis of the facts as he states them, it is difficult to understand why Mr. Fortas did not perceive a serious impropriety from the very outset in establishing a contractual relationship with the Wolfson Foundation. Since a judge cannot foresee who may come before him as a litigant, he must keep himself unencumbered as far as humanly possible of all outside entanglements. Moreover, as the canons of the American Bar Association make clear, a judge not only has to be innocent of any wrongdoing but he also has to be above reproach. This is a severe standard, but public confidence in an independent judiciary permits nothing less. It is a cause for sadness that Justice Fortas, in many ways so brilliant and perceptive, did not understand this simple truth until it was lit up by the glare of public controversy.

In the aftermath of the Fortas affair, every branch of government has occasion for introspection. President Nixon has to exercise the greatest care in making his appointments

to succeed Mr. Fortas and the retiring Chief Justice. He has to choose persons whose capacities and character command immediate respect. Judges at every level of the judiciary have to consider anew whether their own conduct conforms to the highest standards and what fresh measures, if any, are necessary to clarify and enforce those standards. Members of Congress have an obligation to examine the beam in their own eye and cease living by a double standard when it comes to improper financial connections and dubious business or personal associations.

[From the Lansing (Mich.) State Journal, May 7, 1969]

JUDGES SHOULD STOP OFF-BENCH FEE JOBS

The newest uproar over off-the-bench activities of U.S. Supreme Court Justice Abe Fortas has set off another round of political battles in Congress with some demanding his resignation and others calling for legislation requiring justices to make public all sources of outside income.

We believe the more pertinent question is why justices of the U.S. Supreme Court should be permitted under any circumstances to accept outside fees for work even remotely related to the legal field—keeping in mind that their annual salaries are now \$60,000.

U.S. Sen. John J. Williams, R-Del., seemed to be among the few who hit the nail squarely when he said Tuesday: "There is no excuse for the members of the Supreme Court to accept these outside legal fees on the basis of financial need, and most certainly their acceptance violates the moral standard of ethics that we expect from men holding these high positions."

Justice Fortas has been accused of accepting and later returning a \$20,000 sum for research work with a foundation which was in trouble with the U.S. Securities and Exchange Commission and whose chief officer was later convicted of violating federal securities laws.

There is no evidence that the research and writing work requested of Fortas had anything to do with the federal case and Fortas stated that he returned the money after deciding he had no time to carry out the work.

Whether or not this was a violation of judicial ethics is a matter which undoubtedly will be fought out on the political fields of battle.

The Canons of Judicial Ethics of the American Bar Association state that: "A judge should not accept inconsistent duties; nor incur obligations, pecuniary or otherwise, which will in any way interfere or appear to interfere with his devotion to the expeditious and proper administration of his official function."

The canon, however, does not have the force of law. It does not specifically prohibit the acceptance of fees for outside work.

We agree with Sen. Williams and can see no reason why supreme court justices should be permitted to earn outside income for law services while members of the highest judicial body of this nation.

The salary of \$60,000 which went into effect this year is not exactly what could be called low income bracket. Nor was the previous salary level of \$39,500 in the chicken feed category.

Secondly, and more important, is the fact that the U.S. Supreme Court is the final and "supreme" judicial body of the nation which has the last word on interpretation of law.

Any activity of a justice outside of the court which involves the acceptance of a fee raises a potential conflict of interest no matter how well intentioned the out-of-court work might be.

[From the Philadelphia (Pa.) Inquirer, May 16, 1969]

RESIGNATION UNDER FIRE

From every angle the drama of the Abe Fortas case is tragedy. Tragedy for a member

of the highest court in the nation, whose greed for money has led inevitably to his resignation; tragedy for a public shocked by the conduct of a Supreme Court Justice who was apparently so insensitive to the proprieties that he would accept the advantages of high office without meeting the standards that should go with it.

There are no laws covering every phase of judicial ethics. The Constitution enjoins "good behavior" by Federal judges and provides for Congressional impeachment for "treason, bribery or other high crimes or misdemeanors." In addition, there are the "Canons of Judicial Ethics" prepared in 1922 by the American Bar Association, which begin with a citation from Deuteronomy: "Thou shalt not take a gift, for a gift doth blind the eyes of the wise and pervert the words of the righteous."

Perhaps Justice Fortas never got around to reading this injunction, or else believed that it was not applicable to him when he accepted, and returned 11 months later, a \$20,000 fee from the Wolfson family foundation. Wolfson, a former Fortas law firm client, is now serving a prison sentence for violating Federal securities laws. The fee was given Justice Fortas while Wolfson's activities were under government investigation and returned after the financier was indicted.

Instead of coming forward with a record of his full dealings with Wolfson after exposure of the \$20,000 fee, Fortas compounded his difficulties by declaring that since becoming Justice he had not accepted any fee or emolument from Wolfson or the Wolfson family foundation; that a fee had been "tendered" to him, to do studies and writings, and that he had returned it with thanks.

Then the roof fell in. While pressure for his resignation or impeachment was mounting; while he refused an invitation to appear before a Senate committee to explain his actions, it was disclosed, and later acknowledged by Fortas, that an agreement was made for him to receive \$20,000 a year for life from the Wolfson foundation and, further, that in the event of his death, his wife, member of his former law firm, would continue to receive the annual payments.

There was nothing left for him to do but resign, and leave behind him grim questions as to how far a man's greed can drive him. Abe Fortas and his wife, who have no children, are not precisely in want. As Supreme Court Justice, his salary is \$60,000 a year. His wife, tax lawyer, receives an annual stipend said to be in six figures.

Although the spotlight of national attention has been thrown upon Fortas and his problems, he is not the only member of the high court who has been reaching zealously for money on the side. There is that aging Romeo, Justice William O. Douglas, now up to his fourth wife, who receives \$12,000 a year as president of the Albert Parvin Foundation. Mr. Parvin had large Las Vegas casino interests.

The distinction between the dubious propriety of Fortas' acceptance of fees while serving as Justice of the Supreme Court, and that of Justice Douglas and his outside pocket-money would appear to many an exceedingly thin one.

Rigid guidelines on judicial conduct, and disclosure of income, are obviously needed. Meanwhile it is not only the President who accepts Justice Fortas' resignation, but the American public—instantly and with relief.

[From the Indianapolis (Ind.) Star, May 16, 1969]

FOR SEASONED JUDGMENT

The letter of Abe Fortas to Chief Justice Earl Warren, informing him of Fortas' intention to resign from the court, confirms the comment we made early in the uproar over his acceptance of an outside fee.

It turns out, by the way, that the fee was to be the first installment of an annual lifetime retainer, for services to the family found-

dation of a man later convicted of violation of securities laws.

Fortas explained to Chief Justice Warren that he concluded the agreement for this arrangement shortly after he joined the Supreme Court in 1965. He made two significant comments about it.

"Because of the nature of the work, there was no conflict between it and my judicial duties," he said. "It was then my opinion that the work of the court would leave me adequate time for the foundation assignments." He later changed his mind, first deciding he would not have time for it and cancelling the agreement, and still later deciding that the fee should be returned.

Thus, as we said, his error was the result of inexperience. His statements indicate how little he knew about the workings and responsibilities of the Supreme Court when he was appointed. Some sound experience on the bench in lower courts would in all likelihood have equipped him with the prudence to have rejected the foundation retainer at the outset.

His resignation has resolved the unfortunate situation as far as the immediate position of the court is concerned. We are glad he had the wisdom and courage to resign, under fire, despite his own conviction that he had done nothing wrong.

Now we fervently hope that President Nixon, in finding a replacement for Fortas and in other nominations to the court, will turn to the ranks of thoroughly experienced judges. The highest court of the land is not a place for judicial novices. Its responsibilities call for the seasoned wisdom in judgment which can be acquired only by substantial and distinguished service on the bench.

[From the Washington (D.C.) Daily News
May 16, 1969]

FORTAS HAD TO GO

Abe Fortas had no real option on what he had to do—resign.

His conduct as associate justice of the Supreme Court was incredible. Even more incredible is his belief that he has done nothing wrong.

He long has had a reputation as a man of brilliant mind. Beginning as a poor boy, he had accumulated a fortune. He had been in public office many years in his earlier days. He had been an advisor to the President of the United States. If only by osmosis, you would think he would have sopped up some of the ethical standards of the American people.

Almost anyone in the country would understand the impropriety of a Supreme Court Justice accepting a lifetime annual fee of \$20,000 from any outside source—let alone a foundation set up by a high-flying stock manipulator heading for trouble with the law.

But not, apparently, Justice Fortas.

Mr. Fortas got the first \$20,000 check in January, 1966, three months after he went on the bench. He resigned his role with the Wolfson Family Foundation after criminal prosecution of Louis E. Wolfson (a former Fortas client) had been recommended to the Justice Department.

But he did not return the \$20,000 to the foundation until several weeks after Wolfson had been indicted.

If Mr. Fortas ever read Canon 4 of the Canons of Judicial Ethics he apparently did not understand it:

"A judge's conduct," the canon reads, "should be free from impropriety and the appearance of impropriety; he should avoid infractions of the law; and his personal behavior, not only upon the bench and in the performance of official duties, but also in his everyday life, should be beyond reproach."

Mr. Fortas' behavior has dealt a severe blow to the prestige of the Supreme Court.

The seriousness of this is not mitigated by the knowledge that Justice Douglas several years ago was revealed as accepting a \$12,000 annual salary as director of a California foundation. That situation never has been resolved, not publicly anyway.

There was a proposal in Congress to start a preliminary inquiry into the Fortas case next week. Some Congressmen now say this isn't necessary, that the case is "closed." But what about Justice Douglas? And whether or not the whole Fortas story has been revealed? What additional information does the Justice Department have?

Congress at least ought to inform itself—and the public—on every last aspect of links between the court and outside interests; as a preparation for Senate review of future Supreme Court appointees, if nothing else.

And, speaking of future appointments, as a result of Mr. Fortas' imprudence the successors to him and to Chief Justice Warren after he retires next month are bound to be subjected to meticulous scrutiny by the Senate Judiciary Committee—as was Mr. Fortas when President Johnson tried to make him chief justice last year.

So it behooves President Nixon, in choosing his candidates, to select men of the highest judicial caliber. Among other things, it is paramount that they have the most circumspect understanding of Canon 4.

[From the Washington (D.C.) Post, May 20, 1969]

FORTAS CASE DEMONSTRATED A CORRUPT STRAIN IN LIBERALISM

(By David S. Broder)

In his letter of resignation from the Supreme Court, Associate Justice Abe Fortas defended his fee from the Wolfson Family Foundation—whose head, a former law client, had continued to consult with the Justice on his legal problems with the Government—

with these words: "... Its program—the improvement of community relations and the promotion of racial and religious cooperation—concerned matters to which I had been devoting much time and attention. ... Because of the nature of the work, there was no conflict between it and my judicial duties."

Official Washington was shocked by the Fortas case, but it should not have been. It has been a long time coming—more than 30 years—but, tragically, it was in many ways the logical culmination of New Deal liberalism.

Two years ago, John Kenneth Galbraith wrote in his book "The New Industrial State" that "only the innocent reformer and the obtuse conservative" can be unaware of the ways in which "the interests or needs of the industrial system are advanced with subtlety and power. Since they are made to seem coordinate with the purposes of society, Government action serving the needs of the industrial system has a strong aspect of social purpose. And . . . the line between the industrial system and the state becomes increasingly artificial and indistinct."

All the Fortas case really shows is that Galbraith's dictum applies to the Supreme Court as well as the other branches of the Government. The evolution has been plain.

The New Deal, which brought Fortas and his friend, Lyndon B. Johnson, to Washington, was a merger of two elements, an old-fashioned political liberalism committed to civil liberties and (later) to civil rights and a new economic liberalism based on the use of governmental power to expand and redistribute the national wealth.

The economic program, which was dominant, was originally directed to the relief of the Depression problems of unemployment and poverty. Though many of its pump-priming efforts failed, the New Deal reaped the economic benefits of World War II and liberalism emerged in the postwar period as

a sponsor of a variety of public programs—military and civilian, foreign and domestic—that kept the industrial system prosperous.

Like many others of his generation, Abe Fortas made the transition from public servant in that early war on poverty (he was general counsel of the Public Works Administration at 29) to private practitioner handling legal problems for the industries that profited from the Government-induced prosperity.

As Max Frankel of the New York Times said, Fortas pioneered in the pattern of "brokerage between the rich and the mighty, for both noble and profitable causes." He was, for many years, both a skilled advocate for his private clients and a cherished counselor to Lyndon Johnson, who shared his view of the compatibility of liberal politics and private profits.

In their world, there was no sharp line between private and public interests. As a lawyer and as a Justice, Fortas was also a White House insider. And the presidential assistants with whom he worked knew they could join the Fortas firm, or others like it, at handsome salaries when their White House duties were finished.

To those who said the system was suspect, the reply was always that it served the cause of liberalism, of freedom and of social justice. Just as the profits of Fortas' private law practice allowed him to serve as indigents' counsel in landmark civil rights and civil liberties cases, so the profits of the war-inflated, Government-subsidized economy permitted Democratic Presidents from Truman through Johnson to pay for the education and welfare programs they passed.

The operating principle of the liberal program from the New Deal through the Great Society was the purchase of public programs through the guarantee of industrial prosperity. It seemed a perfect marriage—but the blurring of public and private interests at its root was essentially corrupt.

That Fortas' particular involvement was with a businessman indicted and later convicted of stock fraud may be regarded as accidental. But the intimate interweaving of private and public interests symbolized by his dealings with Wolfson is all too typical of the political tradition from which we came.

The New Left campus radicals who are trying to destroy the institutions of liberalism have long contended that liberalism's achievements in the social welfare-civil rights area are simply window-dressing or accidental byproducts of what is essentially a corporate-governmental mechanism for providing profits and protection to the privileged.

By confirming the radicals' view of the system, particularly at this moment, Fortas has compounded a personal tragedy into something of a national calamity.

[From the Richmond Times-Dispatch, May 16, 1969]

MR. FORTAS RESIGNS

The resignation of a Supreme Court Justice—although unprecedented in the tribunal's 180-year history—was almost essential in the case of Abe Fortas. Since Mr. Fortas apparently was unable to dispute or satisfactorily answer the serious charges against him, his resignation was the only means short of impeachment to remove the embarrassing shadow of suspicion which has damaged the high court's prestige.

Although Mr. Fortas still insists that he has done no wrong, many are viewing his resignation under fire as a confession of guilt. In a sense, perhaps it is. And yet, that should not mean that the entire matter is forgotten. For the case has raised a number of important issues and questions which remain to be resolved.

Unfortunately, indiscretions of the kind committed by Mr. Fortas have become all

too common. The only good that can possibly come out of his personal tragedy is to prevent future cases of this kind.

Mr. Fortas' colleague and former teacher, Associate Justice William O. Douglas, has been receiving \$12,000 a year from a tax-exempt foundation linked to Las Vegas gambling interests.

Two-thirds of the 435 members of the House of Representatives, complying with a weak law requiring the partial disclosure of their financial interests, revealed last week that they have substantial outside incomes—some of which could compromise their public duty.

Time magazine recently noted that "it is hard to find an ex-*alide* of Lyndon Johnson's who has not gone to a firm that solicits work from the government, and there is a long list of men who have served on regulatory agencies and later represented clients before those very same agencies."

The foregoing suggests the need for a law requiring full disclosure of outside assets and income and a stricter code of ethics—particularly for members of the judiciary, from whom we have the right to expect the highest possible standards.

It is impossible to devise statutes that will guarantee honesty or thoroughly protect public servants from temptation, but a great deal can be done to improve existing legislation.

LEGISLATION BY THE SUPREME COURT

Mr. ERVIN. Mr. President, during the past 2 years the Subcommittee on Separation of Powers has been devoting a considerable amount of its attention to the Supreme Court. The subcommittee has been trying to make an evaluation of the "activism" displayed by the Court in the past 15 years and to assess the consequences to our constitutional system of the new role the Court has been playing.

Last year the subcommittee conducted a series of seminars at which leading members of the academic world in the fields of law, government, and history discussed the Supreme Court. In recent months these hearings have circulated among professors, lawyers, and judges, and the subcommittee has begun to receive the benefit of additional observations and assessments of the Court from a wide range of opinion.

One of the topics to which the subcommittee has paid particular attention has been the question of what nonjudicial activities judges and courts may properly engage in and yet not conflict with their prime responsibility of doing justice in deciding cases. Extrajudicial behavior includes a wide variety of activities, including speechmaking, press conferences, appointments to governmental commissions, and the exercise of rulemaking or legislative powers by the Supreme Court, to mention only a few.

While it may come as some surprise that the Supreme Court has legislative powers, the fact is that Congress gave it rulemaking authority over 30 years ago. Under this authority, the Court can announce rules of procedure governing the conduct of civil and criminal trials throughout the Federal courts. Unless vetoed by Congress within 90 days of submission, these rules have the force of law. As every lawyer knows, rules of procedure have a tremendous effect on the rights of parties and on the course

of justice itself. The immense scope of this authority can readily be seen when one realizes that most of the controversial decisions in the field of criminal law handed down in the past decade have to do with procedural rules and conceivably could have been established by the Supreme Court under the rulemaking authority Congress delegated to it three decades ago.

There is much confusion and misunderstanding about the relationship between legislation and rules announced by courts in case decisions. For instance, there is a popular notion that the Supreme Court should act whenever Congress is too slow or too recalcitrant or of a different mind as to the solution to a particular problem. Those who hold this view are intoxicated by the quick, simple way in which the Court can decree the desired results. Recourse to the Court avoids the slow, frustrating effort necessary to analyze the problem, devise precise solutions, galvanize opinion, convince skeptics, meet objections, and form a political majority to get the job done. Benevolent dictatorships also have these same advantages over democratic systems.

This view is, in my opinion, evidence of an unfortunate lack of faith in democratic processes whenever those processes do not quickly result in the desired ends. It is a tragic irony indeed that those who seek changes in the name of expanding the rights and fruits of democracy turn to the nondemocratic branch of Government—the Supreme Court—to achieve their purposes.

Those who profess to believe in democracy but who are impatient with its requirements think that the judicial process and the legislative process are completely interchangeable. However, in this they make a fundamental error. The legislative and judicial processes are not interchangeable. And as Judge Warren E. Burger of the Court of Appeals of Washington, D.C., said recently in a speech to the Ohio Judicial Conference, "The Supreme Court helped make the problems we now have because it did not 'go by the book,' but instead preferred to 'legislate' by case decision instead of by the slower but more certain 'orderly process of statutory rulemaking.'"

Mr. President, Judge Burger's speech is an excellent analysis of the disadvantages of making sudden and drastic changes in the law by the piecemeal, ad hoc process of case-by-case decisions as the Supreme Court has done. I ask unanimous consent that his speech, given to the Ohio Judicial Conference in Columbus, Ohio, September 4, 1968, be printed in full at the conclusion of my remarks.

In his address Judge Burger points out that the revolution in criminal law in the past dozen years follows a period of stability of over 150 years. While a number of important reforms have come from Congress—for example, the Criminal Justice Act of 1964, and the Bail Reform Act of 1966—most of the changes in recent years have come from the Supreme Court. He argues, as have many, that the Court is not the appropriate source for drastic, "legislative" changes in the law—an observation fully in accord with the Constitution, which in article I,

grants "all" legislative powers to Congress.

The courts do not have either the time or the facilities for gathering data on complex issues of criminal procedure. They cannot write new and comprehensive rules on the basis of one or two cases and a few legal articles, in the context of the emotionally charged issues which come before them. Those issues have not been processed and digested by the clash of opinions and analysis which are part of the slow process of legislation in Congress. As Judge Burger observes, the legislative process gives time for a consensus to grow as issues are clarified and discussed. This avoids the shock and surprise, "the bitterness and confusion" that we experience on Tuesdays when we open our morning paper and read of the latest decrees that the Court has handed down.

Of particular concern to Judge Burger is the fact that the Supreme Court's new doctrines of criminal law—and I may add, its decisions on social, economic, and political issues, as well—have been couched in constitutional doctrines. In this way the Court's views of what is best for society are imposed on the States as well as the Federal Government, and are locked in, immune from legislation by Congress and State legislatures. This means that the Court's decisions cannot be changed or modified even if experience shows, as it has already, that change is necessary.

The only way, save by constitutional amendment, that Court "legislation" in criminal law, and in economic, social, and political fields can be changed, is by the appointment of new members who reverse the ill-advised decisions of their predecessors. The country urgently needs Supreme Court Justices who are disciplined in the tradition of the limited role of courts, and who have the judicial temperament to set aside their personal views and interpret the Constitution according to its clear terms. We may hope that future members of the Court will return that institution to its proper place in our constitutional system. But even in that event he still will have paid a heavy price. When precedents are overturned almost wholesale—as the current Court has done—then constitutional law becomes a thing of changing whim, subject to the views of passing Court majorities. In Judge Burger's words, "Constitutional doctrine will rise and fall like governments under the Fourth Republic of France."

Judge Burger calls for a return by the Court to the use of its rulemaking procedures, and the participation of judges, lawyers, and others in the formulation of rules of criminal procedures. As he says, the Department of Justice, State prosecutors, defense lawyer groups, bar associations, and law professors—not to mention the ordinary law-abiding citizen—should get their "day in court" before drastic changes are made in the law.

Extensive use by the Supreme Court of its statutory rulemaking powers will itself raise serious separation-of-powers issues. The line between judicially created rules and legislation by Congress

is not easy to draw. But if the Court used its formal legislative powers, the results would most likely be preferable to the situation the country now finds itself in.

I commend Judge Burger's remarks to all those who are disturbed at the Court's doctrine of legislating in the guise of deciding constitutional cases.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

RULEMAKING BY JUDICIAL DECISION: A CRITICAL REVIEW

(By Judge Warren E. Burger, Washington, D.C.) *

The State of Ohio has taken a significant step forward in vesting rule-making power in its judiciary in "partnership" with the Legislature. As our society has become more complex it has spawned an array of new problems and that should not surprise us. History teaches us that progress always reveals new needs to be met and that is how Man worked his way out of the swamps and the jungles and the forests.

This complexity of our society has manifested itself in a very marked way in terms of improvements in law and in judicial administration. In an earlier day legislators had more time it seems, to adjust the machinery of government, including the machinery of the courts, to meet new problems. It is clear that in the Twentieth Century legislative bodies have not found the time to respond to all the needs which are served by judges.

You now have the initiative of important rule-making power, and at the threshold it may be useful to dwell for a short time on the strengths, the weaknesses and the pitfalls which can attend the exercise or failure to exercise this power.

SOME HISTORY

I will direct myself to some history which, in terms of the law, is recent—the events of the use and non-use of rule-making power in the Federal system over the past 30 years with particular emphasis on the past dozen years as it relates to rules of criminal procedure.

You know this history as you know the creed of your church, but it bears repeating for the same reason people remind themselves of their moral guides every Sunday in church.

I believe the points I will make concerning use of rulemaking power are shared by a growing number of judges, lawyers and, I am glad to say, by an increasing number in the academic community. Too many law professors for a long time gave uncritical applause to anything and everything they could identify as an expansion of individual "rights," even when that expansion was at the expense of the rights of other human beings—the innocent citizens—presumably protected by the same Constitution. I see signs of a constructively critical attitude by law teachers toward some of the judicial techniques employed in recent years to make reforms in criminal law procedure and rules of evidence.

As we look back we can see that for about the first 150 years of our history the criminal

law and its procedures remained fairly simple and quite stable. For 25 to 30 years after that there was a considerable ferment in criminal procedure and the rules of evidence, and in the last 10 years, more or less, we have witnessed what many scholars describe as a "revolution in criminal law." Today we have the most complicated system of criminal justice and the most difficult system to administer of any country in the world. To a large extent this is a result of judicial decisions which in effect made drastic revisions of the code of criminal procedure and evidence and to a substantial extent imposed these new procedures on the states.

This was indeed a revolution and some of these changes made were long overdue. All lawyers take pride, for example, in a case like *Gideon v. Wainwright*, which guarantees a lawyer to every person charged with a serious offense. The holdings of the Supreme Court on right to counsel, on trial by jury instead of trial by press, and on coerced confession will always stand out as landmarks on basic rights. These were appropriate subjects for definitive constitutional holdings rather than for rulemaking procedure to which I now turn. (In fairness, it must be said that some states had achieved these improvements long before the Supreme Court did so.)

AD HOC OR "BY THE BOOK?"

My central point tonight is, that as we look back, it seems clear now that the Supreme Court should have used the mechanism provided by Congress for making rules of criminal procedure rather than changing the criminal procedure and rules of evidence on a case-by-case basis.

If a large undertaking like framing rules of procedure is performed on an *ad hoc* basis, we may be right some of the time, but if we do it "by the book," we are likely to do it correctly all of the time. Surely it is arguable that the basic concepts of orderly procedure must apply to the enormously complex task of rewriting a code of criminal procedure. Over these past dozen years, however, the Supreme Court has been revising the code of criminal procedure and evidence "piecemeal" on a case-by-case basis, on inadequate records and incomplete factual data rather than by the orderly process of statutory rulemaking.

I suggest to you that a large measure of responsibility for some of the bitterness in American life today over the administration of criminal justice can fairly be laid to the method which the Supreme Court elected to use for this comprehensive—this enormous—task. My thesis assumes the correctness of the objectives the Court sought to reach in all of these controversial holdings. To put this in simple terms, the Supreme Court helped make the problems we now have because it did not "go by the book" and use the tested, although admittedly slow, process of rulemaking through use of the Advisory Committee mechanism provided by Congress 30 years ago.

JUDGES AND COURTS NOT "IMMUNE"

If anyone should think it unseemly that a judge should undertake to analyze and comment on the actions of the highest court, let me suggest that no court and no judge should be immune from examination of its functioning. Moreover, the need for such study is in direct proportion to the degree of reviewability of the particular court. A court which is final and unreviewable needs more careful scrutiny than any other. Unreviewable power is the most likely to indulge itself and the least likely to engage in dispassionate self-analysis. Presidents, governors and legislators, like most state judges, can be recalled by the people for good reasons—or none, but judges of Federal constitutional courts cannot be recalled.

Chief Justice Warren, and more recently

Chief Justice-designate Fortas, have reaffirmed the value of constructive criticism of the courts and of judicial action. Of course, this is as it should be. In a country like ours, no public institution, or the people who operate it, can be above public debate. The important thing is that public discussion of the courts be constructive, objective and calm and not emotional or bitter or personal.

I question tonight not the court or the last decade's holdings of the court but its methodology and the loose ends, confusion and bitterness that methodology has left in its wake. There is no legitimate place in American life for some of the acrimonious, irrational criticism of the Supreme Court and it ought to stop.

THE BASIC FUNCTION OF JUDGES

The basic function of judges is to decide cases and resolve controversies. In performing that function, a court of last resort must, as we all know, construe and interpret constitutions, statutes, rules, contracts, wills and trusts and in so doing it will frequently "make" law. This is inherent in the evolution of common law. But traditionally the making of codes of procedure or evidence, or rulemaking, is essentially a legislative function and this, as many noted legal scholars have pointed out, is because courts do not have the fact-gathering machinery or indeed the time needed for this difficult task; it is not because of a lack of competence. No one could seriously challenge the competence of nine justices of the Supreme Court to draft a code of criminal procedure, provided they could take the time and have the staff facilities necessary.

Facts and information are the raw materials of the law whether in deciding a particular case or in framing rules of procedure; nowhere is this more crucial than in the development of procedures. Rarely can one case or even a dozen cases, and no one text or authority nor even a dozen writers, supply an adequate factual foundation for building a structure of rules of procedure. Indeed, raw information and raw facts alone are not enough, for all raw material is useless, and can even be misleading, until it is processed. We have techniques in rulemaking for this processing which are tried and tested. They are based on the adversary system itself, drawing on centuries of experience which taught us to defer conclusions until we had allowed the clash of opposing points of view and the competition of ideas to supply a base or predicate for acting and drafting.

NEED FOR ORDERLY RULEMAKING

It was, as I suggested, more than 30 years ago that the legal profession, the courts and Congress recognized the need for an orderly rule-making procedure for the Federal system. Federal judges, and particularly the Supreme Court, acknowledged that the press of their own daily work and the narrowness of the records of particular cases before them were obstacles to sound rulemaking.

It was also recognized that a legislative body, even with a great number of lawyers in its membership, was not a satisfactory instrument for making detailed rules of civil or criminal procedure. From the premise that neither the courts nor Congress could perform this function alone, a rule-making procedure was established by law to enable the Supreme Court to prescribe rules by use of an Advisory Committee appointed by the Court. This advisory "legislative" body included lawyers, judges and law professors. It in turn was to carry on hearings, seminars and empirical studies and then submit the proposed rules to the Supreme Court. The Court after study was empowered to approve and adopt them. Under the statute they were then to be sent to Congress and, absent a modification within a stated period, they would become the law. This as we know was the process by which the Federal Rules of Civil Procedure were born. This is what you are now about to do.

*Text of an address delivered by Judge Burger to the Ohio Judicial Conference in Columbus, Ohio, Sept. 4, 1968.

Judge Burger is a graduate of St. Paul College of Law (LL.B. magna cum laude, 1931); was awarded a Doctor of Laws degree in 1966 by Mitchell College of Law; was on the faculty of the Mitchell College of Law from 1931 to 1948; practiced law in Minnesota from 1935 to 1953; was assistant U.S. Attorney General from 1953 to 1956, and has been on the bench of the U.S. Court of Appeals, Washington D.C., since 1956.

The genius of this scheme was that it was a joint enterprise of the Judiciary and Congress and the legal profession as a whole. While there were some critics of the Federal Rules of Civil Procedure so produced, the method of their drafting, preparation and adoption brought about overwhelming acceptance among lawyers, judges, scholars and public. First, there was a broadly based and representative Advisory Committee selected by the Supreme Court and as an official body it had great stature. Second, the Committee consulted every organization which was entitled to be heard. Bar associations and law schools carried on extensive studies and seminars at the request of the Advisory Committee. By the time the rules were drafted, they represented the best thinking of thousands of lawyers, judges and scholars in every state and local bar. This technique came to be recognized as a remarkably effective means of codifying rules of procedure and has been copied by many states. It is one of the significant contributions of modern law. Once the Civil Rules were an accomplished fact, the Supreme Court, acting under this same statute, created an Advisory Committee for Criminal Rules. For three years this Committee of eminent and representative members of the profession, including many Federal judges, conducted studies, held hearings, consulted other groups, and prepared a tentative draft of the Federal Rules of Criminal Procedure. This was then circulated to thousands of lawyers and judges for criticism and comment. The Judicial Conferences of the eleven circuits and a great many bar associations held seminars to study and report their views on the proposed rules. The Advisory Committee then revised its tentative rules to take into account the suggestions received and circulated a second preliminary draft and the grinding processes of study, challenge, debate and criticism were repeated. By this stage, the Department of Justice, state prosecutors, defense lawyer groups and bar associations and law professors had all been given a "day in court."

After being examined and approved, these rules were adopted by the Supreme Court and sent to Congress, whose acquiescence made them law. That was 15 years ago.

"THE PAST DOZEN YEARS"

The sheer volume of holdings the past dozen years in what have been essentially changes in rules of criminal procedure and evidence has placed the Supreme Court directly in the business of creating on a case-by-case basis important new criminal rules which dwarf the Federal Rules of Criminal Procedure in impact even if not in volume. I suspect that a dozen years ago the Supreme Court did not anticipate the scope of its "revolution" in criminal procedure, for even in retrospect the starting point is not clear.

A substantial number of lawyers, judges and scholars believe that when the Supreme Court found itself traveling down the road of codifying detailed rights and procedures under the Bill of Rights perhaps that was a good time to pause. Such a pause was urged, not only by the Court's dissenters, but by responsible voices, including Judges Lumbard and Friendly of the Second Circuit, Justice Walter Schaefer of the Illinois Supreme Court, and Dean (now Solicitor General) Griswold, among others. I have said for five years or more what I say to you now. In such a pause the Court would have done well to ponder long and carefully whether it was time for the entire subject of criminal procedural rules to be submitted to a Supreme Court Advisory Committee so that this remarkably efficient process could be directed to a broad scale re-examination of all the problems which the Supreme Court was concerned with, including the elusive concepts and problems of eyewitness identification at police lineup procedures, to men-

tion but one example on which judges generally have little or no first hand knowledge or experience.

A DANGEROUS, MISCHIEVOUS WEAKNESS

There is a dangerous and even mischievous weakness in making or revising sweeping general rules of procedure and evidence on a case-by-case basis. The axiom of lawyers that "hard cases make bad law," applies and by the very nature of the review jurisdiction of the Supreme Court the cases it decides to review are usually "hard" cases and not the ordinary or usual kind of case. The Court's limited time often requires that the "easy" cases be left to others. The state cases which come to the Court give them less choice, especially in a period of escalating constitutional concepts, but essentially the Supreme Court is its own "traffic manager."

These "hard" cases usually come to the Court on the narrow record of but one case which frequently presents emotionally appealing situations that confuse and blur the bedrock consequences of a broad holding. With deference, I suggest that these cases are not always briefed and argued by men qualified by experience to present a case of great magnitude and consequence. Indeed, members of the Court have been heard to complain about the inadequacy of presentation. When the presentation for the accused is inadequate the mechanism of a brief from a friend-of-the-court is used. The Supreme Court cannot impose a friend-of-the-court on the State as an Appellee and this is where the States have been weak.

In short, the narrow record of the particular cases, the appealing aspects of the "hard" case, and the presentation by inadequate briefs and arguments from lawyers who never before, and perhaps never again, will see the hallowed chambers of the Supreme Court, all combine to have a large issue decided without the careful, painstaking, deliberative processes of the Supreme Court's Advisory Committees which I have already described.

Justice White, dissenting in *United States v. Wade*, which established new rules for police lineups, said:

"The Court assumes a narrower evil as the basis for its rule—improper police suggestion which contributes to erroneous identifications. The Court apparently believes that improper police procedures are so widespread that a broad prophylactic rule must be laid down, requiring the presence of counsel at all pre-trial identifications, in order to detect recurring instances of police misconduct. I do not share this pervasive distrust of all official investigations. None of the materials the Court relies upon supports it. Certainly, I would bow to solid fact, but the Court quite obviously does not have before it any reliable, comprehensive survey of current police practices on which to base its new rule. Until it does, the Court should avoid excluding relevant evidence from state criminal trials."

Justice Black was even sharper with the five majority Justices; he said in his dissent:

"... even if this Court has power to establish such a rule of evidence, I think the rule fashioned by the Court is unsound. The 'tainted fruit' determination required by the Court involves more than considerable difficulty. I think it is practically impossible. How is a witness capable of probing the recesses of his mind to draw a sharp line between a courtroom identification due exclusively to an earlier lineup and a courtroom identification due to memory not based on the lineup?"

The careful study processes of an Advisory Committee in rulemaking would have explored all these avenues, sifted out the facts, and worked out a reconciliation and accommodation of the differing points of view. More than that, such a Committee would refuse to act unless it had the "solid fact" basis Justice White and three other Justices referred to instead of the individual specula-

tion of five Justices who may never have witnessed a lineup in a police station.

It is interesting to note that the briefs in the *Miranda* case filed by 29 States and the National District Attorneys' Association strongly urged the Supreme Court not to resolve great issues on a narrow record of a few cases without the broad study which characterized the development of the Federal Rules of Criminal Procedure.

The Supreme Court brushed this off, saying: "Where rights secured by the Constitution are involved, there can be no rulemaking or legislation which would abrogate them."

All of us would agree that the Supreme Court should not let Advisory Committees or Congress "abrogate" any part of the Constitution, but I respectfully point out that four members of the Court disagreed with the five and that for nearly 200 years the "constitutional rights" which emerged from some of these cases were not seen by anyone. I hasten to add that no Court should ever be precluded from recognizing a constitutional right previously overlooked, but the Supreme Court's historic reluctance to "reach" for constitutional issues might well have led to allowing the rule-making process to function first as it has so admirably in the past before resolving a constitutional point.

LEADERSHIP SHOULD COME FROM THE COURT

Leadership in improving the administration of justice should, of course, come from the Supreme Court and under the statutory procedure it is not bound by what the Advisory Committee finally submits any more than it gives advance constitutional approval by adopting a set of rules. But for the life of me, I cannot see why the Supreme Court should assume this enormous task single-handed and ignore the thousands of lawyers, judges and professors and such helpful groups as the ALI and others.

Members of the Supreme Court have been known to express regret and even annoyance from time to time at the lack of support for the Court's holdings from the legal profession and the Judiciary. But that should not be surprising when valid arguments have been responsibly advanced by four Justices in dissent urging the Court to go slowly and seek more reliable empirical data on the issue at hand and this is met by a lofty comment that on constitutional doctrine the Court "does not conduct a poll." With four Justices and a large segment of the legal profession protesting that no constitutional doctrine is involved in the particular case, the five should not expect that their arch comment about polls disposes of the matter. A possible explanation for widespread lack of support for some of the Court's holdings lies in the homely reality that the legal profession would like to be in on the takeoff—perhaps via the statutory rule-making process—if they are to be of help in explaining landing which shake up the passengers.

You will recall that in *United States v. Wade*, Justice Black, speaking in dissent, said somewhat acidly:

"I have never been able to subscribe to the dogma that the Due Process Clause empowers this Court to declare any law, including a rule of evidence, unconstitutional which it believes is contrary to tradition, decency, fundamental justice, or any of the other wide-meaning words used by judges to claim power under the Due Process Clause. ... I have an abiding idea that if the Framers had wanted to let judges write the Constitution on any such day-to-day beliefs of theirs, they would have said so instead of so carefully defining their grants and prohibitions in a written constitution. With no more authority than the Due Process Clause I am wholly unwilling to tell the state or federal courts that the United States Constitution forbids them to allow courtroom identification without the prosecution's first proving that the identification does not rest in whole or in part on an illegal lineup. Should I do so,

I would feel that we are deciding what the Constitution is, not from what it says, but from what we think it would have been wise for the Framers to put in it. That to me would be 'judicial activism' at its worst. I would leave the States and Federal Government free to decide their own rules of evidence. That, I believe, is their constitutional prerogative."

Justice Black was addressing himself to the merits of what the Court was doing, whereas I am concerned with the procedure. But if his view has validity on the merits, surely it supports my thesis that the statutory rule-making process is better adapted to the Court's objective than trying to embalm a detailed rule in the Constitution under the Sixth Amendment right to counsel clause and without retroactive effect.

Some people think the word "consensus" has become a "bad" word, but I for one do not. It is only by developing a consensus that any of the great issues of the country are resolved and the matter of crime and criminal law is indeed one of the great issues. Granting for the moment the power as distinguished from the wisdom of drafting a detailed codification of rights and rules of evidence via constitutional interpretation, when these rules reach uniformly into every precinct station and sheriff's office in every town and hamlet in a nation of 200 million troubled and anxious people, I respectfully submit that the slower rule-making process would be more likely to produce a consensus and that the course of sound judicial statesmanship would have used that method. Among other things, the "sunburst" doctrine of discovery of constitutional rights which spring into being as of midnight on a stated day could have been avoided.

AN ADVANTAGE

There is, of course, another rather obvious advantage in statutory rule-making processes which is especially relevant in a period when the Federal Judiciary, and the Supreme Court particularly, is under attacks which render a great many people confused and uncertain. The advantage lies in the support which develops slowly and steadily as the rule-making process unfolds, involving as it does not only the Advisory Committee but subcommittees, seminars and task forces which include hundreds of lawyers, judges, prosecutors and scholars—the entire spectrum of the legal profession and state and local bar associations all over the country. As the process is enriched by the information and experience and ideas which these participants contribute, a massive base of support for the ultimate result builds up. This insures its acceptance and gives those who are affected a "lead" time to make adjustments in their habits and practices.

There is an even more serious flaw in constitutionalizing details of procedure and evidence better left to the more flexible machinery of statutory rulemaking. That process, while slow and cumbersome, produces more effective guidelines because rules can be stated more simply and precisely than a judicial opinion. Moreover, rulemaking leaves open the door for change and adjustment to the realities of subsequent experience, whereas altering a constitutional ruling or changing a constitutional trend calls for a sharp break with the past. The more recent the rule to be changed, the greater the blow to stability of constitutional doctrine.

Yet we must recognize that the constitutional concepts "tacked on" in these dozen years or so may not be as permanent as they appear when they are consistently arrived at by the margin of one vote with four Justices sharply suggesting that the cake which the Court was baking did not have all the essential ingredients for a good cake and that it has not been in the oven long enough. To paraphrase one of the felicitous lines of Elizabeth Barrett Browning, consequences

"so wrought may be unwrought so." Thus, the constitutional result so wrought against the protest of four, may be "unwrought" by so simple a happening as the advent of one or two new Justices. Whatever one's view of the merits of any particular ruling so cast aside, this is a highly unsatisfactory method of improving criminal justice. Even those who do not admire some of these rulings do not want to see constitutional doctrine rise and fall like governments under the Fourth Republic of France.

ANOTHER CHALLENGE TO THE COURT

Another challenge has been made of the Supreme Court's almost undignified haste to clothe detailed rules of evidence and police station procedure in the garb of constitutional doctrine. That mechanism may seem to render the rule beyond the reach of Congressional modification, but it has a melancholy tendency to deprecate the standing of constitutional doctrine even in the eyes of those who fully approve the end result reached. Constitutional doctrine in criminal justice ought to be a steady line on the graph of history, always upward, avoiding peaks and valleys. Looking back over the past dozen years one is left to wonder what has become of the Court's firm policy never to decide a case on a constitutional ground if any other plausible ground was available.

The doctrine of judicial supremacy is firmly established in this country, but we have never accepted a concept of judicial infallibility. Herein lies much that would suggest cogent reasons for a belief that several hundred well-trained and sophisticated legal minds functioning within the rule-making process free from the pressures of an appealing case might well do a more comprehensive job of drafting a workable set of rules than nine extraordinarily busy men with no more than a short time to devote to any one case, and without the fact-finding facilities and staffs of an Advisory Committee appointed by the Supreme Court.

Nowhere is this more in evidence than in the cases dealing with the elusive and difficult problems of eyewitness identifications. The role of the lawyer is ill-defined and pregnant with questions of conflict of interest. The lawyer goes to the lineup in the partisan role of an advocate but may be called upon to be a monitor and hence a potential witness, a role that will require him to abandon his advocate assignment. If he does this, will it not be said that he is somewhat a "tainted" witness because he began as a partisan advocate? One instance has already occurred in which the lawyer hastily called to the police station advised his client to lie face down and refuse to cooperate with the police. The police then had all the persons in the lineup lie in the same posture to be viewed by the witnesses, and one can see the confusion engendered by having these witnesses stepping gingerly among the prostrate bodies in the lineup. Will this become a new legal form—the lie-down lineup! If the witnesses observe all this confusion, and see which person is causing it, as they might, which side has tainted the process of identification with prejudice?

GETTING RULES IN THE STATES

It is correct that the rulemaking procedure under the Federal system provides no automatic means for making the rules applicable to the State. But that is by no means a dispositive objection. We must remember that once the soundness of the Federal Rules of Civil Procedure were seen, many States followed the leadership of the Supreme Court and adopted comparable rules of civil procedure for the States, in some cases almost a "Chinese" copy of the Federal Rules. Laying aside Justice Black's cogent arguments that procedure should be left to the States, the record shows that no real leadership has ever been exerted to persuade the States to adopt more enlightened and efficient criminal

rules comparable to the 1944 Federal Rules of Criminal Procedure.

I have already pointed out that in adopting a rule proposed by an Advisory Committee, the Supreme Court does not prejudge its constitutionality. There, of course, is always a process of interpretation, but I hardly need to offer evidence that construing and applying detailed rules, carefully worked out gives far fewer problems to trial courts, prosecutors, defense counsel and police than applying nuances of many of the new case-made rules of procedure.

The Supreme Court has tended to feel it could lay down broad objectives in these sensitive areas of interrogation and identification and leave it for others to work out the details. But these are crucial details which should have been worked out in advance as four Justices so sharply pointed out and indeed it is clear to many qualified persons that, had these problems and all their ramifications been thought through, other and different solutions might have been found acceptable to all members of the Court.

For three years, now, the American Bar Association has been engaged in what may be one of the most comprehensive and significant studies made of the administration of criminal justice in America. It is the Project on Minimum Standards of Criminal Justice, which has occupied a vast amount of the time of 80 lawyers, judges and law professors who make up the six Advisory Committees and the Special Committee which guides the whole project. Using methods somewhat like those which evolved the Federal Rules of Civil Procedure and the Federal Rules of Criminal Procedure and lately the Federal Rules of Appellate Procedure, this Committee has published nine Reports which the House of Delegates of the American Bar Association has approved. Six or seven additional Reports will issue.

Probably no one will agree with everything in all of these Reports, for they cover the entire range of administration of criminal justice from arrest to ultimate confinement, when that occurs. Whether one agrees or not with all that is said, these Reports contain a rich treasure of raw material which can help any court or legislature in making rules or codes of criminal procedure. They will be made available to you. Material such as this and the long experience under the Civil and Criminal Federal Rules give the States a vast storehouse of material which has been tested. You will not need to plow hard ground to develop a sound set of rules in Ohio but can draw on all that has gone before.

CLARIFICATION IS IMPERATIVE

The matter of clarifying the whole range of Rules of Criminal Procedure, including the new rules and procedures developed by the Supreme Court in various opinions, is imperative. It seems clear now, with the benefit of hindsight, that many of the problems sought to be solved by the controversial holdings of the Supreme Court on criminal procedure and evidence over the past dozen years, would have better been submitted to an Advisory Committee appointed by the Supreme Court (under Title 18, Section 3771). But that is in the past and it is more important to look ahead. It is ten years since the *Mallory* case, yet the guidelines of that subject are still neither clear nor comprehensive. And the courts have not begun to come to grips with all the problems which will flow from the very recent lineup and identification holdings.

As to the Federal Rules, I submit that either by creation of a new Advisory Committee or by enlarging studies now being carried on, the whole area of criminal procedure and all the problems touched upon in the holdings on interrogation, preliminary hearings, police line-ups, eyewitness identification, for example, be committed to reexamination and re-appraisal. By this process

sure we can clear the air, clarify the ground rules, and get on with Society's basic responsibility of protecting an ordered liberty as well as protecting the rights of accused persons. We must do the best we can with the cases which arise under rules already laid down. On these there can, of course, be no moratorium. We should look back only as it contributes to visibility on the problems ahead.

Now as you look ahead I am sure that under the leadership of your great Chief Justice, Kingsley Taft, you will write a bright chapter in the history of Ohio law.

THE EAST-WEST CENTER

Mr. INOUE. Mr. President, I recently joined in cosponsoring a bill introduced by Senator TYDINGS to improve and expand our family planning programs. The East-West Center of the University of Hawaii has become involved in the entire problem of population control and family planning. In 1968, a population studies program was established which has received support from the Rockefeller Foundation and from the Agency for International Development. It is laying plans for important public health and population work in close cooperation with the many nations of Asia which have already led the way in establishing nationwide programs to deal with excessively high growth rates in those areas. The program, now headed by Acting Director Sam Gilstrap, will, I hope, make an important contribution in increasing knowledge and developing even more effective ways to deal with the grave threat of the world population explosion.

I ask unanimous consent to include following my remarks in the RECORD, a progress report on the East-West Center population program.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

EAST-WEST CENTER POPULATION STUDIES PROGRAM

In July 1967 the Rockefeller Foundation awarded a \$15,000 grant to the East-West Center to muster a group of international experts in population and related fields for a conference at the East-West Center. It was the purpose of the conference to consider and make recommendations to the Center as to whether it might play a useful and constructive role in the field of population dynamics.

It was the sense of their recommendation that by reason of Hawaii's proximity to Asia and the Pacific, identifiable expertise on the University of Hawaii campus, and the unique mix of the Islands' population, a useful and significant program might be undertaken here. During ensuing months, negotiations were continued with the Rockefeller Foundation to provide seed money with which to begin the program. This Rockefeller seemed willing to do if there could be binding assurance that other money, presumptively Federal, might be obtained to continue the program in ensuing years. The Agency for International Development seemed the logical source for such financing.

Throughout the remainder of 1967, and up until June of 1968, these conversations with Rockefeller and AID were continued. On June 20, 1968, a contract was consummated between AID and the East-West Center/University of Hawaii, by the terms of which AID would finance a population studies program at the Center for a five-year period, with a basic grant in the amount of \$3,741,193. Of

this sum, \$1,000,000 was made available for immediate obligation from the 1968 fiscal year appropriation. Subsequent to July 1, an additional \$1,000,000 was obligated from the fiscal 1969 appropriation.

Our efforts to recruit a qualified director have continued, and a number of distinguished persons have been approached. Hopefully, a director can be found by the summer of 1969.

To date, staff appointments to the population program consist of Sam Gilstrap, Assistant Director for Administration (Acting Director) E. Ross Jenney, M.D., consultant for short-term, nondegree programs; Mrs. Ann Allmendinger, Assistant Selections Officer; and Mrs. Dorothy Yoshizumi, Secretary. In addition to these administrative appointments, agreement has been reached with the appropriate departments of the University for joint faculty appointments in sociology, geography, anthropology, public health, and economics. These positions will be funded on a 50/50 basis, and half time of each appointee will be devoted to research, research training, supervision of field projects, and other activity as directed by the East-West Center.

An International Advisory Committee for the program has been established, and its membership is composed as follows:

Dr. Philip Hauser, Chairman, Director, Population Research & Training Center, University of Chicago.

Richmond K. Anderson, M.D., Director, Technical Assistance Division, The Population Council, New York.

Dr. C. Chandrasekaran, Regional Advisor on Population Policies, ECAFE, United Nations, Bangkok.

Dr. L. P. Chow, Director, Taiwan Population Studies Center, Taiwan Provincial Department of Health, Taichung.

Dr. Ansley J. Coale, Director, Office of Population Research, Princeton University.

Dr. Mercedes B. Concepcion, Director, Population Institute, Manila.

Dr. Leslie Corsa, Center for Population Planning, School of Public Health, University of Michigan.

Dr. Kartono Gunawan, Demographic Institute, University of Indonesia, Djakarta.

Dr. Toshio Kuroda, Chief, Division of Migration Research, Institute of Population Research, Ministry of Health & Welfare, Tokyo.

John Z. Maler, M.D., Rockefeller Foundation, New York.

Dr. Norma McArthur, Department of Demography, the Research School of Social Sciences, Australian National University, Canberra.

Dr. Visid Prachuabmoh, Director, Population Research & Training Center, Chulalongkorn University, Bangkok.

Dr. Chang Shub Roh, Institute of Population Problems, Seoul, Korea.

Dr. Y. P. Seng, Economic Research Center, University of Singapore.

Dr. Saw Swee-Hock, Faculty of Economics and Administration, University of Malaya, Kuala Lumpur.

Dr. Douglas S. Yamamura, Chairman, Department of Sociology, University of Hawaii.

The first and organization meeting of the group was held at the East-West Center December 16 and 17, 1968. All those listed above were in attendance except Dr. Ansley Coale, Dr. Leslie Corsa, Dr. John Maler, Dr. Y. P. Seng, and Dr. R. K. Anderson. Dr. Anderson was represented by Frank Shubeck, M.D., Regional Director, Far East, the Population Council.

To maintain effective relationships for the program between the University of Hawaii and the East-West Center, an Executive Council has been established. It consists of the Chancellor, the President of the University, the Deputy Chancellor for Academic Affairs, and the Dean for Academic Development. The Council meets periodically.

To plan, develop, and maintain an instructional program of population studies, an Academic Committee (Population Studies Committee of the College of Arts and Sciences) has been established and has been meeting weekly.

PROGRAMS

(1) With the beginning of the second semester at the University of Hawaii, eight graduate students, seven of them being from Asia, will be enrolled in M.A. programs, principally in sociology and economics. Each of these graduate students will take special course work which will lead to a certificate attesting to some degree of expertise in the population field as a result of specially designed courses.

(2) Agreement has been reached in principle to sponsor a seminar in Kuala Lumpur, Malaysia, with the cooperation of the Press Foundation of Asia. It would be our purpose to fully indoctrinate representative journalists, broadcasters, and telecasters concerning the population problems of Asia, how to communicate with their respective constituencies, and how generally to enhance acceptability of family planning programs.

(3) Agreement has been reached in principle to sponsor at the East-West Center this spring a conference of the Organization of Demographic Associates. This will result in the establishment of a series of working groups to examine several facets of the population problems of Asia and the Pacific, such as fertility control, migration, etc.

(4) Agreement has been reached in principle to support a training program under the sponsorship of the South Pacific Commission at Noumea, New Caledonia—a training course in census methods at a time during the current calendar year which is yet to be determined.

(5) Agreement has been reached in principle to sponsor a Summer Institute on Buddhism, Population, and Family Life at the East-West Center during August 1969.

(6) The Academic Committee has designed a concentration of studies in population as a part of M.A. and Ph.D. programs in several disciplines, and has advanced these curriculum changes through the University curriculum decision-making machinery. The first course will be offered beginning in February 1969.

(7) The Program has formally proposed to the Academic Committee that field education or project activities be considered as part of the degree program in various departments. The proposal is under study at the departmental level.

(8) The Program has developed plans with ISI and IAP for housing and research space for the team in population.

CONCLUSION

In brief, this reflects actions taken and momentum achieved during the six months period since the signing of the contract with AID.

SAM P. GILSTRAP,
Acting Director, Population Studies Program.

THE CONSUMER PROTECTION AND ENVIRONMENTAL HEALTH SERVICE

Mr. HUGHES. Mr. President, on May 1, Charles C. Johnson, Jr., administrator of the Consumer Protection and Environmental Health Service of the Department of Health, Education, and Welfare addressed the Iowa Public Health Association which was meeting in Des Moines.

His remarks would have been of interest to me, because he is a native Iowan, having grown up in Des Moines, and because he made a number of com-

ments regarding environmental conditions in my State. However, having read Mr. Johnson's remarks, I felt that my colleagues in the Senate would also be interested in his basic assertion: that by applying nationally what is already known about controlling hazards in our environment, much loss of life and health could be effectively prevented.

Mr. President, I ask unanimous consent that Mr. Johnson's address be printed in the RECORD so that other Senators may share his informative presentation.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY CHARLES C. JOHNSON, JR., ADMINISTRATOR, CONSUMER PROTECTION AND ENVIRONMENTAL HEALTH SERVICE, PUBLIC HEALTH SERVICE, U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, WASHINGTON, D.C.

I am very happy to be home again. Many of my friends and co-workers in the East envy you people who live in a State like Iowa. They think of the midwest as a land of green fields, bright sun, and clear skies, a refuge from smoke, noise, and congestion, a healthy place to live. They feel that this part of the country is not yet threatened by the host of contemporary problems which contribute so significantly to the steady deterioration of their environment.

While you and I know that Iowa is still a fine place in which to live, I am sure we also know that this view of the midwest is somewhat stereotyped and idealized. The inexorable forces of technology and urbanization are reshaping the environment in all parts of the Nation and Iowa is not immune. Today the problem of how to halt the deterioration of our environment is one of the most important issues our generation has to face. It is also among the most urgent, for the decisions we make in our time will determine the kind of world in which our children, and our children's children will live.

For you here, it may be unnecessary to state that all concern with the environment is essentially a concern for man—for his total health, happiness, and well-being. And yet it seems to me it is worth stating, and restating, whenever we are faced with decisions affecting the environment. For the environmental problems that plague us today are largely the result of our narrow pursuit of limited objectives—economic efficiency, fast transportation, agricultural abundance, for example—and our tendency to endow these activities with a life and purpose of their own, separate from or even superior to the needs of the human beings they were designed to serve.

The time has come when we must recognize that the various systems and subsystems which we devise to maintain ourselves on the planet—systems of economics, transportation, education, agriculture, etc.—that all these should contribute to the total well-being of man the citizen and consumer.

The organization which I have the privilege, and the problem, of heading, the Consumer Protection and Environmental Health Service, has been established to provide a new impetus to our National effort to save the environment, and to provide a focus on man as part of that environment.

It includes the Food and Drug Administration, headed by Dr. Herbert L. Ley, Jr.; the National Air Pollution Control Administration, headed by Dr. John T. Middleton; and the Environmental Control Administration, headed by Assistant Surgeon General Chris A. Hansen. For the first time in the Department of Health, Education, and Welfare, we have brought all these organizations, dealing with protecting human beings from environmental hazards, together in a

situation where they can be mutually supportive. We are finding that we are now able to take a more coordinated approach to environmental problems, and we are moving ahead as rapidly as possible to create a program which will have a real and lasting impact on these problems.

The primary reason for our efforts is of course the effects of the environment on man's health. We cannot measure suffering, but monetarily the cost to the Nation for the treatment of illness now stands at about \$53 billion per year and has been rising by more than 8 percent annually since 1950. The average worker currently loses 7 work days yearly because of illness. Many thousands of productive people die prematurely or become disabled every year because of accidents, heart disease, cancer, emphysema and other major causes of death.

The need for treatment facilities, hospitals, clinics, nursing homes, far exceeds what is available or what can be supplied within the foreseeable future. The need for physicians, nurses, and other health workers is acute and will continue to grow greater.

Much of this expenditure and much of this sickness and loss of life is preventable. The contributory relationships to specific diseases by such environmental hazards as air pollution, occupational hazards, overcrowded housing, and poor sanitation have been identified. The current health costs of air pollution alone are estimated conservatively at \$4 billion per year. Absence from work because of illness and injury costs the Nation \$60 billion annually. Non-occupationally related accidents cause 104,000 deaths and 42.5 million injuries each year.

The major diseases closely related to environmental hazards include the chronic respiratory diseases, (especially emphysema and bronchitis), heart disease, mental illness, and cancer. Chronic respiratory disease, which in large measure can be associated with occupational conditions and air pollution, is the Nation's second leading cause of disability.

Social Security disability payments to victims of this disease and their families total \$90 million annually. Emphysema, the major chronic respiratory disease, causes nearly 50,000 deaths per year.

Heart disease, attributable at least in part to the stresses of the modern environment, causes about 700,000 deaths annually. It is the leading cause of Social Security compensated disability, and costs the Nation more than \$25 billion each year.

The mentally ill, many of them victims of an assortment of environmental stress, occupy more than half of the Nation's hospital beds. Occupational exposures to hazardous substances are believed to be related to a significant, though not yet precisely determined, number of the 320,000 cancer deaths which occur each year in this country.

By applying nationally what is already known about controlling environmental hazards, much of the health damage I have cited need not occur. I believe you will agree that it would be a far wiser investment in terms of simple economics alone to keep people well rather than treat them and support them after they have become ill. Moreover, all Americans share the burden of environmental deterioration, including those who live in sections of the country where the problems are not yet so acutely evident as in others. Through Medicare, Medicaid, and national programs of medical research, hospital construction, and training, every citizen is paying the price for the damage to health associated with environmental hazards, wherever they occur.

I will turn now to some of the specific environmental problems of our time which I believe have a bearing on human health in Iowa. Let me begin with food, since as the major business of this State, it is a subject of special interest. Maintaining un-

contaminated food is a continuing—and indeed a growing problem. It is estimated that over two million Americans are stricken with illness each year from microbiological contamination of food—chiefly salmonellosis.

What is more, the use of food additives to impart flavor, color or other qualities has increased 50 percent in the past ten years, and each of us now consumes an average of three pounds of these chemicals yearly. Pesticides leave residues on food crops, and traces of veterinary drugs occur in meat, milk, and eggs—all this in addition to the chemical barrage that reaches us from other parts of the environment.

I understand that the Food Act in Iowa is patterned after the original Pure Food Act of 1906 but that it has never been updated to include the major legislative changes in this field which began in 1938. I understand it also does not include the more modern provisions requiring the preclearance for safety of food additives, pesticide chemicals and color additives. Surely, this is a matter of State as well as of Federal concern.

The value, and the hazards, connected with pesticide use, I am sure are thoroughly appreciated here in Iowa, where food production is such an important part of the economy. Federal regulatory authority in this area covers only interstate shipments, as you know, and here again we are faced with the fact that much of the food produced on farms never crosses State lines. Effective State surveillance is a practical necessity, and yet the truth is that most States are not doing enough to protect their consumers against ingesting toxic pesticide residues on food.

The tremendous benefits that have been derived throughout the world from the use of pesticides since World War II are well-known. Their use has augmented spectacularly the growth of food crops and has, in addition, played a major role in public health efforts to control disease-bearing insects. Less well-known are the adverse side effects of the use of pesticides, a subject which increasingly has received scientific attention in the past decade. This latter concern has fallen most heavily on chlorinated hydrocarbons, a major category of pesticide chemicals which tend to persist in the environment for many years. The chlorinated hydrocarbon which has received, by far, more attention than any other, is DDT, which has been used throughout the world in great quantities since the early 1940's. DDT is found in the air, water, soil, flora, and fauna throughout the world today.

Less than two weeks ago, Secretary of Health, Education, and Welfare, Finch announced the appointment of a Secretary's Commission on Pesticides and their Relationship to Environmental Health to explore the field of environmental pollution and its consequent risks to the health of our citizens. The Commission is to report back with specific suggestions for action in six months.

At the moment, the Food and Drug Administration's surveillance of pesticides includes collecting data on pesticide residues in the average diet. Within Iowa, the FDA collects its total diet pesticide samples from the Iowa City area. The results are supplied to the University of Iowa for use in their studies as well as to Washington. But an adequate State pesticide program requires laboratories, crop analysis and inspection, control or permit systems to deal with major spraying and dusting operations, and an informational and educational program to increase voluntary compliance. There is no question that there is much to be done both here in Iowa and in other parts of the Nation, before we will have adequate control over this problem.

Let's move to another problem, solid waste disposal, which in Iowa is closely related to the food industry. The wastes from feed lots and packing houses pose a difficult problem, and when they are discharged into

waterways, which are also employed as sources of drinking water, the problem has been shifted, not solved. Nationally, the solid waste disposal problem consists of 1.5 billion tons of animal wastes, 550 million tons of agricultural waste and crop residues, over 1.1 billion tons of mineral wastes, 110 million tons of industrial wastes, and 250 million tons of household commercial and municipal wastes—a total of 3.5 billion tons of wastes per year which must be disposed of in a manner that is not injurious to health. This environmental problem may well prove to be the most difficult and serious of all.

Every year, we discard more than 190 million tons of garbage, trash, bottles, cans, and other refuse. Nonreturnable bottles, aluminum cans, and new types of disposable paper products complicate the problem.

Nationwide, collection and disposal of garbage and other solid waste cost an estimated \$3.5 billion in 1967, and yet the methods used are little improved over those of 25 years ago. A colleague of mine in New York liked to point out that the only real improvement we had made in waste disposal in the last 50 years was putting an engine instead of the horse in front of the garbage truck.

In the inner city, accumulated garbage and trash create breeding grounds for rats, insects, and vermin and constitute a major health problem. Before we can do anything effective in the deteriorating areas of our cities, we have to attack the problem of solid waste disposal through better storage and collection methods and, in fact, through education of the people. Our Environmental Control Administration is assisting in 15 rat control demonstration programs that will employ this comprehensive approach.

Yesterday's city dump is now in today's suburb, so that most cities in the country are now destroying out-of-the-way areas of natural beauty, and polluting land, air, and water, in an effort to get rid of mountains of refuse. Our Federal program is funding research and demonstration projects designed to develop alternative methods of dealing with the problem, including composting and recycling.

Under properly controlled conditions, use of solid waste as landfill material can restore certain areas to useful purposes. The problem of sanitary landfill as a disposal method, of course, is that many cities no longer have accessible areas where this is appropriate.

There is no question that existing systems for getting rid of trash are largely obsolete and inadequate. I understand that Iowa does not plan to apply for a solid waste planning grant from the Federal Government this year. I hope you find it possible to do so in the near future, for solid waste management on a Statewide and regional basis is an important need throughout the country.

The water pollution problem which I mentioned briefly in connection with poor solid waste disposal practices, brings us to another environmental concern which is growing in seriousness with each year that passes. I refer to the quality of drinking water. Most of the community water supply systems in this country were initially constructed over 30 years ago and were designed to serve population densities that were 20 to 40 percent less than today's. Despite efforts to modernize and increase capacities, many systems have fallen behind and are failing, in many respects, to meet today's needs.

These systems were designed to treat a high quality of raw water for removal of bacteria, with little or no capability for removing toxic chemical or virus contaminants. Today, both ground and surface water supplies have deteriorated. At the same time, the efficiency

of treatment plants has deteriorated, and, what is more, so have surveillance and health controls over public drinking water supplies. Almost all of the States have become complacent about the safety of drinking water. We can no longer afford such complacency.

Recently, I received a newspaper article from the Des Moines Register complaining about this very problem. The article begins, "A number of persons have written in requesting the recipe for Des Moines water. As well they might, for over the past several weeks Des Moines water has become a unique taste treat. Admittedly, the water is a little past its prime now, but at the height of the warm weather runoff, a week or so ago, a touch of the tap would bring forth a sudsy, steaming foul-smelling, evil tasting concoction that was the envy of foul water fans throughout the Free World." The article goes on in a somewhat humorous vein about this rather serious subject. All over the country, I believe we are rapidly approaching a crisis stage with regard to drinking water. The time has come when communities are going to have to allocate substantial resources to modernizing their treatment plants and to improve their distribution systems or continue to court serious health hazards from contamination.

The next environmental problem I would like to discuss has long been associated with agricultural work in this State and is now growing in importance with Iowa's expanding industrial economy. This is occupational safety and health—the oldest and yet one of the most neglected of the whole spectrum of environmental problems. Every year, hundreds of new chemicals and chemical compounds are introduced into industry and agriculture, along with countless operational innovations. Thousands of workers suffer from cancer, lung disease, hearing loss, dermatitis, or other preventable diseases because industry, unions, and government at all levels have failed to give adequate attention to occupational hazards. We are finding every year new and subtle threats to workers' health, growing out of our new technology, and yet we have made too little progress in the last 50 years against some of the oldest occupational diseases of man.

Last December, in an effort to initiate some sort of sensible attack on the age-old plague of coal miners—"black lung," as it is called, or coal worker's pneumoconiosis—I issued a recommended standard for dust in soft coal mines. This calls for respirable dust levels not exceeding 3.0 milligrams per cubic meter. Legislation now before the Congress would establish this standard as a goal.

Black lung is only one of several serious occupational diseases which we, as a Nation, have neglected far too long. We intend to give more attention to occupational health problems at the Federal level, and I urge that you do so at the State level, as a means of protecting the health and strengthening the economy of this State.

Still another by-product problem of industrialization and urbanization which this State shares with many others is air pollution. Iowa's State Air Pollution Control Law, enacted two years ago, is, I understand, a good one. But there is still a need for technical staffing and funding, and no application for Federal grant support for air pollution control has been received from Iowa by my agency. On the local level, I am told that the Linn County Health Department has a good air pollution control program underway with adequate laws and good industry cooperation, and that the Des Moines-Polk County Health Department is in the process of developing a program.

At the present time, toxic matter is being released into the air over the United States at a rate of more than 142 million tons a year, or three-quarters of a ton for every

American. And what does this do to people? In the first place, there is no doubt that polluted air is a major contributor to emphysema, chronic bronchitis, and lung cancer—some of the major "diseases of civilization," which are on the increase.

Furthermore, since we are interested in the "whole man" let's see what it costs us in economic terms. The annual cost to U.S. citizens of air pollution has to be computed in billions of dollars. In figures that are more easily understandable, it is estimated to cost each of the 200 million American citizens \$65 per year; for those who live in highly polluted areas, the cost per person, including higher medical bills, household maintenance, and other expenses, can be more than \$200 per year. The cost throughout the United States in damage to agricultural crops alone is more than \$500 million every year. In one of our Eastern States, air pollution is considered by many to be a greater menace to farmers than bad weather, pests, or insects.

Another growing problem is radiation. Radiation is an environmental hazard to ours and future generations which we have barely begun to understand. Radiation sources are now to be found throughout the environment. They range from the large-scale applications of nuclear energy, particularly in electric power generation, through laser and microwave technology in industry, to the use of radionuclides and X-rays in the healing arts and the use of microwave ovens and other electronic equipment in the home. And our scientific protection against radiation is at only a beginning stage of development.

I am pleased that the radiation problem has been brought to the attention of the State legislature in Iowa and that the proposed legislation includes attention to non-ionizing radiation, the sources of which are rapidly proliferating throughout the country. Every State should have a program of surveillance and control to deal with this hazard.

While the many problems of environment must be broken into manageable pieces for effective control action, it is equally necessary to consider them as a whole and to take cognizance of their interrelatedness. Otherwise we run the risk of substituting one problem for another. We in the Consumer Protection and Environmental Health Service are prepared to assist the States in every way possible in planning, coordinating and implementing their environmental programs. One mechanism which many States are overlooking as a means of developing their environmental programs is the assistance available under the Partnership for Health—the Comprehensive Health Planning program authorized under Public Law 89-749 in 1966, and expanded by amendment the following year. The intent of this legislation is to assist States and communities to achieve the "highest level of health attainable for every person, in an environment which contributes positively to healthful individual and family living," and it offers financial assistance to accomplish this.

I certainly would recommend that each of you make sure that problems of environmental control are given consideration in the preparation of your State health plan. The preponderance of activities by the health and related professions are, unfortunately, still being carried out in such a way as to suggest that man as an organism is not dynamically related to his environment. Almost total emphasis has been placed on providing health care for people who are already sick. Even those members of the health professions who are concerned with preventive medicine have not yet begun to focus on the importance of a wholesome environment in preventing illness. We cannot continue to

ignore the fact that environmental deterioration—particularly the morass of environmental problems which afflict our inner cities and suburban areas—are health problems. No health plan can be regarded as comprehensive unless it gives consideration to environmental improvement as a most important step in preventing disease.

Your organization and your counterparts in the other 49 States must help forge a program of environmental improvement whose impact will be felt in every facet of our national life. An important challenge confronts all of us. We must halt the deterioration of the environment . . . we must make life worth living in the ghetto and in the suburbs, in the town house and in the cottage, in the city and in the country . . . we must prove that ugliness, danger, and misery do not have to be a part of the birthright of any American, wherever he may live in this land.

OPERATION BETTER BLOCK

Mr. JAVITS. Mr. President, "Operation Better Block," a citywide community participation campaign, is helping a number of New York City neighborhoods to help themselves.

The program is sponsored and financed by the mayor's urban action task force and by Bristol-Myers Co., one of our active corporate citizens. The project was so successful last summer in assisting people to improve their surroundings that it will be continued on a full year's basis.

"Operation Better Block" is aimed at increasing opportunities for people to participate, to determine their needs, and to share in decisions that govern their lives and their neighborhoods. It is a most commendable effort.

I ask unanimous consent that an article published in the New York Times of March 30, 1969, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TIPS GIVEN TO ADD "BETTER BLOCKS"—RECRUITS TO THE PROJECT ARE TOLD HOW TO DO IT

Information on how residents can improve their own block by exerting pressure on the departments, landlords and neighbors was exchanged yesterday at a briefing session of "Operation Better Block" at the St. George Hotel in Brooklyn.

Young and old, black, white and Puerto Rican, men and women, middle-class and not so prosperous, all veterans of The Better Block project, discussed their method and achievements for the benefit of a new group of block leaders about to embark on new projects.

The wife of a Negro minister on Staten Island and a Puerto Rican widow who earns her living as translator were the principal speakers. They described how they organized projects that won two of six awards presented at the conclusion of the experimental phase of the project.

NEIGHBORHOOD LEADERS

One hundred neighborhood leaders from Brooklyn and Staten Island attended yesterday's meeting, the first in a series to begin the next phase of the city-wide project sponsored by the city and Bristol-Myers Company through the Mayor's Urban Action Task Force.

"Seed money" of \$400 is provided to help a block association carry out a community-improvement proposal, and \$36,000 in prizes

will be awarded to the most outstanding ones completed.

Mrs. Martha Lewis Crawford, director of the project said that 100 blocks participated in the experimental project, for which Bristol-Myers gave \$40,000 and that they would take part in the new program financed by \$128,000 from Bristol-Myers and \$50,000 from the city.

Mrs. Irene Skinner of West Brighton, the minister's wife, speaking at yesterday's meeting told how she had organized the neighborhood into cleaning up "with our own hands a ten-and-a-half acre lot that had been a dumping ground for abandoned cars, old mattresses, garbage and other debris."

Under her leadership, the West Brighton Neighborhood Improvement Association then proceeded to get the owner of the land to deed it to the city, and persuaded the city to build a swimming pool and park on it.

"We have also created a stable community relationship between adults and teenagers," Mrs. Skinner said.

BLOCK PARTY ARRANGED

Mrs. Noreida Pastor, speaking in English with a Spanish accent, told how she aroused the interest of apathetic adults in her neighborhood by putting on a block party for their children.

"When they looked out and saw me all by myself, they saw we needed help with all those kids," Mrs. Pastor said. "Within two hours they started bringing food and things and asked me questions about what I was doing."

Mrs. Pastor is chairman of the Schaefer and Eldert Street Block Association in Brooklyn. One of the blocks had been so full of narcotics addicts, prostitutes, gamblers, street fighting and other criminal activity that it was called "Little Korea," Mrs. Pastor said.

She cleaned up the street not only by putting her grateful teen-agers to work with brooms, but by tracking down the owner of three tenements in which most of the criminals lived, and persuading her to evict them, Mrs. Pastor reported.

PROGRESS IN NATION'S CAPITAL DEVELOPMENT BEING MADE AS CENTER LEG FREEWAY AND BUILDING CONSTRUCTION MOVES FORWARD

Mr. RANDOLPH. Mr. President, Senators are aware of the freeway construction going forward at the base of Capitol Hill. The first section of tunnel is located immediately in front of the Capitol, which I inspected yesterday in company with Members of Congress and District officials.

The Center Leg Freeway when completed will extend from the Southwest and Southeast Freeways to New York Avenue. The total cost for this element of the District freeway system is \$90 million. It is designed to carry approximately 140,000 vehicles per day. At the opening of the project, sometime during midsummer of 1971, approximately 20,000 to 30,000 vehicles per day will use this facility. The design loads will develop after both the subway and freeway systems are completed and in use, and after the metropolitan area population increases from its present 2.5 million to an estimated 6.8 to 9 million by the year 2000. This traffic will come from that which is being carried on the north-south street system in this part of the city. Those streets can then revert to the use for which they were intended.

The center leg has some novel and interesting features which adapt it to the needs of urban living. First, it is below ground level, either open cut or tunnel. This means that the roadway will have no adverse effect on the esthetics of the area or the development of the neighborhood. As a matter of fact, the design of the project will stimulate proper growth and development. The airspace above part of the freeway will be used for a Federal building being constructed at Constitution Avenue.

The Federal Highway Administration, General Services Administration, and the District of Columbia Department of Highways and Traffic officials consider that the Labor Building will be one of the world's outstanding examples of the joint-use air-rights concept.

Over the tunnel and centered in front of the Grant Memorial a 4-acre reflecting pool is being built in accordance with the plan developed by the Pennsylvania Avenue Commission.

All major contracts for this freeway have been awarded and work was commenced in 1966. Unfortunately the freeze on Federal-aid highway funds in 1967 and 1968 have delayed scheduled completion by 1 year and the facility will not be ready for traffic until July 1, 1971.

On that part of the project north of Massachusetts Avenue, between H and K Streets, Northeast, the District Department of Highways and Traffic, the District of Columbia Redevelopment Land Agency, and the Federal Highway Administration in cooperation with local residents represented by the Washington Urban League, have planned a third air-rights structure which will provide housing for more than 300 families. The design contract for this project has just been consummated by the District of Columbia Redevelopment Land Agency and construction on this portion of the center leg is expected to commence within the next year.

The total displacement for the entire center leg project was 209 families and 292 individuals. As I have indicated, this project will provide over 300 family replacement units of superior quality housing. It is obvious that, through this kind of effort, the freeway program can replace all of the housing originally eliminated by the project.

The visible portions of the entire Center Leg Freeway projects will be attractively landscaped. Its construction has already sparked a renaissance in both private and governmental building for the area north of Constitution Avenue. I am pleased that the planning, design, and construction has been of the highest caliber, and I urge the agencies responsible for building these important facilities to move vigorously so that the housing and highways can be placed in use as soon as possible.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDING OFFICER laid before the Senate sundry messages from the President of the United States sub-

mitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDING OFFICER laid before the Senate the following letters, which were referred as indicated:

REPORT ON EXTRAORDINARY CONTRACTUAL ACTIONS TO FACILITATE THE NATIONAL DEFENSE

A letter from the Assistant Secretary of Defense (Installations and Logistics), transmitting, pursuant to Law, the calendar year 1968 report on extraordinary contractual actions to facilitate the national defense (with an accompanying report); to the Committee on Armed Services.

PROPOSED LEGISLATION TO AUTHORIZE THE EXTENSION OF CERTAIN NAVAL VESSEL LOANS NOW IN EXISTENCE AND NEW LOANS OF NAVAL VESSELS TO FRIENDLY FOREIGN COUNTRIES

A letter from the Under Secretary of the Navy, transmitting a draft of proposed legislation to authorize the extension of certain naval vessel loans now in existence and new loans of naval vessels to friendly foreign countries (with accompanying papers); to the Committee on Armed Services.

PROPOSED LEGISLATION TO AUTHORIZE THE AD- MINISTRATOR OF VETERANS' AFFAIRS TO SELL DIRECT LOANS MADE TO VETERANS UNDER CHAPTER 37, TITLE 38, UNITED STATES CODE

A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to authorize the Administrator of Veterans' Affairs to sell at prices which he determines to be reasonable under prevailing mortgage market conditions direct loans made to veterans under chapter 37, title 38, United States Code (with accompanying papers); to the Committee on Banking and Currency.

REPORT ON U.S. COAST GUARD CONTRACTS PUR- SUANT TO SECTION 2304(a), CLAUSE 11, TITLE 10, UNITED STATES CODE

A letter from the Assistant Secretary for Administration, Office of the Secretary of Transportation, transmitting, pursuant to law, a report of a list of the purchases and contracts made by the U.S. Coast Guard under clause 11 of section 2304(a) of title 10 since October 30, 1968 (with accompanying report); to the Committee on Commerce.

PROPOSED LEGISLATION TO AUTHORIZE APPROPRIATIONS FOR THE EXPENSES OF THE U.S. SECTION OF THE UNITED STATES-MEXICO COMMISSION FOR BORDER DEVELOPMENT AND FRIENDSHIP

A letter from the Assistant Secretary for Congressional Relations, Department of State, transmitting a draft of proposed legislation to authorize appropriations for the expenses of the U.S. section of the United States-Mexico Commission for Border Development and Friendship (with accompanying papers); to the Committee on Foreign Relations.

PROPOSED LEGISLATION TO IMPROVE AND EX- TEND THE PROVISIONS RELATING TO MEDICAL LIBRARIES AND RELATED INSTRUMENTALITIES

A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to amend the Public Health Service Act to improve and extend the provisions relating to medical libraries and related instrumentalities, and for other purposes (with accompanying papers); to the Committee on Labor and Public Welfare.

REPORT OF THE U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

A letter from the Secretary of Health, Education, and Welfare, transmitting the annual report of the U.S. Department of Health, Education, and Welfare for the fiscal year 1968 (with an accompanying report); to the Committee on Labor and Public Welfare.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. INOUE (for Mr. MAGNUSON), from the Committee on Commerce:

Charles H. Meacham, of Alaska, to be Commissioner of Fish and Wildlife, Department of the Interior.

By Mr. RANDOLPH, from the Committee on Public Works:

Aubrey J. Wagner, of Tennessee, to be a member of the Board of Directors of the Tennessee Valley Authority.

By Mr. PASTORE, from the Joint Committee on Atomic Energy:

Theos J. Thompson, of Massachusetts, to be a member of the Atomic Energy Commission.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

A House concurrent resolution adopted by the Legislature of the State of Hawaii; to the Committee on Agriculture and Forestry:

"HOUSE CONCURRENT RESOLUTION 60

"Whereas, the U.S. Department of Agriculture administers the Food Stamp Program to increase the use of American-produced agricultural products and to improve the nutrition of low income persons; and

"Whereas, the Department of Health, Education, and Welfare disburses Federal funds to the needy in the form of public assistance to purchase food in a similar program; and

"Whereas, the Hawaii State Department of Social Services has been administering the Food Stamp Program in Hawaii for the past two years; and

"Whereas, the U.S. Department of Agriculture currently disburses Federal funds through the program to needy persons in the form of bonus food coupons; and

"Whereas, the present procedure requires individual clients to purchase their allotted amounts of coupons through authorized banks and such coupons are used to purchase food products at authorized grocers; and

"Whereas, such procedures are formidable barriers to the purchase and use of food stamps for the poor who are humiliated by such a process; and

"Whereas, the purpose of our honorable nation's commitment to improve the nutrition of low income individuals and families can be more efficiently achieved by giving such individuals the bonus in the form of cash redeemable for USDA defined food products, as is presently done in the programs administered by the Department of Health, Education, and Welfare, thus reducing administrative costs by abolishing the need for working through authorized banks to distribute the bonus; and

"Whereas, while less than fifty percent of the eligible welfare recipient population is currently participating in the program, this proposed method of distribution would enable all eligible low income persons to receive bonus food coupons; now, therefore,

"Be it resolved by the House of Repre-

sentatives of the Fifth Legislature of the State of Hawaii, Regular Session of 1969, the Senate concurring, that it recommend that the President of the United States establish a mechanism for the transfer of the surplus agricultural program funds to the Department of Health, Education, and Welfare who will in turn get them to the poor in each of the states; and

"Be it further resolved that certified copies of this Concurrent Resolution be transmitted to President Richard M. Nixon, Vice-President Spiro T. Agnew, President of the U.S. Senate, Speaker John W. McCormack of the U.S. House of Representatives, and to all members of Hawaii's delegation to the United States Congress.

"TADAO BEPPU,

"Speaker, House of Representatives.

"SHIGETO KANEMOTO,

"Clerk, House of Representatives.

"DAVID C. MCCLUNG,

"President of the Senate.

"SEICHI HIRAI,

"Clerk of the Senate."

A House concurrent resolution adopted by the Legislature of the State of Hawaii; to the Committee on Labor and Public Welfare:

"HOUSE CONCURRENT RESOLUTION 42

"Whereas, the State of Hawaii does not presently have a veterans' home; and

"Whereas, Hawaii has contributed a high percentage of her young men to the service of the United States, with a concomitant high percentage of casualties; and

"Whereas, this is a fitting time for the establishment of a veterans' home in the State of Hawaii; now, therefore,

"Be it resolved by the House of Representatives of the Fifth Legislature of the State of Hawaii, Regular Session of 1969, the Senate concurring, that the President of the United States be, and he hereby is, requested to consider establishing a veterans' home in the State of Hawaii; and

"Be it further resolved that certified copies of this Concurrent Resolution be transmitted to President Richard M. Nixon, Vice-President Spiro T. Agnew, President of the U.S. Senate, Speaker John W. McCormack of the U.S. House of Representatives, and to all members of Hawaii's delegation to the United States Congress.

"TADAO BEPPU,

"Speaker, House of Representatives.

"SHIGETO KANEMOTO,

"Clerk, House of Representatives.

"DAVID C. MCCLUNG,

"President of the Senate.

"SEICHI HIRAI,

"Clerk of the Senate."

A House joint memorial of the Legislature of the State of Colorado; to the Committee on Appropriations:

"HOUSE JOINT MEMORIAL 1002

"Memorializing the Congress of the United States to take the necessary action to restore funds to become available for the Frying Pan-Arkansas reclamation project

"Whereas, A proposed reduction in reclamation construction funds will deprive the Frying Pan-Arkansas Reclamation Project in this state of approximately seven million dollars in funds available for construction purposes in 1969; and

"Whereas, Such reduction will delay the letting of contracts on the Pueblo Dam, which is the core of the entire project, and will in consequence have a seriously adverse effect upon the economy of Colorado and particularly with respect to the cities of Pueblo, Leadville, and Lamar; now, therefore,

"Be It Resolved by the House of Representatives of the Forty-seventh General Assembly of the State of Colorado, the Senate concurring herein:

"That the Congress of the United States is hereby requested to take all action necessary to expedite the construction of the Frying Pan-Arkansas Reclamation Project through the restoration of the amount of seven million dollars in the appropriations for this important project and thereby avoid the consequent adverse effects on the economy of Colorado and many of its cities.

"Be It Further Resolved, That the copies of this Memorial be transmitted to the President of the Senate of the United States Congress, the Speaker of the House of Representatives of the United States Congress, and to the members of the United States Congress from the State of Colorado.

"JOHN D. VANDERHOOF,

"Speaker of the House of Representatives.

"HENRY C. KIMBROUGH,

"Chief Clerk of the House of Representatives.

"MARK A. HOGAN,

"President of the Senate.

"COMFORT W. SHAW,

"Secretary of the Senate."

A resolution adopted by the Senate of the Legislature of the State of Pennsylvania; to the Committee on Post Office and Civil Service:

"RESOLUTION BY THE SENATE OF PENNSYLVANIA

"Dwight David Eisenhower, thirty-fourth President, was the embodiment of patriotism both as a military man and as a statesman. His ethical code of behavior and fear of God was expressed in his every action.

"The Commonwealth of Pennsylvania was honored for many years by the presence of the Eisenhower family while living near Gettysburg; therefore be it

"Resolved, That this Senate of the Commonwealth of Pennsylvania memorialize the Congress of the United States to adopt the proposed commemorative stamp honoring Dwight D. Eisenhower, depicting the Civil War monument and United States flag in Center Square, Easton, Pennsylvania; and be it further

"Resolved, That a copy of this resolution be transmitted to the presiding officer of each House of Congress of the United States, and to each Senator and Representative from Pennsylvania serving in the Congress of the United States.

"MARK GRUELL, JR.,
Secretary of the Senate."

A Senate memorial adopted by the Legislature of the State of Florida; to the Committee on Agriculture and Forestry:

"SENATE MEMORIAL 249

"A memorial to the Congress of the United States urging the enactment of a law to protect rare and endangered species

"Whereas, Congressman Richard D. McCarthy, New York, has introduced House Resolution 6634 to provide protection for rare and endangered wild species; and

"Whereas, the second session of the 90th Congress of the United States previously expressed considerable interest and support to the proposition that rare and endangered wild species be given adequate protection from possible extinction; and

"Whereas, the American alligator is recognized as playing an important role in the management of fresh water resources in the state of Florida and is indirectly responsible for the preservation of other desirable and endangered species, particularly in Everglades National Park; and

"Whereas, as a result of man's actions over the past years, the alligator population has been reduced considerably, and continues to be reduced at an alarming rate; and

"Whereas, poachers who illegally hunt, kill, and sell the skins of the alligators contribute

considerably to the reduction of the alligator population; and

"Whereas, illegally gained skins and products are routed through interstate commerce; and

"Whereas, similar problems are world wide due to the importation of illegally captured products of many other endangered species into this and other countries; and

"Whereas, the legislature of the state of Florida has a deep and abiding interest in protecting and preserving wildlife from extinction, Now, Therefore,

"Be It Resolved by the Legislature of the State of Florida: That we do hereby petition the members of the Congress of the United States to adopt House Resolution 6634 introduced by Congressman Richard D. McCarthy, New York, in the 91st Congress to provide protection for rare and endangered species, at the earliest possible date, and do seriously urge that protection of the American alligator be included within the scope of such legislation.

"Be It Further Resolved, That copies of this memorial be dispatched to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress.

"Approved by the Governor May 13, 1969.
Filed in Office Secretary of State May 13, 1969."

A House joint memorial adopted by the Legislature of the State of Washington; to the Committee on Finance:

"HOUSE JOINT MEMORIAL No. 16

"To the President of the Senate and Speaker of the House of Representatives, and to the Senate and House of Representatives in the United States of America, in Congress assembled:

"We, your Memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas, There has been introduced in the Senate of the United States S. 1198, an act giving consent to a multistate tax compact; and

"Whereas, It is recognized that congressional hearings on S. 1198 will encompass the whole area of state taxation of multistate businesses and of persons employed in interstate commerce; and

"Whereas, General uniformity between state taxing systems in this area is desirable;

"Now, therefore, We your Memorialists respectfully pray that the Congress of the United States enact S. 1198 and further, as part of hearings on such bill, study and take appropriate action with respect to the problem of taxation of personal income of persons employed by interstate carriers, so as to establish guidelines for uniform state action in such area.

"Be It Resolved, That copies of this memorial be transmitted to the President of the United States Senate, the Speaker of the House of Representatives, the Chairman of the Finance Committee of the United States Senate, the Chairman of the Judiciary Committee of the House of Representatives, and each member of Congress from the State of Washington.

"Passed the House March 25, 1969.

"DON ELDRIDGE,

"Speaker of the House.

"Passed the Senate May 6, 1969.

"JOHN A. CHERBERG,

"President of the Senate."

A House joint memorial adopted by the Legislature of the State of Washington; to the Committee on Labor and Public Welfare:

"HOUSE JOINT MEMORIAL 18

"To the Honorable Richard M. Nixon, President of the United States, and to the Senate and House of Representatives of the United States of America, in Congress assembled:

"We, your Memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas, Historically the United States Office of Education has cooperated and assisted in the promotion of vocational youth organizations; and

"Whereas, The Future Farmers of America, the Future Homemakers of America, the Distributive Education Clubs of America and the Vocational Industrial Clubs of America were organized with encouragement and assistance from the staff of the United States Office of Education; and

"Whereas, These youth organizations have become an integral part of vocational education programs in secondary schools through the influence of the United States Office of Education staff members who serve as advisors; and

"Whereas, Through these organizations youth in rural, suburban, and urban areas have had an opportunity to become members of constructive organized groups; and

"Whereas, These organizations have helped youth to identify with the world of work and to develop as civic and community leaders; and

"Whereas, Membership in these organizations is open to all students in vocational education regardless of race, creed or national origin; and

"Whereas, a recent policy statement issued by the United States Office of Education concerning the relationship between the Office of Education and student organizations prohibits its staff from directing the activities of student organizations or participating in the administrative decisionmaking of student organizations as officers; and

"Whereas, This policy will, in effect, greatly reduce assistance to vocational youth organizations; and

"Whereas, In the case of one youth organization, the Future Farmers of America, this policy is in direct conflict with Public Law 740, Chapter 823, Section 18, which specifically authorizes the United States Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare to make available personnel, services and facilities of the Office of Education;

"Now, therefore, Your Memorialists respectfully pray that the President, the Congress of the United States, and the United States Department of Health, Education, and Welfare not implement its policy until there has been sufficient time to permit full congressional review and hearings to determine whether or not this administrative order carries out the intent of the law and take immediate action to strengthen these youth organizations that have become such an integral part of the vocational education program in the United States;

"Be it resolved, That copies of this memorial be immediately transmitted to the Honorable Richard M. Nixon, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington.

"Passed the House April 21, 1969.

"DON ELDRIDGE,

"Speaker of the House.

"Passed the Senate May 9, 1969.

"JOHN A. CHERBERG,

"President of the Senate."

A House joint memorial, adopted by the Legislature of the State of Washington; to

the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL No. 8

"To the Honorable Richard M. Nixon, President of the United States, the President of the Senate and Speaker of the House of Representatives, and to the Senate and the House of Representatives of the United States, in Congress assembled:

"We, your Memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, most respectfully represent and petition as follows:

"Whereas, The state of Washington is endowed by nature with a magnificent array of mountainous terrain which, each year, attracts millions of visitors seeking the enjoyments of outdoor recreation;

"Whereas, The future promises an ever-increasing number of visitors with a concomitantly growing demand for the many varied recreation uses of our mountain areas;

"Whereas, Our mountains contain several areas suitable for development as year-round, alpine-type recreational centers, similar to those internationally-famous resorts in other mountain regions of our nation and of the world, nevertheless, nowhere in our state is there a present facility adequate to accommodate the full range of demands of present and future outdoor recreationists;

"Whereas, Virtually all of the suitable alpine sites in our state are on federally-owned lands and are managed under policies and regulations which prohibit adequate, full-scale developments, to meet these recreational needs, it becomes incumbent upon the state of Washington to take steps to overcome this neglect of one of its great assets.

"Now therefore, be it resolved, That we, the House of Representatives and Senate of the state of Washington meeting in forty-first regular session hereby authorize and direct the Department of Natural Resources of this state to seek acquisition, through land exchange or otherwise, of one or more sites suitable for full development, year-round, alpine-type recreation centers in the mountain areas of our state; and do hereby respectfully memorialize and petition the President of the United States, the Congress of the United States, and the Secretary of Interior and the Secretary of Agriculture to cooperate with the state of Washington in this effort of site acquisition.

"Be it further resolved, That copies of this Memorial be transmitted by the secretary of state to the Honorable Richard M. Nixon, President of the United States, the Honorable Walter J. Hickel, Secretary of the Interior, and the Honorable Clifford M. Hardin, the Secretary of Agriculture and to the Senate and House of Representatives of the United States in Congress, to each Senator and Representative in Congress from the state of Washington.

"Passed the House May 3, 1969.

DON ELDRIDGE,

"Speaker of the House."

"Passed the Senate May 9, 1969.

JOHN A. CHERBERG,

"President of the Senate."

A House joint memorial adopted by the Legislature of the State of Washington; to the Committee on Post Office and Civil Service:

"HOUSE JOINT MEMORIAL 7

"To the Honorable Richard M. Nixon, President of the United States, and to the Senate and House of Representatives of the United States of America, in Congress assembled:

"We, your Memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas, The Kelly Air Mail Act of 1925 marked the beginning of contract air mail service by providing for a series of north to south feeder lines connecting the Post Office Department's east to west route from New York to San Francisco; and

"Whereas, Leon Cuddeback inaugurated scheduled contract air mail service for Varney Airlines on contract air mail Route No. 5, connecting the Pacific Northwest with the Southwest, from Pasco, Washington to Elko, Nevada via Boise, Idaho in his ninety horsepower Swallow biplane at 6:23 antemeridian on the 6th day of April, 1926; and

"Whereas, It has been generally acknowledged by American air historians that Leon Cuddeback flew the first authentic scheduled contract air mail run; and

"Whereas, Early contract air mail service was beset by a number of perils and limitations by reason of numerous forced landings and lack of navigational aids and equipment, and required the most daring spirit reminiscent of the pioneering spirit of the earliest settlers in the Americas and later of the settlers in the American West;

"Now, therefore, be it resolved, By the Senate and the House of Representatives that the President and Congress of the United States of America, and the United States Postmaster General, be respectfully urged to commemorate the inauguration of the scheduled contract air mail service under the Kelly Air Mail Act of 1925 from Pasco, Washington to Elko, Nevada on the 6th day of April, 1926, by the issuance, in the year 1976, of a semi-centennial or golden jubilee commemorative-airmail stamp or series; and

"Be it further resolved, That a copy of this resolution be transmitted to the Honorable Richard M. Nixon, President of the United States of America, the President of the United States Senate, the Speaker of the House of Representatives, to each member of Congress from the State of Washington, and to the United States Postmaster General.

"Passed the House March 24, 1969.

DON ELDRIDGE,

"Speaker of the House."

"Passed the Senate April 30, 1969.

JOHN A. CHERBERG,

"President of the Senate."

A Senate Concurrent Resolution adopted by the Legislature of the State of Louisiana; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION No. 14

"A concurrent resolution to commend the Ways and Means Committee of the United States House of Representatives for its efforts to improve the equity of the Federal personal income tax system and further to memorialize the Ways and Means Committee of the United States House of Representatives to take no position on tax reform which might subvert the tax-exempt status of state and local bonds or which might place state and local bonds in an inferior competitive position with superior federal government debt instruments and with corporate securities

"Whereas, equity among taxpayers is essential to popular confidence in the federal revenue system; and

"Whereas, the Ways and Means Committee of the United States House of Representatives has conducted extensive hearing on proposals for equitable reform of the Federal personal income tax; and

"Whereas, spokesmen for the National Governors' Conference, the National Legislative Conference, the National Association of Attorneys General and the National Association of State Treasurers, Auditors and Comptrollers have endorsed the objective of tax reform while urging the Committee to refrain from changes which would weaken the capacity of the states to meet the needs for state services.

"Therefore, be it resolved by the Senate

of the Legislature of Louisiana, the House of Representatives concurring herein, that the Ways and Means Committee of the United States House of Representatives is hereby commended for its efforts to improve the equity of the federal personal income tax system.

"Be it further resolved that the Ways and Means Committee of the United States House of Representatives is hereby memorialized and respectfully requested to adopt no change which would deprive state and local government obligations of their traditional immunity from federal taxation.

"Be it further resolved that the Ways and Means Committee of the United States House of Representatives is hereby memorialized and respectfully requested to adopt no change which would result in construction of the market for bonds issued by the states or local governments.

"Be it further resolved that the Ways and Means Committee of the United States House of Representatives is hereby memorialized and respectfully requested to adopt no change which would interpose Federal judgments relating to the policies of the states or local governments.

"Be it further resolved that it is the declared intention of the Legislature of Louisiana that no change is acceptable which would subject borrowing by the states and local governments to the uncertainties of the appropriation processes of the Congress of the United States.

"Be it further resolved that the Legislature of Louisiana hereby records its concurrence with the testimony on behalf of other state officials to memorialize the Ways and Means Committee of the United States House of Representatives to take no position which might place state and local bonds in an inferior competitive position with superior Federal government debt instruments and with corporate securities.

"Be it further resolved that copies of this Resolution is transmitted to the presiding officers of the two houses of the Congress of the United States, to each member of the Louisiana delegation in the Congress of the United States and to the Honorable Richard M. Nixon, President of the United States of America.

"W. AYEACK,

"Lieutenant Governor and President of the Senate."

"JOHN S. GARRETT,

"Speaker of the House of Representatives."

Two House concurrent resolutions adopted by the Legislative Assembly of the State of North Dakota; to the Committee on Public Works:

"HOUSE CONCURRENT RESOLUTION No. 45

"A concurrent resolution urging approval by the Congress of Senate Bill No. 229 which calls for construction of a bridge over the Oahe Reservoir in the vicinity of Fort Yates, North Dakota, and commending Senator Quentin Burdick for sponsoring the legislation

"Whereas, residents of, and travelers through, the south central portion of North Dakota and the north central portion of South Dakota have relied upon ferry service in crossing the Missouri River, principally in the vicinity of Fort Yates, North Dakota; and

"Whereas, this vast area of the two Dakotas lying between existing crossings at Bismarck, North Dakota, and Mobridge, South Dakota, a distance of over one hundred ten river miles and nearly one hundred air miles, has been bisected by the Oahe Reservoir, making ferryboat crossings impractical; and

"Whereas, a modern bridge crossing of the Oahe Reservoir in the area between Bismarck, North Dakota, and Mobridge, South Dakota, is needed by those engaged in agri-

cultural activities and would provide a stabilization of the area's economy—by increasing the potential for industrial development, tourism, and recreational usage of areas endowed with great natural beauty, which will otherwise lie dormant; and

"Whereas, providing an adequate crossing of the Oahe Reservoir will eliminate the present isolation of the Standing Rock Indian Reservation and be an important contributing factor in the progress toward completion of a program encompassing industrial, housing, educational, health, and social development on that Reservation; and

"Whereas, the Fortieth Legislative Assembly passed Senate Concurrent Resolution "Z" which urged Congress to authorize construction of a bridge across the Oahe Reservoir in the vicinity of Fort Yates, North Dakota; and

"Whereas, Senator Quentin Burdick has introduced United States Senate Bill No. 229 which would authorize construction of a bridge in the vicinity of Fort Yates, North Dakota;

"Now, therefore, be it resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein:

"That the Forty-first Legislative Assembly urges Congress to give favorable consideration to S. 229, and commends Senator Quentin Burdick for his cooperation with the Legislative Assembly of the State of North Dakota in sponsoring that bill; and

"Be it further resolved, that copies of this resolution be forwarded by the Secretary of State to the North Dakota Congressional Delegation, the Chief of Army Engineers, the United States Secretary of the Army, the United States Secretary of the Interior, the Commissioners of the Bureau of Indian Affairs and the Bureau of Public Roads.

"ERNEST N. JOHNSON,
"Speaker of the House.

"G. R. GILBREATH,
"Chief Clerk of the House.

"RICHARD T. LARSEN,
"President of the Senate.

"Secretary of the Senate."

"HOUSE CONCURRENT RESOLUTION No. 44

"A concurrent resolution urging approval by Congress of United States Senate Bill No. 231 which calls for construction of a bridge over a certain portion of the Garrison Reservoir, and commending Senator Quentin Burdick for sponsoring the legislation

"Whereas, the construction of the Garrison Dam and formation of the Garrison Reservoir, one of the largest manmade lakes in the world, has resulted in dividing the Fort Berthold Indian Reservation into five segments; and

"Whereas, the Indian people, as a result of this division and flooding, were forced to move from portions of their land, and suffered loss of valuable river bottom land, community centers, and burial grounds; and

"Whereas, the peaceful, orderly, and economic readjustment of the relocated Indian communities, as well as the practical, desirable, and beneficial development of the recreational opportunity of the reservoir and surrounding areas, is dependent upon a convenient and properly constructed bridge connecting the western and southern segments of the Fort Berthold Indian Reservation, and a portion of this project would become a part of the Lewis and Clark trailway already authorized by Congress; and

"Whereas, the Fortieth Legislative Assembly passed House Concurrent Resolution 'X-1' which urged Congress to authorize construction of a bridge in the general vicinity of Charging Eagle Bay on the Garrison Reservoir; and

"Whereas, United States Senator Quentin Burdick has introduced United States Senate bill No. 231 which would authorize construction of a bridge in the vicinity of Charging Eagle Bay;

"Now, therefore, be it resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein:

"That the Forty-first Legislative Assembly urges the Congress to give favorable consideration to S. 231, and commends Senator Quentin Burdick for his cooperation with the Legislative Assembly of the State of North Dakota in sponsoring that bill; and

"Be it further resolved, that copies of this resolution be forwarded by the Secretary of State to the North Dakota Congressional delegation, the Chief of Army Engineers, the United States Secretary of the Army, the United States Secretary of the Interior, the Commissioners of the Bureau of Indian Affairs and the Bureau of Public Roads.

"ERNEST N. JOHNSON,
"Speaker of the House.

"G. R. GILBREATH,
"Chief Clerk of the House.

"RICHARD T. LARSEN,
"President of the Senate.

"LEO LINDBOLM,
"Secretary of the Senate."

A joint resolution adopted by the Legislature of the State of Massachusetts; to the Committee on the Judiciary:

"RESOLUTION BY THE COMMONWEALTH OF MASSACHUSETTS

"Resolution memorializing the Congress of the United States to amend the Constitution of the United States by providing for the abolition of the Electoral College system and establishing the direct popular election of the President and the Vice President of the United States.

"Whereas, The national election of nineteen hundred and sixty-eight has once again demonstrated the dangerous potentialities for deadlock inherent in the Electoral College system; and

"Whereas, The Electoral College system is archaic, obsolete and undemocratic; and

"Whereas, The Electoral College system does not offer full realization of the one-man, one-vote doctrine in national elections; and

"Whereas, The abolition of the Electoral College system will result in bringing the voters, the ultimate source of all electoral power, directly into the process of electing a President and Vice President of the United States; now, therefore, be it

"Resolved, That the General Court of the Commonwealth of Massachusetts respectfully urges the Congress of the United States to support an amendment to the Constitution of the United States which will provide for the abolition of the Electoral College system and its replacement by the direct popular election of the President and Vice President of the United States; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the State Secretary to the presiding officer of each branch of Congress and to each member thereof from the Commonwealth.

"Senate, adopted, April 28, 1969.

"NORMAN L. PIDGEON,
"Clerk.

"House of Representatives, adopted in concurrence, April 30, 1969.

"WALLACE C. MILLS,
"Clerk.

"Attest:

"JOHN F. X. DAVOREN,
"Secretary of the Commonwealth."

A joint resolution adopted by the Legislature of the State of Massachusetts; to the Committee on Labor and Public Welfare:

"RESOLUTION BY THE COMMONWEALTH OF MASSACHUSETTS

"Resolution memorializing the Congress of the United States to enact legislation providing for a Veterans' Administration Hospital in the North Shore area of the county of Essex

"Whereas, There is an urgent need for the establishment of a two thousand bed Veter-

ans' Administration hospital in the north shore area of Essex county; now, therefore be it

"Resolved, That the General Court of Massachusetts hereby respectfully urges the Congress of the United States to enact legislation providing for the establishment of a two thousand bed Veterans' Administration hospital in the north shore area of Essex county; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the State Secretary to the President of the United States, to the presiding officer of each branch of the Congress, to the members thereof from the Commonwealth and to the Administrator of Veterans' Affairs.

"Senate, adopted, April 28, 1969.

"NORMAN L. PIDGEON,
"Clerk.

"House of Representatives, adopted in concurrence, April 30, 1969.

"WALLACE C. MILLS,
"Clerk.

"Attest:

A resolution of the House of Representatives of the State of Massachusetts; to the Committee on Labor and Public Welfare:

"RESOLUTION BY THE COMMONWEALTH OF MASSACHUSETTS

"Resolution memorializing the President of the United States to nominate Dr. John H. Knowles as Assistant Secretary of Health, Education, and Welfare and the United States Senate to confirm said appointment

"Whereas, Dr. John H. Knowles, the distinguished and able General Director of the Massachusetts General Hospital is being mentioned as Assistant Secretary of Health, Education, and Welfare; and

"Whereas, Dr. Knowles as General Director of the Massachusetts General Hospital, which in 1967 was rated number one in a list of ten of America's best hospitals, is a recognized expert in hospital supervision, medical affairs, health planning and scientific research, all fields which come under the supervision of the Assistant Secretary of Health, Education and Welfare; therefore be it

"Resolved, That the Massachusetts House of Representatives respectfully urges the President of the United States to nominate Dr. John H. Knowles as Assistant Secretary of Health, Education and Welfare; and be it further

"Resolved, That the Massachusetts House of Representatives respectfully urges the Senate of the United States to confirm said appointment; and be it further

"Resolved, That copies of these resolutions be sent forthwith by the Secretary of the Commonwealth to the President of the United States, to the presiding officer of the United States Senate and to the members thereof from this Commonwealth and the other New England states.

"House of Representatives, adopted, April 28, 1969.

"WALLACE C. MILLS,
"Clerk.

"Attest:

"JOHN F. X. DAVOREN,
"Secretary of the Commonwealth."

A resolution adopted by the House of Representatives of the Legislature of the State of Massachusetts; to the Committee on Rules and Administration:

"RESOLUTION BY THE COMMONWEALTH OF MASSACHUSETTS

"Resolution memorializing the Congress of the United States to repeal the Hatch Political Activity Act

"Whereas, Our great nation and its institutions would be strengthened by participation by a greater number of the citizenry in political affairs; and

"Whereas, The restrictions placed upon the political activities of certain governmental employees by the Hatch Political Activity Act deprive said citizens of their just rights; therefore be it

"Resolved, That the Massachusetts House of Representatives urges the Congress of the United States to repeal the Hatch Political Activity Act; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Secretary of the Commonwealth to the presiding officer of each branch of Congress and to each member thereof from this Commonwealth.

"House of Representatives, adopted, April 30, 1969.

"WALLACE C. MILLS,
"Clerk."

"Attest:

"JOHN F. X. DAVOREN,
"Secretary of the Commonwealth."

A resolution adopted by the Senate of the Legislature of the State of Massachusetts; ordered to lie on the table:

"RESOLUTION BY THE COMMONWEALTH OF MASSACHUSETTS

"Resolution memorializing the Congress of the United States to enact a pending bill providing a civil remedy for misrepresentation of the quality of articles composed in whole or in part of gold or silver

"Whereas, Massachusetts is the home of high quality jewelry fabricating firms which employ 12,000 workers with a total production of 60 million dollars annually;

"Whereas, These high quality products are threatened by the mislabeling of the quality of gold or silver in certain jewelry products such as "14 karat", "sterling", "gold-filled" and other such quality marks; and

"Whereas, The present federal Gold and Silver Stamping Act providing for criminal prosecutions has been found to be totally ineffective so that it is necessary to amend the law to provide for civil action by private parties to seek cease and desist orders; and

"Whereas, The Consumers' Council of the Commonwealth has voted to support pending federal legislation as a consumer protective measure; therefore be it

"Resolved, That the Senate of Massachusetts respectfully urges the Congress of the United States to enact a pending bill filed by Senators Kennedy and Pastore (S. 1046) to protect consumers by providing a civil remedy for misrepresentation of the quality of articles composed in whole or in part of gold or silver; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Secretary of the Commonwealth to the President of the United States, to the presiding officer of each branch of the Congress and to the members thereof from the Commonwealth and the Massachusetts Consumers' Council for presentation to the appropriate committees of Congress.

"Senate, adopted, May 5, 1969.

"NORMAN L. PIDGEON,
"Clerk."

"Attest:

"JOHN F. X. DAVOREN,
"Secretary of the Commonwealth."

A resolution adopted by the Delegates attending the Fourth Biennial Convention of the Arizona State AFL-CIO, deploring the increased purchase of California table grapes by the Department of Defense.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MUNDT, from the Committee on Government Operations, without amendment:

S. 844. A bill to improve the operation of the legislative branch of the Federal Government, and for other purposes (Rept. No. 91-202); and

S.J. Res. 60. A joint resolution to establish a Commission on Balanced Economic Development (Rept. No. 91-201).

By Mr. NELSON, from the Committee on Interior and Insular Affairs, without amendment:

S. 826. A bill to designate certain lands in the Seney, Huron Islands, and Michigan Islands National Wildlife Refuges in Michigan, the Gravel Island and Green Bay National Wildlife Refuges in Wisconsin, and the Moosehorn National Wildlife Refuge in Maine, as wilderness (Rept. No. 91-200).

By Mr. LONG, from the Committee on Commerce, without amendment:

S. 133. A bill to authorize the vessel *Orion* to engage in the coastwise trade (Rept. No. 91-203); and

S. 753. A bill to authorize and direct the Secretary of Transportation to cause the vessel *Cap'n Frank*, owned by Ernest R. Darling, of South Portland, Maine, to be documented as a vessel of the United States with full coastwise privileges (Rept. No. 91-204).

REPORT OF COMMITTEE ON COMMERCE ON NOMINATION OF CHARLES H. MEACHAM

Mr. INOUE, Mr. President, at the request of the chairman of the Committee on Commerce (Mr. MAGNUSON), I file the report of the Committee on Commerce on the nomination of Mr. Charles H. Meacham, and ask unanimous consent that the minority and individual views, which will be filed at a later time, be permitted; and that, when those views are filed, they be printed (Ex. Rept. No. 5).

The PRESIDING OFFICER. Without objection, it is so ordered.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on May 21, 1969, he presented to the President of the United States the following enrolled bill and joint resolution:

S. 256. An act to confer U.S. citizenship posthumously upon L. Cpl. Theodore Daniel Van Staveren; and

S.J. Res. 104. Joint resolution to authorize the President to reappoint as Chairman of the Joint Chiefs of Staff, for an additional term of 1 year, the officer serving in that position on April 1, 1969.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. AIKEN (for himself, Mr. CURTIS, and Mr. HOLLAND):

S. 2225. A bill to strengthen voluntary agricultural organizations, to provide for the orderly marketing of agricultural products, and for other purposes; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. AIKEN when he introduced the above bill, which appear under a separate heading.)

By Mr. YOUNG of North Dakota:

S. 2226. A bill to amend the Agricultural Adjustment Act of 1938 to provide that review committee members may be appointed from any county within a State and that the Secretary of Agriculture may institute proceedings in court to obtain a review of any review committee determination; to the Committee on Agriculture and Forestry.

By Mr. AIKEN:

S. 2227. A bill to amend the Tariff Schedules of the United States to provide duty-free entry for grids for electron microscopes; to the Committee on Finance.

(See the remarks of Mr. AIKEN when he introduced the above bill, which appear under a separate heading.)

By Mr. THURMOND:

S. 2228. A bill to provide for the increase of capacity and the improvement of operations of the Panama Canal, and for other purposes; to the Committee on Armed Services, by unanimous consent.

S. 2229. A bill for the relief of certain corporations, associations, and individuals; to the Committee on the Judiciary.

By Mr. PELL:

S. 2230. A bill to authorize foreign-built vessels owned by citizens of the United States to be documented under the laws of the United States for the purpose of engaging in the fisheries; to the Committee on Commerce.

(See the remarks of Mr. PELL when he introduced the above bill, which appear under a separate heading.)

By Mr. HARRIS:

S. 2231. A bill for the relief of Dr. In Bae Yoon; to the Committee on the Judiciary.

By Mr. INOUE (for Mr. GRAVEL):

S. 2232. A bill to amend the Alaskan Statehood Act, Public Law 85-508, July 7, 1958, 72 Stat. 339, by repealing the exclusive jurisdiction of the Federal Maritime Board over common carriers engaged in transportation by water between any port in the State of Alaska and other ports in the United States; to the Committee on Interior and Insular Affairs, by unanimous consent.

(See the remarks of Mr. INOUE when he introduced the above bill, which appear under a separate heading.)

By Mr. BROOKE:

S. 2233. A bill for the relief of Stefan Surzycki; to the Committee on the Judiciary; and

S. 2234. A bill to provide for the establishment of a national cemetery at Westfield, Mass.; to the Committee on Interior and Insular Affairs.

By Mr. SYMINGTON:

S. 2235. A bill for the relief of Dr. Pablo Calma De Ungria; to the Committee on the Judiciary.

By Mr. MAGNUSON (for himself, Mr. HART, Mr. DODD, Mr. PASTORE, Mr. MOSS, Mr. HOLLINGS, and Mr. INOUE):

S. 2236. A bill to create a Federal Insurance Guaranty Corporation to protect the American public against certain insurance company insolvencies; to the Committee on Banking and Currency.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. BELLMON (for Mr. DOLE):

S. 2237. A bill to amend title 37 of the United States Code to provide that a family separation allowance shall be paid to any member of a uniformed service assigned to Government quarters providing he is otherwise entitled to such separation allowance; to the Committee on Armed Services.

(See the remarks of Mr. BELLMON when he introduced the above bill, which appear under a separate heading.)

By Mr. MONTROYA:

S. 2238. A bill for the relief of Yvonne Nanette Panebouef; to the Committee on the Judiciary.

By Mr. DOMINICK (for Mr. JAVITS, for himself, Mr. MURPHY, and Mr. PROUTY):

S. 2239. A bill to amend the Public Health Service Act to improve and extend the provisions relating to assistance to medical libraries and related instrumentalities, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. DOMINICK when he introduced the above bill, which appear under a separate heading.)

By Mr. SPARKMAN (for himself, Mr. BENNETT, and Mr. WILLIAMS of New Jersey):

S.J. Res. 112. A joint resolution to amend section 19(e) of the Securities Exchange Act of 1934; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above joint resolution, which appear under a separate heading.)

S. 2225—INTRODUCTION OF A BILL TO STRENGTHEN VOLUNTARY AGRICULTURAL ORGANIZATIONS TO PROVIDE FOR ORDERLY MARKETING OF AGRICULTURAL PRODUCTS

Mr. AIKEN. Mr. President, on behalf of the Senator from Nebraska (Mr. CURTIS), the Senator from Florida (Mr. HOLLAND), and myself, I introduce a bill to strengthen voluntary agricultural organizations to provide for the orderly marketing of agricultural products, and for other purposes.

I ask that the bill be referred to the proper committee, which is the Committee on Agriculture and Forestry.

The PRESIDING OFFICER. The bill will be received and referred as requested.

The bill (S. 2225) to strengthen voluntary agricultural organizations, to provide for the orderly marketing of agricultural products, and for other purposes, introduced by Mr. AIKEN (for himself and others), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. AIKEN. Mr. President, in 1968 Congress enacted Public Law 90-288, a bill I originally offered in the Senate with the former Senator from Ohio, Mr. Lausche, and others.

The bill became widely known as the "fair play bill" because its purpose was to guarantee farmers the right to bargain as to the price and conditions of sale of their products without reprisal for their membership in a cooperative or any other marketing-bargaining association.

This law prohibits handlers from intimidation, bribery, discrimination, coercion, or "refusing to deal" with a producer because of his affiliation with such an association of producers.

The Secretary of Agriculture is empowered to enforce this law by going directly into Federal court on behalf of an aggrieved producer or his association, or the producer or his association may seek an injunction without going to the Secretary.

It has come to my attention that some handlers have refused to sit down and bargain.

This refusal violates the intent of the law.

I am, therefore, offering an amendment to strengthen the law as it pertains to such refusals.

The amendment defines a bargaining association as an association of producers or an agent of the farmers that is principally empowered to bargain with handlers.

This definition makes it clear beyond any question that such a bargaining

association would not necessarily have to be "certified" by a Government agency.

The amendment would also prohibit any handler from refusing to bargain at a reasonable time and place, and the association would have to show written proof that it represented the farmers from whom the handler usually obtained products, or farmers who might reasonably and efficiently supply products to the handler.

The amendment specifically states that the law does not require producers to join an association and does not prevent handlers from selecting their customers for any reason other than a producer's membership in an association of producers.

It does not require handlers or bargaining associations to conclude an agreement.

This is a simple clarification of the law, Mr. President.

It places no burden on the handler that it does not also place on the producer or his association.

It merely strengthens the "fair play law" in its requirements that there be fair play between the farmers and the handlers.

S. 2227—INTRODUCTION OF A BILL TO AMEND THE TARIFF SCHEDULES TO PROVIDE DUTY-FREE ENTRY FOR GRIDS FOR ELECTRON MICROSCOPES

Mr. AIKEN. Mr. President, I introduce for appropriate reference a bill to amend the Tariff Schedules of the United States to provide duty-free entry for grids for electron microscopes. The purpose of the bill is to correct an inequity in our Tariff Schedules which I am advised by the Customs Bureau cannot be done without legislation.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2227) to amend the Tariff Schedules of the United States to provide duty-free entry for grids for electron microscopes, introduced by Mr. AIKEN, was received, read twice by its title, and referred to the Committee on Finance.

S. 2236—INTRODUCTION OF A BILL TO ESTABLISH A FEDERAL INSURANCE GUARANTY CORPORATION

Mr. MAGNUSON. Mr. President, on behalf of Senators HART, DODD, PASTORE, MOSS, HOLLINGS, INOUE, and myself, I introduce for appropriate reference a bill to establish a Federal Insurance Guaranty Corporation.

There is a paramount need for this legislation. Since 1958 no less than 109 automobile insurance companies and 18 fire insurance companies have become insolvent. These insolvencies have left thousands of Americans without insurance coverage and thousands of unsuspecting policyholders subject to assessment. It is estimated that over \$200 million worth of lost premiums and unsatisfied claims have resulted from these insurance insolvencies.

The insolvency problem is aggravated by the fact that the victims of such in-

solencies are usually those in society who can least afford to lose their insurance coverage. The low- or moderate-income policyholder is most susceptible to victimization by financially unsound insurance companies who charge exorbitant premiums and pay their insurance agents inordinately high commissions.

Recent testimony before Senator HART's Antitrust and Monopoly Subcommittee illustrates the interstate nature of the insolvency problem and the need to assist the State regulators in this area. One State insurance commissioner, when endorsing the concept of a Federal guaranty corporation with examination power, related the difficulty the conscientious State insurance commissioner has in ascertaining the financial condition of a nondomiciliary company doing business in his State. The commissioner explained how some companies report inflated security holdings which rotate from State to State and company to company, while each State insurance office is blocked from tracing the security holdings and discovering their fraudulent nature. He also said that current conglomerate activity makes examination of nondomiciliary as well as domiciliary insurance companies difficult and beyond the capability of staff and resources of most State insurance regulators.

The above problems are aggravated by the lack of communication between the various insurance commissioners of the several States and by inconsistently effective State regulatory authority. Such ineffectiveness may be caused by inadequate budgetary restrictions that preclude adequate staffing or in certain unfortunate cases by apathetic administrators.

Three States have taken steps to solve the insolvency problem in the automobile insurance area by creating State guaranty funds. The States of New York, New Jersey, and Maryland have recognized the serious nature of the insolvency problem and the need for guaranty and quality examination.

Every American citizen should be provided that protection. The most effective and efficient means of providing a nationwide guaranty fund with quality examination is to create a Federal Insurance Guaranty Corporation. Insolvency coverages included in uninsured motorist endorsements are not sufficient.

Our colleague, the senior Senator from Connecticut (Mr. DODD) developed the idea of a Federal insurance guaranty fund to protect American automobile insurers. Hearings he chaired before the Antitrust and Monopoly Subcommittee of the Judiciary Committee had disclosed the seriousness and magnitude of the insolvency problem. Following Senator DODD's lead, the Senator from Michigan (Mr. HART) studied the insurance insolvency problem in his position as chairman of the Antitrust and Monopoly Subcommittee. The current work of Senator HART's subcommittee has provided invaluable data about the nature of casualty insurance insolvency. Last year, we on the Commerce Committee initiated legislation authorizing a 2-year automobile insurance study at the Department of

Transportation. At that time we decided to delay action on a Federal Insurance Guaranty Corporation for at least a year. We can wait no longer.

The initial legislation creating a Federal motor vehicle insurance guaranty fund has been revised. It now provides insolvency protection for all forms of property and casualty insurance. Senator HART's insurance hearings were instrumental in providing information that was helpful in this revision. The Federal Insurance Guaranty Corporation Act has been developed in close cooperation with both Senator HART and Senator DODD, who have joined as principal cosponsors. The bill will provide security to the Nation's policyholders and bring financial stability to the insurance industry. Both industry and the consumer will benefit from enactment of this legislation.

The Federal Insurance Guaranty Corporation bill provides for the creation of an insolvency fund—a fund generated by assessment of all interstate insurance carriers at a rate of one-eighth of 1 percent of the yearly net direct written premiums. This fund will be used to pay policyholders whose companies have become insolvent. The fund will also be available to finance the administrative expenses of the corporation, including the cost of examining the financial aspects of certain insurers applying for guaranty status under the act.

Several provisions in the bill stress the importance of Federal-State cooperation in administering the guaranty fund and conducting examinations. To insure a cooperative approach to the joint regulatory activities at the State and Federal level and to provide a forum for industry views, the bill provides for the creation of a 15-member representative Advisory Committee to assist the Board of Directors of the Corporation. Any Federal examinations are to be conducted in cooperation with State regulatory authorities.

The passage of this bill will protect citizens of this country from insurance insolvencies. This protection will be provided in two ways. First, any insolvency victims will have recourse to a Federal guaranty fund in order to preserve their insurance protection. Second, through Federal-State examination and regulation the financial conditions of insurance companies will be upgraded in order to reduce the incidence of insolvencies. I urge each of my colleagues to study this legislation carefully. It is of great import to each and every American consumer.

Mr. President, I ask unanimous consent that the full text of the bill and a section-by-section analysis be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and section-by-section analysis will be printed in the RECORD.

The bill (S. 2236), to create a Federal Insurance Guaranty Corporation to protect the American public against certain insurance company insolvencies, introduced by Mr. MAGNUSON (for himself and other Senators), was received, read

twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

S. 2236

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Insurance Guaranty Corporation Act."

CREATION OF CORPORATION

SEC. 2. There is hereby created a Federal Insurance Guaranty Corporation (hereinafter referred to as the "Corporation") which shall guarantee, as hereinafter provided, the contractual performance of participating insurers and which, in connection therewith, shall have the powers hereinafter granted.

BOARD OF DIRECTORS

SEC. 3. The management of the Corporation shall be vested in a Board of Directors consisting of three members, one of whom shall be the Comptroller General of the United States and two of whom shall be citizens of the United States to be appointed by the President, by and with the advice and consent of the Senate. One of the appointive members shall be designated by the President Chairman of the Board of Directors of the Corporation and not more than two of the members shall be members of the same political party. Each such appointive member shall hold office for a term of six years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom he shall succeed: *Provided*, however, that upon the expiration of his term of office a member shall continue to serve until his successor shall have been appointed and shall have qualified. In the event of a vacancy in the office of the Comptroller General of the United States and pending the appointment of his successor, or during the absence or disability of the Comptroller General, the Acting Comptroller General shall be a member of the Board of Directors in the place and stead of the Comptroller General. In the event of a vacancy in the office of the Chairman of the Board of Directors, and pending the appointment of his successor, the Comptroller General shall act as Chairman. A majority of the members shall constitute a quorum for the transaction of business. The members of the Board of Directors shall be ineligible during the time they are in office and for two years thereafter to hold any office, position, or employment in any participating insurer, except that this restriction shall not apply to any member who has served the full term for which he was appointed. No member of the Board of Directors shall be an officer or director of any participating insurer or hold stock in any participating insurer; and before entering upon his duties as a member of the Board of Directors he shall certify under oath that he has complied with this requirement and such certification shall be filed with the secretary of the Board of Directors.

ADVISORY COMMITTEE

SEC. 4. (a) (1) There is hereby established an Advisory Committee consisting of nineteen members appointed by the Board of Directors. Members of the Committee shall be selected from among representatives of the general public, the insurance industry, state and local governments including State insurance authorities, and the Federal Government. Of these members of the Committee, not more than six shall be regular full-time employees of the Federal Government, not less than four shall be representatives of the private insurance industry, and not less than four shall be representatives of State insurance authorities.

(2) The Board of Directors shall designate a Chairman and a Vice Chairman of the Committee.

(3) Each member shall serve for a term of two years or until his successor has been appointed, except that no person who is appointed while a full-time employee of a State or the Federal Government shall serve in such position after he ceases to be so employed, unless he is reappointed.

(4) Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of that term.

(b) The Chairman shall preside at all meetings, and the Vice Chairman shall preside in the absence or disability of the Chairman. In the absence of both the Chairman and Vice Chairman, the Board of Directors may appoint any member to act as Chairman pro tempore. The Committee shall meet at such times and places as it or the Board of Directors may fix and determine, but shall hold at least four regularly scheduled meetings a year. Special meetings may be held at the call of the Chairman or any three members of the Committee, or at the call of the Board of Directors. A majority of the members shall constitute a quorum for the transaction of business.

(c) The Committee shall review general policies of the Corporation and advise the Board of Directors with respect thereto, assist in obtaining the cooperation of insurers, industry groups, and Federal and State agencies, consult with and make recommendations to the Board with respect to carrying out the purposes of this title, and perform such other functions as the Board may, from time to time, assign. The written reports and recommendations of the Committee shall be made available by the Board to the public.

(d) The members of the Committee shall not, by reason of such membership, be deemed to be employees of the United States, and such members, except those who are regular full-time employees of the Government, shall receive for their services, as members, the per diem equivalent to the rate for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, when engaged in the performance of their duties, and each member of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by Section 5703 of such title for persons in the Government service employed intermittently.

CAPITAL STOCK

SEC. 5. The Corporation shall have a capital stock of \$50,000,000 which shall be divided into shares of \$1,000 each. The total amount of such capital stock shall be subscribed to by the Secretary of the Treasury. For the purpose of making payments for such stock the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds of the sale of any securities hereafter issued under the Second Liberty Bond Act, and the purpose for which securities may be issued under such Act are extended to include such purchases.

DEFINITIONS

SEC. 6. As used in this title—

(1) The term "insurer" means any enterprise engaged in the business of issuing or reinsuring property, casualty or surety insurance policies in interstate commerce or engaged in the business of issuing property, casualty or surety policies which are reinsured (in whole or in part) in interstate commerce.

(2) The term "local insurer" means any enterprise engaged in the business of issuing or reinsuring property, casualty or surety insurance policies solely within one state.

(3) The term "participating insurer" means any enterprise whose property, casualty or surety insurance policies are guaranteed under this title.

(4) The term "property, casualty or surety insurance policy" or "policy" means any contract of property, casualty or surety insurance, including any endorsements thereto.

and without regard to the nature or form of the contract or endorsements, insuring against legal liability or loss contingencies, other than those provided for by life, accident and health or title insurance.

(5) The term "net direct premiums written" means direct gross premiums written on property, casualty or surety insurance policies, less return premiums thereon and dividends paid to policyholders on such direct business. For the purposes of this subsection, premiums written on insurance policies issued to self insurers, whether or not designated as reinsurance contracts, shall be deemed "net direct premiums written".

(6) The term "policyholder claim" means (a) a claim of a policyholder or insured within the coverage of a policy, arising out of an occurrence wherein such policyholder or insured suffered damage or is subject to liability for damages within the coverage of the policy, or (b) a claim by a policyholder or insured for return premium arising out of the termination of the policy by reason of insolvency.

(7) The term "Board" means the Board of Directors of the Federal Insurance Guaranty Corporation.

(8) The term "Fund" means the Federal Insurance Guaranty Fund as described in Section 10 of this title.

(9) The term "interstate commerce" means trade or commerce among the several states, or between the District of Columbia or any possession of the United States and any state or other possession, or within the District of Columbia.

(10) The term "state" means any state, any possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

(11) The term "state supervisory authority" means the agency or individual of the state or domicile of the insurer having responsibility for regulating the business of insurance within that state.

INCORPORATION; POWERS

SEC. 7. (a) Upon the date of enactment of this title, the Corporation shall become a body corporate and shall be an instrumentality of the United States, and as such shall have power—

(1) To adopt, alter and use a corporate seal.

(2) To have succession until dissolved by an Act of Congress.

(3) To make contracts, and execute all instruments necessary and appropriate in the exercise of its powers.

(4) To sue and be sued, complain and defend, in any court of law or equity, state or Federal. All suits of a civil nature at common law or in equity to which the Corporation shall be a party shall be deemed to arise under the laws of the United States, and the United States district courts shall have original jurisdiction thereof without regard to the amount in controversy; and the Corporation may, without bond or security, remove any such action, suit, or proceeding from a State court to the United States district court for the district or division embracing the place where the same is pending by following any procedure for removal now or hereafter in effect. No attachment or execution shall be issued against the Corporation or its property before final judgment in any suit, action, or proceeding in any State, county, municipal, or United States court. The Board of Directors shall designate an agent upon whom service of process may be made in any State, territory, or jurisdiction in which any participating insurer does business.

(5) To appoint by its Board of Directors such officers, employees, attorneys, agents, adjusters, examiners, and other persons as may be necessary for the performance of its duties, to define their duties, fix their compensation, require bonds of them and fix the penalty thereof, and to dismiss at pleas-

ure such officers or employees. Nothing in this chapter or any other Act shall be construed to prevent the appointment and compensation as an officer or employee of the Corporation of any officer or employee of the United States in any board, commission, independent establishment, or executive department thereof.

(6) To prescribe by its Board of Directors by-laws not inconsistent with law, regulating the manner in which its general business may be conducted and the privileges granted to it by law may be exercised and enjoyed.

(7) To exercise by its Board of Directors, or duly authorized officers or agents, all powers specifically granted by the provisions of this title, and such incidental powers as shall be necessary to carry out the powers so granted.

(8) To make examinations of and to require information and reports from any insurer or local insurer making application for guaranty status, or whose policies are guaranteed under this title.

(9) To prescribe by its Board of Directors such rules and regulations as it may deem necessary to carry out the provisions of this title.

(b) No individual, association, partnership, or corporation, other than the Corporation, shall hereafter use the words "Federal Insurance Guaranty Corporation" or any combination of such words, as the name or part thereof under which he or it shall do business. Any violation of this subsection shall be punishable by a fine of not exceeding \$100 for each day during which such violation is committed.

ADMINISTRATION OF CORPORATION

SEC. 8. (a) The Board of Directors shall administer the affairs of the Corporation fairly and impartially and without discrimination. The Board of Directors shall determine and prescribe the manner in which its obligations shall be incurred and its expenses allowed and paid. The Corporation shall be entitled to free use of the United States mails in the same manner as the executive departments of the Government, and, with the consent of the head of any department or agency of the Federal Government, or of any State government, may avail itself of the use of information, services, and facilities thereof in carrying out the provisions of this title.

(b) The Corporation shall appoint examiners who shall have power, on behalf of the Corporation, to examine any insurer or local insurer making application for guaranty status or whose policies are guaranteed under this title, whenever in the judgment of the Corporation an examination of such insurer is necessary. In making examinations of insurers or local insurers the examiners shall have power on behalf of the Corporation to make such examinations of the affairs of all affiliates of such insurers as shall be necessary to disclose fully the relations between such insurers and their affiliates and the effect of such relations upon such insurer. Each examiner shall have power to make a thorough examination of all of the affairs of the insurer and such affiliates and shall make a full and detailed report of the condition of the insurer to the Corporation. All examiners appointed by the Corporation shall cooperate as far as practicable with the appropriate State supervisory authorities in conducting examinations under this title. It is the intent of Congress that any such examinations shall be coordinated with examinations by the appropriate State supervisory authorities and the National Association of Insurance Commissioners. Copies of reports of examinations by examiners appointed by this subsection shall be furnished by the Corporation to the appropriate State supervisory authorities which shall be afforded the opportunity to comment thereon. Copies of any report or statement made to any State supervisory authority by any participating insurer shall be filed with the Corporation within ten days after such reports or

statements have been made to such authority. The Corporation may accept any report or statement made to an appropriate State supervisory authority by any insurer or local insurer making application for guaranty status under this title or whose policies are guaranteed under this title.

(c) In connection with examinations of insurers and local insurers, the Corporation or its examiners shall have power to administer oaths and affirmations and to examine and to take and preserve testimony under oath as to any matter in respect of the affairs or ownership of any such insurer or affiliate thereof, and to issue subpoenas and subpoena duces tecum, and, for the enforcement thereof, the Corporation may apply to the United States district court for the judicial district or the United States court in any territory or possession in which the principal office of the insurer or affiliate thereof is located, or in which the witness resides or carries on business. Such courts shall have jurisdiction and power to order and require compliance with any such subpoena.

(d) The term "affiliate" or "affiliates" as used in the foregoing subsections (b) and (c) means any enterprise related directly or indirectly to the insurance activities of the insurer or local insurer.

(e) In cases of refusal to obey a subpoena issued to, or contumacy by, any person, the Board of Directors may invoke the aid of any court of the United States within the jurisdiction of which such hearing, examination or investigation is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, records, or other papers. And such court may issue an order requiring such person to appear before the Board of Directors or member or person designated by the Board of Directors, there to produce records, if so ordered, or to give testimony touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or carries on business or wherever he may be found. No person shall be excused from attending and testifying or from producing books, records, or other papers in obedience to a subpoena issued under the authority of this chapter on the ground that the testimony or evidence, documentary or otherwise, required of him may tend to incriminate him or subject him to penalty or forfeiture; but no individual shall be prosecuted or subject to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled to testify or produce evidence, documentary or otherwise, after having claimed his privilege against self-incrimination, except that such individual so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying.

(f) If any participating insurer, after written notice is given to it and the State supervisory authority of the recommendations of the Corporation based on a report of examination by an examiner of the Corporation (in cooperation with an examiner of the appropriate State supervisory authority), shall fail to comply with such recommendations within such time as the Corporation deems appropriate in the light of the circumstances of the case, the Corporation may publish such part of such report of examination as relates to any such recommendation not complied with: *Provided*, That notice of intention to make such publication shall be given to the insurer and the appropriate state supervisory authority at least sixty days before such publication is made.

(g) The Corporation may cause any and all records, papers, or documents kept by it or in its possession or custody to be photographed or microphotographed or other-

wise reproduced upon film, which photographic film shall comply with the minimum standards of quality approved for permanent photographic records by the National Bureau of Standards. Such photographs, microphotographs, or photographic film or copies thereof shall be deemed to be an original record for all purposes, including introduction in evidence in all State and Federal courts or administrative agencies and shall be admissible to prove any act, transaction, occurrence, or event therein recorded. Such photographs, microphotographs, or reproduction shall be preserved in such manner as the Board of Directors of the Corporation shall prescribe and the original records, papers, or documents may be destroyed or otherwise disposed of as the Board shall direct.

PAYMENT OF GUARANTY

SEC. 9. (a) The Corporation shall assume and perform all the obligations of a participating insurer under property, casualty and surety insurance policies which are guaranteed under this title, if:

(1) Such insurer is determined by a final decision of a court of competent jurisdiction to be insolvent;

(2) The receiver or liquidator appointed by such court gives written notice to the Corporation of such decision; and

(3) Such receiver or liquidator makes all books and records (including claim files) available to the Corporation.

Upon compliance with the foregoing with respect to any such insurer, the Corporation shall file forthwith a certificate of assumption with the court having jurisdiction over such insurer.

(b) Upon the filing of a certificate of assumption, all proceedings pending in any court against the insured or the insurer arising out of an occurrence within the coverage of a policy guaranteed under this title shall be stayed automatically for a period of thirty days for the purposes of this title.

(c) The Corporation shall be subject to the same obligations, liabilities, terms, conditions and waivers of the insurer and shall have available any defense or defenses (including that of policy limits) which would be available to the insurer.

(d) The Corporation is authorized to investigate, examine, adjust, compromise or settle any claim pending against the insured or the insurer on or after the date of the filing of a certificate of assumption. The Corporation is authorized to defend any action pending or brought against the policyholder or the insured on or after the date of the filing of such certificate.

(e) In no event shall any claim for return premium be allowed in excess of 50 per centum of the unearned premiums.

(f) Any person (including any individual, partnership, association or corporation) having a policyholder claim against the insurer or claim against the insured who also has a claim under State law against a State insurance insolvency or liability security fund growing out of the same insolvency, shall be required to exhaust first his rights under such State law against such State fund, if any, to the extent available for the satisfaction of his claim before receiving any payment under this title on any such claim, and the liability, if any, of the Corporation to any such claimant under this title shall be limited to the excess, if any, of any such claim not so satisfied under State law from such State fund.

(g) Any person (including any individual, partnership, association or corporation) having a claim against his insurer under any insolvency protection provision contained in his insurance policy, which claim arises out of the insolvency of a participating insurer, shall be required to exhaust first his rights under this title and/or under any applicable State insolvency or liability security fund, as provided for in subsection (f) hereof, before

receiving any payment for such claim from his insurer, and the liability, if any, of his insurer under such policy shall be limited to the excess, if any, of any such claim not so satisfied from such State fund and/or the Fund provided for herein.

(h) The Corporation shall be entitled to a valid claim against the insurer, or its liquidator, rehabilitator, conservator, receiver or trustee in bankruptcy, in an amount equal to the liabilities of such insurer paid from the Fund, less the net payments paid into the Fund by such insurer.

FEDERAL INSURANCE GUARANTY FUND

SEC. 10. (a) Funds obtained by the Corporation from the sale of its capital stock, as provided in section 5, and from guaranty fees collected pursuant to subsection (b) of section 13, shall be deposited in the Federal Insurance Guaranty Fund, which is hereby established. The Fund shall be held by the Corporation and used by it for carrying out its guaranty functions under this title, and for operating expenses arising in connection therewith.

(b) Whenever after retirement of the outstanding Treasury shares issued pursuant to section 5 the net asset value of the Fund exceeds two per centum of the annual net direct premiums written by all participating insurers, the Corporation shall waive the requirements for fees as herein stated: *Provided*, That such requirement shall be reinstated whenever the net asset value of such fund is less than two per centum of the annual net direct premiums written by all participating insurers: *Provided further*, That no distribution or rebate shall be made by reason of the fact that the total amount in fees collected by the Corporation at any time exceeds two per centum of such annual direct written premiums. In determining net asset value for the purposes of this subsection, the Board shall include estimated liabilities that may be chargeable to such Fund.

(c) No participating insurer shall be required to pay any fee or assessment under an State insurance insolvency or liability security fund law for any period during which the insurance policies of that insurer are guaranteed pursuant to this title.

(d) The Corporation shall retire as rapidly as practicable, having due regard to the need to maintain at all times the solvency of the Fund, the capital stock of the Corporation which is held by the Treasury.

(e) In the event that the Congress should repeal this title, any moneys remaining in such Fund at that time, after redemption of any outstanding capital stock, repayment of any outstanding loans from the Treasury under section 16 of this title and discharge of all expenses and obligations under this title, shall be returned to the participating insurers pro rata in accordance with the guaranty fees they have paid into the Fund.

(f) In the event that the Congress should reduce the size of the Fund specified in subsection (b) of this section 10, any excess in the Fund above the new statutory limit shall be returned to the participating insurers pro rata in accordance with the guaranty fees they have paid into the Fund.

APPLICATION FOR GUARANTEED STATUS

SEC. 11. Each insurer shall, and each local insurer may, make application to the Corporation for guaranty under this title. Such application shall be in such form and contain such information as the Corporation shall by regulation prescribe. The Corporation shall approve any such application if it finds, after examination, that the applicant is capable of conducting its business in a sound and solvent manner and, in making its determination, shall consider, along with such other factors as it may deem necessary or appropriate, the applicant's capital and surplus, reasonableness of operational expenses, premium writings as related to surplus, adequacy of loss and ex-

pense reserves, reinsurance, investment portfolio and managerial qualifications. Upon approval of any such application, after the imposition of any necessary conditions, the Corporation shall notify the applicant and issue to it an appropriate certificate which shall become effective not earlier than one year after the date of enactment of this title. Upon the taking effect of any such certificate, the contractual obligations of such participating insurer under property, casualty and surety insurance policies shall be guaranteed by the Corporation. Each participating insurer shall include a statement in each policy to the effect that such policy is guaranteed by the Corporation. The Corporation shall prescribe by regulation the substance of such statement and the form and manner of use. If any such application is not approved by the Corporation, it shall promptly notify the applicant as well as the State supervisory authority, and shall state the reasons therefor. Any insurer or local insurer the application of which has been denied by the Corporation shall, upon written request made to the Corporation within thirty days after receipt of the notification of denial, be granted a hearing as provided in section 14(i) of this title.

PENALTIES

SEC. 12. (a) Any insurer (other than a local insurer) issuing or reinsuring any property, casualty or surety insurance policy which is not guaranteed under this title shall forfeit to the United States the sum of \$1,000 for each and every day that such policy is in effect and is not guaranteed under this title. Such forfeiture shall be payable to the Corporation for its use. The Corporation is authorized to collect any unsatisfied forfeiture claim from the directors and officers of the Corporation individually. This subsection shall take effect upon the expiration of one year after the effective date of this title.

(b) Whoever falsely advertises or otherwise misrepresents by any device whatsoever that any property, casualty or surety insurance policy is guaranteed by the Federal Insurance Guaranty Corporation, or by the Government of the United States, or by any instrumentality thereof, shall be fined not more than \$1,000, or imprisoned not more than one year, or both.

REPORTS; GUARANTY FEE

SEC. 13. (a) Each participating insurer shall make to the Corporation reports of condition which shall be in such form, at such time and shall contain such information as the Board of Directors may require. The Board of Directors may require reports of condition to be published in such manner, not inconsistent with any applicable law, as it may direct. Every participating insurer which fails to make or publish any such report within ten days of its due date shall be subject to a penalty of not more than \$100 for each day of such failure, which penalty shall be recoverable by the Corporation for its use.

(b)(1) Each calendar year following the year in which the application of a participating insurer was approved by the Corporation, such participating insurer shall pay to the Corporation a guaranty fee. This fee, which shall be equal to one-eighth of one percentum of the net direct premiums written by the participating insurer during the year, shall be assessed semiannually, based on net direct premiums written during the periods January 1 through June 30 and July 1 through December 31.

(2) On or before the last day of the first month following each of the above mentioned semiannual periods, each participating insurer shall file with the Corporation a certified statement showing the net direct premiums written by such insurer during that period. In the event that accurate information is not available at that time, an estimate may be filed, *provided*, however,

that a final certified statement must be filed not later than sixty days from the last day of the reporting period.

(3) The certified statements required to be filed with the Corporation under paragraph (2) of this subsection shall be in such form and set forth such supporting information as the Board of Directors shall prescribe and shall be certified by the president of the insurer or any other officer designated by its board of directors to be, to the best of his knowledge and belief, true, correct and complete and in accordance with this title and regulations issued thereunder. The assessment payments required from participating insurers under paragraph (1) of this subsection shall be made in such manner and at such time or times as the Board of Directors shall prescribe, provided the time or times so prescribed shall not be later than sixty days after filing the certified statement setting forth the amount of assessment.

(4) Except as otherwise provided in this section, the Board of Directors shall prescribe all needful rules and regulations for the enforcement of this section. The Board of Directors may limit the retroactive effect, if any, of any of its rules or regulations.

(c) The Corporation may (1) refund to a participating insurer any payment of assessment in excess of the amount due to the Corporation or (2) credit such excess toward the payment of the assessment next becoming due from such insurer and upon succeeding assessments until the credit is exhausted.

(d) Any participating insurer which fails to make any report of condition under subsection (2) of this section or to file any certified statement required to be filed by it in connection with determining the amount of any assessment payable by the insurer to the Corporation may be compelled to make such report or file such statement by mandatory injunction or other appropriate remedy in a suit brought for such purpose by the Corporation against the insurer and any officer or officers thereof in any court of the United States of competent jurisdiction in the District or Territory in which such insurer is located.

(e) The Corporation, in a suit brought at law or in equity in any court of competent jurisdiction, shall be entitled to recover from any participating insurer the amount of any unpaid assessment lawfully payable by such insurer to the Corporation, whether or not such insurer shall have made any such report of condition under subsection (a) of this section or filed any such certified statement and whether or not suit shall have been brought to compel the insurer to make any such report or file any such statement. No action or proceeding shall be brought for the recovery of any assessment due to the Corporation, or for the recovery of any amount paid to the Corporation in excess of the amount due to it, unless such action or proceeding shall have been brought within five years after the right accrued for which the claim is made, except where the participating insurer has made or filed with the Corporation a false or fraudulent certified statement with the intent to evade, in whole or in part, the payment of assessment, in which case the claim shall not be deemed to have accrued until the discovery by the Corporation that the certified statement is false or fraudulent.

(f) Should any participating insurer fail to make any report of condition under subsection (a) of this section or to file any certified statement required to be filed by such insurer under any provision of this section, or fail to pay any assessment required to be paid by such insurer under any provision of this title, and should the insurer not correct such failure within thirty days after written notice has been given by the Corporation to an officer of the insurer, citing this subsection, and stating that the insurer has failed to file or pay as required by law, all

the rights, privileges, and franchises of the insurer granted to it under this title shall be thereby forfeited. Whether or not the penalty provided in this subsection has been incurred shall be determined and adjudged after hearing in the manner provided in section 14(1) of this title. The remedies provided in this subsection and in the two preceding subsections shall not be construed as limiting any other remedies against any participating insurer, but shall be in addition thereto.

(g) Any participating insurer which willfully fails or refuses to file any certified statement or pay any assessment required under this title shall be subject to a penalty of not more than \$100 for each day that such violations continue, which penalty the Corporation may recover for its own use.

(h) (1) Whenever a change occurs in the outstanding voting stock of any participating insurer which will result in control or in a change in the control of such insurer, the president or other chief executive officer of such insurer shall promptly report such facts to the Corporation upon obtaining knowledge of such change. As used in this subsection, the term "control" means the power directly or indirectly to direct or cause the direction of the management or policies of the insurer. If there is any doubt as to whether a change in ownership or other change in the outstanding voting stock of the insurer is sufficient to result in control or a change in the control thereof, such doubt shall be resolved in favor of reporting the facts to the Corporation.

(2) Whenever such a change as described in paragraph (1) of this subsection occurs, the participating insurer involved shall report promptly to the Corporation any change or changes, or replacement or replacements, of its chief executive officer or of any director occurring in the next twelve-month period, including in its report a statement of the past and current business and professional affiliations of the new chief executive officer or director.

(3) Whenever a participating insurer makes a loan or loans secured or to be secured by 25 per centum or more of the voting stock of another participating insurer, the president or other chief executive officer of the lending insurer shall promptly report such fact to the Corporation upon obtaining knowledge of such loan or loans, except that no report need be made in those cases where the borrower has been the owner of record of the stock for a period of one year or more, or the stock is of a newly organized insurer.

(4) The reports required by paragraphs (1) and (3) of this subsection shall contain the following information to the extent that it is known by the person making the report: (a) the number of shares involved, (b) the names of the sellers (or transferors), (c) the names of the purchasers (or transferees), (d) the names of the beneficial owners if the shares are registered in another name, (e) the purchase price, (f) the total number of shares owned by the sellers (or transferors), the purchasers (or transferees) and the beneficial owners both immediately before and after the transaction, and in the case of a loan, (g) the name of the borrower, (h) the amount of the loan, and (i) the name of the insurer issuing the stock securing the loan and (j) the number of shares securing the loan. In addition to the foregoing, such reports shall contain such other information as may be available to inform the Corporation of the effect of the transaction upon control of the insurer whose stock is involved.

TERMINATIONS; ENFORCEMENT

Terminations of guaranty

Sec. 14. (a) Whenever the Board of Directors shall find that (1) a participating insurer

or its directors or officers have engaged or are engaging in unsafe or unsound practices in conducting the business of the insurer, (ii) the insurer is in an unsafe or unsound condition to continue operations as a participating insurer, or (iii) the insurer has violated any provision of this title or any rule, regulation or order issued pursuant to this title, or any condition imposed in writing by the Corporation in connection with the granting of any application or other request by the insurer, or any written agreement entered into with the Corporation, the Board of Directors shall give to the State supervisory authority a statement with respect to such practices or violations for the purpose of securing the correction thereof and shall give a copy of the statement to the insurer. Unless correction shall be made within one hundred and twenty days from receipt of such statement, or such shorter period not less than twenty days fixed by the Corporation in any case where the Board of Directors in its discretion has determined that the insurance risk of the Corporation is unduly jeopardized, or unless within such time the Corporation shall have received acceptable assurances that such correction will be made within a time and in a manner satisfactory to the Corporation, or in the event such assurances are submitted to and accepted by the Corporation but are not carried out in accordance with their terms, the Board of Directors, if it shall determine to proceed further, shall give to the insurer not less than thirty days' written notice of intention to terminate its guaranteed status. Such notice shall contain a statement of the facts constituting the alleged violation or unsafe or unsound practice or condition and shall fix a time and place for a hearing before the Board of Directors or before a person designated by it to conduct such hearing, at which evidence may be produced, and upon such evidence the Board of Directors shall make written findings which shall be conclusive, subject to right of review as hereinafter provided for. If the Board of Directors shall find that any unsafe or unsound practice or condition or violation specified in such statement has been established and has not been corrected within the time above prescribed in which to make such corrections, the Board of Directors may order that the guaranteed status of the insurer be terminated on a date subsequent to such finding and to the expiration of the time specified in such notice of intention. Unless the insurer shall appear at the hearing by a duly authorized representative, it shall be deemed to have consented to the termination of its guaranteed status and termination of such status thereupon may be ordered. Any insurer whose guaranteed status has been terminated by order of the Board of Directors under this subsection shall have the right of judicial review of such order only to the same extent as provided for the review of orders under subsection (1) of this section. The Corporation may publish notice of such termination and the insurer shall give notice of such termination to each of its policyholders at his last address of record on the books of the insurer, in such manner and at such time as the Board of Directors may find to be necessary and may order for the protection of policyholders. In the event of failure to give the notice to policyholders as herein provided, the Corporation is authorized to give such notice. An order terminating the guaranteed status of any participating insurer shall not affect any guaranteed policy issued by such insurer prior to the date on which the order was issued, but shall be effective with respect to (1) the renewal of such policy, and (2) any property, casualty or surety insurance policy thereafter issued by such insurer. The procedures, contained in this subsection are independent of and supplementary to those provided for in subsections (b) through (e).

Cease and desist proceedings

(b) (1) If, in the opinion of the Corporation any participating insurer is engaging or has engaged, or the Corporation has reasonable cause to believe that such insurer is about to engage, in an unsafe or unsound practice in conducting its business, or is violating or has violated, or the Corporation has reasonable cause to believe that such insurer is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Corporation in connection with the granting of any application of other request by the insurer, or any written agreement entered into with the Corporation, the Corporation may issue and serve upon the insurer a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the insurer. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Corporation at the request of the insurer. Unless the insurer shall appear at the hearing by a duly authorized representative, it shall be deemed to have consented to the issuance of the cease and desist order. In the event of such consent, or if upon the record made at any such hearing, the Corporation shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Corporation may issue and serve upon the insurer an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the insurer and its directors, officers, employees, and agents to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

(2) A cease and desist order shall become effective at the expiration of thirty days after the service of such order upon the insurer concerned (except in the case of a cease and desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the Corporation or a reviewing court.

Temporary cease-and-desist orders

(c) (1) Whenever the Corporation shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the insurer pursuant to paragraph (1) of subsection (b) of this section, or the continuance thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the insurer, or is likely otherwise seriously to prejudice the interest of the policyholders or the Corporation, the Corporation may issue a temporary order requiring the insurer to cease and desist from any such violation or practice. Such order shall become effective upon service upon the insurer and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Corporation shall dismiss the charges specified in such notice or, if a permanent cease and desist order is issued against the insurer, until the effective date of any such order.

(2) Within ten days after the insurer concerned has been served with a temporary cease and desist order, the insurer may apply to the United States district court for the judicial district in which the principal office of the insurer is located, or the United States District Court for the District of Columbia,

for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of the charges served upon the insurer under paragraph (1) of subsection (b) of this section, and such court shall have jurisdiction to issue such injunction.

(3) In the case of violation or threatened violation of, or failure to obey, a temporary cease and desist order, the Corporation may apply to the United States district court, or the United States court of any territory, within the jurisdiction of which the principal office of the insurer is located, for an injunction to enforce such order and, if the court shall determine that there has been such violation or threatened violation or failure to obey, it shall be the duty of the court to issue such injunction.

Liabilities of directors and officers

(d) (1) Whenever, in the opinion of the Corporation, any director or officer of a participating insurer has committed any violation of law, rule, or regulation, or of a cease and desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the insurer, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Corporation determines that the insurer has suffered or will probably suffer substantial financial loss or other damage or that the interests of the policyholders could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is one involving personal dishonesty on the part of such director or officer, the Corporation may serve upon such director a written notice of its intention to remove him from office.

(2) Whenever, in the opinion of the Corporation, any director or officer of a participating insurer, by conduct or practice with respect to another insurer or other business institution which resulted in substantial financial loss or other damage, has evidenced his personal dishonesty and unfitness to participate in the conduct of the affairs of such insurer, the Corporation may serve upon such director, officer, or other person a written notice of its intention to remove him from office and/or to prohibit his further participation in any manner in the conduct of the affairs of such insurer.

(3) In respect to any director or officer of an insurer or any other person referred to in paragraphs (1) and (2) of this subsection, the Corporation may, if it deems it necessary for the protection of the insurer or the interests of the insurer's policyholders or of the Corporation, by written notice to such effect served upon such director, officer, or other person, suspend him from office and/or prohibit him from further participation in any manner in the conduct of the affairs of the insurer. Such suspension and/or prohibition shall become effective upon service of such notice, and, unless stayed by a court in proceedings authorized by paragraph (5) of this subsection, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraphs (1) and (2) of this subsection and until such time as the Corporation shall dismiss the charges specified in such notice, or, if an order of removal and/or prohibition is issued against the director or officer or other person, until the ef-

fective date of any such order. Copies of any such notice shall also be served upon the insurer of which he is a director or officer or in the conduct of whose affairs he has participated.

(4) A notice of intention to remove a director, officer, or other person from office and/or to prohibit his participation in the conduct of the affairs of an insurer, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or later date is set by the Corporation at the request of (a) such director, officer, or other person and for good cause shown, (b) the Attorney General of the United States, or (c) the state supervisory authority. Unless such director, officer, or other person shall appear at the hearings in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal and/or prohibition. In the event of such consent, or if upon the record made at any such hearing the Corporation shall find that any of the grounds specified in such notice has been established, the Corporation may issue such orders of suspension or removal from office, and/or prohibition from participation in the conduct of the affairs of the insurer, as it may deem appropriate. Any such order shall become effective at the expiration of thirty days after service upon such insurer and the director, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Corporation or a reviewing court.

(5) Within ten days after any director, officer, or other person has been suspended from office and/or prohibited from participation in the conduct of the affairs of an insurer under paragraph (3) of this subsection, such director, officer, or other person may apply to the United States district court for the judicial district in which the principal office of the insurer is located, or the United States District Court for the District of Columbia, for a stay of such suspension and/or prohibition pending the completion of the administrative proceedings pursuant to the notice served upon such director, officer, or other person under paragraph (1) or (2) of this subsection, and such court shall have jurisdiction to stay such suspension and/or prohibition.

(e) Whenever any director or officer of a participating insurer or other person participating in the conduct of the affairs of such insurer, is charged in any information, indictment, or complaint authorized by a United States Attorney, with the commission of or participation in a felony involving dishonesty or breach of trust, the Corporation may by written notice served upon such director, officer, or other person suspend him from office and/or prohibit him from further participation in any manner in the conduct of the affairs of the insurer. A copy of such a notice shall also be served upon the insurer. Such suspension and/or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Corporation. In the event that a judgment of conviction with respect to such offense is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Corporation may issue and serve upon such director, officer, or other person an order removing him from office and/or prohibiting him from further participation in any manner in the conduct of the affairs of the insurer except with the consent of the Corporation. A copy

of such order shall also be served upon such insurer, whereupon such director or officer shall cease to be a director or officer. A finding of not guilty or other disposition of the charge shall not preclude the Corporation from thereafter instituting proceedings to remove such director, officer, or other person from office and/or to prohibit further participation in the insurer's affairs, pursuant to paragraph (1) or (2) of subsection (d) of this section.

(f) Except with the written consent of the Corporation, no person shall serve as a director, officer, or employee of a participating insurer who has been convicted, or who is hereafter convicted, of any criminal offense involving dishonesty or a breach of trust. For each willful violation of this prohibition, the insurer involved shall be subject to a penalty of not more than \$100 for each day this prohibition is violated, which the Corporation may recover for its use.

Penalties

(g) Any director or officer, or former director or officer, of a participating insurer against whom there is an outstanding and effective notice or order (which is an order which has become final) served upon such director, officer or other person under subsections (d) or (e) above and who (1) participates in any manner in the conduct of the affairs of such insurer, or directly or indirectly solicits or procures, or transfers or attempts to vote any proxies, consents or authorizations in respect to any voting rights in such insurer, or (2) without the prior written approval of the Corporation, votes for a director or serves or acts as a director, officer, or employee of any insurer, shall upon conviction be fined not more than \$5,000 or imprisoned for not more than one year, or both.

(h) Whenever a participating insurer shall violate any of the penal provisions of this title, such violation shall be deemed to be also that of the individual directors, officers, or agents of such insurer who shall have authorized, ordered or done any of the acts constituting in whole or in part such violation, and such violation thereof of any such director, officer or agent, he may be punishable by a fine not exceeding \$5,000 or by imprisonment not exceeding one year, or both.

Hearings and judicial review

(i) (1) Any hearings provided for in this section or in section 11 of this title shall be held in the Federal judicial district or in the territory in which the principal office of the insurer is located unless the party afforded the hearing consents to another place, and shall be conducted in accordance with the provisions of chapter 5 of title 5. Such hearing shall be public, unless the Corporation, in its discretion, after fully considering the views of the party afforded the hearing, determines that a private hearing is necessary to protect the public interest. After such hearing, and within ninety days after the Corporation has notified the parties that the case has been submitted to it for final decision, the Corporation shall render its decision (which shall include findings of fact upon which its decision is predicated) and shall issue and cause to be served upon each party to the proceeding an order or orders consistent with the provisions of this section. Judicial review of any such order shall be exclusively as provided in this subsection (1). Unless a petition for review is timely filed in a court of appeals of the United States, as hereinafter provided in paragraph (2) of this subsection, and thereafter until the record in the proceeding has been filed as so provided, the Corporation may at any time, upon such notice and in such manner as it shall deem proper, modify, terminate, or set aside any such order. Upon such filing of the record, the Corporation may modify, termi-

nate, or set aside any such order with permission of the court.

(2) Any party to the proceeding, or any person required by an order issued under this section to cease and desist from any of the violations or practices stated therein, may obtain a review of any order served pursuant to paragraph (1) of this subsection (other than an order issued with the consent of the insurer or the director or officer or other person concerned), by filing in the court of appeals of the United States for the circuit in which the principal office of the insurer is located, or in the United States Court of Appeals for the District of Columbia Circuit, within thirty days after the date of service of such order, a written petition praying that the order of the Corporation be modified, terminated, or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Corporation, and thereupon the Corporation shall file in the court the record in the proceeding, as provided in section 2112 of Title 28. Upon the filing of such petition, such court shall have jurisdiction, which upon the filing of the record shall, except as provided in the last sentence of said paragraph (1), be exclusive, to affirm, modify, terminate, or set aside, in whole or in part, the order of the Corporation. Review of such proceedings shall be had as provided in chapter 7 of Title 5. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari as provided in Section 1254 of Title 28 of the United States Code.

(3) The commencement of proceedings for judicial review under paragraph (2) of this subsection shall not, unless specifically ordered by the court, operate as a stay of any order issued by the Corporation.

Jurisdiction and enforcement

(j) The Corporation may, in its discretion, apply to the United States district court, or the United States court of any territory, within the jurisdiction of which the principal office of the insurer is located, for the enforcement of any effective and outstanding notice or order issued by the Corporation under this section, and such courts shall have jurisdiction and power to order and require compliance therewith.

Definitions

(k) As used in this section, (1) the terms "cease and desist order which has become final" and "order which has become final" mean a cease and desist order, or an order, issued by the Corporation with the consent of the insurer or the director or officer or other person concerned, or with respect to which no petition for review has been filed and perfected in a court of appeals as specified in paragraph (2) of subsection (1), or with respect to which the action of the court in which said petition is so filed is not subject to further review by the Supreme Court of the United States in proceedings provided for in said paragraph, or an order issued under paragraph (1) of subsection (e) of this section, and (2) the term "violation" includes without limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

Service

(l) Any service required or authorized to be made by the Corporation under this section may be made by registered mail, or in such other manner reasonably calculated to give actual notice as the Corporation may by regulation or otherwise provide. Copies of any notice or order served by the Corporation upon any participating insurer or any director or officer thereof or other person participating in the conduct of its affairs, pursuant to the provisions of this section,

shall also be sent to the state supervisory authority.

Ancillary provisions; subpoena power

(m) In the course of or in connection with any proceeding under this section, the Corporation or its designated representative, including any person designated to conduct any hearing under this section, shall have the power to administer oaths and affirmations, to take or cause to be taken depositions, and to issue, revoke, quash, or modify subpoenas and subpoenas duces tecum; and the Corporation is empowered to make rules and regulations with respect to any such proceedings. The attendance of witnesses and the production of documents provided for in this subsection may be required from any place in any state or in any territory or other place subject to the jurisdiction of the United States at any designated place where such proceeding is being conducted. Any party to proceedings under this section may apply to the United States District Court for the District of Columbia or the United States district court for the judicial district or the United States court in any territory in which such proceeding is being conducted, or where the witness resides or carries on business, for enforcement of any subpoena or subpoena duces tecum issued pursuant to this subsection, and such courts shall have jurisdiction and power to order and require compliance therewith. Witnesses subpoenaed under this section shall be paid the same fees and mileage that are paid witnesses in the district courts of the United States. Any court having jurisdiction of any proceeding instituted under this section by an insurer, or a director or officer thereof, may allow to any such party such reasonable expenses and attorneys' fees as it deems just and proper; and such expenses and fees shall be paid by the insurer or from its assets.

CORPORATION MONIES; INVESTMENT

SEC. 15. (a) Money of the Corporation not otherwise employed shall be invested in obligations of the United States or in obligations guaranteed as to principal and interest by the United States: *Provided*, That the Corporation shall not sell or purchase any such obligations for its own account and in its own right and interest, at any one time aggregating in excess of \$100,000 without the approval of the Secretary of the Treasury: *And provided further*, That the Secretary of the Treasury may waive the requirement of his approval with respect to any transaction or classes of transactions subject to the provisions of this subsection for such period of time and under such conditions as he may determine.

Banking and checking accounts

(b) The banking or checking accounts of the Corporation shall be kept with the Treasurer of the United States, or, with the approval of the Secretary of the Treasury, with a Federal Reserve bank, or with a bank designated as a depository or fiscal agent of the United States: *Provided*, That the Secretary of the Treasury may waive the requirements of this subsection under such conditions as he may determine: *And provided further*, That this subsection shall not apply to the establishment and maintenance in any bank for temporary purposes of banking and checking accounts not in excess of \$50,000 in any one bank.

Loans to participating insurers

(c) When the Corporation has determined that a participating insurer is in danger of becoming insolvent, in order to prevent such insolvency, the Corporation, in the discretion of its Board of Directors, is authorized to make loans to such insurer upon such terms and conditions as the Board of Directors may prescribe.

TREASURY LOANS

SEC. 16. The Corporation is authorized to borrow from the Treasury, and the Secretary of the Treasury is authorized and directed to loan to the Corporation on such terms as may be fixed by the Corporation and the Secretary, such funds as in the judgment of the Board of Directors of the Corporation are from time to time required for insurance purposes, not exceeding in the aggregate \$500,000,000 outstanding at any one time: *Provided*, That the rate of interest to be charged in connection with any loan made pursuant to this section shall not be less than the current average rate on outstanding marketable and nonmarketable obligations of the United States as of the last day of the month preceding the making of such loan. For such purpose the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds of the sale of any securities hereafter issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under the Second Liberty Bond Act, as amended, are extended to include such loans. Any such loan shall be used by the Corporation solely in carrying out its functions with respect to such insurance. All loans and repayments under this section shall be treated as public-debt transactions of the United States.

EXEMPTION FROM TAXATION

SEC. 17. All notes, debentures, bonds, or other such obligations issued by the Corporation shall be exempt, both as to principal and interest, from all taxation (except estate and inheritance taxes) now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any state, county, municipality, or local taxing authority: *Provided*, That interest upon or any income from any such obligations and gain from the sale or other disposition of such obligations shall have not have any exemption, as such, and loss from the sale or other disposition of such obligations shall not have any special treatment, as such, under the Internal Revenue Code, or laws amendatory or supplementary thereof. The Corporation, including its franchise, its capital, reserves, and surplus, and its income, shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any state, county, municipality, or local taxing authority, except that any real property of the Corporation shall be subject to state, territorial, county, municipal, or local taxation to the same extent according to its value as other real property is taxed.

FORMS OF OBLIGATIONS

SEC. 18. In order that the Corporation may be supplied with such forms of notes, debentures, bonds, or other such obligations as it may need for issuance under this chapter, the Secretary of the Treasury is authorized to prepare such forms as shall be suitable and approved by the Corporation, to be held in the Treasury subject to delivery, upon order of the Corporation. The engraved plates, dies, bed pieces, and other material executed in connection therewith shall remain in the custody of the Secretary of the Treasury. The Corporation shall reimburse the Secretary of the Treasury for any expenses incurred in the preparation, custody, and delivery of such notes, debentures, bonds, or other such obligations.

REPORTS; AUDITS

SEC. 19. (a) The Corporation shall annually make a report of its operations to the Congress as soon as practicable after the 1st day of January in each year. Such report shall include a statement with respect to the status of the Fund established pursuant to Section 10, together with such recommendations concerning its adequacy or inadequacy as the Corporation deems necessary or desirable.

(b) The financial transactions of the Cor-

poration shall be audited by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where accounts of the Corporation are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, records, reports, files, and all other papers, things, or property belonging to or in use by the Corporation pertaining to its financial transactions and necessary to facilitate the audit, and they shall be afforded full facilities for verifying transactions with the balances or securities held by depositaries, fiscal agents, and custodians. All such books, accounts, records, reports, files, papers, and property of the Corporation shall remain in possession and custody of the Corporation.

(c) A report of the audit for each fiscal year ending on June 30 shall be made by the Comptroller General to the Congress not later than January 15 following the close of such fiscal year. On or before December 15 following such fiscal year the Comptroller General shall furnish the Corporation a short form report showing the financial position of the Corporation at the close of the fiscal year. The report to the Congress shall set forth the scope of the audit and shall include a statement of assets and liabilities and surplus or deficit; a statement of surplus or deficit analysis; a statement of income and expenses; a statement of sources and application of funds and such comments and information as may be deemed necessary to inform Congress of the financial operations and condition of the Corporation, together with such recommendations with respect thereto as the Comptroller General may deem advisable. The report shall also show specifically any program, expenditure, or other financial transaction or undertaking observed in the course of the audit, which, in the opinion of the Comptroller General, has been carried on or made without authority of law. A copy of each report shall be furnished to the President and to the Corporation at the time submitted to the Congress.

(d) For the purpose of conducting such audit the Comptroller General is authorized in his discretion to employ by contract, without regard to Section 5 of Title 41, professional services of firms and organizations of certified public accountants, with the concurrence of the Corporation, for temporary periods or for special purposes. The Corporation shall reimburse the General Accounting Office for the cost of any such audit as billed therefor by the Comptroller General, and the General Accounting Office shall deposit the sums so reimbursed into the Treasury as miscellaneous receipts.

GOVERNMENT CORPORATION CONTROL ACT

SEC. 20. Section 101 of the Government Corporation Control Act, as amended (31 U.S.C. 846), is amended by adding after "Federal Housing Administration", the following: "Federal Insurance Guaranty Corporation".

The material presented by Mr. MAGNUSON follows:

FEDERAL INSURANCE GUARANTY CORPORATION ACT

This bill, which would create a Federal Insurance Guaranty Corporation to protect against property, casualty and surety insurance company insolvencies, is in large part modeled after the Federal Deposit Insurance Corporation Act, as amended, 12 U.S.C. §§ 1811-31. Some of the provisions are also adapted from the bill to create a Federal Motor Vehicle Guaranty Corporation (S. 688) introduced by Senator Dodd in the 90th Congress.

SECTION-BY-SECTION ANALYSIS

Section 2 is a simple statement that a Federal Insurance Guaranty Corporation, which

shall guarantee the contractual performance of participating insurers, is hereby created.

Section 3 provides that the management of the Corporation shall be vested in a three man Board of Directors headed by the Comptroller General of the United States. The other two members are to be appointed by the President, and confirmed by the Senate, and are to serve six year terms. Certain conflict of interest provisions are included.

Section 4 establishes a nineteen member Advisory Committee, consisting of representatives of the general public, the insurance industry, state and local governments including state insurance authorities, and the Federal Government. Members are to be appointed by the Board and are to serve two year terms. The Committee will advise the Board with respect to the general policies of the Corporation, will assist in obtaining the cooperation of insurers, industry groups, and Federal and state agencies, and will perform such other functions as the Board may assign.

Section 5 provides that the Corporation shall have a capital stock of \$50,000,000 which shall be subscribed to by the Secretary of the Treasury. (Under Section 10(d), this stock is to be retired as rapidly as possible.)

Section 6 defines some of the terms used in the act. Through the definition of "insurer", the act is intended to apply to any enterprise which is engaged in the business of insuring or reinsuring property, casualty or surety insurance policies in interstate commerce or any enterprise which is engaged in the business of insuring property, casualty or surety policies which are reinsured in interstate commerce.

Section 7(a) outlines the powers of the Corporation. These include the power to contract, to sue and be sued, to appoint employees, agents, adjusters and examiners, to prescribe by-laws, to make examination of and require information and reports from insurers, and to prescribe any necessary rules and regulations.

Section 7(b) makes it an offense, punishable by fine of up to \$100 per day, for any individual or corporation to use the words "Federal Insurance Guaranty Corporation" as the name under which it does business.

Section 8 deals with administration of the corporation. Subsection (a) states that the affairs of the Corporation shall be administered fairly and impartially and without discrimination. Free use of the U.S. mails is given in the same manner as the executive departments.

Subsections (b) through (f) of Section 8 concern examinations. The Corporation is to appoint examiners, who shall have the power to examine any insurer whose policies are guaranteed under the act or any insurer applying for guaranty status, whenever the Corporation believes such examination is necessary. The examiner may examine the affairs of the insurer and its affiliates and report to the Corporation. Examinations are to be coordinated with those made by state supervisory authorities. Copies of reports are to be furnished to state authorities. In connection with examinations, the Corporation or its examiners are to have the power to administer oaths and affirmations, to take testimony and to issue subpoenas and subpoenas duces tecum. In cases of refusal to obey a subpoena, the Board of Directors may invoke the aid of a U.S. district court. Based on the examiner's report, the Corporation may make recommendations concerning an insurer, and if the insurer fails to comply, the Corporation may publish the relevant portion of the report of examination. Subsection (g) permits the Corporation to keep its documents on microfilm.

Section 9 provides that after the Corporation is notified that a participating insurer has been determined to be insolvent by a court of competent jurisdiction, the Corporation shall assume and perform all the obligations of the insurer under property, casualty and surety insurance policies which are guar-

anteed. Once a certificate of assumption has been filed, the Corporation is authorized to adjust or settle any claim pending against the insured or the insurer and to defend suits brought against the policyholder or the insured. No claim for return premium is to be allowed in excess of 50% of unearned premiums. Claimants who also have a claim under state law against a state insolvency fund are required to exhaust first their rights against the state fund. And any person having a claim against his insurer under an insolvency protection provision in his insurance policy is required to exhaust first his rights under this act and/or any state insolvency fund.

Section 10 establishes the Federal Insurance Guaranty Fund, which is to be held by the Corporation and used for carrying out the guaranty functions under the act and for operating expenses. Proceeds from the sale of capital stock (section 5) and from guaranty fees (section 13(b)) are to be deposited in the Fund. Capital stock is to be retired as rapidly as possible. After such retirement, whenever the net asset value of the Fund exceeds 2% of annual net direct premiums written by all participating insurers, the fee requirements under section 13 shall be waived. Section 10 also specifies that participating insurers are not required to pay fees to state insolvency funds when their policies are guaranteed under this act.

Section 11 concerns applications for guaranty status. All insurers (as defined in section 6) must, and intrastate insurers may, apply for guaranty. The factors to be considered by the Corporation in passing on applications are enumerated. Appropriate certificates are to be issued, and upon the taking effect of these, the contractual obligations or participating insurers under property, casualty and surety insurance policies shall be guaranteed by the Corporation. If an application is denied, the applicant must be given the reasons and is entitled to a hearing as provided in section 14(i).

Section 12 is a penalty section. Subsection (a) makes it an offense punishable by forfeiture of \$1000 per day for any insurer (as defined in section 6) to issue or reinsure any property, casualty or surety insurance policy which is not guaranteed under this act. Officers and directors of the insurer are also made individually liable for any unsatisfied forfeiture claim. Subsection (b) makes it an offense, punishable by fine of up to \$1000 and/or imprisonment of up to one year to advertise falsely that a policy is guaranteed by the Corporation.

Section 13(a) requires participating insurers to make regular reports of condition. Frequency and content of such reports is left to the Board. Failure to make a report is punishable by fine of up to \$100 per day.

Section 13(b) provides for guaranty fees. Each participating insurer is required to pay to the Corporation a fee equal to one-eighth of 1% of net direct premium written by the insurer during the year. Payments are made semiannually and certified statements showing net direct premiums written must also be filed semiannually. Under subsection (c), excess payments may either be refunded or credited to the next payment.

Section 13(d) authorizes the Corporation to seek a mandatory injunction or other appropriate remedy in Federal district court if reports or statements are not filed. Subsection (e) authorizes the Corporation to bring suit in any court of competent jurisdiction to recover unpaid assessments. Under subsection (f), whenever a participating insurer fails to pay an assessment or file a report or statement, and whenever the Corporation has given notice of such failure and after thirty days the insurer still fails to pay or file, all privileges under the act shall be forfeited. A hearing shall be given to determine whether this penalty is applicable. In

addition, under subsection (g), willful failure or refusal to pay or to file a certified statement is punishable by a fine of up to \$100 for each day the violation continues.

Section 13(h) provides that whenever a change occurs in the outstanding voting stock of a participating insurer so as to alter control of the insurer, or whenever a participating insurer makes loans secured by 25% or more of the voting stock of another participating insurer, these facts must be reported to the Corporation. The types of information which must be given are specified in paragraph (4).

Section 14(a) provides a procedure for terminating a guaranty. If the Board finds (1) unsafe or unsound business practices with respect to a participating insurer, or (2) an unsafe or unsound condition for continuance of operations, or (3) a violation of the act or of a rule, regulation or order issued under it or of a condition imposed on the insurer or an agreement with it, the Board may notify the state supervisory authority and the insurer. Unless correction is made within a certain time period or unless satisfactory assurances of prompt correction are made, the Board may give the insurer not less than 30 days' written notice of intent to terminate its guaranteed status. A hearing is to be given and written findings are to be made by the Board. If the Board finds that the unsafe or unsound practice or condition or violation has been established and not corrected, it may order the guaranteed status terminated. Such order shall not affect policies issued prior to the date the order is issued, but shall only affect renewals or policies subsequently issued by the insurer.

Section 14(b) empowers the Corporation to issue a cease and desist order if, after notice and hearing, it finds that a participating insurer has engaged in or is about to engage in an unsafe or unsound business practice or that the insurer has violated a law, rule, regulation, condition or agreement.

Section 14(c) allows the Corporation to issue a temporary cease and desist order, effective upon service, if the Corporation determines that a violation or unsafe practice is likely to cause insolvency or substantial dissipation of assets or earnings or is otherwise likely to prejudice the interest of policyholders or the Corporation. The Corporation may apply to a U.S. district court for an injunction to enforce such an order, and the insurer may apply to such court for injunctive relief to set the order aside or suspend its effectiveness.

Section 14(d) Permits the Corporation to remove from office a director or officer of a participating insurer or to prohibit him from participating in the conduct of the affairs of the insurer if the Corporation finds, after hearing, that the director or officer has breached his fiduciary duty or has evidenced his personal dishonesty and unfitness. In certain cases the Corporation may make its suspension or prohibition effective prior to hearing, but the individual is authorized to apply to a Federal district court for a stay of the suspension or prohibition pending completion of the administrative proceedings.

Section 14(e) permits the Corporation to remove a director, officer or other person from office or prohibit him from participating in the affairs of an insurer when the person is charged with the commission of or participation in a felony involving dishonesty or breach of trust.

Under section 14(f), no person convicted of a criminal offense involving dishonesty or breach of trust may serve as a director, officer or employee of a participating insurer, except with the written consent of the Corporation. Violation is punishable by a fine of up to \$100 per day.

Section 14(g) provides a penalty of up to

\$5,000 fine and/or up to 1 year imprisonment for anyone who is convicted of violating orders issued under section 14(d) or (e).

Section 14(h) states that when an insurer violates one of the penal provisions of the act, the individual directors, officers or agents of the insurer who authorized, ordered or did the act constituting the violation shall also be deemed to have committed the violation and may be punished by a fine of up to \$5,000 and/or imprisonment of up to 1 year.

Section 14(i) spells out the procedure for hearings and states that judicial review is to be by a U.S. court of appeals.

Section 14(j) gives the Corporation the power to apply to U.S. district court for enforcement of any notice or order issued by the Corporation under this section.

Section 14(k) defines certain terms used in the section.

Section 14(l) states that service of notices or orders may be made by registered mail or in such other manner as is reasonably calculated to give actual notice. Copies of notices or orders served by the Corporation are also to be sent to the state supervisory authority.

Section 14(m) concerns certain ancillary powers in connection with proceedings under this section, including the power to administer oaths, take depositions, issue subpoenas, make rules, and require attendance of witnesses and production of documents.

Section 15(a) provides that, with certain qualifications, money of the Corporation not otherwise employed shall be invested in obligations of the United States or obligations guaranteed by the United States.

Section 15(b) states that banking or checking accounts of the Corporation shall be kept with the Treasurer of the U.S., or with a Federal Reserve bank or a bank designated as a depository or fiscal agent of the U.S.

Section 15(c) authorizes the Corporation to make loans to a participating insurer when it determines that the insurer is in danger of becoming insolvent.

Section 16 permits the Corporation to borrow from the Treasury such funds as are needed insurance purposes (up to a total of \$500,000,000 outstanding at any one time). Interest on these loans is to be at least the current average rate on outstanding marketable and nonmarketable obligations of the United States.

Section 17 exempts the obligations of the Corporation from taxation. However, interest upon or income from the obligations and gain upon sales shall have no exemption. Nor shall loss upon sale have any special treatment. The Corporation and its income shall be exempt from taxation, but real property of the Corporation shall not be.

Section 18 authorizes the Secretary of the Treasury to prepare forms of obligations for the Corporation.

Section 19 requires the Corporation to report to Congress annually, and specifies that the financial transactions of the Corporation shall be audited by the General Accounting Office. Annual reports of the audits shall be furnished to Congress.

Section 20 adds the name "Federal Insurance Guaranty Corporation" to section 101 of the Government Corporation Control Act, as amended (31 U.S.C. §846).

Mr. HART. Mr. President, 35 years ago, Congress was faced with the question of the advisability of another guaranty fund—this one for the banking industry. Thankfully, at that time the vote was for establishment of the Federal Deposit Insurance Corporation. I say "thankfully" because I think the industry and its customers have been well

served by the protection the FDIC has provided.

A chart developed by the Senate Antitrust and Monopoly Subcommittee during its insurance investigation points

this out very dramatically. I ask that it be printed at this point.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

CLAIMS FILED, ASSETS AND PAYOUT RELATED TO TOTAL ADMINISTRATIVE EXPENSES, LEGAL FEES, AND SALARIES WITH RESPECT TO INSOLVENT AUTO INSURERS BY STATE

State	Companies	Number of policyholders and claimants filing claims	Actual assets available to pay claims to date	Amount paid out to policyholders and claimants to date	Total administrative expenses paid to date	Legal fees paid to date ¹	Salaries and wages paid to date

Source: State insurance department replies to Senate Antitrust and Monopoly Subcommittee questionnaire of June 6, 1968.

Mr. HART. As it shows, during the first 9 "shakedown" years of the FDIC, 390 banks failed. But once these obviously questionable enterprises were eliminated, only 85 bank failures occurred in the next 25 years.

Even better than the decrease in the number of bank failures is the fact that no depositor of any of these banks was financially hurt by the failures.

This is good. When the institution to

which you entrust your money fails, it is an extremely unpleasant thing.

But it is less painful to lose your money when you still are capable of earning more than it is to suffer severe financial loss when at the same time you have lost the ability to earn more money.

Yet this is the situation thousands of Americans have faced in recent years. In the 1958-68 period alone, 109 automobile insurance companies failed, many of

which were high risk. In addition, 18 fire and casualty companies writing other lines failed. A conservative estimate is that more than 1 million consumers were financially hurt by those failures. Further it is estimated that the failure of only 88 of those auto insurance companies cost consumers more than \$200 million.

Obviously a good percentage of those losers were claimants—persons who may have lost the family breadwinner in a fatal accident or may have been handicapped for life themselves. For them, the hope of recouping from such financial distress is only a dream.

Briefly, then, my message in cosponsoring this bill is simple: If FDIC makes sense for banks, then the Federal Insurance Guaranty Corporation makes as much sense—doubled, in spades, for the insurance industry.

The sad plights that follow failure of an auto insurance company are not limited, of course, to the loss claimants suffer. Policyholders themselves—who turned to these companies with faith that they are solid and with no capacity for determining otherwise—find they not only lose protection and premiums but are often forced to bail out the untrustworthy company.

For example, another chart, which I ask be inserted at this point, shows that failure of 21 mutual and reciprocal companies ended up in more than 650,000 policyholders being assessed for more than \$3½ million.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

SUMMARY OF POLICYHOLDERS AND CLAIMANT ACTUAL AND POTENTIAL RECOVERY FROM INSOLVENT AUTO INSURANCE COMPANIES BY STATE

¹ For which data is available.

² Actual recovery measured by amount paid out to amounts submitted and approved by court for allowance; estimated recovery measured (1) where sufficient number of claims have been evaluated by taking amount of claims for submission (or amount submitted and approved by court) for allowance (less amount paid out) to assets available to pay claims, and (2) where sufficient number of claims have not been evaluated, by taking from 5 to 50 percent (depending upon experience of particular State) of amount claimed, and amount for submission to court for allowance (less amounts paid out to date) to assets available to pay claims.

³ Does not include potential assets (such as agents balances, reinsurance recoverable) of \$4,001,271, and potential recovery of \$41,300,000 from 396,138 assessable mutual policyholders.

⁴ Data not available from Illinois Department for Highway, Lincoln Casualty & Progressive Insurance Cos.

⁵ 16,941 claims have been evaluated by receiver to date.

⁶ Does not include balance of \$11,700,000 of potential recovery from some 90,000 assessable mutual policyholders.

⁷ Does not include potential assets of \$122,849.

⁸ 4 insolvent estates have been closed.

⁹ Data available for 4 companies.

¹⁰ Data available for 4 companies.

¹¹ Data available for 3 companies.

¹² For 1 open insolvent company.

¹³ Does not include potential assets of \$9,302,054, nor potential recovery of \$5,350,243 from 49,690 mutual assessable policyholders.

¹⁴ Data available for 1 company.

¹⁵ Data available for 3 companies; claims are in process of evaluation for North American Guaranty.

¹⁶ Does not include North American Guaranty.

¹⁷ Data available for 3 companies; does not include potential assets of \$40,175.

¹⁸ For 1 insolvent company; estate has been closed.

¹⁹ Although data available for 3 companies, number or amount of claims for 2 of these are unavailable.

²⁰ Data available for 1 company, but California department reports that for 2 companies with combined amounts claimed of \$1,400,000, a 100-percent payout was made, and for another company with an amount claimed of \$230,000, 0 percent payout was made. Apparently, all 3 estates are being wound up.

²¹ Does not include potential assets of \$1,355,658.

²² Does not include potential assets of \$995,000.

²³ Does not include potential assets of \$361,494.

²⁴ Data available for Monticello Insurance Co. only.

²⁵ For American Allied only.

²⁶ Does not include potential assets of \$95,000.

²⁷ Auto bodily injury and property damage claims were paid out of the New York stock public motor vehicle liability security fund (under sec. 330), and the motor vehicle liability security fund (under sec. 333).

Source: State insurance department replies to Senate Antitrust and Monopoly Subcommittee questionnaire of June 6, 1968.

Mr. HART. Our hearing record includes vignettes of the personal distress these assessments have meant to several of the policyholders. As most of us are aware, a large number of the consumers forced into high-risk companies are deprived or handicapped in ways that keep them in the lower income brackets. This station in life adds to the suffering when they are faced with an assessment for company failure for which they were in no way responsible.

Further, as the subcommittee record shows, failure to pay the assessments can end in the jailing of the hapless policyholder—most of whom had no idea when they bought insurance that they also were buying financial responsibility for a company.

Mr. President, presently many in the insurance industry are advocating the substitution of competition for rate regulation. How can we be expected to consider seriously this change until full provision is made for the protection of policyholders? As any businessman knows, one product of competition is failure of the weak. In the unique insurance field, those failures will harm not just company stockholders—but the customers. Obviously, before any such major changes are initiated in the insurance field, we must be sure that protection is available for the now unprotected consumer.

Equally as obvious is the logic that when most States in effect force consumers to have insurance, that the consumers have some guarantee that protection will be available when he needs it.

This bill, in my estimation, would provide that protection at an average cost to policyholders of from 50 cents to \$1 annually. I think the price is more than reasonable and the protection essential.

Mr. President, I ask unanimous consent that several tables bearing on the insurance company insolvency question which were prepared by the Senate Antitrust and Monopoly Subcommittee be inserted at this point.

There being no objection, the charts were ordered to be printed in the RECORD, as follows:

FEDERAL DEPOSIT INSURANCE CORPORATION INSURED BANKS SUSPENDING AS A PERCENTAGE OF TOTAL OPERATING BANKS IN THE UNITED STATES, 1934-67¹

grams of health services and research will be placed in jeopardy through the failure of effective development of health information systems. The 1964 Presidential Commission Report on Heart Disease, Cancer, and Stroke, accurately portrays the situation by saying:

Unless major attention is directed to improvement of our national medical library base, the continued and accelerated exchange of scientific knowledge will become increasingly an exercise in futility.

The services and facilities of medical libraries are needed by the research scientists, the teacher, the student, and the practitioner to further the advances of knowledge, to transmit the knowledge to coming generations, and to apply the knowledge to the benefit of the people. I am hopeful for timely hearings in the Senate on this important proposal—medical practice, training, and research are now undergoing major changes, changes which, inevitably, will intensify the demands upon our medical libraries and health communications. The significant increase in specialization and the development of more complex systems of health care in our great urban centers also require an availability of access to large, centralized medical library facilities, as well as new tools for predigesting and repackaging the mounting volume of new information.

This legislation modifies the Medical Library Assistance Act of 1965 as follows:

First. The administration requests in place of the separate authorizations for each program a single general authorization provision, in an effort to provide greater flexibility both in the appropriation process and the program management.

Second. The administration proposes a reduction in the number of specifically identified library assistance programs through a consolidation of the existing sections 395 and 396.

Third, further administration modifications of the original act are proposed to improve the responsiveness of the program to national needs and to facilitate its administration: First, deletion of the authority of the present act which allows awards to be made for construction grants under conditions where matching funds are not immediately available; second, broadening the definition of eligible grantees for special scientific projects and for biomedical publication support; third, inclusion of the authority to support demonstration as well as research projects; fourth, inclusion of the authority to assist in establishing new medical library collections; fifth, inclusion of the authority for certain administrative changes for medical library research grants; and, sixth, inclusion of the authority to permit the use of contracts and to allow grants for planning under the regional medical library program.

I hope the bill will reach an early and favorable consideration—our medical libraries are vital to maintaining America's medicine in the forefront of international scientific advances.

I also ask that the names of the Senator from Vermont Mr. PROUTY and the Senator from California Mr. MURPHY be added as cosponsors.

**S. 2239—INTRODUCTION OF A BILL
TO IMPROVE AND EXTEND THE
PROVISIONS RELATING TO AS-
SISTANCE TO MEDICAL LIBRAR-
IES AND RELATED INSTRUMENTALITIES**

Mr. DOMINICK. Mr. President, I am pleased to introduce, at the request of the Senator from New York (Mr. JAVITS), the administration's bill to improve and extend those provisions of the Public Health Service Act authorizing assistance to medical libraries and related facilities in the field of health communications, entitled the "Medical Library Assistance Extension Act of 1969." In essence, the bill would extend the Medical Libraries Assistance Act of 1965 for 1

year, with several clarifying and technical amendments, and provide a coordinated national program to improve health communications. The present authorization for each of the programs added to the Public Health Service Act by the Medical Library Assistance Act of 1965 will expire June 30, 1970.

The proposed legislation reflects the administration's efforts to assure the success of the Nation's health programs and reaffirms our Government's responsibility in insuring that the vast accumulative knowledge of medicine is available for physicians, scientists, and the public in useful form in our libraries. Unless a program of library assistance is maintained, major investments in pro-

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2239) to amend the Public Health Service Act to improve and extend the provisions relating to assistance to medical libraries and related instrumentalities, and for other purposes, introduced by Mr. DOMINICK (for Mr. JAVITS, for himself, Mr. MURPHY, and Mr. PROUTY), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTIONS

Mr. INOUE. Mr. President, on behalf of the Senator from Utah (Mr. BENNETT), I ask unanimous consent that at its next printing the name of the Senator from Alabama (Mr. ALLEN) be added as a cosponsor of S. 845, to change the definition of ammunition for purposes of chapter 44 of title 18 of the United States Code.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I ask unanimous consent that, at its next printing, my name be added as a cosponsor of the bill (S. 941) to amend section 213(a) of the War Claims Act of 1948 with respect to claims of certain nonprofit organizations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, I ask unanimous consent that, at its next printing, the name of the Senator from Indiana (Mr. BAYH) be added as a cosponsor of the bill (S. 2029) to provide improved judicial machinery for the selection of juries, to further promote equal employment opportunities of American workers, to authorize appropriations for the Civil Rights Commission, to extend the Voting Rights Act of 1965 with respect to the discriminatory use of tests and devices, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, at the request of the Senator from Michigan (Mr. GRIFFIN), I ask unanimous consent that, at its next printing, the names of the Senator from Alabama (Mr. ALLEN), the Senator from Colorado (Mr. ALLOTT), the Senator from Indiana (Mr. BAYH), the Senator from Oklahoma (Mr. BELLMON), the Senator from Nebraska (Mr. CURTIS), the Senator from Connecticut (Mr. DODD), the Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. FANNIN), the Senator from Wyoming (Mr. HANSEN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from New York (Mr. JAVITS), the Senator from Iowa (Mr. MILLER), the Senator from Utah (Mr. MOSS), the Senator from Wisconsin (Mr. NELSON), the Senator from Oregon (Mr. PACKWOOD), the Senator from Illinois (Mr. PERCY), the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Alaska (Mr. STEVENS), and the Senator from South Carolina (Mr. THURMOND) be added as cosponsors of the bill (S. 2109), to provide for financial disclosure by members of the Federal judiciary.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPONG. Mr. President, I ask unanimous consent that, at its next printing, the name of the Senator from Maryland (Mr. TYDINGS) be added as a cosponsor of the bill (S. 2148) to amend the Merchant Marine Act, 1936, to encourage shipbuilding, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, on behalf of the Senator from Michigan (Mr. GRIFFIN), I ask unanimous consent that, at its next printing, the name of the Senator from Indiana (Mr. BAYH) be added as a cosponsor of the resolution (S.J. Res. 84), to declare the policy of the United States with respect to its territorial sea.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUE. Mr. President, at the request of the Senator from Alaska (Mr. GRAVEL), I ask unanimous consent that, at its next printing, the name of the senior Senator from Oregon (Mr. HARTFIELD) be added as a cosponsor of the joint resolution (S.J. Res. 108), to provide for a study and evaluation of the relationship between underground nuclear detonations and seismic disturbances.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I ask unanimous consent that, at its next printing, the name of the Senator from Pennsylvania (Mr. SCHWEIKER) be added as a cosponsor of the resolution (S. Res. 58), to create a standing Committee on Veterans' Affairs for the Veterans' Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE CONCURRENT RESOLUTION 27—SUBMISSION OF CONCURRENT RESOLUTION IN SUPPORT OF CAPTURED AMERICAN FIGHTING MEN

Mrs. SMITH submitted the following concurrent resolution (S. Con. Res. 27) which was referred to the Committee on Foreign Relations:

S. CON. RES. 27

Whereas article VI of the United States Constitution specifically states that provisions of treaties ratified by the United States Government become the "supreme law of the land", notwithstanding contrary limitations of the Constitution itself; and

Whereas ratification of the United Nations treaty in 1945 has seriously compromised protection for men and women of our Armed Forces stationed in all parts of the world; and

Whereas notwithstanding solemn promises ratified at the international conferences at Geneva that all prisoners of war captured during the Korean conflict would be unconditionally released, no pretense of compliance has been advanced by defiant Communist aggressors; and

Whereas repeated appeals on the part of parents, relatives, and dependents of those unfortunate victims of Communist violence have proven ineffective either through the United States Department of State or the United Nations: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—

(1) a more determined effort be made by our State Department to obtain the release and freedom from captivity of those American fighting men of the Korean conflict; and

(2) there be enacted by the Congress of the United States a code of protective legislation applicable to American personnel captured in military operations other than in a "declared war" to assure that the full force, authority, and power of the United States of America shall henceforth be publicly committed to the attainment of freedom from captivity of all Americans captured in such military operations, past and future.

NOTICE OF HEARINGS

Mr. SPARKMAN. Mr. President, I should like to announce that the Subcommittee on Housing and Urban Affairs of the Committee on Banking and Currency Committee will hold a 1-day hearing, on June 6, 1969, on the model cities program, which is administered by the Department of Housing and Urban Development. The purpose of the hearing is to obtain an up-to-date progress report on the model cities program and to learn from the Housing Department the meaning of the recent announcement made by Secretary Romney on his plans to revise the program.

The hearing will be held on June 6, 1969, at 10 a.m. in room 5302, New Senate Office Building, and the witnesses will be Hon. George W. Romney, Secretary, and other representatives from the Department of Housing and Urban Development who have the responsibility for administering the model cities program.

ANNOUNCEMENT OF HEARING ON CONSUMER ASPECTS OF THE ECONOMICS OF AGING

Mr. CHURCH. Mr. President, as chairman of the Subcommittee on Consumer Interests of the Elderly, Special Committee on Aging, I am announcing today that the subcommittee will conduct a hearing in Ann Arbor, Mich., on consumer aspects of the economics of aging at 1:30 p.m., June 9, at the Rackham Auditorium on the University of Michigan campus.

The hearing will continue the work begun by the full Committee on Aging on April 29-30, when the committee chairman, HARRISON A. WILLIAMS, conducted survey hearings on the economics of aging. Witnesses at that time discussed present inadequacies in our retirement income systems, likely future developments, and the prevalence of poverty among large numbers of older Americans. At Ann Arbor, the subcommittee will look into matters related to one basic question: What are the consumer needs of the elderly and the relationship of those needs to retirement income? We will explore such matters as: the Bureau of Labor Statistics "moderate budget" for retired couples, and other measures of consumer needs; gaps in information about consumer behavior of the elderly; effects of early retirement upon budgetary planning by the elderly; and information on consumer problems that may reduce buying power of the elderly.

The June 9 hearing will be conducted in conjunction with the University of

Michigan's 22d annual conference on aging. The theme for the conference this year is: "The Aging Consumer." I would like to extend the thanks of the subcommittee to Dr. Wilma Donahue, director of the institution of gerontology at the university, for her assistance and interest in coordinating the hearing with the events of the conference.

NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. DODD. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Lincoln C. Almond, of Rhode Island, to be U.S. attorney for the district of Rhode Island for the term of 4 years, vice Edward P. Gallogly.

David J. Cannon, of Wisconsin, to be U.S. attorney for the eastern district of Wisconsin for the term of 4 years, vice James B. Brennan, resigned.

Otis L. Packwood, of Montana, to be U.S. attorney for the district of Montana for the term of 4 years, vice H. Moody Brickett, resigning.

George E. Woods, Jr., of Michigan, to be U.S. attorney for the eastern district of Michigan for the term of 4 years, vice Lawrence Gubow, resigned.

Harold S. Fountain, of Alabama, to be U.S. marshal for the southern district of Alabama for the term of 4 years, vice George M. Stuart.

J. Pat Madrid, of Arizona, to be U.S. marshal for the district of Arizona for the term of 4 years, vice Roland S. Mosher.

John C. Meiszner, of Illinois, to be U.S. marshal for the northern district of Illinois for the term of 4 years, vice Joseph N. Tierney, resigned.

Gaetano A. Russo, Jr., of Connecticut, to be U.S. marshal for the district of Connecticut for the term of 4 years, vice Joseph T. Ploszaj.

George L. Tennyson, of South Dakota, to be U.S. marshal for the district of South Dakota for the term of 4 years, vice Leonard T. Heckathorn.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Friday, May 30, 1969, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

ELIGIBILITY REQUIREMENTS GOVERNING A GRANT OF ASSISTANCE IN ACQUIRING SPECIALLY ADAPTED HOUSING

Mr. SPARKMAN. Mr. President, I ask that the Chair lay before the Senate a message from the House on S. 408.

The PRESIDING OFFICER laid be-

fore the Senate the amendment of the House of Representatives to the bill (S. 408) to modify eligibility requirements governing the grant of assistance in acquiring specially adapted housing to include loss or loss of use of a lower extremity and other service-connected neurological or orthopedic disability which impairs locomotion to the extent that a wheelchair is regularly required, which was on page 2, after line 4, insert:

Sec. 2. Section 802 of title 38, United States Code, is amended by striking out "\$10,000" and inserting in lieu thereof "\$15,000".

Sec. 3. Section 1811(d) of title 38, United States Code, is amended (1) by striking out "\$17,500" each place where it appears therein and inserting in lieu thereof in each such place "\$25,000"; (2) by striking the second semicolon and all that follows in subsection (2) and inserting in lieu thereof a period; and (3) by striking out the semicolon where it appears in subsection (3) and all that follows and inserting a period.

Sec. 4. Section 1803(d)(3) of title 38, United States Code, be amended to read as follows:

"(3) Any real estate loan (other than for repairs, alterations, or improvements) shall be secured by a first lien on the realty. In determining whether a loan for the purchase or construction of a home is so secured, the Administrator may disregard a superior lien created by a duly recorded covenant running with the realty in favor of a private entity to secure an obligation to such entity for the homeowner's share of the costs of the management, operation, or maintenance of property, services or programs within and for the benefit of the development or community in which the veteran's realty is located, if he determines that the interests of the veteran borrower and of the Government will not be prejudiced by the operation of such covenant. In respect to any such superior lien to be created after the effective date of this amendment, the Administrator's determination must have been made prior to the recordation of the covenant. Any non-real-estate loan (other than for working or other capital, merchandise, goodwill, and other intangible assets) shall be secured by personalty to the extent legal and practicable."

And amend the title so as to read: "An act to liberalize the eligibility requirements governing the grant of assistance in acquiring specially adapted housing for certain service-connected disabled veterans, to increase the amount of such grant, to raise the limit on the amount of direct housing loans made by the Veterans' Administration, and for other purposes."

Mr. SPARKMAN. Mr. President, I move that the Senate concur in the amendments of the House to the bill, S. 408, with the following amendments: First, in the fourth line of the House amendments to the text of the bill strike out "\$15,000" and insert "\$12,500"; second, in the eighth line of the House amendments to the text of the bill strike out "\$25,000" and insert in lieu thereof "\$21,000."

Mr. President, for the information of the Senate, I have discussed this amendment to the House amendment to S. 408 with my colleague, the senior Senator from Utah (Mr. BENNETT). He is the ranking minority member of the Banking and Currency Committee and is also the ranking minority member of the Subcommittee on Veterans Legislation of the Finance Committee. The senior

Senator from Utah joins me in the amendment I am now offering to S. 408 as amended by the House.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama.

The motion was agreed to.

INVESTMENT COMPANY AMENDMENTS ACT OF 1969

The PRESIDING OFFICER. Pursuant to the previous order, the Chair now lays before the Senate S. 2224, which the clerk will state by title.

The ASSISTANT LEGISLATIVE CLERK. S. 2224, to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes.

Mr. SPARKMAN. Mr. President, S. 2224, the proposed Investment Company Amendments Act contains comprehensive amendments to the Investment Company Act of 1940, the Investment Advisers Act, the Securities Exchange Act, and the Securities Act of 1933. This proposed legislation also contains many provisions intended to update and modernize our Nation's securities laws so that they will be better suited for an ever-expanding investment company industry. It is the result of almost 3 years of extensive study, hearings, and review by the full Banking and Currency Committee. An additional 10 years of research and study has been spent on this topic by the Wharton School of the University of Pennsylvania and the Securities and Exchange Commission.

The only purpose of this legislation is to assure the 5 million Americans who have entrusted their savings to mutual funds and the many millions more who will do so in the future, adequate consumer protection. These consumers who comprise many of our small investors are the backbone of a healthy national economy.

S. 2224 has three primary objectives: First, it amends the sections of the Investment Company Act pertaining to investment company management fees, mutual fund sales commissions, and periodic payment plan sales commissions. Second, it amends various provisions of the securities laws to permit banks to operate commingled, managed agency accounts in competition with mutual funds. In this area, the bill would also clarify the status of bank collective funds and separate accounts established by insurance companies. Third, the bill contains a large number of amendments to the Federal securities laws, which would facilitate, update, and improve the administration and enforcement of these acts. These amendments have widespread support throughout the securities industry.

The function of a mutual fund is to pool the money of many different people into a single investment in securities, usually common stock. Mutual funds are, however, unique in their corporate organization. First, most funds are always ready to buy back their shares from in-

vestors. Therefore, they must continually promote the sale of new shares so that capital will be available. The second and most unique characteristic of a mutual fund, is its corporate organization which is far different from that of a typical industrial company, bank or insurance company. Mutual funds do practically none of their own work. Instead of hiring staffs of their own, they rely entirely on other people's employees.

MANAGEMENT FEES

A typical mutual fund is formed, controlled, and managed by a separate company called an investment adviser. The adviser's services are paid for by a fee which is calculated on a percentage of the fund's total assets. In the past the traditional fee has been one-half of 1 percent. Most fees still cluster around this figure although in recent years some have been reduced.

In 1940, at the time of the original Investment Company Act, most funds were relatively small in size and advisory fees did not present special problems. Presently, however, advisers manage funds whose assets amount to billions of dollars. The traditional fee of one-half of 1 percent charged on a fund with \$30 million in assets in 1940 amounted to \$150,000. Such charges were relatively modest and did not attract critical attention. Presently, however, due to the spectacular growth of mutual funds a similar fee on \$3 billion in assets would amount to an annual charge of \$15 million for each and every year. Obviously, elementary safeguards are necessary so that these fees may be objectively reviewed.

In its review of this subject matter, your committee has found that management fees are not fixed by normal price competition or by arms-length bargaining. The men who control the investment adviser also normally control the fund. Therefore, the relationships between mutual funds and their advisers are not the same as those that usually exist between buyers and sellers or in conventional corporations.

In 1940 it was impossible for Congress to foresee the explosive growth of the mutual fund industry—from assets of \$450 million to the industry's present size of over \$50 billion. Nor was it possible to foresee the increased compensation that mutual fund investment advisers would receive. The requirements written into the original act that advisory contracts be approved by shareholder vote, by unaffiliated directors, or both—intended to provide adequate shareholder protection—has had the opposite effect. Courts have held that because of these statutory requirements allegedly excessive management fees are subject to judicial review only under the test of "corporate waste" or when they shock the conscience of the court. This standard has been characterized by an eminent jurist as meaning that fees are subject to attack only when they are "excessively excessive."

Last year the Senate passed S. 3724 which contained a provision stating that management fees should be "reasonable." Jurisdiction was placed in the courts to determine what was a reasonable fee. This year S. 34 containing iden-

tical provisions was introduced. However, after hearings and further deliberations, your committee unanimously decided that there was an adequate basis to delete the express statutory requirement of reasonableness and to substitute a different method of testing management compensation. Under this proposed legislation, a mutual fund investment adviser has a specific fiduciary duty in respect to management fee compensation. This is in accordance with the belief, supported by the mutual fund industry, that the investment adviser should be a fiduciary in its relationship with the fund in the handling of assets and investments. Jurisdiction in enforcing this standard is placed in the courts who have traditionally judged fiduciary duties in similar type relationships.

Clearly this type of determination can only be made by the courts on the concrete facts of a particular case. Either the Securities and Exchange Commission or any mutual fund shareholder may sue in order to have a determination made as to whether the investment adviser has fulfilled his fiduciary duty to the mutual fund shareholders in determining the fee. As in any other lawsuit, the plaintiff would have the burden of proving to the satisfaction of the court that the defendant has committed a breach of fiduciary duty.

This legislation is not intended to replace the judgment of corporate directors with that of the courts. Under this section, courts are instructed to consider the approval given by the directors of the fund to the compensation paid and their approval shall be given such consideration as the court deems appropriate under all the circumstances. Among other things the court might wish to evaluate whether the deliberations of the directors were a matter of substance or a mere formality. However, such consideration would not be controlling in determining whether or not the fee encompassed a breach of fiduciary duty.

In my opinion, this section provides a reasonable solution to the management fee problem which has confronted Congress and your committee over the last 3 years. I am indeed grateful for the support given to this section by the senior Senator from Utah (Mr. BENNETT), the ranking minority member of the committee, and the Investment Company Institute.

SALES COMMISSIONS

In addition to management fees, the sales commissions paid by investors purchasing mutual fund shares are of great concern. The man who invests \$10,000 in a mutual fund usually pays a sales commission of 9.3 percent of the total amount invested. This amount is far greater than the sales charges prevailing in other areas of the securities industry. For example, the normal stock exchange commission is approximately 1 percent. Over-the-counter securities transactions executed on an agency basis are the same as stock exchange commissions. When the dealer acts as principal, the commission is usually between 2 percent and 3 percent, and is limited to not more than 5 percent by the self-regulatory rules of the National Association of Securities Dealers. Nowhere else in the securities

business are sales charges as high as for mutual funds.

In addition, mutual fund sales charges are protected by section 22(d) of the Investment Company Act. This section provides for a unique scheme of retail price maintenance whereby all dealers are prohibited by law from cutting the sales charge fixed by the mutual fund underwriter. Price cutting of mutual fund shares is a Federal crime.

Partially because of this section, and because of the way in which mutual fund shares are sold, competition has tended to operate in reverse—raising prices rather than lowering them. This has occurred because mutual fund shares are not sold on a competitive basis as are ordinary securities. In contrast, each fund competes for the favor of dealers and salesmen by offering higher sales compensation.

In some segments of the securities industry the protection of investors against excessive sales charges has been left to industry self-regulation subject to appropriate Government oversight. For example, brokerage commissions in the over-the-counter market are governed in this manner. A similar approach is recommended for mutual fund sales commissions by permitting the National Association of Securities Dealers to adopt rules prohibiting excessive sales charges.

The NASD has expressed the willingness to accept this function and to subject itself to the same type of SEC review as is provided in section 15A(k) (2) of the Securities Exchange Act. I am confident that the NASD and the SEC will work together to arrive at a result which is fair and reasonable both to the sellers of mutual fund shares and to the investing public.

FRONT-END LOAD

Many investors of relatively modest means purchase mutual funds shares by investing small amounts of money at monthly intervals. These investors pay the same sales commission as purchasers of ordinary mutual funds except for one significant factor—the "front-end load" method of collecting the sales charge.

The essential characteristic of the front-end load is that half of the investor's first year's payments are deducted for sales commissions. Obviously, this type of arrangement is detrimental to the investor, particularly if he discontinues his payments at an early date. Unless the stock market rises rapidly, he is almost certain to lose money.

These plans are sold mostly to lower and middle income families, who have the most to lose if they discontinue their payments. They are usually sold on a door-to-door basis, with potential purchasers being solicited in their homes and offices. While the front-end load is fully disclosed in the prospectus, studies have shown that most investors are still unaware of this feature.

If an investor is to make money he must be able to forecast his ability to continue making payments over a period of several years. Few small investors have been able to achieve this result. Over half of all contractual plan purchasers have failed to complete their payments on schedule.

The original legislation recommended

by the Securities and Exchange Commission would have abolished front-end load sales charges. This bill does not follow that recommendation. Instead, your committee recommends two alternative plans. The first would limit the amount that could be deducted for sales charges during any one of the first 3 years of the plan to 20 percent of the investors' payments. The second would permit the current front-end load sales charge, but would provide that if an investor for any reason whatsoever elects to redeem his underlying shares during the first 3 years of the plan, he is entitled to receive a refund of the full value of his current account including all sales charges exceeding 15 percent of the total payments made under the plan.

These provisions, in addition to alleviating the burdens placed on the consumer by the front-end load, will also provide a monetary incentive for salesmen to encourage increased investor persistence in completing their plans. The present system under which the salesman automatically receives most of his commissions during the first year of the plan has unfortunately failed to provide such results.

This section is of the utmost necessity if we are to provide adequate consumer protection. The front-end load is found only in installment plans sold to people who have little accumulated capital reserves. These are the people whom this bill is intended to protect. Present law which permits the deduction of half of the investor's money for sales charges, unfortunately does not afford such protection.

BANKS AND INSURANCE COMPANIES

This bill deals with another major concern of Congress—the need to clarify the status of bank administered collective investment funds under the Federal securities laws and the various banking statutes. These proposals are intended to clarify the numerous statutes governing this area and will also assure equal treatment for similar collective investments offered by insurance companies.

In recent years, banks and insurance companies have entered the mutual fund field by pooling the individually limited resources of large numbers of investors into collective investment funds and separate accounts. Recent developments have, however, raised difficult questions under existing Federal securities laws. One Federal district court has held that banks are precluded from operating managed agency accounts. The uncertainty caused by this decision, which is currently being appealed, has unduly impeded banks from competing with mutual funds on an equal footing. This bill would remove that unwarranted comparative disparity. Savings and loan associations would also be permitted to operate managed agency accounts if they received the permission of the Federal Home Loan Bank Board and are registered under all applicable acts with the Securities and Exchange Commission.

The bill also exempts bank collective trust funds and insurance company separate accounts for corporate pension plans from all but the fraud provisions of the Federal Securities Acts—an approach

which the SEC has in the past taken through administrative action. Provisions are also contained which exempt bank collective funds and insurance company separate accounts—Smathers-Keogh H.R. 10 plans—from the Investment Company Act, but not from the disclosure provisions of the securities laws.

The entry of banks into the mutual fund field and the increased activity of insurance companies will provide the American investing public with a wide choice among different equity investments. This increased competition for investor favor is an important step toward insuring healthy and viable securities markets.

In conclusion, this proposed legislation is a moderate measure intended to deal with the serious problems which have arisen in the investment company industry over the last 28 years. It is built on the traditional practices of existing securities laws. It embodies a program of governmental regulation which is the bare minimum needed to provide adequate consumer protection and to update the Investment Company Act to the needs of today's economy.

I may add that copies of this year's hearings and report are on the desks of Senators. This bill follows very closely the one which was passed by a voice vote by the Senate last year. This year it was unanimously reported out of the Banking and Currency Committee unanimously. I believe, and I certainly hope, that the Senate will give favorable consideration to this legislation.

Mr. MCINTYRE. Mr. President, the bill which the committee has reported to amend the Investment Company Act of 1940, and for other purposes, represents, in my opinion, a very commendable effort by the Banking and Currency Committee to arrive at a fair compromise—fair to the investing public and to the mutual fund industry. It deserves the support of the full Senate.

This bill represents a decade of studies carried out by the committee and the Securities and Exchange Commission. I think that particular credit for its present form should be given to our chairman, the Senator from Alabama, and the ranking minority member, the Senator from Utah, for their essential leadership toward the compromise now before us. I would also like to single out for special mention the former Chairman of the SEC, Hon. Manuel Cohen, for his determined effort to support this legislation, and his successor, Chairman Budge, who has carried on the task of insuring that American investors receive the full protection of their Government from possible abuse.

I think that it is also appropriate to point out, Mr. President, that the mutual fund industry itself, while somewhat slow to cooperate at the beginning of the committee's study of this legislation, has performed a very useful role in the development of the final form of the present bill. Thus the industry has performed service for the Congress, much in line with its professional practice of performing services for small investors.

Over 5 million Americans now own shares of mutual funds. The dramatic

growth of the industry in the last 30 years from about \$500 million in assets in 1940 to over \$50 billion today demonstrates how the industry has served important investor needs. As the SEC has stated:

By offering the American public a medium for professionally managed investment securities, primarily the stocks of America's leading companies, the investment company industry, and specifically mutual funds, fulfill an important public need.

To the small investor, mutual funds have traditionally provided a method through which the judgment and skill of highly trained managers are made available to place him on a parity with sophisticated stock market professionals. The results achieved by mutual funds for their shareholders show the effect of this approach. For the 10-year period ending December 31, 1968, mutual funds stressing maximum capital growth show an increase of values of 270 percent, while the most conservative balanced funds show gains of 110 percent. These results have, in recent years, caused institutions such as college endowments to become important mutual fund investors.

In light of these facts, the provisions of this bill should not be taken as any criticism of the job that mutual funds have done for their shareholders over the years. In fact, the development and growth of the mutual fund industry may be taken as another example of the unique vitality of the American economic system. Although the ancestors of mutual funds were born in Europe during the last century, its development and growth has been uniquely American. The domestic success of the industry has been such that there have been increasing sales of American mutual fund shares abroad in recent years and, as a result, the industry now makes a significant contribution to rectifying our balance-of-payments problem.

The chairman has discussed the major points of this bill in some detail. I would like to comment very briefly on a few of those points.

I was delighted that the committee finally found a way out of the tangle on management fees which had given us so much trouble last year. I might point out, for the RECORD, that I initially suggested the use of a fiduciary standard for testing management fees in the closing minutes of our last public hearing, a suggestion which led to a series of industry-SEC meetings and ultimately to the language of the bill now before us.

I am hopeful that this provision will serve as a strong encouragement to mutual fund managers to pass on to their shareholders the benefits attained through applications of economy of scale. As funds grow in size, the economic benefits which are realized through that growth belong to the fund shareholders.

It is encouraging to realize that there are today, without this legislation, so many mutual funds which do, in fact, pass on these benefits of increased size to their shareholders.

On another matter, the committee decided to leave the regulation of sales loads to an industry self-regulating body. I accept the committee's decision, al-

though I would have preferred to see such regulation achieved by competitive forces operating in a free market, a situation which would result from the repeal of section 22(d) of the Investment Company Act. Surely, if the NASD does not move promptly and effectively to bring about a reduction in sales loads, the Congress should consider the repeal of section 22(d). It is encouraging to note that the committee has requested the SEC to report back on the effects of repeal of 22(d).

The committee acted wisely, as it did last year also, in modifying the exclusion from the Act's protections for investors for oil and gas mutual funds. This matter has been before the committee for some time, going back to 1966, and the case has been clearly made for granting protection to investors in these types of mutual funds.

During the executive session of the committee, a number of amendments were brought up at the last minute for committee consideration. The committee decided that those amendments which contained matter which had not been previously studied, and with which members were not familiar should be deferred. I believe that three such amendments, technical in nature, would be desirable. They are recommended by the SEC and the Investment Company Institute. In order to give advance notice that I will be offering them, I will now submit for the RECORD technical memorandum explaining their purpose. Mr. President, I ask unanimous consent that three technical statements be inserted in the RECORD at this point.

There being no objection, the technical statements will be printed in the RECORD, as follows:

TECHNICAL STATEMENT IN SUPPORT OF A PROPOSED AMENDMENT TO SECTION 22(c) OF THE INVESTMENT COMPANY ACT OF 1940 CLARIFYING THE COMMISSION'S AUTHORITY TO REGULATE THE PRICING OF INVESTMENT COMPANY SHARES FOR THE PURPOSE OF SALE, REPURCHASE, AND REDEMPTION

Section 22(a) of the Investment Company Act authorizes a securities association registered under Section 15A of the Securities Exchange Act of 1934 (i.e., the National Association of Securities Dealers, Inc. ("NASD")), to make rules respecting the method for pricing of mutual fund shares for sales, redemptions, and repurchases for the purposes of "eliminating or reducing so far as reasonably practical any dilution of the value of such purchase, redemption, or sale which is unfair to holders of such other outstanding securities. . . ."

Section 22(c) of the Act authorizes the Commission to make rules and regulations, applicable to both members and nonmembers of the NASD, covering the same subject matter and for the accomplishment of the same ends prescribed in Section 22(a). Section 22(c) further provides that any rules and regulations made by the Commission supersede any NASD rules made on the same subject matter.¹

Section 22(c) provides that the Commission's rules shall be applicable to "principle underwriters of and dealers in, the redeemable securities of any registered investment company. . . ." The section does not specifically state that such rules shall be applicable

to the registered investment company. Because of this wording, it has been suggested that the Commission's rule-making power with respect to pricing of mutual fund shares does not extend to the registered investment company itself.²

The Commission believes that the rule-making power given in Section 22(c), together with the general rule-making power given in Section 38(a), clearly extends to registered investment companies. Indeed, to interpret the section otherwise would allow mutual funds to fix the times as of when net asset value of their shares are to be computed in circumvention of the Commission's regulation of underwriters' and dealers' time of pricing of the same shares. For example, in some cases Commission rules would apply to the timing of the calculation of net asset value of shares for sale and repurchase by dealers and underwriters, and a different time might be used for calculation of net asset value for redemptions of shares of the same company,³ subverting one of the main purposes of the section.⁴

Argument on this question would be obviated if the Act were more explicit. Therefore, the Commission recommends that Section 22(c) be amended to insert the phrase "to registered investment companies and" after the phrase "the Commission may make such rules and regulations applicable" in the Section.

TECHNICAL STATEMENT IN SUPPORT OF PROPOSED AMENDMENTS TO SECTION 8(b)(2) AND 13(a)(3) OF THE INVESTMENT COMPANY ACT OF 1940 CLARIFYING WHICH INVESTMENT POLICIES MAY NOT BE DEVIATED FROM WITHOUT PRIOR SHAREHOLDER APPROVAL

Section 8(b)(1) of the Investment Company Act of 1940 ("Act") requires that every registered investment company, in its registration statement filed under the Act, specifically recite its policy with respect to certain investments and other enumerated activities. Section 8(b)(2) requires a recital in the registration statement of policies "in respect of matters, not enumerated in paragraph (1), which the registrant deems matters of fundamental policy and elects to treat as such."

Section 13 prohibits a registered investment company from deviating from the policies enumerated in Section 8(b)(1) or from any policy which it has elected to treat as "fundamental" pursuant to Section 8(b)(2) without prior shareholder approval.

The Commission believes that "fundamental", as therein used, is simply a term which describes any investment policy which an investment company elects to make changeable only if authorized by shareholder vote, whether or not an investment company labels such a policy "fundamental".

² In most cases sales and repurchases are handled through a dealer and underwriter, but redemptions are normally handled directly by the fund. Also, many no-load funds sell and redeem shares without using a separate underwriter or dealer.

³ Many mutual funds designate underwriters and dealers around the country as their agents for "voluntary repurchase" of their shares. This enables share holders to shorten the period otherwise required to transmit the actual stock certificates to the fund for statutory "redemption."

⁴ Section 1(b) of the Act requires the Commission to interpret the Act to mitigate and, so far as is feasible, to eliminate the conditions enumerated in the section which adversely affect the national public interest and the interest of investors. Section 1(b)(5) of the Act states that the national public interest and the interest of investors are adversely affected when investment companies in computing the asset value of their securities, employ unsound or misleading methods.

However, it has been argued that Section 13 is not violated when an investment company changes an investment policy without a required prior shareholder approval, unless that policy has been labelled "fundamental". In other words, it was argued that requiring prior shareholder approval for a change in investment policy does not make it "fundamental".

In *Green v. Brown*, 276 F. Supp. 753 (1967), the District court accepted this so-called "plain meaning" approach despite its "curious result". In a Brief, filed *Amicus Curiae* with the Court of Appeals, the Commission took the position that the term "fundamental" was simply a term which describes any investment policy which an investment company elects to make changeable only if authorized by shareholder vote. That Court, in *Green v. Brown*, 398 F.2d 1006 (C.A. 2, 1968) remanded the case to the District Court with instructions to reconsider the matter with the benefit of the Commission's Brief.

Therefore, while the Commission believes that it has the authority to effect a clarification by rule,¹ to obviate further misunderstanding, it recommends that Sections 8 and 13, be amended to make it clear that deviation from an investment policy which is changeable only by shareholder vote constitutes a violation of Section 13. The amendment would also allow investment companies the opportunity to afford shareholders similar protection from deviation with respect to any other policy. Thus the amended sections would read as follows:

"Sec. 8. . . ."

(b) Every registered investment company shall file with the Commission, within such reasonable time after registration as the Commission shall fix by rules and regulations, an original and such copies of a registration statement, in such form and containing such of the following information and documents as the Commission shall by rules and regulations prescribe as necessary or appropriate in the public interest or for the protection of investors:

"(2) [a recital of the policy of the registrant in respect of matters, not enumerated in paragraph (1), which the registrant deems matters of fundamental policy and elects to treat as such;] a recital of all investment policies of the registrant, not enumerated in paragraph (1), which are changeable only if authorized by shareholder vote;

"(3) a recital of all policies of the registrant, not enumerated in Paragraphs (1) and (2), in respect of matters which the registrant deems matters of fundamental policy;

"[(3)] (4) (Present Paragraph (3) renumbered (4)).

"[(4)] (5) (Present Paragraph (4) renumbered (5)).

SEC. 13. (a) No registered investment company shall, unless authorized by the vote of a majority of its outstanding voting securities—

"(3) deviate from its policy in respect of concentration of investments in any particular industry or group of industries as recited in its registration statement, [or deviate from any fundamental policy recited in its registration statement pursuant to Section 8(b)(2); or] deviate from any investment policy which is changeable only if authorized by shareholder vote, or deviate from any policy recited in its registration statement pursuant to Section 8(b)(3);

¹ In Investment Company Act Release No. 5565 (Securities Act Release No. 4939) the Commission proposed revisions of its instructions to Form N-8B-1 (and Form N-5) to effect this clarification.

¹ Rule 22c-1, adopted October 16, 1968, effective January 13, 1969 superseded NASD Rules 26(e) and 26(h).

TECHNICAL STATEMENT IN SUPPORT OF PROPOSED AMENDMENT TO SECTION 24 OF THE INVESTMENT COMPANY ACT OF 1940 TO ADD A NEW SUBSECTION (f) TO PERMIT RETROACTIVE REGISTRATION OF INVESTMENT COMPANIES SECURITIES

Occasionally, due to inadvertence, a registered investment company making a continuous offering of its securities, sells more shares than are covered by its registration statement under the Securities Act of 1933. Although the number of shares sold in excess of those registered are not registered under the Act, in practical effect no investor is harmed if each offeree or purchaser is given a current prospectus. However, the inadvertence may result in a violation of Section 5 of the Securities Act and any person who can show that his shares were not actually registered might be entitled to the rescission rights given by Section 12 of the Securities Act.

This suggested Section would permit the Commission to adopt rules allowing retroactive registration of securities sold in excess of the number of securities included in an effective registration statement upon payment of three times the normal registration fee for such shares. The Section also permits the Commission additional flexibility, if it so desires, to adopt rules to permit certain types of investment companies to register an indefinite number of shares.

The text of the proposed amendment follows:

"Section 24 of the Investment Company Act of 1940 is amended by adding a new Subsection (f) to read as follows:

"(f) In the case of securities issued by a face-amount certificate company or redeemable securities issued by an open-end management company or unit investment trust, which are sold in an amount in excess of the number of securities included in an effective registration statement of any such company, such company may, in accordance with such rules and regulations as the Commission shall adopt as it deems necessary or appropriate in the public interest or for the protection of investors, elect to have the registration of such securities deemed effective as of the time of their sale, upon payment to the Commission, within six months after any such sale, of a registration fee of three times the amount of the fee which would have otherwise been applicable to such securities. Upon any such election and payment, the registration statement of such company shall be considered to have been in effect with respect to such shares. The Commission may also adopt rules and regulations as it deems necessary or appropriate in the public interest or for the protection of investors to permit the registration of an indefinite number of the securities issued by a face-amount certificate company or redeemable securities issued by an open-end management company or unit investment trust."

Mr. MCINTYRE. In conclusion, Mr. President, I would like to think that all of the controversy which surrounded this legislation 3 years ago has vanished in the general agreement of all parties affected that this bill is highly desirable. It was 29 years ago that the Investment Company Act was enacted. It would be nice to think that, after the enactment of this bill, another 29 years may pass before additional mutual fund legislation will be thought necessary.

Mr. INOUE. Mr. President, the leadership wishes to announce that further consideration of the bill, S. 2224, will be had on Monday, May 26.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2232—INTRODUCTION OF A BILL TO AMEND THE ALASKA STATEHOOD ACT

Mr. INOUE. Mr. President, in behalf of the Senator from Alaska (Mr. GRAVEL) I introduce a bill to amend the Alaska Statehood Act, Public Law 85-508, and ask unanimous consent that it be referred to the Committee on Interior and Insular Affairs.

The PRESIDING OFFICER. Without objection, the bill will be received and referred as requested.

The bill (S. 2232) to amend the Alaskan Statehood Act, Public Law 85-508, July 7, 1958, 72 Stat. 339, by repealing the exclusive jurisdiction of the Federal Maritime Board over common carriers engaged in transportation by water between any port in the State of Alaska and other ports in the United States, introduced by Mr. INOUE (for Mr. GRAVEL), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs, by unanimous consent.

Mr. INOUE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HART. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL CENTER ON EDUCATIONAL MEDIA AND MATERIALS FOR THE HANDICAPPED

Mr. INOUE. Mr. President, I ask unanimous consent that the unfinished business be temporarily set aside, and that the Senate proceed to the consideration of Calendar No. 185, S. 1611.

The PRESIDING OFFICER. The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. Calendar No. 185, S. 1611, a bill to amend Public Law 85-905 to provide for a National Center on Educational Media and Materials for the Handicapped, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Hawaii?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Public Welfare with amendments, on page 2, line 16, after the word "and" strike out "nonprofit"; in line 17, after the word "agencies" insert "and organizations"; and on page 4, at the beginning of line 18, strike out "and inserting after "1970" the following: \$12,500,000 for the fiscal year ending June 30, 1971, \$15,000,000 for the fiscal year ending June 30, 1972, and \$20,000,000 for the fiscal year ending June 30,

1973"; and insert "and by striking out "1970" and all that follows and inserting in lieu thereof the following: "1970, \$12,500,000 for the fiscal year ending June 30, 1971, \$15,000,000 for the fiscal year ending June 30, 1972, and \$20,000,000 for the fiscal year ending June 30, 1973, and for each succeeding fiscal year.""; so as to make the bill read:

S. 1611

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of September 2, 1958 (Public Law 85-905) is amended—

(1) in section 3, by adding at the end thereof the following new subsection:

"(c) (1) The Secretary is authorized to enter into an agreement with an institution of higher education located in the National Capital area for the establishment and operation (including construction) of a National Center on Educational Media and Materials for the Handicapped, which will provide a comprehensive program of activities to facilitate the use of new educational technology in education programs for handicapped persons, including designing and developing, and adapting instructional materials, and such other activities consistent with the purposes of this Act as the Secretary may prescribe in the agreement. Such agreement shall—

"(A) provide that Federal funds paid to the Center will be used solely for such purposes as are set forth in the agreement;

"(B) authorize the Center, subject to the Secretary's prior approval, to contract with public and private agencies and organizations for demonstration projects;

"(C) provide for an annual report on the activities of the Center which will be transmitted to the Congress;

"(D) provide that any laborer or mechanic employed by any contractor or subcontractor in performance of work on any construction aided by Federal funds under this subsection will be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. 276a-276a-5); and the Secretary of Labor shall have, with respect to the labor standards specified in this clause, the authority and functions set forth in Reorganization Plan Numbered 15 of 1950 (15 F.R. 3176; 5 U.S.C. 1332-15) and section 2 of the Act of June 13, 1934 (40 U.S.C. 276c).

"(2) In considering proposals from institutions of higher education to enter into an agreement under this subsection, the Secretary shall give preference to institutions—

"(A) which have demonstrated the capabilities necessary for the development and evaluation of educational media for the handicapped; and

"(B) which can serve the educational technology needs of the Model High School for the Deaf (established under Public Law 89-694).

"(3) If within twenty years after the completion of any construction (except minor remodeling or alteration) for which such funds have been paid—

"(A) the facility ceases to be used for the purposes for which it was constructed or the agreement is terminated, unless the Secretary determines that there is good cause for releasing the institution from its obligation, or

"(B) the institution ceases to be the owner of the facility, the United States shall be entitled to recover from the applicant or other owner of the facility an amount which bears to the then value of the facility the same ratio as the amount of such Federal funds bore to the cost of the facility financed with the aid of such funds. Such value shall be determined by agreement of the parties or

by action brought in the United States district court for the district in which the facility is situated."

(2) in section 2, by adding at the end thereof the following:

"(5) The term 'construction' means the construction and initial equipment of new buildings, including architect's fees, but excluding the acquisition of land."

and
(3) in section 4, by striking out "and" after "1969," and by striking out "1970" and all that follows and inserting in lieu thereof the following: "1970, \$12,500,000 for the fiscal year ending June 30, 1971, \$15,000,000 for the fiscal year ending June 30, 1972, and \$20,000,000 for the fiscal year ending June 30, 1973, and for each succeeding fiscal year."

Mr. PELL. Mr. President, the Congress has, through its past actions, made it public policy to foster education for handicapped children. Their teaching and training has been the concern of the Federal Government for about 10 years. The Government has been most involved in training teachers in the specialized skills needed to work with the handicapped. However, it is estimated that we still need more than 300,000 teachers, speech pathologists, audiologists, and other specialists in these areas. At the present time there are only about 75,000 teachers presently available to the five million children in need of special education services, and sadly enough, it is estimated that only 40 percent of those children receive some degree of special education.

With this in mind, the Congress has recognized that while not filling the void created by the lack of teachers, technological advances could be utilized as an aid to teaching handicapped children. The captioned films for the deaf act, first legislated in 1958, was our first effort to apply technology to this area.

In truth, it can be said that the results of the programs under that act are more successful than had been thought attainable. The experience gained under this act led subsequent Congresses to broaden the scope of the captioned films for the deaf program to include other types of handicapped children.

The Bureau of Education for the Handicapped of the Department of Health, Education, and Welfare has very ably carried out its role in administering the components of the Federal programs of aid to the handicapped. Its regional media centers for the deaf, instructional material centers, the Education Research Information Center project, and distribution work of captioned films, among other programs, all bring the software within the reach of those working with handicapped children.

However, there is no single center combining all facets of this effort, that is, the development, testing, and actual use of this type of material. It was with this void in mind that I introduced S. 1611, to amend Public Law 85-905 to provide for a National Center on Educational Media and Materials for the Handicapped. The center is viewed as not only a source of production of materials but also as a disseminator of the useful work done by others in this area. It would have an important function of coordination and study of existing programs in the field of media for the edu-

cation of handicapped children. It is the type of function which could be called a capstone to the many Federal and private efforts in this area.

Two specific questions have very rightly been raised about this legislation. The first is the placement of the center in the National Capital area. It was the judgment of the committee that in order to fully coordinate its activities with those of the Federal Government, the private groups interested in the education of the handicapped and the Model High School for the Deaf at Gallaudet College, placement of the National Media Center, in or near the city of Washington was necessary.

The second question concerned the need for construction of a separate building. Evidence and onsite inspection indicate that it is absolutely necessary that a separate building be specifically designed for this type of work. Efforts of the Bureau of Education for the Handicapped to set up regional media centers has found this type of function being placed in abandoned churches, leaky, and other unsuitable structures. When one considers that this media center will be making and developing films and other audiovisual materials the need for special wiring alone indicates a specially designed building. When one considers the storage space and weight of material to be stored, again the specialty of the building is indicated. And finally, when one considers that this material is being designed for handicapped children who require special physical structure, a specific building is indicated.

Recognizing the needs for a specially designed building, the committee has expressed its view that construction not be commenced before July 1, 1971. All other needed activities preparatory to construction may be carried on; indeed, it is expected that the special designing problems will call for this passage of time.

Mr. President, I strongly urge the Senate to support S. 1611. The handicapped children of our Nation will be the ultimate recipients of new instructional material as a result of a small expenditure of funds, one which we can ill afford to defer.

Mr. DOMINICK. Mr. President, I was happy to support the bill in committee. There are two things that I wish to report for the Record that we had added to it.

First, I think the Senator from Rhode Island (Mr. PELL), in reporting this bill, has done a very fine job, and I should like to be a cosponsor of the bill, as I stated in committee.

Mr. PELL. I request that the Senator's name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, the name of the Senator from Colorado will be added as a cosponsor of the bill.

Mr. DOMINICK. Second, at my request in committee, we agreed to put a provision in the report which said the committee did not expect that construction of new facilities, if any, would be started before July of 1971. I thought that was our understanding and it seemed to me that this was important, because the Secretary of Health, Educa-

tion, and Welfare is going to need to do a certain amount of planning and review what institutions of higher education may already have available. I did not want to bind us solely into a position for a new building authorization, and then find ourselves unable to obtain the appropriation of any money for it. We would not get any center, and it would look as though this proposal had died on its feet.

When the majority report was made we were unable to reach agreement on the wording which states, as shown on page 5 of the report: "The committee found that construction of a specially designed facility was absolutely necessary if the Center were to produce films" and so forth.

So we wrote individual views, which were signed by myself, the Senator from Vermont (Mr. PROUTY), and the Senator from California (Mr. MURPHY), in which we are not finding fault with the bill at all, but simply saying, "Give us a little more flexibility; we may find within the next year that we do need a new center, but we may also find within the next year that there are existing institutions or facilities that can be modified at a far cheaper price, which would do the same job."

The point I want to make is that the individual views are not intended, as such, to oppose the bill, but are intended to show that we do not want to find the President, the administration, and Congress put to the necessity of building something, when we may be able to do the job with existing facilities, suitably modified, at a far cheaper cost.

I again congratulate the Senator from Rhode Island for bringing up the matter.

Mr. PELL. Mr. President, in connection with the point the Senator from Colorado makes, he is quite correct in that there was discussion in the committee about whether we should proceed with the building of a facility.

The Senator made the very important suggestion, which was agreed to, that we include in the report a strong recommendation and state that no construction under any circumstances should be started prior to July 1, 1971.

However, when it came to the question of whether the building should be built, this was a problem that we faced up to in the committee.

We had expert testimony from Dr. Frank B. Withrow, who is the director of the Division of Educational Services, Bureau of Education for the Handicapped, Office of Education, who answered the question about the need for construction authority, as follows:

Dr. Withrow said:

Yes, in the construction of a center such as indicated in the language of the bill new construction would be required for production facilities. We have in some of our other centers attempted to modify buildings for production facilities, for film and television studios. For instance, in one center we did develop a film studio and such sounds as ladies' hard heels on the floor above came through on the soundtrack of the films.

Therefore, in our experience at least, developing a sound studio, it is almost essential that you design it from the beginning and build it from the ground up. In addi-

tion to this we would envision this center storing most of the materials that are developed in prototypical form from other centers. To do this requires humidity and temperature control for storage of original filmed material in very special rooms designed for such storage.

While I fully appreciate the concern of the Senator from Colorado, I think the RECORD should clearly show that the passage of the bill fully authorizes the construction of such a center.

Mr. DOMINICK. Mr. President, I completely agree with the latter statement. This bill authorizes, but does not require, the construction of new buildings. I am merely trying to preserve flexibility. That is what I wanted to be sure we had well understood in the process of this colloquy.

Construction was mentioned by the Bureau of the Budget in its report of May 2, 1969, which stated:

Whether additional construction authority is needed and should be sought requires further consideration in the context of budgetary needs and priorities for fiscal year 1971.

Accordingly, the Bureau of the Budget recommends against the enactment of S. 1611 at this time.

Dr. Gallagher, Associate Commissioner of Education, for the Bureau of Education for the Handicapped, came up and testified in favor of the bill right until the end of his statement, at which point he almost reversed himself.

He said—and it appears in our individual views:

We plan to consider the question of establishing such a center in preparing our fiscal year 1971 legislative and budget requests.

However, we have been assured by legal counsel and others reviewing S. 1611 that we already have legislative authority for most of the steps called for in the bill. Only construction authority is lacking, we see no need to seek additional legislation for this purpose until we decide whether to propose new facilities.

If budgetary priorities permit inclusion of the center in the 1971 budget, and we decide that additional construction authority is needed, we would return to the Congress to seek that authority.

In the meantime, we do have to face the realities of a stringent budget which requires hard choices in the light of other national priorities and needs.

Therefore, we are unable to recommend approval of S. 1611 at this time, although we support its objective of extending additional educational opportunities for handicapped children.

He testified in favor of the bill in one minute, and then said in the next minute that he could not recommend it. I do not think that is very helpful testimony, to be perfectly frank, whether it is from Dr. Gallagher or anyone else.

I am happy to be a cosponsor of the bill. However, I want to make sure that the Senator and I are agreed that the question of whether we will modify existing facilities of an institution of higher education or construct new facilities must be determined at a later date after further investigation and inquiry has been made and after we look at our budgetary requirements.

Mr. PELL. Mr. President, I think it should be noted that, while the Senator is completely correct, Dr. Gallagher was

talking about two different thoughts in his testimony and they were completely divergent. However, in the exchange of views, Dr. Gallagher said that there was no disagreement in substance on going ahead. The question is on timing and having the money. That is where the difference is.

I think we should understand that in the passage of the bill—and I am sure the Senator does understand—the bill is being passed and authorizes the construction of such a center with the proviso that such construction must not start prior to July 1, 1971, and if there is any later change viewed in this regard, it can be done. We cannot pin down the administration 1 or 2 years from now. However, I would not want the RECORD to show that we have changed the wording of the bill on the floor.

Mr. DOMINICK. I understand that. We are not trying to change anything. I just want to make sure that we are leaving some flexibility in the bill.

The PRESIDING OFFICER. Without objection, the committee amendments are considered and agreed to en bloc.

Mr. HUGHES. Mr. President, the bill S. 1611, that we are considering today provides for a National Center on Educational Media and Materials for the Handicapped. It is an amendment and an extension to the captioned films for the deaf program, Public Law 85-905, which for over 10 years has been an outstanding success in improving and enriching educational programs for deaf youngsters.

The use of educational media and materials for handicapped children is especially important. First, because there are now only 80,000 teachers, speech and hearing specialists, and other experts necessary for working in the schools with handicapped children. We should have available more than 300,000 such personnel. Second, because we currently face a situation where less than 40 percent of the Nation's handicapped children, the retarded, the deaf, the blind, the emotionally disturbed, et cetera, have been receiving an appropriate response from our schools. Of the more than 5½ million children who need special education services if they are to be able to prosper and survive in the school system, only 2 million are currently receiving this specialized help.

We must look for new ways to provide handicapped children with these unique educational experiences that they require. It is my feeling and that of my colleagues on the Labor and Public Welfare Committee that specialized efforts to develop appropriate educational media and materials will be an enormous aid in extension of services to handicapped children.

S. 1611 proposes that a national center be developed in the Washington, D.C., area. It authorizes the establishment and operation, including construction, of such a center. It specifies however, that the applicant institution must be able to provide the land for the construction of a free standing, identifiable facility and for subsequent expansions of that plant. The national center will provide a comprehensive program of activities to facilitate the use of new educational technology in

education programs for handicapped persons. This will include designing, developing and adapting instructional materials, field testing of such materials, and ultimately their dissemination, and the dissemination of information about them. For this center and for the continued growth of the program, the bill increases the authorization of the Captioned Films Act from \$10 million to \$12.5 million in fiscal year 1971; and to \$15 million for fiscal year 1972, and to \$20 million for the fiscal year 1973 and succeeding years.

Expertise in the specially designed educational programs for the handicapped is only slowly being developed, and the emerging area of educational technology is following a very similar course.

Very few persons, whether educators or specialists in instructional media, have such firsthand, practical experience. At the present time, there is a great need to consolidate the resources which are available, to pool the existing knowledge, to bring together the best minds now working in these fields and to provide an environment where rapid growth in educational technology for the handicapped may take place.

I ask unanimous consent that a statement by Senator YARBOROUGH be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR YARBOROUGH

Mr. President, I support S. 1611, a bill to create a National Center on Educational Media and Materials for the Handicapped. In my years in the Senate, I have participated in the development of many pieces of legislation and none have given me more satisfaction than the efforts we have made in the last few years to provide additional educational opportunities for handicapped children.

A little over two years ago, we created and established a Bureau of Education for the Handicapped, in the Office of Education, which by the law creating it, was given the duty of operating all of the programs that then existed and that since have been developed for educating handicapped children. You will remember that we had to do this task over some determined resistance. That is usually the case with regard to programs for handicapped children. As long as people think in terms of the greatest good for the greatest number, and do not recognize that a series of systematic decisions made on that basis will exclude children such as the handicapped, we will face the problem of the necessity of focusing special legislative attention on these children. The bill being considered today was accepted unanimously by the Committee which I am privileged to chair, and by the Subcommittee chaired by my distinguished and able colleague from Rhode Island, Mr. Pell.

We all know too well that only two million out of more than five and one-half million handicapped children are getting an appropriate assistance. We know only too well that there is only one teacher for every two or three there should be to serve these children—only 80,000 out of 300,000 that are needed. We know that the country is now spending only 1 billion dollars a year from all sources to educate these children, and that it needs another two billion dollars to do the job right. We know in fact, that the American ideal of improved educational opportunity for each handicapped child is merely a pleasant sounding phrase and that for the parents of severely handicapped chil-

dren the reality to them is a school system which frequently turns them away. We are making progress in this area, and we believe that a merging together of the best brain power in the area of instructional technology and media with the persons who are experts in educating these children will be the basis for a breakthrough in the extension of services to more children and the improvement of education for the children now in special education classes.

I know the positive response of this Senate to the needs of handicapped children. I have seen it demonstrated time and again in recent years. I can only say to you that we propose today another step in getting this job done, and we ask for your support.

Mr. PROUTY. Mr. President, I earnestly urge Senators to consider favorably S. 1611, a bill to provide a National Center on Educational Media and Materials for the Handicapped, and for other purposes.

In recent Congresses, our legislation has begun to catch up with our compassion for our handicapped citizens, but a large gap still remains.

It is estimated that more than 300,000 teachers, speech pathologists, audiologists, and other specialists are needed to work with handicapped children.

However, only 75,000 to 80,000 such specialists are now available; therefore, some 3½ million of this Nation's 5½ million children who need special educational services are struggling without special education.

To close this gap we must improve upon our present pattern of delivery and look to new ways of providing handicapped children with the specialized educational experience that they require.

The bill will provide an intensified search for new and improved teaching methods and seek to counteract the critical personnel shortage through technology.

The proposed location of the national center in the Nation's Capitol will permit the Center to thrive on Federal facilities for the development of instructional aids. Its close ties with the Model High School for the Deaf at Gallaudet College will insure this facility a continuous supply of instructional materials and the experience of this school will be shared with the rest of the Nation.

I wish to make two additional points. Senators are aware of the immense demands on our Federal budget. The administration in testimony on this bill expressed concern that budgetary priorities might preclude inclusion of the Center in the fiscal year 1971 budget, but I contend that the spending of small amounts of money at an early date may, in this case, save greater amounts at a later date.

The bill now before us authorizes funding for the Center starting in fiscal year 1971. However, a clause in the committee's report on the bill makes it clear that any construction related to the Center is a second priority to the Center's comprehensive programs to expand the educational technology in education programs for the handicapped. This clause specifies that actual construction of the Center not begin until fiscal year 1972. The clause was the suggestion of

the distinguished Senator from Colorado (Mr. DOMINICK) and was unanimously accepted by the full committee.

However, as he, the distinguished Senator from California (Mr. MURPHY), and I indicated in our individual views in the committee report, we disassociate ourselves with the conclusion of the committee that "existing buildings cannot be modified" and construction of a new facility is "absolutely necessary."

In our individual views we indicate: The bill places discretion with the Secretary of Health, Education, and Welfare to construct a new building or contract with an institution of higher education for use and modification of existing facilities.

We concluded:

A National Center on Educational Media for the Handicapped would be a major step forward, but that the Secretary of Health, Education and Welfare should be given maximum flexibility in moving in this direction. If an alternative to new construction proves feasible, an operational center would become a reality and benefits would be delivered to the handicapped at an earlier date. This, after all, is our objective.

I urge the favorable consideration of the measure in the belief that its passage will bring benefits far beyond the costs of its provisions. In the absence of adequate specialists to provide services to the handicapped, we must provide every benefit of modern technology. Are not the handicapped particularly entitled to the benefits of our scientific achievements? I think so.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read the third time.

The bill (S. 1611) was read the third time, and passed.

HELEN KELLER MEMORIAL WEEK

Mr. INOUE. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on Senate Joint Resolution 99.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the joint resolution (S.J. Res. 99) to authorize the President to issue annually a proclamation designating the first week in June of each year as "Helen Keller Memorial Week" which were in line 6, after the word "issue", strike out "annually"; and in line 7, after the word "June" insert "of 1969"; so as to make the joint resolution read:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in recognition of Helen Keller's contribution to the education, welfare, and rehabilitation of blind and deaf persons throughout the world, the President is authorized and requested to issue a proclamation designating the first week in June of 1969, as "Helen Keller Memorial Week", calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. INOUE. Mr. President, I move that the Senate concur in the amendments of the House.

The motion was agreed to.

The title was amended so as to read: "Joint resolution to authorize the Presi-

dent to issue a proclamation designating the first week in June of 1969 as 'Helen Keller Memorial Week'."

ADJOURNMENT UNTIL MONDAY, MAY 26, 1969

Mr. INOUE. Mr. President, I move that the Senate, under the order previously entered, stand in adjournment until 12 o'clock noon on Monday.

The motion was agreed to; and (at 1 o'clock and 59 minutes p.m.) the Senate adjourned until Monday, May 26, 1969, at 12 o'clock noon.

NOMINATIONS

Executive nominations received by the Senate, May 21, 1969, under authority of the order of May 20, 1969:

OFFICE OF EMERGENCY PREPAREDNESS

Haakon Lindjord, of Virginia, to be an Assistant Director of the Office of Emergency Preparedness, vice Charles S. Brewton, resigned.

IN THE COAST GUARD

The following-named Reserve officers to be permanent commissioned officers of the Coast Guard in the grade of lieutenant:

Frederic J. Grady III Peter E. Prindle
James C. Quinn Eldon L. Beavers

The following-named officers of the Coast Guard to be permanent commissioned warrant officers in the grade of chief warrant officer, W-4:

Cluesse Russell	Charles D. Pearson
Charles R. Wilson	Richard D. Bundy
Robert C. Hilker	Robert Casale
Cordus G. Bough	Harry V. Walker
Franklin L. Fountaine	Thomas E. Hilton
Donald E. Dean	Gerald E. Palmer
Lenox A. Johnson	Stephen Peckiconis
John H. Wiechert	William T. Vanderberg
Donald D. Luedke	John W. Gates
Dalton L. Burrus	George P. Spaniol
Louis De Bernardi, Jr.	Marian H. Murphy
Stanley W. Mead	Truxton W. Payne
Sewell G. Loggins	Richard E. Eastman
Forrest W. Ringsage	John D. Kakalia
Carl R. Schattenberg	Robert D. Bowen
Colt Rodgers	Richard J. Harding
Robert E. Demichille	William Chestnutt
James H. Tyner	Francis V. McMahon
Charles R. Flinn	Charles W. Brandon
John R. Alford	Jesse E. Sparks
Paul R. Harp	Russell L. Holt

PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

I. FOR APPOINTMENT

To be senior surgeons

Hilary H. Connor
 William M. Dixon
 Jean R. Goorman
 Marilyn K. Hutchison

To be surgeons

Kenneth S. Brown
 William P. Castelli
 Irwin R. Henkin
 Carl M. Leventhal

To be senior assistant surgeons

Alberto Arrillaga
 Kenneth Behymer
 John V. Bennett
 Stanley B. Burns
 Glyn G. Caldwell
 David A. Cooney
 David H. Groth
 David J. Harris
 Robert C. Hastings
 John R. Herd
 Allan S. Hild
 Donald R. Jasinski
 Trois Johnson
 Euclid H. Jones

To be dental surgeons

John F. Goggins
 Charles H. Hayden

To be senior assistant dental surgeons

John W. Burns
 Jeffrey B. Clark
 Lynn D. Curry
 Stephen Gobel
 Morris A. Hicks
 William P. Hussman

To be senior sanitary engineers

Raymond R. Goldberg
 Walter F. Myers, Jr.

To be senior assistant sanitary engineers

Robert L. Ajax
 Charles R. Bowman
 Walter E. Gundaker
 Joseph M. Hans, Jr.

Thomas G. Henderson
 Festus L. Snead
 Donald E. Marler
 John P. Fitzgerald
 Donald H. Jones
 Edmond B. Paradis, Jr.
 Eugene P. Bishop
 William F. Young
 Louie J. Weber
 William K. Herrell
 Leonard W. Flood
 William F. Madigan
 James W. Knapp
 Horace O. Rawls
 William H. Gill
 George A. Nicholson
 John S. Bujun, Jr.
 Kenneth E. Clark
 Fred B. Eldson
 Roger E. Cowley, Jr.
 Thomas J. Lynn
 Myron G. Colburn, Jr.
 James R. Seward
 Harold R. Packer
 Barney C. Revell, Jr.
 Kyrin P. Kane
 Odom E. Nowlin
 John W. Acuff
 Harold L. Skinner
 Edward L. Ferguson, Jr.
 Ronald P. Vancamp
 James T. McAndrews
 Albert J. Ryzner
 Donald H. Yonkie, Jr.
 William E. Davis
 Jack N. Bond
 Robert C. Hoffman
 Winstead K. Nichols

Robert E. Hatten
 James L. Oser
 James G. Payne, Jr.
 Fred G. Rueter
 To be assistant sanitary engineers
 Dennis A. Degner
 Clark L. Gaulding
 Henry M. Holman
 Theodore Levin
 Harold T. Peterson

To be senior veterinary officer

Richard E. Stanley

To be veterinary officers

William T. London
 John H. Richardson

To be nurse officers

Invelda M. Artz
 Norma J. Baxter
 Thomas G. Carodiskey
 Alice R. Harmon
 Joan A. Hartwell
 Mary Rose Anne Kennedy
 Agnes M. Newell
 Pietrina R. Ragalia

To be senior assistant nurse officers

Jean M. Craig
 Paul V. Donnelly
 George F. Hedquist
 Irene C. Zyniewicz

To be senior assistant pharmacists

Donald R. Hamilton
 Gordon H. Jensen
 Philip G. Lawrence
 James E. Mills

To be assistant pharmacists

Charles W. Cook
 Gayle R. Dolecek
 Vincent J. Plerro
 Thomas A. Gaylord
 James A. Keene
 John F. Mays
 Chester L. Wilson, Jr.

To be dietitian

Martha E. Clark

To be senior assistant dietitian

A. Eileen Murnin

To be therapist

Ronald E. LaNeve

To be assistant therapists

Robert K. Baus
 Katherine J. Fromherz
 William A. Fromherz
 Jeffrey F. Mannheimer
 Robert H. Ude

To be senior scientist

George E. Jay, Jr.

To be scientists

Kenneth A. Borchardt
 Malcolm D. Hoggan

To be senior assistant scientists

Sven O. E. Ebbesson
 Ashley Foster

To be health services officers

Gloria S. Burich
 Isom H. Herron, III
 Joseph K. Owen
 Francis F. Reiseron
 Reginald A. Spindler

To be senior assistant health services officers

Robert F. Hickman
 Edwin P. Yarnell

Executive nominations received by the Senate, May 22, 1969, under authority of the order of May 20, 1969:

ASSISTANT SECRETARY OF STATE

John Richardson, Jr., of New York, to be an Assistant Secretary of State.

PEACE CORPS

Thomas J. Houser, of Illinois, to be Deputy Director of the Peace Corps.

U.S. MARSHALS

Edward J. Michaels, of Delaware, to be U.S. marshal for the district of Delaware for the term of 4 years, vice Joseph Novak.

Christian Hansen, Jr., of Vermont, to be U.S. marshal for the district of Vermont for the term of 4 years, vice Thomas W. Sorrell.

MISSISSIPPI RIVER COMMISSION

Maj. Gen. Andrew Peach Rollins, Jr., O24237, Army of the United States (brigadier general, U.S. Army), to be a member and President of the Mississippi River Commission, under the provisions of section 2 of an Act of Congress approved 28 June 1879 (21 Stat. 37) (33 U.S.C. 642).

IN THE ARMY

The following-named officer for appointment in the Regular Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 3210, 3284, and 3306:

To be brigadier general

Col. Manley Glenn Morrison, O37389, U.S. Army.

Executive nominations received by the Senate May 23, 1969:

SUPREME COURT

Warren E. Burger, of Minnesota, to be Chief Justice of the United States.

IN THE ARMY

Lt. Gen. William Beehler Bunker, O19402, Army of the United States (major general, U.S. Army), to be placed on the retired list in the grade of lieutenant general under the provisions of title 10, United States Code, section 3962.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Henry Augustine Milley, Jr., O22993, Army of the United States (brigadier general, U.S. Army).

CONFIRMATIONS

Executive nominations confirmed by the Senate May 23, 1969:

OFFICE OF ECONOMIC OPPORTUNITY

Donald Rumsfeld, of Illinois, to be Director of the Office of Economic Opportunity.

COMMISSIONER ON AGING

John B. Martin, Jr., of Michigan, to be Commissioner on Aging.

GEOLOGICAL SURVEY

William T. Pecora, of New Jersey, to be Director of the Geological Survey.

AMBASSADORS

Francis J. Galbraith, of South Dakota, a Foreign Service officer of class 1, to be Am-

bassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Indonesia.

Sheldon B. Vance, of Minnesota, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of the Congo.

Oliver L. Troxel, Jr., of Colorado, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Zambia.

John Davis Lodge, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Argentina.

Matthew J. Loomam, Jr., of the District of Columbia, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Dahomey.

Francis E. Meloy, Jr., of the District of Columbia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Dominican Republic.

Spencer M. King, of Maine, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Guyana.

Armin H. Meyer, of Illinois, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Japan.

Jack Hood Vaughn, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Colombia.

David H. Popper, of New York, a Foreign Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Cyprus.

Kingdon Gould, Jr., of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Luxembourg.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Bert M. Tollefson, Jr., of South Dakota, to be an Assistant Administrator of the Agency for International Development.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY
James F. Leonard, Jr., of Maryland, a Foreign Service officer of class 1, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency.

U.S. NAVY

Rear Adm. Maurice F. Weisner, U.S. Navy, having been designated for commands and other duties determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of vice admiral while so serving.

Vice Adm. John B. Colwell, U.S. Navy, for appointment to the grade of vice admiral on the retired list, in accordance with the provisions of title 10, United States Code, section 5233.

U.S. MARINE CORPS

Lt. Gen. Lewis W. Walt, U.S. Marine Corps, for appointment to the grade of general while serving as Assistant Commandant of the Marine Corps.

TENNESSEE VALLEY AUTHORITY

Aubrey J. Wagner, of Tennessee, to be a member of the Board of Directors of the Tennessee Valley Authority for the term expiring May 18, 1978.

IN THE NAVY

The nominations beginning Jon F. Abel, to be lieutenant, and ending Jacquelyn S. Wills, to be lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 8, 1969;

The nominations beginning Guy H. Able III, to be ensign, and ending Nicolas E. Walsh, to be ensign, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1969; and

The nominations beginning Kenneth D. Aanerud, to be lieutenant (junior grade), and ending Frank E. Kline, to be lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1969.

IN THE MARINE CORPS

The nominations beginning John E. Allen, to be 2d lieutenant, and ending John T. Wilson, to be 2d lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 13, 1969.

EXTENSIONS OF REMARKS

PARENTAL GUIDANCE AND DISCIPLINE

HON. BIRCH BAYH

OF INDIANA

IN THE SENATE OF THE UNITED STATES

Friday, May 23, 1969

Mr. BAYH. Mr. President, in the midst of widespread publicity about the so-called generation gap and the increasing amount of juvenile delinquency, it is well to remember that many stories in the headlines are not truly representative of the bulk of Americans. We tend to overlook too quickly the fact that most parents make special efforts to understand, guide, and participate in wholesome activities with their children, and that throughout the Nation families are united by close ties of respect, love, and veneration.

Typical of the positive influence for good exerted on their families' lives by many fathers is the relationship described in an article brought to my attention recently about three men in the Calumet area of Indiana. These three

fathers—Robert Blaemire, an assistant fire chief in Hammond; Albert Kaufman, a supervisor for a Chicago Heights steel firm; and Robert J. Stefaniak, an insurance broker in Calumet City—while coming from differing backgrounds and following varied careers, share with millions of others the common bond of concerned parents the world over.

Because the son of one of these men has been a part-time employee in my office while attending college, I can testify personally to the success with which the obligations of parenthood have been met in this particular instance. As a tribute to these fine men as well as to uncounted fathers and mothers who devote themselves unselfishly to the welfare and training of their children, I ask unanimous consent that this article, which appeared in the Hammond Times for April 6, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DISCIPLINE REVIVED

"... Youth Gets 1-10 Year Term."
"Two Burglars Shotgunned."

"Police Snare 16 in Pot Raids."

"Unrest Hits 4 Colleges."

"Teens Beat Conductor."

Headlines like these are appearing in newspapers across the country.

All of them, however, are about Calumet Region youths because they're from The Times, with the exception of college unrest and there's been some of that here, too.

All too frequently the blame for teens and young people going astray can be placed with the parental supervision—or lack of it.

Busy dads often forget the mischievous pranks they pulled as youngsters and the pitfalls which could have swallowed them up.

In an age of permissiveness, today's fathers are reverting to old-fashioned discipline and participation. They're taking an interest in what their children do, with whom, where, when and why.

This, at least, was the impression given by three fathers.

As assistant fire chief in Hammond, Robert Blaemire works one 24-hour shift and is off for three. While it may sound like he has an abundance of time for family activities, it should be pointed out he also works 24 hours a week as a part-time furniture salesman.

With two jobs, Blaemire finds time to attend night school two nights each week and coach a junior youth league baseball team.

"I'm trying to get my degree in education," Blaemire said, "so this semester I'm taking philosophy and criminology."

"So far I have 36 credit hours. When you only take six hours a semester, it takes a little longer."

Blaemire's own philosophy has been "if they're stealing second base, they're not stealing cars."

His own four children have benefitted. They are Donna Rae 21, who works in Chicago and is planning to become an airline stewardess; Robert, 19, a student at George Washington University in Washington, D.C., and an employee of Sen. Birch Bayh; Mike, 17, a senior at Gavit High School, and Kevin 13, a junior high student at Gavit.

"All of them are interested in music," Blaemire said. "Bob and Mike played in their own combo until Bob and one of the other boys left for college but they still come over to practice."

According to Mrs. Blaemire, there's always something going on.

"Last fall the senior float for homecoming was built in our backyard," Blaemire said. "Our home has always been open to their children and their friends."

"If they're here," he added, "we know where they are and usually what they're doing."

Although Blaemire enjoys coaching his junior youth league team, something he's done for nine years, his oldest son was more interested in drama and is a good student.

"Mike and Bob have always been kept busy with their music, too," he said. "Kevin is still active in Boy Scouts and likes sports so we've been very lucky."

Blaemire is proud of the fact he's never had a discipline problem with his children.

"If we give them a job to do, they'll get it done, sometimes reluctantly, but they'll do it," he said.

The Blaemires have helped with other school activities in addition to homecoming floats, such as the junior prom.

"You've got to support and be interested in what they do or they'll lose interest," he said. "That's why I favor a strong summer program—summer is probably the worst time for kids."

"They have too much time to get into trouble," he continued, "during the school year there are sufficient activities to keep them occupied, but summers can be rough."

They support student activities by attending as many high school sports events as they can.

Mrs. Blaemire needn't worry about becoming a "baseball widow." Blaemire takes her along to games he's coaching, something he intends to continue doing. If there's a dinner or activity for the players, she pitches in to help.

She also works part-time for the Westminster Presbyterian Church in Munster.

They are members of Woodmar United Methodist Church and Blaemire is active in the newly-organized Woodmar Kiwanis Club.

"The only way to keep a happy home, wife, and children," Blaemire said, "is to make each activity ours—not yours and mine—by making time for each event."

"Besides," he added, "you have to keep your sense of humor. Too much is too serious too often."

"There are many more good kids than bad," he continued. "People should try to understand their own kids as well as someone else's. If they were better understood, there'd be fewer bad ones."

He considers himself lucky for having the kind of job he can leave behind so his work "doesn't interfere with my job at home."

With two daughters and a son, the Albert Kaufman home in Hammond is another beehive of activity.

Kaufman, a supervisor of production control for a Chicago Heights steel firm, is the

father of Ardis, 20, a student at Purdue University in West Lafayette; Cynthia, 18, a senior at Morton High School, and Neal, 14, also a student at Morton.

"Seems like we were always driving kids someplace," Kaufman said, "to games, to school, school functions, field trips, museums."

"Ardis was a cheerleader," he added, "so we always had a carful."

In addition, Mr. and Mrs. Kaufman are both avid high school athletic fans.

Neal is interested in sports, Kaufman said, and plans to go out for baseball this spring.

"There is always some sort of meeting going on," Kaufman said. "We're home during meetings, but stay out unless they ask our help on something."

"Our home is always open to the kids and their friends and it's well-used."

"They're very active in school but inactive at home," Kaufman said.

As for discipline, "Girls are no problem; Neal, like all boys, is a little unruly at times."

"I suppose I could beat him, but that wouldn't be any fun, the ability to beat someone doesn't give you the right to boss them."

"When he starts to driving," Kaufman said, "I'll be able to ground him as an effective means of discipline."

Kaufman told of times he's received call from his office while at home. He has so effectively learned to leave his work at the office it often takes several minutes before he can answer the problem about which he's been called.

"We try to take life lightly and as it comes," he said. "That's particularly important in dealing with teenagers."

"Neal and I get along as father and son and as friends, which is equally important."

Kaufman is an ex-coach, but did not "coach" his son as a youngster.

"If he wants to play catch I'm happy to toss around a few, but we don't push him into any sport."

"He knows we're there to back him in whatever he decides."

Robert J. Stefaniak of Lansing, a general insurance broker in Calumet City, has some of these tasks yet to face.

His daughters are Lynn 7, and Lori, 5.

As a young father of younger children, his civic and business interests interfere to some extent with the amount of time he spends with them.

"I don't get to see much of them in the evening," Stefaniak said, "but I try to make up for it on the weekends by spending as much time as possible with them."

"I try to make it up by my physical presence rather than in a material way," he added.

Lynn just joined a Brownie troop.

"It's all pretty new to her," he said, "but I imagine once she gets interested in it, I'll be drafted for various activities."

Stefaniak is active in the Calumet City Lions Club, The Calumet City Real Estate Board, Calumet City Democratic Club and is treasurer of the school township which includes Calumet City, Lansing and Burnham.

"We try to take each crisis—major and minor—as it comes," he said. "What else can you do?"

TRINITY AND THE ROTC

HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, May 23, 1969

Mr. DADDARIO. Mr. Speaker, the Reserve Officers Training Corps in our universities and colleges has received a great

deal of attention in recent months, and I believe the following editorial which appeared in the Hartford Courant is extremely well written and that it imparts a great deal of wisdom on the controversy which now exists:

TRINITY AND THE ROTC

At the request of President Lockwood, the faculty and College Council at Trinity are now reviewing the Air Force Reserve Officer Training Corps program there to determine its role on the campus.

From the factual point, perhaps this is an inconsequential exercise. Under ROTC quotas only 22 students out of Trinity's 1,300 are presently enrolled in the program that annually provides the Department of Defense with some 2,500 second lieutenants from colleges around the country.

But "in this year of fabricated issues," as the Trinity newspaper nicely puts it, anything will do to set off a whoopla by student dissenters, and the ROTC has become a special whipping boy on many campuses. Trinity is already in a lather of words whether the ROTC program should go, stay, or be relegated to an extracurricular activity. And it is doubtless to fend off larger demonstrations that President Lockwood has called for a review of the matter.

The lines of debate have already been drawn in the general campus clamor, and they are being echoed at Trinity. Is the ROTC program "relevant" (that jargon word of lovely vagueness) to a liberal arts curriculum? Does ROTC, in content and teaching measure up to other academic and professional standards? And is ROTC, in principle, a militaristic anathema that aids imperialism to do its dirty deeds and so involves a college in the national war guilt?

Perhaps the first two questions are sensibly asked. But they are relatively easy to answer. Presumably some agency at Trinity can evaluate the relevance and competence of the ROTC program as it does any other program at the college. And certainly the colleges of the country together, if they mutually agree ROTC needs improvement in these directions, should not be stumped to find ways to impress the matter on the Defense Department for purposes of betterment. In fact, the Department is already attempting improvements and alterations in this direction.

Thus there would be little sense in sacking or otherwise downgrading ROTC for any academic faults that could be so easily repaired. And certainly it follows that if the program is academically acceptable, the student should get course credits as he does in other fields. To be quite specific, if Trinity is going to give credits in Physical Education, it would find little logic in making ROTC extracurricular.

In short, all this is business for academic or administrative argument—or perhaps quibble. But there is little reason in it for getting rid of ROTC out of hand. And especially not at Trinity (to go back again to being specific) where only recently the Curriculum Revision Committee has said the college should offer the opportunity for the student "to experience life outside the groves (or grooves) of academe." If a young man wishes to sample military science and procedure, or to go on to serve in the country's defenses, what academic freedom is there in preventing him, all other academic considerations being equal?

But of course, it is not reason that is confronting the ROTC around the country's campuses. It is a variety of things ranging from emotionalism to out-and-out anarchy. The ROTC is only one of a score of random issues whipped up out of hysteria or for the sake of student rabble-rousing. In the present college climate of dissension, if it weren't ROTC it would be something else a hardcore knot of agitators would fasten onto.

However, accepting dissenters against ROTC at their prettiest face value, what actually is it they are beefing about? They are against war, they decry American policy in Vietnam. Heaven knows that as far as war goes, they are not alone. But they equate war and militarism, using the latter in its worse sense, with the United States Department of Defense. And they feel if they can put the department out of business somehow, they will strike a blow for peace. The ROTC is of course a guilty agent of the Department in their minds.

This of course is the world's most delusory kind of argument. Armies terrible with banners have been marching since the beginning of time, and there is absolutely no sign—not even in all the world's youthful anti-war protest—that man's warlike bent is yet curbed. Is there anything in news headlines, from Far East to Middle East, from Russia to Indonesia, that indicates to the contrary?

That we live in a world of wars and rumors of wars is tragically obvious. Who, then, is going to defend this country? And what, in the name of everyone from Nathan Hale to Commander Bucher—and not omit the Fighting McCooks of Trinity itself—is wrong with entering the service of this country? To imply that anyone who enrolls in the Trinity ROTC is ipso facto a goosestepping militarist is as ridiculously wrong as it is insulting. Without ROTC in the universities, the Pentagon might very well have to raise an officer corps isolated from the civilizing influences of typical young men and women in a natural American university atmosphere. It is very likely, indeed, that Congress and the Pentagon would instead create more military academies with more discipline, and end up with precisely the militaristic atmosphere the opponents of ROTC say they are against.

These are things the faculty and College Council at Trinity, together with all others concerned pro or con with ROTC, might well chew on. Incidentally, it is interesting to remember that ROTC has served Trinity well, keeping it afloat after World War II when the draft was draining colleges everywhere. But it is not for some past debt it should now be kept on campus. It is because in these terrifying times, ROTC is a notable contributor to national defense—the very defense that prevents wars, not makes them.

THE INTERMOUNTAIN OBSERVER: "A LOUD AND SASSY VOICE"

HON. FRANK CHURCH

OF IDAHO

IN THE SENATE OF THE UNITED STATES

Friday, May 23, 1969

Mr. CHURCH. Mr. President, this week's Time magazine devotes a major portion of its section on the press to the Intermountain Observer, published in Boise, Idaho. The attention devoted by Time to the Observer is well deserved, indeed. Few other publications—of any size, anywhere in the country—offer the quality of journalism that is to be found in the Observer.

Time sums up the essential quality of the Observer when it notes that, despite a circulation of only 3,500, the publication "speaks with a surprisingly loud and sassy voice."

Time also pays tribute to the two editors who make the Observer what it is: Sam Day and Perry Swisher. As the magazine notes:

The Observer is exceptional because of (these) two talented journalists who prefer

roots in a relatively small community to the bustle of metropolitan journalism.

The Observer has never been a wealthy paper, Mr. President. In fact, it has operated on a deficit for much of its history. But as Time points out, its owner—Boise Valley Broadcasters, headed by one of Idaho's most distinguished citizens, H. Westerman Whillock—has been willing to subsidize the paper as a public service. For that, Idaho is grateful.

I ask unanimous consent that the Time article be printed in the Extensions of Remarks of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INDEPENDENCE IN IDAHO

Most newspapers in the mountain West are as solid as the Rockies, reflecting the area's high respect for authority and stability and its opposition to rapid change. Idaho's papers are generally no exception, but one small weekly in Boise, with a circulation of only 3,500, speaks with a surprisingly loud and sassy voice. The Intermountain Observer prints four-letter words, opposes the war in Viet Nam, supports sex education and, even in a hunting-happy state, urges strict gun laws. A model of reasoned protest, it also assails shoddy meat inspection, inhumane prison conditions, inadequate school budgets and sheriffs bent on censorship.

A tabloid, the Observer is exceptional because of two talented journalists who prefer roots in a relatively small community to the bustle of metropolitan journalism. Editor Sam Day, 42, worked for Associated Press and three other newspapers before settling in Boise in 1964. Associate Editor Perry Swisher, 45, is a former Salt Lake City Tribune correspondent who ran unsuccessfully for Governor, and still teaches math and English on an Indian reservation. Both believe that editing a regional weekly can be liberating rather than stifling. "We're not gelding—journalists don't have to be disinterested," says Swisher. Day adds: "We do not have to play footsie with businessmen on Main Street."

CANNIBALISM

Day and Swisher crusade with gusto. To attack capital punishment, Day wrote a three-part series on one of the most revolting crimes in Idaho's recent history: the fatal stabbing of a woman in 1956 by a man who bit off and swallowed one of his victim's nipples. Day's report demonstrated that the killing was a sudden, drunken act, not a premeditated murder, and that the state had executed the man in emotional reaction to the cannibalism. To convey the degrading atmosphere of Idaho prisons, the Observer found an imprisoned newspaperman who confessed that he used morphine and other drugs "to escape the reality" of prison life, or he would "surely go mad." He added: "There aren't any girls here, but there are some boy-girls, and while I've never had the occasion to think about having a relationship with such a person, I am contemplating one."

The Observer came to the aid of an embattled Lutheran pastor after rumors spread that his church's youth-recreation center had been organized by Communists. Reporter Alice Dieter traced the rumors to the fact that police had found in the center a copy of the Realist, a satirical Greenwich Village magazine, as well as a reprint of a speech given by an official of Students for a Democratic Society and distributed by the American Friends Service Committee. A local detective had decided that such material sounded subversive.

The Observer's punch and thoughtfulness has brought it a readership well beyond the

borders of Idaho—it has subscribers in 41 states, including many politicians in Washington. In a praiseful article, the Columbia Journalism Review noted that the Observer "comforts the afflicted and afflicts the comfortable." Afflicting the comfortable produces advertising cancellations as well as press-association awards; last year the paper lost \$4,000 on a gross income of \$51,000. It would be out of business if it were not subsidized by its owner, Boise Valley Broadcasters, which operates radio and television station KBOI.

The feisty Observer has plenty of critics, mostly officials it has attacked. Republican Governor Don Samuelson, with whom Day disagrees on almost everything, claims that the paper tries to "get people emotionally disturbed rather than present facts." Sheriff Paul Bright, who has been assailed by the Observer for efforts to close such movies as *I, a Woman* and *Candy*, vainly sought a warrant to arrest Day when the paper published some four-letter words used by S.D.S. Founder Tom Hayden at the University of Idaho, even though the speech was also televised. The prosecuting attorney ruled that the one incident showed no pattern of obscenity but warned that Day should not use such words again. Day, naturally, makes no such promise. "We don't mind risking the paper when we think an issue is important," he says.

HON. WILBUR J. COHEN COMMENTS ON 1970 BUDGET REQUEST

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, May 23, 1969

Mr. SCHEUER. Mr. Speaker, very few men in our generation have viewed America's problems of health, education, and welfare for so long and so perceptively from the mountaintop as Prof. Wilbur J. Cohen, former Secretary, U.S. Department of Health, Education, and Welfare. I am positive that his eloquent and thorough views will be closely scrutinized and highly valued by all my colleagues, and I include them at this point in the RECORD:

COMMENTS ON THE 1970 BUDGET REQUEST

(Statement to House Subcommittee on HEW Appropriations, by Wilbur J. Cohen, professor of education and dean-designate, School of Education, the University of Michigan, May 23, 1969)

I wish to thank the distinguished Chairman and members of the Subcommittee for taking the time to hear me this morning. I know what a complex and time-consuming responsibility you have had in conducting the hearings on the 1970 Budget requests. Your Subcommittee has always been considerate, thorough and penetrating in cross-examining the various Secretaries and their staffs. I thank you for the courtesies you showed me during the past eight years. I shall miss Mel Laird's tough questions but can only hope that he now finds being on the other side of the table as interesting and challenging.

I first appeared before a Subcommittee on Appropriations nearly 35 years ago when I appeared on the first Social Security budget of 1935. That was a baptism by fire because the House-passed appropriations never became law due to a filibuster by Senator Huey Long. I learned two things from that experience: a number of Louisiana soup recipes which Senator Huey Long discussed in the Senate, and never to be sure about anything in the appropriation process.

So while I appreciate that you and the members of Congress and the Executive Branch are in a mood of constraint on the Budget, I nevertheless feel an obligation to come before you and give you my evaluation of needs. Perhaps somehow the conditions will change as tax reform, international conditions, and Senate action on appropriations unfold. My hope springs eternal.

We—you and I—are faced in the United States with some of the most difficult and sensitive problems since our Republic was established. The problems of poverty, malnutrition, white racism and black racism, student unrest, the role of the universities in our society and their relationship to government, rising medical costs, an outmoded welfare system, school desegregation, disadvantaged children, the needs of our aged—all these and many more of the great national problems vexing our body politic—fall within the scope of this Subcommittee. What you gentlemen do this year and next can have a consequential effect in dealing more realistically and satisfactorily with these problems.

I don't believe that money is the sole situation to our problems but I do believe it helps to have money and that money helps more than mirrors. I must be frank and say to you I believe that the H.E.W. Budget should be about \$1.6 billion more this coming year than the Nixon Budget request, or about \$1 billion above the Johnson request. I believe this additional amount could be wisely and efficiently used. I also agree there could be some reduction in expenditures for Medicare and Medicaid by more rigorous monitoring of over-utilization and unnecessary charges, postponement of some projects of lower priority, and some legislative changes in programs to assist in reducing expenditures.

You will rightfully ask me where is the money coming from to increase the H.E.W. appropriations. It is my view that before you reduce essential H.E.W. programs as members of Congress you should cut out some of the low priority items in the defense budget, stretch out some of the space projects, close the tax loopholes as part of a tax reform measure, postpone some of the projects which the Army Engineers have endorsed, appropriate more funds to collect delinquent income taxes, enact an excess profits tax, and ask the General Accounting Office how they can help to reduce unnecessary and low-priority expenditures. I do not believe it is necessary or desirable to restrict the growth of our health, education and welfare programs. There are other alternatives for the Congress to choose from. I hope the Congress will rise to the statesmanlike opportunities which are present.

As you know, last December I did not increase the \$4 per month premium rate for physicians' services under Medicare for the fiscal year 1970. A \$4.40 rate which was recommended to me would have increased the Federal share from general revenues about \$100 million for the year while at the same time placing another \$100 million on the beneficiaries. This was a difficult and close decision and I received much critical and abusive mail from some physicians for my decision. But I hope my action will help to moderate the inflationary tendencies. Unless there are legislative changes in the Medicare program the cost on general revenues will rise in 1971 and other years, if not in 1970 as well.

In my second annual report to the Congress on Medicare (House Document No. 91-57) I have included a list of the 47 physicians receiving reimbursement under Medicare of \$50,000 a year or more. This does not include any payments under Medicaid. (pp. 114-116). I urge you to request the Department to do a similar study for Medicaid including payments to pharmacies, nursing homes. May I also suggest that your Committee Report indicate that the Department establish a special Task Force under the Comptroller's supervision to make special investigations of

Medicare and Medicaid costs where fraud, overutilization, or abuse are alleged or believed to exist.

ESEA

I urge you first to appropriate additional funds for education and particularly for Title I of ESEA. President Nixon has recommended a reduction of \$110 million in the funds for Titles II and III of ESEA and Titles III-A and V-A of NDEA recommended by President Johnson.

I believe this reduction is unwise and out of harmony with the recent House action on extension of ESEA which gave the States broader flexibility for fiscal year 1971 in the use of funds under these very titles. I urge you to increase the amount available by at least \$224 million and authorize in the appropriation act that the States may utilize this additional amount for 1970 either under Title I, II, III or Titles III-A and V-A of NDEA as is provided in the House-passed amendments for 1971.

If you appropriate only the \$1,226 million for 1970 then the following 14 States would not receive any increase over 1969: Alaska, Arizona, Delaware, Florida, Idaho, Iowa, Kansas, Montana, Nevada, New Mexico, Oregon, Texas, Washington and Wyoming. The 1970 request is for \$103 million more than 1969 and yet 14 States receive no more in Federal funds.

In addition to recommending \$224 million more than the request I urge you to modify the proposed minimum requirement so as to provide that no State should receive less than 105% of the amount received in the previous year.

ADVANCE FUNDING

The appropriation request also includes \$1,226 million as advance funding for Title I-A for 1971. I strongly support the advance funding for this program and I recommend that you include in your bill \$1.8 billion for 1971 as a 75% payment on the 1971 appropriation. I also recommend you include an appropriation of \$2.4 billion for 1972 on this same basis. These figures are derived from a calculation that on a \$2,000 income basis the entitlements would total about \$2.4 billion for 1971 and on a \$3,000 basis that would total about \$3.2 billion in 1972.

I can think of nothing that would help as much to give hope and enthusiasm to the hundreds of thousands of teachers and school boards who are struggling to improve the education of our young people as your action to substantially increase the ESEA funds for 1971 and 1972. Even if you found that you couldn't go as high in the bill as I have recommended but could include in your Committee Report a statement of your general intent, it would be most constructive.

I need not tell you that teachers, principals and administrators in your schools are having a difficult time. Millage increases for schools have been turned down more frequently than in the past. You could help at this critical time to support the schools and teachers by indicating your intent to appropriate more in 1971 and 1972 than in 1970. You would not be affecting the 1970 Budget and you would be indicating your faith in the Congress' ability to improve the situation in the next two years.

I also recommend that you include in this year's bill advance funding of higher education programs for 1971. This would be very helpful to better planning and I think that you would get "more bang out of a buck" if you provided for advance funding.

FULL FUNDING OF ESEA

Full funding of Title I would involve about \$3.2 billion by 1971. Along with the other titles of ESEA the appropriation of the full authorization under all titles could exceed \$4 billion annually. I am reasonably sure that within a few years the Congress will appropriate this amount.

I urge you very strongly to indicate in your Committee Report that you intend to hold hearings at an appropriate time on what the effect on our American education system would be if and when the full amount authorized under the ESEA were appropriated and that you would like a report from the Department on this matter including information from the States and school districts on the potential use of such funds. You might also ask the Federal agency to establish a special outside Committee of distinguished citizens to evaluate this information and transmit their evaluation to you.

EXPERIMENTAL SCHOOLS

I strongly support the request made by President Nixon for experimental schools. This is a very important proposal. I believe, however, the request could be reduced from \$25 million to \$2.5 million by making the first year a planning grant program. One hundred projects could be financed at \$25,000 each at a total cost of \$2.5 million. The other \$22.5 million could be shifted to ESEA to meet the additional costs I have recommended. By starting with planning grants first a more satisfactory long-range program can be developed.

CONSTRUCTION-EDUCATION

I think it is very unfortunate that President Nixon has requested elimination of the entire request by President Johnson for construction of undergraduate and graduate facilities—a total of \$107 million. While I fully support the Johnson request, I hope that as a minimum you will include at least \$41 million, the amount contained in the 1969 Budget.

I fully support the \$1,080,000 which Secretary Finch has proposed to expand assistance to community colleges.

NIH

President Nixon requested a decrease of \$28 million in the NIH Budget submitted by President Johnson. The Nixon request for the research institutes in 1970 would therefore be below the 1969 level. I made a careful study of NIH programs before I left office and I concluded that they should receive an amount which would be about \$118 million above the revised submittal. I support the request for an increase in research on problems of human reproduction and family planning. I urge you to include a small amount to commence operations on the Lister Hill National Center for Biomedical Communications (omitted by Bureau of the Budget). As a minimum I suggest that the NIH institutes receive at least \$50 million more than in 1969.

SOCIAL AND REHABILITATION SERVICE

I am very disappointed that the revised Budget reduces the work incentive program by \$35 million because the goal of 175,000 enrollees set for 1970 will not be reached. I urge you to encourage the Department of Labor to speed up the program. If they can get more persons in training I would hope you would indicate your receptivity to a revised estimate in the Senate. We must make every effort to offer work training to more persons on welfare who want such training. A recent study showed 70% of the mothers on welfare wanted such an opportunity.

I also regret the cut of \$64.3 million in vocational rehabilitation. I do not know the reduction in the number of persons who would be rehabilitated by this cut. I urge you to evaluate the cost-benefit effects before making a decision on this item. You might wish to restore some of the cut.

I support the \$5 million added for innovative approaches on income maintenance.

OTHER CHANGES

I support the requests made by President Nixon for civil rights assistance to school districts (\$6 million), nutrition (\$4 million) and aid to medical schools (\$5 million). I do

not favor his elimination of Federal payments for mentally ill patients in State and local institutions after 120 days under Medicaid without further discussion with the States as to how to handle this problem without adverse impact on the mentally ill. Nor do I favor the reduction of \$10,712,000 in certain of the mental health activities even though there is a \$1,379,000 increase in direct operations for mental health.

I hope you could find a way to restore some of the grants for purchase of public library books and materials.

DEPARTMENTAL MANAGEMENT

I urge you to appropriate the full amount requested for Departmental management—\$35.1 million exclusive of payments to the Corporation for Public Broadcasting.

In order for the Secretary to have the effective ability to supervise programs, evaluate proposals, review budget and legislative proposals, he must have more help directly responsive to his immediate needs and not oriented to a particular program. I originally submitted to the Bureau of the Budget a request for \$38 million which I believe is eminently justified. I would be pleased if you found it possible to give Secretary Finch this amount. He will need it to carry out the responsibilities which the Congress and the President have placed upon him.

I also urge you to include the amounts requested for evaluation of programs. My experience convinced me of the value of this activity in determining priorities, making budget changes, and making legislative proposals. It is worth every dollar appropriated.

PERSONNEL CEILINGS

The personnel ceilings in existing law are in my opinion seriously impairing the performance of H.E.W. programs. I strongly recommend repeal of the existing limitations.

STUDENT UNREST

I wholeheartedly endorse Secretary Finch's policy that it would be unwise and tragic for the Federal Government to interfere in the internal administration of educational institutions.

I believe existing Federal, State and local laws are adequate to take care of the situation. I favor repeal of the existing amendments to the appropriation and education laws which are discriminatory, ineffective and inappropriate. I urge you to include in the Office of Education funds to staff a small mediation center to assist educational institutions in dealing with student unrest which in my opinion is not likely to terminate under present circumstances.

INFORMING THE PUBLIC

One fact has concerned me as I have recently visited projects financed by Federal funds. In most cases I have seen large signs on the projects indicating that the project has been financed by the local sponsors but the fact that substantial Federal funds have gone into the project is usually minimized, overlooked or disregarded. Taking into account the prevalent attitude criticizing the amount of Federal taxes, I believe it is only fair for the taxpayer to know the benefits which derive from his Federal taxes. We have a situation today where the tax message is brought home very insistently to the taxpayer but the message on the value or beneficial Federal programs is often neglected.

I would like to suggest that you include in your Committee Report a strong recommendation that the Department issue instructions to every grantee or contractor that every facility constructed in part or whole with Federal funds post a conspicuous and visible sign which indicates the proportion of Federal funds in the project, particularly in connection with hospitals, schools and similar facilities.

I am equally concerned that very few persons know or appreciate the substantial amount of Federal funds which you appropri-

ate to NIH for medical research and training. I urge you to request the Department to take steps to inform the American public of this fact through appropriate means.

SOCIAL SECURITY

The consolidated Budget submitted by President Nixon shows a reduction in social security expenditures of \$1 billion based upon a 7% increase in benefits. Chairman Wilbur D. Mills has already indicated he favors at least a 10% increase in social security benefits as well as "many other improvements". I believe that a 10% across the board increase with a substantial increase in the minimum monthly benefit and other improvements would result in an increase approximating 15%. I believe that with the increased income to the system due to increased earnings in 1969 and 1970 we could have more than a 7% increase without any immediate increase in social security taxes. It is estimated that under the existing law there will be an excess of \$5.6 billion in social security income over expenditures in 1970, \$9 billion in 1971 and \$10 billion in 1972.

I favor increasing the minimum monthly social security benefit from \$55 to \$80. This would make a substantial reduction in the number of persons in poverty and also decrease the Federal cost of old age assistance. The increase proposed by President Johnson would reduce Federal assistance costs by \$81 million. President Nixon's proposal would reduce them by \$51 million—a loss of \$30 million. I think \$60 to \$65 million might be a better guess.

A CONCLUDING COMMENT

There are other items of policy, budget, and administration on which I should like to comment if time permitted. I have presented my views on many of these matters as part of the Annual Report which I made to the Congress. I also presented by legislative recommendations to the President in a special report dated December 17, 1968. If members of the Committee have not seen them I shall be glad to make them available. I should particularly like you to look at the goals for 1976 which are outlined because inevitably these matters will be discussed in future appropriation as well as legislative hearings.

THE HONORABLE WILLIAM V. ROTH

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. HAMMERSCHMIDT. Mr. Speaker, it is an honor and pleasure to add more good words to the many which have been said for our esteemed colleague, BILL ROTH. His announcement that he aspires to and will seek a seat in the other body next year comes as no great surprise.

BILL ROTH's great abilities have been most evident, in bringing credit to himself and the House of Representatives. He has focused attention on major problems, and through his own efforts and leadership, brought perspective to such a dilemma as the overproliferation of Federal agencies. That tremendous effort, alone, marks BILL ROTH as a man of unusual ability.

Beyond that, he is a most delightful associate as well as an able, willing, hard worker; in short, an ideal legislator.

We will miss his strong voice in the House. We wish him every success in his effort to be elected to the other body. He deserves it.

FORMER VICE PRESIDENT HUBERT H. HUMPHREY EXPLORES HEALTH PROBLEMS AND OFFERS SUGGESTIONS FOR COPING WITH EXISTING INADEQUACIES

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Friday, May 23, 1969

Mr. RANDOLPH. Mr. President, I have long been concerned with the health problems of our Nation and with the need for improvement of the health of our people.

Recently I read with intense interest an article by former Vice President Hubert H. Humphrey pointing with pride to America's health achievements, while frankly stating our unmet health needs.

The article appears, appropriately enough, in the preview edition of a significant new magazine, *Family Health*, published by Maxwell M. Geffen, former publisher of *Medical World News*. Vice President Humphrey will be a frequent contributor to the magazine. Its distinguished editorial advisory board includes Dr. Christian Barnard, Dr. Morris Fishbein, Dr. Albert Sabin, Mrs. Albert D. Lasker, and others.

Fortunately, our citizens are today more health conscious than ever before. They will, I believe, find in Mr. Humphrey's article a source of both encouragement and challenge.

Mr. President, I therefore ask unanimous consent to have this stimulating article reprinted in the *RECORD*.

There being no objection, the article was ordered to be printed in the *RECORD*, as follows:

WE'RE HEALTH-POOR IN A LAND OF PLENTY
(By Hubert H. Humphrey)

The former Vice President exposes some of the weak spots in America's health defenses and offers suggestions about how they can best be shored up.

Can you possibly help me with this health problem?

Letters which start like this have filled my mailbox for many years. Some tell of anguish: "My mother has cancer . . ."; "My daughter is mentally retarded. . . ." Other correspondents write about issues affecting millions of people, such as the economics of health care or the blight of air pollution.

The letters are reminders that we Americans do care about health, not just for ourselves, but for others.

Our peaceful war against disease has scored inspiring victories. Once-dreaded childhood diseases such as polio, smallpox, whooping cough and diphtheria have become illnesses largely of the past. From our scientific centers, our clinics and laboratories, have come breakthroughs in research, in patient care and in medical education which have attracted the finest of the world's physicians to our country.

But can you believe America's health problems are now "minor"? No realist could. Indeed, we are in the midst of a revolution of rising new health expectations.

The demand for health services will leap by an estimated 25 per cent in the 1965-1975 decade. We are short of 50,000 doctors and 135,000 nurses. Our hospitals, often obsolete and crowded, need not only modernization and expansion, but 250,000 additional professional and technical persons.

The toll of handicaps and premature deaths remains needlessly high. Fifty-two

million Americans are injured annually by accidents in their homes, their offices, on the highways and elsewhere. The No. 1 killer, cardiovascular disease, still wipes out over a million lives a year, accounting for more than one-half of all deaths. Diseases which can be effectively controlled still strike the unsuspecting: there are, for example, an estimated two million undetected diabetics.

Recent reports about malnutrition, especially among the poor, but also in the middle-income group, offer a grim paradox in our affluent nation. Preventive medicine and health information could spare millions of Americans infinite grief and cost.

The lack of adequate care can be the most tragic at that stage when life is most vulnerable—in the mother's womb and in the first year after birth. Twelve countries have lower infant mortality rates than ours.

Nowhere is promise greater or the shortage more severe than in rehabilitation personnel and facilities. The emotionally disturbed, the physically handicapped, the mentally retarded face long, long waiting lines wherever they turn, and all society is the loser.

Man, himself, is causing health problems of mammoth proportions. Pollution fills millions of lungs with chemicals; noise jars ears and minds. By the end of this century, we will be 90 per cent urbanized and crowding will multiply the daily stresses of life.

Already jam-packed in urban ghettos and spread out in rural slums, the poor—one fifth of our nation—lag in health standards from birth onward. Their poverty makes them more vulnerable to disease and disability.

Their illnesses make them poorer. Cause and effect intertwine and only our combined attack on both poverty and disease can break the tragic cycle.

Pioneering facilities like the neighborhood health center are beginning the counter-attack. Meanwhile, another vast backlog—of mental illness—is being reduced by bold experimentation in community mental health centers and outpatient clinics.

The costs of illness are beginning to be brought under control by prepaid insurance. Earlier, Blue Cross, Blue Shield and other private insurance eased financial burdens on millions of our citizens; Medicare and Medicaid added significantly to coverage. But the problem of rising health and hospital costs remains a challenge to creative, voluntary partnership between the professions, our private enterprise system and government.

Fortunately, we don't have to look for "miracles" arriving in some far-off "some-day." Many of the answers to today's health problems are no farther than your family doctor, neighborhood clinic or community pharmacy. Having been trained as a pharmacist, I take pride in our profession's accomplishments.

It is only factual to note that ten years ago the wealthiest king could not have commanded the new life-giving, pain-relieving medications which are now routinely stocked in your corner drugstore. And available with the pharmaceuticals is the friendly counsel, the understanding and the interest of dedicated professionals: the pharmacist and the doctor.

Each does his best in serving your health. And all America does its best when it strives for a healthier tomorrow. This is a crucial part of our pursuit of happiness. And, with its success, there will be fewer letters of heartbreak in tomorrow's mailbag.

THE HONORABLE WILLIAM V. ROTH

HON. ALEXANDER PIRNIE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 1969

Mr. PIRNIE. Mr. Speaker, the announcement of our good friend, BILL ROTH of Delaware, that he would forego return to the House and campaign for election to the Senate came as a shock. While I wish him every success in this effort, I am very loath to lose him from this body. In the brief span of 3 years BILL has established himself as a competent and tireless legislator. In individual and cooperative efforts, he has worked smoothly and diligently. The stature of the House is raised and the Nation is well served by such service. We are proud of BILL's record and will follow his further career with confidence and deep interest. Our best wishes will be with him.

SENATE—Monday, May 26, 1969

The Senate met at 12 o'clock noon, and was called to order by the Vice President.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Father of our spirits, we need Thee every hour and the land Thou hast given us needs Thee in this hour of history. Forsake us not however far our roving takes us from Thy love and from our true home which is in Thee. Turn our fugitive spirits to Thee for renewal and strength. Vouchsafe Thy light and Thy truth to us in our daily duties. Make us vigilant in pursuit of eternal values. Accept our lives and all the resources of our Nation entirely for Thy service. May we go from strength to strength assured that Thy goodness and mercy follows us all our days and we may abide with Thee forever.

Through Jesus Christ our Lord. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Friday, May 23, 1969, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate sundry messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

WAIVER OF CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the legislative calendar, under rule VIII, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go

into executive session to consider one nomination on the Executive Calendar, that of Mr. Thompson, of Massachusetts.

There being no objection, the Senate proceeded to the consideration of executive business.

The VICE PRESIDENT. The nomination on the Executive Calendar will be stated, as requested by the Senator from Montana.

ATOMIC ENERGY COMMISSION

The legislative clerk read the nomination of Theos J. Thompson, of Massachusetts, to be a member of the Atomic Energy Commission.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The VICE PRESIDENT. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Nos. 193 and 194.

The VICE PRESIDENT. Without objection, it is so ordered.

AUTHORIZING THE VESSEL "ORION" TO ENGAGE IN THE COASTWISE TRADE

The bill (S. 133) to authorize the vessel *Orion* to engage in the coastwise trade was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 133

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the vessel now known as the *Orion* (ex-*Trinidad*), owned by the Orion Towing Company, Inc., of Bartow, Florida, shall be entitled to engage in the coastwise trade upon compliance with the usual requirements and so long as such vessel is owned by a citizen of the United States. For the purposes of this Act, the term "citizen of the United States" includes any corporation, partnership, or association which is a citizen within the meaning of section 2 of the Shipping Act, 1916 (39 Stat. 729), as amended (46 U.S.C. 802).

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-203), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE AND EXPLANATION OF THE BILL

S. 133, introduced by Senator Holland, would authorize the vessel *Orion* to engage in the coastwise trade. The *Orion* is a tug, 127 feet in length, with a beam of 29 feet, 10 inches, and an average towing speed of 9 knots. The vessel, which is now owned by the Orion Towing Co., Inc., of Bartow, Fla., was built in American territory (Panama Canal) by the U.S. Government for the use of the Government. Because of the provisions of our coastwise trade laws, the vessel is now ineligible for coastwise privileges because it was not built within the United States. A bill identical to this measure was enacted by the Senate in the 90th Congress, but was not acted upon by the House of Representatives.

In view of the hardship that would otherwise be imposed and because of the limited size and employment of the vessel, the committee recommends approval of the bill. The committee believes that this exception is of such a limited and restricted nature that it will pose no threat to the general goals of our coastwise restrictions or to the American shipbuilding industry.

COST OF LEGISLATION

Enactment of this bill would involve no expense to the Government.

DOCUMENTATION OF THE VESSEL "CAP'N FRANK" WITH FULL COASTWISE PRIVILEGES

The bill (S. 753) to authorize and direct the Secretary of Transportation to cause the vessel *Cap'n Frank*, owned by Ernest R. Darling, of South Portland, Maine, to be documented as a vessel of the United States with full coastwise privileges was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 753

Be it enacted by the Senate and House of Representatives of the United States of Amer-

ica in Congress assembled, That, notwithstanding the provisions of section 4132 of the Revised Statutes of the United States, as amended (46 U.S.C. 11), the Secretary of Transportation is authorized and directed to cause that certain vessel now known as the *Cap'n Frank*, built in 1958 in Nova Scotia, and now owned by Ernest R. Darling, of South Portland, Maine, to be documented as a vessel of the United States with full coastwise privileges upon compliance with the usual requirements so long as the vessel is owned, and shall continue to be owned, by a citizen of the United States.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-204), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The bill directs the Secretary of Transportation to document as a vessel of the United States with coastwise privileges the 38-foot, 6-inch vessel *Cap'n Frank*.

REASON FOR THE BILL

The *Cap'n Frank* was built in Nova Scotia, Canada, in 1958. The vessel is therefore ineligible to be documented for operation in the coastwise trade under section 27 of the Merchant Marine Act, 1920, and under section 4132 of the Revised Statutes (46 U.S.C. 11). A bill identical to this measure was enacted by the Senate in the 90th Congress but was not acted upon by the House of Representatives.

The purpose of restricting documentation with coastwise privileges to vessels built in American shipyards is to encourage ship construction in the United States. It has been the policy of the United States since 1789 to reserve the coastwise trade to vessels constructed in U.S. shipyards. However, from time to time and under special circumstances, Congress has passed legislation authorizing the documentation of vessels for use in the domestic trades although the vessel was built in a foreign country or otherwise lost its documentation because of a transfer to foreign registry. The committee considers each proposal for such documentation on its own merits.

This vessel is owned by Ernest R. Darling of South Portland, Maine. Mr. Darling is a citizen of the United States and plans to use the 38-foot, 6-inch vessel for chartering fishing parties and other passenger service. In view of the hardship that would otherwise be imposed and because of the limited size and employment of the vessel, the committee recommends approval of the bill. The committee believes that this exception is of such a limited and restricted nature that it will pose no threat to the general goals of our coastwise restrictions or to the American shipbuilding industry.

MILITARY DECISIONS IN VIETNAM

Mr. TOWER. Mr. President, I am dismayed by the recent attack on a tactical decision of our field commanders by the Senator from Massachusetts (Mr. KENNEDY) on the 20th of May.

In my estimation, the Senator was wrong, not only in the substance of his assertions, but also in the tone of his criticism.

In advocating that our troops assume a static defensive posture, he is advocating a policy that, if pursued, would result in loss of thousands of more lives of our people than are lost by offensive action.

Further, the Senator seems to accept

the somewhat naive—and dangerous—assumption that by giving up the military initiative, we can hasten a negotiated settlement. Nothing could be further from the truth—unless we are prepared to surrender to the enemy. We must negotiate from a position of strength. The enemy knows that he cannot defeat us militarily so long as we remain in Vietnam, but he hopes to prolong the war to the extent that he can collapse the will of the American people to any longer tolerate our presence there. Unfortunately, such remarks as the Senator made keep alive that hope. I must regretfully draw the conclusion that such remarks, however honestly motivated, may cost far more American lives than were lost in assaulting Hill 937.

It is very easy for those of us enjoying the lofty sanctuary of the U.S. Senate to revile dedicated military men risking their lives and doing their job in the defense of our country, but in the process we assault the morale of our troops and undermine public confidence in the finest class of military leadership the world has seen.

By any objective military standard, the battle for Hill 937 was a success for our side, and our troops are to be commended rather than castigated for it. Winning a battle in the strategic Ashau Valley will bring the war closer to an end and will, over the long pull, reduce the potential loss of American life.

I can think of nothing more stultifying to our commanders in the conduct of the war than to have the tactical decisionmaking process subject to constant Monday morning quarterbacking on the part of Members of Congress.

CONGRESS AND THE ARTS

Mr. DIRKSEN. Mr. President, Howard Mitchell, the musical director for the National Symphony, has called my attention to an article entitled "The Congress and the Arts," published in the Washington Post of May 25. It is a rather provocative article, for one thing, but I think its wide currency could have some real influence.

I have read the article with a great deal of interest, and I think it merits a place in the RECORD. Therefore, I ask unanimous consent that the article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE CONGRESS AND THE ARTS

(By M. Robert Rogers)

The 91st Congress will have to tussle with the issue of Federal participation in the arts in each of its two sessions. In the next few weeks it will be asked to vote on extensive additional funds needed by the Kennedy Center, and it will have to push through an appropriation for the National Endowment for the Arts. In addition, in the next session it will have to decide whether or not the National Endowment survives, since the enabling legislation expires in June, 1970.

Congress will have to make these difficult decisions at a time when the prestigious Ford Foundation has drawn national attention to a mounting economic crisis among performing organizations and museums. Part of the crisis arises from the inability of many artistic endeavors to increase or even hold the

audiences in a time of population and economic growth. "Where are the (concert) customers?" asks the American Musical Digest, published in New York under contract to the National Arts Endowment. "Where are the people?" might ask the National Gallery of Art, which reports that it has been losing attendance since 1963.

In recent times the concept of a Federal bureau devoted to the development of the "arts" was first proposed unsuccessfully to Congress by the Eisenhower Administration in 1957. The idea was revived by President Kennedy. But even he was unable to get favorable action even from a Congress controlled by his own party.

Prodged by Kennedy's cultural aide, Roger L. Stevens, President Johnson used his own legislative skills during the honeymoon period of his Administration to bring about the creation in 1965 of a National Endowment for the Arts. It absorbed the National Council on the Arts (authorized by Congress in 1964) along with Stevens, who was legislated in as chairman of the new agency while continuing as chairman of the John F. Kennedy Center for the Performing Arts. Congress was wary in setting up the new agency, limiting its life to three years and insisting on relatively modest funding.

Last year, when its initial three years of life were about to expire, the Johnson proposal to extend the Endowment came in for tough sledding in the House, with members challenging the method of making grants and the character of many of the subsidized projects. There was particular dissatisfaction with the large proportion of Federal funds (20 per cent) handed out to individuals. Later, through the appropriations procedures, the funding of grants was cut back to \$5.9 million, from \$6.5 million in 1968.

Federal arts executives were quick to express their disappointment and to accuse Congressmen of being culturally backward. Curiously, by standards set by President Johnson himself, Congress was acting rationally in its cautious skepticism. In the longest statement the President had made on artistic policies (Dec. 2, 1964), he had said quite flatly, "The role of Government must be a small one." He continued, "No Act of Congress or Executive Order can call a great musician or poet into existence . . . We can seek to enlarge the access of all of our people to artistic creation."

Johnson's culture chiefs did not systematically use their limited means to carry out his mandate of accessibility. A numerically large scattering of projects was initiated. A few succeeded, especially those initiated directly by State Arts Councils under a program urged by Sen. Jacob Javits (R-N.Y.). Others still in progress may yet succeed. But there were alarming and, to some observers, predictable failures. Among the more expensive of these was the Metropolitan Opera National Company, a junior touring subsidiary which Rudolf Bing and many Met trustees accepted with doubts. They folded it up on their own motion after two years of operations.

A would-be successor was the American National Opera Company, founded with National Endowment backing by Sarah Caldwell of Boston. Despite generous Federal funding, it went literally bankrupt during its first tour.

The essential missing ingredient in each of these cases was the ability to attract audiences. Access of itself is not useful to all the people if the subsidized performance is of interest to only a restricted minority.

Even though some may try to hide it, members of Congress are better educated than the average of their constituents. It follows that a convincing, logical case for the right kind of Federal participation in the arts can be made more easily to the lawmakers than to the voters themselves. Indeed, when the voters of swinging San Francisco recently had direct access through

referendum to a proposal for more municipal investment in the arts, they turned it down.

So President Nixon, to the extent that his Administration may be formulating a Federal arts policy, would be well advised to win the support of Congressmen by offering them a program based on the broadest possible participation by the communities that sent them to Washington. According to competent research, about five percent of Americans are responsive to the so-called performing arts. Unless ways and means are found to start to involve the other 95 per cent, it's going to be increasingly hard to convince the elected representatives of the people that the field should not be returned entirely into the hands of private enterprise.

Perhaps President Nixon may well be able to promote an audience-oriented arts program that will win the confidence of Congress and the increasing interest of the American people.

INEQUITIES IN THE INCOME TAX SYSTEM

Mr. YOUNG of North Dakota. Mr. President, there are many inequities in our present income tax system. There are advantages to certain taxpayers and disadvantages to others. I am hopeful, together with other Members of Congress, that these inequities will be corrected by new legislation during this session of Congress.

One group that is actually being discriminated against are the single taxpayers. A person may be a heavy taxpayer, either single, widowed, or a widower; and, although he may be the head of the household, he cannot take advantage of the "head of the household" exemption.

This is a tax inequity that most Members of Congress recognize, but somehow it has never been corrected. This is an inequity that this Congress must wipe out in the new tax legislation.

Mr. President, a very excellent article on this subject appeared in the Washington Star on May 21, 1969, written by the noted tax authority Sylvia Porter, entitled "Single Taxpayer Needs Help." This is a very powerful argument in behalf of this change in the law. I ask unanimous consent to have the article printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SINGLE TAXPAYER NEEDS HELP (By Sylvia Porter)

Single taxpayers have almost no chance of relief from discrimination in the initial installment of the tax reform bill. The administration did not offer any such proposal in its reform package. And there is no sign that the House Ways and Means Committee is considering this aspect.

In the second installment, there is reason for single taxpayers to expect adjustments in the rates and personal exemption rules which so heavily discriminate against the never-married, the widow and the widower. A Treasury spokesman says, "The need for this reform is very much recognized." A powerful congressman adds that "heavy pressures" from representatives of the single taxpayer "are being felt."

In fact, it could be that if the tax package is delayed until 1970-71, this reform might be part of it. Here, therefore, is a progress report.

The discrimination against the single taxpayer is obvious, harsh—and apparent not only in the tax rate structure but also in

the system for personal exemptions. To be specific:

1. Rates. The married couple has the enormous advantage of being able to split income for tax purposes. If you are married, you pay taxes at substantially lower rates than if you are single. There is no logic to this and it is unfair.

2. Personal exemptions. The single taxpayer has one personal exemption of \$600. The married couple has a minimum of two, or \$1,200. Again, the logic is questionable; it is nonsense to assume that it costs twice as much for the married couple to live as it does for a single person—and the more children, the more exemptions and the bigger the inequity.

3. Dollar totals. The \$600 exemption was voted in 1948. Relentlessly rising living costs since then have reduced it in effect to under \$400. That is pitifully outmoded—and especially for the single person with few other deductions to claim.

When you get to the details, the injustice is even clearer. To illustrate, an unmarried woman supporting an elderly aunt who raised her in a separate household is taxed at a much heavier rate than an unmarried woman supporting her elderly mother in a separate household.

To illustrate further, the personal exemption system was created to protect very low income people and couples with many children; it ignores the middle-income single person. Income splitting was adopted in 1948 to equalize the situation between community property and non-community property states; it also ignores the single person.

The most popular proposals to erase the inequity would broaden the head of household status, with particular reference to the single individual 35 years of age and older.

But a more intelligent approach might be through the system of personal exemptions. By varying person exemptions according to marital status and income levels, the discrimination might be automatically wiped out.

What should a single taxpayer do? Join a group which already has organized to lobby for this reform or organize one on your own. Sign petitions if you prefer this approach. Mail your protests to your congressmen and senators—and keep mailing. Send copies of your protests and/or petitions to the House Ways and Means Committee and the Senate Finance Committee. Make your voice heard!

This is what other groups lobbying for tax laws do, and their success may be measured by the extent to which the tax laws favor them. You deserve to win this relief—and if you fight, you will.

S. 2241—INTRODUCTION OF REMOTE AREA MEDICAL FACILITIES ACT OF 1969

Mr. BIBLE. Mr. President, on behalf of myself and Senators BURDICK, GRAVEL, HANSEN, HATFIELD, JORDAN of Idaho, McGOVERN, METCALF, MONTGOMERY, MOSS, NELSON, PROXMIER, YARBOROUGH, RANDOLPH, and STEVENS, I am today introducing the "Remote Area Medical Facilities Act of 1969."

The purpose of this legislation is to authorize the Secretary of Health, Education, and Welfare to make remote Indian medical facilities available to non-Indians under certain conditions, with the consent of the major Indian tribes served by the facility, and provided that priority is given the needs of Indian people.

The high cost of medical resources and the scarcity of professional skills have clearly delineated the need for more effective utilization of existing health centers and health manpower skills. Throughout the United States there exist

pockets of medical care deprivation, not caused by the lack of resources, but by lack of legislative authority to make existing health resources available to those in need. For example, there are approximately 655 non-Indians residing within a 50-miles radius of the Owyhee, Nev., Indian Hospital and the nearest hospital for these people is at Elko, Nev., approximately 90 miles away.

While other hospitals of the Division of Indian Health located in remote areas are made available to Federal employees and their dependents under existing law, no provision, except for emergencies, has been made for private citizens who reside in the vicinity.

There is legal precedent for extending health care in Public Health Service Indian hospitals to nonbeneficiaries. In Alaska, such care is provided pursuant to 48 United States Code 49. The State of Alaska has designated certain areas as "remote" with reference to the availability of health services, and in these areas the Public Health Service hospitals provide health services on a reimbursable basis to nonbeneficiaries.

The present proposal will extend the Alaska program to all other remote areas in the continental United States.

The use of remote Indian health centers will promote greater areawide health programming where restricted access exists at present. Additionally, the use of such facilities by nonbeneficiaries will assure fuller utilization of these expensive facilities, thereby achieving operating economies. Control of the hospitals would remain the responsibility of the Division of Indian Health thereby maintaining the desired quality of care. The primary mission of the hospital would remain the quality medical care of the Indian community.

Under the proposed bill, the health services provided would be supportive in nature. The bill does not in any way anticipate Federal usurpation of State, local, community, or private prerogative and responsibilities.

It is not anticipated the enactment of this proposal would add to the costs of the Federal Government as services would be provided on a "space available basis" and would be reimbursable.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2241) to authorize the Secretary of Health, Education, and Welfare to make Indian hospital facilities available to non-Indians under certain conditions, introduced by Mr. BIBLE (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

STATEMENT OF SENATOR BIBLE, CHAIRMAN OF COMMITTEE ON SMALL BUSINESS, ON COSPONSORSHIP OF AGRICULTURAL STATISTICS BILL

Mr. BIBLE. Mr. President, I would like to comment briefly on the reintroduction, by the distinguished senior Senator from Alabama (Mr. SPARKMAN), of legislation to establish an annual agricultural trade statistics reporting procedure.

When this measure was initially proposed in June 1966 I was pleased to join in its introduction and cosponsorship then as I am again at this time. I was likewise glad to cosponsor the annual cattle conference bill which was first put forward in August 1967, and reintroduced on May 8 of this year.

It is gratifying to me, as chairman of the Small Business Committee, out of whose investigations these measures arose, that they have attracted broad support in the Senate from both parties and many regions of the country. This year, to date, 20 Senators have cosponsored the conference bill and 17 the statistics bill, which is somewhat more technical.

Unfortunately, in the past there has not been a comparable interest in the executive branch which would enable us to enact these measures.

There are several important reasons why I believe that this interest should develop.

Livestock raising and processing is widely distributed throughout the United States. Sales of cattle and calves represent, on a national average, one-fourth of all cash income received by the farming community. In some States this proportion is even higher. Senator MONTOYA points out that the figure in New Mexico is around 58 percent. In Nevada it is 65 percent. In Colorado it is 69 percent.

As domestic and foreign markets for meat products grow, these regions, and the farmers, ranchers, and meat processors throughout the country, who are overwhelmingly small businessmen, benefit accordingly.

We know that 93 percent of the world's population is located outside of the United States. Many of our farmers and farm organizations have recognized this fact and are profiting by it. The Small Business Committee found, in 1965, that export markets provided U.S. farmers with an outlet for two-thirds of the rice and nonfat dry milk produced in this country, over half the wheat, half the dried peas, two-fifths of the soybean crop, and about one-third of the cotton, rye and prunes.¹

In contrast, only 2 to 3 percent of the total utilization of most livestock products has been marketed overseas in 1967.² A large amount of this 2 to 3 percent total is made up of inedible tallow, lard, hides, and offal or variety meats of which we now export 10 percent of our production.

As our committee has long been saying, the exporting of U.S. quality table meats has been nonexistent for 50 years prior to the committee investigation of 1964-67. It thus appears that livestock, and particularly beef, is a highly underutilized resource in the export trade. A proper export development program would plainly have advantages for small businessmen in the livestock industry and for the U.S. balance of payments. The measures we have introduced during the past week are designed to begin the process of making improvements in this area.

¹ "Expansion of Beef Exports," Senate Report 939, 89th Cong., 1st sess., p. 2.

² "National Food Situation," NFS-124, Economic Research Service, U.S. Dept. of Agriculture, May 1968, p. 33.

I have described the features of the cattle conference bill in my previous statement—CONGRESSIONAL RECORD, May 8, 1969, page S4809. The Trade Statistics Reporting Act would allow Members of Congress to gain a clearer understanding of the trends in agricultural trade and what effect this trade is having on our balance of payments. It would put us in a sounder position to make policy decisions on matters of export and import trade policy.

As I observed, upon the filing of the report which recommended these bills:

While the legislation recommended by this report does not provide an instant answer to the trade and structural difficulties faced by the farmer and the rancher, it does propose a step in that direction, by bringing together those whose experience and judgment are capable of dealing with these problems.

Furthermore, the thrust of the report is that these problems be attacked—in a concerted manner, on a national scale, over the longterm, and within a framework that offers some assurance that appropriate solutions will be proposed and discussed.³

The members of our committee have a responsibility to see that such steps are taken. We intend to pursue these matters. We hope that others in Congress and the executive branch will join us so that all who are concerned with the well-being of small businessmen in the American beef industry can work together for the passage of this and other needed legislation.

THE EFFECTS OF THE UNDERGROUND DETONATIONS AT NEVADA TEST SITE

Mr. MOSS. Mr. President, on April 14 Mr. John H. Meier, executive aid of the Hughes-Nevada Operations at Las Vegas, Nev., sent a letter to the Director of the Atomic Energy Commission in Las Vegas asking 18 questions regarding the effects of the underground detonations carried on the Nevada Test Site. The questions, which are the second of a group to be asked, indicate the deep concern of the Hughes-Nevada Operations on the possible relationship between these detonations and seismic disturbances.

This is a concern shared by many, and only last week the Senator from Alaska (Mr. GRAVEL) introduced a joint resolution to provide for a study and evaluation of this relationship—an objective with which I associate myself wholeheartedly.

Because it has now been over a month since the Meier letter was sent to the Atomic Energy Commission, and there has been no reply, I ask unanimous consent that the questions, which I feel are most pertinent, may be printed in the RECORD.

There being no objection, the questions were ordered to be printed in the RECORD, as follows:

HUGHES-NEVADA OPERATIONS,
Las Vegas, Nev., April 14, 1969.

Mr. ROBERT MILLER,
Director of Nevada Operations, Atomic Energy Commission, Las Vegas, Nev.

DEAR Mr. MILLER: After carefully reviewing the answers given to our recent questions, I

³ Additional Views of Senators Morse and Bible, "Expansion of Livestock Exports," Senate Report 343, 90th Congress, 1st Sess., p. 35.

would appreciate a prompt answer to eighteen additional questions. This will preserve the basic agreement we have in arriving at decisions based upon objective, scientific approaches and help immeasurably in perfecting communications between A.E.C. and the Hughes-Nevada Operations:

1. The U.S. Geological Survey from recent contacts has informed us that the following reports covering underground water from the Nevada Test Site are still in process and may be ready from three to five months from now:

A. "Ground Water Hydrology of the Nevada Test Site."

B. "Water Supply Potential for the Nuclear Rocket Development Station."

C. "Geohydrology of the Eastern Part of the Pahute Mesa."

D. "Geohydrology of Oasis Valley."

How, therefore, can justification for the calculated risk be taken by A.E.C. for any megaton plus tests conducted at the Pahute Mesa or at Hot Creek Valley until these definitive reports on passage of tritium into other parts of Nevada are completed?

2. Is it true that the new Administration Budget for weapons testing to be conducted by the A.E.C. has completely deleted any expenditures for: (A) Plowshare, (B) Feasibility studies on the Peaceful Uses of Atomic Energy, and that this is the reason for some persons wanting to set up another agency to handle the funds?

3. In view of the high probability of venting from extended Plowshare feasibility studies is the A.E.C. prepared to establish and fund a radiation network stretching from North to South in Utah and telemetered into the University of Utah Radiological Laboratory to provide independent information for the State Department of Health in Utah?

4. In view of the A.E.C. and E.S.S.A.'s analysis of the inadequacy of the seismological equipment at the University of Utah to monitor earthquake epicenters and their size in Utah is the A.E.C. prepared to fund an adequate seismological array along the Wasatch Fault which extends vertically throughout Utah? We have been informed that this area contains serious seismic strains which might be released.

5. In view of the acknowledged inadequate seismological equipment of the Seismological Laboratory of the University of Nevada which is unable to determine the epicenter or size of an earthquake in Nevada (to within 20 to 30 miles) would the A.E.C. fund an adequate telemetered array for the University of Nevada to properly monitor the earthquake effects from future escalation of underground explosions? (It is currently impossible to calibrate the findings of Nevada University with the E.S.S.A. daily earthquake reports for location or size).

6. If Plowshare and other Peaceful Uses of Atomic Energy are to be offered to other countries under agreements of the Non-Proliferation Treaty recently signed, why should the desired additional feasibility tests be conducted exclusively at the Nevada Test Site?

7. As the Nevada State Government has no expert on radiation effects in the State Department of Health does the A.E.C. intend to supplement the state's monitoring capability for the X-ray problems in relationship to total radiation problems for the State of Nevada? Are these reports available for public examination?

8. How big will the underground D.O.D. weapons tests go at the Pahute Mesa approximately 105 miles from Las Vegas? How big and when will the tests go at Hot Creek Valley 165 miles from Las Vegas? How big and when will the tests go at Little Smokey Valley approximately 200 miles from Las Vegas? How big and when will the tests go at Amchitka, Alaska? Will these tests be done simultaneously or incrementally by progressive stages before being relocated to the more remote areas?

9. What will be the total megatonnage of

all projected tests for Plowshare and for the Department of Defense weapons in 1969? What was the total megatonnage for Plowshare, Peaceful Uses of Atomic Energy and for the Department of Defense in 1968?

10. If Sudan at 100 Kilotons produced 12,000,000 tons of earth removed, of which 4,000,000 formed the lip of the crater and 8,000,000 were sent around the world with various radionuclides, and a Megaton Plowshare with venting takes place will this release proportionate tonnage of contaminated earth to the upper atmosphere?

11. If the actual and projected costs of safety monitoring and probable damage payments are included in the projected Plowshare experiments will it still be economically feasible and cost competitive compared with standard engineering methods? Particularly in the Canal studies?

12. Was Benham merely a repeat of Boxcar required by the recommendations of the *ad hoc* President's Scientific Advisory Committee headed by Dr. Kenneth S. Pitzer of Stanford last November because of the failure to properly monitor the earthquake, hydrological, and atmospheric effects from Boxcar?

13. As the 800,000 Kiloton Faultless shot placed in a known earthquake fault produced a 5 mile long escarpment rising 16 feet at the middle is similar to the Dixie Valley escarpment from a 7.4 earthquake in 1954 near Fairview Peak, will additional megaton shots produce similar escarpments and seismic vibrations into Carson City, Winnemucca and Salt Lake City?

14. It was stated at the Plowshare Symposium "that it would be necessary to test the new 'Safeguard' A.B.M. Missile at the Pahute Mesa by steps". As either Benham or Boxcar were at 1.25 does this mean stepping up the size for the next test at Pahute Mesa to 1.5 and then to 1.75 before going to Hot Creek Valley at 2.00 in volcanic tuff?

15. In view of the international seminar called S.I.P.R.I. agreeing that it would be possible to hide 3 times the nuclear explosion judged by the seismic shock in the volcanic tuff at the Pahute Mesa this can be interpreted that already we have been subjected to 3 megaton firings there although hidden by the marshmallow volcanic material and that if this factor is factual the next tests are in reality going up to 6 megatons of nuclear energy?

16. Is it possible for the A.E.C. to obtain permission from the Department of Defense to allow the U.S. Geological Survey to drill sufficient wells in the "Walker Lane" Fault as suggested by Hughes-Nevada Operations six months ago to definitively determine if tritium and other water borne contaminants flow from the Pahute Mesa into water systems below the Nevada Test Site?

17. Is the A.E.C. prepared to fund the U.S. Public Health Pacific Southwest Radiological Health Laboratory to conduct tritium studies at deeper wells than the shallow surface wells now being tested after we suggested this be done?

18. Will the A.E.C. fund a complete study of the radioactive contamination by the uranium mills and tailings piles along the Colorado River for the presence of Radium²²⁶ in the water serving the entire Southwest area of the United States?

Inasmuch as these are questions of general public interest and based upon unclassified information available to you, it is our opinion that our request should not be considered confidential but in the public domain.

Respectfully yours,

JOHN H. MEIER.

THE CIGARETTE ADVERTISING CONTROVERSY

Mr. MOSS. Mr. President, as the date—June 30—approaches for the ex-

piration of the provisions of the Cigarette Labeling and Advertising Act which prevent the Federal Trade Commission, the Federal Communications Commission, and other Federal, State, and local agencies from regulating cigarette advertising on the basis of its health hazard to the American people, more and more observers are trying to assess the relative strength of the tobacco and antitobacco forces in the House of Representatives.

Elizabeth Drew, Washington editor of *Atlantic Monthly*, recently wrote a two-part series of articles outlining the situation as she sees it after extensive interviews on both sides of Capitol Hill, and with tobacco industry spokesmen.

I found the second of her series of articles, which deals partly with the Senate, most interesting. I ask unanimous consent to have printed in the *RECORD* the second series of articles as published in the *Denver Post* on May 5, 1969.

There being no objection, the article was ordered to be printed in the *RECORD*, as follows:

HOSTILE SENATE: TOBACCO INDUSTRY FACES MORE OPPOSITION THIS TIME

(By Elizabeth Drew)

WASHINGTON.—The cigarette companies are presenting their case both through their own public-relations men and through the Tobacco Institute. The institute's public relations are handled by William Kloefer, a former newspaperman who has held a number of public-relations jobs, most recently with the drug industry.

A tall, deep-voiced chain smoker, Kloefer explained: "We are going to do a little more in the way of public communication than there has been in the past. The content is not going to be cigarette promotion. That's not our bag. I think it can be characterized as an effort to promote objectivity in this controversy."

The institute's major activities thus far have been the widespread advertising of a Council for Tobacco Research pamphlet, which it describes as a "white paper," entitled "The Cigarette Controversy: Eight Questions and Answers."

CONNECTION DENIED

Says Kloefer: "The issuance of it has nothing to do with the congressional hearings. It is a document that we have worked on for a very long time. It has been very thoroughly examined by people in the industry and scientists who are involved in smoking and health research." He declined to give the names of the scientists. "Just people here and there," he said.

The gist of the "white paper" is that the casual relationship has not been proved, particularly how it works. "Too many factors are involved. And until their roles and their relationships are understood no one can be sure about the role of smoking."

FAVORABLE GROUND

The House Interstate and Foreign Commerce Committee, to which the industry chose to take its case first in this year's battle, has always been sympathetic toward the tobacco business. (When it decided to hold hearings on the industry's bills, the committee didn't inform a member who is its leading opponent of the industry, Rep. Frank Moss of California—a distant relative of Sen. Frank Moss of Utah, and not a Mormon. This is reminiscent of industry tactics in 1965, when company spokesmen persuaded House leaders to call the cigarette-labeling bill up on the House floor while the plane returning Moss from Europe was circling Dulles airport.)

EXPERIENCED HANDS

Both the industry and the antismokers consider the House committee and perhaps also the House floor as the most favorable terrain for the cigarette companies. A former senior member of the House committee, Horace Kornegay of North Carolina, now works for the Tobacco Institute as Earle Clements' second-in-command.

(Among other things, this means that through House and Senate rules extending special privileges to former members, Clements and Kornegay have access to the floors of each chamber during maneuvers over the smoking bills.)

Both sides also agree that the Senate will be more hostile. The antismoking Senate strategists are planning on delaying tactics to kill off the industry bill and if all else fails, Senator Moss has threatened to lead a filibuster on the Senate floor.

GROWING SENTIMENT

"I think there's a growing sentiment in the Senate," Moss says, "that, at least tobacco is indeed injurious." Moss claims some 40 to 45 Senate allies on the issue.

In order to shut off a Moss filibuster, Southerners would have to vote for the "gag" rule they despise and there would be the widely publicized spectacle of an industry organizing the Senate against one of its members defending, as he would undoubtedly put it, the women and children of this country.

There are other reasons why the industry will have more trouble this time. A great deal has happened since 1965. Ralph Nader, for one, has happened, and a number of politicians have learned that defending the consumer is good politics.

SENATORS ANNOYED

A number of senators are annoyed and embarrassed that they were had the last time around. Clements is ailing, and some of his most important congressional allies four years ago have died or retired, and his administrative contacts are not nearly so impressive.

Some White House aides hint that President Nixon will take a firm stand on the side of the health forces, pointing out that the President isn't a smoker. (Neither was Johnson.) Asked at a Feb. 6 press conference what he thought about the just-announced FCC proposal to ban TV and radio advertising, the President commented that "as a nonsmoker, it wouldn't pose any problems to me."

MADE PROMISE

Characteristically, he said he would have an announcement on it later, but as of this writing his position, if any, hasn't been made known.

All that the industry will concede is that, as Kleopfer put it, "The greatest difference since 1965 is the multiplicity of hearsay. There may be a different climate popularly, but there won't be when it comes to a careful adjudication of the facts." Or, as one cigarette company executive suggests, "Perhaps this is no more than a political platform where people can grab headlines and make points at home. What are the motivations of the Mosses and the Hydes? Is it because they are Mormons? I think it's a fraud."

BETTER PREPARED

By this time four years ago, the industry had designed its position in detail and made elaborate arrangements to sell it to Congress, and to some observers it is dangerously, from its own point of view, under-prepared and overconfident. It has done far less than it had before to contact congressmen and smooth the way.

There is a feeling among the industry's Washington strategists that they've done it before and they can do it again. Their attitude is similar to that of the automobile

companies in 1966; they couldn't believe until it was almost too late that congress would move against a great American industry.

MINORITY VIEW

Robert Wald, a longtime Washington attorney for one of the cigarette companies, believes that the industry's strategy to date has been shortsighted. "It is inevitable that TV advertising is going to end, one way or another," he says. "The industry should have been working out an orderly withdrawal with the congressional staffs and the agencies. Warren Magnuson and Bob Kennedy offered them the chance. Instead, the sentiment is to fight this down to the wire and it could end up in a mess, with the industry the likely loser."

Right now, they're getting hammered by the antismoking ads, which are better than their own, and by the antismoking people who are increasingly effective. Most of the industry's own advertising is pretty silly.

NEEDS STABILITY

"What this industry needs is a period of stability, which it probably won't have until the advertising brouhaha is settled." This is the sort of astute advice, offered more in sorrow than anger, which the industry does not yet show signs of accepting.

An increasing number of congressmen are urging that the Department of Agriculture cease supporting and promoting tobacco and instead plan for an orderly transfer to other crops. At this time, the department spends \$1.8 million a year to support the price of tobacco, \$28 million a year to subsidize its export, \$240,000 a year to advertise and promote the sale of cigarettes abroad and \$30 million a year worth of tobacco is sent overseas to developing countries through the "Food for Peace" program.

PERSISTENT RUMORS

There are persistent rumors drawn up on the basis of no cigarette ads in the near future. The loss, one network representative claims, could easily be compensated for with other advertisers. CBS, as a matter of public posture, didn't join with the other two networks and the National Association of Broadcasters in fighting to the Supreme Court alongside the cigarette industry to overturn the FCC's fairness-doctrine ruling. The Straus Broadcasting Group in New York has already imposed limits on cigarette advertising, and recently the Washington Post Co. announced that after June 1 it would no longer accept contracts for cigarette advertising on its AM and FM radio stations. Another indication that a trend might be under way came a little more than a week ago when Westinghouse Broadcasting stopped cigarette ads.

The antismokers would not only like to have cigarette advertising dropped from television, and a tough warning in all ads, but also a continuation of the antismoking ads as a public service. This is undoubtedly more than they can win.

There are, too, mixed opinions as to what effect a ban on TV advertising would have on cigarette use. In Great Britain such a ban has not been reflected in a decrease in smoking. This may be why, despite the strong front in Washington and the complaints of harassment in the executive suites, the cigarette industry is not altogether in tears. Asked what he felt would be the effect of a ban on broadcast advertising, one company executive replied, "I would have a lot of money."

ORDER OF BUSINESS

The VICE PRESIDENT. The time of the Senator has expired.

Mr. MOSS. Mr. President, I ask unanimous consent that I may proceed for 10 additional minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

S. 2246—INTRODUCTION OF THE DECEPTIVE SALES ACT OF 1969

SENATE JOINT RESOLUTION 113—INTRODUCTION OF A JOINT RESOLUTION TO INTENSIFY AND EXPAND ENFORCEMENT ACTIVITIES IN COMBATING HOME IMPROVEMENT FRAUDS

Mr. MOSS. Mr. President, I introduce for appropriate reference two measures which would increase the ability of the Federal Trade Commission to fight consumer fraud. The first bill, the Deceptive Sales Act of 1969, which is introduced on behalf of myself, Mr. CANNON, Mr. HART, Mr. INOUE, Mr. MAGNUSON, and Mr. PASTORE, would empower the Commission to seek a preliminary injunction against a person who it has reason to believe is engaged in an act or practice which is unfair or deceptive to the consumer. The second measure, a joint resolution, which I am introducing on behalf of myself, Mr. CANNON, Mr. HART, Mr. HARTKE, Mr. INOUE, Mr. MAGNUSON, Mr. PASTORE, Mr. SCOTT, and Mr. SPONG, would direct the Federal Trade Commission to intensify and expand its enforcement activities in home improvement frauds. Both of these proposals passed the Senate in slightly altered form last year.

At the present time, when the Federal Trade Commission takes action against a person whom it believes is defrauding consumers, it may be 3 to 5 years before the matter is finally adjudicated. During this time large numbers of additional consumers may be lured into participating in the seller's deceptive scheme. And the seller, realizing that his profits may increase by prolonging the legal proceedings as much as possible, will employ every dilatory tactic available in order to postpone being placed under a final Commission order. If the Commission has the power to seek preliminary injunctions, however, in many of these cases it will be able to go to court and obtain an order prohibiting the seller from employing the challenged sales practices until the formal Commission proceedings are concluded. This additional authority will assist the Commission greatly in stopping unscrupulous sales practices as soon as they are discovered, and it should save numerous consumers from sustaining unnecessary and substantial financial losses.

Similarly, the home improvement resolution will enable the Commission to crack down on a particular type of consumer fraud where personal losses are estimated to range from \$500 million to \$1 billion annually. The resolution would authorize the Commission to conduct a detailed 1-year investigation of deceptive practices employed in the home improvement industry, including a thorough study of the relationship between fraudulent home improvement contractors and their finance companies and between fraudulent home improvement contractors and their product suppliers. In addition, it would authorize the Commission, over a 3-year period, to intensify its enforcement program against

those home improvement schemes which involve violations of the FTC Act. The study will be used to identify those areas where the Commission's resources can be expended with the maximum degree of effectiveness.

Last year, in hearings before the Commerce Committee, both consumer and industry witnesses supported this resolution. Particularly impressive in establishing the need for this program, was testimony by the consumer credit commissioner of the State of Texas, Mr. Francis Miskell. He indicated that home improvement frauds in his State cost consumers \$20 to \$30 million annually. In a survey of 400 fraudulent home improvement transactions which his office conducted, they discovered that 68 percent of the persons affected were employed as blue collar workers; 40 percent earned less than \$400 per month; 40 percent had three or more dependents; and nearly 25 percent had become involved in transactions costing \$2,500 or more. These figures, which probably could be repeated in every State of the Union, give a startling indication of the degree to which fraudulent home improvement contractors focus upon those persons least able to afford their deceptive schemes. The poor, the uneducated, the unsophisticated, and the elderly all need additional protection against the unscrupulous home improvement salesman. Yet at the present time the Trade Commission has, on the average, only a single attorney spending two-thirds of his time on home improvement frauds. This resolution will markedly expand that enforcement effort. It is the first step toward launching a meaningful program to deal with a type of consumer fraud which has already escalated into a national scandal.

Mr. President, I hope that after the extensive hearings which the Commerce Committee held on these bills last year, and after the favorable action by the Senate on both these proposals late in the last session, that we shall be able to quickly enact these measures during 1969. The longer we delay, the more consumer dollars are wasted on fraudulent selling schemes.

I ask unanimous consent to have printed in the RECORD the text of the measures I have introduced.

The VICE PRESIDENT. The bill and joint resolution will be received and appropriately referred; and, without objection, the measures will be printed in the RECORD.

The bill (S. 2246) to amend the Federal Trade Commission Act, as amended, by providing for temporary injunctions or restraining orders for certain violations of that act; and the joint resolution (S.J. Res. 113) to authorize and direct the Federal Trade Commission to conduct a comprehensive investigation of unfair methods of competition and unfair or deceptive acts or practices in the home improvement industry, to expand its enforcement activities in this area, and for other purposes, introduced by Mr. Moss (for himself and other Senators), were received, read twice by their titles, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 2246

A bill to amend the Federal Trade Commission Act, as amended, by providing for temporary injunctions or restraining orders for certain violations of that Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Deceptive Sales Act of 1968".

SEC. 2. That section 13(a) of the Federal Trade Commission Act (15 U.S.C. 53(a)) be amended as follows:

"SEC. 13. (a) Whenever the Commission has reason to believe—

"(1) that any person, partnership, or corporation is engaged in, or is about to engage in, the dissemination or the causing of the dissemination of any advertisement in violation of section 12, or any act or practice in commerce within the meaning of section 5 which is unfair or deceptive to the consumer, and

"(2) that the enjoining thereof pending the issuance of a complaint by the Commission under section 5, and until such complaint is dismissed by the Commission or set aside by the court on review, or the order of the Commission to cease and desist made thereon has become final within the meaning of section 5, would be to the interest of the public,

the Commission by any of its attorneys designated by it for such purpose may bring suit in a district court of the United States or in the United States court of any territory, to enjoin such dissemination or the causing of such dissemination or any act or practice in commerce within the meaning of section 5 which is unfair or deceptive to the consumer. Upon proper showing a temporary injunction or restraining order shall be granted without bond. Any such suit shall be brought in the district in which such person, partnership, or corporation resides or transacts business."

S.J. RES. 113

Joint resolution to authorize and direct the Federal Trade Commission to conduct a comprehensive investigation of unfair methods of competition and unfair or deceptive acts or practices in the home improvement industry, to expand its enforcement activities in this area, and for other purposes

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Trade Commission is authorized and directed to—

(a) conduct a full and complete investigation of the purchasing, processing, marketing (including advertising and franchising), pricing, and financing practices of persons, partnerships, and corporations engaged in producing, selling, installing, or financing home improvement products, or services in connection therewith, in commerce (as that term is defined in section 4 of the Federal Trade Commission Act) with a view to determining whether any such practices are in violation of the provisions of the Federal Trade Commission Act, and whether further legislation is needed to protect competitors and consumers adequately from such practices;

(b) transmit to the Congress within one year after the effective date of this joint resolution, a report which shall include a comprehensive statement of (1) the facts and circumstances disclosed by such investigation, (2) the action taken and contemplated by the Commission with respect to violations of law disclosed by such investigation, and (3) such recommendations for further legislation as the Commission may deem appropriate;

(c) undertake an intensified and expanded enforcement program with respect to any such violations of the Federal Trade Com-

mission Act within the home improvement industry; and

(d) transmit to the Congress within six months after the effective date of this joint resolution and annually thereafter for three years, a report which shall include a comprehensive statement of (1) the status of these enforcement activities, including a brief description of the action taken and contemplated by the Commission under its enforcement program, and (2) such recommendations for further legislation as the Commission may deem appropriate.

SEC. 2. (a) The Commission is authorized, whenever it has reason to believe—

(1) that any person, partnership, or corporation is engaged in, or is about to engage in, an unfair method of competition in commerce, or an unfair or deceptive act or practice in commerce within the meaning of section 5 of the Federal Trade Commission Act, and in connection with the production, sale, installation, or financing of home improvement products, or the performance of any services in connection therewith, and

(2) that the enjoining thereof, pending the issuance of a complaint by the Commission under section 5, and until such complaint is dismissed by the Commission or set aside by the court on review, or the order of the Commission to cease and desist made thereon has become final within the meaning of section 5, would be to the interest of the public,

to bring suit, by any of its attorneys designated by it for such purpose, in a district court of the United States or in the United States court of any territory, to enjoin such unfair method of competition or such unfair or deceptive act or practice. Upon proper showing a temporary injunction or restraining order shall be granted without bond. Any such suit shall be brought in the district in which such person, partnership, or corporation resides or transacts business.

(b) Authorization conferred upon the Commission by this section shall not continue in effect after a date which follows by three years and six months the effective date of this Act. Nothing contained in this subsection shall be effective to abate any proceeding instituted by the Commission during the effective period of this section, or to prevent the enforcement of any injunction or order issued by any court in any such proceeding.

SEC. 3. There is hereby authorized to be appropriated to the Federal Trade Commission the sum of \$300,000 each year for three years to carry into effect the provisions of this joint resolution.

SEC. 4. This joint resolution shall take effect on the date on which funds to carry into effect the provisions of this Act first become available to the Federal Trade Commission pursuant to an appropriation Act enacted after the date of enactment of this Act.

FINANCIAL DISCLOSURE BY ALL GOVERNMENT OFFICIALS

Mr. MOSS. Mr. President, I rise to support the majority leader, the Senator from Montana (Mr. MANSFIELD) in his call for legislation to require all Government officials in all branches of the Federal Government who make more than \$18,000 a year to disclose all outside sources of income.

There is no question but that we need a general standard which applies to all branches of the Government—executive, legislative, and judicial—and which will inform the public completely and fully on all outside income, including outside honorariums—which high public officials receive. In fact, no person should be allowed to ask for election to high public office, or to accept Presidential appointment and ask for Senate confirmation for that office, without making public all

sources of the income which he or she receives. I think Senator MANSFIELD's suggestion that all officials who make more than \$18,000 be included in this disclosure requirement is a good one, because many jobs compensated over this level are political jobs, and all of them are jobs of responsibility, and often of some sensitivity.

For several years I have made a practice of fully disclosing all of my outside income, and have made this disclosure in the form of a statement here on the Senate floor on several occasions. I shall most certainly do so again before I ask reelection to the Senate.

Mr. President, the time has long since passed when Federal officials have the right to hold high office without telling the public where their outside financial interests lie, so the public may weigh their votes and their other actions in the light of these interests.

Public officials who hold high offices should, and must, be above suspicion.

CAMPUS DISORDERS

Mr. MOSS. Mr. President, the continuing turmoil and disorder which is sweeping the Nation's colleges and universities has been too long endured. It must cease.

When small groups of students and nonstudents seize buildings, shut down classes, hold hostages, steal records, destroy property, and commit other violent acts which clearly are criminal, they should be treated as criminals.

What is happening today on American campuses is a national tragedy, but to me its most grievous aspect is that we are permitting our young people to break the law—and get away with it.

Adequate local and State laws and law-enforcement machinery exist for dealing with students and others who violate the criminal laws through trespass, conversion, and destruction of property and intimidation, assault, coercion or restraint of university officials, students and faculty. There must be prompt and effective enforcement of these laws.

The school administrations have the power to call in the peacekeeping authorities and to request full enforcement of the law. They can also make use of the courts through injunction proceedings and contempt findings.

They likewise have in their own hands the ultimate weapon for dealing successfully with campus turmoil. That weapon is expulsion of each person found guilty of breaking the law or, indeed, school regulations. There may be a few tough-skinned militants who care not if they are booted out of half a dozen universities, but many students do not want "expelled" on their record any more than they would want to have to answer the rest of their lives as to why they received a "dishonorable discharge" from military service.

We are finding that in most instances when university and college authorities act decisively and with firmness, the campus crisis ebbs. Notre Dame, Dartmouth, and more recently, George Washington are examples. And, as more and

more institutions show capacity to deal effectively with student unrest, campus disorders seem to be leveling off.

Now, I do not mean to say here that all we have to do to end dissatisfaction and disorder on our university and college campuses is to call in the local police or the National Guard. There are times when the only thing which can be done, and which must be done at the moment, is to restore law and order. But the full formula—the long-term formula—which universities must apply to deal effectively with student unrest requires that the firmness necessary to end militancy be combined with improved communications among students, administrators, and faculty, and quick acceptance of reasonable and justified student requests.

I am sure there is no thoughtful, well-informed person in America who is not aware that some student demands are justified, and this bright, aggressive, non-nonsense generation of young Americans now in college is well qualified to make recommendations which will improve and make more relevant our institutions of higher learning.

And I am confident that no one wants to deny these students the privilege of making these recommendations. Our universities have traditionally been the place where there is full freedom of expression and where the right to dissent has never been questioned. It is only through the interaction of questioning minds and open discussion that we have, through the years, arrived at some measure of truth in various fields of learning.

We must preserve this atmosphere and underline these rights. We must encourage students to keep open, questioning minds, not only about what they are being taught, but how the teaching is being done. We must reserve to them the privilege of intellectual challenging of the actions and the decisions of faculty and college administrations—actions and decisions about curriculum, methods of teaching, and priorities in all aspects of college life.

However, no institution can endure if the right to question is interpreted as the right to physical violence or obstruction of the rights of others. Academic freedom is one thing. Academic anarchy is another.

A list of grievances presented in an intellectual nonviolent way is commendable. A list of "nonnegotiable demands," presented on a wave of physical violence, is intolerable.

It helps a little, I believe, to understand what is happening if we put the campus disorders in perspective. Only a small percentage of the overall national student population actually participates in the turbulence and turmoil. A hard corps of activists or militants on our college campuses are the center of disorder. Their objective, I am convinced, is not administrative reorganization of our colleges or improvement of the curriculum, but revolution for revolution's sake. They seek complete overthrow of the existing system.

This group is sharp enough to keep its finger on the student pulse, and to include in its unreasonable and nonnego-

tiable demands some requests which have the support and backing of large numbers of the rank-and-file students. This serves to swing blocs of student opinion behind the rioters when peace-keeping authorities are brought into the picture—particularly if someone cries "police brutality," whether this is true or not.

I am frankly very much concerned, Mr. President, about the built-in antagonism of many of our people, including many students, to the use of police. Why? Police are essential in a civilized country. We must have law and order. Without it modern society cannot endure.

All too often calling in the police in a college disorder turns otherwise passive students into active revolutionists. Thus, college administrators hesitate—and often hesitate too long—before calling in peacekeepers. They say that to defy the radicals means campuswide chaos. Yet, I would point out that to appease these radicals only invites further assault. Reasonable authority exercised in a firm and commanding way is the best way to end the strife.

And I would ask students who are outraged when the police are called in seriously to consider what will happen to their future if peace is not restored to the campus—and if the university itself is not preserved?

Many people in Utah have written me to ask that the Federal Government intervene in campus disorders. I have told them I believe this should not happen. Basically, the problem of revolt on the American college campus is one which college administrators must meet and handle. The only way I think the Federal Government can rightfully be involved is to make sure that no one who is convicted of a criminal act in a campus disorder continues to stay in school at the expense of the Federal taxpayer.

I supported the amendments enacted last Congress to withdraw Federal grants or scholarships of research assistance from any student convicted by due process of campus riot. If these amendments are not enforceable—and I understand there are some problems—I stand ready to strengthen them. It grieves me to acknowledge that perversion of Federal aid to education evidently does exist on some campuses. This must not be allowed. Federal assistance to students, however small the amount, must not be used to harm or destroy our educational system.

We have been fortunate in Utah that we have had no substantial college disorders. I consider this a tribute to our college administrators, to our faculty members, to our students, and to our citizens. They have adhered to the high purposes of education even though they sense and feel the ferment on campuses in other States. It may also be a testimonial to the discipline inherent in the value systems of our people. No less than others, Utah students want changes, improved curricula, freedom from meaningless restraints, but they have shown maturity, wisdom, and good sense to pursue these goals by persuasion and participation, without violence, disorder, and destruction.

But our own good fortune does not lessen our concern for other States where student disorders do appear. Without denying students the right to dissent, debate, and peaceably to assemble, these riots must cease.

MONTANA'S SMOKEJUMPERS

Mr. MANSFIELD. Mr. President, in Missoula, Mont., we have the Smoke Jumping Center of the Forest Service. It is one of the most efficient and effective organizations that I know of.

Two smokejumpers made the first airborne assault on forest fire, in 1940. Since that time, more than 84,000 jumps have been made.

The personnel at the Smoke Jumping Center consist on the average of about 425 of the Nation's most rugged and daring young men, many of them college students, but not all of them. For their work they receive on the average of between \$125 and \$150 a week, working long hours and being prepared at all times to go by plane, by helicopter, or other means to put out forest fires in remote areas.

With smokejumpers and scientific firefighting equipment and techniques such as aerial chemical drops, helicopter supply flights, and radio communications, the Nation's annual forest fire loss has been whittled from 30 million acres to 5 million acres a year. That is still entirely too much, but I suppose it is to be anticipated, considering the growth in population and the use by our people of the scenic resources of our country—especially in the western Rocky Mountain area.

Mr. President, these men, who are known as "Smokies," have done a magnificent job. They have earned more for the Nation than what the Nation has expended on them.

I ask unanimous consent to have printed in the RECORD an article entitled "Smoke Jumping—What a Way To Make a Living," written by Bill Nelson, and published in the Christian Science Monitor of Friday, May 23, 1969.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, May 23, 1969]

SMOKE JUMPING—WHAT A WAY TO MAKE A LIVING

(By Bill Nelson)

The wisps of smoke curling up from the Kootenai National Forest are unmistakable. A United States Forest Service spotter quickly phones in the report.

Fire in the Parsnip Mountains (of Montana).

This will be a tough one; the roadless site and rugged terrain make it difficult to reach.

The alarm is flashed 250 miles away—to the smoke-jumper base in Missoula. Just two hours later, the silence of the mountainside forest is broken by the throb of an airplane engine. The plane circles the fire, then 12 parachutists leap out, their chutes billowing in a splash of orange and white nylon.

Minutes later, the men are on the ground, battling the fire. They pitch dirt at it, dig trenches around it, spray it with creek water, chop down burning trees, set backfires to rob the oncoming blaze of fuel.

A forest fire is a terrifying spectacle—

balls of flame leaping from treetop to treetop, a scorching heat (sometimes as hot as 1,400 degrees), smoke masking the burning sun, the eerie whistling of a ravenous monster devouring billions of pine needles.

A call goes out for more help. Soon, 48 other jumpers drop down to the Parsnip Mountain inferno. The battle is grueling—sweaty, grimy, bone-wearying work—but the fire-fighting crews stop the hungry red foe.

The airborne fire fighters—the mobile, first-on-the-scene attack force—have put the brakes on another of the summer fires spawned by lightning in the tinder-dry forests of the West. These bold young men are the commandos, the shock troops, of the forest service's fire-fighting corps. Their ranks contain 425 of the nation's most rugged and daring men.

Since a July day in 1940, when two smoke-jumping pioneers made the first airborne assault on a forest fire, more than 84,000 smoke jumps have been made. The savings—in back-country timber, wildlife habitats, watersheds, spectacular mountain scenery that American tourists so enjoy—have been enormous.

Through smoke jumpers and scientific fire-fighting equipment and techniques (such as aerial chemical drops, helicopter supply flights, radio communications), the nation's annual forest-fire loss has been whittled from 30 million acres to 5 million.

The men who comprise the "smokies," as they're called, are trim, tough, and in peak condition. Their ages range from 18 to 28 and they weigh less than 180 pounds each.

The ratio of applicants to qualifying smoke jumpers sometimes runs as high as 6 to 1. The men must pass a four-week training course so rigorous that scores of talented men wash out.

Many of the jumpers are college students and teachers looking for an exciting and constructive vacation job. Others are athletic young men with a yen for adventure.

Smokies aren't lured by the money. Starting pay is less than \$3 an hour—and it gets only a little better with experience. Most jumpers earn less than \$150 a week—despite the long hours, peril, and back-breaking work.

But the thrill of parachuting into the nation's most rugged mountain country and of protecting nature's masterwork is incomparable, they say. And the pride a man feels when he qualifies for one of the toughest jobs in the country is another incentive.

Smoke jumper Mike Cook of Fairfield, Idaho, puts it another way: "I decided there had to be a better way to get to a fire than walking, so I joined the smoke jumpers."

Despite the arduous work, the fatality rate is virtually zero. The only blot on the record occurred in August, 1949, in the Mann Gulch fire near Helena, Mont. A shift of wind trapped 12 smoke jumpers, and they were unable to escape the ravaging flames.

Since jumpers often land in trees (some of them towering, 100-foot pines), they wear nylon jump suits and wire-mesh facemasks attached to plastic helmets for protection against branches. Each man carries a nylon line coiled in a leg pocket. If he gets snagged in a tree (jumpers often must aim for postage-stamp-size clearings), the jumper uses the line to lower himself from a tree like a mountain climber rappelling down a cliff.

Ex-military planes, many of World War II vintage, take the smoke jumpers to fires. They lumber along at 1,500 feet, then slow almost to stalling speed as they circle. A spotter checks the wind by throwing out a streamer and instructs the pilot on the best glide path. He briefs jumpers on what they can expect in the way of wind, fire, terrain, and timber.

Spotter Bob Montoya, a seven-year veteran, says the responsibility can be overwhelming.

"Being a spotter scares me more than jumping," he admits. "You've got to gauge the winds perfectly so that jumpers won't be blown into the fire or into the trees."

In time, spotters develop a sense of timing so precise they can almost drop a jumper on a dime.

Now the calculations have all been made. Jumpers hear the magic words: "Hit the silk." They're out of the plane . . . falling, falling, falling.

Trees swirl below. They see a kaleidoscope of color—smoke, flames, blue sky, fluffy white clouds, the ground rushing up.

Jumpers come down as close on the upwind side of the fire as they can, landing with the Allen roll (a twist and back somersault) they've practiced so many hours—to spread out the shock over the whole body.

Then down float the cargo parachutes, carrying the fire pack (with shovel, ax, sleeping bag, flashlight, and sometimes a chain saw, plus two days' rations and radiophones).

Unlike the early fire fighters who spent weary hours hiking to a fire, smoke jumpers are fresh when they arrive. And they have had a chance to observe the fire from the air and judge its probable course. But jumping is only a means to an end. Now the jumper must be able to follow a compass course, compute the area of the fire, carve out firelines, use a radio, operate a marine pump.

The well-padded nylon suit comes off and the orange hard hat goes on (jumpers also wear fire-resistant orange shirts).

To build a fireline, smoke jumpers cut away brush, logs, and trees, and scrape away the burnable litter on the forest floor. Many lines are 8 to 20 feet wide—a barren stretch that most blazes cannot hurdle.

The philosophy of the jumpers is simple: "Hit hard and hit fast." Their tactic: Put out the fire while it's small, before it has a chance to make headway.

When their work is done, the jumpers clear an area for a helicopter to land and take them back to their bases, strategically located near forests. The bases are clearly of western origin—Cave Junction, Ore.; Silver City, N.M.; McCall, Grangeville, and Idaho City, Idaho; Missoula, Mont.; Winthrop, Wash.; and Redding, Calif.

On busy days, some smokies may make two jumps.

In 1967 they logged more than 7,500 jumps during the fire season. But despite the rigors of the job, it has light moments too.

Jumping on an Alaskan fire last summer, Mike Cook saw a "big, black thing on the ground." Must be a boulder, he thought, and landed only inches away.

"My boulder turned out to be a black bear," Mr. Cook said. "But it was as frightened as I was; took off like a scared rabbit."

Three-year veteran Bill Weaver still gets ribbed about his jumping debut.

"I came down quite a distance from the other jumper," he recalls. "It was a small fire, and I got twisted around and never did find the fire."

But mental lapses are few and far between with the well-trained smokies. The caliber of men remains high year after year.

"It's quite a way to make a living," says one veteran, "but it sure gets in your blood."

MILITARY POLICY IN VIETNAM

Mr. BYRD of Virginia. Mr. President (Mr. Moss in the chair), I have long felt that the Congress of the United States has abdicated many of its responsibilities.

I have long felt that the U.S. Senate has an obligation to give more than perfunctory consideration to foreign affairs.

I have long felt that the Senate of the United States has a joint responsibility with the President in the making of foreign policy. That is why I shall strongly support Senate Resolution 85 introduced by the distinguished Senator from Arkansas (Mr. FULBRIGHT).

But while the Senate has a definite responsibility in the field of foreign policy, I feel equally strong that it has no business in attempting to determine military tactics; it has no business in attempting to determine what methods and procedures should be used in protecting the lives of American soldiers on the battlefield in a far-off land.

In my judgment, the United States has made two fundamental errors in regard to Vietnam.

First, it was a grave error of judgment to become involved in a ground war in Asia; second, that error was compounded by trying to run the war out of Washington.

Former Secretary of Defense McNamara, who recommended the sending of large numbers of troops to Vietnam, simultaneously recommended to President Johnson that these same troops be required to fight the war with one hand tied behind their backs.

There are 100 Members of the Senate; and those who wish to do so can defend Mr. McNamara, but the Senator from Virginia will not be one of them.

While I disagreed with the McNamara-Johnson policy approach, I recognized the President as the Commander in Chief of our Armed Forces.

But in recent days some seem to feel that military tactics and military strategy affecting our troops in Vietnam should be determined on the floor of the U.S. Senate.

I submit we cannot logically have 100 commanders in chief.

It may be that one or more Senators may have greater military ability than the professional military leaders on the scene in Vietnam.

But can any Member of the Senate logically believe that he can determine from the floor of the Senate, or from the banquet hall of a leading U.S. hotel, battlefield tactics 9,000 miles from the scene?

I am deeply concerned as to the safety of the 540,000 Americans in Vietnam.

I am convinced that trying to run this war out of Washington, such as did Mr. McNamara, prolonged the war and increased the casualties. If, at this point, we try to run the war from the U.S. Senate, the results may be even more disastrous.

I say again that from the beginning I have felt it an error of judgment to become involved in a ground war in Asia.

But so long as we have vast numbers of American military personnel there, I would strongly recommend that we permit the military leaders in the field to determine how best to protect those men, subject only to the orders of the duly elected Commander in Chief.

PRESIDENT JOHNSON AND PRESIDENT NIXON HAVE KEPT FAITH WITH THE LATE PRESIDENT JOHN F. KENNEDY

Mrs. SMITH. Mr. President, the safe return of the Apollo 10 astronauts today comes almost to the day on the eighth

anniversary of the pronouncement and commitment by the late President John F. Kennedy to giving top priority to landing a man on the moon and returning him safely to earth.

Too many of the critics of the space program have forgotten that it was just 8 years ago yesterday—on May 25, 1961—that President John F. Kennedy committed our Nation to this goal. He made that commitment under rather serious and special circumstances—before Congress in a joint session—and even more pointedly in a joint session on what he termed to be urgent national needs and when he said:

First, I believe that this Nation should commit itself to achieving the goal, before this decade is out, of landing a man on the moon and returning him safely to earth.

The successful completion of the Apollo 10 mission is the last step prior to achieving the top priority goal set by President Kennedy 8 years ago—a goal on which both of his successors, President Johnson and President Nixon, have kept the faith with John F. Kennedy.

In like manner, Presidents Johnson and Nixon kept the faith with the late President John F. Kennedy on another extremely serious commitment that he made—the commitment of defense of freedom in South Vietnam just as President Truman committed our Nation to defense of freedom in South Korea. And as the late President Eisenhower brought the fighting in South Korea to an end by his firmness as well as patience, so is President Nixon trying to end the fighting in Vietnam by firmness and patience and refusing to make a surrendering unilateral withdrawal.

Yes, the safe return of the Apollo 10 astronauts today is most gratifying to all Americans. While we are proud of them for their courage and for their spectacular achievement for the United States—and, yes, for the world—our greater feeling is our relief and gratitude to God that they have returned safely.

On their return, I say to them that I believe in what they have done; and, like John F. Kennedy, I believe in the space program to which they are so dedicated and on which they have risked their lives. I want to say this because they will learn that while they were on their mission the accelerated manned space program was questioned and criticized, and it was suggested that its importance, vigor, and priority be downgraded. That challenge to the space program went to the brink of suggesting, in effect, that we yield technological supremacy in space to the Soviet Union.

I wish to disassociate myself from the challenge to their mission and the challenge to the mission of those brave soldiers who were trying to take the Hamburger Hill fortress overlooking the Ashau Valley in South Vietnam. Instead, I prefer to give to both missions, and the men committed to those missions, moral support from back here at home.

Challenges, whether they be dissent from the loyal opposition or not, can be valuable and constructive. They are not to be denied. They are not to be discouraged. But it is hoped that they are to be constructive and positive rather than negative in character.

That is why I was gratified when, this past Friday, the leader of the loyal opposition in the Senate—the Senate majority leader (Mr. MANSFIELD)—when asked to comment on the Hamburger Hill battle in Vietnam, was reported to have said that he could understand the necessity for the attack if the military is to continue to keep the military pressure on the North Vietnamese as indicated when they last determined to cease bombing.

I commend him for refusing to grasp a partisan advantage—for refusing to second guess—for executing his responsibility of loyal opposition on such a high level. I thank him for the judiciousness and the discretion of his response when asked about the Hamburger Hill mission. His maturity, his sense of responsibility, his resistance to unfair partisanship—and his own military experience and knowledge—were reflected in his statement.

Since our commanders deemed the taking of Hamburger Hill to be vital for the protection of our soldiers in the valley below the hill, it serves no useful purpose to second guess that mission as senseless. In my reservation to dissent from the dissent expressed, I must say that, while I uphold the right to dissent, as I did in my declaration of conscience. I question not only the justification and responsibility of the words of the dissent to which I refer, but I question the timing of the challenges to the missions in space and on Hamburger Hill.

On the other hand, I am grateful for the timing, as well as the spirit, of the expression of the Senate majority leader. He has done so very much to bring current loyal opposition back to balance and responsibility.

COAL MINE HEALTH AND SAFETY LEGISLATION

Mr. WILLIAMS of New Jersey. Mr. President, the Senate Subcommittee on Labor has recently concluded 9 days of hearings on coal mine health and safety legislation. The House subcommittee has held equally extensive hearings. Since this legislation is so vitally needed to protect the health and safety of our men who go down in the mines, I as chairman of the subcommittee, invited everyone who was concerned to submit ideas to the subcommittee and to introduce bills embodying their proposals. Our hope was to have the benefit of every conceivable proposal before we reported out legislation.

I issued a special invitation to the Secretary of Labor to testify before the subcommittee since we are dealing with the welfare of working people. Mr. Shultz, however, elected to file a statement for the record and then only after the hearings had concluded. Last Friday the reason for Mr. Shultz' reluctance to appear became apparent.

The Congress, in considering this legislation, is concerned with many aspects of health and safety. One of the most important issues, however, is how to prevent coal workers' pneumoconiosis—"black lung." Witness after witness has testified that we can eliminate black lung and save thousands upon thousands of miners from the constant pain and

suffering of 20 years of breathlessness and even death if we introduce proper methods of coal dust suppression.

After extensive study and hearings and close consultation with the Surgeon General, during 1968, the Department of the Interior, under Secretary Udall, advanced a proposal which would have required coal mine operators to reduce the coal dust level to 3.0 milligrams of dust per cubic meter of air.

Also, after very careful study and after public hearings, Secretary of Labor Willard Wirtz issued regulations which would have set a 3.0 level for coal mine operators who do business with the Federal Government. The Surgeon General, as recently as March of this year, testified before the Subcommittee on Labor that not only is a 3.0 level attainable but that from a medical standpoint it is preferable because the health of the coal miner is better protected. As a matter of fact, "ideally" he would "recommend no dust."

This is the testimony of the Nation's highest medical official.

Now comes a new Secretary of Labor. One of his first actions is to defer the effective date of the Wirtz regulations for 90 days in order to study the problems. Although those of us working to prevent black lung regretted the delay, I felt there was justification for Mr. Shultz' delaying order because he was so new to the job.

Since that time, however, events have demonstrated that the Nation's coal miners will not be protected from the dreadful black lung disease if matters are left unchallenged in the hands of Mr. Shultz and the Nixon administration.

On March 4, 1969, the Nixon administration bill on coal mine health and safety was introduced in the Senate. Despite the prior findings of the Surgeon General, the Nixon administration's proposal would allow the dust level to reach 5.5 milligrams per cubic meter before miners "shall be withdrawn from" the mines. Then corrective action has to be taken to reduce the dust level to 4.5. While the Congress is debating this vital issue, vital in every sense of the word, this issue of life or death to our coal miners, Mr. Shultz, by administrative fiat, rescinds the Wirtz regulations of 3.0 for mines producing coal for the Federal Government and sets a new, higher level consistent with the administration proposal.

Does Mr. Shultz hold hearings on his proposal, as did Secretary Wirtz and the Congress? He does not.

Does he make extensive study or invite the medical profession to testify? He does not.

Does he come before the Subcommittee on Labor to offer us the benefit of his newly acquired wisdom? He does not.

Does he even share any of his wisdom with the subcommittee in his statement on the pending legislation filed for the record only 2 weeks ago? He does not.

Does he publish the full report of his advisory committee? He does not.

And do you know the reason he does none of these things. Because, in the words of his advisory committee, the change is "not major enough to make desirable a reopening of public hearings." This should not surprise us. For

Mr. Shultz is not yet convinced that black lung is caused by coal dust. In Mr. Shultz' words, "Overexposure to excessive coal dust is apparently a cause of pneumoconiosis," and I emphasize the word "apparently."

I find the medical opinion of the Surgeon General more concerned with the health of the Nation's coal miners than that of Secretary of Labor Shultz.

The Surgeon General knows for a certainty that black lung is caused by coal dust and he knows that 50 percent more miners will get black lung if you increase the level from 3.0 to 4.5.

Mr. Shultz' actions have greatly fortified my resolve to write legislation which places the responsibility for setting the coal dust level in the hands of the Surgeon General. This resolve, I might add, is supported by every doctor who has taken a position on this issue, by rank and file miners, by the United Mine Workers of America, and by small coal mine operators.

Only the operators of the large mines and the Department of Interior want to take this vital health consideration away from the Surgeon General. And I will do all within my power to enact legislation which calls for a level of 3.0 to start with and an unambiguous mandate to the Surgeon General to reduce that level even further as early as possible.

Mr. President, if I sound extremely disturbed by Mr. Shultz' decision, it is not only because 50 percent more miners producing coal for the Federal Government will be subject to "black lung," although, Lord knows, that is reason enough. But the decision further demonstrates the philosophy and methods of operation of the administration.

According to the New York Times:

Coal industry leaders have testified this year that a savings of millions of dollars in coal dust suppression costs lies between the 3.0 and 4.5 milligram standards.

But coal mine safety is not the only area in which Mr. Shultz has gutted safety standards. He also has reduced the decibel rating standards which are designed to protect workers supplying goods to the U.S. Government from the very real hazards of noise.

Is this administration determined to trade dollars for human lives and safety? It would appear so.

I feel that the administration's actions show clearly that it is committed to Government by fiat; a course specifically designed to remove Congress from the decisionmaking process.

While the Congress had before it the proposed Job Corps budget, the administration, by fiat, gutted the program without giving Congress the time to consider the matter. This was done despite the specific request that no action be taken without prior consultation with Congress.

Then while Congress is debating one of the most important issues ever confronting mankind, the ABM, the administration, by fiat, begins the procurement process, without giving Congress the time to consider the matter. This was done despite the specific promise that no action would be taken without prior consultation with Congress.

Now, while Congress is preparing to act on an issue vital to the health of

miners, the administration, by fiat, sets its own standards without giving Congress the time to consider the matter. This, too, was done without prior consultation with Congress.

We, as elected Representatives of the people, must make it crystal clear to those executives that we will not tolerate such blatant disregard for the democratic process upon which our republican form of Government rests. We must, regardless of political affiliation, oppose Government by executive fiat, regardless of which party controls the executive branch. We must fulfill our obligations to the citizens we represent, to see to it that the laws that we the Congress, enact, are faithfully, not surreptitiously, executed.

PRESIDENT NIXON SUPPORTS THE CONSUMER REVOLUTION

Mr. PROXIMIRE. Mr. President, the President's recent appointee to the job of Special Assistant for Consumer Affairs, Mrs. Virginia H. Knauer, demonstrates the growing and bipartisan support for consumer legislation.

In testimony before the Committee on Banking and Currency, Mrs. Knauer came out squarely for S. 823, the Fair Credit Reporting Act, which I introduced on January 31. Moreover, in calling for a strong bill she clearly indicated that she was speaking not only for herself, but for the Nixon administration.

Mrs. Knauer also testified before the National Commission on Product Safety on May 1 and suggested that mandatory Federal safety standards might be needed if industry itself does not do a better job in promoting product safety.

The strong support given by the administration to consumer issues and consumer legislation is a clear indication that the consumer revolution has become a permanent part of our public policies. It is most encouraging to those of us in the Congress who have sponsored consumer legislation in the past to note the strong endorsement which is apparently being given to such legislation by the present administration. Given this record of bipartisan cooperation, I am confident that the 91st Congress can equal or surpass the giant strides made by the 90th Congress in enacting consumer legislation.

Mr. President, as evidence of the momentum being developed for consumer legislation, I ask unanimous consent to have printed in the RECORD an article about Mrs. Knauer and her activities on behalf of consumer causes, published in the New York Times of May 26, 1969.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NIXON'S CONSUMER AFFAIRS AIDE OFF TO GOOD START: MRS. KNAUER DRAWS PRAISE AFTER SENATE TESTIMONY

(By John D. Morris)

WASHINGTON, May 25.—Virginia H. Knauer, who says she is an activist, has been doing her best to prove it during her seven weeks as President Nixon's special assistant for Consumer Affairs.

She has also been trying to dispel the notion that the Nixon Administration is insensitive to what is called the "consumer revolution" and that it has downgraded the Federal role in protecting consumers' rights.

On both counts—following a rash of speeches, testimony at hearings and television appearances—Mrs. Knauer is credited with a good start, even by some of the most ardent consumer advocates.

Her most convincing performance, in the estimation of many observers, took place last week when she testified before a Senate banking subcommittee on a bill for the Federal regulation of private credit investigating and reporting concerns.

Mrs. Knauer not only endorsed the bill but also proposed stiffening amendments. Significantly, she made it clear under questioning that she was speaking for the Administration.

Officials reported later that Mrs. Knauer had received specific White House authorization to give the testimony on behalf of the Administration.

This was the first concrete evidence since her appointment April 9 that Mrs. Knauer would be granted the same degree of authority as her predecessor in the Johnson Administration, Betty Furness.

It was also regarded as an indication that the Nixon Administration, as long as Mrs. Knauer is its spokesman on such matters, will be bolder than anyone had expected in dealing with the sensitive issue of Federal regulation on business to protect the consumer.

Senator William Proxmire, author of the "Fair Credit Reporting" bill and chairman of the subcommittee considering it, expressed surprise and delight at Mrs. Knauer's testimony.

"President Nixon," the Wisconsin Democrat said in a press release, "deserves great praise for appointing this fine and very able lady to the difficult and demanding job of consumer adviser."

"Mrs. Knauer's testimony is an indication that the Nixon Administration intends to make a significant effort on behalf of the consumer—an effort many of us feared might not be forthcoming."

In another performance, Mrs. Knauer made a hit with the consumer-oriented National Commission on Product Safety at a Chicago hearing on May 1.

SEALS HELD MEANINGLESS

She described "safety seals and standard-certification seals emblazoned on the finish of many consumer products" as "meaningless at best and deceptive at worst." She suggested that mandatory Federal safety standards might be needed unless industry did a better job voluntarily.

In a speech in Philadelphia two weeks later, Mrs. Knauer indicated that her conception of the job was perhaps even broader than Miss Furness's. Moving into the field of environmental health, she said:

"We are surrounded by potential hazards to our health and life in the environment in which we live. Of what use is the financial and economic protection of the marketplace if we do not have the elementary and basic protection of clean air to breathe, pure water to drink and uncontaminated food to eat?"

"If we cannot live and function in our environment, it becomes pretty academic as to how we spend our money or whether the right label is on the right can. Our over-all concern must be environmental health."

PESTICIDE PERIL-X

Mr. NELSON. Mr. President, 5 years ago the Federal Government initiated a program to wipe out a yellow fever-carrying mosquito, even though not a single case of yellow fever had been reported in the United States in the last 40 years.

The program, which cost the taxpayers \$53 million, was supposed to prevent the possibility of any future outbreak and to end migration of the *Aedes Aegypti* mosquito in Latin America.

However, it has now been decided that the insect is not so very dangerous after all and that it probably could not be eradicated anyway, and so the Government is discontinuing the program next month.

It seems to me that this is just another example of badly confused priorities and inadequate research and planning in the field of pest control. Pesticide residues are prevalent throughout our environment—in the soil, air, water, wildlife, fish, and humans. In more recent years scientists have become alerted to the potential dangers to human health and to our environment from the use of persistent pesticides, but true knowledge of the extent of those dangers is still not certain. A great deal of research is needed, but the funds available for pest control research are sparse.

We must bring the matter of pesticide use and pesticide control into better perspective and utilize all available moneys to a better understanding of the issue and to more effective, safer alternatives, including biological and other non-chemical means to control pests.

I ask unanimous consent to have printed in the RECORD an article written by H. L. Schwartz III, reporting the Government's decision to discontinue the *Aedes Aegypti* eradication program, and published in the St. Paul, Minn., Dispatch.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COSTLY PLAN TO END YELLOW FEVER "THREAT" FEELS FEDERAL BITE
(By H. L. Schwartz III)

WASHINGTON.—The federal government spent \$53 million over the past five years to stamp out a yellow fever-carrying mosquito only to decide the insect wasn't all that dangerous and probably could not be eradicated anyway.

Although there had not been a case of yellow fever reported in 40 years in the United States, the program was begun in 1964 to prevent the possibility of any future outbreak and to end migration of the *Aedes Aegypti* mosquito in Latin America.

From a modest \$3 million start in 1964, the U.S. antimosquito program grew to \$16.5 million in 1968. It jumped more than \$8 million in fiscal 1966, alone.

In last year's governmental economic squeeze this figure was cut back to \$6.9 million.

Former President Johnson asked for \$905,000 for fiscal 1970, but the new Republican administration decided to junk the program altogether, effective June 27.

"Using the existing eradication methods, continuation of the program would have required hundreds of millions of dollars in future U.S. expenditures without any real assurance of success," Nixon officials said.

At its peak, the program had more than 300 federal employees, most in the Communicable Disease Center in Atlanta, Ga.

There were thousands of others employed in Texas, Alabama, Georgia, Florida, South Carolina, Hawaii, Puerto Rico and the Virgin Islands under federal contracts to state or territorial health departments.

But in spite of the \$53 million expense and the thousands of man hours that went into a program aimed at preventing a disease unknown in this country for four decades, there were those who defended the project.

Former director Dr. James V. Smith, said the program's value is "probably in relation to our commitments to South and Central America."

Officials say prevention of an outbreak here

was a "secondary" objective, although the *Aedes Aegypti* was generally referred to in budget outlines only as "a carrier of yellow fever."

The chief aim, officials now say, was to prevent migration south.

Another official described the program as "sort of good neighborly thing" to South and Central America where some countries have complained that the pest was coming from the United States and infesting their areas.

However, some U.S. officials expressed doubt that migration from North America was the main cause of infestation in the Latin countries.

In El Salvador, for instance, there was infestation blamed on a shipment of old tires. "But that was questionable," said one official.

There were also indications that the U.S. eradication efforts, aimed mostly at killing the pests or keeping them from nesting in ships heading south, were not working and the mosquitos were just fitting across the border.

Besides the international good will claims for the program there was another possible benefit from the project.

Some of the warriors who honed their skills in the battle against the *Aedes Aegypti* mosquito will be putting them to use in a new multimillion dollar effort to wipe out another pest—the common rat.

It could not be learned just who made the decision to kill the mosquito program. But the move touched off the usual battle accompanying any attempt to scuttle any federal program.

"A number of people were unhappy. They were devoted to the project," said Wil Johnson, program director in Washington.

And the states?

"Some of them were quite unhappy," he said.

EULOGY TO LILIUOKALANI KAWANAKOA MORRIS, A DIRECT DESCENDANT OF HAWAIIAN ROYALTY

Mr. FONG. Mr. President, I should like to pay tribute to the memory of a distinguished and beloved citizen of Hawaii.

She is Mrs. Liliuokalani Kawanakoa Morris, one of the few remaining direct descendants of Hawaiian royalty. She died in Honolulu on May 19, 1969, at the age of 63.

She might have been a queen of the Islands had Hawaii remained a monarchy.

What is perhaps notable about Mrs. Morris is that she had ties, too, although quite indirectly, with the Congress of the United States.

She was the niece of Prince Jonah Kūhiō Kalanianaʻole, who became a Delegate to Congress shortly after the annexation of Hawaii to the United States in 1898. He was, in fact, the second person to have served in the House of Representatives as a Delegate of Hawaii.

Prince Kūhiō was elected Delegate to Congress in 1902, and he served in Congress with distinction until his death in 1922. He is remembered particularly for his work in getting Congress to enact the Hawaiian Homes Commission Act, which authorized a plan for the rehabilitation of the Hawaiian people through homesteading.

Among her many varied activities, Mrs. Morris was a member of the Hawaiian Homes Commission.

Many of the people whom Mrs. Morris served so devotedly in order to improve their lot are homesteaders today.

She is held with great affection and respect by her people because of her quiet works of philanthropy, and also because of her intense and abiding interest in the preservation and perpetuation of the rich traditions, lore, and culture of the Hawaiian people—a people who have known tremendous and constant pressures upon their relaxed way of life.

She has also been acclaimed for her untiring efforts in the founding of Hawaiian civic clubs dedicated to the preservation of Hawaiiana.

Hawaii's present Governor, John A. Burns, often called on her to lead or participate in Hawaiiana projects and encouraged her to found the "Friends of Iolani Palace," a group formed to maintain and protect the only royal structure in America.

She was a director of the State Association of Hawaiian Civic Clubs, a regent of a society known as Hale O Na Alii, and a life member of the Daughters of Hawaii and the Kaahumanu Society.

Perhaps as a result of her royal lineage, Mrs. Morris throughout her lifetime reflected a regal demeanor. The last male King of Hawaii—King David Kalakaua—was her grand uncle. Her grand aunt, and her namesake—Queen Liliuokalani—was Hawaii's last reigning monarch.

She was the daughter of Prince David Kawananakoa and Abigail Wahiikaahu-ula Campbell, and the granddaughter of James Campbell, who established one of Hawaii's largest landed estates.

She is survived by her husband, Charles E. Morris, a daughter Abigail K. Kawananakoa; two aunts, Mrs. Alice Kamokila Campbell of Honolulu, Mrs. Frances Wrigley of California, and a nephew and two nieces.

Hawaii has lost a dear and charming citizen. Her warmth, compassion, and graciousness were precious traits symbolic of her time and of her royal ancestors.

ED WALL AND THE CATHOLIC REVIEW

Mr. TYDINGS. Mr. President, the May 10 issue of America magazine pays tribute to one of Maryland's outstanding newspapermen, A. E. P. "Ed" Wall, editor of the Catholic Review. Under his leadership and with the complete cooperation of Lawrence Cardinal Shehan, the archbishop of Baltimore, the Review has become much more than just a great Catholic newspaper. It is, as S. J. Adamo says in the article of Wall himself, "a living reality and source of unity and brotherhood."

So that all can know of the accomplishments of Mr. Wall and the Catholic Review, I ask unanimous consent that the America article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BALTIMORE'S WALL

Unlike the Berlin Wall, which is a deadening sign of division and enmity, Baltimore's Wall is a living reality and source of unity and brotherhood. This is a roundabout way to introduce one of the most dynamic lay editors in the Catholic press today: A.

E. P. Wall, editor of the *Catholic Review* of Baltimore.

Few editors enjoy the fine rapport he has fashioned with his boss, Cardinal Lawrence Shehan. In fact, Wall refers to him enthusiastically as "the world's greatest publisher." As he explains it: "When I was hired, he told me he wanted an honest, balanced newspaper. I haven't had any instructions since. He takes a strong, continuing interest in the *Review* and supports it in every possible way—but he does not want to have anything to do with editing it. . . . Recently, he commented to me that he did not agree with one of my editorials, 'But,' he said, 'you're the editor and you should do what you think is proper.'" Sounds almost like a journalistic Utopia.

Getting along with the hierarchy is a special talent of Wall's. To date he has written in-depth interviews on Cardinal John Cody, Cardinal John Wright, Archbishop Ferdinando Lambruschini (who announced the publication of the encyclical *Human Life*) and, most surprisingly, Archbishop Luigi Raimondi, the Pope's man in Washington. The quality of the interviews may be gauged by the fact that the one on Wright was frontpaged over a year ago in the *National Catholic Reporter* with the NC tag on it.

How can Wall do all this? One reason is that he is backed up by a solid staff of five in the editorial department. So he can spread the work as he produces a 20-page vital and informative weekly for his 75,000 subscribers. (The readers are amassed through a "no-pressure parish coverage plan.")

Probably the main reason he accomplishes so much is that he enjoys his job. You have to get pleasure from your work to be able to put in a 10-hour day regularly. Because of that he can also say: "I answer every complaint in detail. If a reader writes a letter complaining about something, he gets a letter back from me—sometimes two or three pages long. I close every letter with an invitation to telephone me if I haven't given a satisfactory answer." As they say, success is 99 percent hard work and the remainder is luck and inspiration.

Obviously, the paper's readers throughout the rambling Archdiocese of Baltimore must like what they're being served. Why shouldn't they? Each week they get a nice mixture of international, national and regional news. Special correspondents are posted in Rome and London. Nor are the special needs of the young and the inquiring ignored. Public service reports, plays and book reviews are also prominently featured. Who wouldn't welcome such a news-weekly?

What does Wall think about the future of the diocesan press? He writes: "I talked with an old hand in the field not long ago. He told me that within 10 years no fewer than 50 diocesan newspapers would bite the dust. He may be right, and it is a sad thing. There simply isn't any more practical or economical way to provide continuing adult education in religion and social issues than the diocesan press."

Furthermore, he adds: "People can read the diocesan paper at their leisure, at any hour of the day or night. In it they can get full texts of important documents, movie ratings, news of bull roasts and chicken dinners, instruction on changes in the Church, answers to all sorts of questions. Not even the *Baltimore Sun*, in all its excellence, can provide the detailed information we offer."

Perhaps if the Catholic press had more editors of the caliber of A.E.P. Wall, there would be less danger of widespread demise over the next decade.

TRANSATLANTIC FLIGHT INNOVATION

Mr. ALLOTT. Mr. President, I was delighted to learn of a new transportation

innovation which will be extremely helpful to passengers using Denver's Stapleton International Airport. I feel that innovation is such a valuable concept for the traveling public, that I wanted to make it a point to call it to the attention of the Senate.

Pan American Airways and United Airlines have devised a program for passengers traveling to Europe this summer that will enable them to bypass the tedious check-in procedures at New York's Kennedy Airport. Under the program developed by the two carriers, the normal ground congestion that one faces when checking in at the heavily used J. F. K. terminal will be circumvented by the use of a special Pan Am counter at United's terminal at Kennedy.

With the new plan, travelers on United flights from Denver, Salt Lake City, Cleveland, and Pittsburgh to New York will select their Pan Am seat for the transatlantic portion of their trip in the United terminal. A Pan Am limousine will transfer the passengers to Pan Am's terminal, where they will go directly to the boarding gate, thus bypassing all check-in procedures.

Passengers will not have to worry about transfer of baggage because once it is checked at the city of origin, the traveler does not have to handle it again until he claims it at his final destination in Europe.

Although the program will initially encompass only transatlantic flights from New York, plans are being studied to expand the service to include other transatlantic U.S. gateway cities.

So, it is plain to see that this plan of cooperation between United and Pan Am will undoubtedly diminish one of our biggest headaches—airport congestion. I am eagerly looking forward to the expansion of this cooperation for the benefit of Coloradans, and I hope that this arrangement will signal a new era of mutual arrangements between airlines for the benefit of the traveling public.

JAKE FRIEDRICK: OUTSTANDING LABOR LEADER

Mr. NELSON. Mr. President, many tributes have been justifiably paid to Jacob F. Friedrich, an outstanding representative of labor, a progressive leader in education, and spokesman for the poor, who recently concluded 9 years of distinguished membership on the board of regents of the University of Wisconsin. What sets Mr. Friedrich above and apart from any of his contemporaries is his ability to listen patiently to the problems of the laborer; the student; and the poor; those persons to which too many have turned a deaf ear too often.

For 50 years Jake Friedrich has responded to and spoken out for the rights of labor. He coauthored the first bill to provide unemployment compensation for the State of Wisconsin—a measure which became the model for the entire Nation. During the thirties, Jake served as labor editor of the *Milwaukee Leader*, and then later became regional director of the American Federation of Labor in Wisconsin.

His ability to reduce complex issues into simple terms combined with dedica-

tion resulted in his becoming, in 1959, the president of the Milwaukee Labor Council. He recently retired from that position after setting a record which will be difficult to follow. His ability to persuade while at the same time accommodating diverging views has brought deep respect for the labor movement in Wisconsin.

As University of Wisconsin regent, Jake Friedrich has been sensitive to the needs of the student and has responded with understanding and positive action. His progressive achievements and contributions speak for themselves.

I ask unanimous consent that an article summarizing his outstanding career, published in the Madison Capital Times of April 12, 1969, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Madison (Wis.) Capital Times, Apr. 12 1969]

SPOKESMAN FOR STUDENTS—FRIEDRICK, REGENT OF POOR, ENDS 9 YEARS ON UNIVERSITY BOARD

(By Matt Pommer)

RACINE.—The poor have lost their University of Wisconsin Regent.

Jacob F. Friedrich, 76, attended his last regular meeting of the Board of Regents on Friday. He was appointed nine years ago by then Gov. Gaylord Nelson.

A longtime labor figure, Friedrich has recently served as president of the Milwaukee Labor Council.

But in nine years as Regent, "Jake" has been more a spokesman of students and the poor than a representative of labor.

He advocated low cost education for Wisconsin residents. He has been a voice of reason at the height of dismay over student disrupters. And "Jake" has been an incurable optimist that the vast majority of U. W. students are good.

At the peak of Regent unhappiness with the Daily Cardinal, he reminded the board he had served stint as a writer for the old Milwaukee Leader, the Socialist newspaper. The period was around World War I when the Socialist cause was controversial.

Readers, through their purchase of newspapers, exercise their own control, Jake reminded the board.

Friedrich came to this country from his native Hungary at the age of 13. His formal education never went beyond the 10th grade.

But a string of accomplishments led the University of Wisconsin to award him an honorary degree in 1955.

With the late Prof. John R. Commons, Friedrich helped write the first Wisconsin law on unemployment compensation. He also helped found the U. W. School for Workers.

In a tribute Friday his fellow Regents praised him as "a self-educated individual who has won universal respect through his deeds, his integrity, and his personal wisdom."

Friedrich replied that the University owed him nothing, his gratitude belongs to the University.

In giving him the honorary degree in 1955, then U. W. President Edwin B. Fred said Friedrich had "always acted in the great tradition of Ely and Commons."

After Friday's meeting another labor economist, Madison Chancellor H. Edwin Young, came up to extend thanks and a form of good bye to Friedrich.

Obviously moved, Young gave Friedrich a firm handshake. But the lump in his throat echoed the sentiments of the poor and the students whom Regent Friedrich had championed.

JAPAN'S TRADE POLICIES

Mr. PERCY. Mr. President, once again Japan has proved that it has too narrow a view of the realities of world trade and investment. The announcement last week that the Japanese Government disapproves of the Chrysler Corp.'s plan to form a joint car manufacturing company with Mitsubishi is the latest in a long series of refusals by the Japanese to liberalize their trade and investment policies.

Ever since coming to the Senate, I have warned the Japanese, both publicly and privately, that failure to liberalize their numerous series of quota restrictions and limitations on private foreign investment in Japan could only have serious trade repercussions for them in the markets of other countries.

Last week I was encouraged to read that Chrysler was planning to form a joint venture with Mitsubishi to build automobiles in Japan. The very next day a high official of the Japanese Government said the venture, already agreed to by the two companies, would not be allowed. This cannot be condoned.

Japanese automobiles, for instance, are allowed to enter the U.S. market freely. Twenty-five percent of the California automobile market is now supplied by foreign imports, mainly Japanese. Yet American automobile manufacturers are not allowed to sell their cars in Japan or even to invest in automobile manufacturing facilities in Japan. For 1 day last week it appeared that at least American companies would be allowed to invest in Japan, but 24 hours later the Japanese made it clear they do not believe trade and investment is a two-way street.

Trade to be fair must be reciprocal. The continual Japanese refusals to liberalize economic policies can only bring them to grief. Immediate short-run gains should be weighed against potential major adverse effects in the future.

I ask unanimous consent that two articles detailing the unhappy saga of last week's events be printed in the RECORD, along with another article from the Christian Science Monitor relating to Japan's trade policies in general.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, May 19, 1969]

CHRYSLER, MITSUBISHI SLATE JOINT VENTURE; FIRM ULTIMATELY MAY ENTER JAPAN MARKET

Chrysler Corp. and Mitsubishi Heavy Industries Ltd., a major Japanese auto maker, have agreed to set up a joint venture that ultimately could lead to Chrysler's entry into the Japanese market.

Irving J. Minett, Chrysler's group vice president in charge of international operations, said in Detroit that activities of the new unit "might involve collaboration in research and development related to automotive products and joint distribution arrangements in various world markets not yet defined."

Chrysler, he said, would have a 35% interest in the venture. Mitsubishi would have a 65% share. The executive said the amount of the original investment hasn't been determined.

Mr. Minett, who announced the agreement in the U.S. after Mitsubishi officials disclosed the accord in Japan, said "the extent to which the agreement might lead to

direct Chrysler participation in any form in Japan would depend not only on a further development of the agreement, but also on the extent to which the Japanese government would permit."

In Tokyo, according to an Associated Press dispatch, a government official said the announcement took him by surprise. Yoshifumi Kumagai, a vice minister of the Japanese Ministry for International Trade and Industry, said the venture appeared to be unfavorable for Japan's auto industry. He said he would examine the proposal in close detail before deciding whether to approve it.

The Chrysler-Mitsubishi agreement was announced in Tokyo by Yoichiro Makita, a vice president of the Japanese company who said he had just returned from conferences in the U.S. with Chrysler officials. He said the venture will be inaugurated as soon as Japan liberalizes its rules for foreign capital investment in Japan's auto industry. The Japanese government, he predicted, will ease the controls at an early date.

Late last week, however, Mr. Kumagai had announced that the Japanese government hadn't any plans to immediately permit Japan's auto producers to establish joint ventures with foreign capital. This, he said, would be "tantamount to actual capital decontrol."

[From the Washington Post, May 20, 1969]

JAPAN COLD TO CHRYSLER JOINT PLAN

TOKYO, May 19.—The Japanese government cannot approve a plan for Chrysler Corp. and the firm of Mitsubishi to form a joint car manufacturing company, a senior government official said today.

Hisasasahi Yoshimitsu, the director of the heavy industry bureau of the Ministry of International Trade and Industry, said officials were shocked by the announcement of the plan last night.

He said it came at a time when the ministry had just started to examine the question of consolidating the Japanese car industry before it was opened to foreign capital investment.

FORMER PACT CITED

An official agreement concluded between Japan and the United States in 1968 provided that capital liberalization for the automobile industry should come sometime after March 1972, Yoshimitsu said.

This was one of the reasons why the ministry would be unable to approve a joint venture at the present time, he said.

A spokesman for the Japan Automotive Industry Association said the Mitsubishi-Chrysler plan seemed to run counter to a resolution adopted by the association in 1968 that the Japanese car industry should develop along the lines of national capital.

The spokesman said the association would withhold official comment until its president returns from the United States later this week.

DETAILS OF PLAN

Mitsubishi vice president Yoichiro said at a news conference in Tokyo when he announced the plan that Chrysler cars would be distributed in Japan and Mitsubishi vehicles in the U.S. under the joint venture company.

Irving Minette, a Chrysler vice president, said in Detroit that the new company might involve collaboration in research and development related to automotive products and "joint distribution in various world markets not yet defined."

Chrysler would have a 35 per cent interest in the joint venture company. The amount of its capital was not determined.

[From the Christian Science Monitor, May 6, 1969]

JAPAN KEEPS GRIP ON TRADE POLICIES

(By David K. Willis)

"The Japanese are a controlled society. They simply won't let us in to compete on

equal terms, yet we let them in. They sold about \$1 billion more to us than they bought last year. They're not weak any longer. And still they don't play ball!"

The American was voicing a mixture of annoyance, irony, and resignation as he gave vent to his complaints in his office in Tokyo the other day.

Later, in another office at the other end of the city, a Japanese replied by listing his own complaints about the United States:

"Our gross national product is only about one-eighth the size of yours, and our per-capita income is 21st in the world. You say you want us to let you in—but look at how you still keep us out in various ways! Anyway, we are liberalizing import and investment controls. Slowly, maybe, but we're doing it. We've read Servan-Schreiber's book, 'The American Challenge,' about Europe. We don't want American giants coming in and taking over our economy."

RAPIDLY CHANGING SCENE

The two men were giving both sides of difficulties that have arisen between Tokyo and Washington as two-way trade between their countries has soared to about \$7 billion per year.

The heat in their opinion is shared by other businessmen of both sides. Yet despite it, many observers believe that the pressure points of which they speak are short term, rather than long term, and are signs of health.

Japan has ceased to be a junior partner in trade with the United States. Its spectacular postwar boom has brought with it not only demands by its own businessmen for greater access to foreign markets but equally insistent demands by other countries—particularly Western Europe and the United States—for an easing of Japanese restrictions on imports and investment from abroad.

Americans are worried because Japanese exports to the United States jumped by a mammoth 35 percent in 1968. Japan's exports that year exceeded its imports from America by \$1.13 billion. American steel and textile makers led a protectionist rush in Congress.

To avoid legislation, the Japanese reluctantly agreed to hold down steel exports voluntarily to 5.2 million tons this year. Soon United States Commerce Secretary Maurice H. Stans will be in Tokyo asking local chemical and woolen textile companies for a similar voluntary restraint.

The Japanese companies strongly object. So far they have refused all approaches.

Japan argues that the American textile industry is still earning profits, that its own industry is in the midst of restructuring, and that besides, Americans are violating their own principle of allowing free competition full rein.

The Japanese still maintain import controls on 120 items, despite a stern American effort to break them down. The current effort began last November in Geneva. The first Japanese responses were regarded by Washington as extremely disappointing.

Then, in March of this year, Tokyo came up with another offer. Leaving untouched what Americans really want—such as computers, aircraft, and footwear for example—either decontrolled or relaxed restrictions on glass, outboard motors, pet food, sausage casings, some color films, grapefruit, oranges, processed tomatoes, and fruit juices.

Washington is asking for much, much more. American sources here point to a long list of indirect controls used to keep foreigners out. These range from an import deposit system of 5 percent on manufactured goods (one percent on raw materials) to joint efforts by government and industry, or between industry and industry.

TRADITIONAL WAYS DEFENDED

Japan is particularly wary of sales techniques which upset traditional methods.

Recently an air-conditioning company with a large American holding began offering free trips abroad to its most successful dealers. Thirteen competitors, wholly Japanese owned, obtained a ruling from the local Fair Trade Commission outlawing the practice. The joint company has appealed.

The Japanese way is to employ a series of middlemen, and not to resort to methods that give one company such an outright advantage over others—who, after all, are also entitled to a living, the reasoning goes.

On direct investment, the Japanese Government began to ease restrictions in July, 1967, only to have Americans retort that only companies of no interest to outsiders had been opened up.

American sources say that really attractive companies—such as automobiles, computers, and supermarkets—are still lacking. They add that definitions of categories are too tightly drawn, making it difficult for large American conglomerates to obtain a foothold.

The Japanese Government says it plans two more liberalizations—in the autumn of 1971 and in March, 1972—so that judgments ought to wait until then.

Americans and Japanese have distinctly different points of view. Americans are free-wheeling, rich in capital and know-how, accustomed to believing their country helped Japan recover after the war, and confident that their government gives Japan great freedom to export to the United States.

The Japanese are wary and cautious. Their GNP is strong but their per-capita income is low (about 21 in the world). Government controls industry, and the two work together for the enhancement of Japan's stature in the world.

POLLUTION AT PINEY POINT

Mr. TYDINGS. Mr. President, the proposal of a petroleum company to construct a major facility at Piney Point, Md., has generated considerable opposition in St. Mary's County and throughout my State.

The county commissioners oppose the facility, and I strongly support their position.

St. Mary's is a lovely, quiet, and pollution-free part of southern Maryland adjacent to the magnificent Chesapeake Bay. It is a haven for those who seek beauty, peace, and an environment free of manmade contaminants. It is a type of county we as an urban society must protect and develop with care.

The oil company has twice sought permission to build the plant. The first was by application to the Foreign Trade Zone Board to establish a foreign trade zone at Piney Point. The second was by application to the Department of the Interior for a license to import oil. The first was fruitless, since by Maryland law such an application must be made by the Maryland Port Authority which will not act contrary to the wishes of the county commissioners involved. The second has not been acted upon pending an administration review of the entire oil import question during which Interior's authority to issue such permits has been suspended.

I have written both the Foreign Trade Zone Board, which consists of the Secretaries of the Treasury, Commerce, the Army, and the Interior, expressing my concern over the proposal to construct a major petroleum facility at Piney Point and urging them to prevent it.

I ask unanimous consent that the texts of my letters to Secretary Kennedy and

Secretary Hickel and the text of the letter sent by the St. Mary's County Commissioners be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

APRIL 28, 1969.

HON. DAVID M. KENNEDY,
Secretary, Department of the Treasury, Washington, D.C.

DEAR MR. SECRETARY: I am writing to you, as a member of the Foreign Trade Zones Board, to express my firm opposition to the establishment of a Free Trade Zone at Piney Point, St. Mary's County, Maryland for the purpose of permitting construction of a \$40 million oil "topping" plant.

This project would threaten the blue water, clean air, and lovely countryside of St. Mary's County. An attractive peaceful setting like Piney Point is hardly the proper location for a major petroleum facility. It would disrupt the community, destroy wildlife, and foul the marine environment of the Potomac River and the Chesapeake Bay.

We cannot afford to have these Maryland waters go the way of the Patapsco, Hudson, and Delaware.

The project is opposed by the elected County Commissioners of St. Mary's and I support their responsible decision wholeheartedly.

I believe it is time our country became more critical of schemes which in the name of economic development threaten the quality of our environment.

Best wishes.

Sincerely,

JOSEPH D. TYDINGS.

MAY 19, 1969.

HON. WALTER J. HICKEL,
Secretary, Department of the Interior, Washington, D.C.

DEAR MR. SECRETARY: Recently, you received a letter from Mr. F. Elliott Burch, President of the County Commissioners of St. Mary's County, Maryland urging you to deny the Steuart Refining Company's application for a General Allocation of residual fuel oil at Piney Point, Maryland.

I wish to endorse the position of the County Commissioners and urge you to refuse the license for a project which, if permitted, would have an adverse impact on the environment of Maryland's most precious natural resource, the Chesapeake Bay.

The quiet, attractive countryside of St. Mary's County is not suitable for an oil refinery and desulphurization plant. Air pollution, water pollution and the very real threat of a catastrophic oil spill cannot be permitted.

I understand that your authority to consider such applications has been stayed pending a review of our oil import policies. I urge you, when the stay has been lifted, to deny this application.

May I take this opportunity to say that I agree with your actions regarding Hunting Creek. I was delighted to read that you had requested the Corps of Engineers not to issue the permit.

Best wishes.

Sincerely,

JOSEPH D. TYDINGS.

THE COUNTY COMMISSIONERS
OF ST. MARY'S COUNTY,
Leonardtown, Md., April 12, 1969.

Subject: Application of Steuart Refining Company for General Allocation of Residual Fuel Oil.

HON. WALTER J. HICKEL,
Secretary of the Interior,
Washington, D.C.

SR: The County Commissioners are alarmed to learn that the Steuart Refining Company has made application to your Department for a General Allocation of up to 100,000 barrels per day of imports of residual

fuel oil, for use in a refinery and desulphurization facility to be constructed and operated by the Applicant, said allocation to remain in effect for a period of ten (10) years.

In the Summer of 1968, the Steuart Refining Company submitted an application to the Maryland Port Authority for a permit to establish a Foreign Trade Zone and an oil refinery at Piney Point, Maryland. The Maryland Port Authority would not issue said permit without the approval of the County Commissioners. After a very lengthy in-depth study by a special committee appointed by the Commissioners, the committee, the Board of County Commissioners, and our legislators deemed it would not be in the best interests of the people and the County to have such an establishment in the County, and subsequently denied approval of the application. The Maryland Port Authority honored our decision and concurred in this action.

St. Mary's County has over 400 miles of waterfront. The excellent quality of our seafood enjoys world renown, and approximately 2,000 watermen and their families depend largely on this fine natural resource for a living. Our fine beaches and camping facilities bring many vacationers during the summer months to enjoy our peaceful atmosphere. St. Mary's County and the State of Maryland are spending considerable money annually for development of our waterfront for recreational purposes. In April of 1968, a Comprehensive Park and Recreation Plan was prepared for St. Mary's County by the Allen Organization, Park and Recreation Planners, Bennington, Vermont. St. Mary's County is the Mother County of the State of Maryland, and has great historical significance, attracting literally thousands of visitors each year to specific points of interest where our proud heritage is being preserved.

We are aware of the vital concern of both Federal and State agencies to preserve the nation's precious natural resources. St. Mary's County is rich with such resources. It is one of the few remaining areas with clean water and clean air. We, and our citizens, are of the opinion that St. Mary's County is not the place for heavy industry, especially an oil refinery and desulphurization plant. Further, we are of the firm conviction that the County Commissioners and the people who live here should have a voice in deciding what is or is not allowed to come into the County.

We respectfully request that you carefully consider our foregoing statements, and the adverse effect that an oil refinery and desulphurization facility would have on the general physical characteristics of St. Mary's County, and deny the Steuart Refining Company's application for a General Allocation of residual fuel oil.

Very truly yours,

F. ELLIOTT BURCH, President.

FEDERAL REGULATIONS FOR CONTROL OF WATER POLLUTION

Mr. MONDALE. Mr. President, at the recent Duluth, Minn., Interstate Enforcement Conference on Lake Superior, Representative JOHN BLATNIK, from the State's Eighth Congressional District, traced the history and present state of our Federal regulations designed to meet the problems of water pollution.

I believe that Senators will find a great deal of worthwhile information in these remarks. I ask unanimous consent that the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE JOHN A. BLATNIK, LAKE SUPERIOR ENFORCEMENT CONFERENCE, DULUTH, MINN., MAY 13, 1969

I first became acquainted with Lake Superior more than 34 years ago when I was working in the old CCC Camps near Isabella and Finland on Highway 1 between Ely and Lake Superior. I don't ever think I'll forget the first time I saw the big lake. It was a bright, sunny day, much like this morning, and when I came over the hill near Ilgen City there in front of me was that huge, magnificent, glittering fresh water lake. That was quite a thrill back in the old days when travel was so difficult, and I've had a warm spot for Lake Superior ever since.

That first, exciting experience with the lake had a great impact on me, such an impact that in later years I made it part of my life's work. There I was, standing in front of one of the largest bodies of fresh water in the world. To me, it looked like an ocean.

The lake's unsurpassed beauty, purity and clarity were then, and still are, resources to be preserved and protected. The unique quality of its water transcended anything I had ever seen before, and I could feel the richness of the lake's heritage all around me. But I never really appreciated this great pristine resource, this lovely northern lake and forest country until I went to Washington in January 1947, after the war when I first came to Congress.

I was named to the Public Works Committee, which deals directly with many aspects of water use—navigation, flood control, hydroelectric power, harbors, channels, and pollution. I was also named to the subcommittee on rivers and harbors which was working on the problems of the St. Lawrence Seaway.

While reviewing all of the Great Lakes ports, channels and harbors and studying the St. Lawrence Seaway problems, I saw first hand and was appalled at the unbelievable pollution of the harbors of Chicago, Gary, Detroit, Cleveland and Buffalo, and the major rivers, such as the Ohio, Mississippi, St. Claire, River Rouge, as well as practically all of the major seacoast ports—Boston, New York, Philadelphia, Baltimore, New Orleans, San Diego, San Francisco, etc.

It was then that I began my fight to clean up the Lower Great Lakes, the Mississippi River and the great pollution problems throughout the nation.

It was a lonely fight back in those days. Pollution was not the popular issue that it is today. Back then the clean water advocates in Congress could have caucused in a telephone booth. The clean water fighters were few and far between.

But we didn't get discouraged, because it was clearly evident that water pollution was a national problem that was bad and getting worse and that it could only be solved through cooperation by the federal government, the state governments, local governments and industry, and with the understanding and broad-based support of a vast majority of the nation's citizens.

We needed and got the complete support of the conservation organizations—such as National Wildlife Federation, now under the leadership of Tom Kimball, the executive director, who is here with us today; Bill Magie and the Friends of the Wilderness, the Izaak Walton League, the United Northern Sportsmen and many other dedicated groups.

Especially helpful in the early days and right up to the present was the League of Women Voters. Without this kind of determined, grass roots support, we couldn't have done the job.

The big break-through came when I was made chairman of the subcommittee on rivers and harbors, and in 1956 was able to author the Federal Water Pollution Act. I conducted the hearings on the bill in the

Public Works Committee and managed it on the House floor.

This was the first permanent national law for the prevention, control and abatement of water pollution. And it was imperative that it be enacted into law. After passing the House by a vote of 338 to 31, following Senate action on the bill, I filed the report of the Conference Committee and President Eisenhower signed the Bill into Law on July 9, 1956.

The Federal Water Pollution Control Act laid the groundwork for the start of a joint effort by the federal government in full partnership with the states and localities in the clean water fight. The accomplishments of the law were many:

1. It recognized and preserved the primary responsibilities and rights of the states in preventing and controlling water pollution.

2. It authorized continued federal-state cooperation in the development of comprehensive river basin programs for water pollution control.

3. It authorized increased technical assistance to the states, and stepped up research.

4. It authorized the collection and dissemination of basic data on water quality relating to the prevention and control of pollution.

5. It encouraged the continued formation of interstate compacts and uniform state laws.

6. It authorized for five years grants to states and interstate agencies for their water pollution control programs.

7. It authorized federal grants for the construction of municipal waste treatment works.

8. And, Ladies and Gentlemen, it set up procedures for enforcement action against interstate pollution—Yes, the enforcement conference you are sitting at today would not have been possible without the passage of my bill in 1956.

My original bill asked for \$100,000,000 in construction grants. The 1956 Act, as finally passed, authorized annual appropriations of \$50 million for federal waste treatment construction grants of 30 per cent or \$250,000, whichever is less. This was a very modest start indeed—but it was the best we could get through at that time, and it was a start in the right direction.

In 1960, during the 86th Congress, to try to make further improvements and to spur more local effort in the federal program, I introduced a bill to increase the annual grant authorization. This bill also provided for an increase in the dollar ceiling for a single project, and encouraged efficiency and economy by permitting two or more communities to join in a project.

Though we got the bill through the committee, the House and Senate and the Conference Committee, President Eisenhower vetoed it on grounds that this was a local problem. By a vote of 249 to 157 the House fell short of the necessary two-thirds vote needed to override the veto.

In 1961, I again introduced legislation to strengthen the Federal Water Pollution Control Act. I also presided at those Committee Hearings, and managed the bill on the House floor, with passage coming on a vote of 307 to 110.

The Bill, signed into law by President Kennedy on July 21, 1961, increased the appropriations authorization for construction grants to \$100 million a year, finally reaching the \$100 million level we first sought in 1956. It also increased the dollar ceiling for a single project to \$600,000, and authorized multi-municipal projects with a dollar ceiling of \$2.4 million. As you can see, the effect of this bill was to increase the incentive to local anti-pollution efforts.

But I accomplished one other important job in this new law—direction of a continuing study of the quality of the waters of the Great Lakes to protect them from pol-

lution caused by population growth, industrial growth, and increased shipping.

At this time we knew very little about water quality, and it became very evident that an enormous amount of scientific and technological research was needed to answer the many complex questions.

During the 89th Congress I moved again to strengthen the Water Pollution Legislation and introduced the Water Quality Act of 1965 with Senator Ed Muskie as the lead off witness. By 1965 we clean water fighters were getting good support; the Bill passed the House by a unanimous vote, and got overwhelming approval in the Senate as well. It was made Law by President Johnson on October 2, 1965.

This landmark legislation created the Federal Water Pollution Administration, and it also provided for the establishment of water quality standards for interstate waters and stated for the first time that the purpose of the Federal Water Pollution Control Act is to enhance the quality and value of our water resources and to establish a National Policy for the prevention, control and abatement of water pollution.

Under this new law we also increased the annual appropriations authorization for construction grants from \$100 million to \$150 million, doubled the dollar ceilings, afforded more realistic assistance to populous areas and gave new incentives to state participation in waste treatment plant financing.

In 1966 we took another big step toward increasing the quality of this Nation's water during the 89th Congress with the passage of the Clean Water Restoration Act, of which I was the author.

The most significant provision of the 1966 Act was the vast increase in the authorized level of federal support for municipal waste treatment plant construction, the grant program begun in 1956 under my original legislation.

The 1966 Act also removed the dollar ceilings on projects, provided new incentives for state participation in financing and for the application of water quality standards to receiving waters.

Among its other provisions, the law authorized 50 per cent federal grants to planning agencies for the development of comprehensive basin plans for water quality control; doubled the level of federal support for the strengthening of state and interstate water pollution control programs; provided for research and demonstration grants in the areas of advanced waste treatment and waste water renovation and the control of industrial pollution, plus many other new provisions.

In addition the 1966 Law transferred to the Secretary of Interior responsibility for administration of the Oil Pollution Act of 1924, and expanded its application to include the Great Lakes and other nontidal navigable waters.

The successive amendments to the Federal Water Pollution Control Act and related law reflect the response of Congress to the magnitude of the total water pollution problem, its complexity, the emergence and recognition of new problem areas, and the mounting public demand for clean waters.

Congress has not only been responsive with Legislation on the enforcement and construction aspects of the programs, it has also authorized millions of dollars in research, development and demonstration projects.

In 1956 the appropriation for these projects was \$443,219. This has grown to \$43,668,846 in 1969. Waste treatment construction grants grew from \$50 million in 1957 to \$214 million in 1969.

This winter I personally conducted an investigation and hearings in Santa Barbara following the disastrous oil spills off the coast of that City. This catastrophe underscored the need for more effective control of pollution of waters and shorelines by oil.

We returned to Washington, conducted

hearings on the Water Quality Improvement Act of 1969 and passed it through the House of Representatives on April 16 by a vote of 392 to 1. I expect early action by the Senate.

This bill would provide for the control of pollution by oil and other matter from vessels, offshore facilities and onshore facilities; from acid and other mine drainage; and from activities operating under federal licenses and permits as well as from federal installations. It also authorized more intensive work on the Clean Lakes Program.

The Federal Water Pollution Control Act, enacted in 1956, strengthened in 1961, 1965 and 1966, and the expected enactment of the Water Quality Improvement Act of 1969 all came under my chairmanship of the rivers and harbors subcommittee.

This was work, hard work. It took years of study, hundreds of hours of committee hearings and volume after volume of testimony. But it is all worth it if we can help the Lower Lakes and keep Lake Superior the clean beauty that she is.

Back in 1962, I realized that the best way to preserve Lake Superior was through preventive measures. But nobody knew enough about pollution to establish a comprehensive preventive program. The problems of water pollution are so complex, so varied, and so numerous that existing knowledge and techniques are not adequate to deal with all of them. This is where the idea of the National Water Quality Laboratory came in. We simply needed more scientific information about pollution.

I obtained federal authorization for the laboratory, and the City of Duluth donated the building site in March of 1962. The lab was dedicated on August 11, 1967.

What does this all mean? It means that on the shore of Lake Superior standing like a watchful, protective beacon, is a \$2.2 million structure which houses \$1 million worth of the most sophisticated, advanced scientific and technical equipment that American science can produce in this field.

Now we have the most scientifically advanced fresh water laboratory in the world to study and research the environment of Lake Superior waters and determine in a scientific manner the best preventive methods to avoid pollution of Lake Superior.

We also have, as I outlined earlier, a good legislative base from which to embark on an orderly, responsible program of water pollution control, and effective enforcement where necessary.

Since early this year there has been considerable intensive, often emotionally supercharged discussion about pollution of Lake Superior and about this Enforcement Conference. Many well-meaning but ill-informed statements have been made proposing action that should be taken by the federal government or the State of Minnesota, some even calling for legislation to stop pollution of Lake Superior.

This kind of talk has confused the people and created a misunderstanding about the Water Pollution Control program and has even led to rumors that attempts are being made to whitewash this enforcement procedure.

As author of the first permanent, comprehensive law to control water pollution and manager in the House of all its major amendments, I feel it is most important to set the record straight on the whole enforcement procedure.

First, let me point out that no new legislation is needed now to cope with Lake Superior problems. That authority has been on the federal statute books for 13 years. All we need to do is implement and enforce the law, and that is precisely what we are here to get underway today. This Conference, with official status in the eyes of the law, sets in motion the Federal, and I hope State, legal machinery to abate, prevent and stop pollution in Lake Superior.

Few people realize that this Enforcement Conference was called and that our meeting

today is being held under the authority of the basic 1956 Blatnik Water Pollution Control Act, and that whatever cleanup action this Conference determines should be taken will be taken under the authority of that law. The objective is to reduce pollution to tolerable, permissible, harmless limits, and if that can't be done, then to stop it entirely.

Second, I want to emphasize that the Enforcement procedure has proved to be both workable and effective in cleaning up polluted waters throughout the United States. Let me underscore this point with a few facts:

This Enforcement Conference is the 46th in the past 13 years:

Preceding Conferences have issued cleanup orders to: 42 States and the District of Columbia, 1,300 municipalities, 1,800 industries, 89 federal installations, 73 State or private institutions, and, 11,168 miles of riverway.

America's most populous states have figured in previous enforcement actions, as have our largest metropolitan areas, such as New York City, Chicago, Detroit, Cleveland, St. Louis, Minnesota's own Minneapolis-St. Paul and the giants of industry: United States Steel, General Motors, Chrysler, Ford Motor Co., Standard Oil Corporation, Youngstown Sheet and Tube, Republic Steel, International Paper Company, Weyerhaeuser, Crown Zellerbach, Scott Paper Co., and a long list of others.

Corrective action called for by those conferences is underway and in many cases already completed at a total cost of some \$10 billion invested in municipal and industrial treatment plants.

To give you some recent examples of the magnitude of the cleanup effort resulting from an enforcement proceeding, the Lake Erie Conference involved five states, 115 municipalities, 101 industries, and 11 federal installations. A complete cleanup schedule was agreed upon by all the participants at a total estimated cost of \$5 billion.

The Lake Michigan Conference held just last year affected 4 states, 174 municipalities, 53 industries, 20 federal installations, and is expected to cost some \$4 billion.

Of all the Great Lakes, the waters of Lake Erie are in the most advanced state of pollution—perhaps irreversibly so—and many call it a dying lake. Lake Michigan, though sick, is not anywhere near the degree of aging and decay of Lake Erie and the enforcement action taken there still has a chance of reversing the pollution.

Lake Superior is unique among the Great Lakes—the least polluted: the largest body of fresh water: the most to be gained from early action. The action on Lake Erie could be termed "stop gap" at best: In Lake Michigan, remedial and restorative: In Lake Superior, preventive and preservative. We must, by acting now, prevent pollution from destroying this priceless resource.

And we will do it under the three step enforcement procedure I wrote into the 1956 Law: (1) Conference, (2) Public Hearing, (3) Court Action.

Today we are participating in the first, or conference, stage of the enforcement procedure. The role of the Conference, which, by the way, is conducted on an informal basis and is not an adversary proceeding, is to establish the facts, such as: the nature and extent of pollution, whether measures now being taken to abate pollution are adequate, and the kinds of problems expected to be encountered in preventing pollution. With all the facts before them, the conferees will try to reach agreement on a remedial program of pollution abatement.

If this doesn't work then we go on to Stage 2, the Public Hearing, which is a formal proceeding directed at individual, alleged polluters. A formal hearing is held before a five member board appointed by the Secretary of the Interior and sworn testimony is taken. The Board's findings and recommen-

dations are sent to the polluters—whether state or federal government, municipal or private—and to the state with a time table for compliance.

Stage 3, Federal Court Action, is the last resort in the enforcement procedure. The court has jurisdiction to enter whatever judgment or order may be necessary to safeguard the public interest.

However, so successful is the conference stage of the enforcement procedure that in the 13 years of the Federal Water Pollution Control Program, a public hearing has been required in only 4 cases, and court action only once.

The purpose of this Duluth Enforcement Conference is to study the pollution problems of the entire Lake Superior Basin.

However, because of the close coverage by the news media and a concerned public, the focal point of the conference is the discharge of tailings from Reserve Mining Co.'s E. W. Davis Works at Silver Bay.

The report indicates that Reserve's tailings discharge do have an adverse effect on the quality of the Minnesota waters of Lake Superior. If this is determined to be a fact during the conference or at a later date, then the Governor, the Minnesota Pollution Control Agency—with the help of the federal government—and the Mining Company should and must take corrective measures.

Although the Government report indicates that at the present time there is not enough scientific evidence on which to base a finding of interstate pollution, it does recommend that the FWPCA and the State keep the discharge of tailings under continuing surveillance and report back to the conferees at six month intervals.

I wholeheartedly support this action.

I will go further and say that with the help of the National Water Quality Laboratory, if there is pollution anywhere in the Lake we're going to find it and when we find it we are going to stop it under the enforcement section already in the law.

If there is interstate pollution then the Federal Government can move in at once to take action. If there is intrastate pollution there is still no excuse for delay as the Governors of the three states can act under state law. If they have a problem or need help they have only to ask the Federal Government for help and I assure you help will come.

All of us—the Federal Government, the State Government, local government and industry—have a tremendous responsibility in keeping Lake Superior as clean as possible. We must protect the high quality of her water and as long as I have anything to do with it, it will be protected.

I want our sons and daughters, their sons and daughters, and generation after generation to experience the exhilaration I did when I got my first look at that beauty out there. This can be accomplished and this Enforcement Conference here today is a big step toward determining the best method of preserving Lake Superior as the beauty that she is.

RESTORATION OF U.S.S. "ENTERPRISE"

Mr. INOUE. Mr. President, early this year on January 14, disaster struck the U.S.S. *Enterprise* during a practice bombing mission off the coast of Hawaii. My colleagues will recall that an accident started a series of serious fires and explosions which took the lives of 28 men and did extensive damage to the ship.

At the time, it was estimated that it would take up to 9 months to complete repair work on the *Enterprise*. However, the workers of the Pearl Harbor Naval Shipyard put the full thrust of their ef-

forts into the emergency repair work and restored the ship in a record time of 49 days, 41 days before the projected completion date.

Leading the men at the Pearl Harbor Naval Shipyard was Mr. William D. Bennett. In recognition of his years of invaluable service to the U.S. Navy and in appreciation for his outstanding service in restoring the U.S.S. *Enterprise*, the Department of the Navy presented him with the Distinguished Civilian Service Award.

For their outstanding performance in this monumental undertaking, the Secretary of the Navy presented the Special Commendation Award to the leadership and personnel of the Pearl Harbor Naval Shipyard.

It is with great pleasure and pride in the men of the Pearl Harbor Naval Shipyard that I ask unanimous consent that the remarks of the Assistant Secretary of the Navy, James D. Hittle, and the citations of the awards presented to Mr. Bennett and the personnel of the Pearl Harbor Naval Shipyard be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY JAMES D. HITTLE

Ladies and Gentlemen: I am honored to be with you today as the representative of the Secretary of the Navy. I have come to express to you the Secretary's personal appreciation and that of the entire Department of the Navy for your magnificent performance in accomplishing the repair of the U.S.S. *Enterprise*. This task, achieved by the workers of the Pearl Harbor Naval Shipyard, should be a source of pride to everyone gathered here today—and I'm sure it is.

The job which confronted this shipyard on that fateful day when the *Enterprise* came limping into harbor was urgent. As you all know, on 14 January, while operating at sea, disaster struck the *Enterprise*. During a practice bombing mission, preparatory to her deployment to her fourth tour of duty in Vietnam waters, an accident occurred near an aircraft on the flight deck. This accident started a series of fires and other explosions throughout the ship. Only the heroic efforts of the ship's crew brought the fires under control. Although the crew reacted with amazing speed, serious damage was caused. The flight deck was cluttered with demolished aircraft; there were gaping holes in the ship's decks and her casualty list stood at more than 100 men dead and injured.

You well know the story from that point on. You were close to the tragedy.

You were part of the subsequent achievement. The original estimate of the time required to return the *Enterprise* to service ranged as high as 3 months. But those who had predicted that it would take this long to complete the repairs had, apparently, underestimated one factor—the shipyard workers at this activity.

With a full realization of the importance of your mission and of the necessity to return the *Enterprise* to service as soon as possible, you the workers of the Pearl Harbor Naval Shipyard, demonstrated what the real "can do" spirit is. For it was the shipyard workers who spearheaded an effort which completed the necessary repairs in a record breaking 49 days—not in the original estimate of 90 days—but in an actual 49 days.

Of course, the full story of the team work that went into the repair of this great ship involves the cooperative efforts of private industry, other naval shipyards, and certain naval activities in the continental United States.

But the keystone of the entire achievement

was this shipyard and you, the members of the shipyard team.

It was here that your skill, hard work and dedication forged in a coordinated and cooperative effort, proved effective as well as inspirational.

Your accomplishment in putting the U.S.S. *Enterprise* in condition for sea was in keeping with the spirit and the records of the World War II era. Then, this shipyard established records on damage repair, records that were broken only by its own later efforts.

Your achievement with the *Enterprise* have already been recognized in part when Admiral John J. Hyland, Commander in Chief, Pacific Fleet, presented a number of personal awards to your key military and civilian leaders.

But we all realize that any effort, as large in scale as the repair of the *Enterprise*, is a collective effort.

That is why the Secretary of the Navy has asked me to travel to Pearl Harbor to be with you today. I have come to show you the Navy's respect for all of you as members of the Navy-Marine Corps team.

I have come to thank you on behalf of the Secretary of Defense, the Honorable Melvin R. Laird, and the Secretary of the Navy, the Honorable John H. Chafee, and to present to all of you as evidence of the Navy's appreciation through Captain Barnhart as your representative, this Special Commendation from the Secretary of the Navy.

I highly regret that it is not possible for us to reward each of you individually but the Navy's appreciation is no less real.

You performed an important mission and you did it in a manner better than anyone had the right to expect.

Please accept our thanks, and particularly—from the Secretary of the Navy—accept this time honored commendation of duty precisely performed—"Well Done."

CITATION BY SECRETARY OF THE NAVY

The Secretary of the Navy takes pleasure in presenting the Distinguished Civilian Service Award to William D. Bennett in recognition and appreciation of the distinguished services set forth in the following citation for outstanding service to the Department of the Navy for many years and for his valuable contributions to the Fleet in production and ship repair operations. Mr. Bennett has served the Navy with distinction in many capacities ranging from shipfitter to Group Master. Through his unwavering dedication and excellent leadership he has inspired hundreds of others to perform in a manner which surpassed their own expectations. His vast and detailed knowledge of ships and their construction and equipment have enabled the Pearl Harbor Naval Shipyard to meet seemingly impossible deadlines for ship restoration and repair under emergency conditions. The most recent example of his ability to act under adverse conditions was his remarkable performance as Production Manager for emergency repairs of fire damage sustained by the U.S.S. *Enterprise* (CVA(N)65) on 14 January 1969. As a result of his incredible foresight, initiative, and enthusiasm, the emergency repairs were completed in only seven weeks. Mr. Bennett's superlative efforts and untiring devotion to duty have brought the highest prestige and honor to the Navy. He is richly deserving of the Navy Distinguished Civilian Service Award.

JOHN H. CHAFEE,
Secretary of the Navy.

APRIL 9, 1969.

SECRETARY OF THE NAVY SPECIAL COMMENDATION AWARDED TO PEARL HARBOR NAVAL SHIPYARD

Citation for outstanding achievement from 14 January 1969 to 4 March 1969 in accomplishing repairs to the U.S.S. *Enterprise* (CVA(N)65) which was damaged by fire and explosion. Under extremely adverse conditions and facing pressures involving short

deadlines, material shortages, and skill scarcities, the leadership and personnel of the Pearl Harbor Naval Shipyard demonstrated a high degree of competence, pride of workmanship, and dedication to duty in accomplishing the repairs in record time, thus enabling the *Enterprise* to return to the fleet with a minimum disruption of operations. With a keen appreciation of the many sacrifices and extraordinary effort involved in such a monumental undertaking, the personnel of the Pearl Harbor Naval Shipyard are commended for their superlative performance.

JOHN H. CHAFEE,
Secretary of the Navy.

JAMES D. HITTLE,
Assistant Secretary of the Navy,
(Manpower and Reserve Affairs).

APRIL 9, 1969.

ARROGANCE

Mr. YOUNG of Ohio. Mr. President, Pentagon officials are guilty of disservice to Americans through censorship by classification. Some of these top officials in the Pentagon and, in fact, even field grade officers—majors and lieutenant colonels—seeking to withhold from the public information which discredits the Department of Defense and certain generals or indicates laxity in connection with military contracts, term this "classified information." They stamp "top secret" or "secret." These officers by this questionable procedure block the flow of information prejudicial to the Department. They arbitrarily select only information favorable to our Armed Forces. They exclude from the public that which is unfavorable. Officers and Pentagon officials defiantly conceal information to which our people are entitled.

Let us not have in addition to our three equal coordinate branches of Government—legislative, executive, and judicial—a fourth branch, "sacrosanct military general staff." We in the Congress have an obligation to inform ourselves how it comes that this military censorship by classification has grown to an extent no longer acceptable. The end result gives to the military domination over the civilian branches of our Government.

President Eisenhower in his farewell address warned the Nation to "guard against the acquisition of unwarranted influence whether sought or unsought by the military-industrial complex." Long before that, President George Washington counseled the Nation "to avoid the necessity of those overblown military establishments which, under any form of government are inauspicious to liberty and which are to be regarded as particularly hostile to republican liberty."

THAT DOMINO THEORY

Mr. YOUNG of Ohio. Mr. President, the domino theory states that if the Communists take over one country of Southeast Asia then all the other countries of Asia would fall like dominos. The largest domino in all Asia is Communist China with a population of 800 million. This vast area populated by one-fourth of the people of the entire world fell to the Communists in late 1949. If the domino theory were at all valid it would seem that 20 years later all the dominos should have fallen. Not one country in Southeast Asia has gone Communist since the

advent of Red China. In fact, Indonesia, Malaysia, Singapore, and other countries have on their own crushed Communist partisans within their countries.

It is claimed that Ho Chi Minh has been stirring up trouble in remote areas in Thailand and Laos. The facts are we Americans have penetrated Thailand in depth. We are maintaining air bases throughout Thailand and have 54,000 men of our Armed Forces stationed there. We have men of our Armed Forces in Laos and we are penetrating the air space of that Asiatic nation, whose neutrality we guaranteed, with our warplanes and are overflying that area quite constantly and our napalm and other bombing has devastated some areas of Laos particularly during recent months.

MATT WERNER RETIRES AFTER DISTINGUISHED CAREER

Mr. NELSON. Mr. President, few men have achieved the respect and stature of A. Matt Werner, who recently retired from the University of Wisconsin Board of Regents after 30 years of distinguished service.

It is a rare and outstanding person who can claim that partisan Democrats, Republicans, and independents listen to him and react positively to his advice. Although a dedicated Democrat and delegate to the 1932 convention which nominated Franklin D. Roosevelt, Matt Werner was originally appointed to the board of regents by a Republican Governor in 1939, and subsequently reappointed by Republican and Democratic Governors.

As an editor of the Sheboygan Press, Matt Werner published one of the finest small city newspapers in the Midwest. His wise judgments and thought-provoking views were reflected in his editorials and recognized throughout the State.

During his years as university regent, Mr. Werner helped direct the progressive course of the university, recognizing the need for decisive change and responding to it. Through his calm deliberative ability, he has led the board of regents through debate, shaping the university into a modern, responsive community.

I ask unanimous consent that an editorial describing Matt Werner's career published in the March 14 issue of the Milwaukee Journal, be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

THIRTY YEARS A REGENT

A. Matt Werner is more than just the record holder for long and diligent service on the University of Wisconsin board of regents. He has been a valuable member wielding constructive influence in that unpaid, and mostly unrewarded, civic position.

One measure of the man is that he, a life-long Democrat, was first appointed, in 1939, by a Republican governor, and twice reappointed by Republican governors, before a Democrat happened to be in office to do the honors the last time, in 1963. They recognized the Sheboygan publisher as an educational statesman in helping guide the affairs of a great university.

Werner might best be called a liberal conservative or vice versa. He was receptive to

change and progress whenever reason pointed that way. At the same time he cherished traditional and basic values and was careful not to let them get lost in the shuffle. This quality of mind, with his experience and wisdom, made him effective on the board for so many years, giving it balance and calm deliberation.

Not the least mark of his wisdom, and of his devotion to UW, is his voluntary request now, at 75, to let a younger man replace him and finish out his term. Both the UW community and the people of Wisconsin owe honor to a true pillar of the university, Matt Werner.

RUSSIAN APPEAL FOR PROTECTION OF HUMAN RIGHTS IN THE U.S.S.R.

Mr. PROXMIER. Mr. President, the Washington Post of Friday, May 23, contains an article pertaining to an appeal to the United Nations for the protection of human rights in the U.S.S.R. A group of 55 Russians, the most notable being Pyotr Yakir, the son of a Russian general who was executed during the Stalin purges of 1937-39, made the appeal saying they were concerned over the rise of political persecution and the return of the tactics used during the Stalinist terror in their nation. They also stated that they feared that their right to hold and speak out about their private views had been placed in peril by recent actions of the Soviet Government.

Unfortunately, the United States has put itself in a difficult position to rise to the defense of those in the U.S.S.R. who are demanding their basic human rights. Despite the allegiance of the American people to the concept of human rights and the historical tradition of this nation, we number among those countries that have failed to ratify some of the United Nations conventions on human rights. Those conventions which are unratified as of this date are the United Nations Convention on Forced Labor, on Political Rights for Women, and on Genocide. If we are to, in the future, be able to stand up and point with pride to our own accomplishments and be able to deplore the failure of others in the field of human rights, we must ourselves take immediate positive action. To date there has been no strong opposition to ratification of these conventions by the United States. Rather it has been our negligence and apathy which have led to our failure.

It is now time for the United States to act to erase this failure and to reassert our deep commitment to the idea of human rights for everyone. This can only be achieved if we act now to ratify the human rights conventions.

MORRIS SCHAPIRO: A GREAT BALTIMOREAN AND AN AMERICAN SUCCESS STORY

Mr. TYDINGS. Mr. President, many Marylanders including my own family were deeply saddened recently by the death, on May 3, of Mr. Morris Schapiro. He was 86 years old.

Mr. Schapiro's life is a classic American success story. He came to the United States from Latvia in 1902 at the age of 19 to avoid religious persecution under the Russian Czar. He came to Baltimore in 1904 at the time of the great fire, and

made a livelihood by hauling metal and lumber from the burned out areas at 2 cents a load.

With \$300, he and two relatives then started the Boston Metals Co., which is today a \$10 million a year business, and the largest exporter of American-built diesel parts and the world's biggest machinery replacement firm.

Mr. Schapiro was also director and a principal stockholder of Laurel Race Track and a principal stockholder in Maryland Shipbuilding and Drydock Co. In addition to a very strong role as chairman of Boston Metals, Mr. Schapiro maintained an active membership in many Maryland Baltimore civic groups, and was a member of Oheb Shalom congregation.

An editorial in the Baltimore Evening Sun best summarized the importance of this creative man of imagination and organizational genius:

He became a towering figure on the Baltimore waterfront and the name, Schapiro, spoke for itself wherever shipping men gathered from Hong Kong to Genoa.

I ask unanimous consent that the editorial and two articles about Mr. Schapiro, published in the Baltimore Morning Sun of May 4 and the Washington Post of May 5, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Evening Sun, May 5, 1969]

MORRIS SCHAPIRO

Morris Schapiro wasn't the last tycoon, but this crusty, often creative tribe is waning fast in a day when strong men are at least half-convinced that part of their job is to look out for lesser men. Morris Schapiro had to look out for himself. Was Baltimore burning? This kid fresh out of his teens, his grasp of the English language still uncertain, looked doubtfully at the flames gobbling the city he had just chosen for his new home. Better he'd stuck out Latvia after all and the life which in 1904 awaited Jews at the hands of the Russian Czar.

Bit by bit, literally, Morris Schapiro picked up his new Baltimore life. The charred smoking fragments of the Great Fire brought him 2 cents a load; in time, he built a vast business of fragments—his Boston Metals company bought, broke up and re-sold ships throughout the world. He became a towering figure on the Baltimore waterfront and the name, Schapiro, spoke for itself wherever shipping men gathered from Hong Kong to Genoa. No Baltimore businessman grew too big to fall to nod in deference to the organizational genius and imaginative gambles which, together, lifted this man from nowhere to the highest level where financial strength is flexed.

Morris Schapiro was a man of his time, for it was a time when Baltimore was still open to a businessman who could build a national organization and keep the home office, the power, in Baltimore. Now we are overwhelmingly a city of branch offices, of subsidiaries and offshoots from elsewhere. The old Baltimore independents who stood on their own two feet, the Morris Schapiro, are down to a handful.

[From the Washington Post, May 4, 1969]

M. SCHAPIRO OF LAUREL DIES AT 86

BALTIMORE, May 3.—Morris Schapiro, 86, former president of Laurel Race Course and father of the current president, John D. Schapiro, died today at Sinai Hospital.

Survivors include his widow, Rebecca; a son, Joseph S. Schapiro of Beverly Hills, Calif., and two daughters in Baltimore, Mrs. Joseph S. Cascarella and Mrs. Doris Gillman.

Funeral plans are incomplete but interment service will be private.

Mr. Schapiro bought Laurel in 1950 after rising from an itinerant junk peddler to head a multi-million dollar scrap-iron business.

He came penniless from Latvia to America in 1902 and was a peddler in Georgia until he and two relatives pooled \$200 to start the Boston Metals Co. in 1904.

This became the largest firm of its type in the Nation and also one of the largest in the ship-scraping business.

Mr. Schapiro once sold a Canadian frigate to Aristotle Onassis, who converted it into the famous yacht Christina.

Mr. Schapiro became involved with racing in 1943 when he and a partner bought Gulfstream Park at Hallandale, Fla. He sold out five years later.

[From the Baltimore Morning Sun, May 4, 1969]

MORRIS SCHAPIRO, 86, DIES; OWNED LAUREL RACE COURSE

Morris Schapiro, who arrived in Baltimore with 75 cents and started hauling junk from the Great Fire of 1904, died yesterday at the age of 86, the owner of a prosperous scrap metal business and Laurel Race Course.

Mr. Schapiro, who lived on Folly Quarters Farm in Howard county, died early yesterday afternoon in Sinai Hospital of complications from a broken leg.

Services will be held at 3:30 p.m. tomorrow at the Oheb Shalom Temple, 7310 Park Heights avenue, with burial following in his Mausoleum at the Druid Ridge Cemetery.

Mr. Schapiro came to the United States in 1902 at the age of 19 from Latvia to avoid religious persecution by the Russian Czar.

After wandering around the Atlantic seaboard for two years, Mr. Schapiro came to Baltimore in February, 1904, and began hauling junk—metal and lumber—from the ruins of the burned out city at 2 cents a load.

TEN-MILLION-DOLLAR BUSINESS

With two relatives, Mr. Schapiro started the Boston Metals Company with \$300.

Today, it is a \$10 million-a-year business, the largest exporter of American-built diesel parts and the world's biggest machinery replacement firm.

Boston Metals has also scrapped in its 65 years more than 1,500 ships—including the old U.S.S. Pennsylvania on which Mr. Schapiro sailed from Riga to the United States.

At the time of his death, Mr. Schapiro was chairman of the firm and still active in it.

He was also a director of the Laurel Race Course and a principal stockholder there. It was the fifth race track in which he had held an interest. The others had been Gulfstream in Florida and Pimlico, Bowie and Havre de Grace in Maryland. In the early 1950's he was perhaps the most powerful man in Maryland racing.

A smiling, pink-cheeked man, Mr. Schapiro worked from an office at 313 East Baltimore street where the walls were covered with photographs of the ships he had scrapped and of his family.

GAVE OUT \$100 BILLS

Each birthday for the past decade, he gave each of his employees a \$100 bill.

Mr. Schapiro began making multimillion-dollar real estate deals around 1920 both in Baltimore and in Howard County, where he had extensive land holdings.

Modest about his Horatio Alger rise from an immigrant ragamuffin to a multimillionaire businessman well known in international shipping circles, Mr. Schapiro attributed it "mostly to luck . . . and a little management sense. That's all."

STRONGEST ALLEGIANCE

Although his family has financial interests across the country and overseas, Mr. Schapiro's strongest allegiance was to Baltimore and Maryland.

A few years ago, when there was a chance

the Maryland Shipbuilding and Drydocking Company might be taken over by the Fifth Avenue Coach syndicate of New York, for which he had little liking, Mr. Schapiro declared he would put up \$1 million and recruited the late Thomas Nichols, head of Olin-Mathieson Chemical Corporation, to put up \$1 million to save the firm.

Mr. Schapiro also had his share of passing controversies. He fought with the United States Maritime Commission, when it was first formed, over buying old ships.

In the early 1950's he was accused of being Maryland's racing czar because of his extensive race track holdings.

He fought his fights vigorously and later shrugged them off. "Money is sometimes controversial, too," he told one interviewer.

Mr. Schapiro was active in a host of civic groups and was a longtime member of Oheb Shalom. He also established the Morris Schapiro and Family Foundation in 1943 to make religious, educational and charitable contributions.

He is survived by his wife, the former Rebecca Samler; two sons, John D. Schapiro, of Baltimore, and Joseph S. Schapiro, of Beverly Hills, Calif.; two daughters, Mrs. Doris Gillman and Mrs. Jerry Cascarella, both of Baltimore; by seven grandchildren and seven great-grandchildren.

DR. LESLIE KOLTAL, ADMINISTRATOR, METROPOLITAN JUNIOR COLLEGE, KANSAS CITY, MO.

Mr. EAGLETON. Mr. President, when the Metropolitan Junior College of Kansas City is constructed in downtown Kansas City, it will become the first junior college to have a new campus in midcity. Metropolitan Junior College also possesses another rare commodity, Dr. Leslie Koltal, a man who combines the lofty idealism of the academic world with the realism of an able administrator.

I ask unanimous consent that an article published in the Kansas City Jewish Chronicle regarding Dr. Koltal and the Metropolitan Junior College of Kansas City, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DYNAMIC JUNIOR COLLEGE HEAD HAS GREAT PLANS FOR COMMUNITY

(By Lorraine Raskin)

Bricks and mortar will soon rise on the Kansas City horizon to form the three separate campuses which will make up the Metropolitan Junior College of Kansas City; and, figuratively speaking, the man wielding the trowel will be Dr. Leslie Koltal, the chief executive of MJC-KC.

Being a modest man, Dr. Koltal is somewhat embarrassed by the impact his presence has made upon the local scene. He is, nevertheless, elated that the publicity encompasses the growth of Junior College, and marks it as an institution destined to benefit the growth of the community.

Challenge and impossible odds are the components that make up this 38-year-old man. The image of the Hungarian Freedom Fighter comes through clearly despite the fashionably custom-tailored suit and the impeccable manner of the man.

Dr. Koltal's innate modesty commands that emphasis be placed on his present work, rather than on his past personal accomplishments—an instant insight into the man who was named in 1968 as President of Metropolitan Junior College. It is an important and sensitive position, with great import for the future of the entire urban community.

Dr. Koltal's exciting background has been recounted often, despite his obvious reluctance to dwell upon it. In 1956, he was a professor of the Russian language at the

University of Budapest, when the Hungarian revolt rocked his country, as the people sought to overthrow the puppet government established by the Soviets.

Koltai promptly joined the Hungarian Revolution Radio Committee, and broadcast news of the revolt and appeals for aid to the world outside the Iron Curtain. These activities earned for him a place on the Russian's most-wanted list.

When the revolution collapsed, Koltai, with his young son Steven, who was doped with sleeping pills to keep him quiet, and his wife, Katherine, walked through mine fields to escape into Austria. There he joined the Voice of America in Vienna.

He and his family emigrated to the United States in 1957, with distant relatives in Denver helping to make a new home for the Koltais.

The following year the family moved to Los Angeles, where Koltai entered the journalism school of UCLA. He worked as a clerk by day, and attended classes at night. In his second year there, he taught the Russian language at night at Los Angeles Valley College in Van Nuys, and went to day classes.

Koltai received a master's degree from UCLA in 1960 and his doctorate in education from UCLA in 1967. He also holds bachelor's and master's degrees from the University of Budapest.

Before coming to Kansas City, Dr. Koltai served for 8 years as dean of institutional research at the Pasadena City College.

Dr. Koltai and Kansas City joined forces in July, 1968. Katherine Koltai, the truly feminine and lovely counterpart to Dr. Koltai, arrived in the city the following month.

Steven, now a tall, handsome, 14-year-old, is big brother to a blonde, pigtailed sister, Marian, age 7, and a gremlin with a "dare you" grin, Robert, 5. They attend Central South junior high, Red Bridge elementary school, and Temple B'nai Jehudah nursery school, respectively.

Mrs. Koltai is contentedly happy to be a housewife and hostess for her husband, and an understanding, available mother to her children. The entire family is actively affiliated with Temple B'nai Jehudah.

To talk with the Koltais is to talk of the junior college expansion plan. Dr. Koltai's habits of efficiency and industry take the lead even in conversation, and the topic of the hour is the teaching-oriented institution. Facts about the college seem to take on the aura of glowing compliments.

Junior colleges are considered the "wonder child" of American education, and in 1969 comprise almost one-third of the establishments of higher education.

Limited to a 2-year program, the junior college gives its graduating students an Associate in Arts degree and a feeling of success and completion. In contrast, the student in a 4-year college, who may leave at the end of his sophomore year, often feels like a dropout.

The greatest student attraction is the non-distinction between professional and technician. Those students who are not dedicated to 4 years in a conventional college, may leave school after 2-years in a junior college, fully confident in their ability to enter the labor market.

Other junior college graduates may transfer, with no credit loss, to a 4-year college. The latter, as expected, is determined by grades and quality of courses taken.

"Kansas City's Metropolitan Junior College is a rare commodity in its field," says Dr. Koltai, "for it is the first junior college to have a new campus in mid-city."

The 30-acre site of the central campus near 31st Street and Pennsylvania, adjacent to Penn Valley Park, will eventually be the hub of a complex of 26,000 students and a vast faculty. By contrast, the student body now numbers some 6,000.

"This will be the beginning of the re-creation of the inner city," says Dr. Koltai,

to whom the vision quickly becomes a reality. He tells with great and infectious enthusiasm about the suburban campuses, too, one to be located in the growing area north of the Missouri River, the other to be on land of the beautiful old Longview Farm, near Lee's Summit.

"The Metropolitan Junior College," Dr. Koltai points out, "is a publicly controlled institution which can add to the earning potential of the community, and can serve as a long-needed deterrent to the 'brain-drain' of our young citizens."

Also in the junior college blueprints is an "On Broadway" theater for public use. Drama, music, and ballet are but a few of the cultural facets to be pursued.

The direction of some of these innovations may well be toward a proposed convention center. The junior college will be so situated as to be ideally available for use as forum buildings and lecture halls.

Dr. Koltai and the board of Metropolitan Junior College, which is now unanimously focused upon a future of positive growth after putting behind it the controversies of the past, plan to introduce and familiarize the Greater Kansas City community with the multi-high campus facilities and the contemplated program which was never before offered in a junior college in this area.

Many Kansas Citians who have already met Dr. Koltai will agree that he combines with good balance the lofty idealism of the academic world, with the realism and the quiet confidence of a skilled craftsman in the tools of his trade.

MONITOR ARTICLE POINTS UP NEED FOR CONGRESS TO ACT NOW ON DIRECT POPULAR ELECTION AMENDMENT

Mr. BAYH. Mr. President, Richard Strout's article entitled "Computers Signaled No Win in Great Unelection of 1972," published recently in the Christian Science Monitor, vividly depicts one of the fatal flaws in our antiquated electoral machinery. Mr. Strout centers his attention on the undemocratic procedure that must follow when no candidate receives a majority of the electoral vote. The choice of a President by the House of Representatives, on the basis of one State, one vote, was described by Thomas Jefferson as "the most dangerous blot on our Constitution." Yet 150 years later, that "dangerous blot" remains.

But that is far from the only serious shortcoming of the present system. As dangerous and undemocratic as an election by the House of Representatives is the election of a President who is not the first choice of the American people. The present "winner take all" system cannot guarantee the election of the popular vote winner; nor, for that matter, can the often proposed district and proportional plans. In fact, direct popular election is the only system that accurately reflects the will of the electorate. It is the only fail-safe system.

As the Strout article points out, Mr. President, the House Committee on the Judiciary, under the able direction of Chairman Celler, has favorably reported a direct election proposal. I am hopeful that the Senate will have an opportunity to consider this vital matter shortly. Prompt action is necessary if the Nation is to avoid the type of situation depicted in Mr. Strout's scenario.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMPUTERS SINGLED "NO WIN" IN GREAT UNELECTION OF 1972

(By Richard L. Strout)

WASHINGTON.—Very well, then, the ballots of the electoral college are brought into Congress on Jan. 6, 1973. Nobody will ever forget that day.

The election of 1972, it is agreed now, was one of the most spectacular in history. Most of the nation, that election night, never went to bed at all.

Around 11 the first wild surmise took shape. "How's it going?" People would ask coming in from the theater. At the startling answer they would gape, take a pillow, and settle down for the night.

Naturally the computers were unprepared. Nobody had really thought it possible. It was NBC's Univac which seemed dimly to sense it first. It kept signaling "no win" which didn't make sense.

EXCITEMENT DIMINISHES

By 7 next morning the haggard broadcasters with cracked voices and shaded jaws faced the horrid fact.

No candidate had an actual majority of electoral-college votes! The election would go into the House of Representatives for the first time since 1824.

For a few startling hours on the night of Nov. 5, 1968, it seemed there would be no election. Then Richard M. Nixon slowly pulled ahead. . . . Never again, the nation said!

But then the excitement diminished. As with the national effort to get gun control, the attention of the people turned to other things. There was a modest gun law, to be sure—but the battle to reform the electoral college was much more difficult because this was a constitutional amendment.

Not only did it require a two-thirds vote of House and Senate, but after that a three-fourths approval from the 50 states—that is 38 of them. Many of the smaller states felt that they would lose power under the proposal. Half a dozen could be counted against the plan almost from the start. Thirteen could block it.

So without any change in the electoral college the great unelection of 1972 was held. The civil-rights agitation had not ended, and again there were three candidates, Richard M. Nixon, Edward M. Kennedy, and George C. Wallace. It was California that finally tipped the balance.

POLL CLOSINGS DIFFER

Polls on the West Coast close three hours after the East, and by 1 a.m. it was evident that the Democrats were in trouble. The state wavered like a leaf in the gale. "It's like 1968 all over," husbands muttered to wives as they sat glued to the TV. Some added grimly "only more so."

In 1968, indeed, George Wallace got 9,900,000 popular votes and 46 electoral votes; Hubert H. Humphrey 31,200,000 and 191; Richard Nixon 31,700,000 and 301. Without an absolute electoral-college majority of 270 by Mr. Nixon the 1968 contest would have gone into the House.

California at 4 o'clock on that wild morning unofficially put its 40 electoral votes into Mr. Kennedy's pile. The other states did not follow the same 1968 pattern exactly, but the total number of electoral votes, amazingly enough, totaled almost the same.

Next morning the unofficial score (to be followed by weeks and months of inflammatory disputes over the count) stood like this:

Total electoral votes	538
Necessary to elect	270
President Nixon	262
Edward M. Kennedy	231
George C. Wallace	45

No one had been elected.

The most powerful nation in the world did not know who its next president would be.

"Election Goes to House!" shouted the normally sedate New York Times.

"Candidates plead for calm," said the conscientious Christian Science Monitor.

"What a Mess!" ejaculated the irrepressible New York Daily News.

AMENDMENT TRIED

They had tried to amend the Constitution in 1969 and hadn't. And so the Constitution said the House should "chuse" the president from the top three contestants.

It had happened in 1800, and again in 1824, and it had almost happened several times since. Though nobody noticed it at the time, in 1948, a shift of 0.6 percent of the popular vote away from Harry S. Truman in two states would have made an unelection. (And if it had gone into the House in 1948, scholars noted afterward, scratching their heads they couldn't have figured what would have happened.)

The point was, of course, that under the quaint constitutional provisions each state in the House would have just one vote—Vermont one, California one. Each state would cast its single vote in accordance with the majority of its members in the chamber.

BOOKSTORES BOOM

The trouble in 1972 was that the legislative delegations of several states were evenly divided. Unless one side or another gave way it would be like a hung jury—the state would lose its vote. After subtracting these evenly divided states, there was a tie between Messrs. Nixon and Kennedy, with Mr. Wallace holding the balance of power with apparent control of five Southern states.

But how about the vice-president? people asked hopefully.

In the week after the unelection millions read the Constitution for the first time, and some bookstores made modest fortunes by selling a document suddenly as popular as Mao's "thoughts."

They discovered that while the House is picking the president from the highest three, the Senate is picking the vice-president from the highest two. Would it be Spiro T. Agnew or Mr. Kennedy's running mate, Sen. Edmund S. Muskie of Maine?

The Constitution provides that the vice-president shall be acting president if for some reason (a deadlock, perhaps) there is no president. . . .

Who can complete the scenario?

The supposititious election of 1972, thrown into the House, might end with the ultimate degrading spectacle of the two principal candidates making secret deals with the third and the presidency bartered off.

POSSIBILITIES SEEN

Or on the other hand, fortunately, it probably won't happen. Some candidate in 1972 will get a majority of the electoral votes. Or, perhaps, the Constitution may be amended to remove this preposterous possibility of a deadlock for all time.

On Tuesday, April 29, 1969, the House Judiciary Committee approved, 28 to 6, a proposed constitutional amendment providing for the direct, popular election of the president. Would it run the gauntlet of two-thirds vote in Congress, and a three-quarters vote in the states? Nobody knew.

Even so there was a tiny hole in it. The committee voted to delay its effective date till a year after ratification. This meant that it was unlikely to be in force in 1972.

And so the strange tale with its extraordinary possibilities begins again. "On the evening of Nov. 5, 1972, the American nation settled before its television sets to await the election result dimly aware of the kind of Russian roulette it was playing. And then. . . ."

STUDENT UNREST IN PERSPECTIVE

Mr. MONDALE. Mr. President, the Nation has experienced an extended period of protest, demonstration, and violence on its campuses.

In my address to the graduates of St. Olaf College, in Northfield, Minn., on Sunday, May 25, I tried to put this general unrest into perspective. In the process, I arrived at several conclusions:

The Nation cannot tolerate either violence or lawlessness on its campuses.

Forcible suppression of unrest, without attention to its causes, is just as deadly as violence.

The American student generation is not irrelevant, mentally ill, or suicidal, but is fast becoming the most dynamic element of the American political system.

This generation of 7 million students has many legitimate complaints about campus life.

Much of student unrest has nothing to do with the campus itself, but is a reflection of the unrest, the contradictions, and the disarray of American life.

Mr. President, my remarks may be helpful to others who are disturbed by the difficulties on our campus, and they are directly relevant to my proposal to establish a National Commission on Campus Unrest. I ask unanimous consent that the text of these remarks and an editorial from this morning's St. Paul Pioneer Press, which refers to the speech, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR WALTER F. MONDALE, 1969 COMMENCEMENT, ST. OLAF COLLEGE, NORTHEFIELD, MINN., MAY 25, 1969

It is not difficult to pick a commencement topic this year.

It is chosen for us. It is campus unrest.

Already rocked by the turbulence of our cities, the Nation now is staggered by the explosion of our campuses.

There have been instant demands and instant responses. And now we hear instant theories of what it all means.

We are told that our unhappy young people are historically irrelevant in an age of technocrats, or victims of widespread mental instability brought on by the never-ending adolescence of the modern world. Or they suffer a kind of group Oedipus complex—violence and self-destruction that springs from hatred of father-generations.

There is a common thread in these theories—little time need be wasted on the complaints of the historically irrelevant, mentally ill, or suicidal. We can only protect ourselves from them.

So how can a nation deal with such young people?

Some members of Congress want to cut off their federal aid. That was only the wealthy can riot.

The President of the United States asks administrators to show more "backbone."

The Attorney General says that it is clearly time to get tough.

The Deputy Attorney General suggests that those who demonstrate in a manner to interfere with others "should be rounded up and put in a detention camp."

The Director of Selective Service likes to draft them.

There were also instant theories when our cities blew up.

Then, as now, we thrashed around for quick definitions and solutions.

Then, as now, there were demands to stop the disruption some way, any way, so that all of us—and our nation—could go back to sleep.

Fortunately, some sought to understand, to find out why. The Nation created a remarkable investigative body to seek an end to urban violence and keep our cities alive.

The Kerner Commission, to be sure, concluded that wise and effective law enforcement was a key to urban order. But it also exposed what is now widely accepted as the truth about our cities. And it insisted that fundamental reform is an absolute necessity if we are to avoid the disaster of two Americas—one black, one white; separate and unequal.

I do not want to give that Commission or the Nation more credit than they deserve. Our cities are not free from the threat of violence and our urban problems clearly have not been solved.

But I believe the Kerner Commission did settle a profound debate about the tactics this Nation must use if its cities are to live.

As you may know, I have proposed the creation of a similar Commission on Student Unrest. With your permission, I'd like to speculate about what such a Commission might conclude.

1. Its first conclusion will be a warning—the nation cannot tolerate either violence or lawlessness on its campuses.

This is not just a matter of personal safety or the protection of valuable property, important as those are. The very processes of education and humane development are destroyed when fear and hate inhibit the quality of encounter.

The business of the campus is confrontation—between minds and knowledge and ideas. There can be no real confrontation in an atmosphere of intimidation. The inevitable victims of violence are freedom of expression and open debate, mutual respect and trust, reason and communication. Violence closes doors that must remain open.

As Paul Goodman has put it, "out of the shambles can come only the same bad world."

2. But the second finding of the Commission—as important as the first—will be that forcible suppression of unrest, without attention to its causes, is just as deadly as violence.

Nothing is more peaceful than a cemetery. The problem is not only to stop violence, but also to preserve the vitality of the campus. The use of force on the campus is an admission of defeat, another form of intimidation that inhibits real confrontation.

The campus is much like a family.

All of us who are parents know that sons and daughters in college can't be paddled on their behinds like kindergartners—at least not with the same effect. They've reached a degree of maturity now, when authority depends on mutual respect and trust. Resorting to force does not preserve authority. It destroys it. Young people become defiant, obedience requires harsher measures, and finally authority breaks down.

If the university, like the family, seeks to create independent men and women, it must take a lesson from the family. It must recognize that its authority is in direct proportion to the mutual respect and trust developed with its students. Otherwise there is no community.

3. The third conclusion of the Commission will be that the American student generation is not irrelevant, mentally ill, or suicidal. Instead, it is fast becoming the most dynamic element of the American political system.

During the past twenty years, enrollment on the nation's campuses has tripled. This coming fall, more than 7 million Americans will be students on our campuses. By 1976, the figure will be 10 million. There are at

least twice as many college students as farmers in the United States.

These students constitute what Kenneth Keniston calls a new "youth" stage in American life. They have opportunities for intellectual and moral development which have been available to no other large group in history.

College attendance is a major part of their lives. In that environment they are free to examine the assumptions of the past and the superstitions of childhood. The campus allows them more open expression of feelings and frees them from what Keniston calls "irrational bondage to authority."

They "take the highest values of their societies as their own . . . and . . . are willing to struggle to implement them."

American affluence and education have, in Keniston's words, created our "own critics on a mass basis."

We have done much for these young people.

In our smugness about America's wealth, we have taught them not to be smug about America's poverty.

In our satisfaction with power, we have taught them to be dissatisfied with our practice of power.

In compromising our ideals, we have taught them to be firm.

In struggling to serve ourselves, we have made them altruistic.

We have given them the conviction and determination not to fail.

In our weakness, we have made them strong.

They number in the millions.

They are bright and sophisticated and economically secure.

Our young are permanent, not temporary. They are stable, not insecure. They are no passing phenomenon.

Just as our society has adjusted previously to the demands of militant farmers, organized workers, suburbanites, and ghetto dwellers, so the young will also seek and win their right to participate in the decisions of America. It is a new group, but an old process.

4. The Commission's fourth conclusion will be that *this generation of 7 million students has many legitimate complaints about campus life.*

Many of their colleges and universities are ill-equipped to cope with either their numbers or their needs.

Their classrooms are crowded. Their libraries are inadequate. Their programs of study are badly out of date.

Too many of their administrators hide behind bureaucratic barricades. Too many of their teachers are preoccupied.

Their legitimate pleas for reform are too often met with tokenism or rhetoric—or the reformers are lumped with the extremists they detest.

Though they are serious, they do not find themselves taken seriously. And while the campus exists for them, they do not feel it is theirs.

5. Finally, a responsible Commission will find that *much of student unrest has nothing to do with the campus itself. It is a reflection of the unrest, the contradictions, and the disarray of American life.*

The President of Amherst College described this manifestation of student unrest in a recent letter to President Nixon.

"Much of the turmoil," President Plimpton said, "will continue . . . until political leadership addresses itself to the . . . huge expenditure of national resources for military purposes, the inequities practiced by the present draft system, the critical needs of America's 23 million poor, the unequal division of our life on racial issues . . ."

"Unrest," he said, "results, not from a conspiracy by a few, but from a shared sense that the nation has no adequate plans for meeting the crises of our society."

Vietnam. The draft. Defense spending. Poverty. Racism.

This is the litany of our shared unrest. I cannot express how deeply I believe the war in Vietnam has wounded the capacity and the spirit of the Nation. It is, as it should be, at the heart of the student unrest.

I once supported our effort there. But whatever commitment we had to South Vietnam has long since been fulfilled. We must now turn the war back to the South Vietnamese, fairly and systematically, but completely. It is clear that the nation still has no adequate plan for that.

In the meantime, our young men die—12,000 since the Paris talks began. In the meantime, the costs and inflation brought by the war strip us of our ability to deal with other problems.

And while the war takes wealth from all of us, it costs the young their bodies, lives, and souls. For it is they who must finally serve or disobey.

They suffer an outrageous selective service system over which they have absolutely no control though they make up its entire constituency. They recognize that the system draws an unfair sample of the population. They know certain privileges are available to the able, the affluent, and the befriended, while the average, the poor, and the friendless take most of the risk.

The faults of the system and its director leave the young in jeopardy for years and make federal criminals of many who profoundly question the morality of war.

But as President Plimpton says, the nation has no adequate plan.

The war, our frantic efforts to prepare for all imaginable future military contingencies, our debts for past wars and support of veterans—these will cost the nation at least 100 billion dollars this year.

That is a stupefying amount of money. Even a billion is incomprehensible. But a billion dollars would operate St. Olaf at its present budget level, tuition-free, for 125 years. A billion dollar endowment, returning five percent a year, might finance six colleges the size of St. Olaf, tuition-free, forever.

Yet a billion dollars pays for less than two weeks of the war in Vietnam. It is just one percent of the true annual defense budget for the United States.

But in spite of its tremendous size, there is no systematic examination of that defense commitment. Except in the Pentagon, there is no analysis of outmoded defense systems, troop assignments, and base commitments. There are no talks with the Soviet Union about weapons control.

We might save billions of dollars, improve our defense capability at the same time, and reduce the threat of international holocaust. But the nation has no adequate plan.

Defense spending is clearly bleeding the nation of its resources to deal with poverty and deprivation in America. As cartoonist Herb Block pointed out in his recent book, some "can hear the distant drum more clearly than the cry of a hungry child."

Well, I have heard—and seen—those hungry children. I have found housing unfit for pigs, where children and rats "live" side by side.

Millions of American children are destroyed physically and mentally by hunger and cultural deprivation before they ever enter the first grade, and even then their schools too often have nothing to offer them.

Millions of unemployed young men and women could and would hold jobs with proper education and training.

Millions of older men and women suffer on inadequate pensions because they have been unfortunate enough to grow old while the rest of the Nation was growing rich.

Many suffer because they are in large and

fatherless families, or because they are physically or mentally disabled.

But the nation has no adequate plan. A year ago the Kerner Commission concluded that we were becoming two nations—one white, one black; separate and unequal.

In its follow-up study, "One Year Later," Urban America concludes that the nation has not reversed the movement: "... a year later, we are a year closer to being two societies, black and white, increasingly separate and scarcely less unequal."

But the nation has no adequate plan.

This is the country so many of our young are asking us to explain. Their questions trouble us. For however we may rationalize the failures of the past, the young believe this nation has lost its excuses.

And so do I.

How can it be so?

We are as free a people as exists.

We are as educated a people as the world has ever seen.

We are now the wealthiest people in history, and perhaps the wealthiest that can be imagined.

We have proclaimed the noblest objectives of all time.

How then can we continue with "no adequate plans"?

With the candor of their young and honest eyes, our youth are telling us that we cannot. They insist that the ideals they have learned from us must be lived—now.

What makes us so uneasy is that we know that they are right, and we know that our excuses are gone.

We must face that simple truth, learned from the young.

But having said what I believe we must learn from the young, I would close by saying what I believe we must all learn about the institutions of this society. I believe, with Urban Coalition Chief John Gardner, that "demands for instant performance (can) lead to instant disillusionment." What do we do, in a free nation, when our aspirations leap ahead of the capacity of our institutions to respond?

Last year at this time, speaking at Cornell University where his words should be echoing this spring, Gardner described two great threats to the institutions of America:

Some "uncritical lovers" would stagnate our institutions in a smothering embrace, loving their rigidities more than their promises.

Other "unloving critics," skilled in demolition and untutored in the art of reform, would destroy all we have through disruption, intolerance, and violence.

Just as we reject the uncritical lovers of our institutions, so we must reject the unloving critics who preach that only destruction will do. As Mayor Lindsay says, the tactics of destruction "promise not an end to manipulation and rigidity, but only another color robe for the executioner to wear."

What we desperately need are Gardner's "loving critics"—"sufficiently serious to study their institutions, sufficiently dedicated to become expert in the art of modifying them."

But we will not make "loving critics" of our young unless we show them that we share their sense of urgency as well as their ideals.

We will not teach them to be patient, so long as patience means delay.

I think we can expect a great deal of this new, dynamic generation.

It will be no more than they expect of themselves.

They said so in the student prayer delivered at the Radcliffe College commencement a year ago. It ends this way:

"Let there be born in us a strange joy that will help us to live and to die and to remake the souls of our time."

That prayer unites us with the young of this nation, and lies at the root of the tra-

dition that formed St. Olaf College and set it forth on its holy business.

So, let there truly be born in all of us a strange joy that will help us to live and to die and to remake the souls of our time.

LESSONS OF CAMPUS UNREST

In his commencement address at St. Olaf College, Sen. Walter Mondale drew some conclusions about college students that are worth noting by people both on and off our campuses.

Mondale, who has proposed the creation of a President's Commission on Student Unrest, speculated that such a commission would find that:

The nation cannot tolerate either violence or lawlessness on its campuses.

Forcible suppression of unrest, without attention to its causes, is just as deadly as violence.

The American student generation is not irrelevant, mentally ill or suicidal. Instead, it is fast becoming the most dynamic element of the American political system.

This generation of 7 million students has many legitimate complaints about campus life.

Much of student unrest has nothing to do with the campus itself. It is a reflection of the unrest, the contradictions and the disarray of American life.

The points are well taken. Violence and vandalism crushes freedom of expression, respect and communication, all of which are vital in academic life. And while there is an irrational element on some campuses that cannot be reasoned with, but seeks only acquiescence to demands that lead to anarchy, most dissatisfied students are willing to settle their problems through reasonable conversation.

There are now twice as many college students as farmers in this country. If all were made, as some critics imply, the chaos would be far greater than it is. Most of our young people are responsible citizens who are aware that life both on and off the campus can be improved. There would be cause for concern if they did not recognize the need for improvement.

Students who have this awareness should be encouraged to express their ideas in a reasonable manner without trampling on the rights of others. These young people are our country's greatest resource. They should not be wasted by a deaf society. Neither should they waste themselves in violence.

ADDITIONAL COVERAGE AND PROTECTION FOR NATION'S WORKERS

Mr. WILLIAMS of New Jersey. Mr. President, I have recently introduced two bills which I believe to be of vital importance to the Nation's working men and women.

One of them, S. 2070, would broaden the coverage of the Fair Labor Standards Act so as to reach an additional 13 million workers, and increase the minimum wage to \$2 an hour, in order to guarantee a decent wage to the more than 2 million Americans who, even though fully employed, do not now earn enough to meet the needs of their families.

The other bill, S. 2193, provides a workers' health and safety bill of rights, designed to stem the increasingly heavy toll being taken by occupational accidents and illnesses.

I hope that after having had an opportunity to examine their provisions, many Senators will want to join as cosponsors of either or both measures.

Senators who wish to have their names appear on the next printing of the bills are invited to call extension 3674 for this purpose.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDING OFFICER laid before the Senate the following letters, which were referred as indicated:

PROPOSED SUPPLEMENTAL APPROPRIATION— COMMUNICATION FROM THE PRESIDENT

A communication from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1969 in the amount of \$45,000,000 for the Atomic Energy Commission, for the restoration and replacement of the weapons production facility at Rocky Flats, Colo., which was damaged by fire, which with an accompanying paper was referred to the Committee on Appropriations, and ordered to be printed.

PROPOSED LEGISLATION TO AUTHORIZE IN THE DISTRICT OF COLUMBIA A PROGRAM OF PUBLIC DAY CARE SERVICES

A letter from the assistant to the Commissioner of the District of Columbia, transmitting a draft of proposed legislation to authorize in the District of Columbia a program of public day care services; and to amend the District of Columbia Public Assistance Act of 1962 so as to relieve certain adult children of the requirement of support and to provide public assistance in the form of foster home care to certain dependent children (with accompanying papers); to the Committee on the District of Columbia.

REPORTS OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a secret report on the review of the effectiveness of the Air Forces systems for managing manpower resources at air bases in Thailand (with an accompanying secret report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of the financial statements of the Virgin Islands Corp. (In liquidation), Department of the Interior, for the fiscal years ended June 30, 1967 and 1968 (with an accompanying report); to the Committee on Government Operations.

PROPOSED LEGISLATION TO READJUST THE COM- PENSATION OF THE ADVISORY BOARD FOR THE POST OFFICE DEPARTMENT

A letter from the Postmaster General, transmitting a draft of proposed legislation to readjust the compensation of the Advisory Board for the Post Office Department (with accompanying papers); to the Committee on Post Office and Civil Service.

REPORT TO CONGRESS ON THE NATIONAL VISITOR CENTER

A letter from the Secretary of the Interior, transmitting, pursuant to law, an annual report to the Congress on the National Visitor Center and all other visitor facilities authorized (with an accompanying report); to the Committee on Public Works.

PROPOSED ALTERATION OF PUBLIC BUILDINGS

A letter from the Administrator, General Services Administration, transmitting, pursuant to law, prospectuses which propose alteration of public buildings (with accompanying papers); to the Committee on Public Works.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDING OFFICER:
A Senate concurrent resolution adopted by the Legislature of Hawaii; to the Committee on Armed Services:

"S. CON. RES. 16

"Concurrent resolution petitioning the President and the Congress of the United States to reconsider the deployment of anti-ballistic missiles and the location of an anti-ballistic missile system in the State of Hawaii.

"Whereas, the United States is devoted to furthering world peace, and to decreasing the tensions of the world's arms race, and to preventing nuclear weapons proliferations; and

"Whereas, eminent nuclear physicists, including Nobel prize winners, science advisers to Presidents Eisenhower, Kennedy and Johnson, and scientists who have been active in developing the Nation's weapons system, as well as personnel of the Department of Defense have stated that no anti-ballistic missile system can adequately protect a country from sophisticated nuclear attack and that the present United States superiority is a deterrent to both sophisticated and simple offensive nuclear threats; and

"Whereas, hunger and disease are as great a danger to peace and internal security as hostile arms, and huge military expenditures for quickly obsolete weapons systems present the use of funds to alleviate poverty, thereby increasing world insecurity; and

"Whereas, the orderly development of the State of Hawaii lies in its potential to create and expand understanding and trade among diverse cultures and peoples rather than its being an armed outpost of American power; now therefore,

"Be it resolved by the Senate of the Fifth Legislature of the State of Hawaii, Regular Session of 1969, the House of Representatives concurring, that the President and the Congress of the United States be, and they are, respectfully petitioned to reverse the decision to deploy an anti-ballistic missile system and to locate a part of the system in the State of Hawaii; and

"Be it further resolved that the President and the Congress of the United States be, and they are, respectfully requested to explore actively all possibilities which would lead to reduction of both offensive and defensive nuclear missile systems among nations, a nuclear non-proliferation treaty and gradual multilateral disarmament, and expanded non-military efforts to alleviate poverty and hunger at home and abroad; and

"Be it further resolved that duly certified copies of this Concurrent Resolution be transmitted to the President of the United States, the President of the United States Senate Pro Tempore, the Speaker of the United States House of Representatives, the Secretary of the United States Department of Defense, Senator Hiram L. Fong, Senator Daniel K. Inouye, Representative Spark M. Matsunaga, and Representative Patsy T. Mink.

"Attest:

"DAVID C. MCCLUNG,
"President of the Senate."
"SEIICHI HIRAI,
"Clerk of the Senate."

"Attest:

"TADAO BEFFU,
"Speaker, House of Representatives."
"SHIGETO KANEMOTO,
"Clerk, House of Representatives."

A concurrent resolution adopted by the Legislature of Massachusetts; to the Committee on Finance:

"RESOLUTION MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION PROVIDING FOR GENERAL AID TO STATE AND LOCAL GOVERNMENTS THROUGH THE SHARING OF FEDERAL INCOME TAXES

"Whereas, There is legislation pending before the Congress of the United States which

provides for the sharing of a fixed percentage of revenues from the individual federal income tax with state and local governments for purposes determined by them; therefore be it

"Resolved, That the General Court of Massachusetts hereby respectfully urges the Congress of the United States to enact pending legislation providing for the sharing of a fixed percentage of revenues from the individual federal income tax with state and local governments; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Secretary of the Commonwealth to each Senator and Representative in Congress from the Commonwealth.

"Senate, adopted, May 6, 1969.

"NORMAN L. PIDGEON,

"Clerk.

"House of Representatives, adopted in concurrence, May 8, 1969.

"WALLACE C. MILLS,

"Clerk.

"Attest:

"JOHN F. X. DAVOREN,

"Secretary of the Commonwealth."

A concurrent resolution adopted by the Legislature of Massachusetts; to the Committee on the Judiciary:

"RESOLUTION MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO RECOGNIZE THE ONE-HUNDRED MILE SEAWARD BOUNDARY OF THE COMMONWEALTH OF MASSACHUSETTS

"Whereas, The Commonwealth of Massachusetts was granted a seaward boundary to one hundred (100) miles offshore by the First Virginia Charter in the year 1606 and by the Council Charter in the year 1620; and

"Whereas, The Federal Submerged Lands Act of 1953, Subchapter I, expresses federal recognition of state seaward boundaries claimed prior to their entering the Union, "(A)nd to the boundary line of each such state where in any case such boundary as it existed at the time such state became a member of the Union . . ."; and

"Whereas, The First Virginia Charter of 1606 and the Council Charter of 1620 grant a seaward boundary of one-hundred miles to the Commonwealth of Massachusetts prior to its entering the Union in 1789; and

"Whereas, The Federal Submerged Lands Act presently favors only two Gulf of Mexico states and confines all other coastal states to a three-mile seaward limit; and

"Whereas, The Commonwealth of Massachusetts appears to have a strong historic claim to a seaward jurisdiction beyond three miles, which has not been considered by Congress or adjudicated by the courts; and

"Whereas, There is no evidence of Massachusetts surrendering this extensive seaward jurisdiction upon entering the Union; now, therefore, be it

"Resolved, That the Massachusetts General Court respectfully urges the Congress of the United States to recognize and to honor the one-hundred mile seaward boundary of the Commonwealth of Massachusetts; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Secretary of the Commonwealth to the President of the United States, to the Secretary of Interior, to the presiding officers of each branch of the Congress and to the members thereof from the Commonwealth.

"Senate, adopted, May 12, 1969.

"NORMAN L. PIDGEON,

"Clerk.

"House of Representatives, adopted in concurrence, May 15, 1969.

"WALLACE C. MILLS,

"Clerk.

"Attest:

"JOHN F. X. DAVOREN,

"Secretary of the Commonwealth."

A resolution adopted by the Navy League of the United States, Beverly Hills Council, Beverly Hills, Calif., regarding the persecu-

tion of ROTC and NROTC programs on college campuses; to the Committee on Armed Services.

A resolution adopted by the Kamimotobu Village Assembly, Kamimotobu, Okinawa, concerning request for return of Okinawa to Japan; to the Committee on Foreign Relations.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. MOSS, from the Committee on Interior and Insular Affairs, with an amendment:

S. 1193. A bill to authorize the Secretary of the Interior to prevent terminations of oil and gas leases in cases where there is a nominal deficiency in the rental payment, and to authorize him to reinstate under some conditions oil and gas leases terminated by operation of law for failure to pay rental timely (Rept. No. 91-205).

BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BIBLE:

S. 2240. A bill for the relief of Nelson Braz de Campos; to the Committee on the Judiciary.

By Mr. BIBLE (for himself, Mr. BURDICK, Mr. GRAVEL, Mr. HANSEN, Mr. HATFIELD, Mr. JORDAN of Idaho, Mr. MCGOVERN, Mr. METCALF, Mr. MONTOYA, Mr. MOSS, Mr. NELSON, Mr. PROXMIER, Mr. RANDOLPH, Mr. STEVENS, and Mr. YARBOROUGH):

S. 2241. A bill to authorize the Secretary of Health, Education, and Welfare to make Indian hospital facilities available to non-Indians under certain conditions; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. BIBLE when he introduced the above bill, which appear under an earlier heading.)

By Mr. MAGNUSON (by request):

S. 2242. A bill to amend section 17 of the Interstate Commerce Act to provide for judicial review of orders of the Interstate Commerce Commission, and for other purposes;

S. 2243. A bill to amend the Interstate Commerce Act to enable the Interstate Commerce Commission to utilize its employees more effectively and to improve administrative efficiency;

S. 2244. A bill to amend section 212(a) of the Interstate Commerce Act, as amended, and for other purposes; and

S. 2245. A bill to authorize the Interstate Commerce Commission, after investigation and hearing, to require the establishment of through routes and joint rates between motor common carriers of property, and between such carriers and common carriers by rail, express, and water, and for other purposes; to the Committee on Commerce.

(See the remarks by Mr. MAGNUSON when he introduced the above bills, which appear under a separate heading.)

By Mr. MOSS (for himself, Mr. CANNON, Mr. HART, Mr. INOUYE, Mr. MAGNUSON, and Mr. PASTORE):

S. 2246. A bill to amend the Federal Trade Commission Act, as amended, by providing for temporary injunctions or restraining orders for certain violations of that Act; to the Committee on Commerce.

(See the remarks of Mr. MOSS when he introduced the above bill, which appear under an earlier heading.)

By Mr. MONDALE:

S. 2247. A bill for the relief of Maria T. Coenen; and

S. 2248. A bill for the relief of Jam Hon

Jung Toy; to the Committee on the Judiciary.

By Mr. EAGLETON:

S. 2249. A bill for the relief of Dr. Young Wung Rhee; to the Committee on the Judiciary.

By Mr. PERCY:

S. 2250. A bill to amend part A of title IV of the Social Security Act to provide a more realistic standard of need in determining the amount of aid to be furnished an individual under a State plan approved under such part, and to provide additional financial assistance to States meeting such standard;

S. 2251. A bill to amend title IV of the Social Security Act to repeal the provisions limiting the number of children with respect to whom Federal payments may be made under the program of aid to families with dependent children; and

S. 2252. A bill to amend title IV of the Social Security Act to provide that State plans approved under such title must include, among the children eligible for aid and services thereunder, children in need because of the unemployment of their father; to the Committee on Finance.

(See the remarks of Mr. PERCY when he introduced the above bills, which appear under a separate heading.)

By Mr. KENNEDY:

S. 2253. A bill to amend the Act of August 7, 1961, providing for the establishment of Cape Cod National Seashore; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. KENNEDY when he introduced the above bill, which appear under a separate heading.)

By Mr. HARRIS:

S. 2254. A bill for the relief of Pun Yik San; and

S. 2255. A bill for the relief of Yah Pin Eng; to the Committee on the Judiciary.

By Mr. MOSS (for himself, Mr. CANNON, Mr. HART, Mr. HARTKE, Mr. INOUYE, Mr. MAGNUSON, Mr. PASTORE, Mr. SCOTT, and Mr. SPONG):

S.J. Res. 113. A joint resolution to authorize and direct the Federal Trade Commission to conduct a comprehensive investigation of unfair methods of competition and unfair or deceptive acts or practices in the home improvement industry, to expand its enforcement activities in this area, and for other purposes; to the Committee on Commerce.

(See the remarks of Mr. MOSS when he introduced the above joint resolution, which appear under an earlier heading.)

S. 2242, S. 2243, S. 2244, AND S. 2245—INTRODUCTION OF FOUR BILLS AMENDING THE INTERSTATE COMMERCE ACT

Mr. MAGNUSON. Mr. President, I introduce, by request, four legislative proposals recommended by the Interstate Commerce Commission. The proposals deal with four subjects; namely, motor carrier through routes and joint rates; suspension and revocation of motor carrier operating authority; delegation of authority to qualified individual employees; and revision of procedures for judicial review of the Commission's proceedings.

I ask unanimous consent that the letter of transmittal and the statements of justification together with the bills be printed in the RECORD at this point.

The PRESIDING OFFICER. The bills will be received and appropriately referred; and, without objection, the bills, letter of transmittal, and statements of justification will be printed in the RECORD.

The bills (S. 2242) to amend section 17 of the Interstate Commerce Act to provide for judicial review of orders of the

Interstate Commerce Commission, and for other purposes; (S. 2243) to amend the Interstate Commerce Act to enable the Interstate Commerce Commission to utilize its employees more effectively and to improve administrative efficiency; (S. 2244) to amend section 212(a) of the Interstate Commerce Act, as amended, and for other purposes; and (S. 2245) to authorize the Interstate Commerce Commission, after investigation and hearing, to require the establishment of through routes and joint rates between motor common carriers of property, and between such carriers and common carriers by rail, express, and water, and for other purposes, introduced by Mr. MAGNUSON (by request), were received, read twice by their titles, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 2242

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 17 of the Interstate Commerce Act (49 U.S.C. 17) is amended—

(1) by redesignating subsections (10) through (12) as subsections (11) through (13), respectively; and

(2) by inserting immediately after subsection (9) the following new subsection:

"(10) (a) The United States courts of appeals shall have exclusive jurisdiction to enjoin, set aside, annul, or suspend, in whole or in part, all final orders of the Interstate Commerce Commission made reviewable in accordance with the provisions of subsection (9) of this section: *Provided*, That orders of the Commission involving only the payment of money shall be subject to judicial review only in the district courts of the United States pursuant to sections 1336(a) and 1398(a) of title 28, United States Code, and orders of the Commission made pursuant to the referral of a question or issue by a district court or by the Court of Claims shall be subject to judicial review only in accordance with sections 1336 (b) and (c) and 1398(b) of title 28, United States Code. The jurisdiction of the courts of appeals shall be invoked by the filing of a petition as provided in this subsection.

"(b) The venue of any proceeding under this section or principal office of any of the parties filing the petition for review is located.

"(c) (1) Any party aggrieved by a final order reviewable under this subsection may, within sixty days from the date of service, file in the court of appeals, in which the venue prescribed by paragraph (b) lies, a petition to review such order: *Provided*, That, upon the filing of a petition within sixty days of the date of service of the order complained of, the court, for good cause shown, may extend the time for filing a petition to review such order for an additional period not exceeding sixty days. The clerk of the court of appeals shall serve, by registered or certified mail, a true copy of the petition upon the Commission and the Attorney General of the United States.

"(1) Unless the proceeding has been terminated following grant of a motion to dismiss the petition, the Commission shall file in the office of the clerk of the court of appeals in which the proceeding is pending the record on review, as provided in section 2112 of title 28, United States Code. Until such record has been filed by the Commission, the Commission may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any order, report, or decision made or issued by it and which is attached in a petition for review. Upon the filing of such record with it, the jurisdiction of the court of ap-

peals to enjoin, set aside, annul, or suspend orders of the Commission shall be exclusive.

"(d) Petitions to review orders reviewable under this section, unless determined on a motion to dismiss the petition, shall be heard in the court of appeals upon the record of the pleadings, evidence adduced, and proceedings before the Commission. If a party to a proceeding to review shall apply to the court of appeals, in which the proceeding is pending, for leave to adduce additional evidence and shall show to the satisfaction of such court (1) that such additional evidence is material, and (2) that there were reasonable grounds for failure to adduce such evidence before the Commission, such court may order such additional evidence and any evidence the opposite party desires to offer to be taken by the Commission. The Commission may modify its findings of fact, or make new findings, by reason of the additional evidence so taken and may modify or set aside its orders and shall file in the court such additional evidence, such modified findings or new findings, and such modified order or the order setting aside the original order.

"(e) The Commission may be represented by its own counsel, and the United States, through the Attorney General, shall be entitled to intervene in any proceeding. Any party or parties in interest in the proceeding before the Commission whose interests will be affected if an order of the Commission is or is not enjoined, set aside, or suspended, may appear as parties of their own motion and as of right, and may be represented by counsel in any proceeding to review such order. Communities, associations, corporations, firms, and individuals whose interests are affected by the Commission's order may intervene in any proceeding to review such order.

"(f) The filing of the petition to review shall not of itself stay or suspend the operations of the order of the Commission, but the court of appeals or a judge thereof in its discretion may restrain or suspend, in whole or in part, the operation of the order pending the final hearing and determination of the petition. Where the petitioner makes application for an interlocutory injunction suspending or restraining the enforcement, operation, or execution of, or setting aside, in whole or in part, any order reviewable under this section, at least five days' notice of the hearing thereon shall be given to the Commission and to the Attorney General of the United States. In cases where irreparable damage would otherwise ensue to the petitioner, the court of appeals may, on hearing, after reasonable notice to the Commission and to the Attorney General, order a temporary stay or suspension, in whole or in part, of the operation of the order of the Commission for not more than sixty days from the date of such order pending the hearing on the application for such interlocutory injunction, in which case such order of the court of appeals shall contain a specific finding, based on evidence submitted to the court of appeals, and identified by reference thereto, that such irreparable damage would result to the petitioner and specifying the nature of such damage. The court of appeals, at the time of hearing the application for an interlocutory injunction, upon a like finding, may continue the temporary stay or suspension, in whole or in part, until decision on the application. The hearing upon such an application for an interlocutory injunction shall be given preference and expedited and shall be heard at the earliest practicable date after the expiration of the notice of hearing on the application provided for above. Upon the final hearing of any proceeding to review any order under the provisions of this subsection, the same requirements as to precedence and expedition shall apply.

"(g) An order granting or denying an interlocutory injunction under paragraph (f) of this subsection and a final judgment

of the court of appeals shall be subject to review by the Supreme Court of the United States upon writ of certiorari as provided in section 1254 (1) of title 28, United States Code: *Provided*, That application therefor be duly made within forty-five days after the entry of such order and within ninety days after entry of the judgment, as the case may be. The United States, the Commission, or an aggrieved party may file such petition for a writ of certiorari. The provisions of sections 1254(3) and 2101(e) of title 28, United States Code, shall also apply to proceedings under this subsection.

"(h) The orders, writs, and process of the courts of appeals arising under this subsection and, of the district courts in cases arising under sections 20, 23, of this Act and section 3 of the Act of February 19, 1903 (48 U.S.C. 43) may run, be served, and be returnable anywhere in the United States."

SEC. 2. Chapter 157 of title 28, United States Code and any other provision of law inconsistent with this Act are hereby repealed: *Provided*, That any proceeding or case pending before a district court under such chapter on the effective date of this Act shall remain under the jurisdiction of such court until a final order, judgment, decree, or decision is rendered by such court: *Provided further*, That any such cases or proceedings referred to in the first proviso may be appealed to the Supreme Court as provided by section 1253 of title 28, United States Code, and, if remanded, such case may be referred back to the court from which the appeal was taken or to the court of appeals for further proceedings as the Supreme Court may direct.

SEC. 3. This Act shall take effect on the sixtieth day after the date of the enactment of this Act.

The material presented by Mr. MAGNUSON follows:

INTERSTATE COMMERCE COMMISSION,

Washington, D.C., April 24, 1969.

HON. SPIRO T. AGNEW,

President, U.S. Senate,

Washington, D.C.

DEAR MR. PRESIDENT: I am submitting herewith for your consideration four legislative recommendations of the Interstate Commerce Commission. Our four recommendations are on the following subjects:

1. Motor Carrier Through Routes and Joint Rates.
2. Suspension and Revocation of Motor Carrier Operating Authority.
3. Delegation of Authority to Qualified Individual Employees.
4. Revision of Procedures for Judicial Review of the Commission's Proceedings.

A copy of a draft bill and supporting justification for each proposal is enclosed. We would appreciate your assistance in having these proposals introduced and in having hearings scheduled on them.

The Commission is also considering additional legislative proposals for transmittal to Congress at a later date. Of prime consideration in this group is a proposal dealing with railroad passenger service. Although expected to be somewhat similar to a passenger service proposal submitted to Congress last year, this year's recommendation will not be forwarded until at least the Commission's current rail passenger cost study is completed.

Sincerely,

VIRGINIA MAE BROWN,
Chairman.

JUDICIAL REVIEW OF ORDERS OF THE INTERSTATE COMMERCE COMMISSION

The Interstate Commerce Commission recommends that section 17 of the Interstate Commerce Act be amended so as to provide for judicial review of the Commission's orders by the United States Courts of Appeals.

Judicial review of orders of the Interstate Commerce Commission is governed presently

by 28 U.S. Code §§ 1253, 1336, 1398, 2284, and 2321-2325. Briefly, such review is in a district court of three judges, at least one of whom shall be a circuit judge. The decisions of such courts are reviewable in the Supreme Court by appeal, rather than by certiorari.

The present statutory provisions for judicial review of the Commission's orders originated in the Urgent Deficiencies Act of 1913 (38 Stat. 219) which, in abolishing the Commerce Court, transferred its jurisdiction to the district courts. The following year, in the Federal Trade Commission Act of 1914, the Congress designated the Circuit Courts of Appeals to review orders of that agency. Thereafter, as new regulatory agencies were created, Congress usually provided for judicial review of their orders in the Courts of Appeals. At the same time, certain orders of the Federal Communications Commission, Maritime Commission, and the Department of Agriculture were made reviewable under the Urgent Deficiencies Act procedure. The so-called Hobbs Act or Judicial Review Act of 1950, 28 U.S.C. § 2341-52 (Supp. II, 1967) transferred review of the orders of these agencies to the courts of appeals, thus leaving only orders of the Interstate Commerce Commission reviewable in the three-judge district courts.

The existing procedures for judicial review of the Commission's orders have been subject to considerable criticism by members of the bar and the judiciary who have recommended that the Commission's orders be subject instead to review by the several United States courts of appeals. This change was also recommended in 1962 by the Special Advisory Committee on Interstate Commerce Commission Practices and Procedures (an advisory committee on practitioners established by the Commission) and the Administrative Conference of the United States in 1961. In 1968, it was also generally endorsed by the Judicial Conference of the United States and the Association of the Interstate Commerce Commission Practitioners, an organization representing a substantial segment of the Commission's bar.

In providing for judicial review in courts of appeals, with review in the Supreme Court by the discretionary writ of certiorari, enactment of this recommendation would make orders of the Commission reviewable in the same general manner as all other major federal regulatory agencies, i.e., CAB, FCC, FMC, SEC, FTC, and NLRB.

There are certain advantages in providing for judicial review in the courts of appeal. Those courts are regularly engaged in the review of orders issued by various Federal agencies while most district courts rarely do so. The courts of appeal also operate under the uniform Federal Rules of Appellate Procedure, promulgated in 1968 by the Supreme Court under 28 U.S.C. § 2072 (Supp. III 1967). In contrast, there are no specific rules governing review proceedings in three-judge district courts, with the result that procedures in such courts are on an *ad hoc* basis.

The attached draft bill, implementing this recommendation, is cast as an amendment to section 17 of the Interstate Commerce Act so that the statutory provisions for the review of the Commission's orders will appear in the same statute which gives the Commission authority to make such orders. In this respect, it follows the general pattern with respect to statutes creating administrative agencies and providing for judicial review of their orders. See, for example, section 1006 of the Federal Aviation Act, 49 U.S.C. 1486 (1964); section 5, as amended, of the Federal Trade Commission Act, 15 U.S.C. 45(b)-(j) (1964); and section 9, as amended, of the Securities Act of 1933, 15 U.S.C. 77i (1964).

Specifically, the draft bill amends section 17 of the Act by redesignating the present subsections 17(10) through 17(12), 49 U.S.C. 17(10)-(12) as subsections 17(11) through 17(13) respectively and inserting immediately after subsection 17(9) a new subsection

17(10) which sets forth the provisions, more particularly described below, for judicial review of the Commission's orders.

In general, these provisions have been written so as to conform with the Federal Rules of Appellate Procedure* since the statute, 28 U.S.C. § 2072 (Supp. III, 1967), authorizing the establishment of these rules provides, in pertinent part, that "all laws in conflict with such rules shall be of no further force or effect after such rules have taken effect." These rules are subsequently referred to as the Appellate Rules.

JURISDICTION

Paragraph (a) of the draft bill generally sets forth the provisions for judicial review of all Commission proceedings arising under subsection 17(9) except reparations and other cases involving the payment of money and orders of the Commission made pursuant to the referral of a question by a district court or the United States Court of Claims. Cases involving the payment of money would still be reviewable in a single-judge district court in accordance with present practices, as would cases involving fines, etc.

VENUE

The draft bill provides that a petition for review shall be filed in the judicial circuit which is the residence or principal office of any of the parties filing the petition. This is derived from the present venue provisions in 28 U.S.C. § 1398(a) (1964) governing review of orders of the Commission. As pointed out below, if the Commission's orders are made reviewable in the courts of appeals, 28 U.S.C. § 2112 (1964) will automatically provide a desirable procedure for consolidating into a single court multiple suits in different courts against the same order. It has been held that such a consolidation procedure is not available under existing law in many situations. *New York Central R. Co. v. United States*, 200 F. Supp. 944 (S.D.N.Y. 1961).

PETITIONS FOR REVIEW

Paragraph (c) (1) of the draft bill sets out the manner for review of the Commission's orders. First, it provides that a petition for review must be filed within 60 days from the date of service of the order complained of. Under present law, except for the uncertain and rarely applied doctrine of laches, there is no limit upon the time within which judicial review of the Commission's orders must be sought. The 60-day limitation proposed by the draft bill is found in the Hobbs Act and many other modern judicial review provisions. It will be useful in protecting, after a reasonable opportunity for challenge, the security of transactions authorized by the Commission. To avoid the working of any injustice in situations where the 60-day limitation provides insufficient time for the bringing of an appeal, this provision also provides for the filing of a petition by an appellant with the court for an extension of time, not exceeding 60 additional days, within which to file a petition for review. Second, the bill does not provide for the proceeding to be brought against the United States as presently required by 28 U.S.C. § 2322. Any petition for judicial review thus will be brought automatically against the Commission as the named respondent. This change brings the Commission into conformity with the present practice of such agencies as SEC, NLRB, FPC, CAB, and FCC in that those agencies are named as the respondents in suits seeking judicial review of their orders. It will reflect the fact that the Commission's attorneys today assume the primary and principal responsibility for the defense of its orders in the courts. The draft bill would

*The Appellate Rules together with the notes of the Advisory Committee on Appellate Rules are reproduced in 43 F.R.D. 61-62 (1968). See also Symposium on Federal Rules of Appellate Procedure, 28 *Fed. B. J.*, (Spring 1968).

also provide that the petition for review must be served upon both the Commission and the Attorney General. The draft bill does not attempt to prescribe the contents of the petition for review, this matter being covered by Appellate Rule 15 which simply requires the filing of a simple petition specifying the parties seeking review, the respondent, and the order or decision to be reviewed.

RECORD ON REVIEW

Under existing case, though not statutory, law, a person seeking judicial review of an order of the Commission has the burden of filing with the three-judge court a certified copy of the record of the proceedings before the Commission. *Mississippi Barge Line Co. v. United States*, 292 U.S. 282, 286; *Visceglia v. United States*, 24 F. Supp. 355, 356. The draft bill provides that the Commission shall file in the office of the clerk of the court of appeals in which the proceeding is pending the record on review, as provided in 28 U.S.C. § 2112 (1964). Providing for review of the Commission's orders in the courts of appeals would make applicable automatically (i.e., without specific reference) the provisions of 28 U.S.C. § 2112 and the provisions of Appellate Rules. This change would bring about the following changes in procedures for judicial review of the Commission's orders:

(a) It would provide a procedure for the consolidation of multiple suits against a single Commission order. Such suits would be consolidated in the court in which the first suit is filed, although this court, for the sake of convenience, could transfer the proceeding to another court of appeals. This is clearly a desirable procedure.

(b) Upon the commencement of a review proceeding, the Commission would be required to file with the court the original or a certified copy of the record of the proceedings before the Commission, except that the court may permit the filing of a certified list of the contents of the record in lieu of the record itself under Appellate Rule 17(b). Under our present review procedure, the plaintiff bears the burden of filing with the three-judge court a certified copy of the record before the Commission. Although this change may impose some additional burden on the Commission, it will bring its practice into line with present procedures for the review of all other Federal agency orders.

(c) In the first instance, it might be thought that placing upon the Commission the burden of supplying the record will encourage court challenges to Commission orders. However, any such tendency will be offset by the requirements of the Appellate Rules that the parties reproduce, by printing or otherwise, those portions of the Commission record upon which they are relying. Under the present three-judge court procedure, reproduction of the record is not required. In the experience of other agencies, most of this reproduction cost falls upon the private appellants.

The record filing and reproduction requirements of the various courts of appeals have been standardized by virtue of the promulgation of the Appellate Rules. Appellate Rule 32 permits reproduction of briefs and records by "any duplicating or copying process capable of producing a clear black image on white paper," thus sharply reducing the expense involved to parties seeking review of a Commission order.

PETITIONS TO REVIEW—PROCEEDINGS

Paragraph (d) provides that the proceedings in the court of appeals shall be based upon the record made in the proceedings before the Commission. It would further provide that the court may require the Commission to receive additional evidence where it is shown that there were reasonable grounds for failure to adduce it earlier.

REPRESENTATION: INTERVENTION

Because the bill does not provide, as does the present 28 U.S.C. § 2322, (1964) that such

proceedings shall be brought against the United States, it follows automatically that petitions to review must name the Commission as respondent. The United States would not be a party, but the bill would provide that "the United States, through the Attorney General, shall be entitled to intervene in any proceeding." The Commission and other parties may be represented by their own counsel. The provision for intervention is taken from 28 U.S.C. § 2323 (1964).

JURISDICTION OF PROCEEDING

Paragraph (c)(ii) of the draft bill would clarify and define the Commission's power under Section 15(2) in Part I of the Interstate Commerce Act and comparable provisions in Parts II, III, and IV of the Act to modify an order which is attacked by a petition to review. Some doubt was created as to the propriety of such an assertion of power in *Atchison, Topeka & Santa Fe Ry. Co. v. United States*, 231 F. Supp. 422, 426 (N.D. Ill., 1964); however, the exercise of such power was approved in *Aberdeen & Rockfish R. Co. v. United States*, 270 F. Supp. 705 (E.D. La. 1967). The bill would provide that the filing of a petition for review shall not cut off the Commission's power to modify its order, but that the filing of the record with the court of appeals will terminate such power except with leave of the court. In brief, the Commission would have a reasonable but not unlimited opportunity to correct its own errors.

STAYS: INTERLOCUTORY INJUNCTIONS

Paragraph (f) of the bill deals with the question of stays and interlocutory injunctions pending review of Commission orders in substantially the same manner as existing law, 22 U.S.C. § 2284 (1964). This subject is governed by Appellate Rule 18 which in pertinent parts states:

"The motion [for a stay] shall be filed with the clerk and normally will be considered by a panel or division of the court but in exceptional cases where such procedure would be impractical due to the requirements of time, the application may be made to and considered by a single judge of the court."

REVIEW IN THE SUPREME COURT

Under the present law, 28 U.S.C. 1253 (1964), a decision of a three-judge district court is subject to a right of direct appeal to the Supreme Court. This is a so-called appeal as of right, in the sense that the Supreme Court does not purport to exercise a discretion as to whether or not to review the case on its merits. Instead, if the Supreme Court does not set the case for briefing and argument (i.e., plenary consideration), it will issue an order summarily affirming or reversing the decision of the lower court. In most of the appeals from the three-judge courts, the Supreme Court issues a brief order, reading as follows: "The motions to affirm are granted and the judgment is affirmed." Thus, whether cases come to the Supreme Court by appeal or by the discretionary writ of certiorari, the Court selects the cases which it considers to warrant full briefing and oral argument.

Paragraph (g) of the proposed bill would provide for Supreme Court review by certiorari, rather than by appeal. This conforms to the method of seeking Supreme Court review which is applicable to all other Federal agencies.

Paragraph (g) would also preserve the Commission's present right to seek review in the Supreme Court with or without the concurrence of the Department of Justice by stating that, "The United States or the Commission or an aggrieved party may file such petition for a writ of certiorari."

Paragraph (h) of the draft bill preserves the second paragraph of 2321 of the Judicial Code, 28 U.S.C. § 2321 (1964) the balance of which is repealed by section 2 of the draft bill. The section provides for nationwide service of process for orders and writs issued by the courts of appeals in cases arising

under section 1 of the draft bill and proceedings arising in the district courts under sections 20 and 23 of the Act and section 3 of the Elkins Act, 49 U.S.C. § 43 (1964), all of which deal with the enforcement of various accounting, reporting, and tariff requirements of the Act and the rights of shippers to nondiscriminatory treatment by carriers subject to the jurisdiction of the Commission.

This provision is an exception to the general rule that a court's process does not run outside the State in which it is located, in the case of the district courts, or the circuit, in the case of the courts of appeals. Its retention is believed desirable because of the widespread operations of the nation's carriers.

Section 2 of this bill repeals sections 2321-2325 of the Judicial Code, 28 U.S.C. § 2321-25 (1964), which set out the present procedure for the review of the Commission's orders in the district courts. With the exception of the second paragraph of section 2321, which is preserved as paragraph (h) of this bill, all of these sections of the Judicial Code would be superseded by the provisions of section 1 of this bill and thus be rendered obsolete unless repealed. No change is required in other sections of the Judicial Code, e.g., sections 1336 and 1398 which also deal with the review and enforcement of the Commission's orders since they will still be applicable to cases involving reparations, fines, penalties and forfeitures which are not transferred to the courts of appeals by this bill. In order to insure an orderly transition from the present mode of review in the district courts to the courts of appeals, this bill provides for a 60-day transitional period and that cases pending in the district courts on the effective date of this Act will be processed to conclusion in such courts with the right of direct appeal to the Supreme Court as under the present law.

S. 2243

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 17(2) of the Interstate Commerce Act (49 U.S.C. 17(2)), is amended by inserting immediately after the second sentence therein the following: "The Commission may also refer to individual qualified employees for decision those matters which have not involved the taking of testimony at a public hearing or the submission of evidence by opposing parties in the form of affidavits. In cases where such matters are assigned to individual employees of the Commission, any order or requirement of such individual employee shall be subject to the same provisions with respect to reargument and reconsideration, with respect to reversal or modification, with respect to stay or postponement pending disposition of the matter by the Commission or appellate division, and with respect to suits to enforce, enjoin, suspend, or set aside such order or requirement in whole or in part, as are contained in paragraphs (6), (7), (8), and (9) of this section with respect to orders or requirements of a board."

The material presented by Mr. MAGNUSON follows:

DELEGATION OF AUTHORITY TO QUALIFIED INDIVIDUAL EMPLOYEES

The Interstate Commerce Commission recommends that section 17(2) be amended so as to authorize the Commission to delegate to qualified individual employees, including transportation economists and specialists, those matters which have not involved the taking of testimony at a public hearing or the submission of evidence by opposing parties in the form of affidavits.

In addition to a voluminous number of formal cases, the Commission's responsibilities under the Act extend to numerous matters of relatively routine and specialized nature. For example, matters relating to exten-

sions of time for filing annual, periodical, or special reports; rejection of tariff publications for failure to give lawful notice or failure to comply with the Commission's regulations; and orders assigning cases for hearing, extending dates for the filing of pleadings and postponing compliance dates. Except with respect to assignments to a Division or an individual Commissioner, under the present provisions of section 17(2), the Commission may delegate such functions only to three-man boards.

When applied to matters of the type described above, we believe that the mandatory requirements of section 17(2) are unnecessary and unduly limit our authority in what essentially is an administrative area.

The proposed recommendation has been narrowly drawn so as to affect only the processing of matters which have not involved the taking of testimony at a public hearing or the submission of evidence by opposing parties in the form of affidavits.¹ It would authorize the Commission to refer such matters to individual employees who in its judgment would be qualified to receive such delegations. In addition to directors and assistant directors of bureaus, examiners, chiefs of sections and attorneys who are now eligible under existing law to serve on employee boards and could also receive individual delegations, such personnel as accountants, economists and other transportation specialists as the Commission might designate could receive individual delegations to handle the limited range of matters covered by this recommendation. See Senate Report No. 117 on S. 758 (90th Congress, 2nd Sess.), p. 4. This recommendation also makes it clear that the right of any party to appeal a decision of an individual employee to the Commission or an appellate division thereof is specifically preserved in the same manner as appeals from decisions of employee boards under existing law.

In our judgment, enactment of the proposed legislation would enable us to utilize key employees more effectively and would contribute significantly to improved over-all administrative efficiency. A draft bill implementing this recommendation is attached.

EXHIBIT—EXAMPLES OF COMMISSION WORK, BUSINESS AND FUNCTIONS WHICH COULD BE DELEGATED TO INDIVIDUAL EMPLOYEES

OFFICE OF PROCEEDINGS

1. Areas where orders now are entered in the name of a single Commissioner or Division, such as orders assigning cases for hearing, orders extending dates for the filing of pleadings, orders postponing compliance dates, effective dates, and orders authorizing the changing of a name of a carrier, etc. This item would relieve Commissioners of the possibility of dealing personally with up to 10,000 items a year.

BUREAU OF ACCOUNTS

1. Authority to permit the use of prescribed accounts which by provisions of their own texts require special authority.

2. Authority to permit departures from general rules prescribing uniform systems of accounts.

3. Authority to prescribe by order, rates of depreciation to be used by individual carriers by railroad, water, and pipeline.

4. Authority to issue special authorizations permitted by the prescribed regulations governing the destruction of records of carriers.

5. Annual valuation of pipelines.

6. Approval of protective service contracts.

7. Authority to permit departures from the Regulation to Govern the Forms and Recording of Passes for carriers and other persons under Parts I and II.

¹ Matters of a type included in this category, together with brief comments pertaining thereto, are listed in an attached appendix.

It is apparent that matters arising under items 1 through 6 are of a highly technical nature; and, in this circumstance, we believe that the professional judgment of the bureau director or qualified members of his staff could be relied upon for their disposition.

8. Matters relating to annual, periodical or special reports of carriers, lessors, brokers, freight forwarders, and other persons under Parts I, II, III and IV, presently assigned to Division 2, for example: approval of changes in the reporting forms and other requirements which often are made to conform them to corresponding changes in the Commission's accounting rules governing the respective types of carriers.

9. Extensions of time for filing annual, periodical, or special reports; exemption of individual carriers and others from reporting requirements now assigned to the three-member Accounting and Valuation Board.

Items 8 and 9 are routine in nature. For example, the extension of filing dates is essentially an administrative matter. These delegations would relieve Division 2 of the necessity of passing upon some 25 report matters each year, and the Board of acting on some 50 applications per year in matters currently assigned to it.

BUREAU OF TRAFFIC

Approval of special permission applications, now handled by the Special Permission Board, consisting of three members.

There are about 6,800 of these items coming before the Special Permission Board each year. If this work is delegated to individuals, it probably would be divided among as many as three persons because of the volume. However, rather than have two or three board members look at each request for special permission, each of three individual delegates would look at one third of the total number.

S. 2244

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 212 of the Interstate Commerce Act (49 U.S.C., sec. 312(a)), is amended as follows:

(1) The second sentence is amended by inserting after the phrase "promulgated thereunder", the words "or under sections 831-835 of title 18, United States Code, as amended."

(2) The first proviso is amended by inserting immediately after the phrase "or to the rule or regulation thereunder", the words "or under sections 831-835 of title 18, United States Code, as amended."

(3) The second proviso is amended by inserting "215", immediately after "211(c)".

The material presented by Mr. MAGNUSON follows:

SUSPENSION AND REVOCATION OF MOTOR CARRIER OPERATING AUTHORITY FOR NONCOMPLIANCE WITH RULES, REGULATIONS OR ORDERS

The Interstate Commerce Commission recommends that section 212(a) of the Interstate Commerce Act be amended in the following respects: (1) to make motor carrier operating authorities subject to suspension, change, or revocation for willful failure to comply with any provision of Chapter 39, title 18 United States Code, Explosives and Other Dangerous Articles; and (2) to provide that the Commission may, upon reasonable notice, suspend motor carrier operating authorities for failure to comply with insurance regulations issued by it pursuant to section 215 thereof.

The purpose of this recommendation is to subject motor carrier operating authorities to suspension, change, or revocation for willful failure to comply with any provision of the Explosives Act. It is also designed to permit suspension of motor carrier operating

rights, upon notice for failure to comply with the Commission's insurance regulations.

Section 6(e)(4) of the Department of Transportation Act transfers the Commission's authority relating to explosives and other dangerous articles to the Department of Transportation. Neither the Department of Transportation nor the Commission has the authority to suspend and revoke certificate of any carrier for violation of the Explosives Act. However, we believe that to effect compliance with the Explosives Act it is essential that the Commission be given the authority to suspend and revoke certificates for serious violations of such Act. Consequently, we request that section 212(a) be amended to give the Commission this authority.

The second proviso in section 212(a) provides for the suspension, upon notice, but without hearing, of motor carriers' and brokers' operating authorities for failure to comply with brokerage bond regulations and tariff publishing rules. It does not, however, provide for suspension on short notice for failure to maintain proof of cargo, public liability, and property-damage insurance under section 215. As a result, the only remedy presently available under section 212(a) is revocation of the carriers' authority. All insurance filings made with the Commission are on a "continuous until cancelled" basis with a minimum 30-day cancellation provision. The motor carrier is immediately notified of an insurance cancellation and has ample time to make new arrangements. If replacing insurance is not received by the cancellation date, we now must commence lengthy and time-consuming show cause proceedings to obtain compliance or to revoke the operating authority. Approximately 400 such proceedings are commenced annually. The public may be adversely affected should losses occur during these proceedings. Section 410(f) is a counterpart of section 212(a) and contains a provision similar to the second proviso of section 212(a). The second proviso in section 410(f), however, provides for suspension on short notice of freight forwarder permits for failure to comply with the cargo insurance provisions under section 403(c) and the public-liability and property-damage insurance provisions under section 403(d). Our recommendation would bring section 212(a) into further conformity with section 410(f) by removing this distinction.

From the standpoint of the traveling and shipping public there is as much reason to require motor carriers to keep their cargo and public-liability and property-damage insurance in force as there is to require freight forwarders to keep their insurance in effect. It is therefore desirable in the public interest that the Commission have the authority to suspend motor carrier rights, on short notice, when insurance lapses, or is cancelled without replacement, until compliance is effected. The prospect of such action by the Commission should act as a deterrent to violations of this nature. An investigation under section 204(1) is not a satisfactory answer to the problem since such proceedings are sometimes necessarily lengthy and the public may be adversely affected should losses occur while it is pending.

The amendments proposed in this recommendation would enable the Commission to administer the enforcement provisions of part II of the Act more effectively.

Attached is a draft bill giving effect to the above recommendation.

S. 2245

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That section 216(c) of the Interstate Commerce Act (49 U.S.C. 316(c)) is amended to read as follows:

"(c) It shall be the duty of common carriers of property by motor vehicle to establish reasonable through routes and just and

reasonable rates, charges, and classifications applicable thereto with other such carriers and/or common carriers by railroad and/or express and/or common carrier by water subject to part III; and it shall be the duty of common carriers by railroad and/or express and/or common carriers by water subject to part III, to establish reasonable through routes and just and reasonable rates, charges, and classifications applicable thereto with common carriers of property by motor vehicle. Common carriers of passengers by motor vehicle may establish reasonable through routes; joint rates, fares, or charges with common carriers by railroad and/or common carriers by water. Common carriers of property by motor vehicle may establish through routes and joint rates with common carriers by water other than those subject to part III; and in the case of through routes and joint rates so established with common carriers by water subject to the Shipping Act of 1916, as amended, or the Intercoastal Shipping Act of 1933, as amended (including persons who hold themselves out to transport goods by water but do not own or operate vessels) between Alaska or Hawaii on the one hand, and, on the other, between the other States of the Union such through routes and joint rates and all classifications, regulations, and practices in connection therewith shall be subject to the provisions of this part. In the case of joint rates, fares, or charges, it shall be the duty of the carriers party thereto to establish just and reasonable regulations and practices in connection therewith, and just, reasonable and equitable divisions thereof as between the carriers participating therein which shall not unduly prefer or prejudice any of such participating carriers."

Sec. 2. Section 216(e) of the Interstate Commerce Act (49 U.S.C. 316(e)) is amended to read as follows:

"(e) (1) Any person, State board, organization, or body politic may make complaint in writing to the Commission that any such rate, fare, charge, classification, rule, regulation, or practice, in effect, or proposed to be put into effect, is or will be in violation of this section or of section 217. Whenever, after hearing, upon complaint or in an investigation on its own initiative, the Commission shall be of the opinion that any individual or joint rate, fare, or charge, demanded, charged, or collected by any common carrier or carriers by motor vehicle or by any common carrier or carriers by motor vehicle in conjunction with any common carrier or carriers by railroad and/or express and/or water for transportation in interstate or foreign commerce, or any classification, rule, regulation, or practice whatsoever of such carrier or carriers affecting such rate, fare, or charge or the value of the service thereunder, is or will be unjust or unreasonable, or unjustly discriminatory or unduly preferential or unduly prejudicial, it shall determine and prescribe the lawful rate, fare, or charge or the maximum or minimum, or maximum and minimum rate, fare, or charge thereafter to be observed, or the lawful classification, rule, regulation, or practice thereafter to be made effective.

"(2) The Commission shall, whenever deemed by it to be necessary or desirable in the public interest, after hearing, upon complaint or upon its own initiative without a complaint, establish reasonable through routes and joint rates, fares, charges, regulations, or practices, applicable to the transportation of passengers by common carriers by motor vehicle, or to the transportation of property by common carriers by motor vehicle or by common carriers of property by motor vehicle and/or common carriers by railroad and/or express and/or common carriers by water subject to part III, or the maximum or minimum, or the maximum and minimum, to be charged, and, when the carriers involved cannot agree, the divisions of such rates, fares, or charges as hereinafter provided, and the terms and conditions

under which such through routes shall be operated. In the case of any such through routes established by the Commission between common carriers of property by motor vehicle and/or common carriers by railroad and/or express and/or common carriers by water subject to part III, the Commission shall not (except as provided in sections 3, 216(d), or 305(c)), require any carrier without its consent to embrace in such route substantially less than the entire length of its route and of any intermediate carrier operated in conjunction and under a common management or control therewith, which lies between the terminal of such proposed through routes, (a) unless such inclusion of lines would make through route unreasonably long as compared with another practicable through route which could otherwise be established, or (b) unless the Commission finds that the through route proposed to be established is needed in order to provide adequate and more efficient or more economic transportation: *Provided*, That in prescribing through routes the Commission shall, so far as is consistent with the public interest, and subject to the foregoing limitations in clauses (a) and (b), give reasonable preference to the carrier which originates the traffic. In the case of any through route established by the Commission between common carriers of property by motor vehicle and other such carriers, the limitations in this section on the Commission's power to establish through routes shall apply only to the carrier originating the traffic. No through route and joint rate applicable thereto shall be established by the Commission for the purpose of assisting any carrier that would participate therein to meet its financial needs. To enable the provisions of coordinated interline service by any common carrier or carriers of property subject to the provisions of this section for which there is an immediate and urgent need or other emergency as determined by the Commission, the Commission, upon complaint or its own initiative, may, in its discretion and without hearings or other proceedings, require the establishment of temporary reasonable through routes to a point or points or within a territory having no coordinated service capable of meeting such need. Such through routes may be established, under such rules and regulations as the Commission may prescribe, for such time as the Commission shall specify but for not more than an aggregate of sixty days: *Provided, however*, That such through routes may be continued for a period beyond an aggregate of sixty days until further order of the Commission where a formal proceeding is instituted under the first sentence of this paragraph within the time such through routes are in effect and the Commission finds that the continuance of such temporary through routes is necessary or desirable in the public interest: *And provided further*, That, the establishment of such temporary through routes by the Commission shall create no presumption that such through routes will be prescribed thereafter on a permanent basis or will be found to be otherwise necessary or desirable in the public interest.

"(3) If any tariff or schedule canceling any through route or joint rate, fare, charge, or classification, whether established under the first sentence of section 216(c) or prescribed hereunder, without the consent of all carriers parties thereto or authorization by the Commission, is suspended by the Commission for investigation, the burden of proof shall be upon the carrier or carriers proposing such cancellation to show that it is consistent with the public interest.

"(4) Nothing in this part shall empower the Commission to prescribe, or in any manner regulate, the rate, fare, or charge for intrastate transportation, or any service connected therewith, for the purpose of removing discrimination against interstate

commerce or for any other purpose whatever."

The material presented by Mr. MAGNUSON follows:

THROUGH ROUTES AND JOINT RATES

The Interstate Commerce Commission recommends that part II of the Act be amended to authorize the Commission, after investigation and hearing, when necessary and desirable in the public interest, to require the establishment of through routes and joint rates between motor common carriers of property and between those carriers and common carriers by rail, express, and water.

With the growth of the Nation's economy, the expansion of the motor carrier industry, and technological improvements in the transportation field, greater stress has been placed upon the importance of having a more coordinated national transportation system. Of fundamental importance to the accomplishment of this objective is the establishment of through routes and joint rates within and between the various modes of carriage. It follows, therefore, that in many instances the failure or refusal of carriers to enter into such arrangements is contrary to the public interest in the furtherance of a more coordinated national transportation system.

The availability of through routes and joint rates inures to the benefit of the shipping public in numerous ways. It enables a shipper to make one contract with the originating carrier on behalf of all carriers participating in the arrangement. In addition, the shipper may ascertain the rate for a through movement by consulting a single tariff instead of many. Both shipper and consignee also have the advantages provided by section 20(11) and similar provisions in other parts of the Act of recovering from either the originating or delivering carrier for loss or damage caused by any carrier participating in the through movement. Moreover, experience has shown that because of the economy of established channels of commerce through which substantial amounts of traffic may flow, and reduced freight rate calculation costs, joint rates are generally lower than a combination of local rates of connecting carriers not participating in such through service arrangements.

At present, the only common carriers of different modes which may be required by the Commission to establish through routes and joint rates with each other are railroads, pipelines, and express companies subject to part I of the Act; and railroads subject to part I and common carriers by water subject to part III. The only intramodal joint-rate arrangements that may be required by the Commission are between railroads, pipelines, and express companies, respectively, subject to part I, common carriers of passengers by motor vehicle subject to part II, and common carriers by water subject to part III. Common carriers of property by motor vehicle subject to part III are permitted, but may not be required to enter into joint-rate arrangements with other such carriers or with common carriers of other modes; nor, on the other hand, may common carriers of other modes be required to establish through routes and joint rates with motor carriers. Our recommendation would close this gap in existing law.

In the case of through routes among motor common carriers of property, most of the regular-route, general commodity motor carriers participate in agency tariffs and are parties to the joint rates published therein. Tariffs filed under such voluntary joint arrangements often contain many restrictions as to individual carriers or classes of commodities, thereby limiting the availability of through interline service to the shipping public as to points of interchange. At the present time, the Commission's authority over motor carrier through routes and joint rates is limited. Since existing law neither imposes a positive duty on the carriers to establish such joint arrangements nor authorizes the Commission

to order their establishment, the Commission's present authority is essentially confined to situations where tariffs containing through routes and joint rates voluntarily established are subsequently cancelled by one or more of the participating carriers. In such situations, the Commission has found in certain cases that such actions constitute an unreasonable, and therefore unlawful, practice within the meaning of section 216(b) of the Act or an undue and unreasonable disadvantage under Section 216(b) of the Act as to certain classes of commodities and/or shippers. In a recent decision¹ applying these principles to a tariff rule providing that the carrier publishing the rules maintained no through routes, joint rates or interchange arrangements on shipments of furniture, the Commission upon finding the tariff rule in question unlawful, pointed out:

"Our decision herein in no way lessens the overall need as we see it for through route-joint rate legislation. Our decision herein will curb the practice of extreme selectivity, but will fall short of the goal of placing a positive duty upon rail, water and motor common carriers to promote coordinated through service."

Absent the special circumstances present in this or similar situations, and in the absence of the establishment of joint-rate arrangements among motor common carriers of property on a voluntary basis, the only feasible way in which the Commission may provide for through motor carrier service under existing law is by granting extensions of operating rights to existing carriers or by approving consolidations and mergers of connecting carriers. The granting of such extensions is not always desirable, however, since it may result in a surplage of carriers over certain routes. Many shippers have demonstrated their reluctance to rely on voluntary arrangements by prevailing upon motor common carriers to file applications to extend their operating authority to include every point to which the shipper's traffic moves. Shippers justify their position, in many instances, by claiming that they are entitled to hold one carrier responsible for the safe and efficient transportation of their freight. Frequently, the Commission finds it necessary to grant such authority because of the failure of connecting carriers to adduce evidence of their willingness and ability to participate in joint-line service.

As noted, the fundamental purpose of this proposal is the advancement and promotion of a coordinated transportation system by common carriers of all modes subject to the Commission's jurisdiction on an intra and intermodal basis. Although the economic advantages of coordination have served to stimulate considerable voluntary action by the carriers, the full benefits of coordination have not been evenly distributed among the carriers or the shipping public. Indicative of the difficulties in this area is the major problem of adequate transportation for small shippers, particularly in the case of service to smaller communities. In 1967, a report on the problems in the small shipment area, issued by a special Committee on the Small Shipments Problem, composed of three members of the Commission, outlined the many transportation difficulties confronting the user of small-shipment service. Among these difficulties, the Committee found that one of the most serious was the lack of suitable interline service by motor carriers. If the Commission were granted the authority to require through routes and joint rates it could then require carriers to establish such interline service to small shippers. This would provide a significant contribution to the solution of the small shipment problem.

Although the problems with respect to the

¹ No. 34815, *National Furniture Traffic Conference, Inc., v. Associated Truck Lines, Inc.*, 322 I.C.C. 802, decided December 31, 1968.

full development of intermodal coordination are neither so acute nor widespread at the present time, there is ample reason to cover this area as well in this proposal. For many years railroads and motor carriers were reluctant to enter into through-route and joint-rate arrangements. While, in recent years, there has been some relaxation of this attitude on the part of the carriers, especially with the growth of "piggyback" service, such arrangements are, as in the case of these between motor common carriers of property, entered into on a permissive and voluntary basis subject to termination at any time. Here again, the lack of any obligation on the part of the carriers to continue in effect such joint through route arrangements is not conducive to the maintenance of dependable joint-line service.

Although no serious problems appear to have arisen in connection with the establishment of through routes and joint rates between common carriers by water and motor common carriers of property, the fear of collapse of such arrangements because of their permissive and voluntary nature is, of course, always present.

In sum, enactment of this proposal would permit the Commission, in proper cases, to compel the establishment and maintenance of dependable joint-line service responsive to the needs of the shipping public, and, at the same time, protect the carriers from unfair or unreasonable demands to provide through service. It would also have the effect of according greater equality of treatment in the regulation of the carriers of the various modes. We feel strongly that this recommendation would be a major contribution to a more coordinated transportation system, and would provide vastly improved service for the shipping public.

The draft bill implementing this recommendation revises section 216(c) and 216(e) of part II of the Interstate Commerce Act by making the following changes in existing law:

(1) Section 1 imposes a duty on common carriers of property by motor vehicle to establish through routes and just and reasonable rates, classifications, charges, etc., applicable thereto with other such carriers and with common carriers by railroad, express, and water subject to part III of the Act. This section also imposes a duty on these other modes to establish similar arrangements with motor common carriers of property.

(2) Section 2 authorizes, with certain specified limitations, the Commission to order the establishment of through routes and/or joint rates by motor common carriers of property with other such carriers or with common carriers by railroad, express and water carriers subject to part III of the Act. This section also authorizes the Commission to establish temporary through routes where there is an immediate and urgent need or other emergency for coordinated interline service.

In essential respects, the majority of these amendments are modeled after S. 751/H.R. 6533 (90th Cong., 1st Sess.) and the existing provisions of parts I and III of the Act which deal with the establishment of joint rates and through routes between railroads and common carriers by water on an intra and intermodal basis. The provision dealing with the establishment of through routes on a temporary basis is new and is designed to deal with the situation where a carrier or carriers fails in their duty, under section 1 of the bill, to establish reasonable through routes for the benefit of the shipping public. It thus may become necessary for the Commission to institute, upon complaint or its own motion, a formal proceeding, under section 2, leading to the prescription of such through routes. Since such a proceeding could entail a lengthy hearing or other proceedings, it seems desirable to provide for the establishment of temporary through routes for a limited time to avoid adverse effects on the shipping public due to a lack of available through interline service. This provision limits the establishment of such through routes to an

aggregate of sixty days unless such time is extended in conjunction with a subsequent formal proceeding involving the prescription of through routes and joint rates. The establishment of such temporary through routes by the Commission would be subject to the same limitations on the Commission's authority as are imposed by the draft bill in a case of through routes prescribed on a permanent basis in the course of a formal proceeding.

The draft bill does not contain specific provisions specifying such matters as the conditions under which any through route would be operated, divisions of joint rates, or the settlement of interline balances. It seems more desirable and appropriate that these and similar matters be handled, where necessary, through either a formal case-by-case determination or through the exercise of the Commission's rulemaking power in which all interested parties could participate.

Other parts of the draft bill restate, in revised form, provisions of existing law which permit, but do not require: 1) the establishment of joint rates and through routes between motor common carriers of passengers and common carriers of passengers by other modes; 2) the establishment of joint rates and through routes between motor common carriers of property and common carriers by water, other than those subject to the jurisdiction of the Commission under part III of the Act; and 3) the retention, in a somewhat revised form, of the special provisions of Public Law 87-595, commonly known as the "Rivers Act," which deal with the jurisdiction of the Commission over water-motor through routes and joint rates applying between Alaska and Hawaii on the one hand and, the other States of the Union on the other.

S. 2250, S. 2251, AND S. 2252—INTRODUCTION OF BILLS TO AMEND THE PUBLIC ASSISTANCE PROVISIONS OF THE SOCIAL SECURITY ACT

Mr. PERCY. Mr. President, I am introducing today three bills to amend the public assistance provisions of the Social Security Act. These bills will correct certain inadequacies in the aid to families with dependent children program.

The Nation's welfare program has been the subject of much controversy. It satisfies neither those who contribute to it through their taxes nor those who benefit from it through welfare checks. And the system certainly does not please those who must administer the public assistance programs, the States.

Despite this controversy, there is one point of agreement: the welfare system must not be self-perpetuating. It must eliminate the very reason for its existence—poverty. The system will perish, however, only if welfare programs can motivate all recipients to lead decent, productive lives.

AFDC is particularly important in this effort. It is the major program providing families with the support necessary to give their children the food, clothes, and stable home life essential in making them contributing members of society.

But public assistance is not working toward attainment of this goal. In fact, it is not only failing to meet the needs of recipients, it is also proving to be a hardship for State and local taxpayers because of rising welfare costs.

Today, most of our States are in the throes of a fiscal crisis. They simply do not have sufficient revenue to provide adequate services for their residents. The increasing welfare costs they must pay

are contributing greatly to their fiscal problems.

Illinois, for example, increased AFDC payments by 22 percent from \$57.6 million in 1967 to \$70.4 million in 1968. This made AFDC the State's most expensive welfare program, surpassing even medic-aid. Not only did the absolute cost to the State of AFDC increase, but the proportion of State to Federal payment similarly increased. Currently, Illinois pays 55 percent of its AFDC costs as compared to the 45 percent the Federal Government contributes. This is quite an increase from the middle of 1968 when the State's share was approximately 46 percent.

While all the States must meet the spiraling cost of providing public assistance, the larger, industrial States are by far the most adversely affected. These States tend to make higher AFDC payments and thus stimulate the migration of poor families to them. Migrants mean burgeoning welfare rolls, which, of course, result in substantially higher welfare costs for these States to meet.

In the past 10 years, the 15 States with the highest average monthly AFDC grants per family experienced a growth of about 163 percent in their caseload. In comparison, the 15 States with the lowest average monthly grants per family experienced only a 15.6-percent growth in their caseload. While some of the new cases in the highest paying States are attributable to natural population growth and desertion, many are the results of migration.

Steps must be taken now to alleviate the burden of welfare payments placed on the States and to end the disparity of welfare grants which result in mass migration to industrial States and urban areas. We must revise our welfare system to eliminate these deficiencies which are so detrimental to the States. Basic to this overhaul is the implementation of two policies already advocated by Vice President Agnew and several Members of the Senate: the establishment of minimum Federal standards and increased Federal contributions for welfare payments.

The first bill I am introducing today is a step in this direction. It will provide welfare recipients with a uniform minimum payment and the States with additional funds to meet their welfare expenses.

This bill will establish a \$40 minimum budget for States to use in computing AFDC assistance for each case. It will insure recipients of at least \$40 a month from combined AFDC payments and their other sources of income. To help States defray the cost of these provisions, the Federal Government will contribute 100 percent of the first \$30 in AFDC payments, and half of the next \$40. Under this formula, all States will receive a greater Federal reimbursement than they do at this time.

The second bill I am introducing will also afford the States relief in meeting welfare costs. This legislation will repeal the freeze on the level of Federal participation in AFDC programs scheduled to become effective on July 1. As of that date, a State will receive Federal reimbursement for payments made only to the number of AFDC children in the State as of January 1, 1969. The State,

however, must continue to make payments to everyone who qualifies for AFDC. This means that in Illinois, alone, AFDC funds will go to 30,000 children for whom the State will not be reimbursed.

The freeze was enacted in 1967 to curb the cost of Federal welfare assistance and to encourage the development of programs to end poverty by increasing employment and decreasing illegitimacy. But it is a false economy as the Senate recognized last session by voting to rescind the freeze. It does not decrease welfare costs or reduce the numbers of the impoverished. Instead, it unjustly deprives children of support because of the difficulties of their parents and imposes a heavy and inequitable burden on the States.

The AFDC caseload and payment figures for Illinois are illustrative of the magnitude of this program and the expense the freeze will be for the States.

By December 1968, the AFDC caseload in Illinois had increased 14.4 percent over the 1967 figure. By April of this year, there were 314,000 people on the AFDC rolls at a cost to the State of \$70.4 million. The Department of Public Assistance estimates that \$6 million a year will be added to this figure as a result of the freeze. In July, Illinois will have to pay 25,000 AFDC children a half million dollars a month without Federal reimbursement.

To meet the costs of limited Federal contributions to AFDC, States will either have to raise additional revenue from already heavily taxed residents or reduce the payments made to each AFDC recipient. If a State elects to reduce payments, its Federal reimbursement would similarly be reduced, further depleting its limited revenue.

The rescinding of the freeze on Federal participation in AFDC will be particularly important if the third bill I am introducing is enacted. This legislation will augment the number of AFDC recipients. It will, however, correct one of the welfare system's critical deficiencies—the incentive for men to desert their families in order to qualify them for welfare—by making AFDC-UP mandatory. A similar measure was passed by the Senate during the previous session.

Desertion by a parent, usually the father, is a major reason a family is added to the welfare rolls. Broken homes also contribute to the incidence of crime and disorder which disrupt our society. Public policy must, therefore, encourage family unity and responsibility, not destroy them. A father should be motivated to remain in his home and care for his children. Public welfare should not provide the reason or the excuse for his deserting his family. Allotting AFDC payments to children with unemployed parents will remove an important incentive for desertion.

In addition to the augmenting family stability, AFDC-UP will eventually lower welfare costs by helping the unemployed parent to secure a job. The Social Security Act contains a provision that requires unemployed recipients of welfare to be referred to a job training program within 30 days of receiving welfare assistance. Such a program will provide him with

the skills necessary to obtain employment and support his family.

Mr. President, I urge prompt consideration and enactment of the three bills I am introducing today to correct the more glaring deficiencies in our AFDC program.

The PRESIDING OFFICER. The bills will be received and appropriately referred.

The bills (S. 2250), to amend part A of title IV of the Social Security Act to provide a more realistic standard of need in determining the amount of aid to be furnished an individual under a State plan approved under such part, and to provide additional financial assistance to States meeting such standards; (S. 2251) to amend title IV of the Social Security Act to repeal the provisions limiting the number of children with respect to whom Federal payments may be made under the program of aid to families with dependent children; and (S. 2252) to amend title IV of the Social Security Act to provide that State plans approved under such title must include, among the children eligible for aid and services thereunder, children in need because of the unemployment of their father, introduced by Mr. PERCY, were received, read twice by their titles, and referred to the Committee on Finance.

S. 2253—INTRODUCTION OF A BILL FOR THE CONTINUED ACQUISITION OF LAND FOR THE CAPE COD NATIONAL SEASHORE

Mr. KENNEDY. Mr. President, today I introduce for appropriate reference a bill to provide for the continued acquisition of land for the Cape Cod National Seashore. The original act, signed into law by President Kennedy in 1961, authorized an expenditure of \$16,000,000 for the acquisition of 27,000 acres for the seashore.

In August of 1967, with some 8,000 acres short of the 27,000 designated as the seashore, the appropriated funds for acquisition were exhausted. It is now estimated that an additional \$17,401,000 will be required to bring the land under the ownership of the seashore.

Last year, over 3 million Americans visited the seashore. As the reputation of the seashore spreads, and as additional areas are developed and opened to the public, this number will increase significantly. It is indeed a tribute to the Congress and to our Government that such an area of unspoiled natural beauty has been preserved for the enjoyment of our citizens. The success of the seashore will ever serve as an encouragement to us to continue our efforts to preserve some of our greatest natural resources to ensure that our citizens and all future generations of Americans can share in their beauty and enjoy the recreational and educational benefits they present.

Certainly, we cannot fail to provide for the complete acquisition of the land designated for this truly unique national park. 27,000 acres of land set aside for preservation is certainly not too much to ask.

In 1967, I submitted similar legislation. However, at that time, the additional funds necessary were estimated at \$12,-

000,000. By our delay in fulfilling the purpose of the act, we have suffered an increased cost of \$5,401,000.

I am well aware of the need to be sensitive to the demands to cut our budget. However, I submit that we cannot fail to take advantage of an opportunity to provide our citizens and future generations with a recreational and educational preserve in this time of population growth, serious lack of open space land use in our cities, and suburban sprawl. Nor can we continue to place the burden of our inaction and indecision on the 2,500 landowners whose properties have already been earmarked for Seashore acquisition.

The Cape Cod National Seashore is within a 1-day drive for 30 million people and is within easy vacation access to millions more. I am asking today that we complete the task which the Congress and President Kennedy undertook in 1961: That we raise the authorization by \$17,401,000.

I am convinced that it is the intent of the Congress to complete the task. I only remind my colleagues that the cost of completion will continue to increase as we continue to delay action.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2253) to amend the act of August 7, 1961, providing for the establishment of Cape Cod National Seashore, introduced by Mr. KENNEDY, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

ADDITIONAL COSPONSORS OF BILLS

Mr. BYRD of West Virginia. Mr. President, on behalf of the Senator from Minnesota (Mr. MONDALE), I ask unanimous consent that, at its next printing, the names of the Senator from North Dakota (Mr. BURDICK), the Senator from Alaska (Mr. GRAVEL), the Senator from Washington (Mr. JACKSON), and the Senator from Maine (Mr. MUSKIE), be added as cosponsors of the bill (S. 1788) to assist in removing the financial barriers to the acquisition of a postsecondary education by all those capable of benefiting from it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that, at its next printing, the names of the Senator from New Jersey (Mr. CASE), the Senator from Alaska (Mr. GRAVEL), and the Senator from Texas (Mr. YARBOROUGH) be added as cosponsors of the bill (S. 2165) to enable citizens of the United States who change their residence to vote in presidential elections, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RESOLUTION 204—SUBMISSION OF A RESOLUTION AUTHORIZING EXPENDITURES FROM THE CONTINGENT FUND OF THE SENATE

Mr. RUSSELL submitted the following resolution (S. Res. 204); which was referred to the Committee on Rules and Administration:

S. RES. 204

Resolved, That the Committee on Appropriations hereby is authorized to expend from the contingent fund of the Senate, during the Ninety-first Congress, \$35,000, in addition to the amounts, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act, approved August 2, 1946.

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969—AMENDMENT

AMENDMENT NO. 23

Mr. COOPER submitted an amendment intended to be proposed by him to the bill (S. 1300) to improve the health and safety conditions of persons working in the coal mining industry of the United States; which was referred to the Committee on Labor and Public Welfare and ordered to be printed.

(See remarks on above amendment when submitted by Mr. COOPER, which appear under a separate heading.)

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. ERVIN. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

Seagal V. Wheatley, of Texas, to be U.S. Attorney for the western district of Texas for the term of 4 years, vice Ernest Morgan, resigned.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing on or before Monday, June 2, 1969, any representations or objections they may wish to present concerning the above nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

NOTICE OF HEARING

Mr. ERVIN. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Tuesday, June 3, 1969, at 10:30 a.m., in room 2228, New Senate Office Building, on the following nomination:

Warren E. Burger, of Minnesota, to be Chief Justice of the United States.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The hearing will be before the full committee of which Senator JAMES O. EASTLAND, of Mississippi, is chairman.

NOTICE OF HEARINGS

Mr. SPARKMAN. Mr. President, I wish to announce that the Committee on Banking and Currency will hold a hearing on Tuesday, May 27, 1969, on the nomination of John Conrad Clark, of North Carolina, to be a member of the Board of Directors of the Export-Import Bank of the United States.

The hearing will commence at 10:30 a.m. in room 5302 New Senate Office Building.

NOTICE OF HEARINGS

Mr. MUSKIE. Mr. President, I should like to announce that the Subcommittee on International Finance of the Committee on Banking and Currency will meet on May 28, 1969, to conclude hearings on S. 813 and S. 1940, bills pertaining to export control legislation.

The hearings will commence at 9:30 a.m. in room 5302, New Senate Office Building.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

INVESTMENT COMPANY AMENDMENTS ACT OF 1969

Mr. SPARKMAN. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate.

The PRESIDING OFFICER. The bill will be stated by title.

The BILL CLERK. A bill (S. 2224) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama? The Chair hears none.

There being no objection, the Senate resumed the consideration of the bill.

Mr. BENNETT. Mr. President, last year over the opposition of about a third of the Senate, this body approved legislation further regulating the mutual fund industry.

In contrast, this year the committee is united on the proposal it brings to the Senate for its approval. To be sure, there are still some minor differences among committee members as there always are, but the overall thrust and major provisions of the bill have been approved by the committee almost unanimously and there was no opposition to reporting the bill. It may seem surprising, but both the Securities and Exchange Commission and the mutual fund industry are also in general accord with the bill's provisions. Certainly, it cannot be expected that the industry would welcome complete governmental control over its activities, nor can it be expected that the Commission charged with assuring proper conduct throughout the industry, would be satisfied with less than authority to control all possible potential abuses, yet both the industry and the Commission consider this proposal, much improved over last year's version.

This much improved version is the result of the legislative process working at its best. Last year, we took action on the bill before the industry and the commission had completed negotiations to work out their differences. This year, as the result of a cooperative attitude on the part of the members of the committee, the Commission, and the industry, it has been possible to work out provisions which meet to a much greater
